agency

JOHN L. McQUIGG, vice president-manager, Geyer, Newell & Ganger Detroit, to Lennen & Newell [B•T, May 26] as vice president in charge of Detroit office and member of board of directors.

JOHN T. McHUGH, CHARLES M. HARRISON and HARRY KULLEN elected vice presidents of Joseph Katz Co., Baltimore. EDGAR KASSAN, ROLAND BRAVE, STANLEY BLUMBERG and GRAYDON WALKER named to plans board. ROBERT G. SWAN, radio-TV head, promoted to vice president and director of radio-TV.

EDWARD MacDONALD, Hearst Adv. Service, N. Y., to research department, Young & Rubicam, that city, as head of media research.

FLORENCE KATZ, Leland K. Howe Assoc., to Emil Mogul Co., N. Y., as assistant radio-TV timebuyer. MORT WYNER, *Television Magazine*, to agency's executive staff and HAROLD MALK appointed junior account executive.

A. J. CASON, Sears, Roebuck & Co., Chicago, to Kenneth B. Butler & Assoc., Mendota, Ill., as copy writer and account executive.

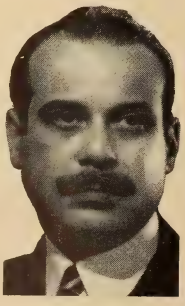
DONALD H. JILSON, technical copy writer, Leeds & Northup Co., Phila. to Richard A. Foley Adv., that city.

on all accounts

"THERE are no generalizations in the advertising business," says Maurice Belmont Ver Standig, president of Washington's M. Belmont Ver Standig agency.

"Any advertising man who tries to pass along broad statements as to how to handle a new client is just talking," Mr. Ver Standig declared.

"You just don't know how best to handle a new client's advertising until after you've made a lot of tests. We assume nothing," he stated.



"A rule we adhere to, something we try to insist on is that 5% of the total advertising budget of a client be spent on research — continuing research," Mr. Ver Standig added. "I can say that all of the 30 accounts that we have now abide by that rule."

Mr. Ver Standig said that annual advertising budgets of his agency's clients total $1,140,000 of which an estimated $320,000 is spent in broadcast media. Several direct mail accounts are numbered among his clients.

"What I mean when I say that we do not assume anything," explained Mr. Ver Standig, "is that we simply don't know which medium would be best for our client's product until we do a lot of testing. Even when a particular campaign worked well for a similar product, we still don't assume that it will sell best for our client's product.

"Starting from scratch, we try to find out what would be best for our client before deciding on any approach—and that's why we have that 5% rule."

While Mr. Ver Standig does not feel that the past is necessarily the prologue of the future, he does not ignore methods which have proved successful. Far from it.

Mr. VER STANDIG

Within arm's reach of his desk he has a 10,000-card file containing "abstracts" of success stories. These are studied as guideposts.

But, he emphasized, successful campaigns of the past are only guideposts, and "we still don't know until we've tested the market what the best approach would be."

Mr. Van Standig said also that his agency follows through with marketing and salesmanship clinics. We want to make sure that a customer is treated right once he is attracted by our advertising, he explained. His agency is now com-

DONALD F. SIMCOX, director of Contemporary Art Assn., to J. Robert Mendte Inc., Phila., as creative head of art department.

H. I. ORWIG, vice president, Buchen Co., Chicago, will discuss export advertising at National Industrial Adv. Assn. meeting in Chicago, June 30-July 2.

CORNWELL JACKSON, vice-president, J. Walter Thompson Co., L. A., and **MRS. JACKSON (GAIL PATRICK),** associate producer, *Perry Mason* TV film series for Bing Crosby Enterprises, vacationing in Honolulu.

Into their homes (and into their hearts) for over 20 years!

Sally Work has been broadcasting for WBEN Buffalo ever since the station opened. And her phenomenal success can be summed up in one word: confidence. Sally goes into Buffalo homes and into the hearts of housewives with her friendly, informal afternoon show. And sales-wise, Sally has what we call "cushioned drive". She's honest, down-to-earth, convincing but never overbearing. It's the kind of personal selling that appeals to women. And the list of Sally's success stories prove it. Red Heart Dog Food, Nescafe, Borden's Starlac, Gerber's Baby Foods . . . these and scores of other products were first introduced to Buffalo women by Sally Work. So if you want a sincere selling job done on your product, Sal's your gal. 150 word participations are available Monday thru Friday. Check with Petry for details.

Sally Work 1:30-2 P.M. Mon. thru Fri.

NBC BASIC — BUFFALO

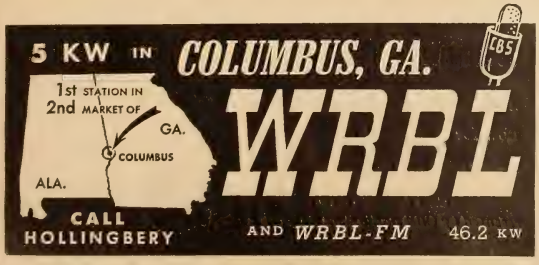
Some girls have all the charms

You've got to hand it to Joan Edwards. She's been a charmer ever since she first trod the boards as a young protégée of her famous Uncle Gus. Nowadays, she's getting new bouquets for showmanship—*and salesmanship*—on her new song-and-story show on WCBS, Monday through Friday mornings at 9:30.

- ***She charms critics.*** Billboard says, "It's as tho' the chanter, having fed her family, sent her hubby off to work and the kids to school, has called in the gals to chat and play records. And she does it all very pleasantly and capably."

She charms listeners. According to her first Pulse,* Joan's bright-as-sunlight personality and friendly program *attracted more listeners than any other New York network station participation program.* In fact, every morning housewives in more than 150,000 homes accept her warm invitation to "Come on over to my house."

She charms advertisers. Variety says: "She delivers her plugs with a cozy touch." But just hear those "plugs" and you'll realize they're socked across with all the skill of a star born and bred in big-time show business. (Participations were 50% sold out before her first program!)



Want to charm customers? Call us and sign up now for a low-cost participation on WCBS' Joan Edwards Show.

'Just Unique'

EDITOR:

I guess we're just unique.

At any rate your editorial, "Legalized Larceny," [B•T, May 19] makes the startling statement that "There's hardly an independent in the country that wouldn't go major network if it could." Gentlemen, here is one independent where all of us would just as soon take strychnine as go major network . . .

First . . . our listeners would desert us by the thousands if we swapped our friendly, informal, living local programs for the highly emotional soap operas, whodunits and other trash that makes up such a large percentage of network fare . . .

Economically it would be sheer lunacy to swap time for which we are being paid 100 cents on the dollar to a network which would pay us at most about 30 cents . . .

And should I mention rates? Ours have been raised three times in three years and there is not a single under-the-table deal in the house. . . .

Salik's Rebuttal

EDITOR:

In the always stimulating OPEN MIKE section of your issue for May 12, I read with particular interest the letter from Howard W. Davis, General Manager of KMAC-KISS (FM) in San Antonio, Tex. My friend, Howard, took exception to our double-spread in the April 21 BROADCASTING • TELECASTING in which we claimed KCBQ is "first in audience in the nation's fastest-growing major market." Specifically Howard stated that the San Antonio "metropolitan area" had grown faster in the past ten years than the San Diego "metropolitan area."

I hate to do this—particularly to my former home-town of San Antonio—but, facts are facts even in Texas.

The preliminary U. S. Census for 1950 lists the following figures for the Standard Metropolitan Areas (as defined by the Bureau of the Budget) for our two cities:

	1940	1950	% of Increase
San Antonio	338,176	496,090	46.7
San Diego	289,348	545,967	85.2

The J. Walter Thompson Advertising Agency used identical figures in their excellent booklet, *The Cream of Your Market*, again deriving their information from the U. S. Census of 1950. They divide the nation's top 162 markets as follows:

A—8 markets over 2,000,000
B—35 markets from 450,000 to 2,000,000
C—72 markets from 150,000 to 450,000
D—47 markets from 150,000

Again, in their booklet, the percentage of increase is 85.2% for San Diego as compared to 46.7% for San Antonio. Incidentally, their breakdown also shows that San Diego has grown faster in the past ten years than has any market in the A group, any market in the B group (which includes both San Diego and San Antonio), any market in the C group, and amazingly any market in the D group except one.

I think the figures Howard used were correct for "City Markets" rather than for the Standard Metropolitan as defined by the Bureau of the Budget. (San Diego County in our case, Bexas County for San Antonio). I'm sure that Howard would agree with me that one of radio's many advantages is that our medium, unlike others, does not

WLOF NEWS
INCREASES AUDIENCE
250%

When the Hooper Study of January-February, 1951 revealed that a network woman commentator on WLOF at 12:00 til 12:15 Noon, Monday thru Friday, had a Hooper Rating of 2.0; and a Share-of-Audience of 10.9, it was yanked from the air. The replacement was WLOF's own Production of "Front Page News" as reported by Paul Marlowe. These concise, hard-hitting, news broadcasts keyed to the interests of Orlando and all of Central Florida built an amazing following in a few short months. The October-November, 1951 Hooper Report discloses that Paul Marlowe's FRONT PAGE NEWS has a Hooper Rating of 7.0. This is a 250% INCREASE IN AUDIENCE. This WLOF News program has a 23.5 Share-of-Audience, representing a 115% Increase in Share-of-Audience. AND IT'S STILL BUILDING!

Radio Sets-in-Use jumped from a 15.7 in January-February up to a 29.8 in October-November, 1951. RADIO'S IMPACT IS GROWING in ORLANDO, FLORIDA.

AMARILLO HISTORY

. . . with a mild commercial in the last paragraph

AMARILLO has a short past. It was born with a cocklebur under its civic tail back in 1887, during the days when a branding iron was a sacred instrument and the first railroad was coming through. The way one story goes, a man name of Sanborn offered the cowboys of the LX Ranch a town lot apiece if they'd vote for his town (then known as Oneida) in a contest which developed over the location of the county seat. Since the LX hands constituted a legal, or shooting, majority, justice triumphed. "Amarillo" derived from the yellow flowers that, along with cattle, decorated the surrounding prairie.

Highly productive Texas soil caused agriculture to flourish. Early farmers raised giant-size vegetables. Wheat liked the Panhandle. Cotton was planted after the accidental discovery that cottonseeds, in which an early shipment of eggs was packed, would grow. Highways and railroads crossed at Amarillo. Oil, natural gas and helium were discovered. Airlines came zooming in.

Wholesale and shopping center for an 83-county, 2-million-person area, Amarillo is close to the stuff an advertiser looks for when he wants business. KGNC, *which completed its 30th year of broadcasting last month,* is almost half as old as Amarillo. The only NBC station in a diamond pointed by Denver, Albuquerque, Dallas, and Oklahoma City, KGNC offers its listeners regional and national programming on its 10,000 watt signal . . . and its advertisers the chance to meet Panhandle hospitality and loyalty.

feature of the week

L to r: Mr. Dixon; W. L. Snyder, Drug Products Div., Procter & Gamble, and L. S. Lavezzi, Mgr., Kress store.

* * *

IN AN unusual feat, Prell Shampoo last week filmed a television commercial featuring the Prell comparison test as it was conducted in a busy store—Kress on Fifth Avenue in New York—before the public.

The commercial is the first in a series of TV films to be staged at well-known locations throughout the country.

Announcer Bob Dixon, with the aid of four models, conducted the questioning by stopping customers at random and asking:

"Which side of this girl's hair looks more radiant?"

Each girl's hair was parted down the middle—one half shampooed with the new Prell and the other half with another leading brand. A camera was focused on the group to catch shoppers' answers. The film is that actually used in the TV commercial. Of the 12 women solicited, recorded and filmed, 11 liked the Prell side and the 12th was indifferent.

Don Weill, account executive of Benton & Bowles, agency for Prell, was the guiding idea-man behind the TV venture.

strictly business

LIFTING of the TV freeze will mean greatly increased use of film programs, according to Aaron Beckwith, sales director of United Television Programs, distributor of TV films, who has already watched his sales volume quadruple itself in the past year.

Some of his reasons: More stations will mean greater competition and local managers will seek improved programming; stations unable to receive network service will turn from costly local five shows to less expensive film; national advertisers are even now turning from network to national spot advertising on film to stretch their already taut TV budgets.

An amiable man with a friendly voice, Mr. Beckwith contends that his best salesman, responsible for 75% of each sale, is the product itself. His company handles such programs as *Big Town*, now produced on film for simultaneous distribution by Lever Bros. and non-competing advertisers in other cities; all Bing Crosby Enterprises' TV output; *Durocher and Day*

CBS RADIO RATE TALKS

Affiliates Call Meet With Network

By EDWIN H. JAMES

A GROUP of prominent CBS Radio affiliates last week arranged for and invited other stations of the network to a two-day conference on the current radio network crisis. Top CBS executives have agreed to participate.

Copies of a telegram signed by the group were sent out Wednesday night to all CBS Radio affiliates and the meeting set July 1-2 in New York's Ambassador Hotel.

William S. Paley, chairman of the board of CBS; Frank Stanton, president; Adrian Murphy, president of CBS Radio, and other high CBS executives will be present. Mr. Stanton is cutting short a European vacation to attend the meeting.

Those signing the telegram were Kenyon Brown, KWFT Wichita Falls, Tex.; Victor Sholis, WHAS Louisville; William Quarton, WMT Cedar Rapids; John E. Fetzer, WKZO Kalamazoo; Saul Haas, KIRO Seattle; John F. Patt, WGAR Cleveland and WJR Detroit; Ray Herndon, KTRH Houston; Hulbert Taft, WKRC Cincinnati, and George B. Storer, WGBS Miami, WAGA Atlanta, WMMN Fairmont, W. Va., and WWVA Wheeling, W. Va.

Realistic Discussion

Sponsors of the conference said they wanted made clear that it was intended as a realistic discussion of the deteriorating situation in radio network operations. It was not called in a spirit of antagonism, they emphasized.

In the telegram, however, they said the state of radio network business "offers cause of great concern."

Although the telegram was no more specific than that in regard to the cause of the meeting, it was plain to all that the sponsors of the conference were worried by the prospects of another round of network radio rate reductions.

By last week it had become an open secret that CBS Radio was seriously considering a substantial reduction in nighttime rates. All that remained to be settled was the question of how much to cut them. The question of when to invoke the reductions had been pretty well decided: As soon as the CBS top executives agreed upon the amount of the cut.

learned last week that CBS management had made up its mind it could not go into the fall season without a rate cut deep enough to set prices below the depressed levels at which network business lately had been conducted in under-the-table deals.

Only by falling back to a fixed price level of this order can radio network business be stabilized, these CBS executives believe. And their opinion coincides with that held by the management of NBC, it is known.

Having twice been thwarted by affiliate opposition when it tried to take the lead in imposing rate adjustments, NBC has adopted the strategy of awaiting a CBS Radio cut before, as it cannot fail to do, following with its own.

It was in recognition of this anticipated sequence that the idea for a meeting of CBS Radio affiliates first arose. Although wholly independent of the All-Radio Affiliates Committee, the action last week of the CBS affiliates group was a logical outgrowth of an Affiliates Committee meeting a fortnight ago [B•T, May 26].

At that meeting, the Affiliates Committee expressed "grave concern" over the general radio network situation, but refrained from any joint action. There is little activity the Affiliates Committee can undertake as a group because of the danger of running afoul of anti-trust laws.

Decided To Confer

The Affiliates Committee did say, however, that its members had decided individually to confer with their respective networks on the difficult questions facing radio network business.

Of the signatories to last week's telegram to CBS Radio affiliates, three are members of the All-Radio Affiliates Committee, Messrs. Brown, Storer and Patt. One other, Mr. Sholis, was present as a guest at the Affiliates Committee meeting a fortnight ago, however.

Although it was not called at their suggestion, CBS executives were said to be favorably disposed toward the July 1-2 meeting.

It is known some high CBS officials feel the time has come to present CBS Radio affiliates with a comprehensive situation report detailing the radio network's difficult position in the face of what amounts to a buyers' strike against network radio at present prices.

This position may not be easy to explain, since many if not most CBS Radio affiliates—including those in television markets—are said to be doing well in both local and national spot sales.

These affiliates find it hard to believe national advertisers are willing to buy spot radio but not network radio. They find it especially hard to understand when the advertisers are buying heavily in radio spot in television markets and, on some stations, at spot rates which prevailed before the network radio rate cuts of a year ago and which have not dipped a cent since.

In the opinion of some CBS Radio

(Continued on page 36)

RADIO TAX RELIEF

Offered in Miller Bill

A SIMPLE dollar-and-cents objective to benefit a number of radio station operators, weary-eyed from puzzling over high rates in the Excess Profits Tax Act, underlies a rather complex bill introduced in the House last week.

The bill was authored by Rep. William E. Miller (R-N.Y.) and was referred to the tax-writing House Ways and Means Committee.

Its significance is clear-cut for it would:

Give the radio licensee, who also operated some other type of business or businesses in the years 1947-1949, an opportunity to separate his radio earnings from his other business ventures for a breakdown for tax purposes.

Where this could be profitable for the broadcaster in the category described can be readily seen. For if the broadcaster lost money in getting his radio property on an even keel, revenue-wise, his so-called base period—1947-1949—would be adjusted accordingly.

Thus, the broadcaster could apply his losses at a rate to be determined by an (radio) industry rate of return to his other business income to obtain his average base period income.

A section of the bill would provide that relief would be retroactive to the period starting with July 1, 1950.

As is the unwritten effect of the Excess Profits Tax, the business which can show a higher base period can later show a less lop-sided earnings sheet in the subsequent years.

Exemptions Granted

The bill specifically excludes from its provisions those AM broadcasters who also operated TV prior to Jan. 1, 1951.

The Excess Profits Tax Act already contains a relief section for TV broadcasters, who were in business early, but who lost money.

The TV formula generally permits radio owners who operated television to apply their earnings to an individual rate of return or an industry rate, whichever is the more favorable.

It was learned that Rep. Miller introduced his bill upon request. According to sources in the House, the legislation was spurred by "some seven newspapers who own radio properties."

This source disclosed that the newspaper owners were ones who had purchased their way into radio early in the post-war era by acquiring FM stations only. It was claimed that these owners lost money in operating these stations until they later "acquired AM properties."

However, it must be noted that the relief would be afforded to not only the newspaper owner of a radio property but also any other licensee who has other business intrests.

A tricky law for the layman, the Excess Profits Tax provisions can penalize such business owners because losses generally written off on a losing proposition to a profitable enterprise makes the latter base period much lower. In turn, when the losing operation becomes profitable, the overall jump in profits becomes gravy percentage-wise for the government.

A similar situation formerly existed in the TV broadcaster's situa-

ZUZULO NAMED

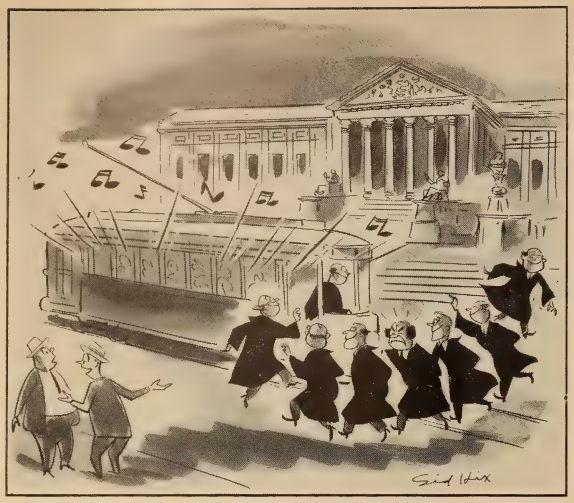
As MBS Press Chief

FRANCIS X. ZUZULO, press information manager for Mutual, last week was promoted to director of press information, with responsibilities including supervision of the network's publicity offices in Chicago, Washington and Hollywood as well as New York, and operation of the department's regular services to affiliates and editors throughout the nation.

Mr. Zuzulo

The appointment was announced Tuesday by Vice President Robert A. Schmid. It followed the resignation of Dick Dorrance, who is establishing the promotion firm of Dorrance & Co., New York [B•T, May 26].

Mr. Zuzulo has served the Mutual press department in a number of capacities since joining the network in August 1944. He was business news editor before being named manager of the press division.



Before joining Mutual, he served with the United Press in Kansas City and New York, and with MacFadden Publications. During the war he served overseas as an army captain for three years prior to medical discharge for wounds in June 1944. He is a graduate of the U. of Missouri School of Journalism.

MBS Signs Motorola

MOTOROLA Inc., Chicago (radio and TV sets), will sponsor *True Detective Mysteries* on alternate Sundays over MBS, 5:30-6 p.m. EDT, beginning July 13. The company will alternate sponsorship with Williamson Candy Co. (Oh Henry candy), which has signed a recent renewal contract. Agency for both sponsors: Aubrey, Finlay, Marley & Hodgson Inc., Chicago.

Johnny-on-the-Spots

GENERAL Manager Lawrence A. Reilly of WTXL West Springfield, Mass., is guffawing over an item which appeared in the *Springfield Sunday Republican* about the Memorial Super Market's two-hour special sale which moved nearly 20,000 items of canned goods and packages at a flat 10% reduction in price, and which the newspaper reported "had no advance advertising." Joker is, according to Mr. Reilly, that the grocery market bought spot announcements starting in mid-afternoon telling of the sale, with the result that more than 500 housewives flocked to the sale, pulled by radio alone.

Drawn for BROADCASTING • TELECASTING by Sid Hix

"They voted seven-to-one in favor of transit radio."

ABC ADDS SEVEN

Affiliates Total 330

SIGNING of seven new affiliates by ABC bringing the total to 330, was announced last week by William Wylie, ABC radio stations director.

The group includes three California stations owned by the Broadcasting Corp. of America: KYOR Blythe (1450 kc, 250 w), managed by Lyle Schuman; KROP Brawley (1300 kc, 1 kw day and 500 w night), managed by John Chandler, and KREO Indio (1400 kc, 250 w), managed by James Tracewell.

KOWB Laramie, Wyo. (1340 kc, 250 w), owned by Snowy Range Broadcasting Co. and under the managership of Lynn Smith, also is joining the ABC network, while the following commenced affiliation yesterday (Sunday):

KANE New Iberia, La. (1240 kc, 250 w), owned by New Iberia Broadcasting Co. and managed by Dierrell Hamm; WGYV Greenville, Ala. (1400 kc, 250 w), owned by Greenville Broadcasting Corp. with W. J. Miller Jr. as manager; and WKSR Pulaski, Tenn. (730 kc, 150 w day), owned by Richland Broadcasting Co. and managed by Virgil Trimm.

ROBERTS TO ABC

As Central Radio Head

DON ROBERTS. vice president in charge of new business for Sullivan, Stauffer, Colwell & Bayles, New York, has been appointed director of ABC radio's Central Div., effective yesterday (Sunday), succeeding Edward G. Smith, resigned [B•T, May 26].

Prior to association with SSC&B, Mr. Roberts was western sales manager for CBS' Chicago office, and before that served five years as radio account executive with NBC in New York.

DON LEE SIGNS

General Mills to Show

GENERAL Mills Inc., Minneapolis (Sperry Div.), will start *Breakfast News with Sam Hayes* on 45 Don Lee Pacific Coast radio stations, 7:45-55 a.m. (PDT) Monday through Saturday, for 52 weeks beginning today (Monday).

The firm formerly broadcast a program on NBC radio for 13 years. The agency is Dancer-Fitzgerald-McDougal, San Francisco.

Each of the stations will follow the program with five-minute local news broadcasts. First contract to be signed is with Norris-Thermador Corp., Los Angeles (bathtubs, sinks, electric ranges), starting *7:55 Local* on KHJ Hollywood for 13 weeks beginning today (Monday). The agency is West-Marquis Inc., that city.

KLAUS MOVED UP

To WERE Cleveland Head

CLEVELAND Broadcasting Inc. board of directors last Tuesday announced the appointment of Richard M. Klaus as general manager of WERE Cleveland.

Mr. Klaus

Mr. Klaus joined the WERE sales staff in February 1950 as assistant sales manager. He also was with WHBC Canton, Ohio, and WJW Cleveland, before coming to WERE. A graduate of the U. of Michigan, he served five years in Navy Communications during World War II and was discharged as lieutenant commander.

Mr. Klaus recently became the father of a son, Robert Alan.

JONES SUIT

Appellate Affirms Sufficiency

THE APPELLATE division of the New York State Supreme Court has unanimously affirmed the decision of the Supreme Court upholding the sufficiency of the complaint filed by Duane Jones Co. against nine of its former officers and directors, and Frank J. Burke and Manhattan Soap Co.

The complaint alleged a conspiracy on the part of the defendants to force Duane Jones, chairman of the company, to sacrifice his stock in the company, under threat that the nine officers and directors would take the clients and personnel, turn the key in the door and shut up the business. When Mr. Jones refused to sell his stock, the defendants, it is alleged, proceeded to carry out their threats.

The Duane Jones complaint, whose sufficiency was sustained twice by the Supreme Court before being taken to the appellate division, seeks recovery of $3,500,000 from the defendants; an accounting of profits and the impressment of a trust in favor of Duane Jones Co. upon the stock of Scheideler, Beck & Werner Inc., which was formed by some of the defendants to take over the Duane Jones business.

The defendants have been given ten days to answer and the trial is expected to be held early in fall.

O'NEIL ELECTED

To Ad Council Board

ELECTION of Thomas F. O'Neil, president and board chairman of Mutual, to succeed former MBS president Frank White on the board of directors of the Advertising Council was announced Friday by chairman Howard J. Morgens, Procter & Gamble vice president in charge of advertising.

Mr. O'Neil, whose MBS presidency became effective June 1, is a vice president and director of General Tire & Rubber Co. He entered the radio industry in December 1947 as vice president and director of the Yankee Network. In the following February, he became a member of the Mutual Network's board of directors, to be elected chairman three years later. He is also president of Thomas S. Lee Enterprises, owned 90% by General Tire and 10% by Macy's and consisting of the Don Lee Network, the Yankee Network and WOR-AM-FM-TV New York. Lee Enterprises also owns 59% of Mutual.

Fineshriber Named

APPOINTMENT of William H. Fineshriber Jr. as MBS member of the NARTB Radio Board was announced last week by NARTB President Harold E. Fellows. Mr. Fineshriber is executive vice president and a director of MBS. He replaces Frank White as MBS member of the association board, Mr. White having resigned as MBS president to join NBC.

TR PLANS EXPANSION

SCOTUS Victory Paves Way

TRANSIT RADIO Inc., FM-sired and newest of the national media, is working on plans to spring out of its litigation limbo into full stature with other major advertising industries.

Armed with a 7-1 U. S. Supreme Court decision, officers and directors of Transit Radio have scheduled a Tuesday morning meeting in Cincinnati to lay plans for the delayed expansion into a nationwide operation, according to Hulbert Taft Jr., board chairman. Mr. Taft is president of WKRC Cincinnati.

Key figures with Mr. Taft are R. C. Crisler, TR president; Ben Strouse, of WWDC Washington, vice president; Tom O'Neil of General Tire radio properties, and W. M. O'Neil, WJW Cleveland; Chet Thomas, KXOK St. Louis. E. K. Hartenbower, KCMO Kansas City, was expected to attend along with several others interested in transit.

Plans In The Offing

While nothing will be decided prior to the meeting, Transit Radio's backers envision sales offices in New York and Chicago. Present headquarters are in Union Trust Bldg., Cincinnati. At one time Transit Radio was represented nationally by H-R Representatives Inc.

Once enjoying a take of $20,000 a month from national advertisers using the service supplied bus companies via FM stations, Transit has operated for well over a year with a total of about 3,600 radio-equipped vehicles compared to a peak of 4,600. At present about 18 national advertisers are buying transit, the litigation having caused many others to drop out.

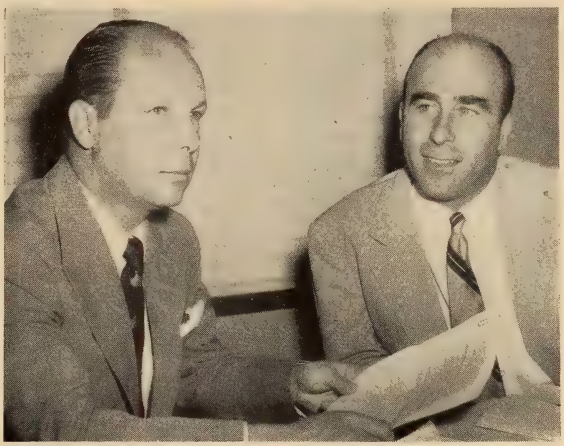
Shortly after the Supreme Court's decision was announced last Monday, sporadic inquiries started coming from national sponsors showing renewed interest.

One of the main jobs facing Transit Radio Tuesday will be formation of a sales organization. Up to a few months ago H-R Representatives Inc. had serviced Transit Radio.

Then there will such problems as new capital and new station-transit tieups to expand the medium from a dozen cities to a nationwide operation.

Threats of continued organized effort to block transit programming were heard last week. Among those taking this position were Paul M. Segal, attorney, of Segal, Smith & Hennessey, who argued the anti-transit radio case in the Supreme Court, and the National Citizens Committee Against Forced Listening.

Mr. Segal said, "Murder, arson and the torture of little white mice are all wicked. But none of them violates the Constitution of the United States. The Supreme Court has now held that regardless of whether transit radio is good or bad, it just doesn't happen to be unconstitutional. This does not mean that transit radio will be permitted to go forward. The constitutionality attack was just one attempt."



The case was argued in Supreme Court last March 3 [B•T, March 10]. Appearing on behalf of Washington Transit Radio Inc., Public Utilities Commission (District of Columbia) and Capital Transit Co. was Attorney W. Theodore Pierson, of Pierson & Ball.

Originally the U. S. Court of Appeals for the District of Columbia had held that transit broadcasts deprived objecting riders of their liberty without due process of law [B•T, June 18, 11, 1951]. The highest court did not accept this ruling, holding that the D. C. Public Utilities Commission was within its rights in permitting radio programming for buses operated in the nation's capital.

If TR goes ahead with a rapid expansion program it will encounter some delay in providing equipment for buses and trolleys. TR has a supply of antennas in stock but no receivers. It is believed receivers could be obtained without difficulty, once an actual demand appears.

The status of transit radio at the FCC, along with other types of special FM services, is somewhat cloudy. The Commission had raised the question of legality of the "beep" signal used for switching talk programming. Four functional music outlets were cited [B•T, May 31, 1951]. They have asked FCC to hold a general rule-making hearing so the issues might be clarified on an industrywide basis. Fate of storecasting also

(Continued on page 92)

MOST interesting thing they've read in years, Ben Strouse (r), WWDC Washington, and W. Theodore Pierson, radio attorney, agree as they peruse the transit radio decision.

SOAP ACCOUNTS

Expand Fall Radio-TV Shows

By FLORENCE SMALL

THE SOAP companies, whose ranks include the largest single advertiser in radio and television, will be more active this fall in television and radio than ever before in their history. That was the finding of a BROADCASTING • TELECASTING spot check made last week.

As prime mover in this expansion, Procter & Gamble, Cincinnati, which last year spent nearly $25.75 million for network radio-TV time alone, has added a television version of *Welcome Travelers* daytime strip on NBC-TV, augmenting its recent early morning radio purchase (9:30-10 a.m. on NBC), plus a new half-hour on NBC-TV (Sunday, 7-7:30 p.m.), into which the *Red Skelton Show* will be moved from its present 10-10:30 p.m. Sunday time [B•T, May 26].

Latter time period will be retained by P&G and a new film show called *The Doctor* will be starting in August for the firm's Camay soap. In addition, P&G will place a TV version of its *Guiding Light* (CBS Radio daytime strip) in its 2:30-45 p.m. period on CBS-TV succeeding *First One Hundred Years*. The firm's 16 other radio programs as well as its TV shows, such as *Those Two* (NBC-TV strip) and *Beulah* (ABC-TV, weekly hour-hour), are slated to continue for next fall.

Colgate-Palmolive-Peet, which will be spending about $26 million in time and talent in radio and television, last week bought, in addition to its already impressive list of radio and TV shows, a TV film version of *Mr. and Mrs. North*. Company is planning to place the half-hour program, once a week, on a spot basis across the country instead of using a network. Sherman & Marquette, New York, is the agency.

'Biggest In History'

The present radio-TV lineup is "the biggest in the company's history and the most effective," Les Harris, director of radio-TV for Colgate - Palmolive - Peet, told BROADCASTING • TELECASTING.

The firm is expected to renew its sponsorship of *Colgate Comedy Hour* Sundays on NBC-TV and will definitely continue with its *The Big Payoff* (NBC-TV), *Strike It Rich* (five times weekly strip on CBS-TV), plus a nighttime half-hour (also CBS-TV).

In radio, Colgate-Palmolive-Peet last week renewed the five-minute Louella Parsons strip for another quarter on CBS Radio. In addition, the firm will continue with its radio schedule of *Mr. and Mrs. North* on CBS Radio, *Our Miss Brooks* on CBS Radio, *Bob and Ray* on NBC and *Strike It Rich* on NBC.

Lever Brothers, New York, whose overall radio-TV budget is estimated slightly higher than that of C-P-P, has added 7:45-8 p.m. Tuesdays and Thursdays (on CBS-TV) for its Chlorodent toothpaste but will drop the radio version of *Big Town* on CBS Radio (Wednesdays, 8-8:30 p.m.), although the TV budget for *Big Town* expanded by switching from live to film.

The newest buy for Chlorodent will start with a program produced by J. Walter Thompson Co., New York, featuring a top vocalist weekly, with the most effective personality to be picked out of the summer group for a permanent fall show.

Lever Brothers, instead of taking a 13-week hiatus for its *Lux Radio Theatre*, will remain off for only eight weeks, meanwhile substituting two CBS Radio house shows, *Broadway Is My Beat* and *Romance* (Mondays, 8-9 p.m.) during the five summer weeks. In the fall, the Lever radio lineup will include, aside from *Lux Radio Theatre* (CBS Radio), *Aunt Jenny* (CBS Radio), *House Party* (CBS Radio) and a simulcast of part of the Arthur Godfrey morning show (CBS Radio and TV). In television, Lever will continue to sponsor *Lux Video Theatre* (CBS-TV), *Big Town* (CBS-TV) and *Hawkins Falls* (strip on NBC-TV).

1898 Walter C. Evans 1952

WALTER C. EVANS, 53, for three decades one of the leading figures in the electronics industry, died shortly after 4 a.m. Wednesday in Johns Hopkins Hospital, Baltimore.

Distinguished persons from all branches of electronics and manufacturing were to join Westinghouse Electric Corp. and Westinghouse Radio Stations Inc. executives and high government officials at funeral services to be held at 11 a.m. today (Monday) in Tickner's funeral home, North and Pennsylvania, Baltimore.

Burial was to be at 1:30 p.m. today at Arlington National Cemetery, with full military honors.

Since last April, when Mr. Evans' health limited his business activity, he had remained at his home in the Eastport section of Annapolis, Md. He had relinquished active duties in three Westinghouse Electric Corp. industrial divisions but continued as vice president of the parent concern and president of the radio-TV station organization.

Last Monday his illness became critical. He was taken to Johns Hopkins Hospital, Baltimore, but began to sink rapidly.

For many years Mr. Evans lived in the Annapolis area, having never lost his love for the water and his interest in boats. Until this spring he lived in a home built on a barge anchored at the shore line, moving into a house ashore just a month ago.

Industry Pays Homage

As word of his critical illness and then his death spread last week tributes and messages of sympathy came from all over the nation.

In the Westinghouse organization he was known as an active, brilliant and exacting executive. Many electronic developments bear signs of his engineering and administrative genius. He remained "fiercely loyal to people with whom he worked," according to fellow executives.

Walter Evans, like many in the Westinghouse organization, rose to high executive stature from the engineering ranks. As a boy of 15 he attracted wide attention in the Chicago area by making a sending and receiving radio unit that induced a newspaper to publish an entire radio supplement. Not interested in his father's railroad supply business, he kept puttering with radio gear and became a Great Lakes ship radio operator at 16.

During World War I he served in the Navy, becoming an instructor at the Naval Radio School at Harvard. Later he served as radio operator aboard a sub chaser.

After the war he resumed college education at U. of Illinois where he was a roommate and fraternity brother (Chi Psi) of E. R. Borroff, now general sales manager of Westinghouse Radio Stations. At one point the young radio man interrupted his electrical engineering studies to ship out as operater on an oil tanker.

After his studies at U. of Ilinois he served as operator for Marconi Co., RCA and United Fruit Co., supervising the first radio telephone installation on an American merchant ship for the last-named line.

He was operator on the ill-fated steamer *Eastland* but was transferred to another ship just a week before it sank with loss of hundreds of lives.

Joining the new KYW Chicago in 1921, he helped engineer one of the earliest midwestern stations carrying regular broadcast service. In 1922 he was appointed chief engineer and four years later was named KYW general manager.

In Charge of WRS

By 1932 Mr. Evans had been placed in complete charge of all Westinghouse radio stations. The following year, his duties were expanded to include all Westinghouse radio manufacturing activities as well as broadcasting, with responsibility for development, manufacture and sales of radio broadcasting and communications equipment.

He was elected a director of Westinghouse Radio Stations in 1936, rising to a vice presidency in 1939 and assuming the presidency in 1947.

With election to vice presidency of the parent corporation in 1942, he was in charge of the X-Ray and Electronics Divs. in Baltimore. One of his feats was to increase production 120 times to produce over $400 million worth of radar and allied electronic gear for the military.

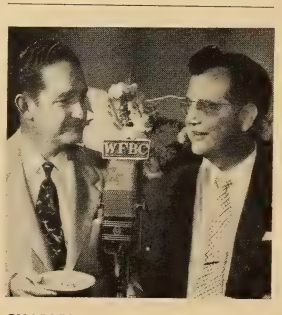
The wartime achievements brought him Certificates of Appreciation from both the Army and Navy for "his contributions in connection with the development and production of radio and radar equipment during World War II." He organized the Westinghouse Television & Radio Division in 1945, directing this radio-TV receiver operation during its formative years.

Mr. Evans was named chairman of the International Broadcasting Committee of the Defense Communications Board in 1941. In the previous decade, he had taken leaves from Westinghouse at government request to serve as industry technical adviser to the State Dept. at the Madrid and Cairo international telecommunication conferences.

He was a Fellow of the Institute of Radio Engineers; director of Broadcast Music Inc.; director of Radio-Television Mfrs. Assn., and member of Army Ordnance Assn., American Society of Naval Engineers, Chi Psi, and Tau Beta Pi honorary engineering fraternity.

Surviving are Mrs. Evans, the former Lee Huddleson; a son, Chuck; a daughter, Mrs. Barbara Jean Bixbee, and a grandchild, son of Mrs. Bixbee. His two children are by his first marriage to the former Jean Burtis, who survives.

MOFFET QUITS FOSS



Joins Russell P. May Firm

JOHN A. MOFFET, 37, has left the post of vice president with William L. Foss Inc., Washington, to become an associate in the firm, Russell P. May, Radio Consulting Engineers, Washington.

Mr. Moffet

Mr. Moffet had been with the Foss firm since November 1945 when he was discharged from active duty with the Air Force. During War II, he served first with the Army Signal Corps, finally as an Air Force captain in the European theatre. Mr. Moffet was graduated from Swarthmore College in 1937, receiving an engineering degree with honors. With Mrs. Moffet and their two children, he lives in Arlington, Va.

CHARLES H. CRUTCHFIELD (1), vice president and general manager, WBT-AM-FM and of WBTV (TV) Charlotte, joined B. H. Peace Jr., president, WFBC-AM-FM Greenville, S. C., in sampling WFBC's 19th anniversary cake, May 20. Mr. Crutchfield was program director when the station first went on the air.

FRITCHEY NAMED

As Truman Assista

CLAYTON B. FRITCHEY, Dep of Defense public information chie was appointed last Tuesday as a ministrative assistant to the Pres dent with an annual salary of $15 000 [B•T, May 26]. He will a sume his new responsibilities som time this week.

The White House announcemen did not specify the nature of M Fritchey's duties, but it was pr sumed he would devote himself responsibilities of a political na ture. Nor did Joseph Short, Whit House radio-press secretary, elab orate on the announcement.

Mr. Fritchey thus joins a Whit House contingent of administrativ assistants comprising David Bel Donald Dawson, David Lloyd an David Stowe. Table of operation calls for six such posts, althoug they rarely have all been filled a any one time.

Mr. Fritchey has been OPI di rector for the Defense Dept. sinc November 1950 and previously wa editor of the *New Orleans Ite* (no radio-TV affiliation). He als was with the *Baltimore Post* an the *Cleveland Press* during the '30s He succeeded Osgood Roberts in th defense information post. His suc cessor in the Pentagon was not an nounced.

During Mr. Fritchey's tenure i the Defense Dept., military OP activities were a target of scathing Congressional criticism. This wa manifested in the form of charge by Rep. Edward F. Hebert (D-La.) probing "waste" in the Pentagon and House action slashing OP funds from $1,250,000 to $312,000 Mr. Fritchey received an annua salary of $14,800 while OPI direc tor.

SARNOFF LAUDED

As 'Father of Year'

BRIG. GEN. DAVID SARNOFF chairman of the board of RCA, has been selected as the "Father of the Year" by the National Fathers Day Committee, composed of promi nent citizens of every state, it was announced last Tuesday.

Also included in the 1952 list ing of prominent parents were H. V. Kaltenborn, selected as radio father and Sam Levenson, named television father for 1952. Laraine Day and Leo Durocher were chosen as husband-and-wife team of the year.

Father of three sons, Gen. Sarnoff was commended for hav ing "boldly, unselfishly, and patri otically toiled as champion of 'freedom to listen' and 'freedom to look' in radio and television as a human right everywhere in the world."

The Father's Day Committee was organized in 1936 with head quarters in New York to encourage observance of the day throughout the United States, according to Alvin Austin, director, who said the group is financed only by con tributions.

BAB BUDGETS

For Radio Promotion, ARF Study

MEETING in the shadow of seemingly imminent network radio rate cuts, BAB officials approved last week a $600,000 budget for the radio promotion bureau during the next ten months. Budget provides for (1) a pro-radio advertising campaign, and (2) puts up radio's part toward an Advertising Research Foundation study of the audience measurement muddle [B•T, May 26].

A total of $15,000 was authorized toward the $25,000 which ARF has estimated the long-wanted evaluation of radio-television rating services will cost. The appropriation is subject to BAB approval of ARF's final plans for the study. ARF is expected to seek the rest of the $25,000 — TV's share — from the television division of NARTB.

Edgar Kobak, president of ARF and chairman of the BAB executive committee, estimated that ARF—which is composed of advertiser, agency and media members—can get the study under way within about 30 days after the money is available. How long it will take to complete the study is an unanswered question. Mr. Kobak thought it might take as much as six months.

Rating Service Study

The study of rating services—which ranks high in the desires of advertisers and agencies as well as broadcasters—would be calculated to measure the various radio and TV research techniques against each other, determine their respective strong points and limitations, and, insofar as possible, correct the current misuse of ratings. It is a problem pointed up repeatedly over the past two years.

For a national advertising campaign, designed to impress radio's values upon the public and both present and prospective advertisers, the BAB executive and financial committees set aside $50,000. This paid campaign is to be coupled with on-the-air and other promotion efforts by stations individually and tied in with BAB's other activities at both the local and the national levels.

Louis Hausman, CBS Radio administrative vice president, was named to pick a committee. This group, in collaboration with BAB authorities, will prepare and place the radio-promotion advertisements, starting around July 15. Major newspapers and trade publications in various fields will be used.

Charles C. Caley of WMBD Peoria, BAB's new board chairman, reiterated that he had no knowledge of any network's intentions with respect to radio rates. But he conceded that another round of network cuts—which have seemed increasingly in prospect in recent weeks—would make it "doubly hard" for BAB to succeed in its all-radio promotion campaign.

He denied, however, that there was any rate-move significance in the selection of Mr. Hausman of CBS Radio, which has run foremost in speculation about future rate reductions, to head BAB's pro-radio advertising committee. Mr. Hausman, he pointed out, has been an active member of the BAB promotion committee for more than a year.

No agency has been selected to handle BAB's advertising. Nor is it a certainty that one will be. But Mr. Caley thought it likely that one would be designated.

On the subject of rates, and efforts to prevent cuts, Mr. Caley said he felt BAB is taking "positive action" through its plans to advance acceptance of radio's stature as a sales medium.

Radio's Value

He said it was not now contemplated that radio's cost-per-thousand advantage over other media would be exploited, in the forthcoming advertising campaign, over other advantages of using radio as a sales tool. Indeed, he said, it is BAB's hope that radio's values—and ultimately its cost per thousand—may eventually be raised.

Mr. Caley pointed out that when it commenced operation in the spring of 1951, BAB had a budget of $157,000. After steady increases last year and this—with stations still being added at the rate of one a day—he said the membership fund as of June 1 would be $601,000, with 622 member stations, four networks, and several representation organizations and associate members.

By next Jan. 1, he said, it is expected that BAB will have 750 member stations and at least a $700,000 budget "to sell radio as the greatest mass medium in America."

Mr. Caley paid tribute to Mr. Kobak, first board chairman, for "helping us get off the ground" as an effective operating bureau.

Details of Expansion

He also pointed out that the BAB staff will be expanded from 21 persons to approximately 30 by July 1, with opening of a Chicago office and increases in the New York sales staff. Appointment of a head of the Chicago office is expected by around June 15, he reported.

Committemen and other participants in the Monday sessions included Messrs. Caley and Kobak; BAB President William B. Ryan, Vice President Kevin B. Sweeney and Local Promotion Director Jack Hardesty; William Quarton, WMT Cedar Rapids; H. Preston Peters, of Free & Peters; President Adrian Murphy and Vice President Hausman, CBS Radio; William H. Fineshriber Jr., executive vice president of Mutual; Joseph E. Baudino, Westinghouse Radio Stations (participating as an alternate for the late WRS President Walter Evans); Allen M. Woodall, WDAK Columbus, Ga.; Kenyon Brown, KWFT Wichita Falls; Gordon Gray, Goodwill Stations (alternate for President John F. Patt, chairman of the BAB finance committee).

U. S. Steel Renews

UNITED STATES Steel Corp., Pittsburgh, through BBDO, has renewed sponsorship of *Theatre Guild on the Air* on NBC Radio Network for 39 weeks starting in September.

'MORE THAN MEETS THE EYE'

CBS Radio to Unveil Promotion Film

A NEW film, designed to convey the meaning of its title, "More Than Meets the Eye," by presenting its message primarily via the sound track rather than by picture-matter, has been produced for CBS Radio as part of the network's promotion of AM broadcasting.

Scheduled to be shown to an invited audience in Hollywood today (Monday) and in New York next week, the film "is part of a long-term program to present radio's values graphically in a changing world of entertainment—to give sponsors, showmen, and audiences a fresh appreciation of its power and effectiveness," according to Adrian Murphy, CBS Radio president, who was to announce the film project today.

The business documentary, a 15-minute color film, uses animated semi-abstract art of the screen, with its meaning conveyed through sound effects, music composed by Wladimir Selinsky, and the narration of Robert Trout, CBS Radio news commentator. Purpose of the film is to demonstrate the meaning of sounds and to indicate their translation into network broadcasting.

Mr. Murphy was scheduled to unveil the production at a special West Coast showing in Hollywood's Ciro's restaurant today for some 400 radio and movie artists, advertisers, agency executives, and newsmen. Executive groups in the advertising industry are to see the film at the Museum of Modern Art in New York, June 9-11, and other special showings will be arranged in key markets throughout the country.

The film was produced for CBS Radio Network by United Productions of America, producers of the Academy-Award winning "Gerald McBoing Boing" short subject, in Burbank, Calif. Gordon Auchincloss directed the sound track, which was prepared by CBS Radio in New York before the animations were started on the West Coast.

Asks LBS Figures

REP. PATRICK HILLINGS (R-Calif.) last week confirmed that he has asked Gordon McLendon, Liberty Broadcasting System's president, for his present figures to support his charges that the Justice Dept. has been delinquent in prosecuting "baseball conspiracy" [B•T, May 26]. Rep. Hillings is active in a House subcommittee that will probe the Justice Dept. He also has expressed interest in getting major league baseball for the West Coast.

BAB SERVICES

New Retail Aids Listed

FIVE-POINT expansion of the retail services of BAB, designed to "equip the radio station salesman to sell and service retailers as well as any media salesman," was announced last Wednesday by BAB President William B. Ryan.

The new services were listed as:

(1) A monthly Sales Opportunities Calendar offering a retail sales idea for each day of the month. First calendar already has been distributed; they will go out 60 days in advance of the period for which sales ideas are suggested.

(2) Data on seasonal fluctuations in retail sales and advertising, to be distributed to BAB members under a contract signed last week with the George Neustadt Statistical Organization, whose data will be used. This will provide month-by-month sales curves on some 91 products handled by department stores, specialty shops, appliance dealers, and hardware stores.

(3) Compilation of product sales by months and by geographical sections, developed from Federal Reserve figures to show trends for departments in specialty shops and department stores as a supplement to the Neustadt service.

(4) A budget planning sheet for retailers, slated to appear this summer and designed to help retailers and stations plan monthly promotion programs systematically according to anticipated sales.

(5) A how-to-do-it book on radio advertising, intended for the local advertiser and scheduled for release by late fall.

Mr. Ryan said local business currently represents 42% of radio's total billings and "is becoming more and more important each month." He said "BAB will attempt this year to equip radio salesmen to plan retail advertising better and to widen the knowledge of retailers about radio through a greatly expanded program of retail sales helps."

He said that "lack of familiarity with radio prevents the local advertiser from achieving all the benefits of radio advertising."

HOUSE PROGRAM PROBE

Unveils Plans; Hearings Begin

By DAVE BERLYN

THE WIDELY publicized House investigation of so-called "immoral or offensive" radio and television programs got off to a quick start last week with hope expressed by its chairman that the reins will be kept tight.

Otherwise, House Interstate and Foreign Commerce Subcommittee Chairman Oren Harris (D-Ark.) warned that the probe could easily get out of bounds.

Chairman Harris expressed this view in a BROADCASTING • TELECASTING interview following a formal announcement of hearing plans of the subcommittee last Wednesday.

Public hearings begin tomorrow (Tuesday) at 10 a.m. in Room 1334 in the New House Office Bldg. in Washington.

Lead-off witness will be Rep. E. C. Gathings (D-Ark.), author of House Resolution 278 that set up the organization and objectives of the subcommittee probe. Other Congressmen "who desire to present their views" will be heard next.

Order of appearance of additional parties who have interest in the investigation are "representatives of civic groups and organizations," FCC and other federal agencies who may wish to testify, and "at the proper time, individual broadcasters and representatives of the broadcasting industry."

According to the formal announcement, "the subcommittee will undertake to study programming techniques, including the question of responsibility for and control over the content of the radio and television programs on the part of broadcasting licensees."

The announcement came after a closed door meeting of the seven-man committee. (For names and sketches of the full subcommittee see articles below.)

Rep. Harris outlined his views in even more concrete terms when questioned on the subcommittee's blueprint.

He said the subcommittee had decided to arrive at a certain "standard" in its investigation and that it was determined to "stay within bounds." The group, he said, wanted to concentrate on "specific instances and complaints" on programming.

The resolution, itself, is quite general. In its formal announcement, the subcommittee said the probe would be conducted within the terms of the resolution and cited that part which states the subcommittee shall:

. . . Determine the extent to which the radio and television programs currently available to the people of the U. S. contain immoral or otherwise offensive matter, or place improper emphasis upon crime, violence and corruption.

FCC will be asked to make available to the group "any complaints which the Commission may have in its possession in regard to radio and television programs," the subcommittee said.

A call for "witnesses who desire to appear" was issued, urging such persons "to make their wishes known promptly to the clerk of the House Interstate and Foreign Commerce Committee, Elton J. Layton. . . ."

Rep. Harris, asked whether the subcommittee will consider beer and/or wine advertising on radio or television in its study, answered that it would "if the advertising is part of the program." He also said so-called "drinking scenes" possibly would be considered if they are part of a program's content. He did not elaborate.

He said the subcommittee planned later to go into "canned programs" or "filmed programs." The group, he said, would question those "responsible" for the production of films.

Rep. Harris disclosed that radio-TV industry representatives would be asked in what manner "programs are established," what is the "conduct" of the broadcasting media's programming and "what code of ethics or standards" the industry follows.

The subcommittee at the present time does not plan to hold hearings in cities other than Washington, D. C., Rep. Harris said. No consideration has been given to Hollywood, New York or Chicago, as it had been reported in some publications.

Rep. Harris' views coincided with those he gave in an informal interview two weeks ago on ABC's *News of Tomorrow* when he asserted that if Congress had not decided to investigate, FCC would have been forced to do it [B • T, May 26]. As he did again last Wednesday, Rep. Harris had expressed concern that the probe stay within the confines of the Gathings Resolution. He had pointed to the danger of government censorship.

As the House swung into its plans to apply the investigator's magnifying glass to the radio-TV industry, renewed sparks of indignation flew in New York where Max Gilford, special counsel, National Society of TV Producers urged that East Coast TV film producers adopt and enforce their own production codes. He also pleaded for the producers to make their case known in Washington (see story, page 66).

BENTON COMMENT

Attacks House Probe

SEN. WILLIAM BENTON (D-Conn.), the lawmaker who would set up a review board to study radio and TV programming, gave out a special release last week on the House probe of programming.

The House investigation, he asserted, "is the wrong way to go about improving radio and TV programs." He continued:

It will be easy for the committee to show that TV is overloaded with crime programs. That's already been documented in various studies. But what's the next step? Should Congress pass a law forcing a censorship code on all programming? I hope and believe we won't find many members of Congress in favor of that—or many members of the Supreme Court.

The real problem is to encourage good programming in every legitimate way. That is an immensely complicated problem. It involves, among other things, the economics of broadcasting. The operation of educational stations could be one forward step. Closer cooperation between commercial stations and educational institutions would be a great forward step.

A system of subscription broadcasting which opens the opportunity to provide programs for countless minorities who today do not enjoy the advantages of broadcasting, would in my opinion be still another forward step and in my judgment the greatest of all.

These opportunities deserve continuous study by the best brains in the country. That is why I have proposed the establishment of a National Citizens Advisory Board on Radio and Television. These opportunities warrant the attention of the Congress and the FCC.

SEVEN MEN WHO MAKE UP PROGRAM STUDY UNIT

CHAIRMAN OREN HARRIS (D-ARK.)

LEGAL-trained Chairman Harris hurtled into communications prominence on Capitol Hill in the past few months. He assumed this role when the McFarland bill (S 658), only major communications legislation in Congress, cleared through the Crosser Committee. Rep. Harris was given the task of filing a report on the bill and appearing before the House Rules Committee. Decision of Rep. Lindley Beckworth (D-Tex.) to campaign for the Senate assured Mr. Harris the post of chairman of the radio-TV investigating subcommittee. Rep. Harris won his court spurs as a prosecuting attorney in Union County, Ark. He has been a lawyer since 1930. Ten years later, he was elected to the House where he has had uninterrupted service. He was born Dec. 20, 1903, in Hempstead County, Ark. A fellow Arkansas Democrat, Rep. E. C. Gathings, sponsored the resolution which set up the subcommittee. He is listed as a Baptist in the *Congressional Directory.*

Rep. Harris

REP. ARTHUR G. KLEIN (D-N. Y.)

AUTHOR of legislation in the House to permit radio and TV to cover House proceedings as well as committee hearings, Rep. Klein now finds himself second ranking Democrat investigating the media's "morality" in programming. Born in Gotham, Aug. 8, 1904, Rep. Klein received his bachelor of laws from New York U. Law School in 1926 and passed the state bar a year later. Government experience was gained from 1935 to 1941 as a staff attorney of the Securities and Exchange Commission. He is a senior member of Klein, Wikler & Gottlieb, New York; has been in the House since 1941.

Rep. Klein

* * *

REP. F. ERTEL CARLYLE (D-N. C.)

A MEMBER of the House since 1948, Rep. Carlyle is from the law field. He was elected solicitor of the Ninth Judicial District of North Carolina in 1938, a post he filled until his election to Congress. He was born in Lumberton, N. C., on April 7, 1897, was graduated from the U. of North Carolina, served in the U. S. Navy in World War I and started his law practice in 1921. He is former chairman of the Robeson County Democratic Executive Committee, and has held posts in the American Legion. *Congressional Directory* lists him as a Baptist.

Rep. Carlyle

* * *

REP. HOMER THORNBERRY (D-TEX.)

A CITY government product, Rep. Thornberry has been a member of the House since November 1948. He was born in Austin, Tex., on Jan. 9, 1909. Receiving his B.B.A. and LL.B. degrees from the U. of Texas, he was admitted to the bar in 1936. He was a member of the Texas House 1937-1941, district attorney of the 53d judicial district of Texas 1941-42, and volunteered for service

Rep. Thornberry

WCAU CENTER

300 Attend Opening Of $3 Million Plant

GRAND OPENING of WCAU-AM-FM-TV Philadelphia's new radio and television center, built at an estimated cost of $3,000,000, took place last Tuesday with 300 leaders of the broadcasting industry and civic and allied fields attending ceremonies highlighted by addresses from major figures of the radio-TV trade.

Present for the opening of the ultra-modern WCAU center were outstanding members of the trade press, advertising agency executives, sponsors and civic, business, educational and religious leaders. Featured speakers were Vice Chairman Rosel H. Hyde of the FCC; Maj. Robert McLean, president of man of WCAU and president of the man of WCAU and president of the Associated Press; Justin Miller, chairman of NARTB; William S. Paley, chairman of the board of CBS, and Donald W. Thornburgh, president and general manager of the WCAU stations.

WCAU, licensed in 1921, is a subsidiary of the *Philadelphia Bulletin*, and operates with 50 kw on 1210 kc. Its FM outlet was licensed in 1941 and its TV outlet in 1948. It is an original CBS affiliate.

Miller Address

Judge Miller told the dedication audience the opening was significant in "many ways."

"It is significant not only as showing the history of broadcasting through the history of this station . . . from the time when WCAU was a 250-watter back in 1922, a 50,000-watter in 1932, a television station in 1948, and now dedicating this last word in television facilities. But it is also significant in showing the potential of television, and the happy relationship of television, newspapers and radio.

"I hope," said Judge Miller, "that the representatives of the Federal Communications Commission who are here will feel happy in the decision that Commission made several years ago in permitting the joint cooperation of newspapers and broadcasting." He described as "well expressed" WCAU's new motto, "Speaking for Freedom."

CBS Chairman Paley, himself a native of Philadelphia, told listeners that "Philadelphians have cause to be very proud of this structure. And so has everyone in broadcasting, for—more than anything it represents past accomplishments which deserve the highest praise and a faith in the future which gives encouragement and incentive to us all."

Mr. Paley called the WCAU center "the finest thing of its kind in the country."

"We at CBS are very proud of the happy association we have had with WCAU for the past 25 years," he said. He praised past and present figures dominant in WCAU's history, including Leon Levy and his brother, I. D. Levy, "who managed WCAU's destinies for many years"; Robert and William McLean of the *Evening Bulletin*, and Richard Slocum, *Bulletin* general manager, together with WCAU President Thornburgh.

Mr. Thornburgh, in his speech of welcome, summed up the popularity of WCAU radio and TV programs and enumerated seven awards received by WCAU for 1951, adding, "We are proud of the fact that no other station in the United States has ever succeeded in winning all of these important awards in any one year."

He said 1950 and 1951 represented WCAU's two best years in radio sales volume, and that WCAU-TV led all other TV stations in the "last four Rorabaugh quarterly reports" in total advertising accounts. He praised Charles Vanda, vice president in charge of TV, for programs "well accepted locally" and for the station's origination of as many as six programs a week on CBS-TV. "Only Hollywood and New York originate more," he said.

The 1951 awards to WCAU radio and television programs for 1951 were:

George Foster Peabody award for *What in the World*, TV program broadcast in conjunction with the U. of Pennsylvania.

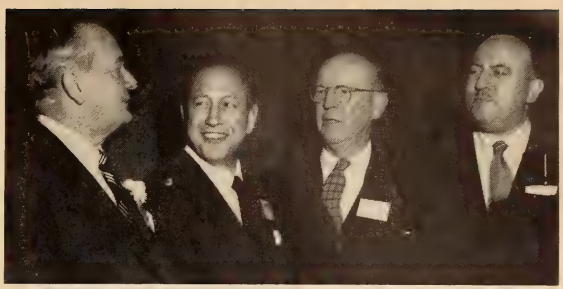
The Alfred I. DuPont award and $1,000 for best large station public service programs—in radio and television.

Ohio State's American Exhibition for Educational Radio and Television Programs—radio certificate for *Freedom Revisited*, historical series of radio.

Ohio State's American Exhibition for television for best children's entertainment program, *Big Top*, circus program originated at Camden convention hall.

Variety award for station originating best television programs for network.

Freedom Foundation award for radio program, *Freedom Revisited*, for the third successive year.



National Federation of Woman's clubs for best children's entertainment in TV, *Big Top*.

Mr. Thornburgh also had praise for John C. Leitch, vice president and director of engineering, for performing "herculean" engineering tasks.

"The culmination of our efforts came in the transfer to the new center last week when television was moved on Sunday night between midnight and 8 a.m., and radio the following Friday night instantaneously, both without loss of a program and without a facility failure of any sort.

"Our new motto, 'Speaking for Freedom,' expresses our hope that we can disseminate this service from the birthplace of freedom in the truly American way," he said.

FCC Comr. George Sterling and Benedict P. Cottone, FCC general counsel, were among those present at the WCAU dedication.

Congratulations go to WCAU President Thornburgh (l) from (l to r) CBS Board Chairman Paley, President Robert McLean and General Manager Slocum of the Philadelphia Bulletin.

Greetings from the FCC are extended to WCAU President Thornburgh (second from left) at WCAU center dedication. Left to right, FCC Comr. Sterling, Mr. Thornburgh, FCC Vice Chairman Hyde and FCC General Counsel Cottone.

'What Radio Needs . . .'

CBS BOARD Chairman William S. Paley told the audience at dedication of WCAU's new radio and TV center last Tuesday that before entering radio he was in the cigar business in Philadelphia in 1927 when a WCAU salesman sold him a "bill of goods," including "a 24-piece orchestra, a choral group, a male singer, girl singer, emcee, guest artist, plus the time period—one hour per week—all for $50," for sponsorship. Mr. Paley said he knew so little about radio it took him a long time to understand why La Palina cigar distributors in such places as Denver, Salt Lake City and Seattle weren't able to hear the program from WCAU. "About a year and a half later the world lost a pretty good cigar maker and gained a very frightened broadcasting man," he said.

KING HEADS KWBW

New Building Planned

NEW general manager of KWBW Hutchinson, Kan., is Harold E. King, Mrs. Bess Wyse, president, announced last week. Mr. King will have complete direction of station personnel and policies, she said.

Mr. King

Formerly manager of WTTH Port Huron, Mich., Mr. King has managed stations over several years in Kentucky, Oklahoma and Michigan. Beginning in radio in his home state, Florida, he received early experience at such stations as WMBR Jacksonville and WORZ Orlando. An NBC affiliate, KWBW plans to erect a large new radio center building in Hutchinson.

RWG STRIKE

Network Move Planned

RADIO Writers Guild National Executive Committee was to meet over the weekend in Los Angeles to coordinate plans for a strike against the NBC, CBS and ABC radio networks and to consider reorganization, scheduled for discussion by the Authors League of America in New York, June 13-15.

Strike discussions will center on coordinating the New York, Chicago and Hollywood locals, according to Eastern Regional Vice President Ira Marion who left Thursday to confer with Milton Merlin, RWG president; Larry Marks, West Coast vice president, and Tom Koch, midwest vice president. Reorganization of RWG pivots on television jurisdiction, subject of dispute between the union and its parent ALA last December, at which time the ALA announced that it would convene with radio and screen writers units and other interested parties to iron the problem out.

MUSICIANS

AFM Lists '50 AM-TV Employment

EMPLOYMENT survey of radio and television, made by the American Federation of Musicians, indicated that $23,058,317 was paid AM-TV musicians during 1950, of which less than $3 million was spent by television.

Survey is part of the report from James C. Petrillo, AFM president, to be presented union members when they hold their 55th annual convention in Santa Barbara, Calif., starting June 9. It indicates that many stations used their staff musicians for both AM and TV performances, so that "it was impossible to determine just how much of this money was allocated to television."

Television report, based on the figures of 60 AFM locals which had jurisdiction over the 107 TV stations in operation during 1950, indicated that many TV stations had little or no employment for local musicians; the major portion of the work was focused in three markets. New York musicians were paid $1,598,217; Los Angeles, $493,119; Chicago, $290,270, and all other 57 locals, $395,553, to make the total $2,777,159. An additional $94,989 was reported as paid to musicians making films exclusively for TV.

The total of $20,186,168 reported for radio employment covered both staff and commercial work in the United States, Canada, Hawaii and Puerto Rico, with staff employment in the United States accounting for almost $13 million.

Breakdown Listed

Breakdown of staff employment in the United States was as follows: 1,929 men worked for 50-52 weeks on 305 stations to gross $10,073,272; 31 men worked from 40-49 weeks on six stations to gross $79,825; 36 men worked from 30-39 weeks on nine stations to gross $54,799; 216 men worked less than 30 weeks on 60 stations to receive $2,572,916; miscellaneous employment—such as extra conductors, musicians, copyists, overtime wages, etc.—amounted to $2,572,916. It was noted that 57 of the 437 stations which employ AFM musicians do so on a single engagement basis only.

Staff employment in Canada totalled $897,652 and in Hawaii, $4,390.

Commercial employment — paid for by sponsors or advertising agencies and separate from station staff work—totalled $4,733,574 for the four major radio networks during 1950. This total was for the employment of 124 leaders and 2,519 men who worked on 194 sponsored programs for an aggregate of 12,700 broadcasts.

Breakdown of commercial broadcasting employment by city was as follows:

New York—82 sponsored programs, broadcast 7,086 times, cost $1,670,531 for musicians' salaries; Los Angeles—85 sponsored programs, broadcast 4,664 times, cost $2,625,458; Chicago—16 sponsored programs broadcast 484 times cost $36,728; San Francisco—one sponsored program broadcast 18 times cost $45,593; Nashville—three programs broadcast 156 times cost $35,464. Traveling bands, playing on seven programs broadcast 292 times, earned $319,800 in salaries.

"A more exact picture" of commercial broadcasting, the report said, is indicated by the figures that 2,519 musicians, conducted by at least 124 leaders, sponsored by 194 agencies or companies, played for a total of 12,700 commercial broadcasts.

Commercial fees in Canada totalled $722,258; in Hawaii, $1,250, and in Puerto Rico, $7,050.

Although AFM is generally acknowledged as one of the most powerful unions and one which offers fullest protection to its members, President Petrillo still has a major problem in finding employment for members who do not live in major cities. Of the 585 locals which reported on staff radio employment, 351 said there was none, and television employment, as previously stated, was practically limited to three production centers.

But in spite of the centralization of broadcasting employment, it was evident from the survey that this is the major income course for musicians. Theatre work in vaudeville, Broadway shows, operas and burlesque totalled $6.5 million; phonograph recordings paid about $2.5 million; electrical transcriptions gave another $2 million; and symphony employment proved limited by the concert season, with complete operating costs—including non-musical expenses—for 31 major orchestras estimated at $11 million.

Report also announced that traveling orchestras, playing for transcontinental commercial radio programs, would receive a 15% increase effective Sept. 1, with a $43.70 minimum for a 30-minute program.

Mr. Petrillo also proposed amendments to include television in the union by-laws, most notably articles 7 and 23 where "and/or television" is to be inserted with most references to "radio."

The four-day AFM convention is expected to attract some 1,100 delegates from about 700 locals in the United States and Canada, with sessions to be highlighted by the president's report, a talk by California's Gov. Earl Warren, and entertainment by the Bob Hope radio troupe and the Les Brown orchestra.

HILL COVERAGE

Media Report Issued

A SEMI-AUTHORITATIVE indicator as to the extent of radio and TV coverage of congressional committee proceedings is available on Capitol Hill.

Media coverage has been assuming greater importance, following a ban clamped on House committee sessions last February by Speaker Sam Rayburn (D-Tex.). A fortnight ago, Sen. Pat McCarran (D-Nev.) proposed that the Senate do likewise [B•T, May 26].

Rep. Rayburn's decision barred newsreels as well as broadcast media. Sen. McCarran's resolution would prohibit still photographs in addition to these media.

Now, the Senate committees themselves determine whether their hearings will be open to newsreels, radio and TV. Resolutions pend in the House to amend the rules and thus set up similar procedure as exists in the Senate. An author of one of these measures is George Meader (R-Mich.).

When the Congressman made his proposal in the wake of Mr. Rayburn's ban, Rep. Meader promised to have prepared a report on congressional committee coverage.

That report has been received by the Congressman from the Library of Congress. Compilation was headed by W. C. Gilbert, acting director of the Legislative Reference Service.

Summary of those findings follows:

House Armed Services Committee—TV and newsreels permitted on 12 days of hearings on the probe of the B-36 bomber program (81st Congress).

House Banking and Currency Committee—Use of television and newsreels restricted.

House Foreign Affairs Committee—Policy not to permit radio, newsreel or television cameras during hearings. There may have been some exceptions to this rule.

House Interstate and Foreign Commerce Committee — Televised hearings of investigation of air crashes at Newark Airport during February 1952.

House Judiciary Committee—Use of TV restricted.

House Un-American Activities Committee—Hiss-Chambers hearings were telecast on 21 hearing days (1948). Motion-picture industry investigations in Los Angeles telecast five hearing days in 1951. "Restrictions have been placed on the use of television and newsreel cameras. The present policy is that television and newsreel cameras are restricted during committee hearings. This decision was made in order to insure proper decorum."

Studying GI Bill

House Select Committee, studying GI bill of rights program—Two hearings (December 1950) in Dallas, three in Harrisburg, Pa., (1951), two in Philadelphia (1951), one in Memphis (1951) and one in Nashville (1951), covered by newsreels. A Murfreesboro, Tenn., hearing August 1951 broadcast. Two hearings held in December 1951 covered by newsreels and recorded. Some newsreel films shown on TV.

House Select Committee, probing Katyn Forest Massacre—Plans to telecast Chicago hearings March 13 and 14, 1952, rescinded after Mr. Rayburn's announcement. Four hearing days, the month before, covered by newsreels.

Senate Appropriations Committee—Respective subcommittees have discretion on use of TV and newsreel cameras. Some filming made on armed services appropriation bill when government agency heads appeared in February 1952.

Senate Armed Services Committee—Universal military training hearings March 30 to April 2, 1952 telecast. Twelve hearing days on sending ground forces to Europe telecast in early 1951.

Senate Banking and Currency Committee—Three hearing days in summer of 1950 devoted to Defense Production Act telecast as were two hearing days on same act in March 1952. Though no records were kept, there have been other instances of television and newsreel cameras used.

Senate District of Columbia Committee—Crime investigations on TV telecast on 11 hearing days in 1952. [There were broadcasts and recordings]. Witness could request TV restriction.

Senate Expenditures Committee's Subcommittee on Investigations—On loyalty program in government, newsreel cameras covered at least seven hearing days in 1948. Subcommittee must authorize radio, TV and newsreels of witness testifying.

Senate Foreign Relations Committee—Thirty-one hearing days of State Dept. employe loyalty probe telecast and covered by newsreel cameras in 1950. Twelve hearings telecast and filmed in 1951 on sending troops to Europe. On Mutual Security Act, 11 days of hearings on TV and filmed in 1951. Same coverage on three days of hearings on St. Lawrence seaway. No restrictions on TV in this committee.

Senate Interstate and Foreign Commerce Committee—Portions of hearings on gambling information legislation filmed (April 17 through May 4, 1950).

Senate Judiciary Committee—On control of subversive activities four hearing days of May 1948 were on newsreels but restrictions placed on TV or newsreels during 1952 probe of Institute of Pacific Rela-

(Continued on page 93)

Yankee Ingenuity and Radio...

. . . Combine for McWhirr's Broadcast Success

RADIO has helped make the 75-year-old R. A. McWhirr Co. a Fall River, Mass., institution. Not only is this department store one of the most successful in New England, it has set somewhat of a record for longevity. It has used the same program on the same station, WSAR Fall River, for 25 years and the same m. c. for 21 years. Success stories are numerous. For example, station management recalls a Christmas shipment of electric trains. Announcement went on the show which closed at 1 p. m., and the last train was sold less than an hour later. Through its half-hour program, "Musical Parade and Shopping News," the store uses radio to popularize its personal shopping service—now one of its most successful departments.

RADIO has produced "real results" for R. A. McWhirr Co., Fall River, Mass., department store, says Richard M. Thompson, president and treasurer.

Mr. Thompson's statement is backed by a record of radio use that probably is unprecedented in broadcasting annals.

For McWhirr has used the same program on the same station, WSAR Fall River, for 25 years. The same m.c. has presided over the program for 21 of those years.

The department store, one of the largest and most successful in its area, this year celebrated its 75th anniversary.

Twenty-five years ago, the store decided to try radio advertising for two reasons: First, the management felt that as a progressive city Fall River should have a radio station and it wanted to lend support. Second, the store knew advertising on radio would supplement its printed ads and lend a progressive touch to the entire advertising program.

It decided to use 12:30 to 1 p.m., Monday through Saturday, on WSAR, with format including popular music on records and informal comment. The commercials were included, just as informally, in the comment. Title was, and still is, *Musical Parade and Shopping News.*

At first, WSAR personnel handled the program but the store used its department heads to tell about merchandise in their departments that they felt would interest listeners.

In this capacity, Eddie Burke first appeared. As manager of the store's automotive department he was asked by the management to deliver a one-minute commercial. He was, he says now, "scared to death." He approached the microphone with fear and trembling and blurted out something about a hand-jack.

But that first announcement proved effective and Mr. Burke was called on several times in the next few months. Mike fright soon vanished and he began enjoying the chore. Four months after his first appearance Eddie Burke took over the program.

In 1931, WSAR was a single room. Mr. Burke had no helper and the choice of records for the daily show was limited. To complete the popular music show and avoid daily repetition he dipped into semi-classics and ballads. But variety was the format then, just as it is today.

McWhirr always has made good use of the program and certain items are featured on it exclusively from time to time. Success stories are numerous. Station management recalls one was a Christmas shipment of electric trains. Announcement went on the show that closed at 1 p.m. and the last train was sold before 2 p.m. the same afternoon.

The store used the radio to popularize its personal shopping service—now one of its most successful departments. Mr. Burke keeps his commercials informal and easy, seldom using prepared copy.

Merchandise sold by the store is not the only thing popularized by the program. Many hit tunes that have swept the country received their first "airing"—at least for the New England area—over *Musical Parade.*

The "Beer Barrel Polka" was one such tune. Eddie heard it for the first time in a New York recording house as played by a foreign orchestra and was so impressed he persuaded the firm to let him have a copy. The record started a clamor for polkas in the city that is still going on and he includes one in each day's program.

Eddie Burke's "coming of age" over WSAR was celebrated by both the station and department store. The 21st anniversary broadcast brought floods of mail, some from adults who remembered hearing his program as children.

This daily repetition of the program at the same time year after year is credited by the McWhirr Co. with much of its success.

In a letter to WSAR, Mr. Thompson pointed out:

. . . For a while in the beginning the results of radio advertising were not positive but we were satisfied that it had definite institutional value.

However, as time went on it soon became apparent that the daily repetition of our program was producing real results and today we believe there is no doubt but that our noon hour program with its familiar theme song is a "Fall River institution."

For most of the 25 years we have had a member of our own organization prepare the program and do the broadcasting, not that WSAR could not have done it expertly and well, but to give it a personal touch.

We are thoroughly convinced that radio broadcasting to be most effective should be continuous and that the station doing the broadcasting must pursue a policy that creates the confidence in its listeners that the managers of the station are responsible and accurate.

At the eventful moment in the history of our company we wish to thank WSAR for its cooperation and the fine service it has given to one of its oldest patrons.

Mr. Burke, as Mr. Thompson points out in his letter, is still an employe of the McWhirr Co. He long since has been relieved of his responsibilities as head of the automotive department and his principal duties are preparation and management of the program. At other times, he serves as a floorman at the department store, where he keeps a close personal contact with friends made for the store and himself during 21 years on the air.

Availabilities Sought

RADIO and television were so successful in a one-month media test for Rayco Mfg. Co., manufacturers of auto seat covers, in New York and five other markets, that the firm is currently seeking time availabilities for a radio and TV campaign in 34 top major markets. Company has used *Front Page Detective* on the DuMont TV Network (Fri., 9:30-10 p.m.) and a radio spot schedule on WHDH Boston. Emil Mogul Co., New York, is the agency.

DOUBLE congratulations go to Earl C. Reineke (r), founder-president and general manager of WDAY Fargo, N. D., from Niles Trammell, NBC board chairman, for WDAY's 30th year on the air and for its record of top Hooperatings on NBC for 1950, 1951 and 1952.

MEDIA FREEDOM

Admen Must Fight—Fellows

ADVERTISERS must join with the nation's free media to block attempts to set up government controls over freedom of speech, Harold E. Fellows, NARTB president, told the Massena, N. Y., Chamber of Commerce last Monday.

"Are you, as advertisers, to be told what programs you can or cannot buy to promote the sale of your goods and services?" he asked. "Or are you to be told what you can or cannot say? Opposition to such proposals is not a selfish fight for the interest of our industry alone. It goes to the very basic freedoms of every citizen in America."

Mr. Fellows told the business men they "belong with us in this fight," through associations and through influence brought to bear personally on their Congressmen and Senators. He told advertisers they would be "investing not only in your own economic improvement, but in your freedom to seek such improvement."

In an address Tuesday to the Watertown, N. Y., Kiwanis Club, Mr. Fellows said "judgment, program tastes, preferences and economic decisions affecting broadcasting, under our American system, belong to the people—all of the people, and not to the government."

He issued a warning against those who would "place governmental halters on the inestimable power of radio and television."

Mr. Fellows said there are convincing arguments in favor of "boards of experts to decide for Mr. and Mrs. John Q. Public what they should and should not see and hear. In stating this, let me quickly add that I do not accept the counter theory that there should be a haven of security from justifiable criticism toward those of us who have programming responsibilities that reach into the very hearthsides of the country.

"Quite the contrary, it is my firm conviction that any whose stewardships over broadcast frequencies reflect continuing mediocrity and downright shabbiness are wantonly wasting their greatest economic resources—the support and confidence of the public."

WDAY CEREMONIES

Mark Start of 31st Year

WDAY Fargo, N. D., entered its 31st year last week following a weeklong 30th anniversary celebration climaxed by a WDAY managed and sponsored band festival in which 45 high school bands from three states participated.

An estimated 20,000 persons watched a two-mile two-hour parade, ending with a massed band concert under floodlights at the football stadium. Lt. Col. William F. Santelmann, director of the Marine Corps Band, directed the 45-band concert, which is to become an annual event.

Walter O'Keefe, comedy quizmaster of NBC's *Double or Nothing*, played to a packed house during the anniversary. The comedian directed the grand finale of the Phillips 66 *Talent Parade* broadcast.

Founder, president and general manager of WDAY is Earl C. Reineke. Other officers include Jack Dunn, station manager; Tom Barnes, sales manager; Ken Kennedy, program director, and Roy C. Pedersen, sales promotion manager.

ice in the armed forces in World War II. He returned to law practice in Austin, was a member of its City Council from 1946 to 1948 and served as mayor pro tem in 1947-48.

* * *

REP. JOSEPH P. O'HARA (R-MINN.)

TOP GOP member on the subcommittee, Rep. O'Hara is a veteran Congressman having served in the House more than 10 years. Of late, he has been in the news for his sponsorship of a bill to give the broadcaster the right to censor political candidates' talks on the airwaves. He has also expressed interest in the McFarland bill (S 658). As are the other six members of the subcommittee, Rep. O'Hara is of the legal profession. He was born in Tipton, Iowa, on Jan. 23, 1895, and received his legal education at Inns of Court in London and at Notre Dame U. where he was given his LL.B. degree. He served in World War I for 27 months. As a lawyer, Rep. O'Hara specialized in trial work and was county attorney at McLeod County in Minnesota before elected to Congress.

Rep. O'Hara

* * *

REP. J. EDGAR CHENOWETH (R-COL.)

REP. CHENOWETH has served eight years in the House, terms concurrent except for two years of the 81st Congress when he had been defeated for re-election. A former county judge for the Third Judicial District of Colorado, Rep. Chenoweth was chairman of the state's Republican Central Committee until nominated for Congress. He began his law practice in 1926 in Trinidad, Col., where he was born on Aug. 17, 1897. He was graduated from the U. of Colorado, worked for a railroad, an oil company and a supply house, while studying law in his spare time. He was an assistant district attorney before becoming a judge. He is listed as a Baptist in the *Congressional Directory*.

Rep. Chenoweth

* * *

REP. HARMAR D. DENNY JR. (R-PA.)

BORN in Allegheny, Pa., on July 2, 1886, the great-grandson of a member of the House, Rep. Denny, after obtaining his law degree from the U. of Pittsburgh Law School, and serving in both World War I and II, is a so-called "freshman" member of the House. He is serving his first term. A bomber pilot in the First World War, Rep. Denny was in the Air Corps in the Second World War, and is a commissioned lieutenant colonel in the Air Force (retired). He is a member of Session, First Presbyterian Church of Pittsburgh. Early in his career, he was an attorney-at-law and investment counsellor. He was chairman of the Advisory Committee of Denny Properties.

Rep. Denny

CONVENTIONS

NBC Plans Programs; CBS Names Directors

THIRTY-SIX hours of special pre-convention programming are planned by the NBC networks, William R. McAndrew, director of NBC convention coverage, announced last week.

The public service programs, intended as a climax to NBC reports on primary elections and as a prelude to the actual conventions, will include profile reports of leading candidates, explanations of convention mechanics, and reviews of the party meetings in Philadelphia four years ago. The network plans a total of 60 hours of radio and television broadcasts during the conventions themselves, to be sponsored by the Philco Corp.

NBC installation of $1.5 million worth of equipment in the International Amphitheatre, site of both Republican and Democratic conclaves, is to be completed by July 3, four days before Republican delegates begin their meetings, Mr. McAndrew said. Democrats will convene July 21.

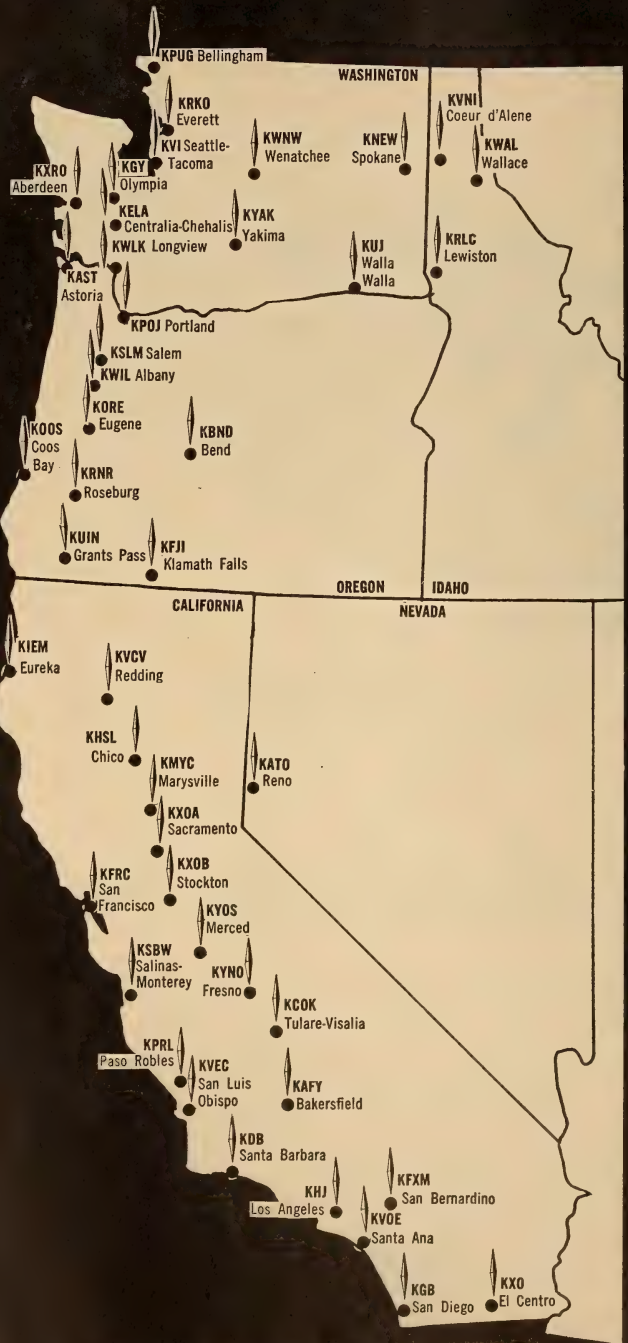
The network has obtained Polaroid land cameras, which deliver developed pictures within one minute, as a supplement to live and film TV coverage and has hired a complete photo laboratory to process the thousands of feet of motion picture films expected to be shot daily. A teletype communications system will link all NBC stations directly with the network's convention headquarters, where the director's office is also being equipped with radio and TV monitors to allow for checks on what other networks are broadcasting at a given moment.

CBS-TV network meanwhile announced that a total of five directors have been assigned, probably for the first time ever, to a single television job: convention coverage, to be sponsored on CBS-TV by Westinghouse Electric Corp.

"It'll take teamwork unprecedented in the history of television, smoother coordination than any show ever put on the air," Sig Mickelson, director of news and public affairs, said.

Instead of the usual four or five cameras assigned to a major TV program, the CBS-TV convention crew will work with a total of 17—often operating simultaneously. Four of the five directors will supervise groups of cameras, selecting the best scenes for transmission to the master control room where final selection of the one scene to be transmitted to the audience will be made by Don Hewitt, CBS-TV news veteran. Mr. Hewitt's current assignments include *See it Now*, *Douglas Edwards and the News* and *Presidential Timber*.

Franklin Schaffner, currently alternating director of *Studio One*, will be assigned to cover eight of the cameras, those which will be operated as a pool by the various networks alternately. News directors Ted Marvel and Vince Walters had been designated as directors for six other cameras to be located in special CBS-TV studios, three each in the amphitheatre building and the CBS-TV headquarters in the Conrad Hilton Hotel. Byron Paul will direct the remaining three cameras.



Like bees take to honey

Baltimore merchants go for WITH the way bees go for honey. They love the quick, profitable results they get from this low-cost station. At low, *low* rates, WITH delivers a huge, responsive audience—more *buying* listeners-per-dollar than any other radio or TV station in town. And that means *low cost results!* And that's why *WITH carries the advertising of twice as many local folks as any other station in town!*

So take a tip from these smart advertisers. Put WITH on *your* schedule. WITH can produce low-cost results for *you*, too! Get the whole story from your Forjoe man today!

CONELRAD PLAN *Discussed With N.Y. Radiomen*

TO EXTEND the effectiveness of the Conelrad air raid alert plan for radio, the U. S. is working with representatives of Canada and Cuba and also expects to come to an agreement with Mexico in the near future, FCC Comr. George E. Sterling told New York area broadcasters Wednesday.

At the same meeting, one of a series of regional sessions being held to discuss the Conelrad plan with broadcasters, Audio-Visual Director Jesse Butcher of the Federal Civil Defense Administration reported that meetings will be set up within a few weeks with all segments of the industry to discuss the handling of programming during Conelrad operations in an air emergency.

"There is devolved on FCDA the responsibility of programming during Conelrad operations," Mr. Butcher declared. "Now that most of the technical problems have been determined by the various government agencies involved, very shortly we shall consult with the broadcasting industry, NARTB, networks, local stations, and others identified with the medium" in order to get "their counsel and suggestions along with our people on just what this programming should be."

Comr. Sterling reported that the more than 1,200 radio stations currently enlisted in the plan have spent approximately $1.5 million on it. Both he and Mr. Butcher lauded the cooperation of broadcasters, Comr. Sterling asserting that without it "the plan would have been a dismal failure." Mr. Butcher re-emphasized that in event of air attack upon the U. S., "radio will be the major medium of communication in instantaneously and continually bringing information and instruction to the people of the nation."

Prevents 'Homing'

The Conelrad plan (technically, the control of electro-magnetic radiations) is designed to provide a means of emergency communication while at the same time keeping enemy planes from "homing" to targets on stations' signals. It provides that, upon signal from the air division commander, stations will switch frequency to either 640 or 1240 kc. They will operate in local "clusters," with the stations within each cluster alternating operations systematically, so that only one is broadcasting at a given time.

Comr. Sterling described the last nation-wide Conelrad test, conducted April 26, as "successful," providing good navigation deception and ground coverage but still leaving room for improvement [B•T, April 28].

Referring to negotiations with adjacent nations, he pointed out that "no plan of operation could be successful [in time of attack] without the participation of our neighboring countries," and added: "An exchange of notes has been made with Canada and Cuba and our staff is working in collaboration with their government representatives concerned. We expect to work out an agreement with Mexico shortly."

To those concerned about enemy use of non-broadcast sources of electro-magnetic radiation for target-finding, Comr. Sterling gave assurances that "counter-measures are being provided against all methods of electronic navigation."

He also said it was expected that the Conelrad plan — developed under FCC guidance at Air Force request—will be given final approval of the Secretary of Defense and the National Security Resources Board "within a few days." It already has been approved by the Air Defense Command and the Dept. of the Air Force.

The New York meeting, attended by some 75 radio and civil defense representatives, was preceded by a similar one in Philadelphia and was followed by a session in Boston Friday. A meeting for Maine broadcasters is slated today (Monday) at Portland. Comr. Sterling, a native of Maine, noted that broadcasters of that state have not yet enlisted in Conelrad and expressed hope that as many as possible would be on hand to discuss the importance of the plan and its mechanics.

FCC personnel accompanying him at the meetings included Ralph Renton, who is serving as national supervisor for Conelrad's development, and Prose Walker, zone supervisor.

Comr. Sterling reported that FCC has a Conelrad coordination engineer in each air division—a total of 11—and a zone supervisor in each of the three air defense force areas.

CBS Radio Talks

(Continued from page 23)

affiliates, including some of those who signed last week's telegram, another radio network rate cut cannot be expected to solve anything and may succeed only in leading eventually to yet another cut, as would seem to have been the case with the reductions of last year.

"Where do you stop?" one prominent affiliate asked last week. "I don't think anybody has the answer."

This broadcaster also said the under-the-table business practice was present on the station level. He said he had refused to make concessions or deals below card rates, although competing stations in his community had done so.

He admitted that by sticking to his card he had "undoubtedly lost some business" but that overall he had kept far more than he lost. He saw no reason why this same practice could not be followed on a network basis.

Text of the telegram sent to all CBS Radio affiliates by the nine broadcasters follows:

The undersigned feel that the current network radio situation offers cause for grave concern. As affiliates of the leading radio network we believe that a meeting to acquaint all CBS affiliates with the current situation is desirable. Accordingly we have scheduled a meeting at the Ambassador Hotel, July first and second.

Please be prepared to devote at least two days of your time to this problem. We have invited CBS officials to be present during the second day of the meeting and have been informed by Herbert Akerberg [vice president in charge of station relations, CBS Radio] that a representative group, including Chairman of the CBS, William S. Paley, Frank Stanton and Adrian Murphy will attend.

In order to secure room reservations for you at the Ambassador or elsewhere if desired, must have your acceptance immediately. We urge your attendance in your own best interests and we request you wire acceptance in care of George B. Storer, Storer Broadcasting Co., 488 Madison Ave., New York City.

'BLACKLISTING' *KOWL Files Reply To ACLU*

KOWL Santa Monica, Calif., told FCC last week it stood on solid ground in cancelling the program contract of Rev. Clayton Russell in October 1950 because of his alleged associations with Communists. The station made its contention in a reply to the "blacklisting" complaint of the American Civil Liberties Union which also had cited WPIX(TV) New York and NBC, ABC, DuMont and CBS [B•T, April 14].

Arthur H. Croghan, KOWL president and manager, informed FCC:

We will not permit Communists or persons who are sympathetically identified with Communists or Communistic organizations to use the facilities of Station KOWL and we shall do everything in our power to prevent any Communistic utterances over the station.

We believe this to be good Americanism and we do not believe that the Commission or any other agency of our government will rule otherwise.

If we be wrong it will, of course, be up to us to determine whether we want to subvert our ideals or discontinue the broadcasting business.

ACLU's petition requested the Commission to conduct a general investigation into blacklisting in radio and television, as charged in a newly published book by ACLU board member Merle Miller titled *The Judges and the Judged.* The organization requested the Commission to consider adopting rules to ban the practice.

ACLU specifically asked FCC not to renew the licenses of the defendants until they take an oth against discrimination because of actual or alleged associations or beliefs, past or present, and agree to insert a similar no-blacklist clause in contracts dealing with programs prepared by advertisers or agencies.

ACLU contended the blacklisting practice stemmed from listing of names in the anti-communist publications *Red Channels* and *Counterattack.*

Filed by the Washington law office of Eliot C. Lovett, KOWL's reply explained that Rev. Russell's contract, made in May 1949, contained a provision which reserved to KOWL the right to reject or cancel "any and all contracts with Advertiser, or refuse to broadcast any part of or all of any programs which do not, in the opinion of the Broadcaster, maintain a quality and character creditable alike to the Broadcaster and Advertiser. . . ." This provision is contained in all KOWL contracts, the reply noted.

The reply explained that in a newspaper story concerning the termination of the contract, a station employe was quoted to the effect that Rev. Russell's program was stopped because his name was found "in several lists of persons supposed to be friendly with Communism" but "we have watched his speeches closely and he has never uttered a word that could be objected to and we do not think he is a Communist."

KOWL explained that because of this quotation, it was sued for libel by Rev. Russell in May 1951 but the case was dismissed and never refiled. The suit for $100,000 damages, KOWL said, was "predicted upon the erroneous supposition that KOWL is a common carrier."

In his conclusion, however, Mr. Croghan told the Commission:

If we had had any knowledge of Rev. Russell's Communistic associations when he approached us for time on KOWL we would certainly have refused to sell to him. Not until the late summer of 1950 did we become suspicious. Paul R. Snider, our Program Director, reported that he listened to several of Rev. Russell's Sunday programs when he was in the control room; that Rev. Russell made no attempt to preach but endeavored primarily to arouse Negroes to action; that, shortly after Paul Robeson had been cited by a Congressional Committee for un-American activities, Rev. Russell devoted his program time to extolling the virtues of Robeson, stating that he represented the colored people and that if he were persecuted all Negroes would be persecuted.

When a rally was held in Los Angeles for Paul Robeson Rev. Russell appeared on the platform and it is common knowledge that he was active in making Robeson's appearance possible. Of course, Paul Robeson is an acknowledged Communist.

Then I found Rev. Russell's name in "Red Channels." Thereupon I checked three different sources, one of which was the Sheriff's office of Los Angeles County, which had a large file on Rev. Russell that clearly showed that he was closely identified with Communistic organizations. Another source, namely, Senator Jack B. Tenney, of the California Legislature, had a file that also showed that Rev. Russell consistently followed the Communist Party Line. (See the Senate Committee's report for 1948, pp. 183, 215, 252, and 375.) Similar information was disclosed in the files of "Alert," which is a weekly report published in Los Angeles on Communism.

maybe you can't *BUY* but you can *HIRE* experience

110 Sutter Street, San Francisco, Calif.
Exbrook 2-3407
James Alspaugh, *Manager*

There is an old copy-book proverb that you can't *buy* experience. But with H-R Representatives, you can HIRE it.

H-R Representatives was founded by mature men who collectively have one of the most exceptional combinations of years of sales and advertising experiences to be found in the radio and television industry. And of utmost importance, these sales-seasoned veterans are not desk-bound because they spend their normal working hours pounding pavements, carrying the sales stories of the stations they represent to advertising agencies and advertisers.

Because H-R has a policy on sending a MAN to do a MAN'S work, whether it be owner or employee, the AM and TV stations on the H-R list receive the finest — yes, the very finest representation available.

Even though you can't BUY experience, you can HIRE it and it pays dividends.

Radio Tax Relief

(Continued from page 23)

tion. If he lost money in days of pioneering in the new field, he was more than likely the money-maker starting in 1950. The differences between 1950 and 1951 to the base period of 1947-1949 in earnings were great enough to make a comparative difference in the amount of money he would have had to pay Uncle Sam.

Subsequently, a relief provision was written into the Excess Profits Law in the 82d Congress. It was hailed as a victory for the industry [B•T, Oct. 15, 1951]. By the same token, the Miller bill could prove a variable windfall for the licensee who owns radio along with other businesses.

The bill was introduced with nary a murmur last Monday. Just how much chance the bill would have this session of Congress was doubtful. Lawmakers are not willing to change the tax law this year. In any event, Rep. Miller could be expected to re-introduce the measure early next year.

It adds a subsection (e) to Sec. 459 (which contains the TV relief section) of the Internal Revenue Code. It reads as follows:

"(e) RADIO BROADCASTING COMPANIES.—

"(1) In the case of a taxpayer, engaged in the business of radio broadcasting throughout a period beginning during, but not prior to, the 36-month period ending on the last day of its base period, and ending with the close of the taxable year, and not engaged in the business of television broadcasting prior to January 1, 1951, the taxpayer's average base period net income computed under this subsection shall be computed as follows:

"(A) If the taxpayer was engaged during its base period in any business or businesses other than radio broadcasting, by computing the average base period net income under section 435 (d) for such other business or businesses (determined without regard to income deductions, losses, or other items attributable to the radio broadcasting business).

"(B) By multiplying such part of its total assets (as defined in section 442 (f)), for the last day of its base period as was attributable to the radio broadcasting business by the base period rate of return determined under section 447 (c) for the industry classification which includes radio broadcasting. The amount so computed shall be reduced by an amount equal to such portion of the total interest paid or incurred by the taxpayer for the period of 12 months following the close of its base period, as is attributable to its radio broadcasting business.

"(C) By adding the amount computed under subparagraph (B) to the amount, if any, computed under subparagraph (A).

"(2) RULES FOR APPLICATION OF SUBSECTION.—

"(A) For the purpose of section 435 (a) (1) (B), an average base period net income determined under this subsection shall be considered an average base period net income determined under section 435 (d); but in computing the base period capital addition under section 435 (f), the computations under such section shall be adjusted, under regulations prescribed by the Secretary, so as to exclude therefrom items attributable to the radio broadcasting business.

"(B) If any part of the total assets referred to in paragraph (1) (B) were acquired, directly or indirectly, through the use of assets attributable at any time during the base period to a business of the taxpayer other than radio broadcasting, the amount determined under paragraph 2 (A) shall be properly adjusted by eliminating from the excess profits net income (computed for the purpose of paragraph 2 (A)) for each month prior to such acquisition, such portion thereof as is attributable to the assets used, directly or indirectly, for such acquisition. For the purpose of this subparagraph, the excess profits net income for any month shall be attributed to such assets on the basis of the ratio, as of the beginning of the day of the acquisition, of such assets to total assets (as defined in section 442 (f)) determined without regard to assets attributable to the radio broadcasting business.

"(C) The Secretary shall by regulations prescribe rules for the application of this subsection, including rules for the computation of the taxpayer's net capital addition or reduction.

"(3) APPLICATION OF PART II.—

"The Secretary shall prescribe regulations for the application of part II for the purpose of this subsection in the case of an acquiring corporation or a component corporation in a transaction described in section 461 (a) which occurred prior to the close of the base period of the acquiring corporation and the respective component corporations."

SEC. 2. TECHNICAL AMENDMENT.—Subsection (e) of section 459 is hereby designated as subsection (f).

SEC. 3. EFFECTIVE DATE.—The amendments made by this Act shall be applicable with respect to taxable years ending after June 30, 1950.

WIVI Starts

WIVI Christiansted, St. Croix, Virgin Islands, began operations at 6:30 a.m. May 15. WIVI has appointed Pan American Broadcasting Co. as its exclusive international representative. Operating with 250 w on 1310 kc, station is under supervision of General Manager Edward M. Vickers, who also serves as technical supervisor.

NEWLY-ELECTED officers of the Indiana Radio Newsmen at their meeting May 23 coincident with Indiana Broadcasters Assn. sessions, at WIRE Indianapolis are (l to r) Phil Haines, WTRC Elkhart, 1st vice president; Ruth Dunagin, WFIU Bloomington, treasurer and editor of the IRN Bulletin; Howard Stevens, WBOW Terre Haute, president, and Spencer Danes, WKBV Richmond, secretary.

WSB LIMITS

Opined by NARTB's Doherty

WAGE Stabilization Board should devote its functions only to employe relations "which bear upon the inflationary picture, and its regulations and decisions should require prior approval of the nation's Economic Stabilizer.

These opinions were offered to the House Education and Labor Committee in Washington last Wednesday by Richard P. Doherty, industry member of the WSB and NARTB Employe-Employer Relations director. The committee held hearings on a resolution (H Res 532) authorizing a probe of WSB policies as an outgrowth of the steel wage dispute.

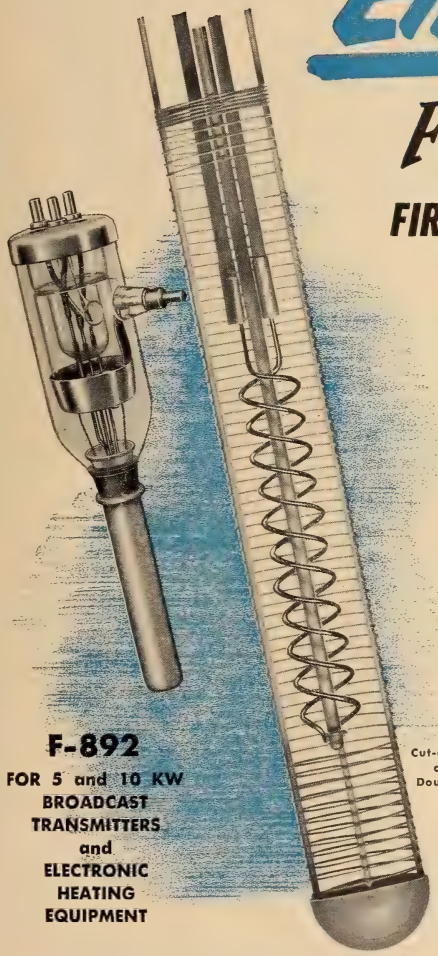
"A further pressure of rising labor costs has the grave potential danger of generating a very real recession in business activity," Mr. Doherty warned, in reviewing board practices. He charged that WSB had been evaluated without regard to the "real and far-reaching impact . . . upon collective bargaining procedures of the nation," of which, he said, the board is the "architect."

Mr. Doherty personally felt that wage stabilization should be consigned to "the deep freezer" or, failing that, be subject to scrutiny of a congressional "watchdog" committee. In any event, it should be deprived of "autonomous rights to act in the area of national stabilization designed for the good of all the people. . . ."

As an example, Mr. Doherty noted that WSB rules and regulations are universally accepted by unions and workers as "indicating minimum available floors." Union security does not fall within the board's bailiwick, he added.

Wages of radio-TV and other industries are subject to board jurisdiction under current economic controls legislation.

NOW... Filament-to-Grid Shorts



Eliminated!

Federal's F-892

FIRST with the new, proved design

Double Helical Filament

- **Does away with BOWING!**
- **Greatly increases tube LIFE!**

F-892
FOR 5 and 10 KW BROADCAST TRANSMITTERS and ELECTRONIC HEATING EQUIPMENT

Cut-away View of Federal's Double Helical Filament

ANOTHER important Federal *"First"* is the new Double Helical Filament—for Federal's re-designed F-892!

The design has been completely checked and subjected to numerous filament cycling tests equivalent to two years' operation in normal broadcast equipment.

One tube filament was cycled 1500 times—1000 times with the starting current *twice* rated, and 500 times with the starting current *four* times rated—*without movement or distortion!*

Wound through 360° for mechanical stability and carrying opposing electrical fields which provide improved electrical stability, the F-892's Double Helical Filament definitely eliminates *bowing*—one of the primary causes of filament-to-grid shorts. For proof, all F-892's now in the field are still in service!

For full information on Federal's sturdier, longer-life, more dependable F-892, write to Vacuum Tube Division, Dept. K-568.

Evert, asst. to v. p., Ohio Bell Telephone Co., sponsor; standing (l to r): Mannie Eisner, WGAR sls. rep.; Bob Dailey, McCann-Erickson acct. exec., and John B. Garfield, WGAR sls. mgr.

'SEIZURE POWER' *McCarran Moves to Test Truman Claim*

A CONGRESSIONAL move to test President Truman's contention that he has "inherent power" to seize private property—both disclaimed and reiterated since mid-April by the Chief Executive—was gathering steam on Capitol Hill last week.

It was plain that, while the Supreme Court had not yet announced its decision in the steel seizure case, some members of both the Senate and House were disturbed over the far-reaching implications of Mr. Truman's statements.

The basic underlying issue since the seizure threat was first raised by Mr. Truman at his April 17 news conference is whether the President may, under certain circumstances, seize radio-TV, press and other private property under the Constitution.

To crystalize the controversy, Sen. Pat McCarran (D-Nev.), chairman of the powerful Senate Judiciary Committee, last Monday introduced a resolution (S J Res 158) which would specifically prohibit such seizure by Constitutional amendment.

Extent of Proposal

The McCarran proposal, which was referred to his own committee, would amend the Constitution to provide that "the executive power of the United States shall not be construed to extend at any time to any taking of private property other than in a manner prescribed by law."

Committee authorities acknowledged that this would embrace all "private property" including radio, television and press industries of communications not falling within the realm of public utilities.

Sen. McCarran, in stating his proposal, explained:

> The purpose . . . is to eliminate not only all doubt, if doubt there be, but also all argument over the question of whether the President has any right, inherent or otherwise, to seize an industry, or any other private property, when he has not been authorized to do so by a law passed by the Congress.

Sen. McCarran said no question could arise as to inherent powers if his amendment were adopted by two-thirds of the Senate and House and ratified by the legislatures of three-fourths of the states. He said he is hopeful for committee action in "the near future" and that he would strive for Senate consideration "at the earliest possible date."

The Nevada Democrat explained there is need beyond the present steel case for a "desirable safeguard at any time, for it can never be foretold whether some future President might not be or become despotically inclined, power mad, careless of individual liberties, contemptuous of the Constitution, excessively military minded or otherwise inclined to the usurpation of power."

In the immediate instance, it would be "clearly necessary" if the Supreme Court rules in favor of the steel industry seizure, he added. Government could seize industries in labor disputes only if Congress gave power by law.

Sen. McCarran felt his resolution would not bind the President's exercise of powers in a given emergency but would prohibit him from seizing industry *per se*—"at any time"—without statutory authority.

The question of seizure is perhaps less academic for newspaper publishers as quasi-public institutions than for radio-TV station owners licensed within the structure of the Communications Act. But again, fear has been raised that the President could seize stations short of a war-type emergency—viz., in a labor dispute or under other conditions.

The question with respect to radio-press seizure initially was raised last April by Col. J. Hale Steinman, co-publisher of the Steinman newspapers (which own radio-TV properties). Mr. Truman said that under certain circumstances the President must act in the best interest of the country. On April 24, he denounced as so much hooey any idea as to whether he could seize stations and newspapers. But again, at his May 22 news conference, he said he felt he had inherent power of seizure over industry.

Provisions for Seizure Cited

Radio and TV stations under Sec. 606 (c) of the Act are subject to seizure upon Presidential proclamation "that there exists war or threat of war, or a state of public peril or disaster or other national emergency, or in order to preserve the neutrality of the United States."

The Communications Act was revised last October and implemented with an Executive Order in December. Seizure is spelled in the provision to authorize "use or control" of any station by a government agency.

What is not generally known is that a disclaimer of inherent powers was attached to the Emergency War Powers Act as first extended last April to June 1 and again last week to June 15. Sense of the original rider is that nothing in the act shall be construed as providing authorization for seizure of private property—strictly aside from the Constitutional question.

Both the Senate and House Judiciary Committees rejected more definitive initial proposals along that line and sent the legislation (S J Res 156) to the White House to meet the June 1 expiration deadline. Intent to consider this proviso in a Constitutional light is promised before the Act is extended again beyond June 15.

Speaking of Brand New!

Here Are the NEW SHURE Hi-Fidelity Slender "300" Series Bi-Directional Gradient[1] Microphones!

Here are the finest of all the "slender" microphones yet produced. They combine the best features of conventional velocity microphones with an advanced acoustic design. Here, indeed, are high-fidelity microphones which deserve superlative descriptions because of their outstanding performance and remarkable ruggedness.

The "300" Series are multi-impedance velocity microphones of such a high order that they belong in a class by themselves! They provide a Bi-Directional pickup pattern—permitting greater performer freedom (performers can stand at a 73% greater distance from the microphone!). The "300" and "315" will pick up voice and music from front and back—yet discriminate against unwanted noises from the sides. They reduce reverberation and pick-up of distracting random noises by 66%!

The Model "300" is a miniature high-fidelity Gradient[1] Microphone with exceptionally smooth peak-free response—40 to 15,000 c.p.s.—specially designed to meet the exacting requirements of TV and radio broadcasting. Its Bi-Directional Polar pattern is effective over a broad frequency range.

Model "315" General Purpose is similar in size, design and technical features to the Model "300," and is finished in a rich, soft chrome. It is ideal for those numerous public address applications where its streamlined design and striking beauty lend dignity and prestige to any setting in which it is used. Its Bi-Directional pickup pattern is extensive over a broad frequency range (50 to 12,000 c.p.s.). It permits the sound system to be operated at a level almost 6 db higher than is possible with non-directional (omni-directional) microphones!

IMPEDANCE TABLE	OUTPUT LEVEL
L—35-50 ohms	58.7 db below 1 Milliwatt per 10 microbar signal
M—150-250 ohms	59.5 db below 1 Milliwatt per 10 microbar signal
H—High	57.0 db below 1 volt per microbar

MODEL	CABLE	CODE	LIST PRICE
"300"	20 ft.	RUDOW	$125.00
"315"	20 ft.	RUDOX	$ 75.00

And now the HPL is in

June 2: CBS Radio's big 50,000-watt affiliate in Charlotte, WBT, becomes the twelfth station to broadcast locally the most sales-effective participating program in all broadcasting—The Housewives' Protective League.

Starting today, WBT (which has a greater audience in Charlotte than all other stations combined and virtually no competition from other Charlotte stations throughout the rest of its 62-county-unit area) carries the daily HPL programs throughout a sales territory where 562,860 well-to-do radio families live and listen... and where last year retail sales added up to a walloping $1,712,165,000!

Now, with the addition of WBT, you can buy The Housewives' Protective League on twelve big stations (each of which has the largest average audience in its area), or on any one or any combination of these stations. All together, they cover 16,351,650 radio homes (38.8% of the nation's total), and $60,480,583,000 worth of retail sales (40% of the nation's total).

Ironclad proof of the HPL's ability to sell *your* product lies in the partial list of advertisers (right) who have used the HPL in recent months. Their success is the reason the HPL is known far and wide as *"the program that sponsors the product—the most sales-effective participating program in all broadcasting."*

For information about the HPL, call the stations, their national representatives or...

DEFENSE ORDERS

Rep. Brown Hits Policy

CURRENT military procurement policy of channeling defense contracts to key industries on the basis of local employment needs rather than lowest bids drew Congressional censure May 22.

Rep. Paul Brown (D-Ga.) served notice that members of the southern bloc in Congress would wreck economic controls legislation if necessary to forestall the practice in the apparel industry. Other industries were not mentioned, but the practice has been followed in electronics and elsewhere by military authorities since former Defense Mobilizer Charles E. Wilson first announced it last year.

Congressman Brown and others protested on grounds southern industries would suffer because of the procurement policy.

WCCO Minneapolis-St. Paul aired its 100th remote broadcast from Lewisville, Minn., 115 miles from its studios. Show, *Our Own Bob*, originated in Our Own Hardware store. Happy to have overcome engineering headaches of the long remote are (l to r) Steve P. Duffy, president-general manager, Our Own Hardware Co.; Phil Lewis, WCCO assistant sales manager; Bob DeHaven, star of show, and Art Lund, radio-TV vice president, Campbell-Mithun Adv.

Printers' Ink Puts "Spotlight" on Spots

Our June 27th issue will carry a major editorial report, telling why "Spots" are so productive -- and how to use them.

Now, because Spot Radio is commanding increased attention by advertisers and agencies, AND is being used by thousands of local advertisers, our editors traveled far and wide interviewing advertisers throughout the country to obtain the material used.

Actual case histories that show how Spot Radio is now helping to sell coffee, tractor brakes, shirts, beer, varnish, sewing lessons, fly killers, beans and a host of other products and services, are included in this up to the minute report.

Some of the "Spot" features of this article give you the facts on—The Growth of National Spot Radio Volume, Why National Advertisers are using Spot Radio, Different Types of National Spot Radio, How Spot Radio Fits Into the Complete Advertising Program, and Sales and Advertising Programs That Spot Solves Best.

This is an issue that should carry the story of your market and your station, because of our total audience of 23,309 readers, more than two-thirds are buyers of advertising—Sales managers, regional managers, advertising managers, and top management who give the final O.K. to agency executives who buy literally thousands of Spot Radio Programs in all parts of the country.

Bob Kenyon

Closing date for this issue is June 17, so please wire, write or phone us your reservation today.

	Rates	Width	Depth
Two-page spread	$1,040	15"	10"
Full page	520	7	10

FTC RULES TALK

Appliance Groups to Meet

REPRESENTATIVES of major radio-TV appliance trade groups are expected to attend a three-day conference June 18-20 tentatively set by the Federal Trade Commission for discussion of trade practice rules proposed by the special All-Industry Committee [B•T, May 12].

Among organizations expected to send representatives are the National Electronics Distributors Assn., National Television Dealers Assn., National Assn. of Cathode Ray Tube Mfrs., and National Appliance & Radio Dealers Assn. Officials of Radio-Television Mfrs. Assn. and individual firms also will attend.

The commission has set aside three days, rather than one, with the hope industry segments can agree on radio-TV trade practice rules drafted by the committee. Paul Butz, FTC Trade Practice Bureau chairman, will preside.

FTC then will prepare a final draft and set a hearing at which any group may appeal the final rules. FTC authorities held out the possibility rules may be adopted by this fall or early 1953. The rules would extend radio practices to television, with certain modifications.

Brightman Named

SAMUEL C. BRIGHTMAN, former newspaper correspondent and radio newsman, has been named publicity director for the Democratic National Committee. Appointment of Mr. Brightman, who has been serving as acting publicity director since the resignation of Charles Van Devander last month, was announced last Tuesday by National Chairman Frank E. McKinney. Mr. Brightman formerly was Washington correspondent for the Louisville *Courier-Journal* (WHAS-AM-TV) and also was on the news staff of KSD St. Louis, the St. Louis *Star-Times* and the Cincinnati *Post*.

CBC APPROVALS

Board of Governors Issues

FOURTEEN Canadian stations were recommended for stock transfers and two to be licensed for emergency transmitters. Actions were taken at the May meeting of the Canadian Broadcasting Corp. board of governors held at Quebec City, May 16. Emergency transmitters were recommended for CHLP Montreal, 250 w, and CJON St. John's, Newfoundland, 100 w. Transfer of the license of CHUB Nanaimo, was necessitated with control changing from George Randall to Standard Broadcasting Co. Ltd., in which the Vancouver *Sun* has some interest.

CJNT Quebec, changed hands from Goodwill Broadcasters of Quebec Inc., to H. Bouffard, J. M. Dessureault and Jean-Paul St. Laurent, all of Quebec, holding equal shares. CKXL Calgary, changed hands, with Fred Shaw, formerly of CFAC Calgary, and C. E. Chesher, Calgary, obtaining majority control.

Other stations whose applications for share transfers were recommended included CKOM Saskatoon, CHNC New Carlisle, CKLN Nelson, CKOK Penticton, CJOB Winnipeg, CFAR Flin Flon, CJBR Rimouski, CKNB Campbellton, CKRS Jonquiere, CKBW Bridgewater, and CJLS Yarmouth.

Inaugural Plans Begin

FIRST marks of organization for arrangements committee on Capitol Hill for inauguration of the U. S. President-elect next January are under way. House Speaker Sam Rayburn (D-Tex.) has appointed himself, Majority Leader John McCormack (D-Mass.) and Joseph Martin (R-Mass.), the minority leader, as the House members to serve jointly with three Senators already appointed by Vice President Alben Barkley. The Senators are Carl Hayden (D-Ariz.), probable chairman, Majority Leader Ernest W. McFarland (D-Ariz.) and Styles Bridges (R-N. H.), the minority leader. Work on stands and temporary seating arrangements should be under way by fall.

WSNY BACK PAT

Given for Safety Work

CONGRATULATIONS have gone to WSNY Schenectady, N. Y., from the city's mayor, city manager and President Bob Hanna of the Schenectady Chamber of Commerce, upon the station's receipt of a public interest award from the National Safety Council for "exceptional service to safety" [B•T, April 28].

According to Winslow Leighton, WSNY president and general manager, its *Van de Car & the News* program was largely responsible for the award. The station ran an appreciation ad in the local city newspaper May 5, noting also its awards in *Billboard* magazine's competition. Mr. Hanna is broadcasting manager for GE's WGY WGFM (FM) and WRGB (TV) Schenectady.

This is the Hallmark of the Ideal Insulation

SINCE 1919

MYCALEX

THE INSULATOR

TRADE MARK REG. U.S. PAT. OFF.

FOR ALL FREQUENCIES

Mycalex, the ideal insulation, offers low loss and high dielectric strength. It is impervious to oil or water, free from carbonization, withstands high temperature and humidity. Mycalex remains dimensionally stable permanently and possesses excellent mechanical characteristics. In its present high state of development, Mycalex combines every important insulating advantage — including economy. Mycalex is available in sheets and rods, can be injection or compression molded to close tolerance, is readily machineable, can be tapped, drilled, threaded and ground.

INJECTION MOLDED GRADES

MYCALEX 410

Mycalex 410 is approved fully as Grade L-4B under National Military Establishment Specification JAN-1-10 "Insulating Materials, Ceramics, Radio, Class L."

Power Factor, 1 megacycle	0.0015
Dielectric Constant, 1 megacycle	9.2
Loss Factor, 1 megacycle	0.014
Dielectric Strength, volts/mil	400
Volume Resistivity, ohm-cm	$1x10^{15}$
Max. Safe Operating Temp., °C	350
Water Absorption, % in 24 hours	nil
Tensile Strength, psi	6000

MYCALEX 410X

Power Factor, 1 megacycle	0.012
Dielectric Constant, 1 megacycle	6.9
Loss factor, 1 megacycle	0.084
Dielectric Strength, volts/mil	400
Volume Resistivity, ohm-cm	$5x10^{14}$
Max. Safe Operating Temp., °C	350
Water Absorption, % in 24 hours	nil
Tensile Strength, psi	6000

Mycalex 410X can be injection molded, with or without metal inserts, to extremely close tolerances.

MACHINEABLE GRADES

MYCALEX 400

Mycalex 400 is approved fully as Grade L-4A under National Military Establishment Specification JAN-1-10 "Insulating Materials, Ceramics, Radio, Class L."

Power Factor, 1 megacycle	0.0018
Dielectric Constant, 1 megacycle	7.4
Loss Factor, 1 megacycle	0.013
Dielectric Strength, volts/mil	500
Volume Resistivity, ohm-cm	$2x10^{15}$
Arc Resistance, seconds	300
Max. Safe Operating Temp., °C	370
Water Absorption, % in 24 hours	nil
Tensile Strength, psi	6000

MYCALEX K-10

Dielectric Constant, 1 megacycle	10.6
Q Factor, 1 megacycle	300
Loss Factor, 1 megacycle	0.034
Dielectric Strength, volts/mil (0.10 in. thickness)	270
Fractional Decrease of Capacitance with Temperature Change	0.0056
Fractional Increase of Capacitance with Temperature Change	0.0076

Mycalex K-10 conforms fully to Grade HIC5H4 under National Military Establishment Specification JAN-1-12.

LOW-LOSS MINIATURE TUBE SOCKETS

ECONOMICAL—Comparative in cost to ordinary phenolic sockets, but far superior electrically. Dimensional accuracy unexcelled.

AVAILABLE IN TWO GRADES—Mycalex 410 fully approved as Grade L-4B under N.M.E.S. JAN-1-10 "Insulating Materials, Ceramics, Radio, Class L." Mycalex 410X offers lower cost with insulating properties exceeding those of general purpose phenolics. Both Mycalex 410 and 410X Tube Sockets are supplied in 7 pin, 9 pin and subminiature. All are precision molded for highest accuracy.

WRITE TODAY ON YOUR LETTERHEAD FOR ILLUSTRATED LITERATURE, OR SEND BLUEPRINTS FOR ESTIMATES — NO OBLIGATION

MYCALEX K embraces an entire series of capacitor dielectrics, each with specific characteristics. These can be supplied on special order in sheets 14"x18" in area and from 1/8" to 1" in thickness, also available in rods. MYCALEX K can be machined to close tolerance or molded.

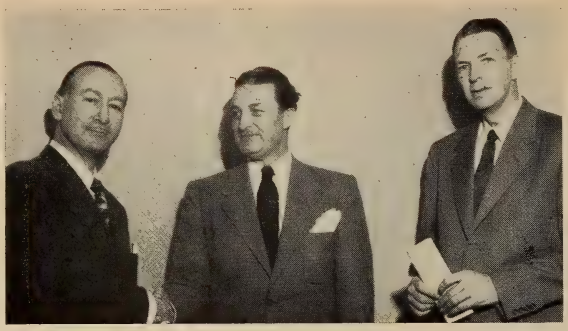
BBB REPORT

Notes Set Inquiries

ADVERTISING, merchandising and servicing of television sets continued to be the largest problem for the Better Business Bureaus during 1951, an annual report has indicated.

Of 80,548 communications to the bureaus about television, 53% were complaints, with the greatest number occurring early in the year, President Victor H. Nyborg reported. Nearly half the inquiries and complaints received by the collective bureaus during the year pertained to merchandising, he said, and 12% of these referred to TV sets, a percentage matched only by construction inquiries. Radio and music were the subject of 2% of the merchandise communications.

In terms of services rendered by the bureaus, television rose from seventh place in 1950 to third place in 1951 with some 80,548 consumers contacting the bureaus with questions. In this category, television was superseded—by numbers of calls but not necessarily number of complaints—by home construction and solicitations.



Most common TV complaint was that long delays were suffered by consumers in waiting for their sets to be serviced, which servicemen attributed to unavailability of replacement parts and tubes. The Better Business Bureaus appointed a service committee which, meeting with a counterpart from the Radio-Television Mfrs. Assn., evolved procedures for handling consumer complaints on a national level. Both groups also agreed to sponsor an educational booklet, explaining factors in purchasing and servicing a TV set, which will be distributed by RTMA and the Better Business Bureaus upon publication this year.

Progress was also reported for the bureaus' "Truth in Advertising" campaigns, under which almost 8,000 advertisements of the millions scanned required corrective action. Of those, 207 were referred to law enforcement bodies for further action, with the ultimate result that questionable ads decreased by about 8%. Mr. Nyborg said that legitimate advertisers did a better job of maintaining accuracy throughout the year, that consumers became more critical, and that media continued to cooperate in building higher advertising standards.

Publicity and education campaigns of the bureaus used a total of 2,492 radio spot announcements, 575 radio programs and 111 television shows last year, it was noted.

Advertiser Tie-in

A WASHINGTON, D. C., appliance dealer is using a radio station to promote the sale of TV sets—and programs on a television station in the same city. The arrangement involved a tieup among Phillips radio-television store, WTOP-TV and WWDC Washington, as well as the agency, Cohen & Miller. Phillips, which sponsors half of Washington Senator baseball broadcasts on WWDC, uses commercials mentioning WTOP-TV shows to push its TV sets. TV stars and day and time of program are cited twice per game. Unusual tie-in is natural for Arch McDonald, WWDC baseballcaster, who also is WTOP sports director.

NEWSCASTER Henry Blanc (l) of *Today's News* on KPOJ Portland, Ore., greets Gerrit Vander Ende, president of Pacific First Federal Savings & Loan Assn., Tacoma, Wash., eighth largest such association in the country, which has purchased Mr. Blanc's noontime program for a special network in cities where the association has branches, including KPOJ, KPUG Bellingham, Wash., KJR Seattle, KTAC Tacoma and KORE Eugene, Ore. Ed Henry (r), KPOJ account executive, made arrangements through The Condon Co. Inc., Tacoma, the association's advertising agency.

FOUR JOIN AYER

Three in N. Y.; One Phila.

FOUR personnel changes in three departments of N. W. Ayer & Son, New York and Philadelphia, were announced by the agency last week.

J. J. Clarke, sales manager, Home Laundry Equipment Div. of General Electric Co., joins the plans-merchandising department in Philadelphia today (Monday); William F. Roseboom, former vice president of public relations firm of Davies, Emery & Roseboom, joins the public relations department in New York; Monica Geran, promotion editor of *Glamour* magazine, also moves into the New York public relations department today (Monday), and Robert Pavloff, director of Temple U. alumni fund and editor of *Alumni Review*, joins the copy department in Philadelphia, also Monday.

New WICH Building

WICH Norwich, Conn., is now operating from a new two-story concrete block structure near its transmitter on the outskirts of the city. John Deme, WICH general manager, announced the new sign-on time of 5:30 a.m. and that William E. Kelly, city's newly-appointed superintendent of recreation, has been signed to handle the 6-7:45 a.m. duties.

► GUSTAV A. BOSLER, NBC New York veteran employe who retires at the end of June and who was head of the network's model shop most of his 25 years with NBC, was honored at a surprise party May 23 by 200 fellow employes and friends and was presented with a 25-year NBC plaque. He has spent more than 40 years in communications.

* * *

► PROGRAM, *Meet the Press* (NBC radio, Sunday, 10-10:30 p.m.; NBC-TV, Sunday, 7:30-8 p.m.), will celebrate its seventh anniversary June 2. Martha Rountree and Lawrence E. Spivak, owners of the package, will mark the occasion by a "political supper" in Washington on that date to which various Presidential candidates have been invited along with other public figures.

* * *

►KATL Houston marked its fifth birthday on May 21. King H. Robinson, vice president-general manager, in an interview in the *Houston Press*, traced the station's increase from 1 kw to 5 kw and expansion of staff personnel from 19 to 31.

* * *

► WBEN-TV Buffalo was four years old May 14. No special observance was planned. During its first few weeks of operation the station was on the air 14 hours weekly and now is on more than 14 hours daily.

ADV. WRITEOFFS

HST Hits Media Campaigns

PRESIDENT Truman last Tuesday opened a new breach in the controversy over alleged practices whereby private companies use institutional advertising and write it off as deductible business expenses.

While the Chief Executive leveled his guns at electric power concerns, the attack recalls the move by Sen. Hubert Humphrey (D-Minn.), avowed administration supporter, to curb through government so-called "political" advertising as a deductible tax expense. This purpose also would be accomplished by raising newspaper ad rates to discourage "extravagant" advertising [B•T, April 21, 14, 7].

Mr. Truman, addressing the Electric Consumers Conference in Washington, D. C. last Tuesday, charged that private concerns were embarked on a "vicious campaign" to discredit public power projects as socialism—through radio and printed media. He said he might seek a probe to see whether the campaign violates the Federal Corrupt Practices Act.

They "are spending millions and millions of dollars on this campaign. They are sponsoring nationwide radio programs which cost many thousands of dollars every week. They are running full-page ads in the big magazines, month after month," the President said. Target of Mr. Truman's fire was the Kansas City Power & Light Co.

Mr. Truman also noted that a large advertising agency "actually boasted" that its technique was so successful that its "propaganda" was posted by church ministers.

KOMO Binaural

HAILED as "sensationally successful" was KOMO-AM-FM Seattle's May 18 broadcast to the public of binaural transmission over its AM and FM facilities on *Voices of the Northwest*, sponsored by the Seattle First National Bank and featuring the 41-member Adelphian concert choir of the College of Puget Sound, Tacoma. The airing was under direction of Stanton Bennett, chief development engineer for KOMO. Binaural broadcast also took place over WGN and WGNB (FM) Chicago May 22 at the annual Radio Parts Show and the Audio Fair [B•T, May 26].

more help
for busy media buyers

Publishers and station operators show increasing awareness of media buyers' problems

You who use Standard Rate and CONSUMER MARKETS as tools of your trade are thoroughly familiar with the *standard listings* of media statistics and market data.

But do you realize the extent to which publishers and station operators supplement the *standardized* data with *additional media information*—in the form of Service-Ads?

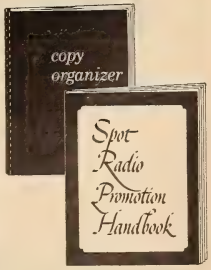
They are realistically aware of your need for information about things that make each station or publication *different* from its contemporaries —information that you cannot expect to find in the standard listings.

They know, too, that you don't always have the time you need to call in all of the media under consideration to get answers to all the questions that arise in the course of selection.

So, last year, approximately 1,050 publications, radio and TV stations used space in SRDS publications. They supplemented the information in their listings in Standard Rate (or their markets' listings in CONSUMER MARKETS) with Service-Ads that reminded buyers of the important *differences* about their media values that they've been registering through their promotion and their representatives' contacts. Thus they keep *wanted* information instantly available—on the spot—to help the busy media buyer buy.

s r d s

STANDARD RATE & DATA SERVICE, INC.



Walter E. Botthof, Publisher

the national authority serving the media-buying function

1740 RIDGE AVENUE • EVANSTON, ILLINOIS

SALES OFFICES: NEW YORK • CHICAGO • LOS ANGELES

publishers of **consumer magazine** rates and data • **business publication** rates and data • **national network** radio and television service • **radio** rates and data • **television** rates and data • **newspaper** rates and data • **transportation advertising** rates and data • **A.B.C. weekly newspaper** rates and data • **consumer markets,** serving the market-media selection function

NOTE: To Station Managers

Service-Ads have become such a valuable part of SRDS publications that we want all advertising executives to know more about them. That's the story behind the advertisement reproduced here; appearing currently in *Advertising Agency* and *Printers' Ink*.

The information found in the SRDS monthly books and CONSUMER MARKETS is often the LAST WORD about your station and your market . . . the *last word* seen by agency men when they're under pressure; building a list or defending a list.

To help you make it the *last word* in effectiveness, SRDS has interviewed research and media men, account executives, time buyers, advertising managers. An analysis of their viewpoints, practices and needs is available in the "Spot Radio Promotion Handbook" (at cost: $1.00). Then, to help you convert these viewpoints into Service-Ads that will really "sell by helping buyers buy," we have condensed this information into another handy booklet, *"Copy Organizer for Service-Ads in Radio Rates & Data."* Available at cost, $1.00.

Walter Evans

WHEN WALTER EVANS passed on last Wednesday, radio lost an unsung hero. In the trade he was known and respected as the directing head of the Westinghouse stations—a blue ribbon list of well-operated outlets. But he left management—and the limelight—to his managers. He was content to remain in the background.

Among his friends and co-workers, Walter Evans was regarded as a modest, efficient, but very human boss. The prestige and the stature of the stations and the electronic plants he operated placed him in the top policy echelon of Westinghouse.

Like many others in radio, Walter Evans came up through the engineering ranks—first as a ship wireless operator, and then into station engineering. For two decades he directed Westinghouse radio operations. But what wasn't generally known is that he also operated the vast X-Ray and Electronic divisions, organized the radio and television manufacturing divisions, and, just two years ago established the Air-Arm division. He also found time to serve his government on special assignments and missions in telecommunications, here and abroad.

The whole story of Walter Evans' contributions to telecommunications may never be told. As to radio, the record shows he left it better than he found it.

Transit Green Light

THE FAVORABLE Supreme Court ruling on transit radio ought to assure a profitable future for this specialized broadcasting service.

Considering the extraordinary handicap of having the very constitutionality of their operation questioned, the transit broadcasters have, from all reports, done extremely well. It would seem clear that transit has established itself, against most discomforting opposition, as an effective advertising medium.

It remains now only for the transit broadcasters to straighten out the public relations problems confronting them. Though the Supreme Court's decision affirms the legality of transit-casting, it does not dispel the condition that brought the case about.

Transit-casting was victimized by such catchphrases as "captive audience." Such surveys as have been made indicate that objectors are a small minority of transit passengers.

All credit to those who carried the transit case to the highest tribunal after the stiff rebuff of the lower court. They can now move ahead on plans which were shelved because of the litigation and the hard fight against the medium by many powerful newspapers.

The sweeping 7-1 decision opens a new radio vista. It sanctions the birth of a new advertising medium. It affords the opportunity to a substantial number of FM broadcasters to earn a return on their investments.

But the court opinion merely affirms the constitutional right to broadcast music, news and commercials on public vehicles. The job of the transit-caster now is one of prudent management and operation. That means prudent programming. As always, the public is the final arbiter.

Dollars When They Count

WHEN a Senate committee petitions another Senate committee for funds for a government agency in an election year when the accent is on excruciating economy in government—that's news.

It happened a fortnight ago. Sen. Edwin C. Johnson's Interstate & Foreign Commerce Committee unanimously petitioned Sen. Burnet R. Maybank's subcommittee on Independent Offices Appropriations to give the FCC another $800,000 to hire people to expedite the licensing of new television stations. Last Wednesday, the Senate Appropriations Committee approved $600,000 more, specifically for TV. This is probably without precedent. It underscores again the high interest in Congress to get a nationwide television show on the road.

Even with 18 or 20 additional examiner teams, the outlook isn't too bright for prompt authorization of any substantial number of TV stations in desirable markets. That's because contests are indicated, notably for the VHF assignments, in virtually all major cities. Contests take months, sometime years.

There are those who feel the additional funds sought won't really expedite FCC action. They point to the past, when the FCC has been surfeited with appropriations. And that record discloses that the FCC procedures have slowed down inexorably, year after year. More staff lawyers meant more intermural discord, more paper-work and more delays.

That does not have to be. The revised McFarland Bill now pending in the House has, as its primary purpose, tightening up of FCC procedures. The Commission would be required to report to Congress on the status of cases not in hearing but pending after three months, and cases in hearing pending after six months. This measure already has passed the Senate. In revised form, it has been reported favorably by the House Interstate Commerce Committee and House passage is likely, despite continued sabotaging efforts by members of the FCC staff.

There's more involved in the resumption of TV licensing than service to communities which demand it, although that's reason enough. There's talk of an impending downward spiral in business. Some lines, notably consumer goods, are soft. Farm commodities are in a gradual decline. There are portents of a recession. Television's emergence could provide an anchor to windward against an impending economic storm. Sen. Johnson talks in terms of $3 billion as an "ultra-conservative" estimate of the business that would be stimulated in two years, if the FCC has the manpower to proceed full-tilt. Applicants, he states, will invest $250 million. Ten million people will invest more than $2 billion in sets. Thousands will be employed by manufacturers, wholesalers and retailers, totally aside from the vast expenditures for advertising.

Here another agency of government could pitch in. The Department of Commerce has the main function of stimulating and helping business. Could not some of its manpower and resources be geared toward expediting television's economic development? In the depression of the early '30's, radio proved just about the only depression-proof industry.

The first test is to see the FCC get additional funds for examiner teams. It then can have no valid excuse founded on shortage of manpower or funds. While all signs point to favorable action it still behooves applicants to let their delegations—in Senate and House alike—know of their avid interest.

our respects to:

EDWARD HOLLAND BRONSON

THOUGH all's relatively quiet around NARTB's TV department, where they're grooming the three-month-old Television Code for a career of activity, if not controversy, nobody's being fooled by the peaceful way most of the nation's civic, cultural and religious groups have reacted to the industry's manual of program and advertising behavior.

They know what's coming, and they'll be ready with what at the moment might be described as a semi-secret weapon—Ed Bronson, newly named NARTB director of television code affairs and a practical telecaster.

In a decade-and-a-half of radio, TV and government activity, Ed Bronson has been in some rough spots. One of the rougher incidents occurred during the war when he was at the Office of Censorship with responsibility for foreign-language programs originating domestically.

Everybody wanted to be a censor in those days, including the FCC and the Office of War Information. The competition got into proceedings of the special congressional committee investigating the FCC. With a clear Executive Order to back him up, Ed Bronson carefully observed testimony of the two competing agencies. He patiently listened and he patiently waited.

When the colloquy reached the usual double-talk and gobbledigook stage, Mr. Bronson couldn't stand it any longer and summed it up with this classic: "I'm getting weary of these excursions into the dialectics of the periphery." That stumped even the double-talkers, and Office of Censorship went about its job with powers intact.

This was a typical Bronson approach to a tricky situation. Often when the going gets tough he turns on a wry sense of humor. When trouble engulfs him, he takes a philosophical approach and sets out to see what can be done about the mess.

Mr. Bronson's main job at NARTB will be to serve as liaison executive on code matters with general public and interested organizations. That's his formal directive, a little double-talky in itself. Put into active terms, it means the finger is pointing at him as trouble-shooter to see that the code clicks.

He brings to the job a substantial reservoir of qualifications, having, among other things, directed a television station right from the cement-pouring stage; served, as noted, in a censorship capacity; managed a radio station, and finally, created a successful town-meeting

(Continued on page 53)

NBC's MEN IN THE NEWS: *Hicks*

"Something burning is falling through the sky..."

That something was a hit German plane. The time was D-Day, 1944. Speaking from a warship in the heat of the battle, George Hicks was making his masterful recordings of the greatest military action in history.

First to broadcast from a dirigible and from a submarine, Hicks is uniquely a broadcast reporter. He joined NBC in 1928, a year after network radio began.

From an eclipse of the sun seen in the Pacific to the funeral of George VI, George Hicks's dispassionate reporting has brought America to the scene of many of the historic events of our time.

Now in this vital election year Hicks and 100 other NBC men of news are assigned to cover the conventions and the elections as they've never been covered before.

The NBC News Center is pre-eminent in the field because of men like Hicks, Dreier, Warner, Godwin . . . because of its thousand-man news-gathering force . . . because regularly on radio and television, NBC broadcasts more hours of news than any other network.

Virtually everyone in America hears the news first on radio and television. They hear it while it *is* news. And the fact that the highest rated news shows on radio and television are NBC's means most people hear the news first and hear more of it from NBC.

NBC *radio and television*

WORLD RELEASE

Firm Notes New Material

WORLD BROADCASTING SYSTEM Inc., New York, transcription library firm, last week announced that "one of the largest releases of new material in the history of World sales and program services" had been sent to 900 WBS subscribers as a special service to augment the firm's commercial program series.

Robert W. Friedheim, WBS general manager, explained that the releases include special programming material for company's new package, *County Fair*, starring Judy Canova, which will be released for broadcasting June 15, as well as material for established features such as *A Chapel by the Side of the Road* with Raymond Massey, *Freedom Is Our Business* featuring Robert Montgomery, the Dick Haymes show, the Three Suns and Lyn Murray shows. Sixteen different artist groups are represented including orchestras, singers, choral groups and instrumentalists.

As an additional aid to local radio sales, World Sales & Program Service has also released "World Sell Sounds," a sound effects feature designed to boost sales by "increasing the impact of commercials now on the air." Package presents material for time and weather lead-ins as well as special lead-ins for patriotic appeals, election and sports programs.

'Dr. Gallup' Bought

SIX additional markets have signed for George F. Foley's *Dr. Gallup*, syndicated pre-election radio series, it has been announced. They are: WWJ Detroit, WHK Cleveland, WGAN Portland, Me., WGUY Bangor, Me., KNX Los Angeles and KMOX St. Louis. A total of 122 stations now carry the political interview series. Station purchasers who announced sponsors last week were WEEI Boston, to Transducer Co., division of American Machine and Foundry Corp.; KPRC Houston, to Simpson-Gillman Pontiac Co.; WSBA York, Pa., to Carl Beasley Ford Co. and WGAN to N. T. Fox Lumber Co. and Utilities Distributor Co.

NEW WJBK UNIT

Peter Storer Is Director

ESTABLISHMENT of a sales promotion and merchandising department at WJBK-AM-TV Detroit, with Peter Storer as its head, was announced last week by Gayle V. Grubb, vice president and managing director of the stations.

Mr. Storer

Mr. Grubb said that "although WJBK has always cooperated with its advertisers in merchandising and promotion, the station feels the time has arrived to institute a more aggressive plan of dealer and distributor tie-ins." He said Mr. Storer was named manager of the new department because of "the outstanding success he achieved in the field of public service."

Mr. Storer will handle all of the WJBK-AM-TV merchandising activities, including tie-ins with voluntary and regional chains, point-of-sale displays, special promotions, and other devices to acquaint consumers with merchandise advertised on the WJBK stations.

A son of President George B. Storer of Storer Broadcasting Co., which owns the stations, the new WJBK merchandising and promotion manager became affiliated with the Storer organization in 1946, following graduation from the U. of Miami. He started with the company's WGBS Miami as control engineer, moving last September to WJBK as public service director. Under his direction, a number of educational broadcasts were arranged with Detroit and Wayne universities, and a broadcast series on the Detroit schools is currently in preparation in conjunction with *Life* magazine.

ECKO PRODUCTS Co., Chicago, last week reported net sales for first quarter of 1952 of $9,680,337 contrasted with $10,492,769 for the same period last year. Net profit this year was $690,424 or 79¢ per share on common stock.

(Continued from page 50)

program that has an outstanding 14-year record.

When he arrived in Washington last week, Mr. Bronson was giving up the direction of WBNS-TV in his native Columbus, Ohio, a position he had held since 1949. His departure for NARTB's code operation moved the *Ohio State Journal* to call him "one of the best equipped men in the nation for the job." The *Journal* should know, because like WBNS-TV it is one of the Preston Wolfe radio-TV-newspaper properties.

Possibly the *Journal* was recalling some of the early journalistic feats of Ed Bronson, reporter. Around Columbus they still talk of a famous escapade at Ohio State U., before the vogue of bra and panty purloining. Reporter Bronson, long holder of an Ohio State degree, was assigned to cover a campus incident that involved such sporty tactics as egg-throwing and cab dumping.

A cop—one cop—arrived on the scene and alertly grabbed the first youth he saw. That, of course, was Reporter Bronson. Foiled, the officer called for help. A second cop arrived, but the duo couldn't swerve the persistent newsman from the path of duty. A third, a fourth, a fifth and finally a sixth officer joined the fray. The six-man army subdued their prey and hauled him off to jail as a rioter.

The law won the battle, but not the war. A few minutes later the intrepid reporter was back at the campus on a business-as-usual basis.

Ed Bronson obviously doesn't stop easily when he is on a mission. The new TV code assignment, however, is likely to put him in the middle of some of the fanciest crises he has ever met. At this point, according to an old crony, he is likely to halt all oratory with an observation of this sort, "Hold everything. Let's get down to the core of this thing and see if we can't work out a way of living together."

He has a deep conviction that the principles of the TV code are right, and believes it will work if goodwill and common sense are applied to its enforcement.

Ed Bronson was born in Columbus May 27, 1910, son of Hiram Bronson, long active in Ohio politics. The elder Bronson wrote the Ohio primary law back in 1906, a monument in political history. The family's political bent was maintained in a journalistic way when the son covered Ohio politics for Columbus papers.

At Ohio State U., the younger Bronson interrupted his career for a year to work as a blacksmith on a construction gang in West Virginia and California. Back in school, he became cub reporter on a local journal and finally news editor of the *Ohio State Lantern*, campus daily.

After college, he continued his reporting, moving into radio at WCOL Columbus in 1936. At WCOL, he served as continuity director and subsequently assistant general manager. With the outbreak of war, he became assistant to J. Harold Ryan of Storer Broadcasting Co., and then to John E. Fetzer, who succeeded Mr. Ryan as assistant director of censorship.

With end of the war, Mr. Bronson joined WJEF Grand Rapids, Mich., as station manager for Mr. Fetzer, the station's owner and now chairman of the NARTB Television Code Review Board. Anxious to enter TV, Mr. Bronson left WJEF in 1949 to aid in planning WBNS-TV, becoming station director when the station went on the air.

WBNS-TV, along with WBNS and WELD-FM, still carries the *Columbus Town Meeting* series started by Mr. Bronson 14 years ago at WCOL. It has been called one of the industry's leading public service programs at the local level and is incorporated under Ohio laws.

Mr. Bronson married Ann Fulton, a former Ohio newspaperwoman and pianist. Son Ted, 15, plays a trumpet and Mary Ann, 6, is following her mother's pianistic bent. Daddy Bronson likes golf and chess, and now loses frequent chess matches to Ted, an apt pupil.

'SELL' CHICAGO

New Group's Purpose

CHICAGO UNLIMITED, a nonprofit corporation, has been organized by a group of industry people for "sale" of Chicago as a production center to agencies, clients and networks, and for local and national promotion.

The group, which expects to sell at least $25,000 in stock its first year, includes John Weigel, announcer; Norman Lindquist, Atlas Films; James Jewell, Alan Fishburn and Stu Dawson, producers; Ray Jones, AFRA-TVA; Dan Collins, Chicago Federated Adv. Club; Geoffrey Bennett, RCA Victor; James Kellock, Wilding Pictures; Archie Levington, music publisher.

STUDENTS HONORED

By American U. Guild

TROPHIES were awarded to three radio-TV students last week at the fourth annual dinner of the American U. Radio-Television Guild at the National Press Club Auditorium, Washington. It was the first time the guild has made awards. Receiving citations were Harry Cullins, outstanding director of the year; Alice Peterson, outstanding actor-actress; Lionel Monagos, outstanding in leadership.

Principal speaker at the dinner was Caroline Burke, NBC producer. Among persons attending were Sen. Edwin C. Johnson (D-Col.), chairman, Senate Interstate & Foreign Commerce Committee; Thad Brown, NARTB director of TV; Evelyn Freyman, executive secretary of AFRA; Dr. Franklin Dunham, U. S. Office of Education; FCC Chairman Paul Walker; Frank Folsom, RCA president.

Communications Jobs

CALL has been sounded by the Army Signal Corps for civilian instructors with various communications skills to man jobs at the Signal Corps Training Center at Camp Gordon. Salaries range from $3,795 to $5,060. Applications for civil service positions are obtainable at local post offices. Interested persons are asked to contact U. S. Civil Service Commission, Board of Examiners, Camp Gordon, Ga.

RALPH RENICK, WTVJ (TV) Miami news director, appointed chairman of TV news committee of National Assn. of Radio News Directors.

TED BENDER, formerly with WOR New York, to WMAY Springfield, Ill., on news and special events staff.

WILLIAM D. NIETFELD, KCBS San Francisco director of news, elected chairman of California Associated Press Radio Assn., replacing **LES MAWHINNEY**, news director, KHJ Los Angeles. **DICK JOY**, KFAC Los Angeles news chief, is vice chairman.

JACK GRIFFIN, news editor, KWK St. Louis, elected to membership in Sigma Delta Chi, national journalistic society.

AUSTIN SCHNEIDER to WNAX Yankton-Sioux City, S. D., as newscaster.

ANTHONY MARANO, sports director, WCTC New Brunswick, N. J., named director of news and sports to succeed **JOSEPH DEMBO**, now on news staff, NBC New York. **ROLAND KELLY**, sales representative WCTC, assigned to station's news staff.

JIM SCHLOSSER, news writer, WTMJ-AM-TV Milwaukee, father of boy, Daniel Scott, May 17.

BRUCE MacFARLANE, WGN Chicago news commentator, father of boy, David Bruce, May 16.

DICK WRIGHT, KHQ Spokane newswriter, father of girl, Patricia Ann, May 6.

NBC SIGNS HOPE

For Conventions Patter

BOB HOPE will do a daily five-minute light and humorous commentary on NBC radio-TV during the national political conventions at Chicago, according to the terms of an agreement worked out with NBC President Joseph McConnell by James Saphier, radio-TV agent for Mr. Hope. Neither party revealed financial arrangements, but the programs are to be offered for sponsorship.

Roger Price, New York night club and TV humorist, has been signed through Frank Cooper, Hollywood talent agent, for a similar series of broadcasts from Chicago on NBC radio-TV. Admiral Corp. will sponsor the series.

Don Lee Coverage

NOW available for sponsorship by western regional advertisers are Democratic and Republican national conventions broadcast over Don Lee Network, it was announced last week. Western regional outlet for MBS coverage, Don Lee will set up a five-days-a-week plan to be offered.

SERVICE

sports feature; *Old American Barn Dance;* reruns of *Fireside Theatre* now called *Royal Playhouse; Movie Quick Quiz,* and *Hollywood Off Beat* with Melvyn Douglas.

Mr. Beckwith, who gives no middle name, was born March 29, 1914 in Rochester, N. Y., but considers his home town Buffalo, where his family moved shortly thereafter. He attended public grade and high schools there and worked as assistant advertising manager of the Rudolph Bros. jewelry chain in Syracuse for a year before starting at Syracuse U. in 1931.

Like many students in the depression era, Mr. Beckwith found he had to work his way through college. He spent his mornings in class and his afternoons working in advertising with the jewelry firm, and then went home to put on his tux and play with a dance band until 2-3 a.m.

"I kept my textbooks on the band stand," he recalls. In his extra time, he was a professor assistant, checking papers for $17 per month.

By the time he got his B.S. in business administration four years later, Mr. Beckwith had also won a top prize in a national intercollegiate advertising contest as well as membership in Alpha Delta Sigma, honorary advertising fraternity. His evaluation today of working through college is that it isn't as valuable in some cases as people think. "It's just too rough," he explains.

Syracuse Radio Graduate

Mr. Beckwith's college minor was radio and he is pointed out today as one of the first students of the Syracuse U. School of Radio where, he reports, he decided that broadcasting was the field for him. He introduced the jewelry firm to radio spot advertising and, in 1937, went into radio himself by joining the sales staff of WSYR Syracuse. After learning the full story behind the mike, he transferred to WAGE Syracuse in 1942 as assistant sales manager, commercial manager and program director, and established so notable a business reputation for himself that in 1951 he was invited to join UTP, sister company of Standard Radio Transcription Services.

He describes his station sales record today as the result of "idea stuff . . . I didn't try just to sell, I tried to create." He found that even a small station could have a big list of national advertisers if they were offered, for example, personalities, promotion and know-how.

As sales director, he has organized a national sales force, working out of UTP's three offices in New York, Chicago and Los Angeles, and expects to be busy the next few months visiting TV stations and applicants to get new program ideas for his company to distribute.

He is married to the former Mildred Brown of Scranton, Pa., whom he met in college, and they are the parents of a son, Kent, 12, and a daughter, Ellen, 7. The scores of his favorite sport, golf, go up or down, he reports, depending on FCC decisions.

WSVS Elects Officers

OFFICERS and directors were elected for 1952-53 during the sixth annual stockholders meeting of Southern Virginia Broadcasting Corp. (WSVS-AM-FM Crewe, Va.) in Richmond, Va. The board of directors elected the following officers: C. S. Willis, president; J. P. Quisenberry, first vice president; W. L. Willis Jr., second vice president; C. E. Wilson, secretary, and E. M. Schaubach, treasurer, New board includes these officers as well as O. B. Schaubach and C. E. Miller.

WFAA BIRTHDAY

Open House Scheduled

LISTENERS will be invited to inspect the facilities of WFAA Dallas June 23-29 when the station observes its 30th anniversary, according to Alex Keese, manager.

Mr. Keese said WFAA, owned by the Dallas *Morning News,* expects to spend several thousand dollars on exhibit spaces and remodeling and refurnishing for its week-long open house in a direct audience promotion slant, instead of holding special ceremonies.

The audience will be invited to participate in prize-drawings of sponsor's products and in a candid camera contest open to amateur photographers. The station's stars will be on hand to meet the public.

Mr. Keese said visitors will enter the station over the covered and decorated walk-way 10 stories above Jackson street and will see displays of the various technical devices used in the pioneer days of radio, following the growth of WFAA from a tent-enclosed studio area in the former Dallas *News* building to the 50 kw NBC, ABC and Texas Quality Network affilite it is today.

All broadcasts will be open to the public with special stage performances scheduled each half-hour day and night. Favors will be distributed by WFAA stars.

WACE Airs Korea Tape

WACE Springfield, Mass., claims a "first" for a broadcast to have been made May 25 of a 45-minute tape-recording of an Air Force jet pilot's plane being shot down in Korea 100 miles behind enemy lines. The tape includes sound of the explosion when the plane was hit, two-way communications with the pilot, who attempted to land his burning plane before finally bailing out and studio tie-in show with the rescued pilot.

ZIV CHANGES

Florsheim Promoted To Be Sales Manager

PROMOTION of Stanley C. Florsheim to sales manager of the Frederic W. Ziv Co., radio transcription organization, and the addition of four district account executives are being announced today (Monday) by Alvin E. Unger, Ziv vice president in charge of sales.

Mr. Unger said the company is undergoing a steady expansion which reflects a brightened local radio sales picture throughout the country.

Mr. Florsheim

New Ziv account executives are James R. Appel, in Delaware and eastern Pennsylvania; Sidney H. Price, in Syracuse and Ithaca; Earl R. Wooten, Arkansas and markets in northern Louisiana; and Edward L. Schultz in Northern Wisconsin and the northern peninsula of Michigan.

Mr. Florsheim, who joined Ziv in 1948 as an account executive and became eastern sales manager a year later, will make his headquarters in the company's Cincinnati office. Before joining Ziv he was director of advertising and sales promotion for the Adam Hat Stores, and also had served as director of cooperative programs and then merchandising director for ABC for four years. He previously had been an account executive with the Dan B. Miner agency in Los Angeles, and for 10 years was in the transcription business in Chicago in addition to spending seven years as a salesman for the W. A. Sheaffer Pen Co.

Mr. Appel was manager of the General Office Supply Co. in Lancaster, Pa., before joining the Ziv firm. He is former commercial manager of WGAL Lancaster, and also has served as manager of an office equipment and typewriter supply house, and before 1940 was department collector for the U. S. Internal Revenue Dept.

Mr. Price has been with Cramer-Tobias-Meyer, syndicated advertising services, for more than five years, and formerly operated his own photographic business in New York.

Mr. Wooten joins Ziv from the National Republic Lettergram program service, Washington, and formerly was with Chance-Vought Aircraft Co., Dallas. He also has operated his own retail and furniture and appliance store in Wichita, and is a former sales representative of KFBI Wichita. He will report to division manager Elmer Bieser.

Mr. Schultz has operated his own distributorships for Beltone and Telex hearing aids and formerly was with the Prudential Insurance Co. of Kankakee, Ill., and with the Chicago *Herald & American*. He will report to division manager William Nevin.

COLUMBIA FESTIVAL

KHQ Plans Wide Coverage

KHQ Spokane has planned extensive coverage of the Columbia Basin Water Festival, May 22 through June 1.

Special programs include those by Glenn Lorang, farm director, who will air a show from a different Columbia River basin town during each of the 11 days. A special 10-minute documentary on the development of the Columbia Basin is being prepared by Mr. Lorang for the *National Farm & Home Hour*, May 31.

KHQ news department, head by Tal Tripp, news director, will write and produce a special feature entitled, *The New Pioneers*. Mr. Tripp estimated that KHQ newsmen have traveled more than 2,000 miles, taping interviews with early homesteaders, new settlers and other pioneers.

The New Pioneers will cover early days of the settling of the Columbia Basin, the construction of the Grand Coulee Dam, building of the network of irrigation canals and finally, the arrival of the water on the land this spring.

WEST central regional offices of RCA Victor have been consolidated in one building. New address is 340 Dierks Bldg., Kansas City, Mo.

On All Accounts

(Continued from page 12)

piling a salesmanship manual for a client.

Then each year, new tests are made so that planning may be kept current, Mr. Ver Standig said.

In addition to his advertising agency, this 37-year-old executive operates a researching organization. Letters in his files show that many top agencies use his research unit to come up with "fresh" ideas for their own clients.

As proof of the value of this constant testing, Mr. Ver Standig will point out that in the eight years that his agency has been in existance, there has been only a 1% loss of clients.

Mr. Ver Standig explained that he came to realize the value of testing and research when, beginning in the early 1930's, he bought and resold several small newspapers. "I would buy small papers with the idea of building them up, then reselling them," he explained. "I had to be careful where I invested money, so I did a lot of research beforehand."

Born in Massachusetts

Most of the newspapers with which Mr. Ver Standig dealt were in his native Massachusetts. Born in Boston, March 17, 1915, he attended Boston Latin high school, then was a special student at Harvard U. and Boston U.

He remained in newspaper work until 1942 when he began selling time for WWDC Washington. Then, in 1944, he founded his agency. At that time, his only employe was a parttime secretary, and he had only desk space in another organization's offices.

Today, the agency employs 10 persons in two floors. Mr. Ver Standig can draw much satisfaction from reviewing the past eight years. In 1950, he won the Silver Anvil Award of the American Public Relations Assn. and in 1951, one of the top awards of the Direct Mail Advertising Assn.

He is a member of the board of governors of both the Atlantic and Chesapeake Councils, American Assn. of Advertising Agencies, a fellow of the American Institute of Management, and belongs to the Advertising Club of Washington.

In 1940, he married the former Helen Van Stondeg, who worked in the classified ad department of the *Washington Daily News*. They have two children, John David, 5, and Joan Hope, 4. The Ver Standigs share their home with 14 animals, including dogs, ducks, a parrot and even a monkey!

He finds most of his relaxation in reading—his library numbers some 3000 volumes.

Most of the larger advertising agencies he considers just mass production centers. "We will never be a production line," he declared. "Testing built this agency. And we shall continue to operate that way —we prefer to know where we're going."

SEC ELECTIONS

Lipscomb Named President

CHARLES T. LIPSCOMB JR., president of Pepsodent Div., Lever Bros., has been re-elected president of the Sales Executives Club of New York for 1952-1953.

Other officers elected at club's annual meeting last week were:

Joseph L. Wood, assistant treasurer of Johns-Manville Corp., first vice president, Borden Co., second vice president; Peter F. Fullam, district sales manager, Carolina Absorbent Cotton Co., secretary, and James Werblow, Polygraphic Co. of America Inc., treasurer.

New members of the board of directors are as follows:

Fen K. Doscher, vice president of Lily-Tulip Cup Corp.; M. D. Finehout, special representative for Whitaker Paper Co.; Dr. Paul H. Nystrom, president, Limited Price Variety Stores Assn.; Charles R. Speers, vice president of American Airlines Inc.; Zenn Kaufman, merchandising director, Philip Morris & Co. Ltd.; Leo Nejelski, president of Nejelski & Co.; James C. Olson, partner, Booz, Allen & Hamilton; Philip Salisbury, general manager and editor of *Sales Management* magazine, and Al N. Seares, vice president of Remington Rand Inc.

GREEN GIANT Co., Le Sueur, Minn., reports a net profit of $1,724,928 for the year ending March 31. This equals 3.9% of the gross sales, an all-time high of $44,730,059. Dividend payments, at 80 cents per share, totaled $437,741.

FTC STAFF FULL

Truman Names Carretta

PROSPECT that the Federal Trade Commission would be "at full strength" for the first time since January to tackle a heavy workload of cases during the summer appeared bright last week with action at the White House level.

President Truman nominated Albert A. Carretta, a Washington, D. C., lawyer and university instructor, to be a member of the commission for an unexpired term ending Sept. 26, 1954. The nomination is subject to Senate confirmation after expected approval by the Senate Interstate & Foreign Commerce Committee.

Mr. Carretta, a native of New York, is an instructor at the Georgetown U. School of Foreign Service. A lawyer by profession, he formerly was with the Securities & Exchange Commission, Office of Price Administration and the Navy Dept. He is a member of the Washington and Virginia bar associations.

Mr. Truman ended speculation on the FTC vacancy after urgent requests from the commission itself, which has been concerned over the prospect of the summer backlog and lack of funds.

FTC Chairman James Mead, former U. S. Senator from New York and attorney, and Comr. Stephen Spingarn made the request in a personal call on the Chief Executive early last month. Mr. Truman also was asked to request additional funds for FTC on behalf of its anti-merger work.

The commission has been functioning with four members since the death of Comr. William A. Ayres last January.

Part of the workload involves, indirectly, the commission's anti-deceptive practices activities touching on misleading radio, and other advertising representations. Monitoring of television continuities has been virtually non-existent, FTC has conceded.

President Truman thus appointed a Democrat to succeed Comr. Ayres, a former Kansas Congressman who was serving his third term at FTC when he died.

WEATHER WARNINGS

Bureau Asks Follow-Up

WHILE paying tribute to radio and TV as savers of life and property, I. R. Tannehill, U. S. Weather Bureau, has asked that broadcasters "please present weather warnings verbatim without embellishment."

Mr. Tannehill, chief, Div. of Synoptic Reports and Forecasts, commented that "It would be difficult to estimate the savings in life and property that broadcast of warnings makes possible."

At the same time, Mr. Tannehill urged broadcasters to follow through when storm danger has passed particular communities. "Each release to radio and press from Weather Bureau offices strives to present the weather warning in as definite terms as is possible considering the weather conditions prevailing at the time.

"More and more attention is being given by local Weather Bureau offices to the second point, that of follow-up with 'all clear' notices when danger has passed. In this way the Bureau, with the help of the many radio and television outlets, hopes to improve its services to the public."

HITS PRICE PROPOSAL

Arnall Cites Dangers

PROTEST against a Congressional proposal to require the Office of Price Stabilization to raise ceiling prices to levels prescribed by laws in various states has been voiced by Price Chief Ellis Arnall.

Mr. Arnall advised the Senate Banking & Currency Committee and Chairman Burnet Maybank (D-S. C.) that its proposed amendment to the Defense Production Act "would raise ceiling prices substantially and unnecessarily." He added that the action would result in "very serious consequences" to the nation's economy, and that OPS does not generally override state statutes at present.

Legislation to restore "fair trade" retail price-fixing laws in 45 states, invalidated by the Supreme Court last year, has been passed by the House and now pends in the Senate. It would revive state laws intended to bar price-cutting on name-brand goods. Under those laws, a price agreement between one manufacturer and retailer was binding on all retailers in the state even if they had not signed the agreement.

NEW broadcast schedule has been announced for WMBI-AM-FM Chicago, Moody Bible Institute stations. AM outlet will broadcast 6 a.m. to 8 p.m.; FM from 6 a.m. to 9:30 p.m.

PERFECT TRACKING

..without tone arm resonance

● That's what you get with the versatile Gray Transcription Arms. Take your pick: There's the new specially designed—viscous damped—Gray 108-B Arm for all speed, all size records. There's the Gray 106-B Arm assuring fidelity of tone for every speed record. Both use GE or Pickering Cartridges.

● For highest tonal quality and new record reproduction from old records, use Gray Equalizers—preferred by leading broadcast stations.

● Remember — for professional broadcast equipment, Gray shows the way. Write for bulletins describing the above equipment.

PULSE METHOD

Claimed 90.5% Accurate

PULSE Inc. reported last week that the first of a series of tests of its aided-recall roster method of measuring radio audiences showed it was 90.5% correct and that it "very likely" was even better than that.

Pulse said it conducted the experiment in the metropolitan New York area in February, comparing "(1) what actually took place in the home with (2) results obtained when listening in the same home was checked later via the aided-recall technique." The findings, Pulse said, show its technique to be "highly reliable."

Interviewers visited homes between noon and 1 p.m., asking no questions about radio listening but, instead, asserting that they were conducting a survey to learn the make and model of various home appliances. Dial settings of radios in use thus were checked without the knowledge of the persons in the home. Then, following regular Pulse procedure, other interviewers revisited the sets-in-use homes between 4 and 5 p.m. to check on noon-to-1 p.m. listening.

When the memory responses obtained between 4-5 p.m. were checked against the dial settings observed during the noon-1 p.m. visits, Pulse said that "in 90.5% of the cases, the aided-recall technique produced results identical with those reported earlier by the observational method." The comparisons involved 370 homes in which a radio was on at the time of the noon-1 p.m. visit.

Pulse said that for two reasons "it is very likely that the proportion of correct aided-recall responses was even higher than 90.5%."

For example, it was explained, the accuracy of dial observations is limited by several factors, particularly the "bunching" of many New York independent stations in the same general area on the dial and the fact that, especially in older sets, "dial settings may bear no relationship to the frequency as commonly known." In homes where the radios were tuned to network stations the number of correct responses increased to 93.9%, Pulse said.

Additionally, the report asserted, the aided-recall technique reports "listening" whereas the observational method shows "tuning"—"there is no guarantee that, because the set was turned on between 12 noon and 1 p.m., the individual at home was actively listening."

Pulse said this test was the first of a number of experiments that "are planned and will be periodically reported to deal with the several other factors involved in audience measurement."

McHALE QUITS

Democrats Name Rawlings

RESIGNATION of Frank McHale as chairman of the Credentials Subcommittee of the Democratic National Committee and appointment of Calvin Rawlings of Utah national committeeman, to the post, have been announced by Chairman Frank E. McKinney.

Mr. McHale is a minority stockholder in Universal Broadcasting Co. (WISH Indianapolis, Ind.), holding 3% interest, according to FCC records last October. He recently was replaced as national committeeman by the Indiana Democratic State Central Committee, and resigned the subcommittee chairmanship because his term expires at the end of the Democratic National Convention. Mr. McKinney also is a minority stockholder and officer of Universal, of which he formerly was president.

U. OF DENVER

Sets National BMI Clinic

FIRST national BMI program clinic will highlight the sixth annual radio clinic on the U. of Denver campus in a series of radio-television events scheduled to last from June 23 to Aug. 22 as part of the university radio department's summer session program. Attendance of 100 is expected according to R. Russell Porter, UD radio department director.

Events include a television workshop, June 23-July 23 to be conducted by Noel Jordan and the annual radio clinic, July 24-Aug. 22, sponsored by Colorado Broadcasters Assn. which embraces: Broadcast Advertising Bureau clinic, July 29; television commercials workshop, July 24-26, conducted by Mr. Jordan; a three-day seminar on radio sales, July 30-Aug. 1, conducted by Maurice Mitchell, vice president and general manager of Associated Program Service.

GREENWICH PLEA

Asks FCC AM Action

APPEAL for separate FCC action on its AM application at Greenwich, Conn., has been filed by Greenwich Broadcasting Corp., operating WGCH (FM) since Dec. 6, 1948. The company applied for AM and FM jointly but the AM application was held up because of a conflict with a Norwalk applicant who soon withdrew.

The petitioner says its AM case has been lying around the FCC all this time, having been consolidated with World Wide Broadcasting Corp. cases (WRUL WRUS WRUW WRUX WRUA Scituate, Mass.), apparently because Walter S. Lemmon is an officer and principal stockholder in World Wide and Greenwich. Having lost $50,000 on FM while waiting for an AM grant, Greenwich asks that its AM petition be separated from the World Wide cases. Eliot C. Lovett, Washington counsel, filed the petition for Greenwich.

TV MONEY FOR FCC

$600,000 More Recommended

FCC's FUNDS future brightened considerably last week on Capitol Hill as the Senate Appropriations Committee approved additional money for the expressed purpose of processing TV applications [B•T, May 26].

The action came with these sidelights:

● Sen. Ed C. Johnson (D-Col.) said he thought the additional $600,000 for fiscal 1953 would be a "great help in overcoming the log-jam caused by the impossible freeze and its lifting."

● The Senate committee inserted in the Independent Office Appropriations Bill an amendment that would request FCC to investigate the possibility of initiating "fair and equitable" fees and charges "in connection with the licensing of television stations, in order that such work of the Commission may be made self-sustaining to the fullest extent possible. . . ."

The House recommendation of $6,108,460 for the operation of FCC in fiscal year 1953 (begins July 1, 1952 and ends June 30, 1953) otherwise was left intact. With the addition of $600,000 for TV, total budget suggested by the Senate committee amounts to $6,708,460, a figure that is $1,366,540 less than President Truman's recommendation and only $122,910 above the prior year's appropriation.

15 Team Gain

Sen. Johnson said that his quick estimate would be that the FCC stands to gain 15 examiner teams, which include hearing examiners, attorneys, engineers, accountants and clerk-stenographers.

Sen. Johnson and 11 other members of his 13-man Senate Interstate & Foreign Commerce Committee a fortnight ago formally petitioned the Senate Appropriations Subcommittee on Independent Offices to approve $800,000 for the purpose of relieving the TV application workload.

The Johnson Committee had estimated that each examiner team would require about $40,000. Thus, the Senator said, if the appropriations unit's recommendation is approved by Congress, FCC would benefit by 15 additional teams.

Sen. Johnson said he was "disappointed" that the group did not okay the full amount. But, he asserted, his committee's job is "to go to work now to see that we get the full amount approved on the floor of the Senate."

The Appropriations Committee approved the recommendations of its subcommittee, which is under the chairmanship of Sen. Burnet R. Maybank (D-S. C.).

Its mention of license fee charging would apply to TV licenses only. The committee in its report pointed to the 1952 Independent Offices Appropriations Act which authorized such assessment on a trial basis. The section which contained this reference was Title V.

FCC up to this time has not seen fit to go into the possibility of assessing charges or fees for servicing applicants. However, the Senate group's recommendation requests the Commission to study the question and to report back to the "respective legislative committees."

The committee said it approved additional funds when informed of the TV freeze lift that "will make possible 1,900 more stations in 1,200 more locations, whereas at the present time there are 108 television stations located in 66 communities."

A few days earlier, the Maybank Subcommittee released FCC's testimony of last April.

In data submitted to the subcommittee during the hearings, FCC Vice Chairman Rosel H. Hyde warned that even if the proposal of 20 more examiner teams be approved, "we would still not be current in the handling of television applications at the end of 1953." He also estimated that there would be a delay of about three months in filling the new positions.

FCC had predicted it would have 159 TV station CPs by June 30, 1952, 459 the same date in 1953.

Won't Go Far?

Another assertion by the Commission, raising doubts as to how far the $600,000 could go in improving the processing line, was made in its data supporting its request for restoration of funds cut by the House.

In its analysis, the Commission estimated that the correct figure for 20 teams to be $1,020,740. To arrive at this figure, the FCC, while accepting Sen. Johnson's estimates, added money needed for expenses such as travel, materials, supplies and office equipment.

Comr. Hyde said:

Even if we receive everything requested for us in the President's budget we would still, in television, wind up very substantially behind at the end of the 1953 year. For example, we would still have filed with the Commission approximately 635 applications that we would not even have reviewed in order to determine whether they could be granted. We would still have before us approximately 200 additional applications which had been reviewed but because of problems such as the existence of conflicting applications were in a hearing status.

Speaking of FCC's workload, Chairman Paul A. Walker told the subcommittee that the Commission "has now reached a point where in order to get out the large volume of work many things are done which store up trouble for us in the months and years ahead."

Paring Other Activities

Chairman Walker also asserted that if given the employes as suggested by Sen. Johnson, "I think we can handle the television matter."

FCC's data indicated that the Commission was paring other activities to a bone in order to handle television.

Speaking of July 1, when processing is slated to begin, FCC told the subcommittee that "three months hence, when we must begin to process applications, the Commission will be in the position of a man trying to empty Lake Michigan by dipping furiously with a teacup. The job will be tremendous."

The Commission noted that in addition to its TV problem, "the number of radio stations is increasing and will continue to increase." Therefore, FCC said, it expected rapidly mounting interference problems. These are becoming "more and more serious and the Commission is being given less and less staff to handle" them, it said.

Estimated number of AM stations in 1952 was 2,485, and in 1953 the figure would be 100 more as of June 30 of that year.

"The situation in our field-engineering and monitoring program is already acute," FCC asserted, and would become more so if the House cut was allowed to remain (which was the case).

50 MILLION TV SETS

Sarnoff Foresees In Five Years

FIFTY million TV sets and 1,500 stations within the next five years were predicted last week by Brig. Gen. David Sarnoff, RCA board chairman, when he spoke Wednesday at a Life Insurance Assn. of America meeting in Hot Springs, Va.

Noting that there are some 17 million TV sets and 108 outlets, Gen. Sarnoff said, "within the next five years, there will probably be 50 million television receiving sets and avout 1,500 television broadcasting stations with a potential viewing audience of 150 million persons." Every home equipped with a TV receiver will be within range of video transmission, he added.

Declaring that electronic contributions to health and life expectancy are tangible even now, he pointed out that both radio and television donate to well being by providing information, entertainment and relaxation. Television and its Vidicon tube have also been incorporated in the electron microscope, he explained, helping scientists to study live microbes without using identifying dyes or lights of germ-killing intensity.

"It is now feasible to combine the automatic devices which have been developed for radio-television to form a complete electronic accounting system for even the largest business organization," Gen. Sarnoff said. "Such a system would provide for the the translation, storage, computation, processing and printing of pertinent facts and information."

Explaining that these electronic systems can graduate from high-speed arithmetic to high-speed reading and writing too, he observed, "the information that we compress today on punch cards will be further compressed by storing the necessary figures and words on magnetic tapes which can be scanned at the speed of many thousands of words a minute."

REPORT LEGALITY

KVOL Petition Challenges

CONTAINING premises which challenge the basic legality of FCC's Sixth Report and Order lifting the TV freeze, a petition for reconsideration or rehearing was filed with the Commission last week by Evangeline Broadcasting Co., licensee of KVOL-AM-FM Lafayette, La. [B•T, May 26]. Evangeline Broadcasting is a TV applicant.

Filed by the Washington law firm of Arthur W. Scharfeld, the KVOL petition requests FCC to reconsider its Sixth Report and return VHF Channel 5 to Lafayette or "reopen the record for further hearing with respect to the allocation of television channels" there.

KVOL charges the Commission action, changing Channel 5 to Alexandria, La., instead of assigning it to Lafayette as proposed earlier, violates provisions of both the Administrative Procedure Act and the Communications Act.

KVOL contends the channel change "is illegal because the Commission did not give notice of such action as required by the Administrative Procedure Act."

The petition notes that the Third Notice of Further Proposed Rule Making of March 24, 1951, proposed to allocate Channel 5 to Lafayette along with UHF Channel 38. VHF Channels 11 and 13 were proposed for Alexandria.

"Petitioner did not file any comments against the proposed allocation of channels to Lafayette or Alexandria because it was satisfied with the proposed allocations," the petition states, continuing, "it did not file any comments in favor of the proposal for Lafayette because no person opposed the proposed allocation of channels to Lafayette."

FCC's Sixth Report, "purportedly based upon the record made in response to the said Third Notice," assigned UHF Channels 38 and 67 to Lafayette, "deleting VHF Channel 5 and assigning it to Alexandria . . . instead."

Quotes Reasons

The petition quotes reasons given in the Sixth Report for this action: In substance, VHF Channels 11 and 13 were removed from Alexandria in favor of larger Galveston, Tex., and Biloxi, Miss., under Zone III's 220-mile co-channel separation rule. Alexandria, left without VHF, is entitled to Channel 5 rather than Lafayette since former has "a somewhat larger population" (35,000) than the latter (34,000 pop.).

The petition argues that "the Commission's notice in this rule-making proceeding did not, directly or indirectly, give notice to interested persons (including petitioner) of the possibility that Channel 5 would not be assigned to Lafayette for the reasons invoked by the Commission. Nor could petitioner (or any other person) have anticipated reasonably that, without counter-proposals by any person or the Commission, the Commission might adopt a co-channel mileage separation for VHF channels in the Lafayette areas of 220 miles" and that this would result in the channel changes involved.

"As a matter of fact," the petition continues, "it would have been unreasonable for petitioner to have anticipated the result reached by the Commission in view of the Commission's express rejection of a 220-mile co-channel separation in the said Third Notice." FCC proposed 180 mile separation for VHF in that notice.

"Thus, the Commission not only failed to give notice of the possibility of the result it reached," the petition concludes, "but actually misled the petitioner to believe that the possible use of a 220-mile separation had been carefully considered and rejected."

KVOL further charges it was "denied adequate legal notice of the Commission's purposed allocation" to Lafayette "because of the failure of the Commission to adopt technical standards for television stations before requiring interested persons to plead to the Commission's proposed specific allocation table of assignments of channels."

KVOL also contends the change of Channel 5 to Alexandria on population basis alone is "arbitrary" and violates Sec. 307 (b) of the Communications Act. No evidence on the communities, their needs and natures were in the record, KVOL notes.

Another violation of the Act, Sec. 309 (a), is charged on grounds that KVOL is denied a hearing on its pending application for a TV station since requested Channel 5 has been removed.

The petition concludes:

What the Commission has done in this rule-making proceeding, therefore, is to prejudge the petitioner's application without giving it the opportunity of presenting, by means of its rightful hearing, all of the facts relevant to determining that the facilities requested by the petitioner would provide a fair, efficient, and equitable distribution of television facilities, and has decided on the basis of inadequate and partial information that Channel 5 should be used in Alexandria rather than in Lafayette. Thus, the Commission has violated the provisions of Section 307(b) and 309(a) by allocating television channels independent of specific applications and the Commission's Sixth Report and Order herein is, therefore, invalid, contrary to law, and unlawfully denies the rights accorded petitioner by Sections 309(a) and 307(b) of the Communications Act.

UHF-VHF BIDS

Ten Applications Filed

LAST WEEK saw more applications filed for new television stations with the FCC than during any other week since the one following the release of FCC's Sixth Report and Order [B•T, April 14].

There were three applications filed by TV stations which are required to change their frequencies, as provided in one part of the Sixth Report. And there were a total of ten new and amended applications filed, seven requesting VHF outlets and three seeking UHF stations.

Stations requesting a change in their channel assignments are WBRC-TV Birmingham, Ala., to move from Channel 4 to Channel 6; WKRC-TV Cincinnati, Ohio, to move from Channel 11 to Channel 12 and WHIO-TV Dayton, Ohio, to move from Channel 13 to Channel 7.

Three new TV applications were filed. They came from the Baptist General Convention of Texas, asking for Channel 6 in Corpus Christi; KFEQ St. Joseph, Mo., seeking Channel 2, and KTRE Lufkin, Tex. requesting Channel 9 [B•T, May 26].

Among the amended applications received was one from Eugene P. O'Fallon, president of KFEL Denver, for Channel 2. Two newspaper-owned radio stations amended their TV applications, too. These were WENY Elmira, N. Y., owned by the Gannett Co.'s *Elmira Star-Gazette*, for UHF Channel 24, and WDHN (FM) New Brunswick, N. J., owned by the *New Brunswick Home News*.

In Florida, four well-known Tampa businessmen announced that they plan to file for Channel 13 in that city. Organized under the name Orange Television Broadcasting Co., the company is headed by President Dave Falk, president of the Tampa Chamber of Commerce and of O'Falk's Store. Others are Vice President James W. Warren, vice president and general manager of the Tampa Coca-Cola Bottling Co.; Treasurer Jack Peters, vice president and general manager of the Bentley Gray Wholesale Dry Goods Co. and immediate past president of the Rotary Club, and Secretary Cody Fowler, attorney and former president of the American Bar Assn.

None of the four is financially interested in any other radio or newspaper properties in the Tampa area, although Mitchell Wolfson, president of WTVJ (TV) Miami, is a cousin of Mr. Falk.

TV APPLICANTS HESITATE

New Filings Still Slow

WHERE is the avalanche of TV applications predicted following the lifting of the TV freeze?

"It's still getting underway."

"There's plenty of interest . . . up to expectations . . . we'll hit 1,000 bids by July 1 all right."

"It's coming, but it won't be quite as big as we guessed."

The question was put to a number of Washington radio-TV law firms last week and drew those typical answers. The exchange was prompted because only some 40 new and amended applications had been received by FCC six weeks after issuance of the Sixth Report, which finalized the revised allocation plan and set July 1 as the date on which the Commission will commence processing of applications [B•T, April 14].

Representing a fair range of opinion, the responses from the attorneys indicate:

● Most lawyers have large numbers of applications in preparation and so far have filed none or only a few.

● Delay for the most part is because of sheer detail and mechanics of preparation.

● Some are holding up filing until the last minute for "tactical purposes."

July 1 No Deadline

● Others noted July 1 "is no deadline" and since big stakes are involved, careful preparation is more important than early filing.

● Still others observed that some of their applicants are far down the processing lines on city priority listings, "so what's the rush?"

● Majority of applications in preparation represent existing broadcasters, part of whom have included persons new to radio in order to swing financing.

● There is a substantial "new money" minority among TV applications in preparation, although certain attorneys indicated greater interest than expected from newcomers to the industry while others reported less.

● Majority of attorneys contacted reported no big problem so far in obtaining informal clearance of tower sites with Civil Aeronautics Administration sources. One firm is filing final CAA approvals with its bid.

● Some broadcasters, who heretofore talked the big money of TV with ease, are "burning midnight oil" to make up their mind whether or not to take the plunge. "Now it's fish or cut bait," as one attorney put it.

● Reason for forced showdown is FCC's Sixth Report and processing procedure, several sources explained. Otherwise, they noted, many broadcasters would take their time to "see how things go" before deciding.

● Fear of UHF in couple of quarters was evidenced on part of both newcomers and experienced broadcasters in view of UHF priority or "push" by FCC (ghosts of FM days) and tenor of talks by Comr. Robert F. Jones, who dissented from Sixth Report [B•T, May 26, 5]. Greatest reluctance continues in intermixed VHF-UHF markets.

● A very few attorneys felt newcomers are hesitant to put investment capital into TV because of long delays seen for major markets. Since companies initially are set up on basis of stock subscriptions and loan commitments rather than pigeon-holing money itself, capital will be working elsewhere until needed, they noted.

● Most-often-heard reasons for slowness of newcomers to enter TV, where reluctance apeared, are fears of government regulation (FCC) and future of UHF and lack of know-how in field.

One law firm—not one of the biggest—reported 30 to 40 applications in preparation with none filed by that firm to date.

"There's plenty of interest . . . up to expectations," a principal partner said. The industry "will meet the 1,000 quota" expected by July 1, he predicted.

Within the past three weeks his firm received "10 to 12 new applications we hadn't planned before to file," he said. Most of these represented money new to broadcasting.

The same attorney has experienced no reluctance about UHF except in intermixed cities. In fact, he recalled, he has two UHF bids in preparation for cities of 10,000 population. The market areas to be served, however, include over 100,000 persons, he said.

The partner noted FCC's use of city rather than market populations in the city priority listings tends to make an area seem less desirable than it actually is.

Indication of the backlog of applications in preparation was given by the attorney when he observed in certain cases he has had to do considerable shopping to find consulting engineers able to take on his work. Same-city conflicts were chief reasons for refusals, he explained.

Spokesman for one large firm which devotes only part of its efforts to broadcasting reported a "healthy amount of new money coming into television," through bids by newcomers. This firm had advised all clients to wait until the end of the freeze to file applications and now has many in preparation.

"It will take a couple of months to do the job," he said.

Fear because FCC is "pushing UHF" was reported expressed by a few clients. FM history was recalled.

"There is some feeling that if they wait they can buy in later as cheaply as now," he observed, explaining, "some stations will need more financing."

Slow Filers

Another law firm's partner observed applicants are "slow getting data in," hence delay in filing. His firm feels it is more important to file an application that "really means something" than to be on file early. Some of those who rushed "had their applications bounce back," he noted.

Although his firm's applicants in the majority are established broadcasters, it does have some newcomers. A few broadcasters are expanding to bring in outsiders, too, he noted.

Principal in another law firm which devotes a majority of its time to radio-TV also reported "proper preparation" of applications is of greater concern than filing quickly.

"Without exception," he said, "all are broadcasters in this thing for keeps."

"July 1 is no deadline," the attorney noted, commenting that because of careful preparation anyone who "crosses swords" with any of his clients "will have a rough time, right on through the Court of Appeals."

He noted some difficulty in trying to keep up with the "shifting of the tide from one thing to another in interpretation of the new rules." He mentioned Sec. 3.613 concerning location of main studio: "The main studio . . . shall be located in the principal community to be served."

"Common sense tells you that means within the metropolitan area," he said, but "certain of the Commission staff have said it means within the city limits." Site hardships and added expenses would ensue in many cases, he noted.

Partner in another firm reported one newcomer to the industry plans to file applications, in which he would have minority interest, for some 11 cities. Same firm also may possibly file a similar group of applications for as many as nine cities.

He said his "strong applicants" have been urged to file early so as to let "others in their markets line up for the remaining channels."

A number of his firm's applicants now in AM radio, he said, have large outside business interests and hence will bring in considerable

ABC-UPT HEARING

Four Testify on Coercion

LAST WEEK's chapter in the lengthy ABC-United Paramount Theatres merger hearing before FCC continued detailed probing into past film distribution and theatre-ownership policies of Paramount and other major film producers [B•T, May 26].

Four more theatre owners testified. They alleged that the major motion picture companies would not rent them first run pictures, or would not rent any pictures, or tried to coerce them into a profit-sharing deal in return for good films.

The theatre operators claimed the situation changed for the better about the same time that the major motion picture firms entered into their consent decree with the Justice Dept. after the Anti-Trust Division's probe into the practices of the film companies.

On the stand were Donald B. Leverett, Overton, Tex.; Carl B. Knudson, Seward, Neb.; Mrs. Evelyn E. Anderson, Boone, Iowa, and Arthur Goldberg, Omaha, Neb.

The hearing being held before FCC Hearing Examiner Leo Resnick, seeks to determine, among other things, if ABC and United Paramount Pictures should be allowed to merge, if Paramount Pictures Corp. is qualified as a TV broadcast station licensee (it owns KTLA (TV) Los Angeles), whether Allen B. DuMont Labs. (WABD (TV) New York, WTTG (TV) Washington and WDTV (TV) Pittsburgh) is controlled by Paramount Pictures through its Class B stock holdings.

EQUIPMENT NEEDS

FCC Holds Key, NPA Told

FUTURE materials needs of the commercial broadcast equipment industry will depend upon the speed with which FCC licenses new TV stations, the government was advised last week.

At the same time, the National Production Authority announced that quotas of controlled metals for radio-TV sets will be pegged higher in the last half of 1952 to enable manufacturers to meet seasonal consumer demands.

Members of a Broadcast Transmitting Equipment industry group predicted that the first "heavy" batch of orders for station equipment is still more than a year away.

Manufacturers reported that even if some UHF licenses are granted by the Commission by year's end, their biggest problem would be technical difficulties in constructing station equipment. Many manufacturers already have placed orders for parts to build transmitters and related equipment.

Bottlenecks Prevail

Key components are still in short supply, with bottlenecks in both military and civilian production. Aside from components, rapid changes in military design and technical personnel shortages have posed a steady problem. Scarce components are transformers (especially audio), crystals, relays, small fractional horsepower motors, capacitors, cathode ray tubes.

With respect to engineering, some manufacturers reported they have enlisted foreign technicians (some DPs) from Europe. NPA promised to take action designed to speed personnel imports.

Diversion of technical industry help to military contracts has been a major factor in NPA's decision to retain most restrictions on mass production of colorcasting equipment. An amended order [B•T, May 12] was still under NPA study after being routinely circulated among government agencies last week.

On the receiving end, household radio-TV sets generally will fare much better during the third and fourth quarters than in April-June as well as other durable goods, with one exception—in copper brass mill and foundry products. Manufacturers may file supplemental bids for additional carbon steel or aluminum, however, to compensate.

Radio and TV receivers and other goods will receive varying allotments "depending on the possibilities of substituting less critical materials," NPA said.

Third quarter quotas are up for all materials used by set makers—5% for carbon and alloy steel and for copper wire mill, and 15% for aluminum. Set manufacturers are earmarked for a minimum of 20% on brass mill and foundry products. These increases are based on percentage use of the pre-Korean war base.

NPA pointed out that higher level of allotments starting July 1 will enable radio-TV manufacturers and others to meet seasonal demands, and that the third and fourth quarters are "the months of heaviest production" for them.

Bracketed with receivers for the same boost are TV and auto antennas (for replacement purposes), coin-operated phonographs, commercial recording discs and phonograph needles.

Increased allotments will be reflected in Christmas buying in established TV markets of new video receivers—either as initial purchases or as set replacements. Whatever additional demand may be created for sets in a potential handful of new markets by year's end also will be met with ease, industry authorities feel.

Last week's action is no more significant than that, although it might be a harbinger for materials in 1953 (see story page 89) when new VHF-UHF stations take the air in more prolific quantity. Of that outlook NPA Administrator Henry H. Fowler said last Wednesday:

> We must remember that the mobilization program is only half complete, and direct defense requirements for materials are still growing. . . . Authorization to many civilian industries will still be below their pre-Korean rate of use of the controlled materials, despite these welcome increases in allotments.

Assists on Atlass Bids

CHARLES GUGGENHEIM, chief producer of the Ford Foundation's fund for an adult education project experiment in educational television at WOI-TV Ames, Iowa, is working with Ralph Atlass in Chicago for seven weeks as a consultant for three television applicants. These will involve the stations in which Mr. Atlass, general manager of WIND Chicago, has an interest. In addition to WIND, stations are KIOA Des Moines and WLOL Minneapolis. Mr. Guggenheim, who worked for the Louis G. Cowan package firm and CBS, will assist in plans for TV operations.

ANTENNA TREND

Reported to NPA

TREND in TV antenna sales is from metropolitan to "fringe" areas, with a resultant increase in ratio of metal-to-antenna because of more bays or receiving units.

This "recent development" was reported to the National Production Authority by an Antenna Manufacturers Industry Advisory Committee last week. One producer reported a distributors poll showed sales of 39% in single-bay, 50% in two-bay and 11% in four-bay antennas.

About 15% of all antenna sales for television is for replacements, the industry group estimated. Members predicted this figure will rise with licensing of new UHF TV stations that will provide an additional market for antennas tuned to the new frequencies.

Manufacturers of TV antenna towers; commercial, industrial, military and home-type antennas (indoor, outdoor and built-in), and automobile radio antennas were represented at the meeting.

Disney TV Trailer

AS PROMOTION for its new feature film, *The Story of Robin Hood*, Walt Disney Productions plans telecasts of a quarter-hour trailer, *The Riddle of Robin Hood*, in 63 TV cities from June 15 through July. The TV trailer features behind-the-scenes production and research for completion of the full-length feature, and already has been released to schools.

NEWLY-ELECTED officers of the Television Assn. of Philadelphia for 1952-1953 are (seated, l to r): Martha Gable, WFIL-TV, board member; Arthur Borowsky, publisher, *TV Digest*, president; Ethyl Foster, secretary, and Gordon Walls, WCAU-TV, treasurer; standing (l to r) are Franklin Roberts, of W. S. Roberts Adv., vice president; Charles Vanda, WCAU-TV, chairman of the board of governors; Mort Farr, president, National Appliance Dealers of America, board member; Paul Phillips, of Aitken-Kynett Adv., board member; Andrew Keay, WFIL-TV, board member; Joe Cox, of J. Cunningham Cox Adv., board member, and Walter Erickson, Gray & Rogers Adv., board member.

DR. ALLEN B. DuMONT (l), president of Allen B. DuMont Labs. Inc., is decorated with the rank of Chevalier in the National Order of the Legion of Honor by French Consul-General Jean de Lagarde for Dr. DuMont's service to the Allied cause during World War II and his contributions to French and American commercial relations.

CONTROLS STAY

Senate Group Ducks Action

TO the new 83d Congress should fall the task of deciding whether wage, price, and other economic controls should be continued after March 1, 1953, the Senate Banking and Currency Committee recommended last week.

The committee filed majority and minority recommendations on the Senate floor last Wednesday for extension of the Defense Production Act, which expires June 30. Senate Majority Leader Ernest W. McFarland (D-Ariz.) called for an early show-down vote.

Chairman Burnet Maybank (D-S. C.) and his Banking Committee had voted earlier on various provisions of the Act. Last week the group issued its report while the House counterpart committee wound up hearings on similar legislation. It hopes to draft a bill this week.

Except for one instance—consumer credit controls were to be extended until June 30, 1953, instead of March 1, cutoff date on wages and prices — the Senate group adopted its tentative votes [B•T, May 26] and gave reasons for its actions.

The cost allowance formula (for advertising, selling, etc.) authored last year by Sen. Homer E. Capehart (R-Ind.) was not touched on greatly and appeared likely to survive any administration thrusts in Senate or House floor debate.

Ralph Rockafellow

RALPH ROCKAFELLOW, 54, director of advertising, publicity and promotion for Paramount Television Productions Inc., New York, died suddenly last Monday night. Before joining Paramount in 1948, he had been associated with several advertising agencies, including Young & Rubicam and Buchanan & Co. Surviving are his wife, Desiree; a son, Ralph Jr., and a daughter, Mrs. Richard Wayne.

192 Attend Sessions At Beverly Hills

INSTEAD of classifying television an advertising medium and comparing its costs to those of other media, look upon it as a selling force and compare cost with other ways of selling.

This was the advice George L. Moskovic, manager, TV development, KNXT (TV) Hollywood, gave 165 broadcasters from 11 Western states and Hawaii in attendance at the Broadcast Music Inc. TV clinic held in Beverly Wilshire Hotel, Beverly Hills, May 26-27. Attendance jumped to 192 on the second day.

Mr. Moskovic told a Monday afternoon session that "Television, properly used, is not an expensive type of advertising; it's the cheapest form of mass selling ever known."

Donn Tatum, TV director, ABC Western Div., presided over the Monday morning session, at which Roger Clipp, manager WFIL-TV Philadelphia discussed *TV's Newsreel Operation.* Robert D. Swezey, executive vice-president, WDSU-TV New Orleans, spoke on "Every Town a Show Town, U.S.A. Yeah?"

Klaus Landsberg, vice-president and general manager KTLA Hollywood, told broadcasters at the Monday morning session that TV will augment rather than hinder radio.

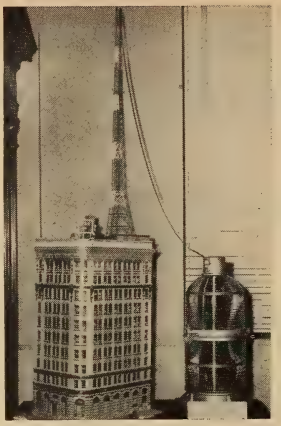
Commending TV for establishing its own code of ethics, Gov. Earl Warren of California, principal speaker at Monday luncheon predicted the industry will "make life much richer for all."

Making no direct mention of the upcoming House "morals" probe of radio-TV programs, he voiced strong disapproval of censorship and emphasized there must continue to be a free press, radio and television.

Mayor Agrees

In agreement with the governor on TV potentialities was Los Angeles Mayor Fletcher Bowron, sharing honors at head table. He considers television "the greatest medium in the world."

Carl Haverlin, BMI president, was chairman at the luncheon session, with TV talent guest speakers Tim McCoy (KNXT) and Eddie Albert (KLAC-TV Hollywood) participating briefly.



Afternoon schedule featured Mr. Moskovic on "Making TV Programs Pay for Advertisers" and Robert Purcell, director of operations KTTV (TV) Hollywood, discussing "Hidden Costs in TV Programming." Don Norman, general manager KNBH Hollywood, was chairman.

Wilbur Edwards, general manager, KNXT Hollywood, was chairman of Tuesday's opening session with speakers including Harold Lund, general manager WDTV (TV) Pittsburgh on "Low Cost Local Programming"; Charles F. Holden, assistant national director of television for ABC, New York, "Brass Tacks of TV Production" and Mr. Tatum, discussing "Participating & Film Programming."

Don Fedderson, vice-president and general manager, KLAC and KLAC-TV and president, Television Broadcasters of Southern California Assn., reported on that organization's formation, purpose and progress.

Richard Moore, general manager, KTTV, was chairman of the final afternoon session, with Philip G. Lasky, vice-president and general manager, KPIX San Francisco discussing "TV Plant Planning & Remodeling for Economy and Efficiency." Joe Coffin, research director, KLAC-TV, spoke on "TV Program Research Techniques."

Messrs. Clipp, Swezey, Lund, Holden and Lasky had spoken on the same subjects at previous BMI TV Clinics in New York and Chicago [B•T, May 26].

SCALE model of proposed TV tower and antenna installation of WSAV-TV Savannah, atop bank building. At right is a 300-millimeter Aviation Obstruction Electric Code Beacon, which would be installed atop the tower. WSAV's TV application is now pending before the FCC.

'IMMORALITY'

Self-Censorship Urged To Eastern Film Makers

"SELF control, not government control" is the answer to the House probe of allegedly "immoral" radio-TV program material, Max Gilford, special counsel to the National Society of TV Producers, Hollywood, said last week. He urged that East Coast TV film makers adopt and enforce their own production codes (see story, page 28).

But to combat the investigation, television producers—all of them—should make certain they and their opinions are represented in Washington, he advised, speaking Wednesday at a luncheon meeting of the National Television Film Council in New York.

Voicing opinions from the floor, Film Council members indicated they were not fully in agreement with the speaker, wondering if self-censorship is not an admission of guilt and questioning whether "the canons of good taste" can be put on paper. Mr. Gilford also was asked if he thought self-regulation had not been effected by the NARTB code, which, he answered, is "inadequate" in its handling.

"A lot of this [government investigation] comes from what they've seen in the past four months," he observed.

When the house voted to probe TV-radio program content [B•T, May 5, et seq.], "heartache and sleepless nights" were caused for just about everybody connected with the industry, Mr. Gilford said. This "government harassment of the entertainment medium" completely side-steps the FCC as the proper authority for such matters, and focuses on television as "a bad, bad boy—a new political target," he asserted.

The prime goal for producers should be to organize and assert themselves, something that Mr. Gilford said has been accomplished more fully on the West Coast than on the East Coast. West Coast producers formed their code three years ago, he noted.

"You should have a code," he urged. "We encourage the competitive existence of such a code as building the health of the industry." Any regulation could be enforced, he suggested, by granting to each production, a seal of approval, to be required by stations before any program is shown.

Some Film Council members urged that outright lobbying be extended, and one suggested TV producers "instead of being mollycoddled—as Hollywood has shown itself for 25 years," should face legislators and others in Washington with tremendous courage, "unafraid to explain film content or the conduct of their business."

Others, taking a more dubious stand, wondered what effect a producers' code would have since ultimate approval depends upon station-acceptance of the end product. While opposing the idea of censorship, Dr. Alfred N. Goldsmith, RCA consultant and honor guest at the luncheon, advised that the product relies upon the producer's own good taste, a matter that "can't be put on paper."

One producer questioned that there is even a market for good taste. Noting that film makers can produce profitably only so long as they respect public vogues, he said stations now are seeking "cops and robbers" productions, perhaps the very fare that has prompted a survey of program content.

. . . spend money—lots of it—for top men, the best equipment, plenty of film.

—and above all, give local news a real play! In the last four months here on Channel 4 we have used 60,000 feet of film on local news: and also 2000 still pictures!

Add to this, footage and wire pictures of National and International news and personalities. Supplement this with stories from the principal wire services . . .

Then edit! Good news men doing it!

In the not-so-good old days, well pitched tonsils and a personality who could rip and read were all you needed.

Now the News has to be good! Money, men, material and completeness make and hold news listeners on WTCN-TV.

If you want to pick up a news program with an established Pulse—one of McCuen's News Shows is temporarily open and is offered subject to prior sale. See our National Representatives or wire us for details and the price tag.

There's always more on Channel 4! WTCN

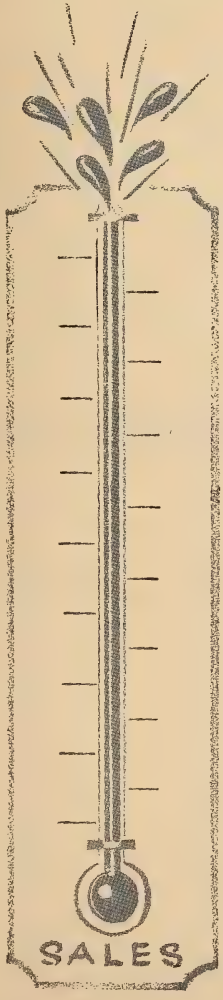
UPT DIVIDENDS

Extra Payments Indicated

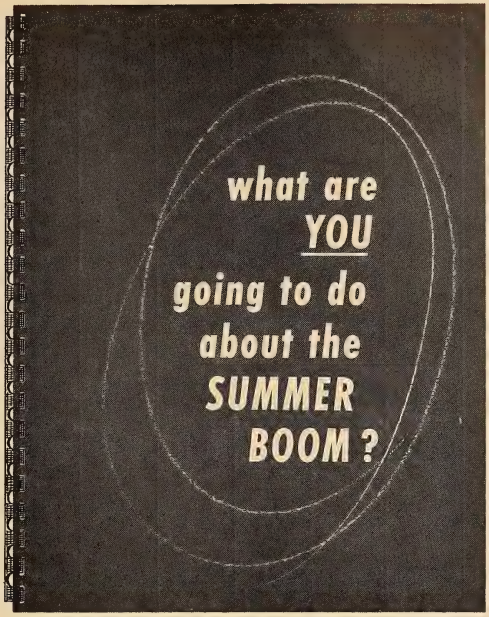
EXTRA year-end dividends in addition to quarterly payments on stock of United Paramount Theatres were indicated as a company policy by president Leonard H. Goldenson last week. The new policy will enable UPT to meet the "substantial demands" for cash expected when it merges with ABC, it was stated.

Mr. Goldenson's statement was made as he announced a 25-cent dividend on all outstanding shares of common stock, payable July 18 to holders of record on June 27.

Indicating that year-end dividends would be paid as justified by earnings of the corporation, Mr. Goldenson observed that, since UPT business is conducted largely on a cash basis—with no substantial investments in inventories—dividends can be paid in greater proportion to earnings than under the usual business procedure.



HAMILTON BUYS



TV Series for 22 Cities

HAMILTON WATCH CO., Lancaster, Pa., has purchased a 13 half-hour untitled TV film series, produced by Gil Ralston, head of Screen Televideo Productions, Beverly Hills, for alternate week showing in 22 cities starting in mid-September. Stuart Reynolds Productions concluded negotiations.

Markets include: New York, Los Angeles, Chicago, Philadelphia, Pittsburgh, Detroit, Boston, Cincinnati, Cleveland, Baltimore, St. Louis, New Haven, Dayton, Providence, Washington, San Francisco, Milwaukee, Minneapolis, Buffalo, Schenectady, Binghamton and Lancaster.

FIRST coast-to-coast TV marathon will be staged by Milton Berle fo benefit of Damon Runyon Memoria Fund on NBC-TV beginning at noo June 7 and continuing through 10:3 a.m. June 8. Show will originate fro New York's Radio City.

Possibly you're tired of hearing about the extra money the consumer *could* spend but doesn't.

Maybe all you want is some *ideas* on how you can tap this summer's record potential—while at the same time meeting management's insistence on increasing profit margins by keeping sales costs low.

If so, we recommend that you read our new study,
"what are YOU going to do about the SUMMER BOOM?"
It includes an exclusive analysis of this summer's sales outlook combined with a plan for making *effective and economical* use of television in 8 major markets which account for over 50% of all U. S. television homes.

If you don't have a copy, call your NBC Spot Sales representative or write NBC Spot Sales, 30 Rockefeller Plaza, New York 20, and ask for
"what are YOU going to do about the SUMMER BOOM?"

Let this Buckaroo Make a Buckforyou

Thar's gold in them thar Dayton tills when Uncle Bob Campbell hits the sales trail with a product. 'Cause a-pounding along in his tracks comes the biggest posse of junior grade cow waddies you'd ever want to round up.

Do those kids follow Uncle Bob? Listen! He's ramrod of the Lucky 13 Ranch—and that's the oldest, continuous daily TV show in these here parts. He started off 3 years ago with 15 minutes once a week, and in no time at all, requests for studio guest reservations blew it up to a daily one-hour show. Ever since, he's averaged about 28 kid guests per day *by reservation*—has over 2000 booked right now through the next 9 months. A while back when he was naming his pony, he got 1800 written suggestions the first week, 5400 in 6 weeks—with no give-away at all in the deal!

Campbell's an all-'round entertainer, musician and outdoorsman, making public appearances as well. His added on-the-spot live shows can put real muscle in merchandising. And as he ends his participating show with comments on good manners, proper living, safety and the like, he picks up plenty of parent support. Like majority of WHIO-TV studio shows, Lucky 13 Ranch commands great audience loyalty with mixture of entertainment and public service. Example: this will be fourth year show is used as vehicle for presenting Schoolboy Patrol Awards.

Better slap *your* brand on Lucky 13 Ranch pronto, podner. National Representative George P. Hollingbery Co. can give you all data.

Comedy Leads Pulse Program Type Survey

(Report 218)

TOP ten TV program types, according to Multi-Market TelePulse, for week of April 1-7 were released by The Pulse Inc., N. Y., last week as follows:

	Pgm. Avg. Rtg.
Comedy Variety	24.8
Boxing	21.9
Westerns	20.5
Talent	18.8
Comedy Situation	17.9
Drama & Mysteries	17.3
Kid Shows	11.1
Wrestling	9.9
Quiz-Audience Participation	9.3
Musical Variety	8.6

Evening programming (after 6 p.m.) took up 51% of all network time during the week surveyed in April, as compared to 47.8% in March. The total number of telecast ¼ hours dropped 3.5% from the March figure, but all of the leading program types except boxing increased in program average ratings.

* * *

Local TV Shows Slim In Small Cities Study

SCARCITY of local shows on television stations in smaller cities was indicated by a Scott Radio Labs Inc. survey which reported that less than an eighth of station time was devoted to local programs in 12 cities studied.

John S. Meck, president of Scott, said that of the 12 cities, two originated no local programs during the week studied and two others aired fewer than ten local shows. Only one station presented material of its own production, he said.

"People in the smaller cities are losing the full benefit of television through this lack of local-interest programming," Mr. Meck said. The survey reported that most local programs by the stations were broadcasting during the smaller-audience daytime hours.

'I Love Lucy' Tops Trendex For May 1-7

TRENDEX INC. top ten network TV program ratings for week of May 1-7 were released last week as follows:

1. I Love Lucy (CBS)	48.7
2. Talent Scouts (CBS)	42.6
3. Godfrey's Friends (CBS)	37.0
4. Fight of the Week (CBS)	36.4
5. Red Skelton (NBC)	33.1
6. Star Theatre (Berle) (NBC)	32.4
7. Fireside Theatre (NBC)	31.6
8. Your Show of Shows (NBC)	30.5
9. My Friend Irma (CBS)	29.3
10. What's My Line (CBS)	29.0

Toronto Teachers Study Children's TV Habits

FIRST survey of TV's effect on Toronto schoolchildren in Toronto public schools, taken by the Toronto Women Teachers' Assn., shows that children spend between 25 and 30 hours each week watching TV and spend about 25 hours in school. (Toronto is in a fringe TV area, receiving WBEN-TV Buffalo, 60 airmiles distant.)

Teachers expressed the opinion that children nurtured on TV will lose the desire to read and to create their own fun. The teachers, obviously alarmed at television's prospects, said the medium's power and influence will grow, not decrease. Whether that influence is for good or evil depends largely on the part played by intelligent, informed parents and educators, they concluded.

New Film Camera Focuses Varying Depths

PROMISING to revolutionize TV film commercials is new Hoge universal focus camera, exclusive use of which belongs to VIP Productions Inc., Hollywood, holder of patent.

Fourteen years in development, camera keeps foreground, middle-ground, background and even objects touching lens in simultaneous focus. First to order test TV film commercial is Young & Rubicam, that city, for Goodyear Tire & Rubber Co., whose recently completed two-minute experimental film utilizes cast of 15. Partners comprising VIP Productions are Lee Garmes, cameraman, Ralph Hoge, director and Robert Smith, writer.

TV Applicants Still Hesitate

(Continued from page 63)

new money to the field.

Another firm which devotes substantially all of its time to radio-TV reported its applicants are divided "about half and half" between newcomers and established broadcasters. Some of the newcomers have theatre interests, a partner stated.

Firm plans to file "15 or 18 applications by July 1," he said, noting about a "5% drop off in potential applicants in the past six weeks."

Reasons for the withdrawals he observed are lack of money, no cable to provide network service and, in one case where two UHF channels are available, the mutual consent "to wait and watch" by the only two potential applicants there.

Commenting that because of foreseeable processing delays there is no need to rush applications, the attorney said it is taking longer to prepare bids for newcomers than existing broadcasters because the former are less familiar with the procedures and requirements.

A Washington partner of another large law firm sees the flood of applications coming, but "fewer than 1,000 and not all by July 1." Reasons for delays he cited include "sheer physical work," holding of some bids "so as to not tip our hand to competitors" and hesitation by those who now must decide whether to spend large sums in TV plunges.

He also noted "the Commission won't get down the processing lines to some of our cities for a year and a half, so why rush?"

"The Commission now has six freezes instead of one," he commented regarding the temporary processing procedure and city priority listing.

Another attorney, heading his own private office, commented, "I should file now and let people take pot shots at my people?" The strategy is to wait until the last possible minute, he said, noting that in the meantime "we could get more money maybe" for some applicants to strengthen their competitive position.

This practitioner sees "lots of new money" coming into TV "because the existing boys can't do it."

"You will have to go to New York and Boston," he predicted, to get the amounts of money TV will demand.

Asked what has happened to the promised TV land rush, spokesman for another major radio-TV law firm responded:

"It's still underway. . . . There is no indication of any withdrawal of interest."

He predicted the applications will start flowing in this month.

For his firm, details of preparation have slowed up filing, he said. For instance, long-standing AM broadcasters are being asked to file certified copies of their articles of incorporation. Securing of sites has been hard because sites chosen under the old allocation plan are, in many cases, no good under the new plan, he said. CAA approval hasn't been too much of a problem, however, the attorney commented.

Four-fifths of his firm's applicants are existing broadcasters, he estimated.

One attorney representing a good-sized firm in the radio-TV practice observed many broadcasters have been having a difficult time reaching decisions on height and power combinations while several can't make up their minds about "that $400,000-500,000 staring them in the face."

No Waiting Policy

The spokesman said his firm's policy is not to wait on filing once bids are ready.

"We prefer to make our channel preferences known," he said.

Three-fourths of the applications being readied by his firm are from present broadcasters, he said.

A Washington attorney of another major law firm estimates "the same rush as predicted."

As a rule, his firm does not plan to hold any applications once prepared, he said. Some of the existing broadcasters represented are bringing in new capital to meet TV's costs, he noted.

Another attorney who heads his own office commented that the FCC plan is "pushing stations" into TV.

"Broadcasters want to wait and file when ready," he said. "There is a lot of money to spend in television and all of them don't have it."

His firm does not represent any newcomers to TV alone, although some existing broadcasters "are bringing in some new people" in order to meet capital requirements.

Partner in another firm also sees the FCC plan "forcing some to decide now about entry into TV" while it already has caused "others to pull out now as costs are too high."

Generally, applicants "are most enthusiastic," he reported, although a few plan to wait and see if they can "buy in later when the industry becomes stabilized."

His firm, representing mostly all active broadcasters, plans to get as many as possible of its applications on file by July 1.

However, another practitioner heading his own office, reported his plans generally to hold off applications until the last minute as a competitive tactic. A third of his bids represent newcomers to broadcasting, he estimated, "a little more than he had expected."

"They have plenty of money and there is no worry about letters of credit and the such," he observed.

One Ohio UHF applicant, however, has withdrawn as a result of Comr. Jones' talk in Columbus, Ohio, which cited UHF problems. Certain others, the attorney said, plan to wait and "buy a TV station off the auction block" because some grantees won't have enough money to carry through.

TALL TOWERS

Study Groups Continue

NEW SUPPORT was given last week for the "status quo" in procedures for clearance of antenna towers and processing of applications on a case-to-case basis before regional airspace subcommittees as now provided in Part 17 of FCC's rules.

A working group of the industry-government "ad hoc" committee studying the height and site problem of tall TV towers reported that it felt present procedure is satisfactory, indicating it would be impractical to adopt arbitrary criteria, limiting airspace subcommittee action to mechanical grants or denials without consideration of local factors. [B•T, May 6]. In an earlier meeting of the ad hoc group, it had also been pointed out no fixed criteria are needed other than Part 17 because cooperation between aviation interests and broadcasters has been effective in resolving innumerable cases and each case is unique, hence requiring individual expert consideration under present procedures.

Next meeting of the ad hoc group has not been set. Reports of the four working subcommittees are to be codified for submission to the committee of FCC Comr. E. M. Webster and CAA Deputy Administrator Fred B. Lee. Ultimately, another meeting of the large industry-government committee considering the problem will be closed to consider the reports of the ad hoc groups. Earlier major session was in April [B•T, April 28].

One of the ad hoc subcommittees seeks to determine the potential magnitude of the tall towers problem, that is, how many cases exist and may develop which involve tower proposals that might constitute air navigation hazards. Channel assignments to the various cities and tower height specifications given in FCC's Sixth Report provide a guide for the study.

FACTOR-BREYER Inc., L. A., has re signed advertising account of Thrift Drug Stores Inc., that city. Dan E Miner Co., that city, co-servicer of ac count, will handle entire account wit exception of vitamin products.

will your sales go up this summer?

People go on doing in summer largely what they were doing in winter – eating, working and *buying*. Yet a tradition has grown up of suspending or curtailing advertising activity during the hot-weather months. With the advent of television, it was clear that a complete re-appraisal of summer advertising practice was called for.

NBC therefore resolved last summer to conduct a survey – as accurate as science and logic could make it – of the summer marketing potential. Alongside are outlined the highlights. As applied to this summer, the picture is even brighter for viewers and advertisers

A copy of "Summer Television Advertising"—NBC's comprehensive research survey—awaits you for the asking.

alike – for the number of sets in use will have increased from 13,093,600 last July to an estimated 17,800,000 in July 1952. And the political conventions will stimulate more viewing than ever before.

Averaging the findings on 52 different brands, the TV summer advertisers reaped 28.1% more sales among viewers than among non-viewers . . . won just under 46,000 extra customers per month in New York alone.

94.8% of TV families are available during the average summer week. Watching television is, by far, the favorite summer activity in TV homes.

The average TV family is away for only 4½ days each summer. In August, the TV owner spent an average of nearly two hours a day in front of his set – or more time with TV than with all other media combined.

And – 91.2% of both owners and non-owners alike recalled most clearly advertising on television.

Whereas in January 1951 it cost the average TV advertiser 5 cents to bring in a new customer, in August it cost only 4 cents.

Of the 52 brands studied, 21 came on television for the first time last summer, and 31 continued into summer from their winter TV campaign. The "new" brands garnered an average of 38,200 new customers in the New York area alone every month – but the "stay-on" brands did even better, with an average of 51,000 extra customers per month. As stated above, the over-all average for both kinds was 45,900 extra customers each summer month.

You're in business twelve months a year: now, with television's aid, your summer sales can be as high – *or higher* – than your winter's! More NBC advertisers are staying with us this summer than ever before. More than 70% of NBC evening network sponsors plan to continue their TV advertising throughout the hot-weather months. For both large and small advertisers, however, there are still a limited number of availabilities and proven show properties . . . and a special low-cost plan for the coming summer.

Your NBC salesman will be glad to give you full information about them. Phone NBC-TV Sales in New York, Chicago, Detroit or Hollywood today.

NBC summer television

POP. 70,000,000

A Service of Radio Corporation of America

film report

RIGHTS to the title, *Calling All Cars*, acquired by **Gene Autry's Flying A Pictures**, Hollywood, for a projected radio and TV film series, will take the firm out of a strictly western classification.

The title headed a CBS Radio Pacific Coast program from 1937-45 for Richfield Oil Corp. whose agency, Hixson & Jorgensen Inc., concluded the deal with Flying A.

The TV series will start upon completion of the scripts. Prepared audition discs for the radio series, starring **Lamont Jackson** and **Jack Moyles**, are being given agencies and networks. **William Burch**, producer-director of CBS Radio's *Gene Autry Show*, has performed similar duties from scripts co-written with **Richard Carr.**

The firm has completed 52 half-hour westerns for television starring Mr. Autry, 52 half-hours in the *Range Rider* series and is currently filming 52 half-hour *Annie Oakley* westerns.

* * *

Already completed by **Hal Roach Jr.**, Culver City, is the pilot film of a half-hour CBS-TV film series, *Passport to Adventure*, with **Caesar Romero** portraying an American diplomatic courier. **Roy Kellino**, British feature film director now in Hollywood, directed from a script by **Robert Dennis.** In production is the pilot to *The Dramatic Hour*, an hour-long TV film series.

* * *

In a deal similar to their ABC-TV *Troubles With Father* series, **Hal Roach Jr.** and **Roland Reed Productions**, Culver City, are filming 12 half-hours in *My Little Margie* series as the summer replacement of CBS-TV *I Love Lucy* series for **Philip Morris & Co.** and its agency, **Biow Co.** The series, a light sophisticated comedy, features **Charles Farrell**, early motion picture star, and **Gale Storm**, young film actress, with **Hal Yates** directing from scripts by **Frank Fox** and **George Carleton Brown.**

Messrs. Roach and Reed receive $10,500 per film and retain all resale rights unless Philip Morris decides to continue the series. *I Love Lucy* was budgeted at $25,000 per film.

* * *

Because of a similarity in names with another company, **Pennant Productions**, Hollywood, has changed to **Pennant Television Productions Inc.**

Capitalization from original $200,000 to $1,000,000 has also been increased, according to **Edward Woodworth**, president. He explained additional funds were necessary in cooperation setup to provide money for the initial TV film series *Date with Destiny*, scheduled to start next month, and a new group of films titled *Fiction Theatre.*

* * *

Production . . .

General Foods Corp., New York (Swans Down products), will start *Our Miss Brooks* on CBS-TV this fall in addition to CBS Radio. Filming will begin July 1 at **Desilu Productions**, Hollywood, with **Eve Arden**, star of the radio version, recreating Connie Brooks for TV. **Robert Rockwell** will portray Mr. Boynton, replacing **Jeff Chandler** of radio series, whose motion picture contract precludes TV appearances. **Young & Rubicam Inc.**, Hollywood, is General Foods agency.

* * *

Procter & Gamble Co., Cincinnati (Ivory soap, Crisco, Duz, Lilt), starts *Boss Lady*, a TV film series, on NBC-TV, Tues., 9-9:30 p.m. (EDT), for 13 weeks from July 1 as summer replacement for *Fireside Theatre.* **Lynn Bari** is featured [B•T, May 12]. **Jack Wrather Television Productions**, Hollywood, has completed six of scheduled 13 films.

* * *

Screen Gems Inc., Hollywood, completing half-hour TV film, *Samuel Morse*, for **duPont.** Film actors **Eduard Franz**, **Don Gibson** and **Tom Brown Henry**, are featured with **Jules Bricken**, producer-director.

* * *

William F. Broidy Productions, Hollywood, has started a new half-hour color TV film adventure series, *The Phantom Pirate*, shooting exteriors on and from a 100 foot boat, *The Avenger*, in the vicinity of Catalina Island. Starred in the title role is **Robert Stack**, film actor. **Frank McDonald** is directing with script writers **Bob Bailey** and **Hugh King** acting as associate directors. **Cass Duchow**, illustrator and book designer for the Anderson-Ritchie Press, Los Angeles, has designed costumes and will create pirate designs for a merchandising tie-in campaign. **Wesley Barry** is producing with Mr. Broidy, who is the executive producer.

* * *

Breakston - Stahl Productions, Hollywood, will produce 26 half-hour TV color film series, *Safari Bill*, on location in British East Africa and the Belgian Congo. The films, produced simultaneously with a feature picture, will get under way around June 18 and be ready for fall release by **United-Artists. George Breakston** and **C. Ray Stahl** will co-produce-direct from scripts by Mr. Stahl. Featured in the cast are **Richard Denning** and **Martha Hyer** (Mrs. Stahl). Associate producer is **Irene Breakston** with **John R. Carter** named technical executive.

* * *

With the signing of **Charles Winninger**, stage-screen actor as star, **Bing Crosby Enterprises**, Culver City, starts a new half-hour light comedy TV film series, *Those Were the Days.* Story-line was created by **Richard Dorso** and **Bernard Girard**, serving as co-writers-producers with the latter directing. Featured in cast are radio-film actors including **Arthur Q. Bryan, Ted Thorpe, Howard Erskine** and **Doris Singleton. Lucien Andriot**, the firm's cameraman on *Rebound* series, assigned to similar duties on *Those Were the Days.*

* * *

Sarra Inc., Chicago, has completed two industrial safety films for the **National Safety Council**, same city. Films are being telecast. They concern freight handling and safety "IQs".

KNXT RATES

ffers Daytime 45% Discount

EW RATE CARD which allows 45% discount to all sponsors buyig nine or more daytime spots per eek was announced last week by NXT (TV) Los Angeles station f the CBS-TV network, effective esterday (Sunday).

Object of the plan, according to eneral Manager Wilbur Edwards, to get more spot advertisers into aytime TV, although nighttime pot clients will be permitted to ombine their spots or participaion figures in order to qualify for he deduction.

"Local daytime video programing is considerably ahead of sponor interest," he said, "and the new ate structure is designed to lure ther current and new advertisers n the basis of larger audience and avorable cumulative repetition." he new discount is also expected o be called into play by sponsors f saturation campaigns.

WCBS-TV Discount

The network's New York station, WCBS-TV, announced a similar iscount on daytime announcenents, with 12 set as the weekly inimum [B•T, May 19]. KNXT vas described as the only TV outet in Los Angeles to openly pubicize the percentage discount—pplicable after other deductions—o that all advertisers could particiate on an equal basis.

Mr. Edwards also announced hat, without changing basic rates, KNXT has reclassified its time segnents, also effective June 1. A new lassification—Class D—has been esignated from sign-on until noon, t a $300 hourly base rate, The new ime classifications are as follows: Class A, Sunday through Saturday, 7-10:30 p.m.; Class B, Monday hrough Saturday, 6-7 p.m., Sunlay, 5-7 p.m., and daily, 10:30-11 .m.; Class C, Monday through Satrday, noon to 6 p.m., Sunday, noon o 5 p.m., daily, 11 p.m. to midight; Class D, daily, all other imes.

26 MILLION SEE 'ASIA' FILM

35 Stations Show TV Documentary

RESISTANCE to Communist aggression in Asia is the subject of *Truth Shall Make Men Free*, a 13-minute documentary film which has been shown to an estimated 26 million television viewers in 25 U. S. metropolitan areas.

The Committee for Free Asia Inc., San Francisco, which is distributing the film, made by Palmer Pictures Co., San Francisco, said 53 showings already have been made by 35 stations since mid-February this year and that a total of 78 (or 72%) of the nation's 108 TV stations have requested the film.

The film depicts work by Asian and American newsmen, radio veterans, labor leaders, students, teachers and others to organize their own privately operated machinery in a drive against Communist aggression in Asia.

Alan Valentine, former president of the U. of Rochester and now president of the Committee for Free Asia, said the film has been distributed to 75 stations, with three requests still not filled because of the unexpected demand. He commended TV stations for helping to "bring to Americans . . . a deeper appreciation of the problems of Asia and of its people."

He said some stations have shown repeat performances.

NATIONAL Bank of Washington (D. C.) began sponsorship of *Your Commissioners' Report* last week. Program on WMAL-TV is presented to acquaint people of nation's capital with operation of city's government.

SENATE STUDIO

Sought in Ferguson Bill

SEN. HOMER FERGUSON (R-Mich.) has introduced a bill (S 3216) in the Senate that would permit the building of a television studio on the east gallery floor of the Senate wing. It would be maintained by the Senate Radio-TV Correspondent's Gallery.

The bill would authorize the spending of such funds as necessary for the studio's construction.

Sen. Burnet R. Maybank (D-S.C.) co-sponsored the measure. Harold D. McGrath, superintendent of the Senate Radio-TV Gallery, said five film units currently operate in the gallery. An average two forum, 10 TV film and 18 radio shows originate there. Increased activity, he noted, had necessitated the request for more space. The bill was referred to the Senate Rules and Administration Committee.

I DREAMED I WAS A MILLIONAIRE IN MY ALEXANDER FILM SHORTS

"As a matter of fact, the way those dynamic short TV film commercials by Alexander have sent our sales soaring, that first million may not be so hard to get after all!"

There's good reason why Alexander film shorts are used by more than 27,000 clients. It's a matter of quality and impact . . . sales winning factors that Alexander has perfected through more than three decades of experience as the world's largest producer of film advertising. For the best in TV film commercials, rely on Alexander . . . the pacemaker in quality and service!

GLOBAL LINK

Seen for New York, London

PROPOSAL for a global TV link among nations of the North Atlantic Treaty Organization, with terminal points in New York and London, was brought to public attention in two stories appearing in the *New York Herald-Tribune* fortnight ago.

The project is one phase of a master global communications blueprint for radio relay systems, television networks, AM and FM broadcast stations and facsimile. It has been under study and implementation for the past year [B•T, April 7; Sept. 3; July 30, 23, 1951].

The TV project picked up momentum two months ago as a potential "Vision of America" with the revelation that foreign nations are being urged to adopt U. S. video standards and finance installation of equipment as in Japan.

After Sen. Karl Mundt (R-S.D.), a prime mover behind worldwide television, apprised the Senate of current developments last April with a series of articles, the plan was discussed by representatives of the State Dept., Defense Dept., the FCC and the National Bureau of Standards.

The immediate program, labeled NARCOM, envisions microwave relay stations from New York through Montreal to Newfoundland, where network would convert to VHF transmission and extend along the Labrador coast. From there, the signal would jump to Greenland, Iceland and other points, reverting to microwave for extension through the British Islands. Land water relay systems would have to be established before NARCOM could begin operation. Both the military and the State Dept. stand to benefit from it.

Relay stations would cost about $50 million, covering some 68 outlets, on the basis of AT&T figures, according to Maj. Henry F. Holthusen, lawyer, financier and consultant to the State Dept. and one of the planners. Cost of installing some 180 relay stations in the U. S. reportedly was about $85 million.

Plans for similar systems also are underway in Egypt, Turkey, Australia and the Philippines, it was reported. The NARCOM system embraces use of wide band, VHF and microwave relay equipment (using FM) at strategically-elevated points.

The *Herald-Tribune* quoted Maj. Holthusen as saying that if government financing is not forthcoming, private industry might show interest in sponsoring the inter-continental TV link. Some manufacturers and financing "sources" have made overtures in this direction, it was said.

DuMONT executives gathered at a farewell luncheon for Clarence G. Alexander (seated, 2d from l), the TV network's director of operations who resigned to take the same post with RHC-Cadena Azul, Cuba. L to r are (seated) Lynn Cleary, manager of sales service; Mr. Alexander; Chris J. Witting, DuMont's director and general manager, and Alice Guego, secretary to Mr. Witting; (standing) Norman W. Drescher, administrative assistant; Irwin Rosten, assistant to the director of operations; Gerald Lyons, director of publicity and public relations; Donald A. Stewart, film department manager; Joseph Hess, budgets director; Jack Bachem, assistant director of sales; Melvin A. Goldberg, director of sales planning and research; Leslie G. Arries Jr., assistant director of programming and production; Edward Kletter, director of merchandising and business development; Donald H. McGannon, administrative assistant; Ted Bergmann, director of sales; Richard E. Jones, manager, WABD (TV) New York, and Rodney D. Chipp, director of engineering.

Helps Station Planners

TO HELP prospective TV station operators prepare FCC applications and formulate basic construction details, General Electric is distributing a comprehensive technical booklet, *Television Station Planning*. Already delivered to Washington consulting engineers and attorneys, the booklet discusses station requirements, basic equipment combinations and integrated systems.

The material helps in choice of equipment for each installation "and is designed to give an overall awareness of the technical problems involved." GE will send the volume on request. Address GE at Onondaga County Savings Bank, Syracuse, or 777 14th St., N. W. Washington, D. C.

AP TV NEWS

Suspension Laid to Market

INDICATIONS that the new TV station market will not increas as rapidly as had been initiall expected were cited by the As sociated Press last week as it reason for suspending its just begun TV news service.

Suspension of the film servic was scheduled to occur Friday. Th film news was started April 1 and produced by Spotnews Produc tions Inc. for the AP which dis tributed it to television station A joint statement from the tw organdizations said:

"Uncertainties of the futur make it advisable to suspen operations until there can be clearer picture of the rapidity wit which new television stations wil come into existence. Indication are that there may be no appreci able expansion in the new statio market in the immediate future."

The daily quarter-hour news reel had been suscribed to, at th start, by seven AP member TV stations—KSD-TV St. Louis *(Post Dispatch)*, WDAF-TV Kansa City *(Star)*, WBAP-TV For Worth *(Star-Telegram)*, WTAR TV Norfolk *(Virginia-Pilot* an *Ledger-Dispatch)*, WCAU-TV Philadelphia *(Bulletin)*, WHAS TV Louisville *(Courier-Journal* an *Times)* and WBNS-TV Columbus Ohio *(Dispatch)*.

Domestic coverage was provide by cameramen and correspondent in 42 states, with added representa tives signed in other states an Alaska, Hawaii and Puerto Rico Correspondents in 44 countrie were slated to contribute foreig coverage.

Service was designed to be ex clusive to AP members, with TV stations, like radio outlets, eligibl for associate memberships in th press organization.

STATION KNXT (TV), KLAC-TV and KHJ-TV Hollywood, KECA-TV Los Angeles and KFMB (TV) San Diego awarded certificates of achievement by Armed Forces Radio Service, Hollywood, for telecasting *The Big Picture*, TV film series depicting role and mission of U. S. Army. Col. William Mason Wright Jr., USA, Commanding Officer AFRS, made presentations on respective programs last week.

VIDEO VARIETIES CORPORATION

Office: 41 E. 50th St., N.Y. 22 MU 8-1162

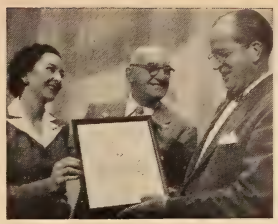
WLTV (TV) HEP
To All-Negro Variety TV

TV'S FIRST and only all-Negro variety program, claimed by WLTV (TV) Atlanta for its Saturday night features, *Golden Bells* and *TV Cabaret*, has paid off in commercial success and audience popularity, according to WLTV General Manager William T. Lane.

The program on May 17 gained national sponsorship after quietly debutting in February and being nurtured along by WLTV's production staff until it became a standout among live shows, he said.

Colgate-Palmolive-Peet, for Octagon soap, took over a quarter-hour of the 10-11:15 p.m. production. A second quarter-hour was taken cooperatively by Borden Co., Raleigh cigarettes, Luzianne coffee and Ballard & Ballard (flour), with the co-op group plugging a coupon-premium plan. Mr. Lane said a third national sponsor has contracted for another quarter-hour and an Atlanta appliance store has taken a fourth quarter-hour.

The program opens with the half-hour *Golden Bells*, featuring the "Five Trumpets," a gospel singing group, and guest singing groups from Negro churches in Atlanta and north Georgia. At 10:30, WLTV shifts to a second studio for the 45-minute *TV Cabaret*, conducted by m.c. Ray MacIver and featuring a five-piece blues band and a night club lineup of entertainers.



Mr. Lane said the program's commercial concept is to give national advertisers a direct vehicle of approach to the large Negro buying market of the Atlanta area.

NEW FILM FIRM
Lesser and Poe Open

OPENING of a new TV film distribution firm to be called Major Television Productions Inc., New York, was announced last week by Irving Lesser and Seymour Poe, co-directors of Producers Representatives of New York.

General sales manager of the new corporation is Maurie Gresham, who resigned as head of KLAC Los Angeles' TV distribution company. He will be headquartered in New York's RKO Bldg. Branch offices will be opened in Chicago, Atlanta, and Culver City, Calif.

Television and movie film properties to be distributed by the new corporation—with original cost estimated at $7 million, according to a Major spokesman—include four full-length motion picture films and nine musical films starring singer Bobby Breen. Firm is also offering 26 30-minute films titled "It's a Small World," and series of 26 "Thrilling Bible Dramas."

TV SERIES on "Let's Be Good Drivers" was telecast on *Woman's World* on WTMJ-TV Milwaukee. Shown receiving award for its presentation is Beulah Donohue, hostess on the program. R. G. Winnie (r), station manager, and R. C. Salisbury, director of safety division of Wisconsin Motor Vehicle Dept., inspect inscription.

Religious Program Hints

MINISTERS have been advised to watch such television performers as Arthur Godfrey and Dave Garroway in order to inject "spontaneity, friendliness, humor, and a warm open approachableness" into religious telecasts. This advice was contained in a 46-page booklet, published by—and available from—the Broadcasting & Film Commission, National Council of the Churches of Christ in the U. S. A., 220 Fifth Ave., New York 1, N. Y. Booklet was written by Rudy Bretz, TV consultant.

CONVENTIONS TV
Circuits To Be Ready

ALL UNDERGROUND TV circuits for the national conventions in Chicago will be installed by June 15, Illinois Bell Telephone Co. announced last week. Final microwave test was completed May 21 as engineers checked pickup facilities between the Amphitheatre at 43rd and Halsted Sts. and Merchandise Mart, feeder link between the convention site and NBC's WNBQ (TV).

Earlier tests at WGN-TV WENR-TV WBKB (TV) and the Conrad Hilton Hotel, convention headquarters for both parties, proved satisfactory, according to telephone company spokesmen.

TV Relay Grant

FCC granted authority May 20 to the Pacific Telephone and Telegraph Co. to convert a telephone "protection" channel between Sacramento, Calif., and Portland, Ore., to enable KING-TV Seattle to receive live network telecasts of the political conventions in Chicago [B•T, May 19]. Temporary microwave relay facilities, already authorized, will be used to relay the signal from Portland to Seattle, FCC was informed. The petition also indicated the program service would be fed to "television viewer locations" in Portland, which has no TV outlet. Cable cost was estimated at $70,000.

NLRB REPORT

Raises Issues in Radio-TV Cases

OVER a year ago, an official of a large manufacturing plant questioned employes about their union buttons and lightly termed them a "pass to heaven." The National Labor Relations Board declined to accept the explanation that his statements were only "kidding remarks," and held them to be unlawful.

In Washington last week, the board issued its voluminous 16th annual report for fiscal 1951, covering some broadcast cases through early 1952, in which vital technical points emerged.

With the advent and growth of television and increasing demands for repeal or at least amendment of the Labor-Management Relations Act—the so-called Taft-Hartley Law—radio-TV broadcasters could profitably take more than a passing look at the board's decisions as a harbinger of things to come.

In the wake of NLRB's decisions over the last fiscal year, what are licensees' rights under current law and what course is the board likely to take in present and future cases involving station-union disputes?

Indeed, the labor agency has acted differently in comparable instances, when variable factors emerged, but some broadcasters have indicated more than minor confusion when confronted with complaints filed by various labor groups.

With the expansion of television, even the unions themselves—American Federation of Radio Artists, Television Authority, Screen Actors Guild, among others—have found their procedures and activities clouded with jurisdictional doubt.

The board's decisions in a number of radio-TV labor cases—and the underlying reasons given thereto—may dispel some of the fog, though this interpretation of its report is not intended to serve as a catch-all guide or indicative of bargaining unit trends in intra-union fights, such as between IBEW and NABET.

It is generally acknowledged among industry authorities that if the present administration prevails on Capitol Hill next year, a bid will be made to ease the Taft-Hartley law to the benefit of labor.

To what extent may NLRB extend its jurisdiction over radio stations?

Some time ago, the board made clear that network affiliation is not necessary to bring it within scope of interstate commerce. It implemented this conviction in cases involving WLEX Lexington, Ky., and WWOL Buffalo, N. Y. The criterion: Evidence of listeners and advertisers in other states.

KPAC Case Jurisdiction

The board may even extend its jurisdiction over a station operated by a college on an allegedly non-profit basis—such as KPAC Port Arthur, Tex. The board found here that the station actually operated "on a commercial basis for profit, although the profit went to a non-profit educational institution." The fact that the profits were channeled back to "cultural objectives" did not "alter the business character of the station's activities," NLRB ruled, adding that KPAC devoted nearly half its time to network shows.

Does the board have authority to "investigate the truth or falsity of non-communist affidavits?"

NLRB claims this responsibility rests with the Justice Dept. by statute and affirmed a prior ruling to that effect. It alluded to a labor case involving ABC.

What of cases wherein prior agreements are negotiated among licensees and unions and a rival union files a petition?

In the KMYR Denver case, the board ruled that if an employer and a certified union enter or renew a contract during the period between filing of a rival petition and the end of a certified pact with the existing union, the petition should be dismissed.

Is there an exception? Yes, where there is substantial evidence of a schism of employes from the certified union of such proportions that the bargaining relationship "has become a matter of extreme confusion and uncertainty." Then, the board orders an election before certification period ends.

In the case of William Penn Broadcasting Co. (WPEN Philadelphia), a board majority decided that an employer may continue bargaining with a union already established as majority representative "if a petition (from a rival union) raises no *valid* question of representation." The board made plain, however, they do so at their own risk and subject to unfair labor practices if the board later finds a valid question has been raised. The board overrode its trial examiner here and reopened the case.

What about the status of supervisory employes in television? The board made only one reference to this confusing problem.

Director Functions

In a case involving ABC, the board rejected the network's claim that a director does not "responsibly direct" actors' performances but that his directions are "suggestions, requests, cues." It held:

What would be a direction in another industry may be termed a "suggestion" in the field of television, but nevertheless it is the director's concept of the desired result that governs the response of the performer, regardless of the manner of communication.

In another instance—that covering WCAU Inc. (WCAU-TV Philadelphia)—the board credited TV broadcast directors with authority effectively to recommend the transfer or discharge of employes under their direction, though such an occasion has never arisen. Where alleged authority of employes with disputed status does not exist, they may be included in the bargaining unit.

What of parttime radio-TV employes—those who work in different departments?

Previously, in four such cases—KPAC, WCAU, WWEZ New Orleans and WMBR Jacksonville, Fla.—NLRB required employes to work 50% of their time within the unit to be eligible for voting. It later modified this ruling and held these employes should be bracketed with parttime help—those who work for other employers or who at times remain idle.

Where an employe's status is in doubt, he may vote subject to challenge—according to the decision in the WWOL Buffalo dispute.

Perhaps the most controversial and sensitive provision in the Labor-Management Relations Act is that governing interference with employes' rights—or so-called unfair labor practices.

The board has cited employers for interrogation of employes or applicants for employment, claims that union activity would result in economic detriment, "threats" of loss of employment, attempts to "influence" votes against the union and inducements to assist employes to withdraw from unions. NLRB stated:

"Consistent with past rulings the board has continued to hold that the questioning of employes by their employer *per se* violates Sec. 8 (a) (1) [of the act] when it concerns the following subjects: Employes union membership or activities; their attitude toward the union, or their desire for union representation; their voting intentions in a scheduled board election or their views concerning a sched-

RE Iowa Meet

COMMUNICATIONS will be explored by top speakers during a one-day conference sponsored by the local section of the Institute of Radio Engineers in Cedar Rapids, Iowa, Sept. 20. Talks, exhibits, plant inspections and a banquet will highlight the session, to be held at the Roosevelt Hotel.

ARTHUR H. CROGHAN (l), owner-general manager of KOWL Santa Monica, Calif., accepts station's gift from Jim Coyle, sales manager, on the occasion of his 25th anniversary in radio. Package contained a traveling clock.

DISC CONTEST

WAVE Reports Record Vote

TO SUPPORT its contention that radio is alive and kicking in a two-TV station market, WAVE Louisville reports that a late evening amateur disc jockey contest just completed broke its own record for number of mailed-in votes.

The program, *Oertels' 92 Disc Contest*, aired Monday through Saturday from 10:15-11:30 p.m., wound up a 27-week series with a mail pull of 111,583 votes, compared to 93,095 letters for a 30-week contest last year.

Four grand prizes included all-expenses-paid weekend in Hollywood, week's vacation at the Hotel Biloxi on the Mississippi Gulf Coast, a week's vacation at Fontana Village, Fontana Dam, N. C., and $400 merchandise prize consisting of household furniture, radio and other appliances. Expense-paid trips were good for two people in each instance.

Contest was conducted by Bob Kay, who interviewed amateur disc jockeys. Latter spun platters of their choice and wrote and read their own copy and commercials. Winner was chosen each night from three participants by telephone and weekly winners were determined by mail. Grand championships were held every six or eight weeks.

FAB MEET

New Membership High Reported by Floridans

LARGEST meeting in the history of the Florida Assn. of Broadcasters was held May 22-23 at Miami Beach with 169 broadcasters in attendance. Membership reportedly reached a new high with 73 of the state's 76 stations signed and 100% of the stations represented.

Main address was delivered by Maurice B. Mitchell, president of Associated Program Service, on "Radio Salesmanship." S. O. Ward, outgoing FAB president and president, general and promotion manager, WLAK Lakeland, taped the talk to be distributed to station staff members not present.

Florida's Gov. Fuller Warren made a special trip to address the broadcasters, telling them radio had played an important part in his administration. He said radio had been of greater service to him than any other medium for dissemination of news and publicity.

The Florida broadcasters adopted a new constitution and by-laws and elected officers (AT DEADLINE, May 26) to be installed July 1. Newly named to the board of directors were Eugene D. Hill, general and commercial manager, WORZ Orlando, and Tom S. Gilchrist Jr., general manager, WTMC Ocala.

Members of the board of directors and the membership were honored for services during the year by plaques presented to FAB President Ward and Secretary-Treasurer John B. Browning, general manager, WSPB Sarasota, by Maj. Garland Powell, director, WRUF Gainesville, at a banquet Thursday.

KBA SESSIONS

Two-Day Agenda Set

PROGRAM, sales and business sessions will highlight the semi-annual meeting of the Kentucky Broadcasters Assn. in Louisville, Ky. Thursday and Friday, J. W. Betts, WFTM Maysville, will preside as KBA president.

Meeting opens Thursday morning with registration at 9:30, followed by a business session and luncheon. Ken Sparnon, BMI, and Jean Thomas, originator of the American Folk Song Festival, will speak. Afternoon agenda calls for program-sales clinic, social hour and banquet, with Dr. R. Haynes Barr, president of the Kentucky Medical Assn., as guest.

Second business meeting and luncheon will comprise the Friday schedule, with Jack Younts, WEEB Southern Pines, N. C., as guest. Mr. Younts is secretary of the North Carolina Broadcasters Assn. Conference will be held at the Seelbach Hotel.

FM SET SURVEYS

Report High Percentage

TWO SURVEYS in Wisconsin and Illinois indicate a heavy concentration of FM receivers in homes.

A telephone survey of 500 families by the State Radio Council in Madison, Wis., indicates 42% of the area families have FM sets, with only 36% a year ago, 24.8% in 1950 and 18.4% in 1949. On the basis of the survey it is estimated there are 11,000 FM sets in Madison. The council operates a statewide network of six non-commercial FM stations, with two more under construction.

FM sets survey of homes represented by students from 297 families attending Carmi Township High School, Carmi, Ill., indicated 71.68% of homes contained FM receivers, according to Thomas S. Land, secretary and general manager, WROY-AM-FM Carmi. He said FM reception in the area is excellent, while claiming no AM station can be heard in the area at night.

New FM Speaker

A NEW type loudspeaker for FM reception was demonstrated for New York's Radio Club of America May 22. The loudspeaker is expected to retail for about $25 but reportedly is capable of matching performance of high-cost sound reproducing apparatus. Inventors Dr. Jordan J. Baruch and Henry C. Lang, of Massachusetts Institute of Technology Accoustics Lab., commented that the unit may be on the market by fall.

NEWS on KMBC-KFRM is TOPS...

. . . because KMBC-KFRM stays on 'top' of the NEWS!

And there is no greater value today than radio news!

KMBC-KFRM news programs are the most-listened-to newscasts in the heart of America. They enjoy their high ratings because of the reputation for accuracy and immediacy built by the KMBC-KFRM News Department.

Here is a tremendous sales potential in one of the nation's richest markets...the great Kansas City Primary trade area.

Call KMBC-KFRM or ask your nearest Free & Peters' colonel for complete details on the mighty voice of the KMBC-KFRM Team and for newscast availabilities.

NLRB Report Raises Radio-TV Issues

(Continued from page 82)

uled board election; whether they had received solicitation letters from a union."

Among the stations that have found themselves involved on employes' rights are WATL Atlanta, Ga.; KVEC San Luis Obispo, Calif.; KWIN Ashland, Ore.

May a station licensee assist one union against another where the issue of communist domination arises?

The answer is no. In the Stewart-Warner case, NLRB ruled "the fact that the employer undertook to assist one union against another for patriotic reasons" does not "excuse a violation."

What is the extent of employes rights?

NLRB cited the case of WBT Charlotte, N. C. (Jefferson Standard Broadcasting Co.) in which it ruled that "employes were not protected in circulating a handbill attacking the quality of the employer's product." The handbill accused Jefferson Standard of providing "inferior and technically inadequate programs" through WBTV (TV). These tactics "were hardly less indefensible than acts of physical sabotage," and their discharges were lawful, the board stated.

At KFRM Kansas City, Mo., a shop employe was discharged—lawfully, the board decided—for referring to the employer's management and policies in profane and abusive language, in private and public places on the employer's premises.

Again in the Charlotte dispute, the board stressed that an employer is not required to negotiate with a union to settle unfair labor charges if he prefers to test the legality of his conduct at NLRB level.

In the WTAL and KDRO Sedalia, Mo. cases, the board ruled:

"Outright refusals to meet with the representative of a majority of employes for negotiations continue to occur, but alleged violations . . . more often take the form of a refusal to discuss or negotiate a particular matter." Some matters fall in the bargaining area, others don't. But it added:

"The filing of unfair labor practice charges does not relieve an employer of the continuing duty to bargain. Neither does a union's resort to a lawful strike. . . . The fulfilment of the obligation to bargain becomes doubly important during a strike."

With respect to bargaining in "good faith," the board noted that stations have been cited for "demanding radical changes at the 11th hour in negotiations." This the board took to be evidence of an insincere desire to reach agreement with the union. Other samples: "A sudden and unexplained shift in its bargaining position" and demand for a "much shorter contract."

Suppose a broadcaster invokes the free speech guarantees of the Constitution and promises employes greater benefits than they would otherwise obtain from a union?

Such speech is not "protected" and interferes with employes' rights, the board said.

Specifically, the first amendment was held not to protect statements made by Valley Broadcasting Co. (identified as licensee of WSTV Steubenville, Ohio) which allegedly sought to induce employes to accept benefits in individual agreements as a condition to their "abandonment of the union."

Despite their involvement in labor disputes no broadcasters were involved in petitions for injunctions during the year.

NLRB was confronted with its greatest workload in the 16 years of existence during fiscal 1951, which ended last June 30, with over 15,500 unfair labor practice and representation cases filed. Total of over 15,000 cases were closed and another 5,000 were still pending, the board reported.

In the wake of a law that upset the traditional labor advantage of the original Wagner Act but still retains appreciable benefits for unions, it will be noted that 79.1% (or 4,164) of all unfair labor practice charges were filed against employers, with formal complaints issued in 630 cases.

Other facts: Some 6,000 representation elections were held, with bargaining agents chosen in 73% of those instances. These agents represented 76% of those employes eligible to vote. Over $2 million was paid out to 7,000-plus employes in back pay during fiscal 1951 because of "illegal discrimination."

6,842-to-1 Return

JUST ONE WGY Schenectady announcement brought an avalanche of 6,842 letters and post card replies. Howard Tupper, WGY senior staff announcer, made the announcement on an unsponsored 7:05 a.m. *Weather Show.* Mr. Tupper asked listeners to tell him what value they placed on his weather program. Answers came from 611 towns and cities in 69 counties of seven northeastern states. Many respondents said they place great value on the program in conducting their daily business.

BASEBALL PLUGS

Boost WEMP Audience

NEW ANGLE in promoting listenership for the Milwaukee Brewers baseball team has been inaugurated by Mathisson & Assoc. there, agency for the Miller Brewing Co., exclusive sponsor of broadcasts of the team's games over WEMP-AM-FM Milwaukee.

Under the direction of Edward G. Ball, the agency recorded the voices of the team's 15 best known players. Spots invite listeners to the ball park for home games. Each spot is introduced by sportscaster Earl Gillespie.

After the player's voice, an announcer tells listeners to tune in to the Miller High Life baseball broadcast if they can't attend the game. Different tapes of players are used to ask listeners to tune in on games when the team is on the road.

ANPA 'ATTACKS'

Refuted Over WMSC

REBUTTAL to newspaper ads prepared by the Bureau of Advertising of the American Newspaper Publishers Assn. was aired in a new analysis by Gren Seibels, news director at WMSC Columbia, S. C., according to C. Wallace Martin, general manager.

In his talk Mr. Seibels accused newspapers of going "out of their way to criticize radio and television." He said many of the nation's newspapers are running a series of full-page "attacks" which amount to a "rough and tumble, knock-your-competition promotion campaign."

Refuting "implication" in the ads that radio programs reach only fractions of the total public such as sports show fans and women's show listeners, he said smart advertisers already know this and spend their money to reach the audience they want at rates cheaper than that of newspapers, instead of circulating their advertisement "to an audience that will not or cannot respond."

Speaking of news interpretation he said a reader in South Carolina who limited himself to the editorial columns would assume the state was "truly a Garden of Eden; that its politicians and office holders are above and beyond reproach; that the state needs nothing more complicated or serious than a few more traffic lights and more highly enriched hominy grits and bigger and better flower arrangements to become a complete paradise on earth.

"In Columbia," he said, "the citizen who wants an outspoken discussion of public affairs must perforce, turn on his radio."

Sterling Speaks at WBZ

FCC Comr. George Sterling met with members of the broadcast industry last Thursday at WBZ Boston's Radio-TV Center and addressed the group on "The Radio Broadcasters Part in Civil Defense." Talk explained the function of Conelrad to the eastern New England broadcasters.

KGW

THE *People's Choice* IN PORTLAND, OREGON

1,246,540 active, young-minded Westerners comprise KGW's market in 12 big, prosperous metropolitan Oregon counties, plus a generous slice of Southwestern Washington.

REPRESENTED NATIONALLY BY EDWARD PETRY & CO., INC.

programs promotion premiums

AIRING of WJZ New York program, *Kitchen Capers*, has begun from the Circle Lounge of New York's Hotel Governor Clinton. Show features Glenn Riggs, in question-and-answer giveaway program. In attendance the first day were Ted Oberfelder, vice president, ABC, and Lansing P. Shield, president of Grand Union Stores.

SPACE CADET' KITS

ALADDIN INDUSTRIES, makers of metal lunch kits and vacuum bottles, has received a franchise from Toni Mendez Inc., exclusive licensor for *Space Cadet* merchandising. The kits bear a picture of several *Space Cadet* characters. Complete with fresh coffee and cake, the kits were sent to the press last week to promote introduction of the item.

WEATHER PROMOTION

WEATHER reports are being promoted by KPQ Wenatchee, Wash., with such tricks as a recent letter-writing contest awarding a weather map as prize for a letter on the subject, "Should our weather man sing the weather report?" General Manager James W. Wallace reported winner signed himself "Chief Big Smoke" and suggested an Indian war dance instead to "change" weather when needed.

TOT LISTENERS SURVEY

STUDY of tot listening reaction to *Captain Glenn's Play Club*, a half-hour morning children's show on WLWT (TV) Cincinnati, will be made by Dr. Ruth I. Smith, assistant professor of kindergarten and primary education at the U. of Cincinnati, according to John T. Murphy, TV vice president for the Crosley stations.

WTAM'S CHAIN LIGHTNING

CHAIN LIGHTNING merchandising plan of WTAM Cleveland got a boost when 41 super stores were added to the plan by Acme, which it reports the oldest food chain in Summit county. Additions bring total to 389 stores and food markets saturating 21 counties, according to Eugene R. Myers, new WTAM merchandising manager.

VACATION CONTEST

PROMOTION feature has been devised by Stewart MacPherson, star of WCCO Minneapolis-St. Paul's *Sportingly Yours*, to sell Rock Spring Beverages and publicize his program. Listeners are asked to send in the "most interesting, original and thought-provoking question," accompanied by a beverage label. Two winners will receive week's vacation at beach resort. Beach resort itself is mailing scenic postcards calling attention to contest on Mr. MacPherson's show. Other winners will receive sporting equipment, mailed by the beverage company and Erwin, Wasey & Co. Inc.

TV MEETS GRADUATES

BROCHURE to acquaint those in the TV industry with Syracuse U.'s coming TV graduates has been mailed out by the university. Booklet, titled "Ready One! Take One!" is done in year book fashion with portraits of each graduate and information concerning his background and capabilities.

MBS 'FLASH FEATURES'

"FLASH FEATURES," twice-monthly clip sheet distributed to newspapers by MBS, devoted one issue exclusively to MBS radio coverage of the national political conventions this summer, with each story bylined by a top MBS commentator.

WCAU'S TV TOUR

TELEVISION tour of WCAU Philadelphia's new Radio-TV Center was held a fortnight ago taking viewers behind the scenes at the new building and showing the inner workings of a radio-TV station. Program was telecast daily for 15 minutes through May 26. Official dedication of the center was held May 27. Charles Vanda, vice president in charge of TV, handled the shows.

'OPERATION HEAT WAVE'

FOR the first time, WRC Washington is offering a special discount plan for advertisers whose products move best when the sun is hottest. From May 25 through Sept. 25, advertisers are offered 20-second stationbreak announcement. Station will accept "hot weather" advertisers only under "Operation Heat Wave" plan. Each advertiser must agree to minimum of $500 for spots to be used at the advertiser's discretion anytime during the four-month period.

POOL TELECASTS

HOUR long Sunday show is being telecast by KNBH (TV) Hollywood from the pool of the Town House in Los Angeles featuring fashions, news and interviews. Anita Louise, film star, acts as hostess of the program designed to show Hollywood as the fashion center of the West.

WMIL NEWSPAPER AD

READERS of the *Milwaukee Sentinel* were asked this question by WMIL Milwaukee: "Do You Know That You're Worth Just 1/20th of a Cent?" Ad then explains, "That's right. When an advertiser figures what it's going to cost him to tell you his story, you're worth just exactly one-twentieth of a cent!" The advertisement said that advertising reduces costs and that this was especially true of radio, because it is so economical. Special plug is given for WMIL's *Family Party* featuring "Fritz the Plumber".

WLW FARM PAMPHLETS

CROSLEY Broadcasting Corp. will distribute pamphlets to more than 6,000 persons expected to take part in the annual visit to Everybody's Farm, operated near Mason, Ohio, by WLW Cincinnati. The 137-acre farm, site of WLW's 710-ft. tower, features the most modern agricultural methods. Three WLW programs originate from the farm.

WRVA SCHOLARSHIP

COMPLETION of a 13-week cycle of quiz programs which gave $4,200 in college scholarships to winning high school contestants has been announced by WRVA Richmond, Va. *Scholarship Quiz* was conceived by Sam Carey, WRVA program service manager. Program was sponsored by WRVA and the U. of Richmond. Nearly 1,500 man hours went into the planning and production of the 13 half-hour broadcasts which were produced by Ray Kennedy, of the WRVA production staff. Series drew praise from Virginia educators and newspapers.

WEAU COLOR MOVIE

NOVEL "Down to Earth" luncheon sponsored by WEAU Eau Claire, Wis., in Minneapolis, featured a color motion picture of the WEAU 1951 Wisconsin Plowing Contest and Soil Conservation Day, produced by Bob Nelson, program-promotion director, with the sound track made in WEAU studios. About 70 time buyers, advertising and promotion managers from Twin City agencies attended.

ROUNDTABLE SERIES

SERIES of roundtable programs on civic affairs with a panel of members of the London Junior Chamber of Commerce was recently broadcast by CFPL London, Ont. The program won the "award of achievement" of the national association of Junior Chamber of Commerce. CFPL not only aired the program each week, on a public service basis, but also helped produce the programs with training and technical advice.

FASHION SHOW

FASHION show featuring 80 models showing the latest in spring and summer finery was sponsored short time ago by WARA Attleboro, Mass. Nine shops which advertise on the station were represented at the show proceeds of which went to charitable organizations in the city. Affair, which was coordinated by Jo Sherman, station women's director, is scheduled for annual production.

Extension of Completion Date

WEEK Peoria, Ill.—Mod. CP which authorized change in DA for extension of completion date.

WBUD Trenton, N. J.—Mod. CP which authorized change in frequency

TV Interference

COMPILATION of magazine articles on TV interference (TVI), with recommendations for overcoming various types, is contained in the second edition of *Television Interference*, edited by Philip S. Rand and published by the Remington Rand Lab. of Advanced Research, South Norwalk, Conn. More than 20 articles are contained in the volume, reprinted from such technical and lay magazines as *QST*, *CQ*, *Electrical World*, *Electrical Manufacturing*, *Radio & Television News*, *Business Week*, *Radio-Electronics*. In its first edition, over 20,000 copies were distributed free of charge. Of interest is an article on "TVI From 21 Mc," published in the December 1948 *QST*. Amateurs began using the 21 mc band early this month and potential interference to TV receivers using the same band for IF circuits has caused concern [B•T, May 5].

LATEST LIST of independent stations now being serviced by Press News Ltd., radio subsidiary of Canadian Press, now totals 89 stations. In addition, Canadian Press supplies Canadian Broadcasting Corp. with full service, from which CBC writes own newscasts.

ELECTRONICS VIEW

Parris of NPA Optimistic

"BARRING a change in the international situation, it should be possible to meet defense and civilian demands for electronic products by a continuation of the splendid conservation efforts of the post-Korea period."

That outlook was held out by a top government electronics official for production of new and replacement parts for millions of radio-TV receivers during 1952.

At the same time, the official—Donald S. Parris, deputy director of the National Production Authority's Electronics Div.—paid high tribute to manufacturers and distributors for ingenious conservation and substitution techniques.

Mr. Parris addressed a management session of the 1952 Electronic Parts Show, held at the Conrad Hilton Hotel in Chicago the past fortnight. He spoke on availability of materials and use of distributors' priorities to obtain them.

Meanwhile, NPA held another round of discussions with members of an Antenna Manufacturers Industry Advisory Committee. Conference touched on inventories, materials for different types of antennas and a growing replacement market.

Mr. Parris reported that the receiving tube industry reduced use of nickel 50% by substituting nickel-plated steel and aluminum-clad iron without reduction in quality. Speaker manufacturers cut weight of alnico magnets 45%, saving vital quantities of nickel and cobalt. TV set-markets substituted electro-static deflection-type tubes for electro-magnetic, saving 40% of the same scarce materials.

"The tonnage saved will be greater as more television receivers designed for these tubes are put in production," Mr. Parris noted.

Other savings were accomplished in TV receivers, with reduction of 50% in steel usage through improved designs; in selenium rectifiers designed for those sets, and in general use of copper wiring, with 85% saved in latter.

Gives Outlook

Latest glance at the prospects for availability of critical metals in consumer radio-TV appliances — since the outlook was weighed last month [B•T, May 12]—was supplied by Mr. Parris.

(1) Aluminum supply will rise in 1952, but so will demand because of new uses and substitutions for copper, with no large-measure improvement before early 1953; (2) copper may remain tight in the next year—its outlook is the "most discouraging"; (3) nickel and cobalt will remain scarce for "the duration"—the electronics industry consumes 6% of the supply at present; (4) tungsten, like the last two, is critical but should ease up.

"The demand for selenium rectifiers is increasing greatly due to military and civilian use in TV and radio industry. The increase of rectifiers in the television field resulted in conservation measures saving silicon steel and copper in addition to rectifying tubes," Mr. Parris explained.

The supply has "greatly improved" and the outlook is "hopeful" for 1952 as a result of complete allocation of selenium, the NPA official said.

Normal Inventories

Antenna-makers reported inventories normal for all types and growth of the replacements market. This has been true among homeowners using home-set or house top antennas and TV stations using tower antennas. Number of electrical storms and rampaging winds throughout the country have jumped broadcasters' demand for equipment, it was revealed.

Along with these factors, growth of community TV antenna systems and resultant boost in applications for materials were cited. Such projects are now classified as industrial and eligible for self-authorized orders.

BOARD of directors of Philco Corp. have declared regular quarterly dividend of 40 cents per share on company's common stock payable June 12 to holders of record June 2. Also declared was regular quarterly dividend of 93¾ cents per share on preferred stock, 3% Series A payable July 1 to holders of record June 16.

NPA SHAKEUP

Set for Electronics Div.

INTERNAL reorganization of the Electronics Div. at the National Production Authority was being blueprinted last week, with personnel changes bearing directly on handling of applications for scarce materials by radio-TV manufacturers.

Changes involve Components, End Equipment and Electron Tube branches of the division headed by J. A. Milling, with appointments from both government and industry ranks.

Robert R. Burton, former State Dept. telecommunications specialist and communications officer for the Federal Civil Defense Administration, becomes chief of end equipment. He transfers from NPA's Foreign Section, which will remain under his jurisdiction. J. A. Pfau will head the latter group.

Mr. Burton succeeds J. R. (Ted) Sypher, who had served as acting director of end equipment since Mr. Milling vacated the post for the division directorship earlier this year. Mr. Sypher becomes special assistant to Mr. Milling in the office of the Director. He will serve as special NPA representative on the Electronics Production Board and continue in charge of the Military Equipment Section.

Two radio-TV executives—George Henyan of General Electric and Nelson Stewart of Westinghouse Electric Corp.—return to private industry. A third—Harold G. Butterfield of National Union Radio Corp.—becomes chief of NPA's Electron Tube Section.

Mr. Henyan, who supervised components applications, returns to GE's Tube Div., of which he was assistant to the general manager, after eight months' service. He is succeeded by Elmer Crane, of TV Distributors Inc., Cleveland, formerly with the War Production Board, handling radio and radar.

Mr. Butterfield is on leave from Union Radio, manufacturers of electron tubes, of which he is director of purchases. He also is familiar with the TV broadcasting phase of industry—his wife, Elizabeth, is assistant director of educational activities for WATV (TV) Newark, N. J.

The realignment calls for an Office of Director, and three branches—End Equipment, Components, and Programs & Requirements. Plan and personnel changes still must be approved by H. B. McCoy, NPA assistant administrator. Each branch is divided into sections, such as Radio-TV under Lee Golder, Broadcast-Communications Equipment under J. Bernard Joseph, and others.

Mr. Milling, on leave from RCA Service Co., has been division director since the resignation of E. T. Morris Jr., who returned to Westinghouse earlier this year. Mr. Morris presently is active as government liaison representative for the company, among other duties. Donald S. Parris continues as deputy director of the Electronics Div. under Mr. Milling in the reorganization.

KVVC REORGANIZES

Humbert New V.P., Mgr.

C. A. HUMBERT, manager of KPAS Banning, Calif., was named vice president and manager of KVVC Ventura, following its reorganization by W. H. Haupt, KVVC owner. Other changes also were announced.

New sales manager is Karl Rembe, formerly account executive. Andrew Grant, program-farm director, KCID Caldwell, Ida., joins the station as merchandising-promotion director. Alan Snowden, staff announcer, was promoted to program director. Representing station as sales manager in Oxnard is Lyle Kearney, formerly advertising manager, Oxnard *Press-Courier*, KVVC has joined the Southern Calif. Broadcasters Assn.

NBC radio in cooperation with Health Information Bureau, N. Y., non-profit organization, to present new series, *Your Key To Health*, slated to begin June 7, 5:45-6 p. m. EDT. Series will feature singer Jane Froman, and NBC commentator Ben Grauer reporting health news.

WILBUR SHAW (l), Indianapolis Motor Speedway president, signs an agreement permitting broadcast of this year's race by WIBC Indianapolis, through which WIBC will feed 20 midwestern stations. Gil Berry (c), WIBC general sales manager, and Fred Ritter, Capitol Paper Co. of Indianapolis, local sponsor, look on.

RADIO-TV STORES

NLRB Cites Jurisdiction

QUESTION of whether the government has jurisdiction over business and labor operation of local radio-TV appliance dealers was resolved affirmatively by the National Labor Relations Board in a recommended decision May 24.

A board examiner found that J. C. Justice, trading as National Television Service, Memphis, Tenn., falls within interstate commerce, and that he committed unfair labor practices as charged by Local 1275 of IBEW (AFL). Respondent operates two stores—in Memphis and West Memphis, Ark.—and is servicing agency for Hallicrafter, Sentinel, Philco, Emerson, Motorola and DuMont sets.

An examiner said NLRB exercises limited jurisdiction over an enterprise which: (1) annually sells goods or services valued at $25,000 or more, out of state; (2) furnishes goods or services necessary to operation of other employers in commerce; (3) secures equipment from out-of-state sources valued at $500,000 or more annually; (4) purchases from local distributors in-state material received out-of-state; (5) is multi-state (like NTS) even though it distributes only locally.

WKBS Oyster Bay, L. I., N. Y., is now operating from its new combo studio at transmitter in Oyster Bay. Move was made in anticipation of extensive shows from its new Stamford, Conn., studios, five stories above street.

NEWS RIGHTS

Mundt Differs With Gillette

SEN. KARL MUNDT (R-S.D.) differs with Sen. Guy Gillette (D-Iowa) as to whether newsmen have the right to refuse to disclose their confidential sources of information [B•T, May 26]. Sen. Gillette had placed in the *Congressional Record* a study by his Senate Elections subcommittee staff pointing out "in the absence of a statute creating such a privilege, there is none."

Sen. Mundt said that although a newsman has no special immunity for information received about future crimes, or cases involving loyalty, or the security and safety of the country, "in the normal run-of-the-mill cases, wherein a newsman is trying to discuss and report the public business, he certainly has the right—and the duty—to protect his sources." Forcing a reporter to disclose news sources would hamper newsmen's efforts "to unearth and disclose bumbling and corruption in government," he said.

B-47 BROADCAST

Carried by KFH From Plan

IN-FLIGHT broadcast from the interior of a B-47 Stratojet has been claimed by KFH Wichita, Kan., with commentary handled by Brandon Chase, station newscaster.

Mr. Chase accompanied a photographer, Gary Millsap, and the pilot, Capt. Herbert White, on a transition training flight from the Wichita air base last Monday. Contact was maintained with the air base where KFH Chief Engineer Virgil Hinshaw was on duty.

The actual broadcast covered pre-flight briefing, the takeoff and a two-hour flight, with portions re-broadcast on the station's *Silver Star News* at 10 p.m.

Mr. Chase explained that KFH wanted to bring the public the entire story of how it felt to fly in a B-47. Station claimed it was the first time in aviation annals a radio newsman compiled such a broadcast from a B-47 during flight.

May 28 Decisions . . .

BY COMMISSION EN BANC

Granted License Renewals

Following stations granted renewal of licenses for regular period:

KTHS Hot Springs, Ark.; WJBW New Orleans; WGCM-FM Gulfport, Miss.; KDMS El Dorado, Ark.; KVMA Magnolia, Ark.; WLCS-FM Baton Rouge, La.; WDSU-FM New Orleans; WBEN Buffalo; KMUW Wichita, Kan.; KTBB Tyler, Tex.

Granted renewal of licenses for regular period of WHAM-TV Rochester, N. Y. and WSYR-TV Syracuse, N. Y. subject to orders issued in final TV decision requiring WHAM-TV to move from Ch. 6 to Ch. 5. and WSYR-TV to move from Ch. 5 to Ch. 3.

Temporary License Renewal

Following stations granted temporary extension of licenses to Sept. 1, 1952:

KHBL Plainview, Tex.; WGCH (FM) Greenwich, Conn.; WKSU-FM Kent, Ohio; KXA Seattle.

Temporary License Extension

KHIT Lampasas, Tex.—Designated for hearing application for renewal of license and ordered temp. extension of license until conclusion of this proceeding or until Aug. 1, 1953, whichever is earlier.

Changes Studio Location

WCAU-AM-FM Philadelphia — Mod. AM FM licenses to change location of main studio to site outside city limits of Philadelphia which is not trans. site.

FCC Correction

Correction in May 22 Decisions [B•T, May 26] follows:

Commission proposed to Amend Revised Tentative Allocation Plan for Class B FM Broadcast Stations by adding Ch. 279 to Berlin, N. H., and transferring Ch. 273 from Birmingham to Jasper, Ala. Interested parties may file comments on or before July 1, 1952.

UNIONS MERGER

May Not Meet TvA Deadline

AFTER two weeks of excitement —resulting from the first draft of a plan to merge all major unions belonging to the Associated Actors and Artistes of America—relative quiet prevailed on the East Coast last week.

Plan had been explained in Chicago the previous week, and West Coast entertainment unions heard details last Monday. It was expected that labor-management specialists from the U. of California at Los Angeles and Cornell U., architects of the "blueprint," would revise their proposals in accordance with the suggestions various unions have made.

Labor officials in New York were estimating last week that the final plan would not be returned to them before mid-June, perhaps later, which meant that the deadline of July 1, set by Television Authority, would probably not be met. Although memberships of a few unions have heard explanations of the plan, detailed discussions have remained on the officer-level in all unions affected: Actors Equity and Chorus Equity Assns.; American Guild of Variety Artists; American Guild of Musical Artists; American Federation of Radio Artists, and TVA.

PROFILE article on Hazel Markel, women's commentator on MBS and WWDC Washington, appeared in May 8 issue of *Redbook* magazine. Feature is titled "She Makes Washington Headlines."

FCC roundup

New Grants, Transfers, Changes, Applications

box score

SUMMARY THROUGH MAY 28

	On Air	Licensed	CPs	Appls. Pending	In Hearing
AM Stations	2,350	2,328	87	328	217

New Applications . . .

TRANSFER REQUESTS

KPAS Banning, Calif.—Assignment of license from Byron-Wood Motors, d/b as Pass Bcstg. Co., to Kenneth L. Colborn for $10,400 cash. Mr. Colborn is owner of The Center Inc., which controls business property in Palm Springs, Calif.

KSON San Diego, Calif.—Transfer of control from Studebaker Bcstg. Co. to C. Frederic Robell and Dorothy Johnson, d/b as KSON Bcstrs. Change from corporation to partnership; no actual change of ownership or control. No monetary consideration.

KXOB Stockton, Calif.—Transfer of control from Valley Bcstg. Co. to Hotel Stockton for $200,000. Lincoln Deller is sole owner of Valley Bcstg. Co., transferor. Transferee is composed of President Clem J. Randau (54%), director and minority stockholder of WNEW New York; Secretary-Treasurer Sherrill C. Corwin (15%), Corwin Theatre Corp., Los Angeles; Ralph E. Stolkin (15%), president of Empire Industries, Chicago, and vice president and 25% owner of National Video Corp., Chicago (television tube mfr.); Edward G. Burke Jr., partner in Ryan, Hayes & Burke, oil operators, and Beatrice M. Randau (1%).

WCNH Quincy, Fla.—Transfer of control from Quincy Bcstg. Corp. to Andrew B. Letson for $18,400 through transfer of control of 320 shares out of 500 shares of stock. Mr. Letson is general manager of WCNH.

WTCN-AM-FM Minneapolis, Minn. — Assignment of license from Mid Continent Radio-Television Inc. to Minnesota Television Public Service Corp. for $275,000 (contingent on grant of assignment of license of WCCO to Midwest Radio-TV Inc. [B•T, May 26, 12; April 21, March 10]). Principals in transferee include President Robert Butler (68.63%), former U. S. Ambassador to Australia and Cuba, president of Walter Butler Co., Walter Butler Building Co., Walter Butler Construction Co. and Walter Butler Shipbuilding Co.; Vice President Alvin Gluek (7.84%), president of Gluek Brewing Co., Secretary-Treasurer Quentin David (1.96%), general manager David Inc. Adv. Agency, St. Paul; Bror Dahlberg (4.9%), general advisor to board of Celotex Corp., Minneapolis; Lester Mample (1.96%), district manager for St. Paul district, GE Supply Corp.; Samuel Lipschultz (3.92%), St. Paul attorney, and seven others with less than 1% each.

KPUY Puyallup, Wash.—Assignment of license from Clarence E. Wilson to partnership composed of Mr. Wilson and P. D. Jackson, d/b as Radio Station KPUY. Messrs. Wilson and Jackson are equal partners owning KWCO Chickasha, Okla., KTMC McAlester, Okla., and applicants for new TV station in Oklahoma City, Oklahoma. Mr. Jackson will pay about $15,130 for his interest.

RIOT COVERAGE

KIDO Crew On-the-Scene

COMPLETE coverage of the country's sixth major prison riot in two months was given by KIDO Boise, Ida., on May 24 when 300 rioting convicts in Idaho State Penitentiary staged a five-hour uprising. KIDO special events men Wiff Janssen, Wayne Davis, Harold Toedtmeier and Jack Link were on the scene with portable recorder, jeep and shortwave transmitter immediately after the alarm sounded.

The station broadcast the negotiations between Warden L. E. Clapp and the prisoners' grievance committee in the prison yard, including the break-down of talks, the command to open fire with tear gas, the firing and "crying" reports on the effects of the gas.

Tape recordings were shuttled back to the studios and supplementary reports were made direct by telephone. After the riot, KIDO's recorder broadcast damage results and assembled and edited an hour-long program rebroadcast the same evening.

BAB BROCHURE

Cites Radio Quantity

SHOWING how radio in 1952 stacks up in quantity against some of the simplest necessities of life in the U. S., a king-size, circus-style brochure has been issued by BAB to its members.

Titled "Take Your Choice," the book presents words like "huge," "enormous," "immense," "vast," "widespread," as synonyms for radio. In a comparison with the number of household appliances, beds, bathtubs, telephones and other criteria, the presentation shows that radios are more numerous than any of them. Intended to interest advertisers not now using the medium, the final comparison points up radio's leadership over other advertising media.

NEWSPRINT BLOCK

Counter-Actions Started

CONGRESSIONAL forces last week joined with government agencies to lead a three-pronged assault on the newsprint roadblock set up by Canadian manufacturers against U. S. newspaper publishers.

The situation took on a more critical note with a warning by Price Stabilizer Ellis Arnall that the price boost would mean an increase in newspaper advertising rates and cost of products advertised.

The protests of a fortnight ago [B•T, May 26] crystallized into concrete action on Capitol Hill, with these developments:

● A House Interstate & Foreign Commerce subcommittee last Monday took closed-door testimony on the proposed $10-per-ton Canadian newsprint increase from the American Newspaper Publishers Assn., the Office of Price Stabilization and the National Production Authority. ANPA opposed a suggestion that the U. S. place import ceiling on Canadian newsprint.

● A House Judiciary Subcommittee on Monopoly called in officials of the Justice and Interior Depts. and Defense Production Administration, as well as NPA and OPS. Chairman Emanuel Celler (D-N. Y.) said American publishers are "helpless" in the face of the price hike, but his group would issue a report on its recommendations.

● Sen. Francis Case (R-S. D.) sponsored legislation to set up a joint Senate-House committee to "formulate a national policy" to meet newsprint needs.

Method Doubles Load

METHOD of doubling message-carrying capacity of long distance radio circuits without requiring additional radio channels has been developed by the Signal Corps, the Army Dept. has announced. Circuits can be modified to carry 12 printed messages on radio-teletype-writer. Importance of conserving scarce channels in the radio spectrum for long-range communications was cited as an advantage of the new method.

BROADCAST MUSIC INC. 580 FIFTH AVENUE
NEW YORK • CHICAGO • HOLLYWOOD NEW YORK 19, N. Y.

TR Plans Expansion

(Continued from page 25)

may be involved.

One staff report recommending a ban on all functional services was rejected by the FCC some time ago, according to informed sources.

Asked what action the Commission might take on transit radio, now that the Supreme Court has issued its decision, one FCC staff member last week observed that with Supreme Court approval the Commission could hardly be expected to act unfavorably.

The existing transit radio industry is centered around operations in a dozen cities. In the Supreme Court's decision last Monday, a list of cities having transit programs was included. It showed, as of October 1949: St. Louis, 1,000 vehicles equipped; Cincinnati, 475; Houston, 270; Washington, 220 (now 422); Worcester, 220; Takoma, Wash., 135; Evansville, Ind., 110; Wilkes-Barre, Pa., 100; suburban Pittsburgh, 75; Allentown, Pa., 75; Huntington, W. Va., 55; Des Moines, 50; Topeka, Kan., 50; suburban Washington, 30.

Transit Radio Inc. lists the following stations in its present list: WWDC-FM Washington; WKRC-FM Cincinnati; KXOK-FM St. Louis; WGTR-FM Worcester, Mass.; WKJF (FM) Pittsburgh; WBUZ (FM) suburban Washington; KTNT (FM) Tacoma, Wash.; WTOA (FM) Trenton, N. J.; KCMO-FM Kansas City; KCBC-FM Des Moines.

Instrumental Selections

In Washington, the Capital Transit Co. programs are limited to six minutes of commercial announcements an hour, or 12 30-second announcements. As generally is the practice, musical programs are confined to instrumetal selections.

E. Cleveland Giddings, vice president of Capital Transit Co., said the firm "is naturally pleased" and is considering installation of radio in all of the company's 1,500 vehicles. At present 422 vehicles are equipped.

He said Capital Transit gets about $2,530 monthly revenue on a minimum guarantee of $6 per month per vehicle equipped. The contract provides the company gets either 10% of gross or $6 per vehicle, which is greater, on radio income up to $100,000; $100,000-$200,000, the company gets $10,000 plus 20% of income over $100,000; $200,000-$400,000, $30,000 plus 33%; sliding scale ranges up to 50% of gross above $600,000.

While the prolonged litigation hurt transit radio, national more than local advertising suffered.

In some cities, transit programming is linked with other functional services such as storecasting and industrial music. WWDC-FM, for example, supplies music to Washington Transit Radio Inc., which in turn is half-owner of Tempo Inc., supplying music to some 200 restaurants and other places.

Mr. Strouse said WWDC-FM (Washington Transit Radio) was "overjoyed" and said the transit radio interests had felt the issue was never in doubt. "Transit radio, the newest medium of mass communication, can now move forward and assume its rightful place in the broadcasting industry," he added. "Our only desire now is to make Transit Radio in Washington a still better medium for dissemination of news and enjoyment of the best in accepted music."

NEW HOME of KFMB-AM-TV San Diego, 5th & Ash Sts., boasts five stories and new TV studios. TV has first and second floors, radio will be on the fifth floor and the third and fourth floors will be leased out for office space, said John A. Kennedy, board chairman, Kennedy Broadcasting Co.

Franklin S. Pollak, Washington attorney who carried the fight into the courts, praised Justice Douglas' dissent and said he believed it "will in time be the law."

Bernard Tassler, managing editor of the *American Federationist,* official AFL monthly magazine, issued a statement on behalf of the National Citizens' Committee Against Forced Listening. As national chairman of the committee, he said it "will continue to press for effective legislation to put a stop to this unfair assault upon the captive audience riding in public transit vehicles. It should be noted once again that the device of forced listening—inflicted upon captive audiences—is used by Stalin and was formerly used by the late Adolf Hitler and the late Benito Mussolini."

Widespread newspaper comment was aroused by the decision. The Washington *Daily News,* a Scripps-Howard paper, denounced the decision and then hopefully reminded that it is in the business of selling advertising space in competition with transit.

The Washington *Star* took two opposite positions. On its editorial page, the *Star* said, "The court of appeals, inventing the doctrine of 'freedom of attention,' had outlawed the programs on constitutional grounds. And it did this by a strained process of reason which, if allowed to stand, might well have opened the door to many more ills than it would ever cure."

But in its radio-TV column, "On the Air," the *Star* called Monday "a dark day . . . for us unwilling radio listeners" and raised the spectre of the old FCC Blue Book. "Its blue is faded and its pages yellowed, but the words are still clear," the column said.

One Issue Involved

The case boils down to one issue, said Justice Burton in delivering the court's opinion—whether the Constitution precludes a transit firm from carrying radio programs in its vehicle. He stressed the fact that the District of Columbia Public Utilities Commission had held an investigation, with public hearings, and had found the service not inconsistent with public convenience, comfort and safety and actually tends to improve conditions under which the public ride.

Rider polls showing well over 90% of passengers favoring continuance of the programs were cited, along with experience in other cities. The court found that neither the operation of transit radio service nor the PUC decision permitting its operation is precluded by the Constitution, reversing the U. S. Court of Appeals ruling which had held passengers were deprived of liberty without due process of law.

The income-producing side of transit radio "bears some relation to the long-established practice of renting space for visual advertising on the inside and outside of streetcars and buses," Justice Burton wrote. He cited program content of 90% music, 5% news, etc., and 5% commercial advertising, concluding there is no basis to set aside the PUC decision.

The majority opinion found no violation of the First Amendment, again citing the PUC decision and the fact that no substantial interference with passenger conversation or rights could be found. No claim of propaganda was involved, the court noted.

As to the appellate court's finding that passenger right of privacy is invaded, the majority held:

This claim is that no matter how much Capital Transit may wish to use radio in its vehicles as part of its service to its passengers and as a source of income, no matter how much the great majority of its passengers may desire radio in those vehicles, and however positively the Commission, on substantial evidence, may conclude that such use of radio does not interfere with the convenience, comfort and safety of the service but tends to improve it, yet if one passenger objects to the programs as an invasion of his constitutional right of privacy, the use of radio on the vehicles must be discontinued. This position wrongly assumes that the Fifth Amendment secures to each passenger on a public vehicle regulated by the Federal Government a right of privacy substantially equal to the privacy to which he is entitled in his own home. However complete his right of privacy may be at home, it is substantially limited by the rights of others when its possessor travels on a public thoroughfare or rides in a public conveyance.

The court rejected the contention of transit radio opponents that an objector has the right not to be forced to listen to programs, holding that such an objector then could override the preference of the majority of passengers but also the federally authorized PUC. "The protection afforded to the liberty of the individual by the Fifth Amendment does not go that far," the court held. "The liberty of each individual in a public vehicle or public place is subject to reasonable limitations in relation to the rights of others."

Programming Not Considered

The court voiced no opinion on the desirability of radio programs in public vehicles, calling it a matter for PUC, the transit company and the public. The majority opinion concluded, "While the court below expressly refrained from stating its view of the constitutionality of the receipt and amplification in public vehicles of musical programs containing no commercial advertising and other announcements, it is clear that if programs containing commercial advertising and other announcements are permissible, then programs limited to the type of music here contracted for would not be less so."

A separate opinion by Justice Black agreed there was no violation of the due process clause and also that musical programs did not violate the First Amendment. He

Highlights of Supreme Court's Transit Decision

". . . neither the operation of the service nor the action of the Commission (Public Utilities Commission) permitting its operation is precluded by the Constitution."

"This (profit) aspect . . . bears some relation to the long-established practice of renting space for visual advertising on the inside and outside of streetcars and buses."

"There is no substantial claim that the programs have been used for objectionable propaganda."

"However complete his right of privacy may be at home, it is substantially limited by the rights of others . . . in a public conveyance."

"The liberty of each individual in a public vehicle or public place is subject to reasonable limitations in relation to the rights of others."

"This court expresses no opinion as to the desirability of radio programs in public vehicles."

". . . it is clear that if programs containing commercial advertising and other announcements are permissible, then programs limited to the type of music here contracted for would not be less so."

contended, though, that news, speeches, views or propaganda would violate the First Amendment.

Justice Douglas dissented, taking the view that the street car audience is captive. He pointed to the ability of a home tuner to turn off a program. A person in a public place can get up and leave, he added, but the man on the street car "has no choice but to sit and listen, or perhaps to sit and to try not to listen." He referred to the danger of putting such a weapon in the hands of a propagandist such as a dominant political or religious group. "Today the purpose is benign; there is no invidious cast to the programs," he wrote. "But the vice is inherent in the system. Once privacy is invaded privacy is gone. Once a man is forced to submit to one type of radio program, he can be forced to submit to another. It may be but a short step from a cultural program to a political program. . . . The right of privacy, today violated, is a powerful deterrent to anyone who would control men's minds."

Justice Frankfurter stayed out of the decision, saying in a separate opinion, "My feelings are so strongly engaged as a victim of the practice in controversy that I had better not participate in judicial judgment upon it."

Miracle Decision

In a decision based on banning of a motion picture, "The Miracle," the Supreme Court unanimously ruled that motion pictures are entitled to Constitutional guarantees of free speech and free press. This decision reversed the New York State Court of Appeals which had banned the movie on the ground it was "sacrilegious."

Justice Clark wrote, "Since the term 'sacrilegious' is the sole standard under attack here it is not necessary for us to decide, for example, whether a state may censor motion pictures under a blearly drawn statute designed and applied to prevent the showing of obscene films. That is a very different question from the one now before us. We hold only that under the First and Fourteenth Amendments a state may not ban a film on the basis of a censor's conclusion that it is 'sacrilegious'." He added that guarantees for freedom of speech and free press do not mean that the Constitution "requires absolute freedom to exhibit every motion picture of every kind at all times and all places."

ENGLISH UNION

Broadcasters Get Awards

DWIGHT NEWTON of KYA San Francisco, George Cushing of WJR Detroit, Hubert W. Kregeloh of WSPR Springfield, Mass. and Mrs. Evadna Hammersley of KOA Denver received English - Speaking Union awards last week for contributions to greater international understanding.

Messrs. Cushing and Kregeloh received their awards at a reception at the English-Speaking Union's headquarters in New York on Monday, while Mr. Newton received his later in the week in San Francisco through that city's CBSU branch in Denver. Katherine Fox of WLW Cincinnati, who was voted a special award, received it May 19 in London.

In addition to the broadcasting honors, awards were presented to six journalists.

Hill Coverage Report

(Continued from page 30)

tions "because the subcommittee's primary interest was to make a factual record."

Senate Labor and Public Welfare Committee—Newsreel camera coverage extensive, according to the report. Covered a host of subjects.

Senate Rules and Administration Committee — Newsreels covered study of congressional committee reform procedure.

Senate Select Small Business Committee—Radio-TV recordings for rebroadcast on testimony delivered on material shortages (Charles E. Wilson and William Harrison) in January 1951. Same type coverage March 1951 when Gen. Hershey testified on manpower problems. Again when hearings held October 1951 on steel gray market (at Pittsburgh) and TV on same subject in November 1951 Detroit hearings (radio recording broadcast on WJBK Detroit).

Senate Special Committee on Organized Crime (Kefauver unit) —Television, twice in Missouri; eight times in New York and New Jersey; twice in Louisiana; three times in Michigan; four times in Nevada and California; seven hearing days in Washington and twice in Florida, all 1951. Committee exercised judgment as to whether witness should be telecast or filmed, recorded, etc.

Joint Atomic Energy Committee—TV and newsreels permitted during probe of U. S. atomic energy project May 26 through July 11, 1949.

Joint Defense Production Committee—Mr. DiSalle testified before TV two days in June 1951 and newsreel camera coverage common.

Joint Economic Report Committee—No live TV but portions of January 1952 hearings (three days) on President's economic report used for TV. Newsreels covered other hearings. Newsreel camera use restricted upon request of the witness.

While this report is quite complete and certainly accurate from the viewpoint of a spot check, it has been noted that the report does not give adequate presentation of various recordings made for broadcast. It also is open to error because most congressional committees had to rely on memory.

However, this is the first report in print which attempts to round up media coverage on Capitol Hill.

SIX officers of the Florida Assn. of Broadcasters pictured at May 22 meeting at Miami Beach (see story page 83) are (seated, l to r): John B. Browning, WSPB Sarasota, FAB secretary-treasurer; George Thorpe, WCCG Coral Gables, president; Jerry Stone, WNDB Daytona Beach, second vice president. Standing (l to r): Tom Gilchrist, WTMC Ocala, FAB board member: S. O. Ward, WLAK Lakeland, outgoing president, and Eugene Hill, WORZ Orlando, FAB board member.

KOB SALE

FCC Grants Approval, Denies ABC Protest

CONSENT was granted by FCC last Friday to the sale of KOB-AM-TV Albuquerque by T. M. Pepperday for $600,000 to Time Inc. and ex-FCC Chairman Wayne Coy.

The Commission denied a petition by ABC to withhold action on the sale until FCC clears up the status of KOB on 770 kc, channel on which the network's WJZ New York operates as a Class I-A outlet [B•T, May 26, 19; April 28]. Comrs. Robert F. Jones and George E. Sterling did not participate in the ruling.

Under the transfer approved by the Commission, the stations will be sold to Time Inc. KOB's licensee, Albuquerque Broadcasting Co., will then be partially liquidated to place all fixed assets (including land but not the TV building) in the name of Michigan Square Bldg. Corp., a Time Inc. subsidiary, which will then lease the fixed assets and land to the licensee for eight years at appraised value of $450,000. Worth of Albuquerque Broadcasting thereby becomes $150,000, the application explained.

Time Inc. will sell a half interest in the licensee to Mr. Coy for $75,000. The ex-FCC chairman has been retained as manager of KOB-AM-TV for eight years at $26,000 annually. In addition, Mr. Coy remains as radio-TV consultant to Time Inc. at $24,000 annually.

Mr. Coy is to be president and treasurer of Albuquerque Broadcasting with his wife as secretary. Arthur R. Murphy Jr., manager of Time Inc.'s March of Time division, will be vice president. The new board will include Charles L. Stillman, Time vice president.

In its memorandum opinion and order granting the transfer, FCC conditioned the approval to whatever action the Commission may take to carry out the mandate of the U. S. Court of Appeals to reconsider KOB's status on 770 kc, opposed by WJZ.

The ABC petition, denied by the Commission, also sought dismissal of KOB's pending applications for modification of permit and license to operate on 770 kc and asked that FCC rescind KOB's special service authorization for 770 kc.

KOB authorized 1030 kc was shifted to 770 kc to prevent interference to WBZ Boston on 1030 kc.

DOHERTY TO DETAIL PLAN FOR STRIKE PREVENTION

RICHARD P. DOHERTY, NARTB employe-employer relations director and industry member of Wage Stabilization Board, asked by House Committee on Education & Labor to submit detailed plan for settlement of major national labor disputes.

Request made after Mr. Doherty had outlined strike-prevention formula removing settlements from political hands. In nutshell, Doherty formula provides for director of Federal Mediation Service to certify imminent strike to Attorney General, who in turn would ask U. S. District Court to act.

District judge would invoke Taft-Hartley Act procedure, issuing 80-day injunction for factual study. Workers would have chance to vote on best management offer. If no agreement, court would either order arbitration by panel whose decision would be binding or order government seizure while negotiations continue.

Companies would be precluded during seizure period from earning profits higher than current rate and no wage increases would be permitted nor would unions collect dues or levies from members employed in seized companies.

FCC CHIDES CBS

CBS was taken to task by FCC Thursday for failing to accord William R. Schneider, GOP Presidential candidate, equal opportunities given other Presidential candidates, noting mandate of Sec. 315 of Communications Act. Mr. Schneider, granted time on network's KMOX St. Louis, entered preferential primaries in New Hampshire and Oregon. In letter to network, FCC said in view of nature of Presidential and nationwide scope of broadcasts, fact that CBS owns no stations in two states where Mr. Schneider has entered primaries "is not relevant."

MOVE REMOTE PICKUP BAND

REMOTE PICKUP operations will be removed from 2000-3500 kc band effective May 1, 1953, to comply with 1947 Atlantic City Treaty, according to proposed rule making notice issued by FCC Thursday. FCC would permit use of channels in 25.85-26.1 mc band as alternative in addition to other bands now used. Major networks, many stations affected by order, but treaty provision has been long known, FCC said. Comments are due July 15.

FCC GETS CORNELL REPORT

TELEPHONE report of Cornell U. incident, in which campus station (WVBR) carried pranksters' fake newscasts about bombing of London and Marseilles, given to FCC Thursday by Ithaca, N. Y., city police. Ten masked youths "seized" WVBR for eight minutes. University officials branded incident as "practical joke."

WLAN ATTACKS REPORT

FURTHER attack on FCC's Sixth Report lifting TV freeze made Thursday as WLAN Lancaster, Pa., petitioned Commission to set aside show cause order transferring WGAL-TV there from Channel 4 to Channel 8. WLAN same time re-filed application for Channel 8. WLAN contended show cause action illegally denies it hearing on application required by Communications Act.

ABC GETS BOUT

HEAVYWEIGHT championship bout between Joe Walcott and Ezzard Charles, scheduled for Thursday in Philadelphia, will be broadcast by ABC Radio network as part of *Cavalcade of Sports*, sponsored by Gillette Safety Razor Co., Friday announcement indicated. Bout is in addition to regular ABC Radio Friday night fights, and is scheduled for 10 p.m. EDT to completion with Don Dunphy and Bill Corum as sportscasters. Telecasts of match to be carried by NBC network, as previously announced.

Business Briefly

(Continued from page 5)

13 weeks. Sunday show is aired 4 to 4:30 p.m. CTS. Agency, Roche, Williams & Cleary, Chicago.

RANGER RENEWED ● General Mills renewed *Lone Ranger* over full ABC Radio Network (Mon., Wed., Fri., 7:30-8 p.m. EDT) for 52 weeks effective last Friday. Program now in 20th year. Agency, Dancer-Fitzgerald-Sample.

LEVER ADDS MARKETS ● Lever Brothers (Lipton's tea) adding six more radio markets to its list for spot announcement campaign starting June 16 for six weeks. Agency, Young & Rubicam, N. Y.

OLD GOLD CANCELS ● P. Lorillard Co., N. Y. (Old Gold cigarettes), through Lennen & Mitchell, N. Y., cancels *Down You Go* on DuMont TV network effective June 13.

RADIO-TV SET OUTPUT SHOWS DECLINE FOR APRIL

PRODUCTION of radio and TV sets in April fell below March and same month year ago, according to Radio-Television Mfrs. Assn. estimate for entire industry. April output consisted of 847,946 radios and 322,878 TV sets compared to 1,337,042 radios and 500,000 TV sets in April 1951.

Of April radios 96% of home models were table sets. TV table models over 17 inches in size represented 19% of total compared to 8% in last quarter of 1951 and only 1% in last quarter of 1950. April output included 286,164 home sets, 110,529 portables, 275,250 auto and 176,003 clock sets. Production of clock radios has more than doubled since January.

Output for first four months of year follows:

	Television	Home Sets	Total Radio
January	404,933	288,723	632,455
February	409,337	312,705	759,453
March (5 weeks)	510,561	357,689	975,892
April	322,878	286,164	847,946
TOTAL:	1,647,709	1,245,281	3,215,746

THEATRE TV HEARING

OFTEN-DELAYED theatre television hearing was scheduled Thursday by FCC for Jan. 12, 1953, before Commission *en banc*. Proceeding will consider allocation of frequencies and promulgation of rules for theatre TV service. FCC indicated those who have not previously filed appearances may do so by Nov. 14 with list of witnesses and testimony subjects due Dec. 1.

PEOPLE...

AUSTIN JOHNSON, head of Benton & Bowles' store research department and member of its merchandising committee, appointed coordinator of merchandising for agency, reporting to Charles Pooler, vice president in charge of marketing.

LESLIE A. HARRIS, radio program presentation writer, promoted to radio account executive for ABC Radio Network by Charles T. Ayres, network vice president.

GEORGE OLESON, formerly of WEAM Arlington, Va., and Ohio-West Virginia stations, joins sales staff of WOL Washington under Sid Slappey, WOL sales manager.

LARRY SURLES, former WOR-TV New York salesman, join sales staff of NBC-TV's eastern division spot sales office today (Monday). He previously was manager of ABC co-op department and also has served with WATV (TV) Newark.

ROBERT J. WADE, NBC-TV executive coordinator of production development, named consultant to broadcasting division of Emerson College, Boston, for 1952-53 college year. He will visit college twice each semester for lectures and consultations.

TWO NEW APPLICANTS FOR TV STATIONS

TWO NEW television station applications were filed at FCC Thursday along with new amended bids and several requests for changes in channels and power boost (see early story, page 62).

Filing for first time: WBOC Salisbury, Md., for UHF Channel 16, ERP 112 kw visual, antenna height above average terrain 414 ft., cost $296,400; WDAN Danville, Ill., for UHF Channel 24, ERP 19 kw visual, antenna height 416 ft., cost $251,000. WDAN is owned by Gannet newspapers and is second TV application filed by Gannet-owned station in week.

Filing amended applications: WIOD - AM - FM Miami, Fla., for Channel 7, ERP 316 kw visual, antenna 437 ft., cost $1,259,957 (WIOD-AM-FM owned by *Miami Daily News*, James M. Cox newspaper); WHK-AM-FM Cleveland Ohio, for UHF Channel 19, ERP 223 kw visual, antenna 682 ft., cost $593,430 (WHK-AM-FM owned by *Cleveland Plain Dealer*).

Filing for change in channel assignments, under Sixth Report [B•T, April 14], were: WHIO-TV Dayton, Ohio, from Channel 13 to Channel 7; WTAR-TV Norfolk, Va., from Channel 4 to Channel 3, and WTMJ-TV Milwaukee, from Channel 3 to Channel 4.

KSTP-TV St. Paul, requested ERP increase from 24.7 kw to 100 kw.

INFORMATION DATA SOUGHT

FEDERAL agencies asked by Senate subcommittee probing government censorship to furnish regulations issued under President Truman's information security order. Chairman Blair Moody (D-Mich.) made public letter to all agencies asking details of each public information office as well as policies governing classification of information. Subcommittee to start open hearings next month.

SEEK NEW STATION

PRINCIPALS in WFTM Maysville, Ky., filed bid Thursday with FCC seeking new station at Richmond, Ky., on 1340 kc, 250 w fulltime, assigned to be dropped by WLEX Lexington when it is given Commission approval to buy WKLX Lexington for $70,000 [B•T, May 5]. Application tendered by J. W. Betts, WFTM manager, and C. P. Clarke and J. M. Finch Jr., WFTM owners.

SIGMA DELTA CHI HITS BAN

SUBCOMMITTEE of Sigma Delta Chi's Freedom of Information Committee and NBC Chicago News Chief Bill Ray last week blasted Chicago City Council for banning live and recorded radio and television coverage of Emergency Crime Committee hearings which began May 26.

'KDKA far outpulled the other stations on our schedule on a cost per inquiry basis'

James L. Tabor
Simonds, Payson Company, Inc.
Portland, Maine

From Maine to California—literally!—advertisers have found that they can count on KDKA to produce profitable orders at minimum cost.

A recent letter from Maine agencyman James L. Tabor illustrates the point. "I want you to know," he writes, "how completely satisfied we are with your station. From our initial inquiry on availabilities and coverage through to the completion of the campaign and our request for a test cut, we have had the best possible co-operation. Best of all, KDKA far outpulled the other nine stations on our schedule on a cost per inquiry basis."

No other medium even begins to match KDKA for coverage of more than 100 busy counties in Pennsylvania, Ohio and West Virginia. Whether your schedule calls for ten stations or a hundred stations, KDKA should lead the list! For details, check KDKA or Free & Peters.

Here's how to

DOUBLE your impact in the Detroit Market

MARKET MAGIC is a combination selling plan that ties your WWJ on-the-air advertising to A&P in-the-store merchandising. It adds to WWJ's powerful radio salesmanship the direct eye-catching impact of point-of-sale promotion in the 93 A&P stores dominating the Detroit area.

MARKET MAGIC advertisers who distribute their products through A&P stores—where Detroiters spend $100,000,000 annually—are assured a one-week preferred position display in each of these stores, for any one product during a 13-week cycle.

MARKET MAGIC produces double impact from one sales campaign, at one low cost, through one medium. WWJ, Detroit's NBC station.

ASK YOUR HOLLINGBERY MAN FOR A MARKET MAGIC BROCHURE. IT CONTAINS ALL THE DETAILS.

WLS Spearheads Record Scrap Drive!

● Steel is vital . . . and vast quantities of scrap are required to produce the steel needed to keep America strong.

Having co-operated in many successful scrap drives during previous emergencies . . . WLS was invited to spearhead the recent Decatur and Macon County campaign, which was climaxed by the WLS National Barn Dance.

According to William Kelly, Director of the Chicago Office of the U. S. Department of Commerce, this drive "brought in more scrap than any similar campaign in history" . . . enough to make 16,504,000 pounds of steel.

Further proof of the pulling power of WLS programs . . . whether promoting a regional scrap drive . . . or putting your products in a million more homes.

CLOSED CIRCUIT

YOU WON'T find it in FCC actions but NBC's TV key, WNBT New York and CBS' TV key, WCBS-TV, as well as WPIX New York and several miscellaneous outlets of ABC, are in anomalous position of operating without regular licenses. It's because of turmoil over complaint of Civil Liberties Union against alleged "blacklisting" of talent by these licensees and opinion of FCC counsel that if FCC didn't act prior to licensee expirations June 1, applicants automatically are extended. But before it got to that, FCC voted (1) to renew licenses and dismiss complaint; (2) to renew temporarily until Sept. 1; (3) not to renew and let automatic extension prevail; (4) not to grant regular renewal, thus permitting vote on (3) to stand. (See Editorial, page 50).

INDEPENDENT offer for KOA Denver has been made to NBC by Don Searle and Herbert Hollister, owners of KMMJ Grand Island, Neb., and KXXX Colby, Kan. Mr. Searle denied offer had connection with proposal made by Bob Hope and associates for station [CLOSED CIRCUIT, May 19].

INDICATIVE of constructive approach to July 1-2 session of affiliates with CBS on network crisis is preliminary informal meeting of "old timers" called by I. R. (Ike) Lounsberry, WGR Buffalo, chairman of network's Affiliates Advisory Board to meet June 30 in New York. Nine-man radio board will meet with nine-man sponsoring group which petitioned CBS for two-day conference to reach amicable understanding on network-affiliates problem. [B•T, June 2; story this issue, page 25].

PAUL SEGAL, Washington counsel for WWSW Pittsburgh, expected this week to take to court first appeal of FCC's Sixth Report lifting TV freeze. He is to file complaint in U. S. Court of Appeals, Third Circuit, Philadelphia. Reportedly confined to specific situation rather than general principles of Sixth Report, appeal will concern FCC refusal to allocate Channel 4 to Braddock, Pa. (metropolitan Pittsburgh) because post office is 169.31 miles from transmitter of WLWC (TV) Columbus, Ohio, and rules call for 170-mile minimum separation. Petition to FCC on same point was filed last week by WLOA Braddock (see story, page 59).

PRACTITIONERS and broadcast licensees are beginning to wonder whether FCC lawyers are using hinder and delay tactics on request for declaratory ruling as to whether merging of AM applicants in same market for limited TV facilities would constitute violation of duopoly regulation. Petition was filed month ago [B•T, May 5]. It's known there are dozens of radio broadcasters awaiting ruling preparatory to perfecting TV applications in advance of July 1 deadline. Commission word last week: Nothing in sight.

BLAST AT contraverted FCC rebroadcast rule requiring stations which deny rebroadcast rights to explain reason to FCC, hat in hand, expected Tuesday at meeting of Committee on

(Continued on page 6)

ABC ASKS SEVERANCE, EARLY MERGER RULING

ABC and United Paramount Theatres late Friday filed long-expected petition with FCC for severance from hearing and early disposition of proposed merger of network and UPT as well as grant of contingent sale of WBKB (TV) Chicago by Paramount's Balaban & Katz to CBS for $6 million. In separate action earlier, Zenith Radio Corp., asked FCC to withhold action on WBKB sale, contending all applicants here should get equal chance to compete for Channel 2 (see story page 59). FCC proposes to switch WBKB from Channel 4 to Channel 2 under terms of Sixth Report lifting TV freeze.

ABC-UPT petition argues for early Commission ruling in order to bring stability to network field. ABC contends 75% of record in general Paramount and ABC-UPT merger hearing pertains to other issues while portion relating to merger has been fully entered (see story page 70). Petition notes hearing may continue indefinitely, thus delay needed action on merger.

Dr. Allen B. DuMont, president of Allen B. DuMont Labs., concluded testimony Thursday. This was last of evidence in hearing relative to proposed merger, ABC-UPT spokesmen observed Friday.

FIGHT COVERAGE HIGHEST

NBC-TV spokesmen Friday claimed network's coverage of Walcott-Charles bout preceding night received highest Trendex rating ever recorded for one-time attraction: 58.6, representing 37 million viewers.

BUSINESS BRIEFLY

PIEL SWITCH ● In surprise move last Friday, Piel Brothers, N. Y. (beer), $1.6 million advertising account, named Young & Rubicam, N. Y., to handle its advertising, effective Sept. 2. Decision impelled Kenyon & Eckhardt executive to note that "during K & E's tenure, Piel's sales have grown faster than any other brewery in the country."

LEVER BUYS SPOT ● Lever Bros., N. Y. (Breeze), renewing campaign in five markets effective June 26 and also adding spot radio drive starting July 10 in 28 markets in Atlanta, Boston, Denver, Houston and New Orleans areas. Agency, BBDO, N. Y.

SEEK AVAILABILITIES ● Kenyon & Eckhardt, N. Y., looking for TV availabilities for probable campaign for Amazo instant dessert.

CRISCO EXPANDS ● Procter & Gamble, Cincinnati (Crisco), through Compton Adv., N. Y., considering radio spot campaign to start July 1 for 52 weeks in few selected markets, in addition to its present schedule.

VITAMINS USE RADIO ● VCA Labs, Newark, N. J., (vitamin products), through Duane Jones Co., N. Y., to enter daytime radio with 52-week sponsorship of Gabriel Heatter on Mutual network (8:55-9 a.m., EDT, Monday through Friday), effective June 30.

AGENCY FOR ZIPPY ● Zippy Labs., Chi-

Code Board Scans Score of Complaints

SCORE of complaints about TV programming, accumulated in last two months, acted on by NARTB Television Code Review Board, which concluded two-day Washington meeting late Friday. Findings and complaints kept secret, in accordance with terms of code.

Board announced its chairman, John E. Fetzer, president-owner of Fetzer radio and TV stations in Kalamazoo and Grand Rapids, Mich., would appear June 25 before House subcommittee investigating radio and TV programming (see story page 27). Board members met Friday morning with Rep. E. C. Gathings (D-Ark.), who introduced resolution that led to inquiry, and members of subcommittee.

At close of meeting, Mr. Fetzer said board noted with satisfaction progress made by networks and stations in conforming to code but saw need for further improvement. He felt his appearance before House probers would serve to discount fears that self-regulation will not work.

Self-regulation "is more desirable than these repeated investigations and threats of lawmaking," he said, adding that all complaints are being seriously studied.

Complaints reviewed by board dealt mainly with crime and mystery programming, overcommercialization, religious broadcasting and film productions. Parties involved will be notified of decisions reached. Board heard presentation by Dr. Theodore Elsner, president of National Religious Broadcasters Inc., who asked modification of code clause advising against sale of time for religious programs. He termed section unfair and discriminatory. His appeal was taken under advisement.

Board examined several films and scripts involved in specific complaints. Attending two-day meeting were all five members, including Chairman Fetzer; Mrs. Scott Bullitt, KING-TV Seattle; Leonard Reinsch, WSB-TV Atlanta; Walter Damm, WTMJ-TV Milwaukee, and Ewell K. Jett, WMAR-TV Baltimore.

Mr. Fetzer's statement follows:

The Board of Review, meeting only a short time after the Code went into effect, notes with satisfaction the progress that has been made by networks and stations in aligning their operations with the program and commercial recommendations of the Code. At the same time, the Board recognizes the need for further improvement, knowing this to be a continuing problem.

When I appear before the Congressional committee, I believe there will be no difficulty in discounting the fears of some that self-regulation will not work in television programming. It is working right now—and certainly it is more desirable than these repeated investigations and threats of lawmaking.

As a Board, we are listening avidly and considerately to the opinions of the public, who comprise our audience and who, in the final analysis, we must satisfy if we are to stay in business. We take these opinions very seriously indeed—and intend to convey them, when circumstances justify such action, to those of our colleagues who can make proper adjustments in their operations.

LBS BANKRUPTCY HEARING IS ASKED

HEARING on petition for involuntary bankruptcy action against Liberty Broadcasting Sysem, which suspended service fortnight ago [B•T, May 19], asked by Tennessee & Arkansas Broadcasting Co. in office of D. M. Oldham, Federal bankruptcy referee in Dallas (see McLendon Broadcasting System story page 85).

Schedule filed with referee indicated Liberty had assets of $504,489.35. Liabilities listed at $1,480,000. Major creditors were listed as AT&T, $67,532; Brooklyn Dodgers, $11,800; American Airlines, $2,540, along with unlisted affiliate stations and others. Losses of Liberty owners listed as follows: H. R. Cullen and associates, $600,000; B. R. McLendon, $140,000. Messrs. Cullen and McLendon (father of LBS President Gordon McLendon), were co-chairmen of LBS board.

In Chicago, Thomas C. McConnell, of law firm of McConnell, Lutkin & Van Hook, Liberty attorneys, said taking of depositions in Liberty's suit against group of major league baseball clubs will be started Aug 18, followed by trial probably next spring.

McFARLAND BILL JUNE 12

HOUSE consideration of McFarland Bill revising Communications Act (S 658) was scheduled for June 12 floor action, it was reported Friday. Debate will be limited to usual three hours for routine bills. Amendments may be offered from floor. Among possible amendments that may be offered from floor is one concerning political broadcasts which would be aimed at taking broadcasters off hook of campaign speech libel dangers. Both Reps. Walt Horan (R-Wash.) and Joseph P. O'Hara (R-Minn.) have indicated their interest in that subject.

POLITICAL MEET DENIED

IN QUICK same-day action, FCC Friday denied request of CBS for informal meeting today (Monday) of all networks to clarify Commission policy with respect to political broadcasts—particularly equal time rule—in view of complaints on part of Presidential candidates (see early story page 27). CBS this week is expected to stress fairness of treatment in reply to complaints of candidates Kefauver and Taft. Network is expected to call attention to appearances already set on two of its TV shows for Sen. Taft.

WVVW AMENDS PETITION

WVVW Fairmont, W. Va., filed amended TV application late Friday afternoon, raising requests for television outlets filed last week to 25 (see early story page 60). Fairmont station seeks UHF Channel 35 with radiated power of 17.4 kw, antenna height 237 ft. above average terrain. Cost estimated at $100,580, with first year operating cost $40,000 and revenue $50,000. WVVW president and 96% owner is J. P. Beacom.

MUNTZ NET UP

MUNTZ TV Inc., Chicago set maker, last week reported net income of $898,004 for year ending March 31. This equals 80 cents per share of common stock, compared with 74 cents previous year. President Earl Muntz said sales were $32,923,661.

In this Issue—

Under-the-counter deals may be cutting the ground out from under the radio market, but here's an even worse menace to the stability of both radio and television. In a thoroughly researched special article, BROADCASTING •TELECASTING gives a full report of the "free plug" racket that is delivering millions of dollars worth of advertising to radio and television homes, at no return whatever to networks and stations. *Page 23.*

Professional drys and publicity-conscious Congressmen join up to howl about "immoral" radio and TV programs. One Congressman swears he saw a girl dance the "hootchie-cootchie," and what's worse she ended her performance with a "shimmy." After taking in such testimony for three mornings, the House committee adjourns the hearings to let pulses settle down. *Page 27.*

Spot radio costs the advertiser less today than it did 10 years ago, according to a new study by the National Assn. of Radio and Television Station Representatives. *Page 23.*

First quarter gross billings were $42.6 million for radio networks, $45.7 million for television networks. *Page 25.*

FCC issues proposed changes in its transmitter operator rules. If the new rules were adopted, it would mean cost cutting for many AM and FM stations. *Page 29.*

Rival candidates declare an open season on radio and television networks. Sens. Taft and Kefauver demand time equal to that given Gen. Eisenhower. It's the beginning of what promises to grow into the most painful headache broadcasters have recently suffered. *Page 27.*

A. C. Nielsen and Standard Audit & Measurement Services are in a tiff over whose techniques for measuring station coverage are the better. *Page 26.*

CBS Radio reports time sales, renewals and replacements worth $1.4 million a year gross. Meanwhile, plans proceed for the July 1-2 meeting of CBS Radio affiliates, most of whom plan to attend. *Page 25.*

National Collegiate Athletic Assn. comes up with a new plan for controlled telecasting of football next fall. This plan isn't as restrictive as last year's because no areas will be blacked out, but it still will hamstring football telecasting. *Page 59.*

Westinghouse proposes revision in FCC's procedures to bring TV faster to communities without it or with only one-station service now. *Page 59.*

Upcoming

THE ONE ON THE RIGHT is Chuck Worcester, WMT's Farm Service Director. The young corn-burner performing before the mike is one of a brood of cheep artists who crow over Chucks good husbandry. Chuck owns and operates a farm as a WMT service project. It's the point of origin for many informative WMT broadcasts about conservation and crop production. Chicks and Iowa farmers like corn—the 1951 crop was worth $778,437,000.

ALL EQUIPMENT USED ON CHUCK'S FARM—supplies, fertilizers, gasoline, oil, etc.—is made or distributed by WMT advertisers. Farm broadcast time represents over 9% of WMT's total weekly program schedule—3½ hours of farm information, 1½ hours of weather and market data, 8 hours of music and features.

YOU ALMOST HEAR THINGS GROW in Iowa. Of all the Grade A land in the U.S., 25% is in Iowa. One of Chuck's projects is a test of 12 different fertilizer applications to check production.

CEDAR RAPIDS is our home address—worth remembering when you want to reach 338,480 families who listen each week to WMT's farm (and CBS) programming. Or see our reps, The Katz Agency.

Announcing

THE REBIRTH OF A MAJOR MAS
TRANSIT RADIO . . . SOON TO TAK
THE NATION'S LEADING ADVERTISIN

THE UNITED STATES SUPREME COURT upheld the constitutionality of Transit Radio in a seven-to-one decision May 26, 1952, and in true American process granted new life to a powerful mass medium of information, entertainment and advertising.

Transit Radio is *not* new. It has been operating in Cincinnati, Ohio; St. Louis, Missouri; Washington, D. C.; Bradbury Heights, Maryland; Covington, Kentucky; Worcester, Massachusetts; Kansas City, Missouri; Tacoma, Washington; Des Moines, Iowa; Trenton, New Jersey; and Suburban Pittsburgh, Pennsylvania. In each of these markets transit riders' opinion of Transit Radio was exhaustively researched and found overwhelmingly favorable. Transit Radio has been tried and proved by advertisers in every acceptable consumer classification. It is now reborn by decision of the Supreme Court of the United States. It is destined to advertising greatness.

TRANSIT

UNION TRUST BUILDING

ADVERTISING MEDIUM . . . .
TS RIGHTFUL POSITION AMONG
MEDIA.

RANSIT RADIO ALONE OFFERS THESE SALES ADVANTAGES:

A SELECTED AUDIENCE People lead well regulated lives. Their riding habits are orderly, also. It is possible to select the factory worker, office worker, professional people, the entertainment bound, simply by scheduling your message at the proper time to reach the type of audience you want. A few announcements a day can saturate the market in a short time.

A COUNTED AUDIENCE Transit companies schedule vehicles to efficiently carry maximum loads at the shortest time intervals. An actual count of the number of riders on vehicles is reported by half-hour periods by the transit companies.

A LOW COST AUDIENCE With precise information on the number of riders you can reach, a selective audience with little waste coverage, Transit Radio's low rates mean low cost-per-thousand.

AN AUDIENCE IN TRANSIT On the way to earn . . . on the way to spend. Transit Radio is virtually a point-of-purchase advertising medium especially valuable to the retailer.

A FLEXIBLE AUDIENCE Alert to timely messages and in a position to respond almost immediately to sales messages.

AN AUDIENCE FOR SERVICE Transit audiences think of announcements as a service. Just as riders like to know the correct time, temperature, news and enjoy the pleasant programming, they, too, want to know what is for-sale? where? and how much?

A PLUS HOME AUDIENCE Transit Radio programming is good listening enjoyed by the great and growing FM audience in homes. There is good evidence of a huge FM home audience in Transit Radio markets . . . a PLUS for Transit Radio advertisers.

PROMOTION IS

BIG BUSINESS AT WGY

Sponsors using WGY have the benefit of tremendous support for their sales messages through the station's many promotional activities—

AUDIENCE PROMOTION:

- WGY publishes *Mike and Camera* monthly and distributes it to an up-to-date mailing list containing over 20,000 subscribers.
- Over 900 hard-hitting promotional announcements are scheduled each month.
- Over 10,000 lines of advertising are placed in Albany and Schenectady newspapers each month.
- One minute movies of station artists are shown on WGY's sister station—WRGB.
- Motorists on area highways have their attention called to the station by seven 8' by 24' colorful scotchlited billboards.
- WGY artists are furnished with promotional postcards on which they answer their large volume of mail.
- The complete WGY program schedule is carried in 14 area dailies having a circulation of 332,934 and in three Sunday papers with a circulation of 217,797.
- Many remote broadcasts are conducted throughout the year, including several from N.Y.S. Fair and County Fairs in the area.

MERCHANDISING:

- Dealer letters and postcards are mailed on request to 1436 grocers and 299 druggists.

WGY IS A TOP PROMOTIONAL BUY! The extensive promotional activities insure a maximum audience for all sales messages broadcast by this pioneer station which serves 840,000 radio families in 53 counties in Eastern New York and Western New England.

NATIONAL PRESS BLDG
WASHINGTON 4 D C

SOL TAISHOFF
Editor & Publisher

Mr. Broadcaster:

Decision! Transition! Impact! Penetration!

Those are the word-tools of the advertising crafts.

They are apt in time-buying. Every day is a day of decision.
And of transition.

Scan the headlines. It's the spot business that keeps the national broadcast revenue in proper perspective.

That's where the 1952 BROADCASTING Marketbook comes in. It is the fact book tailored expressly for the buyer of time.

The Marketbook is now in production. Its purpose is to make SPOT time-buying easy. In no other issue is there published:

. Radio homes by counties
. Latest auto registrations
(Out of home listening)
. Retail Sales . Population . Farm Income

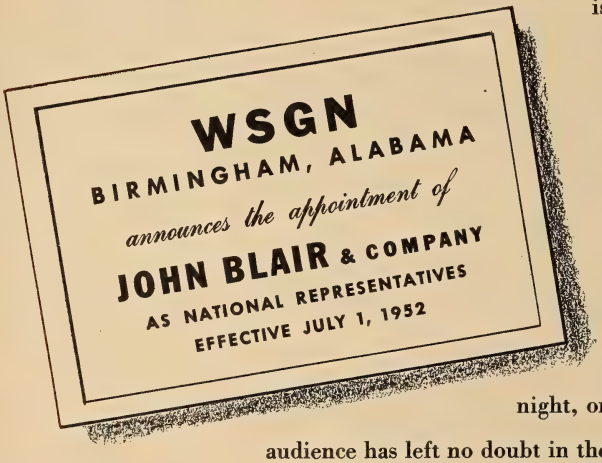
. and the Exclusive Copyrighted

SPOT RATE FINDER

The BROADCASTING Marketbook is the time-buyer's time-tested work-tool. The station-advertiser gets year-round impact from a single insertion because the 1952 Marketbook will be within elbow-reach of every national and regional agency; every advertiser outside the local sphere. Circulation: 17,000.

Deadline: July 20

Publication date: August 18
(timed for the peak time-buying season)



Sincerely,

Sol Taishoff

Sol Taishoff

Here is John Blair's newest

The view at the right, taken from the top of Red Mountain, is Birmingham—America's 27th market*. Yes, Birmingham in rich, responsive Jefferson County (population 572,100; retail sales $508,896,000 for 1951) is not only one of our great markets, but also one of the fastest-growing.

Station WSGN dominates Birmingham just the way its tower dominates this photo. (Affiliated with the Birmingham News, WSGN operates on 5,000 watts day, 1,000 watts night, on 610 KC.) The responsiveness of its audience has left no doubt in the minds of both national and local advertisers that the profitable way to sell Birmingham is via WSGN.

*John Blair now represents top stations in 21 of America's 30 largest markets.

PHILOSOPHER, ex-radio man for the Navy, creator and executor of advertising ideas, strong believer in the future of radio and television, voice of romance to women listeners, and proprietor of his own agency, American Advertising, Seattle—that's Anthony F. Lease, who this week (June 5) celebrates his 32nd birthday.

Tony Lease is a man of ideas, and he believes in carrying them through. Early in 1950, he had the idea that there was room in the Pacific Northwest for an agency that would originate, create and follow through on good advertising ideas for its clients —and not even a broken neck stopped him. Just about the time he got American Advertising rolling, Mr. Lease was the victim of an apartment house explosion that left him in a cast from chin to waist for months. Nevertheless, he kept calling on his accounts, writing, producing and even voicing programs.

Mr. LEASE

Today, with a growing list of accounts and plans for expansion of his agency to other northwest markets as soon as additional TV channels are granted, Mr. Lease reports that 80% of his clients' budgets go to radio and television.

Born in Pittsburgh, Mr. Lease attended Duquesne U. While studying, he worked in the merchandising department of Kaufman's department store. Starting in June 1942, he was in the Navy for four years, serving on a British carrier the *U.S.S. Franklin*, the *Wasp* and four other aircraft carriers.

Shore duty at Seattle in 1945 convinced him that the Pacific Northwest was the place to live and, upon his discharge, he resumed his studies at Seattle U. While on a part-time job with a Seattle jeweler, he developed an advertising campaign concentrating in radio, which brought an increase of 119% in business in two years.

When he opened American Advertising's doors in 1950 it was with a whole flock of personal theories: That advertising was the only field that could guarantee freedom from the rut of boredom; that advertising can make dramatically real all of the things people enjoy; that successful commercial copy requires the flair of showmanship; that, above all, the agency's role is more than just to buy time or space, but to create and carry

"Operation Heat Wave"

The hottest thing in town these days, outside of Washington's famous summer weather, is WRC's "OPERATION HEAT WAVE." For the first time, WRC is affording its advertisers a chance to make the heat pay off. . . .

If you're selling a seasonal product that moves best when the sun is hottest, here's your chance to buy radio spots in Washington on those "fair and warmer" days only—and save and save in the bargain.

WHEN: From May 25 through September 25.

WHAT: 20-second station breaks.

WHO: Seasonal hot weather products *only*, such as fans, bathing suits and sun tan lotion. (Products subject to WRC acceptance).

COST: It's lower than you think!

For complete details on how to stretch your radio dollars in the Washington market during the summer months, contact the New York office of NBC Spot Sales or the WRC Sales Department.

feature of the week

KFOR Lincoln, Neb., launched a successful city-wide promotion campaign during "National Cotton Week" which made retailers and consumers alike "cotton conscious."

The station first submitted the campaign to the Lincoln promotion council for approval. Offering full support, the council distributed a special retail bulletin to all Lincoln merchants, inviting them to join in the plan.

Promotion was geared for action well in advance of National Cotton Week (May 11-17). Ken Greenwood, KFOR program director, and Lydia Nekuda, KFOR promotion director, carefully planned three activities: the dropping of cotton fiber balls from an airplane, a 'teen-age "Cotton Ball," and a cotton style show, featuring 43 live models.

Commenting on the success of the campaign, Miss Nekuda said, "Nearly every merchant in the city cooperated in the project; it represented an all-out effort on the part of a radio station to provide all the merchants of the city with a big project into which they could coordinate their advertising, and finally, it made the city and area very conscious of KFOR as an advertising medium."

RECORDS for the 'teen-age Cotton Ball are spun by Doyle Bladon, KFOR disc jockey.

strictly business

TOM DeBOW's youthful appearance belies the fact that he is a pioneer in the field of radio advertising.

Mr. DeBow, advertising manager for Cities Service, has headed radio and press relations for that firm for the past 20 years. Network radio programs have been his chief concern.

Cities Service has sponsored radio broadcasts for a quarter-century. For all but the first five years, Mr. DeBow has guided and goaded sponsor, agency and production staff into the kind of programming that can last 25 years on the air successfully.

"A good musical series is the one type of broadcast advertising you can stay with profitably for that length of time," Mr. DeBow says.

In this period, he has kept close watch on the radio show's contribution to Cities Service's growth and development as one of the Big Ten in the oil industry.

He has had many opportunities to check on the public relations job that radio has done and continues to do. It documents his belief that radio music shows have always been right for Cities Service.

While a concert-type program usually indicates an institutional approach for the sponsor without the constant pressure of having to produce sales, such is not the case with the air formula used by Cities Service.

Under Mr. DeBow's direction, Cities Service has incorporated a hard-hitting sales technique which has enabled the program always to carry its own weight in the company's ad budget and to serve as a spearhead for all the company's promotional campaigns.

Currently, Cities Service sponsors *Band of America*, heard Monday, 9:30-10 p.m. (EDT) on NBC.

Mr. DeBow was among the first client representatives to contact the individual network stations for

Wheels

—new "electronic eyes" for the Army

THIS fast-moving mobile television system recently delivered by RCA to the U.S. Army Signal Corps flashes eyewitness views of intricate field exercises to expert observers, maneuver umpires, or to Army classrooms.

Pioneering a new concept in military instructional techniques—a major advancement for on-the-spot coverage in military observation and communication—exploring the feasibility of TV for field instruction and tactical use are a few of the jobs assigned to this equipment.

This new mobile TV system is the most complete television station ever mounted on wheels. It consists of four 10-ton coach-trucks fitted with custom-built bodies, each 31 feet long.

THE FIRST COACH contains the cameras and transmitter units . . . three complete TV field camera chains . . . microwave transmitter for video signals . . . 45-watt FM transmitter for sound signals . . . four microphone inputs . . . tape and disc recording equipment . . . complete TV monitoring and switching control equipment.

Transmitter power supply equipment, consisting of two powerful 15-KVA gas-driven generating units is contained in the SECOND COACH.

The receiver-display unit forms the THIRD COACH. This unit houses the FM and microwave receiving equipment . . . ten 16-inch TV picture monitors . . . a 16mm TV projector and film camera . . . slide projector . . . and a large-screen TV projector.

Housed in the FOURTH COACH is another 15-KVA generator power supply for the receiver-display unit. All coaches in the system are in communication with one another by means of an RCA 15-watt Carfone two-way radiotelephone.

This mobile television system, built for the U.S. Army Signal Corps, is another example of RCA applied engineering, manufacturing and service activities. RCA, through its extensive facilities, is constantly striving to provide our armed forces on land, sea and in the air with better military equipment.

FREE PLUGS PROVE FOOL'S GOLD

Radio-TV Undersold

By RUFUS CRATER

MILLIONS of dollars worth of radio and television advertising is going into American homes each year at a cost, to the advertiser, as low as ten cents on the dollar.

This has nothing to do with under-the-counter rate deals. The networks and station don't get even the 10%. The "advertising" in question—and much of it is greatly in question among network and station operators, as well as the public—consists of "free plugs" for products of advertisers other than the sponsor.

Broadly defined, the radio-TV "plug" involves on-the-air mention or display of the name of a company, product, service or person in no way connected with the sponsor. It may be pre-arranged at the behest (and expense) of the beneficiary of the plug, or it may be unsolicited (although not often unrewarded).

The plug, which those who arrange it like to call by a more dignified name, such as "promotion and exploitation adjunct," or plain "publicity," and also sometimes known as "payola," takes many forms.

Most Unpalatable

The one which most often has been found unpalatable and has provoked the most protests involves belabored bandying of plug names in not-too-funny jokes, or for no reason that is apparent, and is the form which leading practitioners of the plug-placement art blame for a widespread notion that all plugs are evil. It is also the form which principally impelled NBC-TV affiliates, at a recent meeting of NBC's Stations Planning and Advisory Committee, to protest against certain plug practices which had crept into network shows, and to ask that something be done [B•T, May 5].

Publicists who place plugs in radio and TV—it is estimated that there are about a dozen firms in the U. S. engaged in this work on a regular basis, but the number is growing—generally make two main points about their work. First, they contend their work in radio and television is precisely parallel with publicity work in the newspaper and magazine fields; second, there are good plugs and bad plugs, the distinction being found in the answer to the question: "Is it in good taste and does it contribute something to the program?"

Among the firms which deal or have dealt regularly in radio-TV publicity, it was said, are those of Bander-Globus & Assoc., Universal Adv. Agency, Walter Kline Assoc., Dick Fischel and Adolph Wenland & Assoc., all in Hollywood, and Steve Hannagan, David Alber, Sol Tepper and Boyne Zussman, in New York.

For Clients Since 1946

Adolph Wenland & Assoc. has been getting free radio plugs for clients' products since early 1946 and declares that with television, giveaways are on the increase, rather than on the decline.

Considered the country's No. 1 giveaway organization, the firm has some 60 national, regional and local clients. The majority of business is handled through mail and telephone. There is a certain amount of control on radio copy. But the purpose is to plug the product.

Dick Fischel & Assoc., Beverly Hills, established five years ago as a public relations and product promotion concern, and Walter Kline Assoc., Los Angeles, in a similar type operation for many years, have extensive lists of national and regional clients.

Although both declined to list clients or reveal their method of operation, it is understood the pay-off for free radio-television plugs are through gifts to writers or those responsible for cooperation.

Bander-Globus & Assoc., in business since last November, also is a big-time giveaway operator. Insert plugs are supplied the commercial announcer, but those familiar with the product usually ad lib, Leonard Globus explained. Firm has 26 national, regional and local product clients. Among them are Pro Tools; Catalina Swim Suits; Dr. West Tooth Brush; McKesson & Robbins; Helbros Watches; Tar Tan Sun Lotion; Grantly Sun Glasses, and Mattel Music Maker Toys.

Universal Adv. Agency, operating for the past six years as a product giveaway company and representing 20 national manufacturers, doesn't "go in for pay-off plugs," according to William R. Reid, president. He said Universal works directly with a sponsor or its advertising agency, program packager or network.

The firm writes its own radio-TV copy which must be adhered to. Accounts include Westinghouse Electric Corp., Longines-Wittnauer Watch, Transworld Airlines, Portland Woolen Mills, Zippo Mfg. Co., Spiegel Mail Order House, Westgate Sun Harbor Corp. (canned tuna), Damarel-Allison Div. of Sunkist; Kyron Foundation; Stromberg-Carlson Co. and others.

The number of advertisers who are or have been engaged in publicizing their products via radio-TV plugs is sizable. Many of them also are regular sponsors. The roster also includes such names as Arthur Murray Dance School, Beacon Wax, Hamilton Watches, Kleenex, Knickerbocker Beer, Coca-Cola, Pepsi-Cola, Eversharp, Lifesavers, Maybelline, Philip Morris, Parker Pens, Roma Wines, Robert Hall Clothes, S.O.S. Scouring Pads, St. Joseph's Aspirin, Studebaker, Van Camp's Pork and Beans, Doeskin Tissues, Benrus Watches, Max Factor Cosmetics, Wilson's Hams, Ry-Krisp and Schick Razors, among others

The cost of a planted plug, it has been estimated, runs approximately 10% of what roughly equiv-

(Continued on page 72)

SPOT COSTS

Down Over Decade, Says NARTSR

COST of spot radio, whether figured on the basis of sets in use or on radio families, has come down substantially during the past decade, according to a study released Thursday by the National Assn. of Radio and TV Station Representatives.

Comparing 1951 with 1941, NARTSR reported spot radio cost-per-thousand-sets dropped 26% in the 10-year period and per-thousand-radio-families dropped 11.9%.

"Radio station costs like everything else have gone up in that period," NARTSR noted. "Union wages, program costs, musicians' salaries, materials, taxes, have climbed just as costs in all other businesses have. But spot radio has stayed relatively low because the audience has increased until 96% of all families have radios.

"And the increase in the number of secondary sets, totaling 57 million in 1951, has been beyond the most optimistic estimates. In automobiles alone there are 23 million of those sets. So radio has become the dreamed of mass medium, the only mass medium."

Rates Rises Noted

Actual increases in rates for various media from 1941 to 1951, disregarding circulation changes, were cited by NARTSR as follows: Magazines, average cost of a black-and-white page in 44 magazines, up 54.5%; morning newspapers, average agate line rate, up 140%; evening newspapers, up 87.3%; Sunday newspapers, up 90.6%; spot radio, Class A time, one hour, was up 12.8%; half-hour, up 13.3%; quarter-hour, up 16.3%; one minute, up 36.1%.

Noting that "all these figures have an academic aspect," NARTSR stated that when circulation increases are taken into consideration, the cost of magazine black-and-white pages, per thousand, are up 18.7%. The milline rate of morning newspapers is up 21.2%; of evening newspapers, up 14.4%; of Sunday newspapers, up 22.7%. Spot radio cost based on sets in use concurrently declined 26% and spot radio cost based on radio families declined 11.9%.

These figures do not agree with those presented to the AAAA by Melvin Brorby of Needham, Louis & Brorby [B•T, April 7]. Mr. Brorby reported last year increases of 7% for magazines and newspapers, 16% for network radio and 22% for spot radio.

"The difference," NARTSR pointed out, "is that Mr. Brorby figured the increased cost per thousand of

BENOIT NAMED

Heads Westinghouse Div.

WESTINGHOUSE Electric Corp. last week named Walter E. Benoit as manager of its Electronics Div. in Baltimore, to which he moved from management of the company's Air-Arm Div. at Friendship International Airport, between Baltimore and Washington, D. C.

Mr. Benoit

A former vice president and general manager of Westinghouse Radio Stations Inc., Mr. Benoit has been associated with Westinghouse since 1922, when he began as an accountant in the radio department of the Chicopee Falls, Mass., plant.

During Mr. Benoit's management of WRS Inc., the radio station group built WBZ-AM-FM-TV Boston, a modern radio and television center. During this time the headquarters of the organization, now headed by Joseph E. Baudino, were moved from KYW Philadelphia to its present location in the Commonwealth Bldg., Washington.

CHRISTAL FIRM

Will Represent WJR, WGAR

APPOINTMENT of the Henry I. Christal Co. as national sales representative for WJR Detroit and WGAR Cleveland, effective July 1, was announced last week by John F. Patt, president, Goodwill Stations.

"The plan of Mr. Christal and his associates to devote themselves 100% to the selling of radio broadcasting, and to limit their representation to a very small number of major market stations, sharing the highest ideals and service standards, particularly appealed to us," Mr. Patt said.

For the past 19 years, the stations have been represented by Edward Petry & Co. KMPC Los Angeles will continue to be represented by H-R Representatives Inc., Mr. Patt added.

All three of the Goodwill Stations will continue to maintain their own eastern office, which is under the direction of Gordon Gray, Goodwill vice president. This office is at 665 Fifth Ave., New York.

The Christal firm started operations last Jan. 1 under a policy of devoting its activity exclusively to radio. A former partner in Edward Petry & Co., Mr. Christal resigned from the firm last July [B•T, July 23, 1951] following a series of disagreements.

Among Christal stations are WDAF Kansas City and WHAS Louisville.

The Christal - Petry disagreements led to litigation, with the New York State Court of Appeals deciding that Mr. Petry, as majority stockholder of Edward Petry & Co., had the right to increase the number of directors despite a by-laws limitation of four [B•T, May 2, 1950].

BAB SPOT CLINIC

Features Ryan and Sweeney

SOME 40 sales executives and salesmen from ABC, CBS, NBC and Mutual-WOR New York are expected to attend a special clinic Tuesday devoted solely to radio spot advertising. It will be conducted by BAB in New York.

William B. Ryan and Kevin B. Sweeney, BAB president and vice president, respectively, are scheduled to lead discussions on ways to increase spot billing and to build the effectiveness of spot radio advertising. Theodore C. Streibert, WOR president, will preside as chairman. Future BAB plans to promote radio also will be explained.

Bankart Elected

HENRY R. (REG) BANKART, account executive of Compton Adv., N. Y., has been elected a vice president of the agency. He has been with the agency since December 1945.

"Okay! Okay! Wait 'til the commercial!"

TRANSIT MEET

Follows SCOTUS Stand; Sales Growth Seen

EXPANSION of broadcast service to transit passengers on a national basis is contemplated by Transit Radio Inc., following a meeting of its board of directors last Tuesday, but the development will not be rushed.

Called into a Cincinnati session following the U. S. Supreme Court's decision upholding its service [B•T, June 2], the Transit Radio board decided to proceed carefully, with possibility that broad expansion of the medium would start in late autumn.

After the board session, President R. C. Crisler said many inquiries have been received from stations desiring to affiliate with Transit Radio. In addition, a number of transit operating groups have shown new interest in the service.

After conducting its sales efforts on a moderate basis while litigation pended, Transit Radio's national headquarters prepared last week to set up national advertising representation facilities for all stations.

Local sales efforts were speeded up as advertisers showed renewed interest.

Mass Production Basis

Transit Radio has arranged for mass production of specialized receiving equipment by several manufacturing companies. Worn-out equipment will be replaced in the existing transit service areas. Some used equipment is already available for new installations.

C. L. Thomas, KXOK-FM St. Louis, a TR board member, said the organization "definitely sees a good future." He said all board members are interested in going forward and utilizing the know-how acquired in several years of operation. "We were convinced from the start that we had a sound public service and an effective new advertising medium," he said.

Ben Strouse, WWDC-FM Washington, TR vice president and board member, said the local service has no immediate plans to expand its Washington operation, now serving about 425 of 1,500 Capital Transit Co. vehicles. The transit firm has indicated the service may be extended to all of its vehicles.

Mr. Strouse said the Cincinnati board meeting was "realistic, with many plans studied."

Attending the meeting, besides Messrs. Crisler, Thomas and Strouse, were Elzey Roberts Jr., KXOK-FM St. Louis; Hulbert Taft Jr., WKRC-FM Cincinnati, TR board chairman, and David Gamble, Cincinnati attorney.

A drive was started last week by National Citizens' Committee Against Forced Listening to collect signatures protesting transit programming. Bernard Tassler, managing editor of the *American Federationist*, official AFL monthly magazine, said:

"Although the Supreme Court did not find forced listening to be unconstitutional, it must be borne in mind that there are many evils which are vicious and wrong and cannot be justified, even though one cannot find a prohibition against them in the Constitution. In addition we are going ahead with the drafting of legislation which will put the quietus on this evil innovation."

Mosman Joins Cohen

JOHN E. MOSMAN has joined Harry B. Cohen Adv. Co., New York, in newly-created post of vice president in charge of radio and television. He was formerly with Biow Co., that city, in similar capacity. Jose di Donato, radio-TV director, and Larry Schwab Jr., TV producer-director, will continue in their present positions under Mr. Mosman's supervision in what is described as "a greatly expanded operation."

NETWORKS' TIME SALES

Over $88 Millions for First Quarter

DURING the first quarter of 1952, a total of 175 advertisers purchased $42,600,798 worth of time on the national radio networks, for an average three-month expenditure of $243,433.13, per advertiser according to figures compiled by Publishers Information Bureau.

In the same period—January-March 1952—PIB found that the TV networks were used by 183 advertisers, who purchased a combined total of $45,721,135 worth of TV network time, averaging $249,-896.91 per advertiser. All time cost figures, both radio and TV, are calculated at one-time rates, before volume or frequency discounts.

P&G Number One Client

Procter & Gamble Co. was the number one March client of both radio and TV networks, spending (at gross rates) $1,372,834 for radio network time and $1,212,465 for TV network time during the month. Lists of top ten users of each medium (Table I for Radio, Table II for TV) show six advertisers—P & G, Lever Brothers Co., General Foods Corp., General Mills, Liggett & Myers Tobacco Co. and Colgate-Palmolive-Peet Co. — common to both groups of leaders. Leading advertiser in each PIB product category is shown for radio networks in Table II and for TV networks in Table V (see page 70).

Time purchases by the various classes of advertisers are shown in Table III (for radio network clients) and Table VI (for TV network clients), with March and January-March 1952 compared for each medium with the month and year-to-date figures for 1951.

More Money for TV

These tables show that in March 1952 advertisers in 17 product classes spent more money for TV network time than for time on the radio networks, and this in spite of the limited scope of the TV net-

CBS RADIO SELLS

$1½ Millions in Business

WHILE its affiliates proceeded with plans for a conference July 1-2 to assess the current radio network crisis [B•T, June 2], CBS Radio last week reported time sales, renewals and replacements representing, on an annual basis, gross billings approximating $1,451,000.

The sales included purchase of five Arthur Godfrey quarter-hours per fortnight—Tuesdays and Thursdays one week, Tuesdays, Thursdays and Fridays the next, 10-10:15 a.m. EDT—by the Frigidaire Division of General Motors, starting Tuesday, and the purchase of *King Arthur Godfrey's Round Table* (Sun., 5-5:30 p.m. EDT) by Holland Furnace Co., of Holland, Mich., for this summer. Holland's sponsorship starts July 13, when Kingan & Co. relinquishes sponsorship of the program for the summer, and extends to Oct. 12, when Kingan returns. Agency for Frigidaire is Foote, Cone & Belding, Chicago; for Holland: Roche, Williams & Cleary, also Chicago.

Toni Co., on behalf of its White Rain and Prom, meanwhile signed for a five-minute strip of *It Happens Every Day*, to be presented at 4-4:05 p.m. Mondays through Fridays starting June 16, in addition to its current Saturday version of the same program. Agency: Foote, Cone & Belding, New York.

Pearson Pharmacal Co. (Ennds chlorophyll tablets and Eye-Gene drops), which will sponsor *Inner Sanctum* on CBS Radio starting June 22 (Sun., 9:30-10 p.m. EDT), also is planning a half-hour dramatic show from Hollywood this fall, exact time to be decided. Harry B. Cohen Adv., New York, is the agency.

Negotiations also were in progress looking toward General Foods' sponsorship of *Bob Trout and the News* at 10-10:05 p.m. EDT on Thursdays, Fridays and Sundays,

(Continued on page 36)

RESEARCH WRANGLE

Nielsen, SAMS Battle

RADIO RESEARCH last week returned to the old slug-fest days of the mid 1940's, when Hooper and the Cooperative Analysis of Broadcasting were battling for supremacy in the program audience measurement field.

This time the battle is in the field of station coverage, in which both Standard Audit & Measurement Services and A. C. Nielsen Co. currently are conducting nationwide surveys, each trying earnestly to win industry support for its method.

A. C. Nielsen, head of his research firm, opened the battle last Monday with a charge that the mail ballot system of collecting coverage data used by Broadcast Measurement Bureau in its two studies and currently by SAMS "shortchanges" radio to an alarming degree (see earlier story, page 81).

Baker Counter-Statement

On Thursday Dr. Kenneth H. Baker, SAMS president, countered with a statement that in 1944 and 1945 BMB considered the personal interview method (which the Nielsen organization is using in its survey) "and discarded it as being unsuitable as a measuring instrument for a national study of station coverage."

The Nielsen blast was released concurrently with distribution of a brochure giving details of the new "Nielsen Coverage Service," first sales move of the new service following an abortive attempt to achieve a merger with SAMS. NBC, with whom the NCS study was worked out, is to date its only subscriber, but Nielsen officials are optimistic about winning widespread station support as well. SAMS subscribers include CBS Radio and some 400 stations.

Noting that the mail ballot technique "involves very serious errors arising from the impossibility of compiling a mailing list that is a true sample of all U. S. homes and the substantial difference in listening habits between families that reply and those which fail to respond," Mr. Nielsen stated that "a third and equally serious error results from the memory loss among respondents."

Family Interviews

He asserted the new NCS project will avoid undervaluation of radio station coverage by use of "personal interviews covering the entire family" and by checking Audimeter reports against interviews in the same households "to measure any shortage that may remain (either for radio or for any specific type of station) so that appropriate adjustment factors may be applied."

Dr. Baker, in his reply, pointed out that the BMB committees which rejected the personal interview method as a proper tool to use in measuring station coverage throughout the land "were composed of representatives of both the buyers and sellers of broadcast advertising. The decision was made after the examination of pertinent experimental and test data assembled and presented to the committees by BMB's director of research, John Churchill, now on the Nielsen executive staff.

"The decision was accepted by a large segment of the broadcasting industry and it generally was agreed that station audiences and station coverage would henceforth be estimated on the basis of returns to a mail ballot. It is hard, therefore, to believe that data from the personal interview will be accepted as 'a vastly improved replacement for BMB.'

"The personal interview is treacherous at best," Dr. Baker declared, stating that when 500 interviewers are used as in the NCS survey "uniformity is next to impossible to attain." In addition, he stated that "memory loss can be just as great in the doorbell situation as it is in ballot-marking, unless the interviewer resorts to prompting and then, of course, the bars are down."

Baker Comments

Admitting that mail ballots do reflect gaps in the respondent's memory, Dr. Baker pointed out that occasional listening to a station shown by the Audimeter but forgotten by the respondent would not be accepted by the buyer as "circulation."

"In the case of the two BMB studies," he reported, "buyers and sellers alike have learned from experience where this type of data is useful and where it must be used with care or be supplemented.

"The buyer is not helped, however, by being furnished data which result from 'doctoring' or 'treating' or 'correcting' what people said. It is hard to understand how the results of personal interviews can be combined with the returns from a mailed ballot, the mixture then seasoned with Audimeter findings and the whole concoction screened through the sieve of a biased program-roster." (About 10% of the NCS reports, those from the most remote areas, will be obtained by mail ballots.)

On Thursday morning Mr. Nielsen explained NCS to a meeting of some 80 station representatives in New York and that afternoon he repeated his explanation to the advertising press, augmenting the material in his brochure. Stations, either AM or TV, he said, are offered NCS on two different bases, a basic and a comprehensive service. The basic service includes reports on weekly audience—separately for day and night—for the total station area and for indivdual NCS areas, comprising individual counties or more than 10,000 population and groups of contiguous smaller counties; frequency of listening—six or seven times a week, three to five times a week, one or two times a week; number and per cent of radio homes and of TV homes in the station area; a map showing the station's coverage level in each NCS area; an NCS area report, and a sales promotion manual.

The comprehensive service includes the entire basic service plus average daily audience and four week audience figures; audience characteristics of the station audience by economic level, se ownership and family size, a compared with data for all hom in the station area; out-of-hom radio listening or TV viewin Special reports are also availabl

Charges for the Nielsen Cove age Service are maximum hour station rates, times 12 for radi times four for TV, less operatin allowance of $1,000. Discounts a allowed of 5-15% for prompt pu chase, 15% for omission of com prehensive features, 10% for pu chase of NCS No. 2 (to be ma in either 1953 or 1954) and 5 for subscribers to other Nielse services. Minimum station char is $750; maximum is $20,000 f radio, $15,000 for TV.

'Ham' Relays SOS

ONCE-IN-A-LIFETIME opportunity came to "ham" radio operator Ernest Schaufler, WMGM New York engineer, a fortnight ago. "Listening in" on his home-made receiver set, Mr. Schaufler received a coded SOS message from the 10,000-ton tanker *Michael* over the 600-meter band. The tanker, which had collided with an oil barge on the Delaware River, had sent its distress signal in vain. Because of rain and excessive static, no one near the river had received it. Decoding the message—saying tanker was still afloat, but that one man apparently had been lost—he notified authorities and newsmen.

MUTUAL-WOR BLUEPRINT

Is Complete

EXECUTIVE blueprint for the "combined operations" of Mutual radio network and WOR-AM-FM-TV New York under their new General Tire & Rubber Co. ownership was completed Friday. It is to become effective immediately.

The realignment, anticipated since General Tire's acquisition of control of MBS and the WOR properties earlier this year, and generally regarded as forerunner of reorganization of Mutual operations along standard network lines, puts MBS Executive Vice President William H. Fineshriber Jr. in charge of the combined Mutual-WOR radio operations.

Theodore C. Streibert, president of the WOR stations, was not mentioned in the memorandum detailing the changes to Mutual and WOR personnel.

It was understood, however, that he will work directly with MBS President and Board Chairman Thomas F. O'Neil in Thomas S. Lee Enterprises Inc.—General Tire's overall broadcasting properties, including Don Lee and Yankee Networks along with the WOR stations and about 58% stock interest in Mutual—with responsibility for special projects including the TV film syndication operation currently planned.

The combined operations plan was worked out by top-level executives including Mr. O'Neil, Executive Vice President Fineshriber, and J. Glen Taylor, veteran General Tire executive who was named a vice president of Thomas S. Lee Enterprises a few weeks ago [B•T, May 26]. Mr. Taylor has been concentrating on the combination-coordination project.

The memorandum outlining the new Mutual-WOR executive roster was circulated to network and station personnel late Friday, showing assignments as follows:

Mr. Fineshriber to assume charge of Mutual-WOR radio operations.

J. R. Poppele, vice president in charge of engineering for WOR radio and television, will be in charge of engineering for Mutual as well as the WOR stations.

E. M. Johnson, MBS vice president in charge of station relations and engineering, will continue vice president in charge of stati relations for the network.

Julius F. Seebach Jr., WOR-A TV vice president in charge programming, will be in this po for Mutual and for WOR radio.

Harvey Marlow will continue charge of programming for WO TV.

James E. Wallen, secretary a treasurer of Mutual, also w handle account and administrati operations for WOR radio-TV.

Robert A. Schmid, Mutual vi president in charge of advertisi public relations and research, a will be in charge of advertisi research, and public relations WOR-AM-TV.

Adolf N. Hult continues as vi president in charge of sales Mutual.

William Crawford continues sales manager of WOR radio.

R. C. Maddux WOR-AM-TV v president in charge of sales, w concentrate on WOR-TV sales, sisted by Robert Mayo, WOR-T sales manager.

'MORALS' INQUIRY

'Drys' Take Offensive as Hearings Begin

BACK into the English lexicon came two pre-World War I words—"hootchie-cootchie" and "shimmy"—as a subcommittee of the House Interstate & Foreign Commerce Committee opened its probe last week into "immoral" radio and TV programs.

The hearings, established by a resolution sponsored by Rep. E. C. Gathings (D-Ark.) [B•T, June 2, March 24, 3, Feb. 11], which were held three mornings, saw a parade of witnesses made up mostly of temperance leaders objecting to beer, wine and liquor advertising and drinking scenes.

The subcommittee, chairmanned by Rep. Oren Harris (D-Ark.), recessed last Thursday after completing the roster of congressional and civic witnesses. Only Rep. Gathings and Rep. Joseph R. Bryson (D-S. C.), adherent of "dry" forces, were Capitol Hill witnesses.

Industry Will Testify

Resumption of the hearings in another week or two is expected to see industry witnesses take the stand to rebut impressions left with the subcommittee that radio-TV programs are replete with licentiousness, horror, crime, drinking and vulgarity.

It is believed that NARTB officials will carry the ball for the industry. Whether representatives of networks or individual stations will appear was not apparent at the week's end. On Friday morning, the TV Code Compliance Committee was scheduled to meet with Rep. Harris and the subcommittee.

Following the industry, the FCC is expected to tell its side of the story. It has already complied with Rep. Harris' request by furnishing the subcommittee with a breakdown of program complaints.

Only specific proposals as to what Congress might do about the level of morality in radio and TV programs were:

(1) Continuance of hearings by the subcommittee to permit objections to be made to programs violating good taste—recommended by Rep. Gathings.

(2) Establishment of a National Citizens Advisory Board to act as a "rallying point" for those concerned with program level. This was recommended by Lloyd Halvorson of the National Grange. This is similar to the proposal of Sen. William Benton (D-Conn.) whose bill (S 1579) is before the Senate Interstate & Foreign Commerce Committee.

All witnesses, as well as subcommittee members, shied away from any suggestion of censorship or legislation. There was some talk of giving the FCC more power to deal with so-called objectional material on the air.

Only witness who cited specific shows in an original statement to the subcommittee was Elizabeth A. Smart of the National Women's Christian Temperance Union.

It was Rep. Gathings who set the tone of the hearings when he described one act of a *You Asked For It* program in which a young woman in a grass skirt did the "hootchie-cootchie" and ended it with a "shimmy" while bending backward with her hands on the floor behind her. In close proximity to her, Rep. Gathings said, was a young man "thinly clad."

In describing the incident, Mr. Gathings held up his hands and demurely wriggled his hips.

Rep. Gathings also alluded to improvements noticeable in TV programs since the TV Code became effective March 1. Necklines are higher, he said, calling attention to Dagmar's more modest exposure. But, he said, he did not think the industry could police itself in the long run. "Competition is keen and great financial stakes are involved," he said.

Other witnesses also expressed satisfaction with improvements in programs since the establishment of the industry's TV Code.

Mr. Gathings' prime objection, however, was to the number of crime shows on the air. He cited Thursday night, when three of the four TV outlets in Washington showed crime shows, while the fourth presented wrestling from Chicago. He also expressed a strong dislike of horror shows. "Long, bony fingers come at you, with deep, mournful music," he intoned.

Impact of such a cumulation of violence, Mr. Gathings emphasized, was on children. He admitted the programs were seen at 10 p.m., but declared that many children and adolescents were still up at that hour.

Statement by Rep. Arthur G. Klein (D-N.Y.) that Mr. Gathings had an alternative to watching such programs: "Don't watch the damn thing at all—turn it off," drew from Mr. Gathings the observation that such a statement was like saying, "Don't buy a TV set."

"Radio and TV are essential to the American home, like the automobile," he said.

Rep. Bryson, although mainly concerned with alcoholic advertising on the air, cited his opposition to programs which depict a "lack of reverence and respect for marital bonds." Some programs, he said, tend to discredit marriage vows, and deal with domestic unhappiness, marriage breakups, even the exchanging of wives. He also expressed the opinion that European films on TV were bad for morals.

Root of programming evils is the concentration of the broadcasting industry in New York City,

(Continued on page 34)

Not All 'Immoral'

ALL was not negative at last week's hearings by the Harris Subcommittee on "immoral" radio and television programs. Favorite programs of subcommittee members and witnesses were named as: Ed Sullivan, Ed Wynn, *The Lone Ranger*, *Gangbusters*, *Treasury Men in Action*, Fred Waring, Herb Shriner.

Herblock in *The Washington Post*

CANDIDATES' COMPLAINTS

FCC to Act

PROMPT action on the complaints of Sens. Robert A. Taft (R-Ohio) and Estes Kefauver (D-Tenn.) that radio-TV networks refused them time equivalent to that given Gen. Dwight D. Eisenhower was promised by the FCC last week. At week's end, the Commission was awaiting comments on the complaints from ABC, CBS and NBC.

Some observers thought the Commission might act this week.

Both Senators Taft and Kefauver held that radio-TV coverage of the General's Abilene speech and subsequent news conference was of a political nature and that they should have similar facilities afforded them in accordance with the mandate of Sec. 315 of the Communications Act. Section 315 provides that if licensees permit the use of their facilities to one candidate, they must provide equal time to all other candidates.

First refusal of time was made by CBS which denied requests for facilities equal to those allotted Gen. Eisenhower by answering that it considered the Abilene address "a news event and not a political speech" and therefore did not feel that the equal-time provision applied.

A similar CBS answer to Sen. Kefauver, who had requested 30 minutes of AM-TV time immediately following the General's talk, prompted Gael Sullivan, Mr. Kefauver's campaign manager, to say, "It is inconceivable how anyone at CBS could be so politically naive as to assume that this is a fact." Mr. Sullivan denounced radio-TV coverage of the General's "first political speech" as "a product of high-priced hucksters . . . dreamed up for the sole purpose of monopolizing" broadcast time for one Republican candidate.

ABC, reportedly asked by Sen. Taft for broadcast time Friday, was understood to have given a negative answer on the grounds that "All we are doing for Gen. Eisenhower is what previously we have done for you and other candidates."

The network pointed out that it had given free AM-TV coverage to the Senator's talk in Detroit Oct. 15, prior to its adopting in January a policy of charging political candidates commercial fees, and noted that Gen. Eisenhower had not had "available to him comparable ABC radio and television time." The network also pointed out that it had not granted the General's request for television time, since it would have required line charges not incurred by its Detroit coverage of the Taft talk.

A request to ABC from Sen. Kefauver was understood to have been answered similarly.

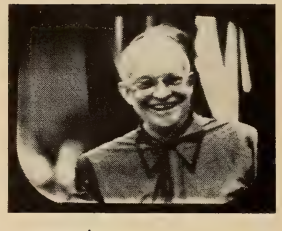
NBC denied time to Sen. Taft earlier in the week on the basis that the General's homecoming was of national interest and could be classified as deserving of legitimate news coverage, and spokesmen explained that NBC coverage of Gen. Eisenhower's activity was only in proportion to that offered other candidates while the General was still overseas. The network further explained that it did not consider Sen. Kefauver, a Democratic candidate, in direct competition with the General for the Republican nomination.

First Political Speech

WQXR New York, station of the *New York Times*, carried its first speech by a political candidate for the Presidential nomination when it broadcast the Abilene speech Wednesday, and acceded to Sen. Taft's request for equivalent air time. The station will broadcast a talk he is scheduled to give before the National Republican Club in New York from 1:30-2 p.m. EDT Thursday.

Radio-TV coverage by major networks and many local stations was almost constant as Gen. Eisenhower progressed through his Pentagon press conference Tuesday, his Abilene speech Wednesday

(Continued on page 36)



IN REVIEW

Program: Gen. Dwight D. Eisenhower's speech at Abilene, Kan., June 4, 7 p.m. EDT; live on ABC Radio, CBS-TV, NBC Radio and TV; delayed broadcast on CBS Radio.

DWIGHT D. EISENHOWER took his first excursion into politicking by television last week under circumstances so technically amateurish that they had a unique charm.

Insofar as appearances were concerned, his speech at Abilene could as well have been the unseasonally rainswept Fourth of July oration doggedly delivered by the local mayor to a drenched and dwindling crowd in any of thousands of small and medium-sized U.S. communities.

★

As Gen. Eisenhower spoke, Abilene townsfolk scuttled back and forth behind the platform, where the speaker could not see them but the television camera and several million in the audience could.

Applause was listless, for no assembly standing in mud with rain running down its necks can be expected to muster enthusiasm for anything but an end to its discomfort.

An unidentified but loutish functionary stood at the general's side, attempting periodically to pump up audience excitement by wildly clapping his hands.

As for the general, he had, within 24 hours, completed an astonishing transformation. The day before he had worn his immaculate, five-starred uniform to take leave of the Army. At Abilene on television he stood bare-headed in the rain, wearing a nondescript slicker. The poor quality of the rain-blurred picture seemed to have aged him overnight.

The appearances indeed were unprepossessing.

But despite the appearances, the substance of the man came through. Here again it was demonstrated that television shows a man for what he is, no matter what his surroundings.

For all his military background and its pomp and ceremony, Ike seems essentially an unassuming man. He seemed more than ever so at Abilene. He spoke clearly and with purpose. He read unfalteringly. The flat, midwestern voice was without theatrical effects but neither was it monotonic.

Against appalling odds, Ike was impressive. He should wear well on television.

NBC SPOT SALES

Div. Structure Completed

REORGANIZATION of the advertising and promotion division of NBC's National Spot Sales Dept., in progress for the past several months, has been completed, Thomas B. McFadden, department director, announced Thursday.

Two separate advertising and promotion units, one each for radio and television, have been established under the new plan, with Harold W. Shepard, manager of sales development, advertising and promotion for NBC Spot Sales, to direct both units.

Seymour Vall, whose writing-research background includes service with two publishing houses, has joined NBC as manager of the spot radio advertising and promotion unit, while the corresponding position for television has been assigned to the department's Elliott Eakin. Robert T. Howard, formerly associated with WCAP Asbury Park, N. J., and WCHU Charlottesville, Va., will serve as spot radio research supervisor, and the department's Alan Ewald will handle spot TV research.

RED CROSS MEET

CBC Plans World Airing

HUNDREDS of news and actuality programs will originate in 15 languages at the 18th International Red Cross conference at Toronto July 23 - Aug. 9. The Canadian Broadcasting Corp. plans to provide broadcasting facilities for networks and stations throughout the world.

W. John Dunlop, CBC supervisor of institutional broadcasts, will head the radio committee for the conference. Radio co-ordinator will be Richard H. Gluns.

Amateur Notice

WARNING was issued by FCC last week that amateurs seeking extra class ratings must submit sufficient evidence of their holding an amateur license prior to April 1917. This must be in the form of license documents, correspondence or sworn statement. Those who held such license prior to April 1917 and now hold a general class license are not required to take code test or written element in examination for the extra class rating, comparable to advance class, FCC officials explained.

BAB AD DRIVE

Mapped at N. Y. Meet

SPECIAL emphasis on radio coverage by stations and networks was called for in BAB's plans for a national advertising campaign to promote radio [B•T, June 2], developed during a meeting of the BAB advertising committee held in New York Thursday.

Radio advertising, it was noted, will be supplemented with newspaper ads in major cities and space in various trade magazines, according to the committee, named to work out themes and copy and to select media for the pro-radio drive. Under the chairmanship of Louis Hausman, administrative vice president of CBS Radio, the advertising committee is working on the campaign in conjunction with BAB's permanent promotion committee, headed by Donald W. Thornburgh, president of WCAU Philadelphia.

Members attending the Thursday session included Robert A. Schmid, MBS vice president; William McGrath, managing director of WHDH Boston; H. Preston Peters, president of Free & Peters; Winslow Leighton, president of WSNY Schenectady; Edgar Kobak, chairman of the BAB executive committee; William B. Ryan, BAB president, and Messrs. Hausman and Thornburgh.

'FREE' ADS

FTC Clearing Docket

FEDERAL TRADE Commission last week claimed it is "rapidly clearing" its docket of "many 'free goods' cases" since deciding that the word "free" should be banned from advertising claims such as in the Book-of-the-Month case.

FTC said 33 firms have notified it that they have "voluntarily discontinued use of the word . . . in advertising their products." Cases are being settled administratively through correspondence at a minimum of expense, the commission noted, asserting, "This cooperation from advertisers is encouraging. It means they are in accord with the commission's policy. . . . It also means that these cases will not have to be litigated and there will be . . . a saving of time and money."

There had been signs of confusion among agency, advertiser and station circles over the word's use in broadcast and published advertising claims [B•T, May 26].

Togio to L&N

A THIRD new executive, Adolph J. Togio, is to join the new Lennen & Newell agency, it was announced last week (see earlier story, page 80). Mr. Togio, who resigned as vice president of William Esty & Co., New York, is to become vice president, general manager and member of the board of L&N.

RTMA MEET

Sarnoff To Be Honored

FIRST Medal of Honor awarded by Radio-Television Mfrs. Assn. will be presented to Brig. Gen. David Sarnoff, board chairman of RCA, at the 28th annual RTMA convention June 23-26 at the Palmer House, Chicago.

The award goes to Gen. Sarnoff "for his outstanding contributions to the advancement of the radio-television industry."

Presentation will be made during the annual RTMA banquet June 26. The entertainment program will feature Rise Stevens, opera singer, who will appear through courtesy of RCA and NBC.

Set, parts, tube and equipment manufacturers will meet in separate sessions during the four-day industry conference, according to James D. Secrest, RTMA general manager. Divisional membership meetings will be followed by election of officers and directors for the new fiscal year. Past officers and directors of RTMA will be honored at a June 25 dinner, with present officers and directors as hosts.

John T. Koehler, chairman of the Renegotiation Board, will speak at the June 25 luncheon on administration of renegotiation legislation as it affects radio and electronic manufacturers. The RTMA Government Relations Section has asked clarification of some problems of renegotiation.

The election involves 17 directors as well as chairmen of the five divisions and executive committees. The board of directors on the final day will elect a chairman, five vice presidents, a treasurer and other association officers. RTMA President Glen McDaniel is not involved in the election process since he is serving a three-year term. Robert C. Sprague is current RTMA board chairman and will preside at the board meeting.

President McDaniel and Leslie F. Muter, RTMA treasurer and co-chairman of the convention committee, will make their reports to the membership at the closing luncheon. Co-chairman of the committee is Charles M. Hofman.

Alford Promoted

ROBERT H. ALFORD, attorney with the Renewal and Transfer Division of FCC's Broadcast Bureau, last week was appointed chief of the Transfer Branch of that division. He succeeds Walter Powell, who earlier had been promoted to division chief. Mr. Alford last week also was promoted from captain to major in the reserve of the Judge Advocate General Corps of the Army. From December 1950 until April this year he was on military leave from FCC to serve on active duty with the Army at Fort Meade, Md. A 1940 graduate of Harvard Law School, Mr. Alford joined the FCC as an attorney in 1945.

OPERATOR RULES

FCC Solicits Comments

PROPOSALS for changes in FCC's transmitter operator requirements, which would eliminate the engineering headaches of a substantial proportion of the country's AM stations and many FM outlets, were issued by the Commission last week.

Requested in petitions filed earlier with the FCC by NARTB [B•T, May 12, Feb. 4], the proposals involve:

(1) Persons holding less than first class radiotelephone operator permits would be allowed to stand regular transmitter watches at AM and FM stations employing non-directional antennas and operating with power of 10 kw or less.

(2) Remote control of the transmitters of such stations would be allowed.

FCC did not specifically propose to make the operator requirement changes requested by NARTB, but the notice of proposed rule-making said the "Commission believes that the information contained in the petition . . . raises questions of sufficient importance as to warrant the institution at this time of rule making proceedings looking toward the possible adoption of amendments to the Commission's rules of the nature discussed in the petition."

If adopted, observers noted, the practical effect of the changes would be to ease the staff and operating cost problems of virtually all local channel stations, a substantial number of daytime-only outlets and many other AM and FM stations.

On First Class Operator

The changes would not permit stations to operate without any first class engineer, however, FCC officials pointed out. They only would relax the requirement for a first-class operator to personally attend a transmitter all the time it is operating, as is necessary now, and would permit remote control operation of certain transmitters.

Inviting comments by Aug. 4, FCC outlined a number of questions to which information pertaining to the proposals is desired. Two of the questions touched on fulfillment of emergency operation under the Conelrad plan (control of electronic radiation to prevent enemy planes from "homing" on broadcast signals).

In a separate action, the Commission waived provisions of its rules and granted special temporary authority to WTIP Charleston, W. Va., to operate its transmitter by remote control. At the same time, WGNC Gastonia, N. C., was granted special authority to operate its transmitter by "remote supervision," that is, by a restricted-permit operator who would be under the supervision of a first-class operator located at the transmitter of WGNC-FM, seven miles distant.

Both special authorizations are reported the first of their kind to be permitted by the Commission with respect to commercial broadcast stations.

WTIP is a 250 w fulltime station on 1240 kc. WGNC is assigned 1450 kc with 250 w fulltime. Both outlets noted operating economies would be possible while WTIP particularly cited the "acute shortage of operating personnel."

In substance, NARTB's proposed amendments to the Commission's operator rules would authorize restricted operators to put a station on and off the air, keep the transmitter log, make external tuning adjustments, make such other minor adjustments as may be required as a result of primary power supply variations and failures and make replacement of only such defective parts as tubes, fuses and other components designed for simple plug-in replacement.

The changes would require each station to employ a first-class man to be responsible for and make all internal tuning adjustments, major repairs and overhauls and all other technical installations or corrections not authorized to be done by a lower class operator.

NARTB originally had asked for the proposed changes to apply to stations of maximum power of 5 kw, but revised its request a fortnight ago to specify 10 kw.

For about a year FCC has permitted stations to operate with less than a first-class operator at the transmitter for up to 120 days under emergency conditions. These temporary authorizations are cleared by FCC field engineering offices.

During World War II the Commission similarly relaxed its transmitter operator requirements but this was terminated in 1946 when the number of engineers available returned to normal.

The Commission in 1948 proposed to revise its operator licensing requirements and held a hearing on the matter, but declined to take positive action on the grounds that insufficient evidence had been presented by broadcasters to support the revision. The proposed revisions at that time would have made operator licenses more nearly match the size of the station.

NARTB's petition explained the proposed changes would involve no degradation of the engineering standards of any station and will permit many stations, particularly those smaller stations in less densely-populated areas, to improve and expand their program service.

The petition pointed out the re-

(Continued on page 92)

Sorry, No Regulation

FCC DOESN'T regulate the set repair business. The Commission put out a public notice to that effect last week after it learned in several instances that radio and TV home repair services have advertised such services or their service personnel as being "licensed by FCC." The Commission explained it is "not authorized by law and does not license persons to engage in the business of installing or repairing radio and television home receiving sets."

MAINE RADIO HOMES

96% Density—Census

RADIO ownership in the state of Maine had reached 96% when the 1950 decennial Census was taken, with highest concentration of radio homes reported in the city of South Portland, 99.5%. In the Portland urban area 98% of homes had radios, according to Housing Census figures compiled by the U. S. Census Bureau.

Because of lack of nearby TV service, the percentage of TV homes in April 1950 was low, amounting to 1.2%. Highest concentrations were found in the city of Sanford, 6.5%, and York County, 4.5%. At the time the census was taken, there were fewer than five million sets in the nation whereas ownership now runs over three times that figure.

Urban radio concentration, 97.8% of homes, was compared to 96.2% of urban and rural nonfarm homes, 94.6% of the rural farm homes and 93.9% of rural nonfarm homes.

Standard Metropolitan Area figures not available for 1940.

* Not available or not comparable.

SOURCE: Bureau of the Census, Department of Commerce, Washington 25, D. C.

The statistics in this table are extracted from a final report of the 1950 Census of Housing, Series H-A, No. 19, for Maine, which will be available in about six weeks from the Superintendent of Documents, Washington 25, D. C., at 35¢ per copy.

Statistics on distribution of the population in Maine are presented in a final report of the 1950 Census of Population, Series P-A, No. 19, now available from the Superintendent of Documents at 15¢ a copy. Descriptions and maps of "urbanized areas" are presented in this report.

Statistics on characteristics of the population in Maine are presented in a final report of the 1950 Census of Population, Series P-B, No. 19, available from the Superintendent of Documents, at 35¢ a copy. Descriptions of Standard Metropolitan Areas are presented in this report.

A Standard Metropolitan Area is generally described as a county or group of contiguous counties with at least one city of 50,000 or more. In New England, it is defined on a town or city rather than county basis.

An urbanized area contains at least one city of 50,000 or more and includes surrounding closely settled incorporated and unincorporated areas.

NARTB BOARDS

Radio, TV Units Set Meetings This Week

NARTB'S two boards of directors—Radio Board and Television Board—will hold separate meetings this week to take up financial, membership and related problems.

The Television Board meets Monday (today) and Tuesday at The Homestead, Hot Springs, Va. This board last met during the NARTB convention in Chicago March 31-April 2.

The Radio Board meets Thursday-Friday at NARTB headquarters in Washington, first meeting since the two boards met jointly at Bandera, Tex., in mid-February.

Appointment of two board committees was announced last week by President Harold E. Fellows. They will handle arrangements for the 1953 NARTB convention in Los Angeles and problems dealing with association by-laws.

Clair R. McCollough, WGAL Lancaster, Pa., was appointed chairman of the special convention committee. Size of this committee has been expanded to include both board members and broadcasters not now on the board. The group will meet June 24 at the Palmer House, Chicago, to start work on arrangements for the 1953 meeting.

Serving with Chairman McCollough are Hugh Terry, KLZ Denver; Albert D. Johnson, KOY Phoenix; Calvin J. Smith, KFAC Los Angeles; Howard Lane, Marshall Field stations; Henry W. Slavick, WMC Memphis; Jack Harris, KPRC Houston. Mr. Lane is a past chairman of the convention committee.

By-Laws Committee

The by-laws committee, comprising board members, again is headed by A. D. Willard Jr., WGAC Augusta, Ga. Leonard Kapner, WCAE Pittsburgh, was re-appointed. New members are Merrill Lindsay, WSOY Decatur, Ill.; Robert D. Swezey, WDSU New Orleans; Kenneth Carter, WAAM (TV) Baltimore.

NARTB's Radio Board will cope with TV's inroads on listening and the sagging trend in network AM rates. The association's AM Committee at a May 22 meeting [B•T, May 26] adopted a resolution calling for one of the most fundamental research jobs in recent radio history. Richard Allerton, NARTB director of research, will conduct a study of radio station operations to find out why some stations are successful and others are not. Preliminary studies show radio is priced too low in most markets, according to Mr. Allerton.

Paul W. Morency, chairman of the All-Radio Affiliates Committee, will report on work of that group, including an Advertising Research Foundation study of audience measurement services. This study is designed to show the value of each type of measurement service, with weaknesses and limitations delineated. Edgar Kobak, WTWA Thomson, Ga., an NARTB radio director, is president of ARF, which is supported by agencies, advertisers and media.

Both radio and TV groups are scheduled to consider the question of NARTB membership and study results of the new combination dues plan under which discounts are given for stations under common ownership. Both boards will review progress of the "Register and Vote" campaign sponsored jointly with American Heritage Foundation.

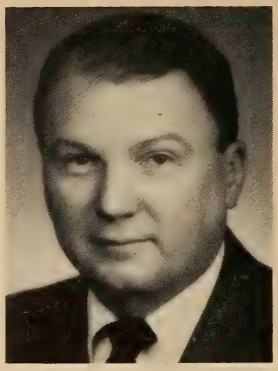
Financial problems will be taken up by the boards. The TV Div. of NARTB operates with an autonomous budget aside from the basic $65,000 payment made to the association for overhead. Both radio and TV budgets, approved in February for the fiscal year which started April 1, are on a three-month basis.

A report on the operation of the Television Code will be made to the TV Board by the Television Code Review Board headed by John E. Fetzer, WKZO-TV Kalamazoo. The code body met last Thursday and Friday in Washington (see story page 5).

Both radio and TV directors will be given legislative reviews summing up current Washington developments (see radio-TV probe story page 27).

The radio group will hear reports on work of special committees handling the effort to secure amendment of FCC rules covering transcription identification and relaxing of rules covering first-class operators and remote operation of transmitters (see remote story page 29).

SUN GLASS SPOTS



Station Free Time Asked

PACKET of "spot announcements" for free broadcast has been received by stations from the public information department of Sun Glass Institute, 511 Fifth Ave., New York.

"As a public service the Sun Glass Institute has put together the following brief spot announcements with particular reference to motorists," stations are advised.

Obviously pleased with its public service approach, the Institute adds, "You will be performing a public service by bringing these facts to the attention of thousands who may be gambling with their safety."

It's especially timely to carry the announcement, according to the Institute, "with warm sunny weather upon us." Without being obviously commercial about it, the Institute warns, "Scientists and eye specialists have been warning the public to use care in safeguarding their eyes from too much sun."

RACING NEWS

Radio-TV Not in WU Order

TRANSMISSION of racing news to radio and TV stations will not be affected under provisions of Western Union's proposed tariff revision, which was described last week in a day-and-a-half hearing before FCC Hearing Examiner Fanney N. Litvin.

FCC itself, however, has been studying race broadcasts with respect to their possible use in illegal gambling and has designated for hearing the licenses of 16 stations [B•T, May 26, March 3].

Western Union told the Commission it seeks to further restrict the people it may serve with racing wires to prevent illegal use of the legitimate news information. The new tariff would permit the leasing of such facilities only to radio and TV stations, to press associations and to publications and newspapers having second-class mailing privileges.

In the past, Western Union explained, it has been possible for a certain subscriber to qualify as a "news service" and to order "drops" in pool rooms and other unidentified locations. In such cases, Western Union would not know how the information was being employed, it maintained.

"While transmission over leased wire facilities is by the subscriber and not the telegraph company," Western Union's Walter Semingsen told FCC, "Western Union does not undertake to censor the information transmitted. However, under the existing tariff . . . all lessees must agree that facilities will not be used for any illegal purpose. The company promptly discontinues service if it receives notice from a recognized law enforcement agency that the service is being used contrary to law."

FCC has not been concerned with race information broadcasts as such, but only with respect to the rapidity with which race results are aired and the amount of detail given, i.e., betting odds, track conditions, scratches, and jockey changes.

ANTI-CENSORSHIP

Johnston Urges Media Unity

ERIC JOHNSTON, president, Motion Picture Assn. of America, last week called for all media to present a united front against encroachments of censorship.

The MPAA president warned that when one medium is threatened by censorship, all are threatened.

Mr. Johnston spoke Wednesday before some 130 newspaper editors and motion picture representatives at the *Hartford Times'* Motion Picture Industry Symposium, held at the *Times* Tower atop Talcott Mt. near Hartford. The *Hartford Times* is licensee of WTHT Hartford. Mr. Johnston said:

The screen has been fighting for freedom of expression. Just recently we won a magnificent, though not yet complete, victory in the Supreme Court of the U. S. The Court said that the motion picture is entitled to the free speech and free press guaranties of the Constitution.

In line with this principle, the Supreme Court has cut away some of the shackles of motion picture censorship. We shall keep on fighting until the last knot is slashed, and the screen, as a matter of constitutional right, enjoys the same liberties and freedoms as the press.

Leveling a criticism at newspapers in general, Mr. Johnston reminded his audience that, "Sometimes, I want to tell you, we have felt pretty lonely in our fight for freedom. We haven't always had an awful lot of help. Sometimes, even we have found that the press—with its championship belt tight around its middle—has been indifferent to what has happened to the screen.

"I'm confident, though," he added, "that day is just about over. I think the press realizes that when one medium of expression is attacked, it's a knockout punch to them all."

Driving home this point, the MPAA president declared, "It's a knockout punch to us all whenever a state censors a motion picture.

"It's a knockout punch to us all whenever government seeks to censor radio or television.

"It's a knockout punch to us all when a medium of the press—magazines and books—must answer to a congressional inquisition.

"If any one of us sits back and allows these serious threats to freedom of expression to go unchallenged," Mr. Johnston warned, "all of us will be the victims—and the whole structure of our basic liberties will be endangered.

"We should all put on our gloves and get into this fight," he declared.

FTC Cites Firm

HYMAN KATZ and Louis Ginsberg, trading as Penn Upholstering Co., Baltimore, are charged in a Federal Trade Commission complaint with misrepresenting the quality and value of their reupholstering work and the materials they use. Firm is said to have falsely represented its work in radio and TV commercials as well as in other media. Hearing was set for Washington, July 10.

More Samples from the WHO Mailbag

Gentlemen:

I want to express my thanks and appreciation for the last several years of public service that you have given to the general public and also to motoring public in general.

Many times in the past, your news as to the weather and complete road conditions has altered our course of highway travel. My only hope is that in the near future, other states might follow in your path to help in so complete a safety measure. Regular weather reports given out by most stations are not enough to be of much help when over the road truck traffic is depending on positive conditions. You will probably never hear of it, but your station has saved the Trucking Industry many thousands of dollars by its road conditions report.

I, for one, was delayed in a nearby state for two days because of icy highways. Before starting I had tried to contact local police and newspapers for weather conditions and with little success. The report was, colder. I could not reach WHO as we were too far away. If I could have reached your station, I could have altered my route and would not have had any additional mileage. I also made a trip into the snow area of South Dakota last winter on the strength of your station's weather report.

There are more motorists who depend on WHO for their news and road conditions than from any other source. I, for one, am very grateful for having an Iowa station that is interested in the safety of its motoring public.

J. E. McCULLOUGH
McCullough Transfer Co.
Mt. Pleasant, Iowa

Dear Mr. Woods:

Your courtesy in making it possible for some movie scenes to be taken in the WHO studio was greatly appreciated. It was a joy to work with you and members of your staff who cooperated so fine in making arrangements for this filming as well as participating in it.

When the first contact was made with you it was not our intention to spend so much time in your studio. However, it did mean a great deal to the folks from the International Film Foundation as well as for the other participants to be able to take the other sequence of the class also in the studio.

Thanks so much for your help and if we may ever be of assistance to you do not hesitate to call on the Extension Service.

Sincerely yours,
LOUISE M. ROSENFELD
Assistant Director
Cooperative Extension Work
State of Iowa

Gentlemen:

I wish to extend to you the thanks of our community for your announcements for our school and also for the Lions Club. It is a wonderful service. Your coverage is nearly 100% here.

We heard you say how many announcements you made in those few days. Would you mind sending me that number?

Thanks so much.

Yours,
L. R. WELKER
Pres., Murray School Board,
and also Lions Club Member
Murray, Iowa

Dear Sir:

Thank you very much for your wonderful cooperation in scheduling our spot announcements.

It is only through such a program that we can hope to compile the statistics necessary to carry on our work—to find the cause and cure of multiple sclerosis.

Your valued assistance in helping us achieve our aim is sincerely appreciated.

Cordially,
CORNELIUS H. TRAEGER, M.D.
Medical Director
National Multiple Sclerosis Society
New York, N.Y.

Dear Mr. Woods:

We want to thank WHO for the fine cooperation in presenting the Quiz Kids program on Saturday, March 11. We have heard many excellent comments about this program. We hope that it measured up to your professional standards.

The children seemed to enjoy themselves and we felt that they were remarkably poised. All the WHO personnel with whom we worked were most cooperative.

Thank you again for the opportunity that you gave us to show our interest in handicapped children and to demonstrate their ability.

Yours sincerely,
MRS. DOROTHY PHILLIPS
Executive Director
Society for Crippled Children
and Adults, Inc.
Des Moines, Iowa

Gentlemen:

I greatly appreciate your broadcasting the program "The New Frontier." Such programs should be an important factor in the effort to eliminate prejudice. I hope that they may continue.

Yours sincerely,
ERMA X. ANDERSON
Des Moines, Iowa

Topnotch time buyers have told us their work sometimes makes them too "statistical"—sometimes makes them forget that what they're really trying to buy is listeners—confidence—*friends.*

Out here at WHO, we've created millions of friends who know we have earned their confidence. Our mailbags prove it. So do our advertisers' *sales records,* month after month and year after year. . . .

For Posterity

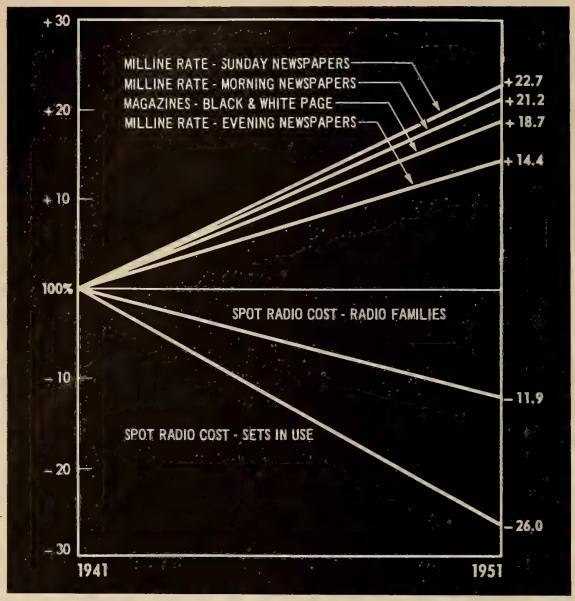
A RADIO transcription was among memorabilia of 1952 to be included in a sealed metal box placed in the cornerstone of the new $275,000 administration building at the Port of Seattle's Fishermen's Terminal. Transcription so honored was of an interview by W. B. Heil, KOMO Seattle's *The Old Boat Puller*. *The Old Boat Puller* is aired six days weekly and directed at Puget Sound area commercial fishermen.

Spot Costs Down

(Continued from page 23)

magazines and the increased milline rates of newspapers on the basis of circulation without considering readership, but when he came to figure radio costs he introduced a new element—listenership—the parallel to which he did not apply to the print media."

NARTSR commented that while "print media are bought on circulation, with minor after-measurement," broadcast media are purchased on "the circulation equivalent of radio sets and radio homes, plus audience measurement for each quarter-hour, each program, announcement, station break. The measurement beyond circulation in broadcasting is there, even though it is universally admitted that the ratings underestimate the real listening audience."



Secondary set listening, out-of-home listening, portable sets, auto sets, store sets, etc., not covered adequately by ratings, are all pluses for spot radio, NARTSR noted.

The increase in spot radio time sales from $45.7 million in 1941 to $134 million in 1951 enabled station operators to absorb increased operating costs instead of passing all of them along in increased rates, giving advertisers using this medium the benefit of lower unit costs produced by the increased volume of spot business, NARTSR pointed out.

The data in the accompanying charts and tables should make the advertiser "quite happy," NARTSR concluded. "His advertising messages in all media cost less than the per cent increase in significant economic fields, so the advertiser is able to buy his advertising in any one of these three major media at a price that represents in two of them only a fraction of the general increase in commodity and other prices, and in the third (spot radio) at an actual decrease."

NFL Suit Delay Seen

THE NATIONAL Football League trial, scheduled for June 16 in Federal Court at Philadelphia, may be postponed a week. The league is charged with violating the Sherman Anti-Trust act by curtailing telecasts and broadcasts of its games. U. S. District Court Judge Allan K. Grim indicated at a pretrial conference with attorneys that the trial date might be delayed because of a civil suit now in its third week in his court.

BAN RESOLUTION

Senate Action Unlikely

ASSURANCES that the resolution banning radio microphones and TV cameras from open Senate committee hearings [B•T, May 26] would not be pressed in the Rules Committee was given last week by Sen. Carl Hayden (D-Ariz.).

In a conference with NARTB Government Relations Director Ralph Hardy, the chairman of the Senate Rules Committee said he doubted whether anything could be done on the resolution since adjournment was only a month away.

He expressed the belief that a more favorable time for consideration of the resolution might be in the new Congress next year. At that time, he said, if the Rules Committee decided to give the ban serious consideration, the industry would have full and fair hearing.

The resolution has been referred to the Subcommittee on Rules. Members are Sens. Hayden, A. S. Mike Monroney (D-Wyo.) and Margaret Chase Smith (R-Me.)

Sen. McCarran's resolution would ban radio, TV, electrical recording instruments and still photographers from Senate public hearings. It would accomplish this by adding a new rule to the Senate standing rules, providing that no Senate committee could permit radio, TV, recordings or photographs to be made in the room in which the committee meetings were taking place.

RWG STRIKE

May Be at Convention Time

RADIO WRITERS Guild, which has been waiting since its network contracts expired Oct. 1 to settle news writers' grievances, may wait a few weeks longer to call its strike at a time when the networks would be hardest hit: During national political conventions in July, when news writers will be at a premium.

The union, which had voted to strike some weeks ago and had received strike approval from its parent, Authors' League of America, reported last week that a strategy meeting — between its strategy and strike committees— was to be held late in the week. This follows the return of Ira Marion, eastern region vice president, from Hollywood conferences with west coast and central RWG unit representatives. Mr. Marion reported only that his union was trying to arrange "a tight time schedule" before walking out.

Federal mediation, which has continued in spite of the union's vote to strike against NBC, CBS and ABC, has not made much progress in seeking commercial fees for network staff newswriters. Union argues that its members deserve increases, not only because other unions have been granted them, but because more and more staffers are working on new radio documentaries which combine narration and tape recorded segments.

Like onions go with hamburgers

That's how profitable advertising goes with W-I-T-H in Baltimore! And how the local merchants do know it! *W-I-T-H regularly carries the advertising of twice as many of them as any other station in town.*

Here's why: W-I-T-H delivers more listeners-per-dollar than any other radio or TV station in Baltimore. And this BIG audience, at such LOW rates, produces *low-cost results!*

W-I-T-H can do it for you too. Get in on this *natural* combination—low-cost, resultful advertising and W-I-T-H. Your Forjoe man will give you all the details.

WFBR

ABC NETWORK

5000 WATTS IN BALTIMORE, MD.

'Morals' Inquiry Hears 'Drys'

(Continued from page 27)

ABC radio commentator Paul Harvey told the subcommittee. The low level of radio and TV programs is due to the fact that performers, particularly comedians, reflect the "bawdy night life" environment of Broadway and "Manhattan studio audiences," he charged.

As to newscasts, he referred to an "independent" 1944 survey of 38 radio commentators showing that only five could be considered of right wing persuasion and that only one newscast originated west of the Hudson or Potomac Rivers. He declined to discuss individual commentators, but referred to them as "night club and Greenwich Village commentators."

Mr. Harvey, who is on the ABC radio network five days a week (1-1:15 p.m.) and on Sunday nights (10-10:15 p.m.) originating in Chicago, cited *The Thin Man* series which, he said, made him blush even in front of his wife.

"The subtleties and varying degrees of purple humor," Mr. Harvey said, "are rarely sufficient in single cases to inspire a housewife in Colorado to object."

Defends Home Town

Mr. Harvey's references to the pernicious influence of New York roused Rep. Klein to a spirited defense of his native city. Most New Yorkers, he said, were as provincial, as residents of other areas, and were not steeped in, corruption and sex as intimated by Mr. Harvey. Most studio audiences are filled with people from out of town, he said. When Rep. J. Edgar Chenoweth (R-Col.) remarked that New York could not be considered part of America, he drew a heated rejoinder from Rep. Klein.

Strongest objection to beer and wine advertising was presented by Miss Smart. She documented her statement with a review of one afternoon and evening of viewing of WNBW (TV), the NBC station in Washington.

Excerpts of her comments on what she saw follow:

> It started out with a rather good play at 4 p.m. . . . but the background of the story is an alleged murder . . . brings in question of mercy deaths. Then at 5:15 the "Gabby Hayes Show," a western—and most westerns deal with scenes of violence . . . followed "Howdy Doody" . . . and then "The Range Busters"—more shooting and more violence. At 6:50 there was an ad for Gunther's Dry Beer . . . "We're having a party—how about you. Yes, you can enjoy glass, after glass, after glass." Note the suggestion to drink in excess . . . "Kukla, Fran & Ollie" followed shortly. Then some very low necklines on the "Willis Conover Show," dropped almost off the shoulders. Dinah Shore and a plunging neckline. At 8:15 a repetition of "Go, Get Gunther." Some cigarette ads. Groucho Marx, in "You Bet Your Life," questioning a young woman who says she's a "skip chaser" (meaning a person who pursues delinquent debtors). He remarks, "A strip-teaser. That's fine. I'm tired of this namby-pamby stuff." At 8:30, "Treasury Men in Action" chasing and unearthing a still. At 9 o'clock some more police action uncovering a jewel robbery. Later on "Private Eye" and kidnapping. Then "Foreign Intrigue," a thriller chase . . ., by Ballentine's. "If you're at your favorite tavern, order up. If you're at home get a bottle out of the refrigerator." The hero, the foreign correspondent, drinks the beer to encourage the audience to do likewise.

Among other programs at which Miss Smart pointed the finger of distaste were Pick Temple's *Cowboy Playhouse*, on WTOP-TV Washington; *Ken Murray Show* on CBS-TV (sponsored by Anheuser-Busch); *Halls of Ivy* on NBC radio (sponsored by Schlitz).

Appearing in behalf of dry forces in addition to Miss Smart, were: Dr. J. Raymond Schmidt, International Order of Good Templars and National Civic League; C. S. Longacre, National Temperance Society; Lloyd Halvorson, National Grange; Bishop Wilbur E. Hammaker, Methodist Church.

In essence, testimony of the "dry" witnesses was reminiscent of the hearings on the Johnson-Case bill held by the Senate Interstate and Foreign Commerce Committee earlier this year [B•T, Feb. 11, 4]. That bill, which would have barred liquor ads from the airwaves, was killed by a 7 to 6 committee vote. Most of the witnesses had appeared before the Senate committee in favor of the bill.

Scheduled as a witness was George Lewis, director of the National Assn. of Gagwriters, but he was not present when called. In a news release about his scheduled appearance, NAG said it was campaigning to raise the standards of humor in the U. S., declared that the probe "will focus attention on the decline of comedians and the need for training grounds for new ones."

Active in questioning of witnesses were Reps. Klein, who seemingly defended the general level of radio-TV programs; Chenoweth, who kept inquiring for details of what witnesses described as objectionable material, and Joseph P. O'Hara (R-Minn.), who questioned whether Congress could constitutionally censor programs. Other members of the seven-man subcommittee are Reps. Homer Thornberry (D-Tex.), Harmar D. Denny Jr. (R-Pa.) and F. Ertel Carlyle (D-N. C.). Mr. Carlyle was absent during last week's sessions.

Reference to the Milton Berle skit of several weeks ago where school children's oath of allegiance to the flag was alleged to have been burlesqued was characterised by Rep. Denny as "destroying the sacredness of American institutions."

In answer to an avowal of irritation by Rep. O'Hara at a large amount of advertising on the air, Rep. Gathings answered that he never felt irritated because he realized that a sponsor was necessary to bring the program into his living room. In fact, he said, he "appreciated" the fact that the sponsor was bringing his favorite programs into his living room.

Rep. Harris appeared perturbed at newspaper reports which implied a burlesque aura to the hearings. He also warned the broadcasting industry to take the hearings seriously.

MRS. JAY D. WHITHAM, chairman, Nassau County Chapter Canteen Service, American Red Cross, supervises while George Ball, public affairs director, WHLI-AM-FM Hempstead, L. I., and Paul Godofsky, WHLI president-general manager, mix cake batter. WHLI presented the cake June 5, the chapter's 35th anniversary. In addition, June 5 was WHLI "Blood-For-Korea" Day. More than 14 hours of air-time were to be devoted by WHLI Monday to the blood campaign.

ALBERT D. LASKER

Pioneer Agency Owner Dies

ALBERT D. LASKER, 72, retired head and principal owner of the former Lord & Thomas agency (now Foote, Cone & Belding), and co-founder with his wife of the Albert and Mary Lasker Foundation for Educational Medical Research, died in New York May 30 of cancer.

Mr. Lasker was born May 1, 1880, in Freiburg, Germany, of American parents touring Europe at the time.

In 1898 he went to work for Lord & Thomas at $10 a week. Twelve years later he owned the agency. The period from his first employment to his retirement saw the firm's annual billings rise from $800,000 to $50 million.

Mr. Lasker retired in 1942 when he dissolved the firm and turned the business over to his subordinates, who continued it under the name of Foote, Cone & Belding.

The Lasker Foundation was established in 1943. One of its primary concerns has been cancer research.

Mr. Lasker was married three times. His first wife, Florence Flora Warner, died in 1936. Two years later he married actress Doris Kenyon Sills Hopkins. They were divorced in 1939. His third marriage in 1940 was to Mrs. Mary Woodard Reinhardt, who survives. Other survivors include three children by his first marriage.

Jack Parker Resigns

JACK PARKER, vice president and general manager of Saginaw Broadcasting Co., licensee of WSAM Saginaw, Mich., has resigned, according to Milton Greenebaum, president. Mr. Parker plans to enter the agency field.

When a station is so programmed that the listener is assured of high type, diverting and diversified programming, suitable for the listening of every age and interest, the listener acquires confidence in, and respect for the station.

This confidence is carried over into a confidence in the products and services advertised on the station.

That this confidence rings cash registers is verified by the advertisers on WREC. Won't you ask them?

And, remember, — WREC costs 10.1% less than in 1946, and has the highest Hooper rating in Memphis.

CBS Radio Sells $1½ Millions

(Continued from page 25)

probably starting the first week in July, through Foote, Cone & Belding, New York, while Sonotone Corp. was said to be negotiating for a daytime show (perhaps in the *Arthur Godfrey Time* segments open and not taken by Frigidaire). Quaker Oats was reported scheduling a 3:50-4 p.m. EDT show Mondays, Wednesdays and Fridays, commencing in the fall with the exact program to be selected in the meantime, and Chesebrough Mfg. Co. was negotiating for renewal of its *Dr. Christian* show (Wed., 8:30-9 p.m. EDT) for the 16th year.

In the meantime sponsors of the CBS Radio affiliates meeting scheduled in New York July 1-2 reported that in the first week after invitations went out more than half the stations—or approximately 100—had indicated they would participate. With three weeks yet to go before the meeting, they appeared confident that virtually the entire roster of CBS Radio affiliates would be on hand. Officials of about half a dozen stations have indicated they cannot be on hand, owing to other commitments.

The meeting was called to discuss "the current network radio situation," with the dark prospect of another round of network rate reductions expected to draw the limelight. The affiliates will meet privately the first day and then be joined by top CBS and CBS Radio officials on the second. The meeting plan was worked out by affiliates in consultations with network executives, who view the sessions as a constructive method of approaching an admittedly difficult problem.

At least in part, the meeting is an outgrowth of a session of the All-Radio Affiliates Committee held a fortnight ago, when it was said that members would confer individually with executives of their respective networks with regard to the general network situation. When plans for the CBS Radio affiliates meeting were evolved later, AC Chairman Paul W. Morency, WTIC Hartford, reported that he was "glad to see any activity which will study objectively the problems which now confront radio," and added that "I certainly hope that some concrete answers come out of the proposed meeting."

NATIONAL Assn. of Gagwriters has auditioned-taped two comedy shows, *Comedians' Roundtable* and *Gagwriters Exchange*. Format for latter is being offered to local stations tied in with NAG local activities.

Candidates' Complaints

(Continued from page 27)

and his Kansas news conference Thursday, with television providing, in most instances, immediate reports while radio followed up with later and sometimes excerpted rebroadcasts, spotted among the networks' regular programs. Some networks, such as NBC which sent Bob Considine and Frank Bourgholtzer, assigned reporters and commentators to travel with the General..

Television newsreel services also kept pace with the Presidential candidate. Telenews Productions had footage flown from Abilene to Kansas City where members of the New York production staff, moved especially for the occasion, completed processing to effect immediate delivery of their films. By splicing pieces of kinescope film together, NBC-TV News Department was able to lead off the *Camel News Caravan* in New York with a report of the Abilene speech 15 minutes after the talk.

Meanwhile, the FCC was pondering CBS' reply to its letter two weeks ago which informed the network it should provide GOP Presidential Candidate William R. Schneider equal time with all other candidates [AT DEADLINE, June 2].

CBS declared in its reply, released last week, that the Commission's decision "would curtail drastically the ability of radio and television broadcasters to inform the electorate concerning the issues of the campaign. The decision would make it impossible to carry such programs as CBS Radio's *Candidates and Issues* and *Presidential Profiles* and CBS Television's *Presidential Timber* series.

CBS concluded by requesting a hearing before the full Commission.

Complained In April

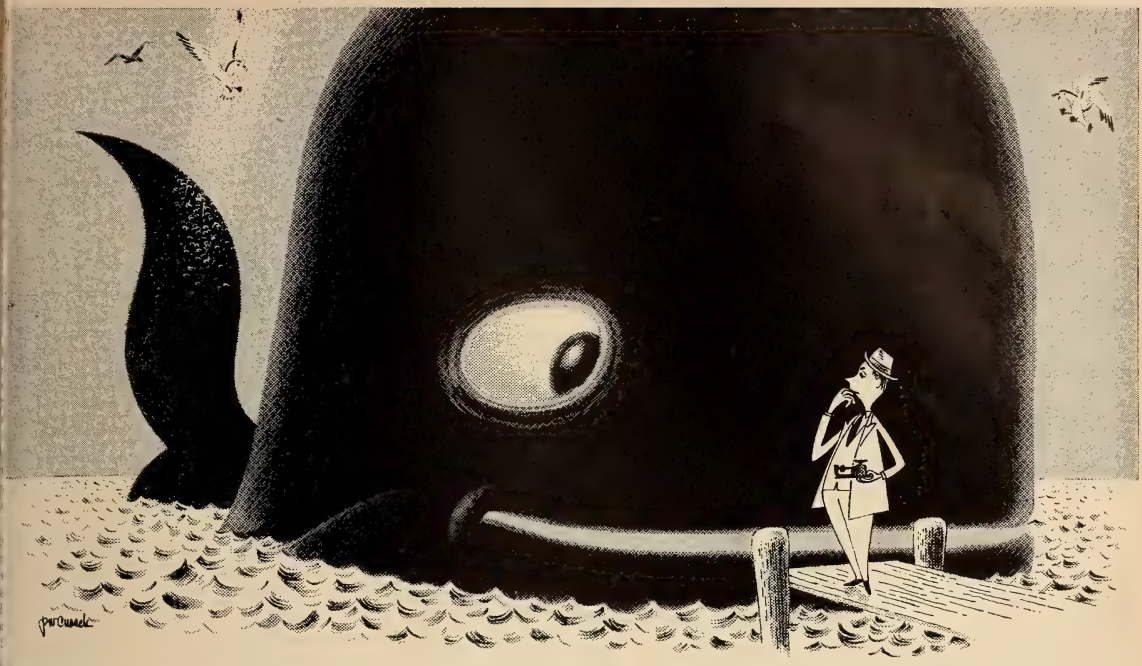
Mr. Schneider had complained to the Commission in April that CBS was not affording him equal time to that given other Presidential candidates. On April 30, the FCC asked CBS for details and on May 14, CBS replied.

One of the points of issue is the fact that although Mr. Schneider entered the preferential primaries in Oregon and New Hampshire, CBS rejected his request for time on the ground, among others, that it owned no stations in those states. The FCC in its May 28 letter stated that that made no difference; Mr. Schneider had the right to equal time.

Another point apparently made by CBS was that Mr. Schneider's chances for nomination were pretty meager. To this the FCC said:

". . . neither the statute [Sec. 315 of the Communications Act] nor the Commission's Rules permit compliance with the statutory requirement dependent upon any subjective determination by the station or stations involved with respect to a candidate's practical chances of nomination or election."

According to an independent survey made by students at North Dakota Agricultural College, *17 out of 18 families within a 90-mile radius of Fargo prefer WDAY to any other station.* 3,969 farm families in the rich Red River Valley were asked, "To what radio station does your family listen most?" 78.6% said WDAY, with the next station getting only 4.4%!



Fargo-Moorhead Hoopers credit WDAY with much the same overwhelming popularity "in town". Despite the fact that the other three major networks are represented with local studios, WDAY consistently gets a 3-to-1 greater Share of Audience than all other Fargo-Moorhead stations combined!

WDAY is one of America's *great radio buys*, serving one of America's *great farm markets*. Write direct or ask Free & Peters for the facts!

WDAY • NBC • 970 KILOCYCLES • 5000 WATTS

FREE & PETERS, INC., Exclusive National Representatives

You can't weigh a whale with a postage scale

You can't accurately measure the size of radio and TV station audiences, either, unless you use a technique fitted to the job at hand, gauging *all* of its dimensions.

Under today's conditions, the research method must be unquestionably equal to the task of measuring the value of a station property. That's the case with NIELSEN COVERAGE SERVICE.

In its method, tailored (via field testing) to the needs of both buyer and seller, NCS doesn't just meet past research standards. It sets new ones. It insures accurate measurement of the major dimensions of radio and TV, blanketing the country with *personal interviews*, supplemented by data from the time-proven AUDIMETER.*

In its reports, NCS will disclose the complete story on *the size of daily, weekly, monthly audiences . . . homes reached per minute . . . out-of-home listening and viewing . . . set ownership . . . family characteristics.* And NCS will provide the first nationwide TV station coverage survey ever made.

For the most thorough, accurate measurement of station audiences at your command, NIELSEN COVERAGE SERVICE is the single answer. Details and price schedules? Special early discounts expire June 15. Contact our nearest office.

CASH TO HEAD

WLW Sales Department

NORMAN CASH has been named as general sales manager of WLW Cincinnati, Harry Mason Smith, vice president of Crosley Broadcasting Corp. sales operation, announced Thursday.

Mr. Cash, former WLW assistant sales manager, joined Crosley from NBC, where he was head of NBC's AM Station Relations Div.

Mr. Smith said the new appointment is a step further in separating the Crosley AM and TV sales operation, of which he is in over-all charge. Dave Partridge continues as manager of the Crosley TV sales department.

WCFL CHANGES

McGeehan Named Sales Mgr.

MARTIN McGEEHAN, former Midwest manager of Liberty Broadcasting System, Chicago, joins WCFL, Chicago Federation of Labor station, as sales manager and manager of the station's White Sox baseball network.

Arthur F. Harre, station manager, also has appointed Edward Wiebe as sales promotion manager. He is former partner in Dickson & Wiebe Agency, same city. Fred Herendeen, former account executive at George Hartman Agency, has joined the station as public relations director. New members of the sales staff are Tom Haviland, who headed a Studebaker sales organization, and George Draw, former space salesman.

LEVER CHANGES

Bloomquist, Others Affected

FOUR promotions in Lever Div. (soaps, detergents, and shortening), Lever Bros. Co., N. Y., and an advancement in the company-wide organization were announced last week.

G. Walter Laborie, general promotion manager, becomes sales manager of Lever Div.; J. Harvey Howells, advertising manager of the Jelke Div., was named to same post for Lever; John A. Blum, formerly assistant to the president, becomes merchandise manager, and William H. Harr, budget manager in finance division, was appointed marketing service manager.

Howard Bloomquist, advertising brand manager, was appointed general manager of the promotion division for the overall Lever organization.

WELDON & CARR

Three More Join

THREE more engineers last week joined Weldon & Carr, consulting radio and TV engineers, in Washington, D. C.

Mr. Gilbert

Named last Monday as associate director of Weldon & Carr is John D. Gilbert, who on May 31 left his positions as manager of CBS technical operations, chief engineer of WCBS-AM-FM New York and of the CBS international stations at Brentwood, L. I., and Wayne, N. J.

After attending the U. of Minnesota, Mr. Gilbert joined CBS in 1929 and in 1938 was appointed a supervisor in the technical operations division. In World War II he was an officer and project engineer in the Navy Dept. Bureau of Ships, Washington, returning to CBS after the war to become assistant manager of technical operations in 1947 and manager in 1951.

Others Joining

Joining Weldon & Carr as antenna laboratory division chief engineer is David F. Bowman, who attended the U. of Cincinnati and received his B.E.E. degree from Ohio State U. in 1942.

Mr. Bowman

During World War II Mr. Bowman worked at Hazeltine Electronics Corp. laboratories in development of antennas, R. F. components and special test equipment for the government I.F.F. program. In 1946 he joined Airborne Instruments Lab. Inc., and from 1947 assisted in supervising the antenna research and development section.

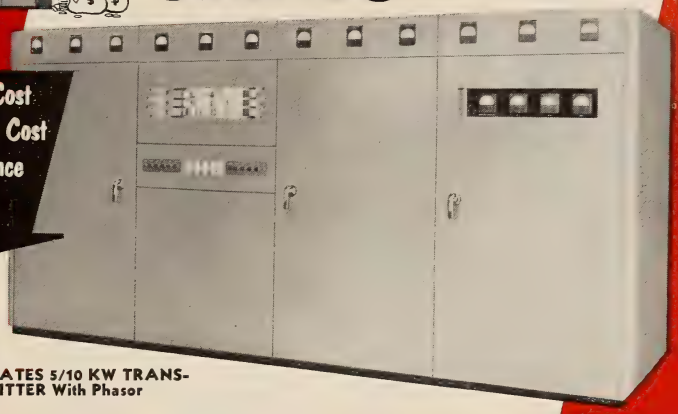
Heading up the Weldon & Carr TV group will be John H. McMahon, formerly chief engineer of KSTP-AM-FM-TV St. Paul, Minn. He will join the firm June 15.

Mr. McMahon

A U. of Minnesota graduate with a B.E.E. degree, he started his career at KSTP in 1939. During World War II he was a project engineer on government war contracts with Airborne Instruments Lab., returning afterward to KSTP as assistant chief engineer and becoming chief engineer in 1948.

Homer A. Ray Jr., formerly of Gautney & Ray, Washington, joined Weldon & Carr May 19 [B•T, May 26].

SLASH COSTS... INCREASE PROFITS!



GATES

5KW and 10KW AM TRANSMITTERS

- Lower Initial Cost
- Lower Operating Cost
- Proven Performance

MORE BONUS FEATURES

GATES 5/10 KW TRANSMITTER With Phasor

Here's good news, indeed, for performance conscious broadcasters who want quality equipment and who appreciate the many bonus advantages this better engineered broadcast transmitter offers.

Check These Features

1. Popular new 3X2500F3 tubes used both as power amplifiers and modulators. As modulators, these low impedance tubes provide lower distortion—higher broadcast fidelity. They operate at lower plate voltage, provide greater safety factor and better circuit constants.
2. More effective and efficient cooling system employs a single .44 H. P. blower motor instead of usual three 1/3 H. P.
3. Separate meters provided for every important circuit. No multimetering employed.
4. Sixty second or less accessibility to any part regardless of location.
5. No saving at sacrifice of quality. All transformers fully cased, abundance of circuit protection, including ten over/underload relays and five magnetic circuit breakers plus average two cycle frequency stability.
6. Handsome appearance — modern design, easy accessibility.
7. Lower primary power consumption (15⅛ KW at average modulation). One broadcaster reported actual savings of $100.00 monthly in power bill after replacing older 5 KW with new GATES BC-5B.

SPECIFICATIONS

- 5 R. F. stages with 3X2500F3 power amplifiers.
- 4 audio stages with pair 3X2500F3 Class B modulators.
- Inverse feedback employed but will meet full F. C. C. requirements when omitted.
- Response 30—10,000 cycles 1.5 Db. Noise consistently way below 60 Db. at 100% modulation.
- Average distortion 2½% or less at 50 and 7500 cycles.
- Power consumption at average modulation only 15.5 KW at 5 KW or 23 KW at 10 KW, carrier power.

Join GATES equipped broadcasters everywhere who are slashing initial and operating costs, increasing quality of broadcasts and building profits. Write today for descriptive literature and engineering data on these modern GATES 5/10 KW Transmitters. See for yourself why there is no wiser nor more profitable investment in broadcast transmitters than in GATES.

ARF BY-LAWS

Kobak Forecasts Changes

EDGAR KOBAK, president of the reconstituted Advertising Research Foundation, reported last week that recommendations will be advanced "fairly soon for certain important changes" in the ARF by-laws, including expansion of the board of directors.

Pointing out that media members are now eligible as ARF subscribers along with agencies and advertisers, as a result of the recent realignment, Mr. Kobak asserted:

"We find that with the steadily mounting interest of media in the foundation, we must enlarge media representation on the board to take care of the various important segments in the media field. At the same time it will be necessary to add directors from our advertiser and agency subscribers."

The foundation now has 136 subscribers—59 agencies, 48 advertisers, 27 media concerns, and the two founder subscribers: Assn. of National Advertisers and American Assn. of Advertising Agencies.

One of the early projects in prospect for ARF is an evaluation of the various radio and television rating services and their respective techniques in an attempt to clarify long-standing confusion in this field. BAB has earmarked $15,000 as radio's contribution toward the $25,000 which ARF has estimated such a study would cost, and it is expected that the television division of NARTB will be asked to put up the rest [B•T, June 2, May 26].

Expansion Plans

Plans for enlargement of ARF board were reported by Mr. Kobak in the first issue of a "News Letter" for subscribers. He also reported that "right now we're working on the task of enlarging committees and strengthening them, and we'd welcome volunteers for committee work."

Additionally, he disclosed a proposed "statement of policy" which defined ARF's objectives as being "to further scientific practices and promote greater effectiveness in advertising and marketing through objective and impartial research." Five ARF facilities for attainment of the goals were listed as follows:

"(1) Supervision of the conduct of research studies that are of general interest to subscribers; (2) review and appraisal of media research reports for the exclusive benefit of subscribers; (3) general advisory opinions and consultation, on a confidential basis, to media to assist them prior to their making media studies; (4) supervision in complete detail and impartial validation of media studies, as ARF has been doing for 15 years; (5) other functions which will further scientific practices in advertising and marketing by fostering research."

FARM DIRECTORS

Plan Washington Meeting

FIFTH annual radio farm directors' meeting will be held June 16-17 at the Dept. of Agriculture headquarters auditorium in Washington, with farm organizations and the National Assn. of Radio Farm Directors cooperating.

The opening day's meeting will include a discussion session with Secretary of Agriculture Charles F. Brannan. A feature titled "Filling the Fifth Plate" will be supervised by Gus Geissler, administrator, Production & Marketing Administration; Byron Shaw, administrator, Agricultural Research Administration, and O. V. Wells, chief, Bureau of Agricultural Economics.

Monday afternoon's agenda features a meeting with members of Senate and House Agriculture Committees.

Progress report on Point Four developments will be made Tuesday by Stanley Andrews, administrator, Technical Cooperation Administration, Dept. of State. Maynard Speece, of the Radio & Television Service, Dept. of Agriculture, will conduct a TV session, to be followed by a discussion on informational services.

NARTB VOTE DRIVE

State Committees Named

COMMITTEES to cooperate with NARTB's Register and Vote campaign have been named by four of 38 state broadcasters associations, according to NARTB President Harold E. Fellows. The national drive is being sponsored jointly by NARTB and American Heritage Foundation.

Committee members follow:

ARKANSAS—Storm Whaley, KUOA Siloam Springs, chairman; Ted Woods, KOSE Osceola; Melvin Spann, WWAK Stuttgart; James P. Walker, KFPW Fort Smith, and J. M. Moore, KVRC Arkadelphia.

INDIANA—O. E. Richardson, WASK Lafayette, chairman; Dan Park, WIRE Indianapolis; Dee Coe, WWCA Gary; Ed Thoms, WKJG Fort Wayne, and Joe Higgins, WTHI Terre Haute.

NEW JERSEY—Paul Alger, WSNJ Bridgeton, chairman; Fred Weber, WFPG Atlantic City; Fred Bernstein, WTTM Trenton; Harry Goodwin, WNJR Newark; Bob Williams, WCTC New Brunswick, and Gordon Giffen, WKDN Camden.

UTAH—S. John Schile, KUTA Salt Lake City, chairman; Lennox Murdock, KSL-TV Salt Lake City; George Hatch, KLO Ogden; Reed Bullen, KVNU Logan; Wade Ebeling, KBUH Brigham City; Art Higbee, KSUB Cedar City; Frank Peacock, KSVC Richfield; Lee Walker, KJAM Vernal; Jack Richards, KOAL Price, and Arch Madsen, KOVO Provo.

a winner on any ticket . . .

Want to be the party in power?

Take a tip from the last two elections—on trade paper effectiveness, that is.

A leading 50 kw station asked 800 advertisers and agencies: "Which publication would you use if you were in our place trying to reach you?"

A landslide for BROADCASTING • TELECASTING— by 392%

Fact Finders Associates of New York, in the first personal interview survey of the radio-TV trade press, asked: "What trade journal brings radio station advertising most effectively to your attention?"

A resounding first for BROADCASTING • TELECASTING— by 445%

Whatever your platform for trade paper values—coverage, readership, loyalty, influence, effectiveness—you'll be the party in power on the BROADCASTING ticket.

FCC BUDGET

TV Money Rests With Conference Committee

FATE of the $6,708,460 FCC budget for fiscal 1953 rested this week with a joint Senate-House conference committee, following full Senate approval last week of an additional $600,000 for TV application processing.

House last March approved $6,108,460 for FCC operations in the fiscal year beginning July 1, 1952, although the President had asked for $8,075,000. Senate Appropriations Committee recommended an additional $600,000 to take care of an expected heavy workload on TV applications after a spirited plea for more funds for this purpose by Sens. Edwin C. Johnson (D-Col.), chairman of the Senate Interstate & Foreign Commerce Committee, and Homer E. Capehart (R-Ind.), also a member of the Commerce Committee [B•T, June 2, May 26].

Addition of $600,000 to the FCC's appropriation was estimated by Sen. Johnson to permit the hiring of 15 additional examiner teams by the FCC. An examiner team comprises the examiner, trial attorney, engineer and accountant plus stenographic and clerical help.

In testimony before the Senate Subcommittee on Independent Offices appropriations last April, FCC Vice Chairman Rosel H. Hyde warned that even if the Commission received additional funds to hire 20 examiner teams, "we would still not be current in the handling of television applications at the end of 1953." He also estimated that it would take about three months to fill any new positions. Other FCC officials have warned that personnel procurement for government officials was a difficult job, and that it takes about a year before new personnel are experienced enough to entrust with hearing cases.

Date for the joint Senate-House conference has not been set. Senate conferees named were: Democrats—Sens. Burnet R. Maybank (S. C.), Joseph C. O'Mahoney (Wyo.), Kenneth McKellar (Tenn.), Lister Hill (Ala.), Brien McMahon (Conn.), a member of the Commerce Committee; Republicans — Sens. Leverett Saltonstall (Mass.), Styles Bridges (N. H.), Homer Ferguson (Mich.). House conferees named were: Democrats —Reps. Clarence Cannon (Mo.), Albert Thomas (Tex.), Albert Gore (Tenn.), George W. Andrews (Ala.), Sidney R. Yates (Ill.). Republicans—Reps. John Taber (N. Y.), John Phillips (Calif.), Frederic R. Coudert Jr. (N. Y.), Norris Cotton (N. H.).

Included in the Senate approval of the Appropriations Committee's recommendations was the suggestion that the FCC charge fees for processing and licensing of TV stations so that the "cost of processing the application through the hearing and the granting of the license should in some measure be reimbursed to the Government by the beneficiaries of such licenses."

The FCC was called upon to investigate such a system of charges and to report its findings.

In the 1952 Independent Offices Appropriation Act, such a recommendation also had been made for all government regulatory agencies. The FCC submitted a report to Congress stating that it did not consider the establishment of fees feasible, nor did it believe sufficient revenues would accrue to make a fee system worthwhile.

Radio Still Dominates
THIS RICH MARKET

Radio delivers MORE sets-in-use in the South Bend market than before TV! . . . Hooper Serveys for Oct.-Nov. 1951 compared with Oct.-Nov. 1945 prove it. Morning up 6.8, afternoon up 8.0 and evening up 4.4. Television is still insignificant here because no consistently satisfactory TV signal reaches South Bend. Don't sell this rich market *short.* Wrap it up with WSBT radio.

AFA CONVENTION

Underway in New York

AT LEAST 1,000 advertisers were expected to attend the Advertising Federation of America convention starting in New York's Waldorf-Astoria Hotel yesterday (Sunday), spokesmen reported last week, indicating that advance registration has been "exceptionally good."

Although the four-day meeting is dedicated to "better advertising —more efficient advertising people," delegates are slated to hear an inventory of television's future, to be delivered by leading agency and broadcasting executives Wednesday morning. Prime topic will be "What the Television Thaw Means" with explanations from the point of view of the network, the agency, the advertiser and the producer. Other speeches Wednesday morning will include an explanation of UHF by Raymond Guy, manager of radio and allocations engineering for NBC.

Irving H. Herriott Jr.

FUNERAL services were conducted in Chicago last Monday for Irving Howard Herriott Jr., 40, district sales manager of Zenith Radio Corp. and son of the company's general counsel. Mr. Herriott died May 29 in Washington on a business trip. He joined Zenith in 1937. Surviving are his wife, Marjorie, a son and a daughter.

HAWAIIAN TOUR

Listeners Invited by WIBW

AN AIRPLANE tour to the Hawaiian Islands open to radio listeners is included in autumn plans of WIBW Topeka, Kan. The tour is to be conducted by Wes Seyler, WIBW farm service director.

Mr. Seyler said that the primary purpose of the tour is to study agriculture and livestock in Hawaii but there will be time to take advantage of the Hawaiian climate. A more leisurely trip is being planned via ocean liner.

Price per person will be based on actual cost, Mr. Seyler said. Reservations may be made for both men and women, subject to prior claims and space limitations.

On All Accounts

(Continued from page 16)

through with production a campaign that will sell the client's products or services.

In its two and a half years, American Advertising has taken new accounts, put them on radio alone, and made them successful. Mr. Lease particularly cites E. Masin furniture, which formerly had used classified ads exclusively, and the Veloz & Yolanda dance studios. The Seattle studio became the top Veloz & Yolanda money-maker on the Pacific Coast in the one year it was Mr. Lease's account, and new studios have since been opened in Tacoma, Bremerton and Portland, all as accounts of American Advertising.

Tony Lease's role as charmer of lonely women results from another account, the Sinus Institute. He created and now voices *Mr. Jet*, a "Lonesome-Gal" type of show for women. Aired Mondays through Fridays at 7:30-7:45 p.m. on KXA Seattle, *Mr. Jet* offers semi-classical music with intimate commentary, to sell sinusitis treatments.

Another successful promotion of American Advertising is *Tune Trail*, aired daily from noon to 2:30 p.m. on KRSC Seattle. The musical quiz show has six participating sponsors.

The agency's ultimate TV objective is to develop a complete production department. Mr. Lease himself serves on direction, production, script and ideas, and currently has two assistants in the agency. He is looking for "triple-threat men" for his staff, to develop, create and sell ideas in television production.

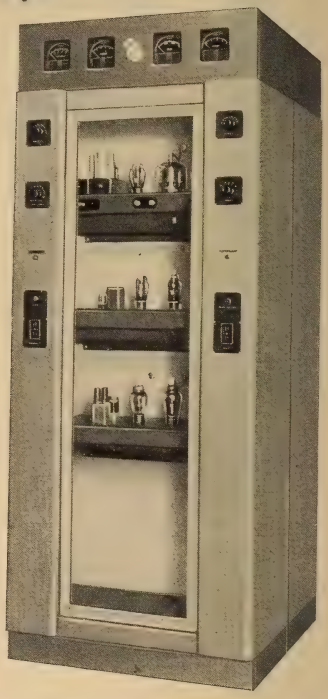
Advertising-wise, Mr. Lease believes in the value of saturation. He seeks to build a personality for the advertiser, then hammer it home with consistency. "You can spend $1,000 in one week, and be forgotten in two," he says.

Although as "Mr. Jet," he has captured many feminine hearts, Anthony Lease in private life is happily married to the former Theo Thill. They have one son, Thill Anthony Lease, born last May 5. Mr. Lease is a member of the Washington State Press Club, and avers his hobby is philosophy.

GRID COVERAGE

WMAL Gets Md. Exclusive

EXCLUSIVE radio coverage of the complete 1952 U. of Maryland football schedule by WMAL Washington, was announced last week by Kenneth H. Berkeley, general manager, WMAL-AM-FM-TV.



Jim Gibbons, a local sportscaster, will handle the play-by-play. Maryland opponents include Missouri U., Auburn, Clemson U., Georgia U., the Naval Academy, Louisiana State U., Boston U., Mississippi, and Alabama U. Last season, an undefeated Maryland team trounced Tennessee in the Sugar Bowl game on New Year's Day.

CONTINENTAL AM TRANSMITTERS *Via* Graybar

Type 314-2 1000 watt Continental transmitter — Unique pressurized cabinet design guides cool, filtered air to all components. Variac transformer smooths out power and voltage variations. Unit cuts back easily to 500 watts.

Type 312 250 watt Continental transmitter — Low-level modulation of linear RF power amplifier provides superior performance. Unit has 14 metering positions.

new **Graybar-distributed units embody these important transmitter features**

1. **Simplified circuit design** — inexpensive tube complement
2. **Easy adjustment** — fewer tuning controls
3. **Unified Transview cabinet** — frameless all-aluminum construction
4. **Ready accessibility** to all components
5. **Electric door locks** with pressure latches — provide maximum safety
6. **Electronic time delay** — automatic filament voltage regulation
7. **New Continental Type 30XT Crystal Oscillators**
8. **Low drive, high-gain amplifier tubes** — require no neutralization
9. **Vacuum tank capacitors** — oversized components

Your near-by Graybar Broadcast Equipment Representative will be glad to give you complete details on either of these new Continental transmitters.

Discuss your other AM, FM, or TV requirements with him, too. You'll find him well-qualified to assist you in every phase of station construction or expansion . . . and modernizations of transmitter and studio facilities. *Graybar Electric Co., Inc. REC-ATS MERGER

Fusion Methods Studied

SPECIAL committees of Radio Executives Club of New York and American Television Society agreed last Tuesday to work out details necessary to effect a merger.

The committees were appointed respectively by I. E. (Chick) Showerman, president of REC, and Julius F. Seebach Jr., president of ATS. The committees said that after careful study they hope to effect the merger within two weeks and "upon terms and conditions satisfactory to both."

ATS committee appointed two weeks previously to act on the merger includes Don McClure, account executive with McCann-Erickson, chairman; Caroline Burke, NBC-TV producer; Jay Bonafield, executive vice president of RKO-Pathe; Glenn Gundell, vice president in charge of advertising, National Dairy Products, and David Hale Halpern, vice president of Owen & Chappell Inc., and past president of ATS.

Members of REC committee are: William S. Hedges, NBC vice president; Robert Saudek, director of TV-Radio Workshop of the Ford Foundation; Warren Jennings, ABC; Elizabeth Black, Joseph Katz Co.; Lewis H. Avery, Avery-Knodel Inc.; John Brooke, Free & Peters, and Norah K. Donovan, attorney and chairman of REC by-laws committee.

Acting as ex-officio members of both committees are Presidents Showerman and Seebach, and Claude Barrere, secretary of REC and ATS.

Crosby Expansion

ENTRY into library transcription activity is to be made by Bing Crosby Enterprises, Culver City, Calif., with the firm's musical and technical radio staff. Some of Mr. Crosby's past CBS Radio programs will be augmented by new material recorded by him to make up a library in addition to the projected *Musical Americana*, a series on jazz performers. The music library service will be available to stations on a lease basis.

NEW Capehart-Farnsworth radio-TV line will be presented at the annual distributor convention in Chicago's Conrad Hilton Hotel Aug. 4-5.

NEW LAW FIRM

Formed By Hand and Myse

FRANK B. HAND Jr. and Daryal A. Myse, both formerly with FCC, announced last week that they have formed a new law firm which will specialize in radio and television matters before the FCC.

In addition to his experience as a practicing attorney before FCC, Mr. Myse has a number of years' experience as a practicing engineer. He was graduated from the Engineering College of the U. of Wisconsin in 1933, and is a registered professional engineer in Wisconsin, Maryland and the District of Columbia. He was admitted to the D. C. bar in 1946. Mr. Hand was admitted to the D. C. bar in 1938. He also has served with the Interstate Commerce Commission. The new firm will be located in the offices of Mr. Hand in Washington's Transportation Bldg.

SHOUSE SPEAKS

To Wilmington Graduates

NO EFFORT to achieve international understanding is wasted, James D. Shouse told 108 graduates of Wilmington (Ohio) College at the 78th annual commencement exercises June 2.

Mr. Shouse is chairman of the board of Crosley Broadcasting Corp., and vice president-director of Avco Mfg. Corp. Crosley Corp. owns WLW WLWT (TV) WLWA (FM) Cincinnati, WINS New York, WLWB (FM) WLWD (TV) Dayton and WLWC (TV) WLWF (FM) Columbus.

Speaking in defense of the United Nations, Mr. Shouse agreed that the UN is not yet wholly effective but asked the graduates what they would suggest in its place.

The alternative to the UN, he said, is anarchy in which all nations engage in an arms race which would end in all nations being swallowed by an imperial state.

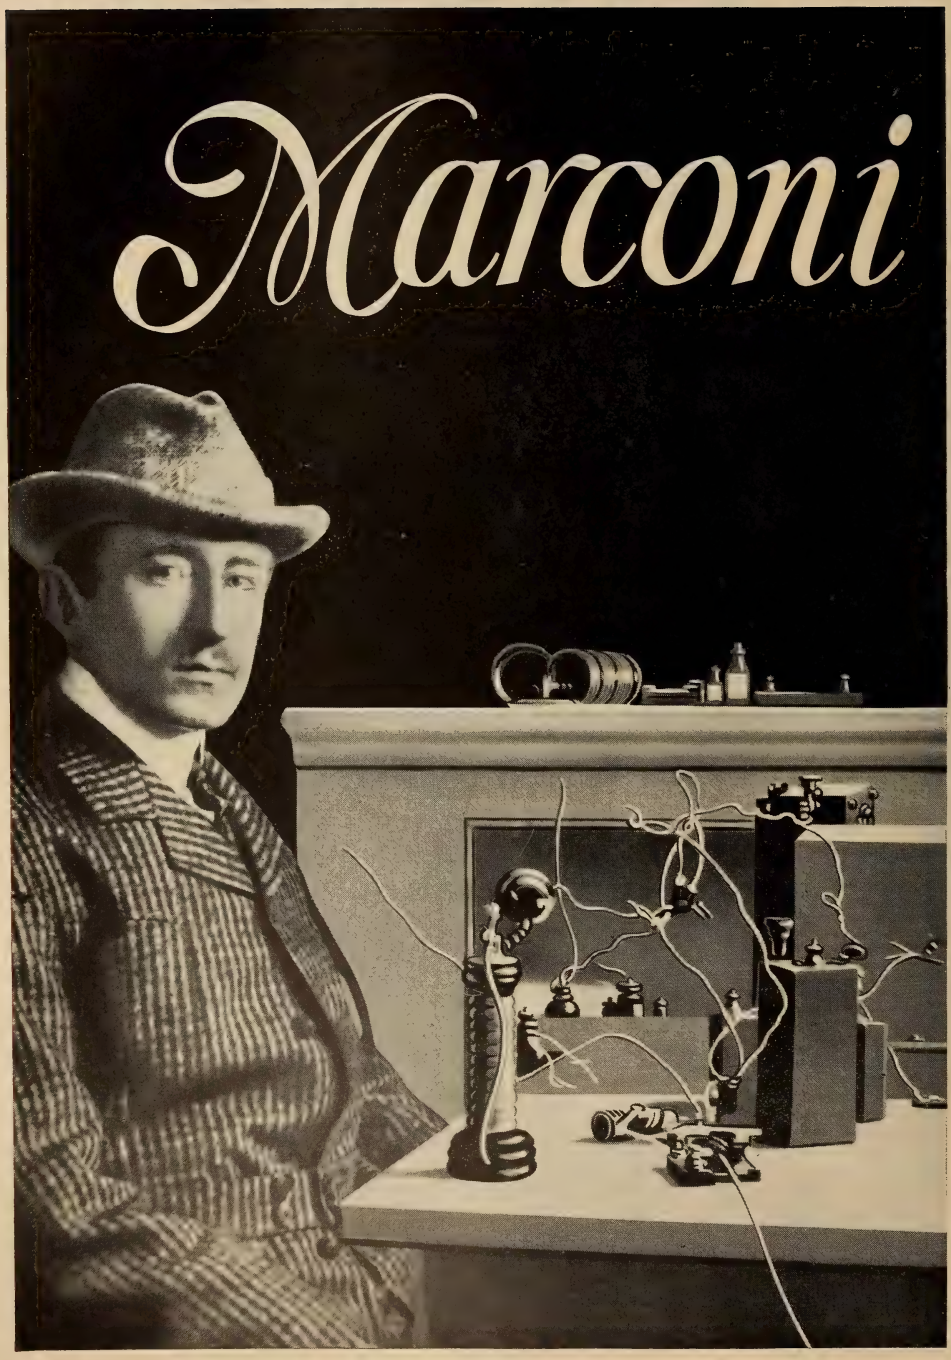
DICHTER DICTUM

Products Have Personality

WHAT determines peoples' purchases, according to Dr. Ernest Dichter, psychological consultant, is "one very simple yet gigantic satisfaction—security."

"The search for ideas in selling and advertising therefore is really nothing but a search for a language of communication," Dr. Dichter, president, Institute for Research in Mass Motivations, told a New York luncheon meeting of the American Marketing Assn. He advised that there are three major ways in which the public can be made aware of the "personality" of a product, the factor which promises security: Through empathy, individual style and the effort to be considerate.

The principle of empathy, Dr. Dichter said, is based on the necessity of understanding the language in which people think and talk about a product in terms of their own lives. When advertisers do this, they will realize that a particular personality is associated with their product, which should be enforced—or in negative cases, explained—through advertising.



Sometimes advertisers contradict the public's idea of their product, he noted. One study indicated that consumers, contrary to the then-current advertising of Pepsi-Cola, thought of the drink as "very juvenile, aggressive, shirt-sleeved and a joyful kind of beverage," although ad campaigns has presented it as a dignified, sophisticated drink. "Since this personality . . . had very many nice and positive aspects," the company decided to change their advertising to agree with it, thereby implementing their sales, he said.

The second way to appeal to the consumer, he suggested, is through the public desire for "individual style," or preference, need or brand. "People are convinced that someone who has a style of his own is more believable," he said, citing Arthur Godfrey's TV success as "a perfect example."

The CBS-TV performer is thought of as doing exactly what he feels like doing—"something all of us dream about, but that few of us normally achieve" the psychologist said. "If he can be so spontaneous and free that he even goes to the extent of kidding his sponsor," Dr. Dichter said, "then anything he says must be believable and truly his own opinion."

The speaker's third principle is that people do not react to the spoken word and illustration but rather to the intention or effort that has gone into it. An advertiser trying to show considerateness will attract greater attention than the one who says, "Buy my product because my product is better," he advised.

The sooner the advertiser learns to accept the public in the public's own terms, the sooner he will establish forceful sales contact with the consumer, Dr. Dichter said.

Marconi

. . . a name to remember

On March 27, 1899, Marconi astounded a group of friends by sending signals with his system of wireless telegraphy for a distance of 30 miles. News traveled slowly in 1899 and it was many weeks before Marconi's feat was known to the entire world. It is doubtful, even in his wildest dreams, if Marconi could have envisioned the vast use we make of his principles of wireless telegraphy in radio broadcasting today.

Just 25 years ago, the STORER BROADCASTING COMPANY was born in Toledo, Ohio. Its major precept was—and is—that broadcasting in the public interest would be its number one responsibility. During the past quarter century all STORER BROADCASTING stations in the eight markets where they are located have adhered to that principle. For this reason the people who live in those eight markets listen to and believe in STORER BROADCASTING stations. Our number one responsibility has become our greatest asset. That is why advertisers who want results use STORER BROADCASTING COMPANY stations —the stations listeners believe in.

editorial

One for All; All for One

THE ATMOSPHERE surrounding the calling of the forthcoming meeting of CBS Radio affiliates and executives of the network is one that encourages hope for eventual solution of radio network business problems.

Not the kind of witless hope that depends for realization upon the passing of a miracle nor the even sillier hope that an unsatisfactory situation can rectify itself while all parties to the situation ignore it.

The hope which arises from this occasion is a firmer one.

Quite obviously, the nine operators of CBS Radio affiliates who called the meeting did so with the very realistic awareness that radio network business affairs have reached a state of disorder which cannot be corrected by wishful thinking or any cure short of painstaking diagnosis and patient therapy.

This attitude of realism is at odds with the excitability that has characterized the thinking and behavior of some affiliates in the past. It implies that station management and network management, who not always have worked harmoniously together nor with one another's interests in mind, may now discard old suspicions and jointly seek a solution.

The network crisis of today goes to the very heart of the American radio system. Ten years and more ago when the Independent Radio Network Affiliates was formed to work out problems common to the entire field (AFM contracts, for example), a slogan was coined: "The affiliates are the networks, and the networks are the affiliates."

In those days, networks and their affiliates achieved a unanimity of purpose when confronted by the music crisis.

They should strive for no less unanimity today, for the business crisis now confronting network radio is every bit as severe a threat to radio as was the music difficulty of 1940-41.

It is to be hoped that the July 1-2 conference of CBS Radio affiliates and network executives will bear out the intentions of its sponsors and that the infirmities afflicting network radio will be examined frankly and in detail. Out of such a conference could come the stabilization of U. S. radio.

Sun Spots (Sic)

LATEST SEASONAL attempt to hook a free radio ride comes from the Sun Glass Institute, of New York City.

Stations are being broadsided with a fat brochure of 24 ready-written "spots." An explanatory memo to program directors tells of the "health giving benefits" of the sun, then quickly switches to a note of warning. "Scientists and eye specialists," it says, "have been warning the public to use care in safeguarding the eyes from too much sun."

Here the institute takes the program manager into partnership and offers him an opportunity to do something about this danger. "You will be performing a public service," the memo continues, "by bringing these facts to the attention of thousands who may be gambling with their safety." Typical "spots" follow.

Many station managers "filed" the "opportunity" in the waste basket. At least one sent his rate card to the Sun Glass Institute.

One thing was universal—the burn. But it was from the institute, not from the sun.

FCC Black Magic

FOR a classic portrayal of the Biblical quotation about the left hand not knowing what the right hand doeth, we cite the FCC as Exhibit A.

The FCC is crying poverty. It needs manpower to handle the TV "workload." An important personage—Chairman Edwin C. Johnson—gets his Interstate Commerce Committee to plead for $800,000 more to give the FCC that manpower. The Senate meets it two-thirds of the way by approving $600,000.

Even before Congress had acted, the FCC yields to the mouthings of its lawyers and places on temporary license the stations of several networks because of a wild-swinging, publicity-seeking complaint of the American Civil Liberties Union alleging "blacklisting."

Here, on the one hand, the FCC bemoans its dire financial straits. And on the other, it invents a workload in an area which is none of its business. This artificially stimulated FCC "business" follows the pattern of the late-lamented Richards' Stations hearings; the current ABC-United Paramount proceedings, bringing in extraneous issues that can't conceivably have a bearing on the proposed merger; the abortive "rebroadcast rule" which places the FCC stamp of approval on program piracy, and the still-warm letter to CBS wherein the FCC holds that GOP Presidential aspirant William R. Schneider of St. Louis is entitled to equal opportunities with other Presidential candidates (wherein it introduces the vicious practice of regulating licensees in advance of the fact).

How do these actions come about? The blacklisting case is a shining example. Last April, ACLU called upon the FCC to conduct a general investigation of "blacklisting" stemming from the publication of *Red Channels*. Came widespread publicity, what with the citing of such entities as NBC, CBS, ABC, DuMont, WPIX (TV) New York and KOWL Santa Monica as alleged blacklisters. Renewals of several were due June 1.

At its meeting Wednesday, May 28, the Broadcast Bureau recommended, and the Commission approved, regular renewals and dismissal of the ACLU complaints. At the next day's session, General Counsel Ben Cottone (who had provoked the rebroadcast rule and who made the Richards case a *cause celebre*) asked for reconsideration and deployed legalistic abracadabra about the Administrative Procedure Act requiring investigation and written opinion. Comr. E. M. Webster felt there was something to this procedure business. Comr. Frieda B. Hennock struck a blow for her ACLU misguided liberals and seconded reconsideration. Chairman Paul A. Walker wilted. There was more legalistic interplay.

So temporary licenses ensued. The vote was 3-2, with Vice Chairman Rosel H. Hyde and the FCC's newest member, Robert T. Bartley, opposing the action as improper use of the licensing function extending beyond the intention of the statute. Comrs. Robert F. Jones and George E. Sterling were away.

It is this sort of mischief that the FCC lawyers have been inciting. It's the phony-liberal precept of trying to dispel all alleged social sins by using the licensing power. It's the kind of activity that has infused the FBI with the notion that the FCC is made up of a gang of left-wing (or worse) sympathizers.

On the blacklisting issue, if there are those who feel they are libeled, they have recourse to the courts, not the FCC.

And pity Chairman Johnson and his committee, who stuck their necks out to get an economy-minded Congress to give the FCC more money, only to have the same FCC create a new WPA legalistic leaf-raking project that is make-work and make-trouble.

our respects to:

D. L. (TONY) PROVOST

THE celebrated "Topper" novels created by the late Thorne Smith may owe certain facets of their hero's character to a man with whom the novelist once roomed in Greenwich Village. He is D. L. (Tony) Provost.

Topper was pictured as a good-natured businessman, successful, but with a turn for getting into out-of-the-ordinary situations. That shoe fits Tony Provost.

But where Topper was meek and easy-going, Tony Provost dons sprinting shoes for a much faster and aggressive whirl in the business world. Today he is vice president and general manager of Hearst Corp.'s Radio and Television Div., and, perforce, one of the broadcasting industry's most active and aggressive figures.

In direct supervision of WBAL (50 kw) and WBAL-TV Baltimore, both NBC affiliates, Mr. Provost also heads WISN-AM-FM Milwaukee (5 kw). He is a member of the board of directors of KING Seattle, Wash., partly-owned by the Hearst Corp.

With these widely-spread properties demanding his business talents, Mr. Provost has established a policy for overall operation which combines sound business administration with strong public affairs programming.

His 20 years of experience in broadcasting stood him in good stead in his present position when he succeeded the late Tom A. Brooks.

During his work as an independent program producer from 1931 to 1939, he had a hand in pugilist Max Baer's dramatic career. He handled the rights to a three-a-week radio dramatic show, sponsored by the B. F. Goodrich Co., and starring the prizefighter before his fight with Primo Carnera, and the next year prior to the Braddock fight, a half-hour Baer dramatic show sponsored by Gillette Safety Razor Co. It has not been revealed whether Mr. Provost was responsible for the publicity gag during this time of having the fighter "shot" by a sound effects man in a New Jersey hotel lobby with blank cartridges, an act which made national headlines.

Mr. Provost served as sales manager for Empire Broadcasting Co. from 1939 to 1942 and from 1942 to 1945 was assistant manager of WEAF New York.

His decision to stick with the broadcasting industry became pronounced when a side venture back-fired during this period. With a partner, Mr. Provost tried to introduce an oil-nut crushing machine into Mexico, but the Mexican government objected that the machine was unfair to labor. When a representa-

(Continued on page 54)

"Wherever You GO . . . there's RADIO!"

CKLW is proud to have played a part in the United Detroit Radio Committee's campaign which won top honors for group radio promotion in 1951. CKLW conceived the slogan, first gave it air time, and joined with other Detroit Stations to emphasize the great value of radio in the Detroit market.

"Save up to $16 a month on food bills."

Using radio, TV, small ads, and the package itself, Sterling Salt tells housewives how the trick is done.

On pages 44 and 45 of the May 9 issue of Printers' Ink, James K. Gearhart, advertising and merchandising manager, International Salt Company, "Gives credit for sales boost to high information value of ads."

If you missed this story drop me a line and I'll send it on to you.

It's important on two counts. First, you can use it to build several solicitations for new accounts, local, regional or even some national advertiser. Second, it was probably read by the largest single group of buyers of advertising in this country. Of our total circulation, 23,309, more than two-thirds are advertising managers, sales managers, agency executives, and the top executives who "give the nod" to schedules.

With the article you will see a typical radio script, three small space ads, and the complete story of how "Sterling Salt is now helping tens of thousands of housewives to save up to $1.93 on a dinner for four, and up to $16.00 a month on their food bills."

At the present time, 34 Radio Stations are releasing daily Sterling weather reports five times a week. With these reports, commercials are rotated to feature Sterling Table Salt, Blusalt for the farm, Sterling Industrial Salt, and Sterling Auger Action Salt for ice control.

Bob Kenyon

Articles like this often provoke this question: "Why does Printers' Ink come up with so many factual, down-to-earth, profit-making stories?"

For 63 years, our subscribers have told us what they want. They are the buyers of advertising. To hold their interest and renew their subscriptions year after year, we know that stories like the Sterling Salt report are what they seek.

Two suggestions: Read the Sterling story, then contact some local or regional food advertiser and tell him how he can use your station to expand his business. Another suggestion: Start telling the Buyers of Advertising weekly in Printers' Ink about your own station and market.

We are ready to help you whether you decide to use 1/6 of a page or a full page on a regular schedule.

When shall we have our first talk?

ROBERT E. KENYON, JR.
Advertising Director

AM IN TV HOMES

Probed by Advertest

RADIO sets require less attention than TV sets. That's what most respondents said in a survey by Advertest's Tele-Scope on "What is your opinion as to why people continue to listen to the radio even though they own television?" Women in 755 TV homes in the New York metropolitan area were queried. Answers and percentages follow:

Radio requires less attention	26.8%
TV tiresome—bad for eyes	8.9%
Many have favorite radio programs	7.8%
Radio has its own values	6.2%
Radio provides music	5.2%
Many radio programs better than TV	4.5%
Some TV programs are poor	3.6%
Habit	2.5%
Miscellaneous reasons	5.4%
Don't know	31.9%

More French-Language

EXPANSION OF Canadian Broadcasting Corp. French programs was decided on at the CBC board of governors meeting in May at Quebec City. French-language stations as far west as Edmonton are to receive wire-line network service from Montreal and Quebec this summer. There are a number of independently - owned French - language stations now in operation in northern Ontario and western Canada, which will be included in this expansion. It also was decided to build a French-language CBC station in New Brunswick province, although location, frequency and costs have not yet been determined. The New Brunswick station will carry the French-language programs exclusively.

YOU MIGHT STRIKE OUT 20 BATTERS IN ONE GAME*—

BUT . . .

YOU NEED THE FETZER STATIONS TO WIN IN WESTERN MICHIGAN!

If you're pitching for the rich Western Michigan market, WKZO-WJEF and WKZO-TV give you three strikes on any other media in this area.

RADIO

WKZO, Kalamazoo, and WJEF, Grand Rapids (a CBS combination) deliver about 57% more city listeners than the next-best two-station choice in these two cities, *yet cost 20% less* than the next combination. In addition to their home-town superiority, WKZO-WJEF have tremendous rural circulation too. The 1949 BMB Report shows that WKZO-WJEF have greatly increased their unduplicated audiences over 1946—up 52.9% at night . . . 46.7% in the daytime! In the Grand Rapids area *alone*, this represents an *unduplicated* day-and-night coverage of 60,000 homes!

TELEVISION

WKZO-TV, Channel 3, is the Official Basic CBS Television Outlet for Kalamazoo-Grand Rapids. A new 28-county Videodex Diary Study, employing the BMB method, offers smashing proof that WKZO-TV delivers 91.9% more Western Michigan and Northern Indiana homes than TV Station "B"!

Write direct or ask Avery-Knodel for all the Fetzer facts, *today!*

* *Maury McDermott of the Louisville Colonels tied this American Association record in a 1949 game with St. Paul.*

tive for the machine was murdered by peons, the project was abandoned in a hurry.

Mr. Provost, whose first name is DeLancey, but who has become known throughout the broadcasting industry by his initials, D.L.—or his nickname Tony—, was born June 28, 1903, at Winsted, Conn., and attended Gilbert Preparatory School.

Awarded a bachelor's degree at William & Mary College, Williamsburg, Va., he entered the advertising business, but was forced out of work during the depression. He entered radio via a recording concern.

As program manager for WNBC New York from 1945 to 1949, Mr. Provost saw the station receive more national awards than at any time in its history. Specializing in children's shows and public affairs programming, he gave many current radio and TV favorites their first big break. Tex and Jinx were introduced by Mr. Provost and he also brought Bob Smith from Buffalo to New York as a morning entertainer and star in children's programs, where Mr. Smith first brought forth his *Howdy Doody* show.

Moving to Baltimore as business manager for WBAL-AM-TV in 1949, he took over his present job in 1951. Since then the properties have expanded steadily with development of merchandising and photographic departments, an increased news staff and intensive concentration on educational programming.

Expands Classroom TV

WBAL-TV already had been among the first stations in the country to inaugurate TV programs for public school classrooms. Under Mr. Provost the educational programming was expanded to embrace the university level, and now makes available Class A time each week for a series participated in by every major college and university in Maryland. Additional choice time is devoted to a weekly medical show presented by U. of Maryland doctors.

The WBAL radio and TV outlets present 51 public service programs weekly.

Mr. Provost also has expanded actual programming time, insisting that WBAL-TV be the first station on the air every day and the last at night, the station starting at 7 a.m. with the Garroway show and ending with live news and sports programming at 12:15 a.m. WBAL-TV programmed its own 9-10 a.m. variety show long before the NBC *Today* program, reportedly receiving the highest rating for early-morning TV in 10 major cities covered by ARB.

Six months ago WBAL went on the air for 24 hours a day. An outstanding feature show on the all night broadcast is conducted by Archdale J. Jones, an Englishman, who helps track down missing persons.

Some indication of why business records show WBAL-TV at its peak booking level and WBAL listing its strongest billing in recent years, may be gathered in Mr. Provost's standing advice to his various staffs:

"We can no longer be purveyors of entertainment from an ivory tower. The people have grown up with our media and are no longer awed by technical magic. Today radio and television stations, like newspapers, must be a part of their communities. That means we must go to the people with our cameras, our tape recorders and our microphones. We must enter their schools and their churches, participate in their fund-raising campaigns and record the progress of their vital civic and legislative issues.

Showmanship Factor

". . . It must not be forgotten, however, that we are also in show business. All the public service in the world will fall on deaf ears unless we employ the tricks of our trade to make it dramatic and vital to the public. . . ."

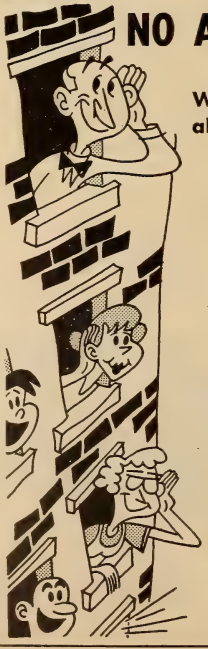
Although Mr. Provost must travel a lot of necessity, he relaxes when he can at his home in a valley north of Baltimore. He is married to the former Seraphine Baumgartner.

His hobbies are his dogs, gardening and sometimes a hand of poker.

SCAAA ELECTION

Jorgensen Named President

KAI JORGENSEN, executive vice president and chairman of the board, Hixson & Jorgensen Inc., Los Angeles agency, has been elected president of Southern California Advertising Agencies Assn. He succeeds Willard G. Gregory, president, Willard G. Gregory Co. who continues as board member.



Mr. Jorgensen

Elected first and second vice presidents, respectively, were Earl L. Taggart, partner of Taggart & Young Adv., and Robert F. Millar, president, Stellar, Millar & Lester Inc. Forrest Dolan, vice president, The Mayers Co., was named secretary-treasurer.

Pulse Expands Service

PULSE Inc.'s addition of 18 radio and ten video markets to its service area surveys marks the firm's greatest four month expansion in history, Dr. Sidney Roslow, Pulse head, said May 24. He said Pulse now covers 67 radio markets including 18 million families, or 42% of the U. S. total, and 38 TV markets containing 85% of all TV sets. New markets, as released by Pulse, include Houston, San Antonio, Toledo, Providence, Milwaukee, Tulsa, San Diego, Miami, Pittsburgh, Baltimore and Richmond.

NO ARGUMENT HERE . . .

WBNS has more listeners than all local stations combined!

All the neighbors listen in when WBNS is on the air. And you can't argue with these facts: WBNS has the top 20 rated programs . . . a combination of top CBS shows and local favorites. WBNS reaches a Billion-Dollar audience of almost 1¼ million, both urban and rural. WBNS is the neighbor other local stations try to keep up with.

Can America escape socialism?

Some nations couldn't. And there are people in this country who are trying to push America down the same one-way street.

They don't speak out for socialism openly—they know most Americans don't want it. Instead, they give persuasive reasons for the *steps that lead to socialism.*

There's one clue that will help you recognize this hidden socialism. It's the old line: "*Let the federal government do it—or run it—or take it over—or own and operate it.*" When you hear that, look out.

For the more things the federal government runs, the closer we are to socialism—whether we want it or not—and the fewer rights and freedoms we have left for ourselves.

America can escape socialism—here's how you can help: Recognize the steps that lead to it. Help your friends and neighbors see the danger. And use your ballot wisely!

• • •

WHERE DOES SOCIALISM START? One of socialism's first aims is to have the federal government take over electricity, and thus get the whip hand over every business, farm and family. In America, socialized electricity has spread steadily—and the pressure is on for much more. That's why America's business-managed, tax-paying ELECTRIC LIGHT AND POWER COMPANIES* publish this warning to all Americans.

JAYCEES' DAY

Take Over WASK Schedule

OLD CLICHE, "banker's hours," didn't mean a thing to Jaycees of Lafayette, Ind., fortnight ago as 40 businessmen took over the town, lock-stock and barrel — including the microphones of WASK there.

From 6 a.m. sign-on until post-midnight sign-off, it was Junior Chamber of Commerce day at the station as Jaycees and their "guest stars" handled microphone chores. Occasion was a special promotion aimed at boosting "Greater Lafayette Day." Plan was conceived by O. E. Richardson, WASK owner, and Robert Sharer, Jaycee board member.

Feature of day's activities was reading of each other's commercials by competitive business rivals. A bank president and maufacturer opened the broadcast day with news, markets and records. Jaycees also announced a local semi-pro baseball game. Participating in broadcast activities were bankers, insurance men, salesmen, lawyers, merchants, industrial officials and a Marine sergeant.

WSYR's Local Radio Sales UP 39%

For the period ending April 30, WSYR's local radio sales were 39% ahead of 1951. The local advertisers responsible for this increase are the ones in the best position to test the effectiveness of all media. They know which advertising keeps the cash register ringing.

WRS' PRIORITY PLAN

Suggests 'Service Factor'

By LARRY CHRISTOPHER

MODIFICATION of FCC's temporary processing procedure and city-by-city priority listing—to effect more equitable positioning among cities now receiving limited service—was proposed to the Commission last week by Westinghouse Radio Stations Inc. FCC issued its city priority list a fortnight ago [B•T, May 26].

The Westinghouse technique employs a "television service factor" as the key to positioning. This factor is the population of the city divided by the number of TV stations there. Computing one list on the basis of city population and another on the basis of metropolitan area population, Westinghouse covers only the B-2 through B-5 groupings (cities with existing service).

Allocation Developments

Other allocation developments last week included:

● Petition for reconsideration of FCC's Sixth Report lifting the TV freeze by Matta Broadcasting Co., licensee of WLOA Braddock, Pa., requesting assignment of Channel 4 there. Petition argues factors of separation between Braddock and Columbus, Ohio, and suggests channel changes involving WLWC (TV) and WBNS-TV Columbus.

● Request by Zenith Radio Corp., Chicago, that FCC (1) issue a ruling declaring all Chicago applicants, including WBKB (TV) there, on "equal footing" in their bids for Channel 2 and (2) "maintain *status quo* in respect to Channel 2 in Chicago."

● Plea by Dr. Forbes Farms Inc., Palm Springs, Calif., for amendment of Sec. 3.606 (allocations table) to allocate UHF Channel 14 there under provision of 15-mile rule.

● Opposition of Havens & Martin, operator of WTVR (TV) Richmond, to petition of High Point Enterprise (WHPE High Point, N. C.) to remove the allocation of VHF Channel 6 from Beckley, W. Va., to High Point.

The Westinghouse petition noted that the priority principles retained by FCC in the Sixth Report "are fair to the public" and that "it is in the public interest and 'serves the greatest good to the greatest number' to bring into reality, as quickly as possible, priorities 1 through 4, giving all areas a choice of two programs and all cities at least two stations."

Priority 1 is to provide at least one TV service to all parts of the U. S.; priority 2, to give each community at least one station. Priorities 3 and 4 are the same except they specify two services to all areas and two stations to each community, respectively, the petition explained.

Conflicts With Priorities

Noting that the Sixth Report indicates FCC's desire "to bring into being as many of the UHF television stations as possible within the shortest period of time," Westinghouse said the temporary processing procedure "would accomplish this result but, in our opinion, unnecessarily conflicts with priorities 1 through 4, at least as to timing."

"For instance," the petition continued, "hearings will be held in Los Angeles and New York-Newark area, both served by seven television stations, ahead of the Pittsburgh and St. Louis hearings, which cities are presently served by single outlets and rank eighth and ninth in metropolitan area population respectively."

Along the same line, the petition pointed out that the "hearings in Los Angeles and New York (and other multiple-served cities including Washington, Philadelphia, Detroit, Baltimore, etc.) violate priorities 2 and 4, at least as to timing, only because UHF is the only remaining available service."

"This appears to be an undue advantage to citizens already receiving adequate service," Westinghouse contended, "and an unfair penalty to those citizens in other large single outlet cities to which both UHF and VHF channels are presently proposed."

"We believe that the public interest would be served and priorities 1 through 4 more quickly brought into reality by use of another formula to establish hearing procedures without retarding the early growth of UHF stations," the petition held.

A-2 Priorities Necessary

Westinghouse stated it had no comment with respect to the Commission's proposals for group A-2 and B-1 cities, "since such priorities are necessary in order to meet priorities 1 and 3." A-2 cities are those 40 miles or more from any existing TV station while B-1 cities are those less than 40 miles and having assigned to them only UHF channels.

The petition noted that in group B-1 "the Commission's proposal involves cities less than 40 miles (some as close as 2 and 3 miles—Gastonia and East Lansing) from an existing transmitter and therefore are presumably receiving one or more services (Paterson, N. J., at 12 miles, receives 7 services) within the meaning of at least priority 1 if not priority 3. Therefore, the formula we are proposing could be extended to include group B-1, or at least many cities listed therein."

Westinghouse pointed out that in applying the television service factor formula to both the city population and metropolitan area population listings it offered as an appendix to its petition (see page 68), cities presently receiving multiple service "are more evenly distributed throughout the hearing schedule without unduly delaying hearings in cities where only UHF channels are available. (For instance, New York is second, Chicago fourth, Philadelphia fifth, Detroit eighth, etc. on the metropolitan area basis.) Meanwhile, however, single outlet cities appear early on the hearing list and we therefore anticipate conformity

(Continued on page 64)

NCAA CONTROLS

'52 Plan Is Compromise

FEARING the "financial pressures" of television "may well spell the end of amateur football" if allowed to go unchecked, the TV committee of the National Collegiate Athletic Assn. last week produced some pressure of its own in the form of its second, 1952 plan for controlling college football television.

Networks, which had met separately with the TV committee since February to offer their suggestions, unanimously agreed they would much prefer no restrictions whatsoever on football telecasts, but generally conceded the plan, a compromise over last year's, was better than its predecessor. Several spokesmen echoed Committee Chairman Robert A. Hall of Yale who noted that the plan "wouldn't please everybody concerned 100%, but would be beneficial to all."

Onus of the 1952 plan is placed upon the sponsor, sponsors, or network selected by the NCAA—not necessarily in terms of the highest bid—to conduct a nationwide program on 11 successive Saturdays, starting September 20, plus Thanksgiving. Contrary to last year's design, the new plan calls for no television blackouts, bull's eye of public protests last season, and one network spokesman called this a definite improvement for the advertiser, audience, and broadcaster.

Meet Next January

The NCAA committee also considered assessing TV receipts for pro-rata redistribution to all 250 member colleges, but proposals for this suggestion, intended to help eliminate television as a "vast money-making device for the favored few," will not be considered until the annual NCAA convention, to be held in Washington, D. C., sometime in January.

All the major television networks were understood last week to be working on the plan, steering through its qualifications to find its sales potential. Estimated by one spokesman as involving a $2½-$3 million purse, it seemed unlikely that any one network would undertake college football under its own aegis, as suggested by the NCAA, unless supported by a major sponsor or a group of sponsors. With Philco, Admiral, and Westinghouse —which presented 19 college games on NBC-TV last year for a reported $663,142—buying AM-TV coverage of national political conventions this summer, it was felt sponsors might prove hard to find.

Tricky aspect of the NCAA proposal is that the sponsor is expected to make his own cost esti-

TV REQUESTS

FCC Receives 24 Bids

TOTAL of new and amended television station applications filed since the FCC's Sixth Report and Order was released [B•T, April 14] rose to 64 last week when 24 applications were submitted to the Commission—more than during any other week since the TV freeze lift.

Zenith Radio Corp. amended its application and seeks Channel 2 in Chicago. It plans to spend $564,500 on construction and lose $250,000 in operating costs the first year.

KOMO Seattle filed an amended application for Channel 4. KOMO plans to spend $1,115,460 for the TV station (it already has the building) and expects the first year operating cost to be more than $1 million.

There were two applications from Honolulu, Hawaii. They came from KGU, owned by the *Honolulu Advertiser,* for Channel 4, and the owners of Royal Amusements Ltd., motion picture distributor and exhibitor, for Channel 2.

Breakdown of last week's applications shows that there were nine new requests filed—six for VHF stations and three for UHF. There were 15 amended applications, of which nine are for VHF outlets and six for UHF.

EDUCATORS MULL TV PLANS

Walker Warns of Time

WARNING that "time is running out so rapidly," FCC Chairman Paul A. Walker last week called for prompt action in the use of the 242 TV channels reserved for noncommercial educational stations in the Commission's Sixth Report [B•T, April 14].

Pledging his "full support and . . . wishes for all success" to educators, Chairman Walker made his plea for positive action on Tuesday before a two-day conference on educational TV in North Carolina at Chapel Hill. Some 200 state educational representatives attended the meeting, called by Gordon Gray, president of the consolidated U. of North Carolina, and also president of WSJS Winston-Salem, N. C. [Consolidated university includes the Women's College at Greensboro, State College at Raleigh and the U. of North Carolina at Chapel Hill.]

Seven UHF channels and one VHF channel are reserved for noncommercial educational use in North Carolina under the provisions of the Commission's Sixth Report.

Concerning FCC's decision to reserve channels, made "after impressive, comprehensive testimony by America's educators marshaled by the Joint Committee for Educational Television," Chairman Walker told the group:

"I am satisfied in my own mind that in the years to come this action will stand out as one of the most important contributions ever made to the development of American education.

Heated Competition

"If anyone doubts the value of these television channel assignments," the chairman said, "he need only observe the heated competition for the commercial assignments. In every large city we anticipate that the demand will exceed the supply. Applicants are ready not only to construct and operate stations, but in most large cities to stand the heavy expense of the hearings which are necessary to choose the best qualified applicants."

Noting that by July 1 FCC expects to have 1,000 applications on hand, Chairman Walker observed that "this demand for assignments has, in fact, been so intense that the Commission deemed it proper to attach a most important limitation to its reservation of educational channels.

"That limitation is that if the circumstances warrant it, the Commission may, at the end of one year or thereafter, change a noncommercial educational assignment to a commercial assignment," he pointed out.

The FCC chairman continued: "You educators must understand that these precious television assignments cannot be reserved for you indefinitely. . . . The need for prompt action on your part is therefore obvious."

Noting that JCET has reported some 20 schools or groups are already taking preliminary steps to make plans for the filing of applications, Chairman Walker stated: "This is encouraging progress. It proves that educational television is on the march."

Groups under way, he reported, include Ohio State U., U. of Illinois, U. of Michigan, Michigan State College, U. of Wisconsin, U. of Iowa, U. of Kansas, Kansas State College, U. of Connecticut with the Connecticut State Dept. of Education, Rutgers U. with the New Jersey State Dept. of Education, U. of Houston with the Houston public schools, as well as groups in Los Angeles, Milwaukee, Detroit, San Francisco, Chicago, Pittsburgh, St. Louis and Wichita. New York State is planning a state-wide network, he noted, with similar plans under way in Wisconsin.

TV Most Effective

Asking why advertisers "are pouring hundreds of millions of dollars" into TV, Chairman Walker said, "Certainly not for eleemosynary reasons. It is because no other medium can produce results so effectively.

"Likewise," he continued, "measuring your expenditures in terms of educational results, you cannot find a more economical investment than television."

Concensus of the meeting on educational television programs for the three institutions of the consolidated U. of North Carolina is that they are desirable provided high quality can be maintained and adequate funds for financing can be obtained. The conclusions were summarized at the final session Wednesday.

Among those present were deans and directors of the three institutions of the consolidated university, a committee of the board of trustees, representatives of the state budget bureau, of the state department of public instruction, several national foundations and adult education groups as well as special consultants.

President Gray of the consolidated university, said as far as the administration is concerned, no decision has been reached as to the feasibility of establishing television stations at any or all of the three institutions.

"There is at present no large or small money in sight for the inauguration of such programs," he said.

School Stations

Alternatives for setting up stations at the three institutions, Mr. Gray said, would be to set up one transmitting station and have three studios service it or to have no transmitter with studios at the three institutions relying on commercial stations for transmission.

Arthur S. Adams, president of the American Council on Education, told the conference that the sum needed to establish and operate educational television stations is "relatively small compared to the magnitude of the current operation in television, despite the limited number of commercial stations."

Reports also were presented by representatives of several universities with television programs already in operation. Among them were Elroy L. Stromberg, professor of psychology, Western Reserve U.; Armand L. Hunter, director of television development, Michigan State College, and Richard Hull, manager of WOI-TV, Iowa State College.

The board of regents of the U. of Wisconsin has voted to seek $100,000 from the 1953 state legislature to construct a closed circuit educational TV laboratory on the Madison campus. Such facilities would permit the university to experiment in TV techniques and to record programs on film for showing over regular commercial TV outlets.

At the same meeting, held in May, the regents set priorities on $16.3 million worth of buildings for which they also will ask the legislature.

Prof. Harold B. McCarty, director of the State Radio Council and a top supporter of state-sponsored TV, informed the regents it will cost about $200,000 to establish an educational TV outlet at Madison and about $3 million to construct a 12-station educational network, mostly UHF, connected by microwave relay. Prof. McCarty, warning of the one-year limit expected on reservations, suggested the school system establish stations at Madison and Milwaukee as a starter to show FCC that Wisconsin means business on educational TV. The 12-station network would cost about five times the cost of the state FM network now in operation, it is estimated.

Admitting that equipment and operating costs are high in television, Prof. McCarty pointed out that it still would be "one of the most economical" teaching tools. A state network, he said, should operate four to six hours a day, some of the time during school hours.

TV Cost Double FM

Cost of operating the 12-station network would be double that of the present FM setup, the regents were told. Operating cost of the latter annually is $275,000.

The construction program of $16.3 million is for 1953-55. All told, the regents are asking for $64 million in new construction by 1959.

The State Radio Council has been designated by Governor Walter Kohler Jr. to handle all state TV interests.

At a meeting on May 27, a newly-formed Wisconsin Citizens Committee for Educational Television unanimously voted to request FCC to reconsider its allocation plan and assign VHF instead of UHF channels to education in Madison, LaCrosse, Eau Claire, Wausau and Green Bay.

WISC Madison already has indicated it would prefer that the sole VHF channel at Madison (Channel 3) be reserved for educational use rather than one of the three UHF channels allocated there.

The State Radio Council pointed out that greater coverage could be obtained for each dollar spent by using VHF. The council noted that the use of VHF probably would result in a reduction of the number of transmitters needed to cover the state.

More than two dozen "well established and well-known organizations" have joined in the formation of the Wisconsin citizens' TV

EXAMINING the new external cavity-tuning Klystron power tube used in the DuMont 5 kw UHF-TV transmitter undergoing tests at Allen B. DuMont Labs. in Passaic, N. J., are (l to r) Gene Chennault, Sheldon W. Anderson, William H. Sayer Jr., and John P. Hearne. Mr. Sayer, a DuMont engineer, is explaining advantages of the Klystron tube to Messrs. Chennault, Anderson and Hearne, owners of KCOK Tulare, Calif. KCOK has ordered the DuMont UHF transmitter in anticipation of its entry into UHF-TV.

SITTING IN ON THE POLITICAL SCENE

This July is a month to be marked in history. When the curtain goes up on the national political conventions in Chicago, people from coast to coast can watch the nomination of presidential candidates.

In seven short years the Bell System has expanded the intercity television network so that it is now possible for 99% of the television viewers across the nation to watch the same program simultaneously. Behind this expansion is a story of achievement. Radio-relay and coaxial cable routes were planned and built. Special equipment was designed, tested and perfected. And men of special talents were trained in its special use.

The present value of the network, furnished by the Long Lines Department of the American Telephone and Telegraph Company and the Bell Telephone Companies, is about $90,000,000. Yet the cost of service is low. The telephone companies' total network charges average about 10 cents a mile for a half hour of program time.

WRS' Priority Plan

(Continued from page 59)

with priorities 2 and 4 at a much earlier date."

Similarly, one-station Pittsburgh, which under FCC's temporary processing procedure falls near the end of the B group city listings and is the last city on the list for all of Pennsylvania, ranks fifth on the Westinghouse's city area list. On the metropolitan area list, Pittsburgh ranks first.

In its petition, Matta Broadcasting contends the Sixth Report "arbitrarily and capriciously" denies Channel 4 at Braddock (Pittsburgh area) by changing the assignment of WLWC from Channel 3 to Channel 4. The petition points out that Channel 4 could be assigned to Braddock in accordance with the Commission's minimum spacing rule by changing WLWC to Channel 10 and switching WBNS-TV from Channel 10 to Channel 4.

Braddock's post office is 169.39 miles from the transmitter of WLWC at Columbus.

Distance from Braddock's post office to the transmitter of WBNS-TV is 170 miles, the petition asserts, thus permitting Channel 4 to be assigned to both Braddock and Columbus. Thus, "an additional television service . . . could be made available to the public," FCC was informed.

Not to permit this added channel use, Matta Broadcasting contends, is "contrary to the Commission's own 'priorities' in this proceeding."

The petition further notes that under the Commission allocation, Channel 4 at Columbus for WLWC is only 159.043 miles from the transmitter of WWJ-TV Detroit instead of the required 170 miles. Under the Matta Broadcasting plan, assigning Channel 4 to WBNS-TV, the transmitter separation with WWJ-TV is increased to 162.9 miles.

Permitting "sub-minimal co-channel mileage separations in favor of existing licensees and permittees—which in itself constitues an arbitrary and unlawful discrimination in favor of existing licensees and permittees," the petition charges, "does not legalize the Commission's proposed assignment of Channel 4 to WLWC for two reasons: (1) no existing licensee or permittee is presently authorized to operate on Channel 4 at Columbus, Ohio; and (2) the co-channel separation of WLWC on Channel 3 (from WDTV at Pittsburgh) of 162.459 miles would be *reduced* to a co-channel separation on Channel 4 (from WWJ-TV at Detroit) of 159.043 miles."

Matta Broadcasting further contends the Commission's refusal to allocate Channel 4 at Braddock is illegal because of the FCC's failure to give adequate legal notice of the bases of its action as required under the Administrative Procedure Act.

"Fundamentally," the petition argues, "the lack of adequate legal notice to petitioner . . . derives from the failure of the Commission to adopt technical standards for television stations before requiring interested persons to plead to the Commission's proposed specific allocation table of assignments of television channels."

Right to "full and fair hearing . . . was debased in this proceeding to a guessing game in which petitioner had, at its peril, to guess which of the infinite possible technical standards the Commission might adopt—simultaneously with its decision on allocations of channels—and to base its participation herein on such a guess," the petition contends.

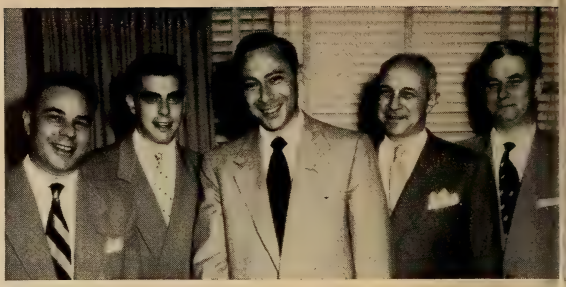
Another principal assertion of the Matta Broadcasting petition is that the city-to-city mileage separation requirement "is an arbitrary principle of channel assignment and unlawfully deprives Braddock . . . of the use of Channel 4."

The petition notes "it is clear from the Commission's general observations that the 'assignment spacing' requirement was adopted solely for the convenience of the Commission in preparing an assignment table and without regard to the effect of the principle on the public interest involved in specific allocation problems."

"The city-to-city co-channel spacing does not determine the coverage of potential television stations or interference between such stations in different communities," the petition observes, stating that "objections to the co-channel minimum city-to-city spacing on the ground of irrelevance were registered in this proceeding but, while the Commission acknowledged the filing of these objections . . . the Sixth Report and Order disregarded them."

Zenith Radio Corp. contends in its petition that FCCs proposal to switch WBKB (TV) Chicago from Channel 4 to Channel 2 in order to reduce interference and "effect the maximum utilization" of VHF channels "presents only a problem of preferment of Balaban & Katz Corp. [WBKB], which had never applied for any authorization on Channel 2, over those such as Zenith who have had long-pending applications for authorization on Channel 2."

"Such substitution does not reduce interference, make available a reasonable number of channels or effect a maximum utilization of VHF channels," Zenith contends, "since these factors are unchanged whether it is Balaban & Katz, Zenith, or some other applicant" who is granted Channel 2.



Zenith notes that FCC, coincident with the Sixth Report, issued a memorandum opinion and order pointing out that determinations made in the Sixth Report required amendment of Zenith's application and rendered moot an earlier petition seeking clarification of Channel 2's status. The memorandum said that Zenith, if it filed a properly amended application under the rules of the Sixth Report, may at the time again raise the question of its status and the status of Balaban & Katz respecting Channel 2.

Maintenance of the *status quo* of Channel 2, until comparative hearings among all applicants were held, "would not appear to prejudice significantly the public interest" or rights of any parties, Zenith contends. It would mean a brief continuance in Chicago "and a few affected localities of conditions which have in any event been in existence since the imposition of the 'freeze'." WBKB would continue temporarily on Channel 4 and WTMJ-TV Milwaukee would continue for that time on Channel 3, rather than switching to Channel 4 as proposed, the petition notes.

Another reason for maintaining the *status quo*, according to Zenith, concerns the proposed sale of WBKB by Paramount's Balaban & Katz to CBS, contingent upon the approval for merger of ABC and United Paramount Theatres.

Zenith says that Balaban & Katz actually holds only a "temporary license" to operate commercially upon Channel 4 for two reasons: (1) FCC has been unable to determine the renewal of license of WBKB and (2) when FCC issued it's Third Notice of allocations pro-

(Continued on page 68)

PRINCIPALS in Ziv Television Programs Inc. sales expansion, announced by M. J. Rifkin, sales vice president, are (l to r): Michael M. Sillerman, eastern sales manager who also will head New York sales; Martin Katz, formerly with WOR-TV, now New York account executive; Mr. Rifkin; Vincent Van Beuren, formerly with Bothwell Adv., now New York account executive for TV drug cooperative programs; Russell Clancy, New York account executive.

3 things you need...

TRANSMITTER

PROGRAMS

AUDIENCE

to launch a successful UHF television station

And Du Mont can help you get all three. Write today for this informative booklet, "UHF, The New Big Development In Television", and find out how you can get on the air quickly and profitably...

with Du Mont UHF transmitting equipment
with Du Mont Television programs
with a Du Mont-built UHF audience

Learn how these three Du Mont operations, working together, can help make your UHF plans a successful reality.

'Lucy' Tops In Two Ratings

(Report 219)

'Lucy' Still Heads Nielsen List on TV

NATIONAL ratings for top 10 television programs for the two weeks ending May 10 have been released by A. C. Nielsen Co. as follows:

NUMBER OF TV HOMES REACHED

Rank	Program	Homes (000)
1	I Love Lucy (CBS)	10,200
2	Red Skelton (NBC)	7,527
3	Colgate Comedy Hour (NBC)	6,998
4	Arthur Godfrey & Friends (Liggett & Myers) (CBS)	6,887
5	Goodyear TV Playhouse (NBC)	6,522
6	Texaco Star Theatre (NBC)	6,431
7	You Bet Your Life (NBC)	6,283
8	Fireside Theatre (NBC)	6,198
9	Your Show of Shows (R. J. Reynolds) (NBC)	6,080
10	Your Show of Shows (Participating) (NBC)	5,788

PER CENT OF TV HOMES REACHED IN PROGRAM STATION AREAS

Rank	Program	Homes %
1	I Love Lucy (CBS)	60.8
2	Arthur Godfrey's Scouts (CBS)	50.0
3	Red Skelton (NBC)	46.2
4	Arthur Godfrey & Friends (Liggett & Myers) (CBS)	45.3
5	Colgate Comedy Hour (NBC)	42.6
6	Pabst Blue Ribbon Bouts (CBS)	40.5
7	Goodyear TV Playhouse (NBC)	40.1
8	Your Show of Shows (R. J. Reynolds) (NBC)	40.1
9	Texaco Star Theatre (NBC)	40.0
10	Your Show of Shows (Participating) (NBC)	39.8

WTOP-TV Announces New Rate Card No. 3

IN ANNOUNCING a rate increase of 27% for Class A time and 16.5% for Class A announcements, WTOP-TV Washington reports a circulation increase of 39%, according to George Hartford, vice president in charge of sales. Class A time goes from $550 to $700 per hour and Class A announcements from $120 to $140, effective June 15, Mr. Hartford said.

WTOP-TV's new rate card No. 3 is based on an estimated 370,000 TV sets in operation in the Washington area, whereas rate card No. 2, which has been in effect since May 15, 1951, is based on 265,250 sets, Mr. Hartford said.

Anticipating extension of the broadcast day, WTOP-TV introduces Class D on its new rate card at $250 per hour base rate for periods from sign-on to 4 p.m. The station also announces a new volume discount of 45% after other earned discounts for 12 or more daytime and specified nighttime announcements per week and allows a maximum of four Class A station identifications. Advertiser protection lasts to Dec. 31, 1952.

L. A. Elementary Schools Plan Classroom Test

TWENTY-FIVE Los Angeles elementary schools will try out TV in classrooms next fall, according to Mrs. Margaret W. Divisia, supervisor of the system's audio-visual department.

There will be two 20-inch sets in each classroom in the scattered schools at start of experiment to "discover worthwhile educational experiences which can be furnished the pupils," she explained.

Tests will be made from kindergarten through sixth grade with telecasts varying from "journeys around the community" to history, science, geography, art, music and language instructions. Shut-in students will also be able to get the instruction in their homes.

ARB Lists 'Lucy' As Top TV Program

HEADING the American Research Bureau television rating list for viewing from May 1-7 was CBS Television's *I Love Lucy*, with a rating of 65.3 and viewing in more than 11 million homes. ARB figures were:

Program	Rating %
1. I Love Lucy (CBS)	65.3
2. Talent Scouts (CBS)	62.6
3. You Bet Your Life (NBC)	52.4
4. Godfrey & Friends (CBS)	51.4
5. Blue Ribbon Bouts (CBS) (Davey vs. Vejar)	49.1
6. Red Skelton (NBC)	47.3
7. My Friend Irma (CBS)	43.6
8. Show of Shows (NBC)	43.2
9. What's My Line? (CBS)	41.5
10. Star Theatre (NBC)	40.8

Program	Homes (000's)
1. I Love Lucy (CBS)	11,160
2. You Bet Your Life (NBC)	8,010
3. Godfrey & Friends (CBS)	7,770
4. Red Skelton (NBC)	7,750
5. Show of Shows (NBC)	7,750
6. Blue Ribbon Bouts (CBS) (Davey vs. Vejar)	7,610
7. Star Theatre (NBC)	7,590
8. Talent Scouts (CBS)	6,800
9. Robert Montgomery (NBC)	6,630
10. Fireside Theatre (NBC)	6,610

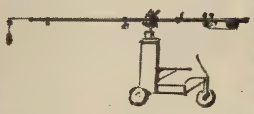
Total Markets on Air 64* | Stations on Air 109* | Estimated Sets in Use 17,220,049

* Includes XELD-TV Matamoros, Mexico

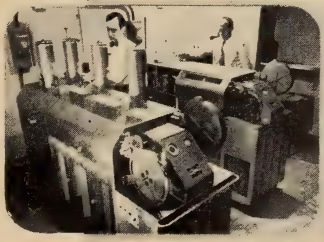
Editor's Note: Totals for each market represent estimated sets within television area. Where coverage areas overlap set counts may be partially duplicated. Sources of set estimates are based on data from dealers, distributors, TV circulation committees, electric companies and manufacturers. Since many are compiled monthly, some may remain unchanged in successive summaries. Total sets in all areas are necessarily approximate.

MORE in BaltiMORE on WMAR-TV

A long shot of WMAR-TV's large studio in full action shows four sets in use. The picture was taken during telecast of the 7-hours-a-week "National Revue."



Of the over 100 hours of weekly programming on WMAR-TV, CBS, the world's leading television network, supplies more than half.



The smaller studio is equipped with a full-scale working kitchen. Ann Mar is here conducting "The Woman's Angle", a popular daily program.

WMAR-TV's two remote units, employing five TV field cameras, have covered more than 1400 events to date.

WMAR-TV is a big film producer, as shown by these two Houston Processors. Its daily newsreel alone has filmed some 8600 news stories since inception.

Weekly Quarter Hour Firsts

WMAR-TV	Station A.	Station B
11:00 A.M. to 6:00 P.M.		
90	56	47
6:00 P.M. to 11:00 P.M.		
74	50	16
164	106	63

The box score of WMAR-TV's Maryland leadership, according to April A.R.B., is 164 quarter-hour firsts of the week's 333 when all three Baltimore television stations are on-the-air.

WRS' Priority Plan

(Continued from page 64)

posing to delete Channel 4 at Chicago, "any license held by Balaban & Katz . . . became subject to the infirmity that the Commission might finalize its proposed deletion of Channel 4." This was done by the Sixth Report, Zenith indicated.

Zenith contends, therefore, that the Commission "may not now . . . give its consent to the transfer from Balaban & Katz Corp. to Columbia of a license which, since March 1951, has been infirm and which, since the issuance of the Commission's overriding Sixth Report and Order, is foredoomed to early, inevitable cancellation. What Balaban & Katz proposes to transfer to Columbia (apart from its physical facilities) is not a license but a legal argument that the transferee should have an important competitive advantage in any contest for Channel 2 in Chicago."

Dr. Forbes Farms, in seeking the allocation of Channel 14 to Palm Springs, points out that the nearest channel is located at San Bernardino, 47 miles distant. Palm Springs' population is 7,428, the petition explains, noting, however, that the allocation table provides for channels to about 350 cities, or about one-third of the total number of cities which have smaller population than Palm Springs.

In opposing the WHPE petition, Havens & Martin points out that the use of Channel 6 at High Point would cause interference to WTVR's Grade B service area and interfere with the use of Channel 6 at Wilmington, N. C.

Havens & Martin's petition notes that "in the High Point petition a great deal of emphasis is placed upon the fact that there is already a VHF station in operation in the general area, a considerable number of VHF receiving sets are located in the vicinity and a UHF broadcaster would face great handships under the circumstances. In fact, from the general tenor of this petition, the conclusion is inescapable that The High Point Enterprise Inc. is motivated by the desire to go through the revolving door of television broadcasting on someone else's push rather than to undertake such pioneering in the area as might be required of a UHF broadcaster."

Following are given the two priority listings suggested by Westinghouse, based upon use of the television service factor (population divided by number of existing stations). The first list is based on city population, the second on metropolitan area populations. Only those cities given in FCC's city priority groups B-2 through B-5 are included [B•T, May 26].

* * *

CITIES RECEIVING TV SERVICE
(Combined List of Cities in FCC Lists B2, B3, B4 and B5)

WPIX (TV) CUTS

Summer Rates Se

REDUCTION of about 50% i regular rates for certain program and participations, effective Jur 15 to Sept. 14, was announce last week by WPIX (TV) Ne York.

The hot-weather rate offers $ eight-second identification spo on a run-of-the-station basis f $500 or 60 such spots per seven-da week for $1,000. Individual spo normally are $30 each.

Packages to be offered at a decrea are *Matinee Newsreel, Sunday Fil Theatre, Star Film Theatre, Six-Gu Playhouse, Movietime* and *Night Ow Theatre,* all movie features; *Telespor Digest,* with Harry Wismer; and *It Ha pened This Week,* a Sunday news r view.

Matinee Newsreel is offered at $1 per program. ~~*It Happened This Wee*~~ is offered as a flat $10,000 package f 13 weeks. *Six-Gun Playhouse,* limited to participations of 60 second or less.

CBS-TV Names Banker

ROBERT M. BANKER, unit mar ager of CBS Television's dramati series, *Studio One,* has been ap pointed casting director for th network, effective today (Monday) Mr. Banker replaces Robert Freye resigned. After serving as accoun executive on *Studio One* for th Murray Martin public relation firm, Mr. Banker joined CBS-T in 1950.

A fifth of a mile straight up

This slim steel needle reaching skyward is one of the tallest structures on earth.

It is the antenna tower of Station WSB-TV at Atlanta. From the ground level to the tip of the beacon that tops it off, the tower measures 1062 feet, almost exactly one-fifth of a mile.

Topmost portion of the structure is the 57-foot FM pylon with the 200-foot TV antenna just below it. The rest of the three-sided tower, from the 800-foot level down to earth, is a supporting structure for the pylon and the antenna.

Heavy guy wires of Bethlehem galvanized strand, attached to the tower at two levels, have the main responsibility for holding it in position and bracing it against winds. In addition, a substantial amount of Bethlehem steel was utilized in providing the structural cross-bracing.

The tower's location right within Atlanta and less than a mile from the center of the city's business district means television at its best for the large Atlanta TV audience. And the great height of the tower insures maximum coverage of TV sets in a very wide surrounding area.

ABC-UPT

FCC Hears Dr. DuMont, Latimer, Edwards

AN INVENTOR, a judge and a theatre operator testified during last week's ABC-UPT merger hearing at the FCC.

The inventor was Dr. Allen B. DuMont, president of Allen B. DuMont Labs. He had testified earlier in the hearing, but returned to cover some details of DuMont's financial situation in the early 1940s. He said that Paul Raibourn, who was head of Television Productions Inc. (wholly-owned Paramount subsidiary), wanted to convert DuMont stock at what Dr. DuMont thought was a low rate. Dr. DuMont testified that Mr. Raibourn wanted the lower rate so TPI could get more shares of stock.

Dr. DuMont asserted that at that time he felt Paramount was trying to take advantage of DuMont.

Relationship between Scophony Corp. of America and DuMont Labs. was also probed by Commission counsel Arthur Gladstone. Dr. DuMont said he only saw the SCA executives once or twice but was not interested in a patent-licensing agreement with them.

Judge George W. Latimer, appointed last June to the U. S. Court of Military Appeals, was on the Utah Supreme Court bench before that. A decade ago he was on active military duty but was recalled by Joe Lawrence, operator of Salt Lake City theatres, to attend a meeting in Los Angeles with Leonard Goldenson, then in charge of Paramount theatres and now president of United Paramount Theatres; Austin C. Keough, chief counsel for Paramount; Sam Dembrow, at that time a Paramount executive, and Mr. Lawrence.

The meeting concerned a theatre in Salt Lake City which had been taken over by its landlord after Inter-Mountain Theatres, a Paramount subsidiary, had not renewed the lease.

Judge Latimer testified that Messrs. Keough and Goldenson said at the meeting that no one else would run the theatre if they didn't, and that if Mr. Lawrence tried it, he would get no first-run pictures. Judge Latimer said it was "not a jest," but a serious statement.

The theatre operator who testified at last week's hearing was David G. Edwards, who was manager for the Lawrence theatres.

He testified that he, too, had met with Messrs. Goldenson and Dembrow, with Mr. Lawrence, and that Mr. Goldenson told him that Paramount would "blitz" the Lawrence theatres just as Hitler was blitzing Europe.

Mr. Edwards asserted Mr. Goldenson had told him that Paramount "had learned a lot from this guy Hitler. We will send the bombers over. . . . You fellows opened up a closed situation that we paid a lot of money to get and we are not going to idly standby by and take it."

After that, Mr. Edwards said, he got occasional second run pictures, but it wasn't unitl 1946—following the Justice Dept. probe into the major motion picture companies—that he could obtain better pictures.

This week, only witness to testify is Arthur F. Sass, Chicago theatre owner, who returns for cross-examination [B•T, May 26]. On June 26, Dr. A. H. Rosenthal, called the inventor of the dark-trace (Skiatron) TV tube, will testify for the first time. He is expected to discuss the background of Scophony and its relationship with Paramount and General Precision Equipment (both Class B stockholders) as it affected his work.

Networks' Time Sales

(Continued from page 25)

works at present, averaging about one-third the number of outlets of the average radio network for commercial programs. Only nine product classes gave more money to radio in March than to TV, networkwise, including three groups—agriculture, horticulture and transportation—not represented in network TV at all.

Plans UHF Tests

FURTHER UHF propagation tests to determine the effect of antenna height on transmissions are planned by RCA, according to applications filed with FCC for approval to employ four transmitters in the 840-854 mc band using output of 20 w. RCA told the Commission it plans to use four antennas on the tower of WOR-TV New York, spaced at heights of 185, 370, 550 and 735 ft. Each antenna will have a gain of about 100 and will be tiltable upward 2° and downward 10°. RCA mobile units will take measurements in the area for about six months.

Fustest, Gets Mostest

YOU DON'T own a TV set but want to watch the political conventions this summer? On a first-come, first-served basis, the DuMont Labs. will install, free of charge, TV sets in metropolitan New York homes for the entire week of either the GOP or Democratic conclave.

NBC BREAK SPOTS

Standardized Plan Set

TEN-second shared identification breaks have been standardized on all eight of NBC's spot TV stations, Thomas B. McFadden, NBC director of national spot sales, announced Thursday.

The single minimum standard will permit the spot advertiser reasonable flexibility for the design of his commercial message and, simultaneously, greatly reduce agency production problems and effect substantial savings in production costs, he said, pointing out that NBC is the first in the industry to adopt the standards [CLOSED CIRCUIT, May 12]. The cost savings should induce present spot advertisers to increase their buying and help persuade new advertisers to enter TV on a multiple-market basis, he explained.

The NBC standards conform with those recently recommended by the National Assn. of Radio and Television Station Representatives, Mr. McFadden pointed out.

Basis of the system is that the upper right hand quarter of the TV screen is reserved for the station's identification, with advertising copy to occupy the remaining three quarters.

Thus, agencies can use one film or piece of art for an advertisement scheduled to be used on a number of outlets. Instead of redesigning the film for each station individually, the agency will have only to strip in the proper logotype in the top right-hand corners—the station identification—of the different prints.

Timing breakdown for the ten-second spot's audio allows for 1½ seconds of silent picture for the opening, six seconds for the advertiser's commercial, 2 seconds of silent picture for station identification, ½ second of silent picture for closing and five seconds of protective padding for the freeze frame.

NCAA Controls—'52 Plan

(Continued from page 59)

iate and propose his own coverage chedule, both of which are to be ubmitted, in competition with thers for NCAA selection of the inning bidder. Only after his election will the sponsor be free o bid individually with the various olleges for TV rights.

The plan explains that "the ponsor must provide national cov- rage"—defined as 63 markets— on each of the 12 dates, and must make any one or more of the games involved available without charge to any other networks and independent stations which may wish to carry such games on a sustaining basis simultaneously with the network presenting the series."

Mr. Hall explained that any station seeking simultaneous, sustaining coverage would, in all probability, also have to take the original sponsor's commercial, unless it could figure out a way to predict the often quick insertion of an announcement between plays. And if commercials could be deleted, it seemed unlikely any advertiser would pay for coverage to be shared with other networks or stations. Thus, it seemed that, regardless of NCAA intentions, only one network would carry the games.

Another puzzler was the request that, on as many dates as practicable, small college games—as defined by the National Collegiate Athletic Bureau—be included on a local basis, "either in supplement of the series or in substitution for a series game."

Networks wondered last week why an advertiser would add small college play—and higher costs—to his schedule, how often a small college game would be of national interest, and how the importance of each game could be determined before the season's start. The NCAA answer is that advertisers will create much ill will if they impose an outside game on a local audience interested in the home team, that costs can be cut by sharing coverage with a local advertiser.

High Standards Desired

The sponsor, it was noted, must be an "organization of high standards," a factor that will weigh almost as importantly, Mr. Hall said, as the coverage and money factors. Asked if the plan doesn't expect too much from the sponsor he said that similar arrangements in last year's plan had worked out all right.

Other notable portions of the plan are that each team can make only one TV appearance per season, in contrast to last year's two—one at home and one away—and all TV receipts will be assessed "to meet requirements" of the NCAA television budget. Eighteen cents of every TV dollar was withheld last season, but Mr. Hall thought the amount would be less this year since no TV survey, comparable to last year's $50,000 study, is being conducted.

"Any previous rewards for athletic success pale in comparison to the rewards of television," the committee stated in its letter explaining TV control to faculties and officers of member colleges.

Noting the ten-man group was "convinced" of this only after careful study, the letter said TV rewards "constantly multiply as more sets are installed, more television stations are put into use and the networks expand to all corners of the nation. If television offers irresistible premiums for sports glory today, the TV committee wishes to point up and underline the more serious problem which will be posed when 'pay-as-you-see' television arrives—a period estimated by experts to be not more than three years away. The rights for a few network games, now measured in thousands of dollars, will be measured in millions of dollars when an effective 'pay-as-you-see' system is placed in operation."

The NCAA feels it has protected itself from possible restraint of trade charges, not only by requiring that TV coverage be shared, but also by dropping last year's blackout requirement. And no college would be forced to participate in television, it was pointed out. Further protection was injected with a statement that the committee can, if special considerations arise, make exceptions to all its rules.

The TV committee's recommendations are subject to two-thirds approval by referendum of member colleges, scheduled to have been completed Sunday. Members voted 163-8 in favor of television control at their annual convention in Cincinnati last January.

Free Plugs Prove Fool's Gold

(Continued from page 23)

alent advertising would cost on a regular basis. The mechanics of placement depend to a great extent upon the publicist's contacts among stars, writers and producers of the programs, but techniques, charges and compensation vary.

The cost to the advertiser includes all charges attendant to getting the plug on the air, plus the fee to the publicist making the placement. The publicist may work on a retainer basis or he may charge on a per-plug or quantity-plus basis. Some firms charge more for placing a plug on a nighttime show than on a daytime show; others make no distinction. The cost for a plug on a network show, of course, generally runs higher than on an individual station or small group of stations.

It is a popular conception that the writer, producer, performer or whoever works a plug into a show subsequently finds on his doorstep, by way of compensation, a case of whiskey. This is by no means entirely accurate, but the belief is not without some foundation.

"Giving whiskey probably started when somebody received payment in the form of his 125th watch," one publicist reported.

The watch-and-whiskey compensation category has been expanded to include a number of mementos, including money. The "standard" payment, where it is cash, is said to average around $60 to $90 per plug. The reward also may take the form of an equivalent credit at a department store, for instance, a supply of the plugged products or some other appropriate gift. Or there may be no payment at all, except insofar as the idea surrounding the plug is a contribution to the program.

There are divergent accounts of the willingness of talent to participate in the plug game.

On one hand there are reports of "The List," which is described as a compendium of names whose use on the air will bring compensation to the user. According to this version, "The List" is circulated among writers, producers and performers —or they may easily learn the names that are on it by investing in a telephone call to the public relations agency which keeps it.

'Sneak Plugs' Get In

At the other extreme, a radio-TV publicist reported he had never known a writer, producer or star who would accept a plug merely for compensation offered. But he conceded that neither had he ever heard of compensation having been returned. He contended that program personnel in a position to insert plugs are too well paid to be interested in plug money and, that from a selfish standpoint, they would not jeopardize the success of a show by using plugs which would detract from it. Yet he agreed that what he called "sneak plugs" are often ad libbed in "from left field," to program detriment.

Some comedians — who as a group are the most frequent culprits in this respect, since gags lend themselves more easily to quick plugs—have been known to rattle off a succession of plug names before they could be squelched.

By no means are all plugs planted. And the unplanted plug generally pays off for the plugger in gifts from the plugged product as well, or almost as well, as does the planted publicity.

For instance, one radio-TV public relations practitioner reported that a gag on one leading comedy show employing, without solicitation, the name of a nationally advertised electric razor resulted in the delivery to the comedian of a gross —144, no less—of electric razors of that brand.

In the area of planted plugs, an instance involving the Hess Bros. department store in Allentown, Pa., was cited as an example of publicity which not only has no cash or equivalent payoff for program talent but also is a contribution to programming.

On behalf of the Hess Bros. store, a "stunt" was worked out and submitted to the Philip Morris-sponsored *Truth or Consequences* program. It occurred shortly before Easter.

Stunt Described

The stunt involved dressing a *T or C* contestant in an Easter bunny outfit and having him hitchhike from Hollywood, where the show originated, to Allentown, Pa., where he would be feted by Hess Bros. and local notables. Each week the program carried a pickup bringing listeners up to date on the contestant's cross-country progress up to and including his arrival in Allentown. Thus Hess Bros. got mentions on a network show for five consecutive weeks, and—it was emphasized—the program benefited from the stunt idea.

Similarly, many other examples were offered as representative of "legitimate and constructive" plugging—interviews with people engaged in interesting or unusual occupations, discussions of books or plays, and the like. The recitation of prizes offered on giveaway shows, and the giving of credits to firms supplying dresses or hats or costumes for performers on TV shows, were cited as other types of "plugs" which arouse no general objections.

Sometimes, it was noted, publicists provide TV shows with needed props or sets — thereby cutting down the sponsor's own production costs, often substantially, while in the process maneuvering a plug client's product or name before the steady gaze of the audience. There are occasions, too, it was said, when the publicists provide program ideas involving no plugs at all, thus at one swoop building contacts, confidence and greater receptivity to future plug ideas.

But in any defense of "legitimate" plugs the "as-bad-as" example that is as effectively cited as any, perhaps, is some of the TV coverage of this year's Easter parade in New York, where it was a rare clothes designer who failed to get a prominent plug of the free variety. This, too, has been an object of criticism by NBC's SPAC.

"Plugs" in gags are a natural development. They started with the use of certain brand names in bits or sketches, not for any remuneration from the manufacturer but for the comedy value of the name itself in a situation. Pens that "write under water" are an example. Gradually the publicity or advertising value of such name-dropping became apparent, and so, gradually it became a business.

Before the radio-TV plug, there was the plug in motion pictures, which similarily went through a period of evolution. For example: A movie star was shown, perhaps only fleetingly, with a package of X Brand cigarettes. The makers of X Brand and the makers of the movie realized that that shot was worth something to the manufacturer.

Deal Now Refined

At first it was the custom for the manufacturer to pay the studio to use his product, or, in the case of expensive items such as trains or automobiles or elephants, to supply the product gratis.

This type of deal gradually has been refined until now, instead of making outright payments, the manufacturer in some cases agrees that in a certain amount of his own advertising he also will advertise the film involved. An X Brand cigarette ad might say, for example: "Joe Doe, star of Z Show, smokes X Brand cigarettes. Thus the studio's own advertising budget can be reduced.

Publicists concentrating on radio and television plugs say the number of regular sponsors who forbid other-product plugs on their programs is not so great as one might expect. Indiscriminate plugs are frowned on, and some advertisers have set a ceiling of one or two per program.

More and more major manufacturers, publicists say, are coming to feel that they should augment their regular advertising and their newspaper-magazine publicity with publicity—plugs—in the broadcast media. On occasion, advertisers have been known to undertake plug placement themselves, direct. One radio-TV writer reported he had been called by an advertiser and offered a $1,000 watch as bait to work the name of the advertiser's product into a television show which he was then preparing.

The networks are most acutely irked, of course, by the "sneak" plug, the dragged-in plug, whose lack of point makes it obvious and

itating. But what are they doing eliminate it?

n answer to that question, Harry merle, CBS-TV program direc-, told BROADCASTING • TELECAST- that "We police it in every y possible through viewing the ipt before airing. In most cases the ad lib that gets across and the air."

Although he considers such mer-andising sometimes helpful "if sely tied together," Guy Della oppa, CBS Radio vice-president charge of network programs, ollywood, declared that in gen-al the network "does not endorse ich broad programming prac-es."

"When a national manufacturer les free plugs it is bad for ad-rtising," he said. "However, ery case should be individually nsidered and all within the realm good taste. It depends upon w far they go. All free plugs e watched very carefully by BS.

"We are particularly against the pe of insert plug used by well aid writers to derive added in-me or merchandise. We make very effort to eliminate them."

Carl Watson, assistant manager the continuity acceptance de-rtment of NBC radio and tele-sion, reported that "by this time e have come to know the regular erformers who are likely to drift way from a given 'business' in ne script, and these are watched arefully."

Additionally, he said, "scripts re screened beforehand and re-earsals usually are covered to be ure that plugs are not placed in ne show. Most performers know hat is and what is not acceptable y now."

Another network executive sug-ested the only real method of olicing against out-of-taste plugs ould be to restrict all trade-name ags to products which are also ponsors of regular radio and tele-ision shows.

It also was brought out that ne networks rely to a great extent pon producers and directors to eep an eye out for unseemly lugs. At least one producer, it as learned, has warned perform-rs on his shows that any member ho works an unapproved unre-earsed plug into a broadcast will ave his pay cut back to union cale.

Venezuela TV Station

PLANS for Venezuela's first TV tation, scheduled to begin trans-nission this November, were ivulged May 29 with announce-ent of a contract between Vene-uelan Minister of Communications nd an RCA international distribu-or, Dr. Luis F. Jiminez M., presi-ent of Intelec S. A. New station s to be built in Caracas, with an RCA 10 kw transmitter capable of roviding adequate intracity cover-ge. To be operated by the govern-nent, the outlet will not carry com-nercial programs.

Tele-Q Patent

PATENT for its system of cueing TV performers has been issued the Tele-Q Corp., New York, Tele-Q Sales Co. President Larry Merchant announced Wednesday. Tele-Q equipment was first used commercially in November 1950 and is now widely used in New York.

EDUCATORS' BOON

Okla. and Fla. U. Praise Industry

TWO leading universities staging highly successful TV educational programs in cooperation with commercial television stations have voiced publicly their appreciation of the industry's participation in their work. They are U. of Oklahoma and U. of Florida.

Sherman P. Lawton, producer of *The Open Window*, which has been seen on WKY-TV Oklahoma City and KOTV (TV) Tulsa, stated as chairman of the U. of Oklahoma Committee on Broadcasting, that 92 TV programs had been produced under the title in two years.

"This represents a minimum time value of $29,900, as loss of revenue to the stations, plus cost of operation," he reported, amounting to a gift of well over $60,000 from the stations to the university.

Working with commercial stations, the university has enjoyed a low cost of .008 of one cent per viewer-impression, Chairman Lawton reported. Cost to the university was $2,200 for the period, exclusive of salaries and student assistant wages.

"The success of the programs is indicated by a Hooper rating in Oklahoma City of 28, as contrasted with 1.6 for educational programs in the New York City area," Prof. Lawton continued. "Mail response in both Oklahoma City and Tulsa has been excellent. Total audience impressions during the series exceeded 26,200,000.

"Twenty-five different areas of instruction were represented during the 1950-51 season and 28 during 1951-52. Fifty-nine different faculty members participated during 1950-51, with a total of 61 faculty participations. In 1951-52, 55 different faculty members participated, with a total of 71 faculty participations.

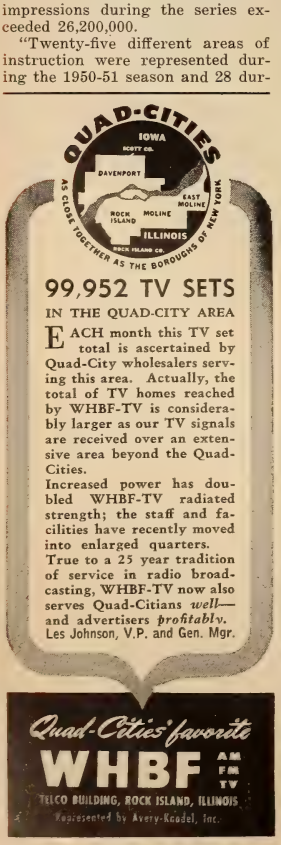
"One hundred seventy-three students took part in the shows during 1950-51 and 147 during 1951-52. Thirty-one different students got experience in planning, script and production directly associated with the series, a total of 70 student-producer experiences during 1950-51. During 1951-52, 33 different students got planning experience with a total of 77 student-producer experiences. Non-faculty and non-student guests on the programs in 1950-51 totaled 71, while 105 such guests appeared during 1951-52. Five civic and welfare groups, as well as state and federal agencies, contributed work during the 1950-51 season and six during 1951-52.

"In addition, arrangements were made through this office for several faculty participations in television programs other than *The Open Window* and we served as a clearing house for a number of students to earn talent fees on commercial shows.

"One of the values of the series to the university is that a number of properties built for the programs have become a part of classroom instruction techniques on the campus."

Breakdown of Audience

The signals of the two commercial TV stations are reaching viewers over an extensive area, reaching as far north as Wichita, Kan., according to the report. Half the audience is in the "upper middle" income group, and about 20% in the "upper" income group. The mail has a "higher class" flavor than usual for typical radio programs, it was stated, "but we have had enough mail from apparently lower income people that we had been deceived into thinking that we were drawing a large number of them."



According to Dr. T. C. Battin, assistant professor of speech and director of television and radio at the U. of Florida, the university at Gainesville has completed its first venture in TV education with conclusion of 32 weeks of telecasting.

"We wish to commend the managers and staff of WMBR-TV Jacksonville for their excellent cooperation in helping to make the series a success," Dr. Battin said.

Programs were titled *Knowledge in Action*. Rating of 40.5 was achieved, indicating a large audience every Monday evening, he continued. Programs are prepared as a package show on the campus by members of the production staff headed by Dr. Battin and faculty members. Each program has been planned. written and rehearsed on the campus before going to WMBR-TV for final rehearsal. A student production crew is trained for six months in the studios to handle duties of a TV crew. Students act as assistant directors, floor managers, announcers and perform related functions.

Dr. Battin said the time is donated by WMBR-TV and a full crew stands by during the rehearsals and the final telecast to help the student production staff.

"The series is to be continued as a part of the U. of Florida's desire and effort to recognize the tremendous potentialities of the most effective means of mass communication yet developed," Dr. Battin said. "Plans for a continuing program of adult education by means of television have already been completed and the series, *Knowledge in Action*, will present video courses each week. The series has a dual purpose in mind: to offer adult education and to give training and practical experience in the various phases of television production. These programs have been carefully planned to offer education in an interesting as well as entertaining manner and survey results have shown how successfully this has been done this year."

D. C. Talent Raid?

PICK TEMPLE, cowboy singing star of WTOP-TV Washington, baby sat last Monday for the three children of Walter Compton, general manager of WTTG (TV) Washington. Mr. Temple's baby-sitting was a door prize at the annual jamboree of the Advertising Club of Washington May 24. The prize was actually won by Alex Sheftell, WTTG account executive, but Mr. Sheftell isn't planning to be married until some time this month. So he turned over his prize to Mr. Compton who, with Mrs. Compton, attended the Washington opening of the play, "Gentlemen Prefer Blondes."

TV APPLICANTS

Four Buy UHF Transmitters

ALLEN B. DuMONT Labs. Television Transmitter Div. last week announced sale of four 5-kw UHF TV transmitters to WSOY and WDZ Decatur, Ill.; WHIZ Zanesville, Ohio; and KCOK Tulare, Calif. Deliveries are slated for 1953. The four outlets have applied to FCC for TV stations and await channel grants.

The new transmitter equipment employs the Eimac Klystron power tube and is now available at the same price as the standard DuMont VHF transmitter with equivalent power, company spokesmen said.

DuMONT TV network will carry *New York Times Youth Forum* starting Sept. 14 with sessions to be taped for broadcast on WQXR New York, station owned by the *Times*.

WEWS-WRU SERIES

Will Extend for 2 Y

JAMES C. HANRAHAN, gener manager, WEWS (TV) Clevelan and Dr. John S. Millis, presider Western Reserve U., last week a nounced a two-year extension two educational series.

One program is a half-hour tel course, home study by TV f credit, and the other is a Sunda series known as *University Circ* a half-hour program about t school and community cultural lif "Western Reserve U. is grate for the opportunity which WEW has given to carry on its progra of education by television," D Millis said.

Editors Name 'Lucy'

LUCILLE BALL was voted th best comedienne and *I Love Luc* the best comedy drama in the fir annual *American Weekly* Tel vision Poll, conducted among T editors of 23 metropolitan new papers.

Other winners: Best variety progra *Your Show of Shows*; dramatic pr gram, *Celanese Theatre*; myste drama, *Dragnet*; musical progra *Fred Waring*; discussion program, *Me the Press*; quiz show, *You Bet Yo Life*; best comedian, Jimmy Durant children's program, *Kukla, Fran Ollie*; news, *See It Now*; and an awa for special achievement, Bishop Fult J. Sheen.

GUIDANCE SERIES

Planned By WMCT Memph

WMCT (TV) Memphis is plannin a series of weekly vocationa guidance programs to aid hig school and college students choosing careers, Wilson Moun executive program manager, ha announced.

In addition to aiding student Mr. Mount said that "the program will be so designed that they wi prove of much interest to the tel vision public, as the opportunitie for young people that lie in th various fields of business and th professions are pictured and ex plained."

Among fields to be covered a the cotton industry, medical profes sion, industrial economics, banking lumber manufacturer, journalism and the livestock industry.

CONVENTIONS

AT&T Plans Full Linkage

ALL U. S. TV stations except KOB-TV Albuquerque may be connected with AT&T's live TV network in time for the political conventions next month, under plans advanced by the telephone company last week.

The company's Long Lines Dept. announced plans to add Phoenix to the live network, saying "efforts are being made to provide the network connection in time to carry the national political conventions in July" and pointing out that when Phoenix is included, the Bell System network "will make live network programs available to 107 stations in 65 cities.

Only other U. S. television city outside the live network then would be Albuquerque.

Plans for bringing Phoenix (KPHO-TV) into the live network call for routing television signals from Los Angeles over a coaxial cable which already is in service for telephone use. Equipment will be added to permit use of the cable for television as well as telephone service.

The Republican national convention opens July 7; the Democratic convention July 21. Both will be in Chicago.

AT&T's Long Lines Dept. meanwhile applied to FCC last week for authority to construct a microwave relay link which will provide two TV channels, along with hundreds of telephone circuits, between Dallas and San Antonio. The proposed link, scheduled for completion late this year, would be built between Dallas and Austin, where it will connect with the Austin-San Antonio system which was opened for service in February.

Under the plan, AT&T will construct six intermediate radio relay stations along the 192-mile route between Dallas and Austin.

To provide one TV channel to San Antonio in time for the July political conventions, Long Lines is installing temporary radio-relay equipment between Dallas and Austin. This equipment will be removed upon completion of the new project, AT&T said.

It was pointed out that one connection with AT&T's nation-wide television network facilities will be made at Dallas from Jackson, Miss., while a second connection will be provided upon completion of a radio relay system, now under construction, between Kansas City and Dallas. Dallas and San Antonio—both two-station markets—will then have two TV channels available.

New WCBS-TV Business

WCBS-TV New York booked more than $1 million worth of new local business in the seven-week period ending May 23, George R. Dunham, general sales manager, has announced. He said the accomplishment was pace-setting if not record-breaking for local contracts.

WAVE-TV CASTS 'Back-to-Back' Remotes

DOUBLE remote "back-to-back" telecasts were made by WAVE-TV Louisville on Armed Forces Day May 17 when Vice President Alben W. Barkley and Army Secretary Frank Pace both delivered addresses at separate places there.

Borrowing equipment from WIRE Indianapolis which had not yet begun telecasting, WAVE-TV set up one mobile unit in the Brown Hotel for the Pace speech at the 26th annual National Defense dinner which climaxed Armed Forces Day observances, and the second unit in the Seelbach Hotel where Vice President Barkley addressed the Jefferson-Jackson Day dinner.

The station scheduled the Pace telecast from 9-9:30 p.m. and the Barkley speech from 9:30-10:30 p.m. The Barkley program was micro-relayed by Southern Bell Telephone Co. engineers to the Telephone Building from where the signal then was carried to WAVE-TV on the regular co-ax.

At WAVE-TV controls during the Barkley address are (seated, l to r) Louis Lau, audio engineer, Bob Roth, video engineer, Bob Brewer, director and (standing) Ryan Halloran, announcer.

SPARTON Radio-Television, Jackson, Mich., is offering free UHF tuner strips for 1952 Sparton Cosmic Eye TV sets.

TELENEWS GROWTH

McManus Heads New Dept.

IN LINE with its new expansion policy, Telenews Productions Inc., New York, television newsreel producer, last week announced formation of a station relations department under the direction of Tom McManus.

First step will be a tour of client stations by Mr. McManus, during which he will meet with station executives to discuss operating procedure.

In his announcement of the new station relations division, Charles N. Burris, Telenews general manager, stated: "Telenews is going right ahead in its plans for expansion. . . ."

JULIUS MATTFELD, head of CBS Radio-TV music library, has compiled chronology of all music published in U. S. to be published June 12, Prentice Hall. Title is *Variety Music Cavalcade.*

It's RESULTS *that* COUNT!

In May, an agency account man wrote WGN-TV:

". . . . . We are grateful to you for your original suggestion that we use this show. All records to date are most encouraging. We have made pilot checks in stores that report very satisfactory retail level response. The reports from salesmen on contacts with accounts have been most enthusiastic."

CHANNEL 9 · CHICAGO

The Chicago Tribune Television Station

film report

Four New Companies . . .

FORMATION of **Guild Films Inc.**, Hollywood, TV film production-distribution firm, was announced last week by **Reuben Kaufman** and **W. Lee Wilder.**

Mr. Kaufman resigned last month from his position as president of Snader Telescription Sales Inc., reportedly in a dispute over operational policy.

Mr. Wilder, independent motion picture producer-director, will serve as president of the new firm; Mr. Kaufman as vice president-secretary and distribution chief. Headquarters for Guild Films Inc. are in studios of KTTV (TV) Los Angeles.

Production is underway on a 13 quarter-hour situation comedy TV film series, *Hello Darling*. Future plans include *Gallagher's Travels*, quarter-hour comedy series; *Adventures in Storyland*, fairy tale program, and *Musical Americans*. Mr. Kaufman was in New York last week to open sales offices and to conclude negotiations on feature films for TV distribution.

At the time of Mr. Kaufman's resignation, Louis Snader, president, Snader Telescription Corp., parent organization of STS, announced that E. Jonny Graff, would replace Mr. Kaufman as head of sales for STS [B•T, May 19, 12].

* * *

Emanuel H. Demby and **Myron L. Broun** last Tuesday announced formation of **Demby, Broun & Co.**, New York, motion picture and television film production firm, located at 34 East 51st St., telephone Plaza 9-2495.

With Mr. Demby as president and Mr. Broun as vice president, the new firm will take over all TV and film properties formerly held by The Demby Co., New York public relations firm, which continues in latter capacity.

Among properties acquired by the new firm is *What's Playing*, TV package formerly seen on WJZ-TV New York and now in process of being re-packaged and offered for sponsorship under direction of Mr. Demby. Currently in production is a 15-minute cowboy film series featuring ABC-TV western star Jim Atkins.

* * *

Newly incorporated for $200,000 is **Wilshire Television Productions**, headquartered at 1915 Wilshire Blvd., Los Angeles. Plans encompass TV film medium from one-minute commercials to hour-long programs in addition to production of live shows. Hollywood attorney **Nathan O. Freedman** is chairman of board with **David X. Miller**, musical director at Universal-International, named executive producer.

The 9,000 sq. ft. two-story building taken over by the firm will be known as Wilshire TV Center.

* * *

Jack Goodwin announces that he is going into regular film production in Africa. Among the first series are 52 15-minute self-contained stories of the reminiscences of "Old Fletcher," a retired big-game hunter. The subjects will deal with hunting, bushmen, native ritual etc., Mr. Goodwin said. His first two sample productions will be completed in September. He will fly to the U. S. to arrange syndication and sponsors. Mr. Goodwin said he also will be making a series of three- and five-minute shorts entitled *African Visit*. Mr. Goodwin's address is P. O. Box 4801, Johannesburg, South Africa.

Production . . .

Scripts written for television by playwright-author **William Saroyan** will be the basis of a projected 26 half-hour TV color film series to be produced by the newly-formed **William Saroyan Television Playhouse Inc.**, Hollywood. Acting as co-producer-director with Mr. Saroyan will be **Rodney Amateau**, completing directional assignment on "Monsoon," motion picture filmed in India. Mr. Saroyan will introduce each film. Cost of all 26 is estimated at $500,000.

* * *

Concentrating on "highlights and sidelights" rather than duplicating network coverage, **Telenews Productions Inc.**, New York, is completing plans for filming Republican and Democratic national conventions in July. Staff of more than 25 will handle coverage, **Ted Genock**, Telenews editor-in-chief, said, with Production Manager **Marshall Davidson** supervising makeup operations. Telenews last week also announced its daily television newsreel, formerly eight minutes in length has been increased to a minimum 12-minute length. The company's newsreel, *Telenews Daily*, produced in conjunction with INS, has been expanded, it was noted, to meet growing needs of TV stations.

* * *

After having acquired TV rights to *Kerry Drake*, a syndicated comic strip, production is getting underway on 26 half-hour films by **Hafner-Halperin Inc. Sterling Hayden** will portray the title role. **Marjorie Reynolds** is assigned the feminine lead.

* * *

Normandy Productions Inc., Hollywood, has two field units out shooting backgrounds for new TV film packages. One, headed by producer **John F. Ewing**, is covering Pacific Northwest for 13 films tentatively titled *Americana*. The other, an untitled hour-long group of 13, will be shot throughout U. S. **Arthur Fellows**, an associate producer for David O. Selznick, recently joined the firm as a producer-director.

* * *

United-World Films, subsidiary of Universal-International Pictures, began its initial television film series of 13 half-hours last week. Titled *Fighting Man*, the films co-star **Mort Thompson** and **Cliff Clark** with **George Clair** as director and **Malcolm Stuart Boylan** as the production supervisor. There are three more series in the pre-production stage.

Sales . . .

United Television Programs, New York and Chicago TV film distributors, has sold its *Movie Quick Quiz* package for two additional markets, bringing total sales to 26. Beginning June 20, **IGA Stores** will sponsor show on WNBK (TV) Cleveland; and **Oaklawn Appliance Co.**, Dallas, will underwrite program in that city on KRLD-TV, effective June 19. **Aaron Beckwith**, UTP sales director, meanwhile reported one additional contract has been signed for *Hollywood Off-Beat*, half-hour detective series starring Melvyn Douglas, on WFIL-TV Philadelphia.

* * *

Negotiations have been concluded by **Louis Snader** whereby films from Snader Telescriptions Library will be released to Jens Fr. Lawaetz, head of the government-owned TV station in Copenhagen, Denmark, for one year. This marks the first entry into the European market for **Snader Telescriptions Corp.**, Beverly Hills, Calif.

* * *

Dudley Television Corp., Beverly Hills, is to produce 13 quarter-hour TV films in color for **Martin Outboard Motors**, Eau Claire, Wis. Programs, built around types of fishing, will be ready for fall release.

* * *

Film People . . .

Syd Lewis and **Art Sanchez**, night club entertainers, have been signed by **Jerry Courneya Productions** Beverly Hills, to appear in *Lewis & Sanchez Play*, 13 quarter-hour television films, starting in August. The format will consist of music and impersonations held together by a story line.

* * *

John Ireland has been signed by **Pennant Television Productions Inc.** Hollywood, to play the leading role in upcoming "Silence in the City," half-hour film in *Date With Destiny* TV series. Production starts end of June with film stars **Stephen McNally, Maria Palmer** and **Zsa Zsa Gabor** already signed for other films in series.

* * *

Alan Hartman, formerly associated with MCA, Frederic W. Ziv Co. and Official Films as sales representative, last week was named eastern sales representative of **United Television Programs**, TV film distributors. He will have headquarters in UTP's New York offices as assistant to **Aaron Beckwith**, director of sales, and will handle the metropolitan New York, Philadelphia, Washington and Baltimore territories.

* * *

Les Kaufman, vice-president in charge West Coast operations Ettinger Co., Hollywood (public relations firm), to **William F. Broidy Productions**, that city, as director of newly expanded sales promotion-merchandising department.

OPERATING schedule at WENR-TV Chicago has been expanded from 71 to 81 hours weekly.

Memo to T-V Station Managers

A NEW GR T-V MONITOR

for the VHF and UHF bands

Channels 2 to 83

The new G-R Type 1183-T T-V Monitor meets all requirements of the FCC, including those recently established for offset operation. It not only provides complete monitoring facilities for VHF and UHF stations in accordance with FCC specifications, it assures the quality of everyday transmissions as well. Monitoring of distortion, noise, modulation level, and video and audio carrier frequencies, with the aid of this instrument, results in the rapid detection of substandard operation. The T-V Monitor provides:

★ Continuous visual indication of aural transmitter frequency-deviation in terms of a highly stable master crystal.

★ Continuous visual indication of frequency-deviation of visual transmitter in terms of same master crystal.

★ High fidelity audio output for distortion and noise-level measurements and for audio monitoring.

★ Continuous indication of percentage modulation and an over-modulation alarm.

This instrument — the *first* UHF Monitor — is another example of the pioneering in engineering, design and workmanship which has characterized G-R monitoring equipment since the beginning of broadcasting. Stability, accuracy, ease of maintenance and operation, dependability and long life are optimum. The G-R trademark *guarantees* trouble free operation with a minimum of maintenance. Simplifications in convenience to operating personnel are a Major Feature.

Prices: From $2435 to $2535 depending on Frequency Bands

★ *Excellent signal to noise ratio through channel 83.*

★ *Large illuminated meter scales for easy operation.*

★ *Overmodulation lamp flashes when modulation exceeds level set by a dial.*

★ *Pilot lamp indicates adequate R-F input level.*

★ *Terminals are provided for connecting remote center-frequency and modulation meters and overmodulation indicators.*

★ *Separate a-c inputs for heater and monitor circuits enable direct connection of crystal oven to station stand-by power circuit.*

★ *Panel switch allows simultaneous indication on modulation meter of both positive and negative peaks, as well as choice of either peak.*

★ *New cabinet simplifies installation and removal of monitor from rack for maintenance.*

★ *Chassis arranged for maximum heat dissipation and easy servicing.*

CODE ATTACKED

'Stultifying Censorship,' ACLU Tells FCC

TV CODE of NARTB is "stultifying and illegal censorship," the American Civil Liberties Union charged last week in a letter of protest to FCC. The civil rights organization requested a hearing to determine whether the industry code violates the Communications Act.

At the same time, ACLU attacked the congressional probe of radio and TV programming which got underway last week (see story this issue).

Writing FCC Chairman Paul A. Walker, ACLU noted that radio and TV programming which got have had final responsibility for program content and that the Communications Act precludes prior censorship.

ACLU charged the TV code "provides for an extreme form of censorship which, in effect, rules out material which would be offensive to many groups or parts thereof, in any community in the country, however reasonable or unreasonable the particular potential objectors might be."

"It seems to us that this abnegation of responsibility for licensee self-restraint and the substitution thereof of a code of industry-wide censorship," ACLU continued, "is improper and fraught with great dangers both to the free operation of radio and TV and the public at large."

Television under the code will be "a diluted force in our national life," the letter contended, explaining the code will "create conformity and reduce TV to dull mediocrity."

Signed by Thomas Carskadon, chairman of the ACLU radio committee, and Patrick Murphy Malin, ACLU executive director, the letter held that the TV code "is a combination in restraint of trade in ideas which may well constitute a violation of the anti-trust laws, in which case all stations abiding by the Code might be held to lack the requisite qualifications for the holding of licenses. For this reason, a public hearing is even more essential to clearly establish this point."

ACLU told FCC that the code "would completely prohibit the production of any adult, mature programs dealing with issues of a serious nature, except that in some cases treatment of such problems would be permitted *if* the solutions thereof conformed to certain requirements laid down by the Code." Examples cited of productions that could not be presented under the code included "Death of a Salesman," "Streetcar Named Desire" and "Cocktail Party."

The letter continued:

Each individual licensee has a responsibility to see that no obscene or other illegal material is sent out over the airwaves, on penalty not only of loss of the license but of criminal prosecution as well. The complete abandonment of that responsibility through adherence to a Code is one which this Commission should not permit. If allowed to continue, it would create conformity and reduce TV to dull mediocrity. One reason for the rise and strength of TV has been its ability to produce programs unhampered by censorship . . . This Commission, we believe should help that growth and defend the principle of free expression by removing the stultifying cancer of censorship embodied in the code.

Concerning Congress' probe of programming, Messrs. Malin and Carskadon termed the inquiry "a threat of censorship which would have repressive effects on the press and broadcasting and probably could not result in any new legislative problems which would be constitutional."

Morning Means Sales

Don't judge all morning television by the static, uninspired programming you see in some cities. Morning TV really means something to viewers in the three-city market of Cincinnati, Dayton and Columbus — because WLW-Television led in programming the morning hours with fresh, bright shows that attract big audiences.

People in WLW-Telecity watch WLW-Television morning programs—advertisers prove it every day with sales. When you plan your advertising campaign, consider the potential of this great morning market with an effective buying income of over $5½ billion. Your quickest, most effective way to reach this market is through the three-station network of WLW-T, WLW-D and WLW-C.

WLW Television

TV SERVICE OF THE NATION'S STATION

SKELTON SUED

Contract Breach Alleged

RED SKELTON faced a $3,500 damage suit last week from a writer who charges he breached an "implied contract" and wrongfully appropriated literary property.

Filed by Leonard T. Galezio in Los Angeles Superior Court, the suit also named NBC-TV and Procter & Gamble Co., the TV sponsor, as defendants. Mr. Galezio charges he sent the comedian a skit which was acknowledged and the material used on a Skelton TV show, but that he was not paid.

WLWD Aids Defendant

WLWD (TV) Dayton's program log helped to win a not guilty verdict for a defendant in an automobile accident case. Man had been arrested as suspect. He could not have been involved in the accident, he told police, because he had been watching WLWD. Police asked the station to submit program log to check the suspect's statements. The defendant's statements agreed with the log and, after a two-day trial, the defendant was acquitted.

SKELTON RETURN

Special Theatre Planned

WITH Red Skelton returning to NBC next fall for both radio and television under a year-by-year agreement, a deal has been worked out whereby the network will build a special theatre to accommodate his weekly video show at its new $25 million Television Center now under construction in Burbank, Calif.

With definite ideas as to what he wants, the comedian is reported to have had a hand personally in the theatre's design. It is to be ready for occupancy by September 28 when his TV show resumes under sponsorship of Procter & Gamble Co., Sunday, 7-7:30 p.m. (EST). Mr. Skelton's radio show, not yet sponsored, will start in October.

Freeman Keyes, president of Russel M. Seeds Co., program packager, in negotiating radio-TV deal with NBC, also acquired a 7:30-8 p.m. (EST) television time slot following the *Red Skelton Show*.

This time, it is understood, is to be utilized for a projected comedy show built around Eddie Mayehoff, who is under contract to Mr. Keyes for TV only. Although the show is currently without a sponsor, it is believed Procter & Gamble will be the advertiser.

DuMONT REPLY

Denies ACLU's Scott Charge

DuMONT Television Network last week denied the charge of talent "blacklisting" that had been put before FCC in a complaint by the American Civil Liberties Union [B•T, April 14]. Earlier, KOWL Santa Monica, Calif., answered a similar ACLU charge [B•T, June 2].

ACLU's petition, which also named WPIX (TV) New York, CBS, NBC and ABC as defendants, urged FCC not to renew the station licenses of those named until they take an oath against discrimination and agree to insert a no-blacklist clause in advertising contracts.

ACLU contended DuMont cancelled the program of pianist-singer Hazel Scott in September 1950 "probably because of allegedly pro-Communist affiliations, though she is in fact violently anti-Communist."

DuMont, in its reply, told FCC the charges made in the ACLU complaint "are both unfounded and lacking in responsibility."

DuMont pointed out that Miss Scott's contract expired, her sponsor had failed to renew and the network's sales department had been unable to sell the program. Further, the reply noted, Miss Scott has appeared since on other DuMont program.

The DuMont reply stated:

The basic contract between DuMont and Miss Hazel Scott was extended in April 1950 for a period of five weeks beyond its normal expiration date of August 18, 1950. The purpose of this extension was to afford DuMont sales personnel additional time in which to sell the Hazel Scott show. In this endeavor, the sales department was not successful, and accordingly, the show was dropped.

The program was in no manner "cancelled" as charged in the complaint; rather the contract expired by its own terms and was not revived. Inasmuch as the "Hazel Scott Show" had had a sponsor previously who was not sufficiently interested to renew his contract, and had no sponsor after August 18, 1950, it was in the class of "discarded merchandise" and less salable than had it been a previously unsponsored program.

With a relatively low popularity rating (next to the lowest of the four networks) the show became a liability, financially and program-wise to the DuMont Network. Both its relatively high cost ($400 to $600 per weekly quarter hour), and its low acceptance rating with television audiences urged its abandonment in the interests of DuMont and of the viewing public.

It's Fun . . .'

VICTOR C. DIEHM, president-general manager, WAZL Hazleton, Pa., was in attendance as a trustee at graduation ceremonies of Bloomsburg (Pa.) State Teachers College May 26. After ceremonies got underway, Mr. Diehm received a note from the college president, saying "You're going to be the main speaker today." The man scheduled to give the main address had not yet arrived. Without any preparation, Mr. Diehm spoke on "It's Fun To Live In America." The graduating class gave him quite an ovation. Other stations with which Mr. Diehm is affiliated are WHOL Allentown and WHLM Bloomsburg, both Pennsylvania, and WIDE Biddeford, Me.

KYTE ELECTED

Heads L. A. Ad Club

WILLIAM O. KYTE, advertising-sales promotion manager, General Electric Co., has been elected president of the Los Angeles Advertising Club, succeeding Russell Z. Eller, advertising manager, Sunkist Growers Inc., who continues as director.

First and second vice-presidents are Leland A. Phillips, manager, Grand Central Market, and Glenn E. Carter, assistant vice-president, Bank of America. George W. Purcell, advertising manager, Van de Kamps Bakers, is new treasurer and Helen Edwards, president, Helen Edwards & Staff, secretary.

New directors include Nelson Carter, vice-president, Foote, Cone & Belding; J. A. Crooks, advertising manager, Certified Grocers of Calif., and D. J. Gould, head of sales service-public relations, Western Lithograph Co.

Continuing on the board are Milton James, sales department, Federal Envelope Co.; Robert M. Sample, vice-president, Better Business Bureau, and Paul G. Beach, advertising agent, Union Pacific Railroad.

program promotion. He also was among the earliest to realize that a program will not build listenership without enthusiastic support of dealers and distributors.

At the outset, therefore, he visited the field, learning advertising and promotion problems of local dealers and distributors. Today, he still continues this practice.

Circumstances which led to Mr. DeBow's career with Cities Service began shortly before 1926 when he was a member of the production department of Lord & Thomas, first agency to handle the Cities Service radio account.

Shortly thereafter, he went to Cities Service as editor of a company house organ. He was soon given the additional duty of being in charge of the company's financial advertising. Thus today, at age 50, he is well grounded in the tools of his calling. Mr. DeBow has been manager of the Cities Service advertising and news department since 1943, except for a Navy hitch in 1945.

Born in New York City, May 15, 1907, he received his early schooling there and attended Columbia U. In 1931, he married the former Dorothea Camden.

They have two children, Jay, 20, who majors in radio and advertising at the Henry A. Grady School of Journalism, U. of Georgia, and Tom, who is 12.

Mr. DeBow likes to fish and hunt. In summer, he spends weekends in Maine, commuting from New York by plane. He is a member of the Assn. of National Advertisers, the Advertising Club of New York, Radio Executives Club, Downtown Athletic Club and the Plandome Golf Club.

Mead Announces Changes

ROBERT B. DAWKINS, assistant general counsel in charge of special legal assistants at the Federal Trade Commission, succeeds James W. Cassedy as assistant general counsel in charge of appeals, FTC Chairman James M. Mead announced last week. John V. Buffington succeeds Mr. Dawkins.

Mr. Cassedy resigned to join a law firm which brought the comment from Chairman Mead that "we might as well face the fact that government can no longer compete with private business in the matter of salaries."

WCAU Inc. Labor Vote

NATIONAL Labor Relations Board confirmed last week that in elections held April 18 at WCAU Inc., Philadelphia, among all film technicians, the AFL-Electrical Workers, Radio & Television Broadcast Technicians, Local 1241, received all of the eight votes cast. WCAU Inc. operates WCAU-AM-FM-TV.

From where I sit *by* Joe Marsh

Me— Advising a Banker!

The Missus and I were invited to a big dinner over at Balesville the other night. I sat next to a banker from the state capital.

"*Mighty nice country you've got down there, Mr. Marsh,*" *he says.* "*Don't be surprised if I come to live there myself. In a few years I plan to get away from everybody, buy a farm and just take it easy.*"

"Well," I told him, "we'd like to have you. But when someone plans to buy a farm and 'take it easy' he often winds up working harder than ever. It takes a lot of *work* to run a farm right no matter how many hands you can afford to hire.

"*And from where I sit,*" *I continued,* "*you won't 'get away' from people either. Neighbors are plenty important in a farming community—whether it's helping one another out or just friendly visiting over a sociable glass of beer.*" "*Hard work and neighbors dropping in all the time?*" *he asks, looking over his glasses. Then he smiles and says,* "*Sounds wonderful. You've just sold me on a farm.*"

AGENCY ELECTION
Lennen, Newell Top List

PHILIP W. LENNEN and H. W. Newell, who are planning a new agency to be known as Lennen & Newell [B•T, May 26], were elected chairman of the board and president, respectively, at the annual meeting of Lennen & Mitchell, New York, last week. The agency will continue to function as Lennen & Mitchell pending completion of the change to Lennen & Newell.

Meanwhile, it was announced that Walter O'Meara, for the past ten years director of creative departments and chairman of the review board of J. Walter Thompson Co., New York, will join Lennen & Newell as vice president, director and chairman of the plans board and executive director of all creative work.

Other officers elected at the L&M meeting:

Walter F. Swertfager, vice president; Michael J. Madar, secretary and vice president; Hans Sauer, vice president and executive art director; John D. Speirs, treasurer; Todd B. Franklin, vice president in charge of merchandising and research; Catherine V. Parker, vice president in charge of media; Frederick W. Reynolds Jr., Robert B. Owens Jr., Thomas P. Doughton, Daniel M. Daley Jr., Jackson Taylor and Stephen M. Kenyon, vice presidents; Peter V. Keveson, vice president and radio and television copy chief; Nicholas E. Keesley, vice president in charge of radio and television.

Board Chairman Lennen is a co-founder of Lennen & Mitchell. President Newell formerly was executive vice president of Gayer, Newell & Ganger, from which post he resigned as of last Monday. Ray Vir Den, former president of Lennen & Mitchell, resigned some time ago.

Sen. Russell Names

SEN. RICHARD B. RUSSELL (D-Ga.), candidate for the Democratic Presidential nomination, has appointed Thomas D. Blake, formerly assistant to the late Stephen T. Early, White House press-radio secretary, to his public relations staff. Oliver W. De Wolf continues to work with the press, radio and television for Sen. Russell, the candidate said. Booth Mooney, of Mooney & Cullinan, public relations consultants of Dallas, assists Mr. De Wolf.

TOLEDO STATION
Fourth AM Grant Proposed

INITIAL decision recommending the grant of the fourth AM station at Toledo was issued by FCC last week. The proposed grant, for 1 kw fulltime on 1470 kc, directional day and night, would go to Mid-western Broadcasting Co.

In the initial ruling, Hearing Examiner Fanney N. Litvin proposed to deny the competitive new station bids of Toledo Blade Co., Radio Corp. of Toledo and Rural Broadcasting Co. of Ohio, Oak Harbor, Ohio. The examiner also would deny the application of WTOD Toledo to change from 1 kw daytime on 1560 kc to 1 kw full-time, directional, on 1470 kc.

The examiner preferred Mid-western Broadcasting on the basis of greater integration of ownership and day-to-day management of the proposed outlet. Proposals of Toledo Blade Co., Radio Corp. of Toledo and Rural Broadcasting Co. were found to involve interference to CFOS Owen Sound, Ont.

The examiner ruled for denial of the Toledo Blade Co. application on the ground that it had not met all legal qualifications. Toledo Blade Co. owns P. G. Pub. Co., which in turn owns WWSW Inc., licensee of WWSW Pittsburgh. However, the officers concerned are neither officers nor directors of P. G. Pub. Co. or WWSW Inc., the ruling noted.

The examiner also found that the Rural Broadcasting Co. bid must be denied on the basis of FCC's requirement for 30 kc separation between stations where their respective 2 and 25 mv/m contours overlap. WLEC Sandusky, Ohio is assigned 1450 kc.

Principals in Midwestern Broadcasting include: Ford R. Weber, investment banker, president, and 5.7% owner; Arthur W. Weber (no relation to Ford R.), attorney and certified public accountant, executive vice president treasurer, 14.2%; Russell Gohring, former program director and production manager for Fort Industry Co. station (now Storer Broadcasting Co.), now credit manager of La Salle & Koch Co. department store, station director and director, 8.5%; Joseph H. Kroeger, branch manager, Toledo Tabulating Div., Remington Rand, vice president sales manager, 14.2%; Adaline Gressler, former public school teacher, educational director and director, 14.2%; Russell G. Perry, program director, 5.7%.

IN THE DENVER Ad Club competition, KLZ Denver won first awards in public service programming and local music program production, and special awards in news commentary, public service and children's programming. Public service first awards was for KLZ's *Sounding Board*, Friday evening vehicle for airing important controversial questions. Above (l to r) are Jack Tipton, KLZ account executive; Sheldon Peterson, KLZ news director, holding the Public Service Award; M. D. Marlow, advertising manager, McMurtry Manufacturing Co., holding Local Music Program Origination Award; John G. McMurtry, company president; Tom Axelson, Axelson Agency, and Hugh B. Terry, KLZ general manager.

D'ARCY EXPANDS

Plans Announced at Fete

CELEBRATING expansion of its New York operations, D'arcy Advertising Co. played luncheon host to 75 members of its New York staff at the Waldorf-Astoria last Monday.

J. F. Oberwinder, president of the agency, announced to the members the addition of four new accounts and 34 members of the former Federal Adv.

He also explained the appointment of a three-man administrative committee which will be responsible for all decisions on management policy affecting the New York operation. This committee is composed of Vice President John Young Brown, who will sit as chairman and Vice Presidents Kenneth W. Plumb and John B. Morse.

He further announced the appointment of an eight-man plans board which will serve as an agency team on all advertising campaigns and problems of clients served by the New York office. Headed by Vice President Gordon E. Hyde, the plans board will include Vice Presidents Brown, Plumb, Morse, Paul Louis, Jamie T. Irvien, Douglas Boyd and Frank S. Ott.

IARKETERS MEET

Madden, Dunville to Talk

ELEVISION and radio will be iscussed by NBC's Edward D. Madden and Crosley Broadcasting orp. President Robert E. Dunille, respectively, at a session of he American Marketing Assn.'s neeting in Cincinnati next week.

Mr. Madden, NBC vice presient in charge of TV network perations and sales, will talk on Television, a Revolution in Marketing," on Tuesday afternoon. At he same session, Mr. Dunville will iscuss "Radio Today and Tomorow." Among other speakers will e Richard D. Crisp, Tatham-Laird, n "A Case Study in Copy Research." The meeting is scheduled Monday through Wednesday at the Netherland Plaza Hotel.

ux Changes Format

OR the last five broadcasts of he current season, June 2-30, CBS adio's *Lux Theatre* becomes *Lux Hour of Romance and Mystery* with wo half-hour programs, *Romance* nd *Broadway Is My Beat*, filling he Monday 9-10 p.m. (EDT) time eriod. J. Walter Thompson Co., os Angeles, is the agency for ever Bros.

BELL, GEROT

Head Gen. Mills, Pillsbury

TWO major milling companies in Minneapolis have elected new presidents: Charles H. Bell of General Mills Inc., and Paul S. Gerot of Pillsbury Mills Inc.

Mr. Bell succeeds Leslie N. Perrin, 65, who has retired. Formerly executive vice president, Mr. Bell is the third generation of his family to be president of General Mills or a predecessor company.

Mr. Gerot moved up through various sales and advertising positions to become executive vice president last year. In his new post, he succeeds Philip W. Pillsbury, who becomes chairman. John S. Pillsbury, who had been chairman, is now honorary chairman.

Kefauver Vs. Taft

SENS. Estes Kefauver (D-Tenn.) and Robert A. Taft (R-Ohio) are scheduled to discuss their respective policies on Theodore Granik's *American Forum of the Air* June 15 (Sunday), 10:30-11 p.m. EDT over NBC's radio and TV networks.

NIELSEN DOUBT

Expressed on BMB Survey

CHECK with A. C. Nielsen Co. Audimeters at the time BMB audience measurement survey No. 2 was underway in the late 1940's "showed that the average radio family actually listened weekly (during the daytime) to 59% more radio stations than the BMB ballots reported," according to Mr. Nielsen.

His statement June 2 came with distribution of a brochure giving details of a new "Nielsen Coverage Service."

"Expressed another way, this means that the mail ballot system short-changed radio by 37% on this one point alone," he continued, asserting these findings are being reported because radio now is "being forced to fight for fair recognition."

He contends the new NCS project, now in progress with results promised in the early fall, goes "far beyond" the BMB mail survey and will provide the first nationwide measurement of TV coverage as well as radio coverage, show TV and radio ownership on a county basis, car radio ownership, out-of-home listening and viewing, and other data, classified according to family characteristics.

Asserting that NCS is viewed as "a continuing or repetitive" service, Mr. Nielsen said plans for No. 2 (in 1953 or 1954) are being made, and points out that the discount structure on subscriptions includes 10% off for subscribing now to the second study. NCS is offered on two bases: "Basic" and "comprehensive," the latter including "basic." Copies of the brochure describing NCS are being mailed to all radio and TV stations and leading advertisers and agencies.

JOHN T. FLYNN, WMGM New York news commentator, has completed revisions for sixth edition of his best-seller, *While You Slept*. New material is based on McCarran Committee hearings in U. S. Senate, and the Korean war.

SUMMER series of NBC radio *The Railroad Hour*, started June 2, featuring 18 new operettas written or adapted by Jerome Lawrence and Robert Lee.

IT'S A HABIT!

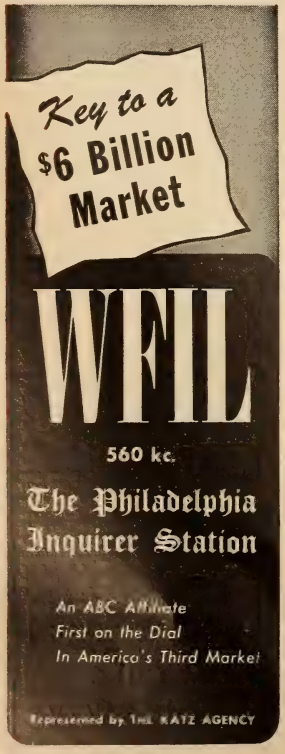
For 25 years, farmers in Kansas and nearby states have turned to WIBW for dependable service and preferred entertainment.

WIBW The Voice of Kansas in TOPEKA

programs promotion premiums

PAIR of tickets to a Cleveland Indians ball game are going to each of five or six telephone contestants each evening on *It's a Hit!* on WTAM Cleveland. New musical baseball quiz was created by Joe Bova, station program director. Contestants comprise a team. When the song is identified correctly team gets a man on first base. If a score is made before "three outs" each member of the team collects two tickets.

WOMEN'S CLUBS WORKSHOP



PLANS are being drawn up by Ruth Crane, WMAL-AM-TV Washington women's director, for a TV institute for women's club officers. Two TV workshops will be scheduled. Miss Crane will present a "model" club program with club leaders as studio guests. Discussion period will follow.

NEWSY STATION BREAKS

STATION break news flashes went into effect June 5 at KSTP-AM-TV Minneapolis-St. Paul. Twelve spot summaries per day use local and national items closing with a plug for the next scheduled newscast.

WOW-AM-TV FARM TOUR

WOW-AM-TV Omaha fifth annual Farm Study Tour to Mexico and Texas will take place September 14-30 under Mal Hansen, station farm director, when a minimum of 165 persons will visit citrus and cattle raising areas in Texas and agricultural regions of Mexico.

TV MECHANICS COURSE

AVERAGE householder started getting pointers on how and when to make repairs and insure proper maintenance when WTVJ (TV) Miami began a series of programs, *Home Mechanics*, last week. Telecasts are presented in cooperation with the evening division of the U. of Miami. Course, consisting of eight half hour programs, will also stress evaluation of household merchandise for good design, construction and material.

BROCHURE ON PROMOTION

PHOTOGRAPHS of grocery displays and stores where displays are featured highlight "marketeering" brochure sent to agencies and accounts by KXYZ Houston. Copy stresses that advertiser's product will get on-the-air promotion in any time classification in addition to promotion in 124 leading grocery stores if KXYZ facilities are used to sell merchandise.

PROGRAM'S MAIL RESPONSE

KING size promotion is the theme used in a mailing piece plugging Ed King and the KDKA Pittsburgh *Party Line* show. Illustrated with playing cards, copy points up the program's pull. On a show in mid-April, two one-minute announcements were made offering copies of a promotional newspaper. Station reports 5,800 responses were received.

INDIAN FILMS ON TV

SPECIAL arrangements with the Embassy of India, Washington, D. C., were made by WFIL-TV Philadelphia for a series of cultural and social films dealing with that country. Half hour movies covering all phases of Indian life, are being presented to inform the public on conditions existing in the Far East.

ELECTION COVERAGE

EIGHTY additional persons were employed by WGST Atlanta to help give extensive coverage to state primary elections last month. WGST reports that 10 minutes after polls closed the station aired the first flashes of precinct returns.

WLW's TALENT SEARCH

STAR search conducted recently by WLW Cincinnati drew 1,873 entries and originated from 174 theatres in WLW's four state listening area, according to station reports. Three finalists will be named for cash prizes and will receive three-month contracts with the station. Contracts will be open for renewal if the acts are successful.

"WILLY" AWARDS

AWARDS designed to foster and stimulate the study of broadcasting were presented to two Michigan State College students last week by WILS Lansing, Mich. At an awards luncheon, Lee Hanson and Clayton Roehl received "Willy" statuettes for work in announcing and radio production, respectively.

RECIPE BOOKLET

AS service to her TV audience, illustrated mimeographed booklets containing recipes for summer parties are being mailed by Mary Landis, WBAL-TV Baltimore's kitchen expert. Recipes included are those used by Miss Landis on her cooking program.

NEW STATION BREAKS

NEW approach to station breaks is being tried at WIP Philadelphia. Children of staff announcers identify themselves, tell about their dads and announce the station call letters.

PROFESSORS FEATURED

PROFESSORS from Bryant College, Providence, R. I. took to the airways last Saturday when a new series of broadcasts was inaugurated on WPRO that city. Titled *Bryant's View*, the program marks the college's entrance into the radio field with regularly scheduled programs. All lecturers on the weekly broadcast will be members of the faculty.

POLITICAL TELECAST

TELEVIEWERS in the Southwest were given five and a half hours of on-the-spot reporting of the Texas Democratic convention by KEYL (TV) San Antonio last week. Members of the station's news staff interviewed convention notables and covered the event from the city's Municipal auditorium.

WNAX FORUM

WNAX Yankton, S. D., awarded $250 to a Yankton high school pupil at the sixth annual "Spring Workshop," culminating program of the WNAX *High School Forum*. The winner was adjudged "most effective" of the finalists who spoke on, "Are We In Danger of Losing Our Freedom of Speech Through Government Action?"

AUDITIONS AT WBEN

EIGHTH annual auditions for Buffalo's "Voices of Tomorrow" competition are being conducted by WBEN-AM-TV that city. Final will be simulcast over the station at the end of June. Two outstanding vocalists will win an all-expense trip to compete for national honors at Chicagoland Music Festival in August.

KBIG INTRODUCTIONS

REALIZING impossibility of it four account executives being personally introduced to Southern California advertising agencies before station started operating KBIG Avalon sent picture and brief biography of each account executive to all agencies. An accompanying letter read, in part, "If you haven't seen this face haunting your reception room yet you will soon."

'GRASS ROOTS' SURVEY

WGAR Cleveland's News Editor Charles Day, in a "grass roots" political survey, is interviewing editors of rural and suburban newspapers on his program, *Our Opinion*. In addition to probing political thinking in regard to the Presidential race, Mr. Day asks his editor-guests about any cultural or industrial improvements in their areas of northern Ohio which might be of general interests WGAR listeners.

ACADEMIC SERIES

SERIES covering activities in schools of medicine, law, dentistry, music and science affiliated with the U. of Louisville has begun at WAVE-TV Louisville. *University-Today* brings to viewers such programs as the comic opera, *"Così Fan Tutte."* This program telecast last week was the city's first locally produced TV opera, station reports. WAVE also claims an enthusiastic response from laymen and critics alike.

WFOR LOCAL COVERAGE

WFOR Hattiesburg, Miss., took advantage of an opportunity to carry out its renewed policy of emphasizing local news and special events coverage when fire broke out in a half-block of building adjacent to the station. David Waite, WFOR newsman, was up on the roof of the studio in time to broadcast the arrival of the fire fighting equipment. One of the sparkplugs of the local-emphasis policy is Don Cunningham, new editor, who said that he was getting complete cooperation from the station.

"LOST AND FOUND" STATION

WDIA Memphis is attaining a reputation as the "lost and found children's station," reports Program Director Christine C. Spindel, citing the recent case of a lost four-year-old. Just after the mother had telephoned the description to WDIA, a second call came in from the finder, obviating the necessity for a broadcast.

ARAMOUNT LABS

Sold for $550,000

URCHASE of Paramount Labs., ollywood, for $550,000, by G. rleton Hunt and Hans De Schul- ess, partners of Unicorn The- es Inc., San Francisco, took place ay 26.

The property, to be taken over 30 days and renamed, will start erations within 60 days as a mplete commercial laboratory to ocess 35mm and 16mm film for and motion pictures. Paramount tures, represented by Robert nter, had closed its laboratory ril 19 because of its work on a or program.

USY YOUNGSTER

KLW's 20th Birthday Noted

KLW Windsor-Detroit celebrated 20th birthday anniversary June and officials reflected that the ation has been "a mighty busy ungster."

Detroit's Common Council passed official resolution congratulating KLW "for two decades of com- endable progress" in the field of dio. Acting Mayor Louis C. iriani presented the resolution

Joseph E. Campeau, CKLW esident, at a birthday party in e Detroit Athletic Club.

Mr. Campeau commented, 'wenty years ago today seems e only yesterday. But when we ok back over our 153,358 hours broadcast time—the 11,804 ad- rtisers we've served—the 48,620 urs of public service time we've nated, and our growth from 5 v to 50 kw, then and only then we realize we've been a mighty isy youngster."

CKLW officials extended per- nal congratulations to staffmen ho had been with the station the ll 20 years. These veterans in- ude William H. Gatfield, treas- er; William J. Carter, chief en- neer; Walter Collins, master con- ol engineer, and Gordon Fleming, ganist.

ADIO-TV performer Nelson Case is eparing a book, *History of the Brook- n Dodgers*, which will be published American Binder Co. upon comple- on.

book reviews . . . .

ANTENNAS: THEORY AND PRACTICE by Sergei A. Schelkunoff and Harald T. Friis. Published by John Wiley & Sons Inc., 440 Fourth Ave., New York 16, N. Y.; 639 pp.; $10.

ADVANCED ANTENNA THEORY by Sergei A. Schelkunoff. Published by John Wiley & Sons Inc., 440 Fourth Ave., New York 16, N. Y.; 216 pp.; $6.50.

BOTH books are part of the Wiley Applied Mathematics Series, of which I. S. Sokolnikoff is the editor.

The first, *Antennas: Theory and Practice*, offers a thorough treatment of the basic ideas and techniques necessary to understand antenna behavior and design. It is a comprehensive book dealing with antennas of various types in various frequency ranges.

Book treats antenna principles and the theory of radiation with practical applications; it stresses physical ideas and pictures as well as methods of quantitative analysis.

The second volume, *Advanced Antenna Theory*, presents the theory behind antenna behavior and broad band antenna design. It is devoted to recent, important work in advanced antenna theory and would serve as an excellent review of current trends in antenna research and development.

Dr. Schelkunoff, internationally known authority on antennas, has for more than 20 years been with Bell Telephone Labs, as a consultant. Dr. Friis is director of research in high frequency and electronics at Bell Labs and is the originator of 24 patents.

TWENTY BASIC POINTS FOR TV RECEIVER SERVICE by A. C. W. Saunders. Published by the Paul H. Wendel Pub. Co., Indianapolis, Ind.; 44 pp.; $1.

FIFTH notebook in the Television Technician's Lecture Service, this booklet presents the essentials for rapid TV servicing by circuit analysis.

Twenty basic circuit points are described in text and profuse diagrams: Design of video amplifiers for broadband response, control of stage gain, function of automatic gain control, tuned circuit response, gain and bandwidth comparisons, stagger tuning of 1-F stages, parallel effect of grid circuit on plate load, design requirements of video detectors, phase inversion properties of a conventional amplifier and others. Voltage waveforms and concise data on proper ion trap adjustment are also given.

Mr. Saunders is director of Saunders Radio and Electronic School, Boston, and president of the Radio-Television Technicians' Guild, and developed his circuit-analysis technique during lectures to TV servicemen throughout the United States.

RADIO ANTENNA ENGINEERING by Edmund A. Laport. Published by McGraw-Hill Book Co., 330 W. 42d St., New York 36, N. Y.; 563 pp.; $9.

ANTENNAS made of wires, masts and towers with frequencies up to 30 mc are grist for Mr. Laport, chief engineer, RCA International Div. The book includes some of the more advanced designs for both UHF and VHF and is illustrated with graphs, charts and photographs.

Callings on a backlog of 30 years of world-wide engineering experience, Mr. Laport treats radiation, circuital and mechanical engineering aspects separately for each type of antenna and includes consideration of operational requirements, bandwidth, propagation engineering and system engineering.

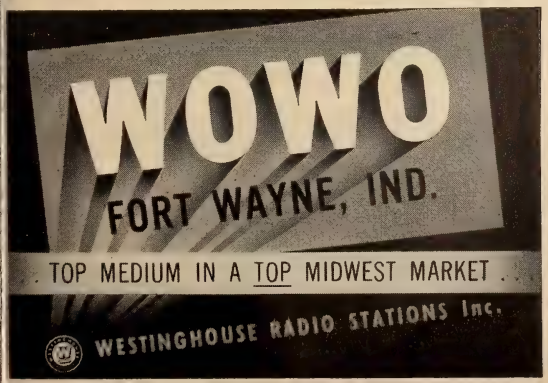
Miss Fox's Year

KATHERINE FOX, director of special broadcast services for WLW and WLWT (TV) Cincinnati, has won six awards in the past five months. Early this year, *McCall's* magazine recognized Miss Fox as an outstanding woman broadcast executive; the English-Speaking Union presented her with a citation during her visit to London for her contributions to international understanding; two publications in the entertainment field cited public service programs, inspired, produced and directed by Miss Fox; the Cincinnati Advertising Club selected her as the "Cincinnati Advertising Women of the Year," and the duPont Foundation gave the Crosley Broadcasting Corp. a commendation for its public service programming (Crosley says that the basis for the duPont commendation was a program series designed by Miss Fox).

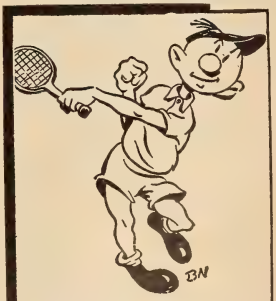
Miss Fox

NCAB AGENDA

Set for June 19-20



PROBLEMS in labor relations and operating costs will be described by Richard P. Doherty, NARTB employe-employer relations director, at the June 19-20 convention of the North Carolina Assn. of Broadcasters, at The Carolinian, Nags Head.



Mr. Doherty will be opening speaker after the call to order by President T. H. Patterson, WRRF Washington, N. C. Afternoon program for opening day calls for a Cape Hatteras cruise.

Ed Ruggles, director of the North Carolina State College Extension Service, will speak the second day on joint plans of NCAB and the college to set up technical training to ease the shortage of first class operators. John Smith, NARTB FM director, will speak on "Revived Interest in FM Broadcasting."

Plans for the July statewide radio promotion will be outlined by J. Frank Jarman, WDNC Durham, to be followed by an open discussion. An afternoon beach party will be held, with the U. S. Brewers Foundation as host. Transcription companies will provide prizes for a treasure hunt. Other events include an Armed Forces air show and a prevue of "The Lost Colony" pageant.

SUMMER long spot campaign to promote highway safety has been inaugurated at WCTC New Brunswick, N. J. Campaign was instituted for summer weekend broadcast.

Watch that "Follow-thru"

Even Bismarck knows that no matter how much power you put into your swing, it's the follow-thru that counts. If you're interested in the rich Midwest market, KFYR, with the nation's largest area coverage, is "must" on your media list—gives your advertising dollar a pre-war stretch in this wealthy, rural market.

KFYR

POLITICAL ISSUES

Miller Advises Broadcasters

BROADCASTERS have the right to editorialize during political campaigns and are entitled to take definite stands on issues and candidates, according to Judge Justin Miller, chairman of the NARTB board.

Writing in response to a query from Arthur L. Greene, manager of KLTI-AM-FM Longview, Tex., Judge Miller summarized the rights and privileges of broadcasters. Mr. Greene had inquired about the position his stations might take in a local wet-dry campaign.

"I hope you will go ahead and editorialize your own position frankly and forcibly," Judge Miller wrote Mr. Greene, "telling your audience that it is your right and privilege to do so, under the Constitution and law of the land. Then, I hope you will invite as many responsible citizens—as you can conveniently program — to speak on all phases of the problem for, against or in-between; telling your audience, in doing so, that you are inviting those people to speak —not in derogation of your own right to editorialize—but in order that the people may hear all sides of the question and decide intelligently how to vote; being fully confident the truth will prevail if all sides are presented.

"This, in my opinion, is the true editorial tradition, and the one best calculated to maintain the respect and confidence of your community, as well as to establish the prestige of broadcasting."

Going into the legal duty of a broadcaster under the law and under FCC rulings, Judge Miller explained that Sec. 315 of the Communications Act permits a station to refuse facilities to both sides and sidestep the issue, or permits it to sell or give time to one candidate to speak on one side in which case it must give equal opportunity in time, day or night, to his opponent.

If the second alternative is adopted, Judge Miller warned, the station must not censor the script of any candidate who broadcasts, involving possible risk.

The FCC has ruled, he reminded, that the word censor in Sec. 315 forbids the broadcaster to delete any part of, or in any way change, the script of the candidate, even though it may be libelous on its face. This FCC "dictum" sets up a dilemma, he noted, if the broadcaster should refuse to allow a candidate to broadcast libelous material or persuade him to recast it. Such a course would involve the danger of having FCC deny license renewal.

Possible Repercussions

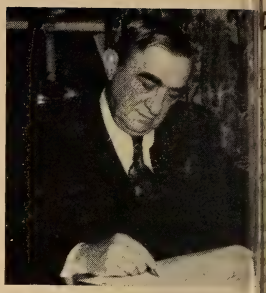
On the other hand, Judge Miller continued, if he allows the candidate to broadcast a libel he may suffer a judgment for damages under the law of his state. A number of states have laws freeing the broadcaster from liability in such cases unless he was himself a party to the libelous broadcast.

Another risk in Sec. 315 was pointed out by Judge Miller, who observed that "it would require a broadcaster who permitted a Democrat and a Republican to use his station, also to permit a Communist to use it, if the Communist were a qualified candidate. The Supreme Court has recently decided that a Communist is a criminal, because he advocates the overthrow of government by violence.

"Hence, if a member of the Communist party qualifies as a candidate and preaches the overthrow of government over a broadcasting station—assuming that the broadcaster knowingly permits him to do so and fails to strike out the criminal preachment—then the broadcaster might be charged as an accessory to the crime.

"The incongruity of Sec. 315, and the FCC's interpretation of it, thus become more and more apparent."

Judge Miller summed up the controversial issue doctrine in this way:



It is the duty of the broadcasting licensee, in the public interest, to see to it—in the programming of his station—that liberal attention is given to controversial issues affecting the public interest of his community. It is his duty, moreover, to see to it that both sides of such issues are fully and adequately presented; hence, that he must use due diligence to select proper subjects for such discussions and due diligence to find qualified speakers on each side. The FCC has enunciated this doctrine on many occasions and has clearly indicated that it will give serious consideration, in renewal hearings, to whether or not licensees have complied with the doctrine.

Judge Miller emphasized that the First Amendment of the Constitution — forbidding Congress to make any law abridging freedom of speech and press—and Sec. 326 of the Communications Act—forbidding FCC from interfering with freedom of speech and press—"clearly guarantee to broadcasters the privilege and the right to editorialize." He recalled that FCC in 1949 reversed its earlier ban against editorializing but still requires the broadcaster who editorializes to give the public a reasonably balanced presentation of all responsible viewpoints on the issue.

He urged the Longview broadcaster to tell the community, as a newspaper editor would do, "how you feel about the subject, massing your arguments as effectively as possible. Then I hope you will graciously invite responsible persons to present their responsible viewpoints, also. In this way you conform to the applicable laws, doctrines, rules and interpretations, but you will do so in a dignified way; consistent with the prestige of broadcasting and with your rights and duties under the Constitution."

Judge Miller said that a good case can be made by challenging the validity of Sec. 315 and the FCC's decision on constitutional grounds. He chided broadcasters for failure to fight for their rights under the First Amendment and Commerce Clause, referring to the way publications have met challenges to freedom of the press.

"If you can set a pattern of editorial courage and understanding which will show willingness to assume, voluntarily, the normal responsibility of an editor in his community," Judge Miller said: "if other broadcasters throughout the country will do the same; perhaps, after a time, we can put broadcas ing upon such a footing as to mal possible the same bold insisten upon the constitutional principl as that of the editors today. Unt that time the odds are against us in Congress, in the courts and b fore the FCC."

MISSOURI Governor Forrest Smi signs the State Senate bill providi broadcasters immunity from suit sulting from libelous statements ma by candidates making radio-TV a pearances. Gov. Smith, who plann to veto the bill, signed it after co ference with Missouri station spoke men [B•T, May 26].

'CARAVAN' TOUR

On Westinghouse Sales Plan

"CONVENTION CARAVAN," carnival introducing Westinghou radio-television fall merchandisi plans to dealers and distributor is to arrive in Chicago today (Mo day) for the first of seven countr wide meetings, J. F. Walsh, TV Radio division sales manager, a nounced last Tuesday.

While meetings feature a ca nival atmosphere, with Broadwa artists performing, the basic then is Westinghouse Electric Corp. sponsorship of CBS radio and tel vision coverage of the coming poli ical conventions and campaign From Chicago the caravan wi move to New York, Philadelphi Atlanta, Dallas, Los Angeles, a San Francisco.

LEADING the country in sixth annu aptitude tests sponsored by Americ Assn. of Adv. Agencies was Los A geles area with 91 candidates.

Yes...

KWK delivers to its sponsors the most welcome package of all . . . the St. Louis radio audience at KWK's LOW—low cost per 1000 radio homes delivered.

DEMO. FUNDS

Radio-TV Monies Asked

ALL for the rank and file of the emocratic Party to contribute to victory chest so the Democratic ational Committee can carry out a comprehensive plan for a naonwide radio-TV campaign" was ade last week in party publicaons.

The party faithful were asked to ontribute $5, $10, $25, $50, $100 r $500 to a radio-TV fund. Acording to Publicity Director Samel C. Brightman no goal has been et for the fund.

In a full page "ad" in June 2 ssue of *The Democrat*, Chairman rank E. McKinney declared that The battle is on. The Republican onfusion' campaign . . . is in high ear. We need money to fight it. eal money! We need a real radio nd television fund to tell America he truth—in the kind of language he people understand. . . ."

In a front page editorial in the ame issue of *The Democrat*, radio nd TV plans of the Democratic arty were referred to in these ords: "It takes money to broadast the word to every farm, town nd city in the nation. Radio and elevision — and the Democratic arty plans to use them in a more xciting, more dramatic way than ny political party ever dreamed of —cost money. Big money!"

EA ELECTED

o Head Jr. Adv. Club of L. A.

ON LEA of the White King Soap o. advertising department, has een elected president of Junior dv. Club of Los Angeles, newly ormed group resulting from a merer of L. A. Junior Adv. Women nd L. A. Junior Adv. Men.

First and second vice presidents are arolyn M. McClyman, executive secreary, MacAfee & Edwards, and assistant ublic relations director, Helen Edards & Staff, and Noel Lee, executive ecretary, *Chain Store Age*. Ed Wirsing, dvertising department, Union Bank & rust Co., is treasurer. Recording and orresponding secretaries are Elva rmstrong, partner, Independent Reigeration, and John Cochran, sales romotion, Art's Engraving Co. Board of directors includes Janice orgette, assistant media buyer, Moggerrivett Inc.; Bob Vogel, copy chief, urroughs Inc.; Don Martin, account xecutive, Keith Jones Representatives; nd Alan Gardner, public relations diector, Florence Gardner Pictures.

Humor in High Places

'HUMOR QUOTIENT' will be established for Presidential candidates Warren, Kefauver, Russell, Kerr, Humphrey, McMahon, Taft, Rayburn and Eisenhower in a test to be given by the Washington Chapter of the National Assn. of Gagwriters, Bill Treadwell, director of the Museum of American Comedy, has announced. The querying of candidates is part of a national survey being conducted by the museum to find if Americans are losing their sense of humor, he said.

NBC Availabilities

NBC will make five political convention radio programs available for local sale on a cooperative basis, spokesmen have reported. The programs: June 28, 7-7:30 p.m.; July 1 and July 3, 10:35-11 p.m.; July 16, 10-10:30 p.m., and July 17, 10:35-11 p.m. Talent charge per program in case of full sponsorship will be one-fifth of the station's one-time applicable half-hour rate; where participations are sold, the charge will be in the same ratio to the station's spot announcement rate. Programs may not be sold to advertisers competing with Philco Corp., which will sponsor NBC radio and TV coverage of conventions.

PHILLIES' GAMES

Fans Ask More Broadcasts

SO MANY basefall fans have requested greater radio-TV coverage of their games, the Philadelphia Phillies have composed a form letter, which reads in part:

The Phillies wish that all our games could be broadcast. Unfortunately, sponsors apparently do not feel that there is sufficient interest to warrant the extra expense of a separate station for each Philadelphia club. . . .

The Phillies would also like to televise a greater number of our games. At present time, however, there are only three television stations in Philadelphia, and because of network demands on their time, they find it inconvenient to schedule more baseball games. . . . If you have further suggestions on this matter, a letter to the television stations might be helpful.

CHURCH NAMED

CBS Radio News Director

WELLS CHURCH, acting director of news and public affairs of the CBS Radio Network since April, has been named director, CBS Radio President Adrian Murphy announced last week.

Mr. Church

Prior to being named acting director, Mr. Church served as editor-in-chief of CBS Radio News, and in his new post he will have charge of the news operations for CBS Radio coverage of the Presidential conventions in Chicago this July. A veteran newsman with varied experience in both radio and newspaper work, Mr. Church first joined CBS Radio in 1931 at Washington, D. C.

He became acting director of news and public affairs when Director Edmund Chester resigned to become general manager and part owner of RHC-Cadena Azul in Cuba [B•T, April 14].

DEWES ELECTED

Heads Ad Club in St. Louis

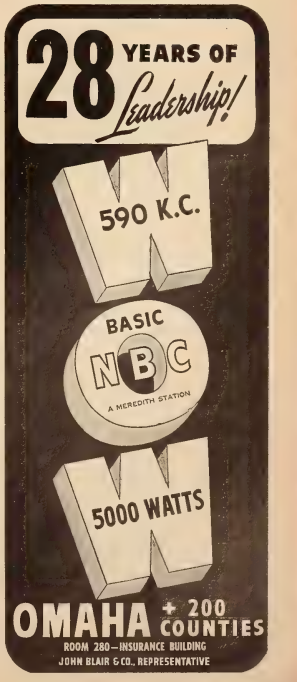
BONNIE DEWES, first place winner in the Erma Proetz Awards competition for her television work, was elected president of the Women's Advertising Club of St. Louis. Miss Dewes, of the market research department, D'Arcy Adv. Co., succeeds Helen Prange, who will serve as an honorary member of the board of directors.

Others elected at the meeting in the Forest Park Hotel June 2 are: Josephine Hickey, vice president; Mrs. L. Ila Baker, secretary, and Leonora Allen, treasurer. Nine new committee chairmen are: Mrs. Robert A. Willier, program; Mrs. Hazel Wagner, membership; Esther Lee Bride, educational; Jeanne Hynes, press; Mrs. Beulah Schacht Cochrum, publication; Grace Stockhus, business & civic; Mrs. Virginia Stobie, entertainment; Mrs. Marie Addison, attendance, and Mrs. Elmer C. McCaddon, personal relations.

Roper Series Begins

ELMO ROPER, public opinion analyst, began a series of telecasts called *Where the People Stand* on the NBC-TV network, 10 p.m. Wednesday. First half-hour program featured, besides Mr. Roper, a panel of three leading newspaper editors representing different political opinions from different sections of the country. The analyst, heard on the NBC radio network weekly at 3 p.m. EDT Sunday, will present a second political analysis on television June 25.

LBS SUCCESSOR



Planned Regional Suspends

McLENDON BROADCASTING System, new West Coast regional network scheduled to start operations June 7 [B•T, June 2], was suspended last Wednesday. "Various circumstances" were responsible, according to Gordon McLendon, president of the regional and operating head of Liberty Broadcasting System, which suspended last month [B•T, May 19]. These circumstances included two lengthy absences from Hollywood headquarters by Mr. McLendon, who was to have handled personally daily re-creations of major league baseball games.

Mr. McLendon is to appear June 17 in Philadelphia as a witness in the government's anti-trust action against professional football and also will give depositions in his own suit against organized baseball, set for August 18 in Chicago.

Although 17 West Coast stations had contracted for regional service, Mr. McLendon and Benton Paschall, executive vice president, said they felt it would be impossible to carry out agreements this season. The regional was incorporated in California and the name will be retained for possible resumption of operation at a future date.

CHARLES MICHELSON Inc., N. Y., radio TV transcription firm, named U. S. distributor for Canadian radio package, *The Happy Gang*.

Help Wanted

Announcers

WANTED
Top Hillbilly Disc Jockey

Only top rated men need apply. This is a position in a tough competitive market requiring a versatile man who knows his western, hillbilly music. You must have originality, humor and that certain touch which will appeal to the common folk. You must be able to hit a commercial hard and sell it. Showmanship is important and above all you must be able to build and maintain a high Hooper rating. You can earn big money if you have what we want. You will be paid a base salary, talent, commissions and a bonus. You'll have an opportunity to hit the nearby towns for personal appearances. Disc jockeys on this station are now earning from $5000 to $10,000 a year. If you are a wide awake and have a keen fresh approach and want to work on the most successful independent in a top Southern market of over 500,000 this is your big chance. No hillbilly is at present doing a good job in this city. You'll be supported with promotion and advertising. We are also an applicant for TV and if you can play a guitar and sing your opportunity is even greater. Write full and complete details including photo but no disc. If we are interested you'll hear from us. Box 368P, BROADCASTING • TELECASTING.

MR. TV APPLICANT—
DO YOU NEED HELP?

Are you wondering about programming — operating costs — revenue — personnel?

Are you concerned about the economics of your market, its ability to profitably support your station?

Then why not discuss these and other perplexing problems with a man who has built and successfully managed radio stations in several markets; who built and successfully operated one of the nation's pioneer TV stations; who has never failed to show a substantial profit in any of these operations.

Such a man is now available on a consulting basis to analyze your problems and assist you in arriving at sound solutions. Box 347P, BROADCASTING • TELECASTING.

Agency Recognition

EDITOR:

On page 14 of your May 26 issue you state that Helene Curtis Industries (permanents), Chicago, is sponsoring Tuesday and Thursday segments of *Johnny Olsen's Rumpus Room* through Russel M. Seeds Co. The name of the agency is in error.

This Helene Curtis television is being handled by Gordon Best Co. Inc.

Richard Best
Radio-TV Director
Gordon Best Co. Inc.
Chicago

* * *

Subversive Literature

EDITOR:

How we love your "Tearsheets for Radio" feature in the May 26 issue. For right there accompanying this *radio* yarn and supplementing your bio of author Gene F. Seehafer, new manager of research and sales promotion of *CBS* Chicago, is a photo of Mr. Seehafer holding an *NBC Television* rate card.

Guess there's nothing like keeping up-to-date with the competition.

Harold A. Smith
Advertising & Promotion Manager
NBC-TV Chicago

* * *

EDITOR:

I am surprised at my good friend Gene Seehafer. As manager of research and sales promotion for CBS, he should have a new picture taken. What is that in his hand, an NBC-TV rate card?

John Grandy
Commercial Manager
WQUA Moline, Ill.

[EDITOR'S NOTE: The picture was made when Mr. Seehafer was still teaching at the U. of Minnesota and hence could hold an NBC-TV rate card without burning his fingers. See below.]

Proof Positive

EDITOR:

I have been delightedly looking through the recent "Take Your Choice" publication of BAB in which they compare the more than 105 million radios in the United States with other media and products. One of the most interesting was the statement that there are more radios in the United States than there are beds. We have been toying with an idea which we are *not* going to put on the air:

"Recent statistics have shown that there are more radios in the United States than there are beds . . . proving once again that radio is your best form of entertainment. . . ."

Bill Bradford
KSST Sulphur Springs, Tex.

* * *

Speak for Yourself

EDITOR:

. . . A certain comedy team which has been a radio "institution" for more than 20 years, and which has made its fortune in radio, and radio alone, had an opportunity last Sunday night to put in a "plug" for radio that would have meant much to the industry in its efforts to sell radio as "the world's best medium of advertising." But what happened? They put in one of the best arguments for newspaper advertising that I've heard via radio. Instead of advertising a summer cottage by radio, an ad was inserted in a newspaper, and the "overwhelming" results were referred to on two occasions.

Why couldn't the actors have said, "We'll call Radio Station - - - and put it on the air"? The "overwhelming" results could have then been attributed to radio. No, the thing that we in radio have been fighting for years was completely ignored, and the competition was glorified! This example is not cited as criticism of this program in particular, but merely a recent example of radio's failure to "sell" itself. . . .

It is suggested that stations, networks and BAB write letters to all key persons who appear on radio or who speak in public, and ask them to give radio its just due. If they heard it on radio, ask them to say so. And certainly script writers should be admonished to give radio a break and delete references to newspapers.

Every reference on the air to a specific newspaper, or newspapers generally, is giving them the advantage of the world's best medium of advertising free of charge. . . . advertising for which we charge our sponsors, but give away to our competition.

I'd like to hear what others think about it.

Dave Highbaugh
Program Director
WHIR Danville, Ky.

P.R. Prescription

EDITOR:

I would like to answer Mr. Stanley's letter to you from KCIM Carroll, Iowa [OPEN MIKE, May 19]. He mentioned that civic groups were releasing news stories to the papers in advance and giving them to radio after the paper "hit" the street . . .

Perhaps the station has been falling down on a public relations job . . .

We carry on daily relations with all Cedar Rapids clubs. It pays off with local news. AM radio is here to stay, but just like a furniture store we have to sell to stay in business. In order to sell, radio has to be liked, and to be liked, radio has to carry on an active and "on the ball" public relations campaign.

Ralph D. Willey
Program Manager
KWCR Cedar Rapids, Iowa

MD.-D. C. MEET

Scheduled for June 13-14

SPRING meeting of the Maryland-D. C. Radio & Television Broadcasters Assn. will be held June 13-14 at the Hotel Stephen Decatur, Ocean City, Md. Charles Truitt, WBOC Salisbury, Md., will preside as association president.

After a Friday morning business meeting, Mayor Thomas D'Alesandro, Baltimore, will address a luncheon session. Broadcast Advertising Bureau will conduct an afternoon sales clinic. BAB President Bill Ryan is on the program. Vincent Waslewski, of the NARTB Legal Dept., will discuss legislation affecting broadcasters. Richard Maybone, sales promotion director of Kann's Department Store, Washington, will speak on promotion and advertising problems facing the retailer.

An afternoon panel on regional sales problems will include Joseph L. Brechner, WGAY Silver Spring; Jack Surrick, WFBR Baltimore; John S. Hayes, WTOP Washington; Richard Eaton, WOOK Washington; Richard Rudolph, WITH Baltimore; Charles E. Smith, WTBO Cumberland. Speaker at the Friday dinner will be FCC Comr. George Sterling.

Saturday's program includes a television panel with Ewell K. Jett, WMAR-TV Baltimore; Herb Cohan, WAAM (TV) Baltimore; Leslie H. Peard Jr., WBAL-TV Baltimore; Gene Juster, WNBW (TV) Washington, and Richard Davis, WELI-UHF-TV New Haven. Ken Sparnon, of BMI, will speak following the panel. Ed Gross, of Sydney Hollander Co., will give a factual analysis of the Maryland-D. C. trading area at the afternoon luncheon.

Say It With a Rose

NBC observed National Secretaries Day last Wednesday by presenting each of the 432 secretaries in its New York offices with a rose accompanied by a card which read: "A small expression of our real appreciation and our many thanks." Similar observances were scheduled in NBS offices in other cities.

INITIAL DECISIONS

Toledo, Ohio—The Midwestern Bcstg. Co. FCC Hearing Examiner Fanney N. Litvin issued initial decision looking towards grant of 1470 kc, 1 kw fulltime, DA-DN, conditions. Simultaneously, following applications were denied: The Toledo Blade Co. and Radio Corp. of Toledo, WTOD Toledo to move from 1560 kc, 1 kw-D, to 1470 kc, 1 kw fulltime, and Rural Bcstg. Co. of Ohio for 1470 kc, 1 kw fulltime at Oak Harbor, Ohio. Decision June 3.

WBUD Trenton, N. J.—Morrisville Bcstg Co. FCC Hearing Examiner Hugh B. Hutchison issued initial decision looking towards grant of application for mod. CP to specify new transmitter site. Decision June 4.

FINAL DECISION

New Bern, N. C.—Croven Bcstg. Co. Commission announced final decision granting 1490 kc, 250 w fulltime, and denying by default application of Eastern Carolina Bcstg. Co. Decision June 5.

MEMORANDUM OPINION & ORDER

Grand Island, Neb.—Grand Island Bcstg. Co. Commission denied petition for review of Hearing Examiner's action of Nov. 30, 1951, removing from hearing docket application for 1430 kc, 1 kw fulltime. Memorandum Opinion and Order June 5.

WAPO BID DENIED

FCC Turns Down STA Request

THE FCC last week denied a request by WAPO Chattanooga, a video applicant, that it be given a special temporary authorization to use its present TV equipment to bring the national political conventions to Chattanoogans owning TV sets [B•T, May 19].

In a reply dated Wednesday to Mountain City Television Inc., WAPO organization set up to operate WAPO's television, Commission said STAs "are not intended to replace basic construction permits, which are . . . prerequisite to the installation, construction, and operation of transmitting equipment of the nature contemplated in your request.

"Further," the FCC said, "the Commission believes that a grant of an STA of the nature requested by you would be likely to give you, in your capacity as an applicant, an undue advantage should you become engaged in a comparative hearing with other applicants for Channel 3 in Chattanooga."

KFEL Sets Up Studio

GENE O'FALLON, general manager of KFEL Denver, informed major TV networks last week that KFEL had set up a TV studio in the Brown Palace Hotel next to the Eisenhower headquarters. KFEL has leased telephone lines from the studio and can service networks with television programming during the Presidential candidate's stay in Denver. Last autumn KFEL provided World Series service off the transcontinental link although Denver has no TV station.

FCC ACTIONS
begin on page 86

Educators Mull Plans

(Continued from page 61)

committee. The group already has advised FCC by letter of its support for the allocation change proposed at Madison.

A special booklet has been prepared by the committee to solicit public support for development of educational TV there. Of the 12 channels reserved in Wisconsin, the booklet says, "These facilities would be valued at millions of dollars by commercial broadcasters."

Copies of the booklet are being distributed nationally by JCET.

In Columbus, Ohio State U. has been authorized by its board of trustees to proceed with steps necessary for the establishment of a television station for educational use. The board approved the recommendation of President Howard L. Bevis that the university should "seek the best available television channel" for that purpose.

Now broadcasting on local television stations, OSU is exploring different television production techniques preparatory to programming its own station. The university anticipates providing a community television service, including information for farmers, housewives and parents; refresher courses for professional and technical groups; supplementary classroom instruction programs for elementary and secondary schools; appreciation of the arts and programs to develop understanding of public affairs.

Dr. Bevis noted costs of installing and operating a television station vary widely.

"All I can say at this time is that we feel the costs will be within the resources of the university," he commented.

The board of trustees of the U. of Illinois on May 26 authorized its corporate officers to file an application with FCC for a station on Channel 12, assigned to the Champaign-Urbana area for educational use.

Wayne U., Detroit, has encouraged community participation in planning for the use of UHF Channel 56, reserved for education. A general advisory committee, with representation from all educational interests in the Detroit area, already has explored the possibilities of the administration and programming of an educational television station.

It is reported that the license will be held by a non-profit educational corporation with basic policies of the station to be directed by a board of trustees of some 15 persons selected from the community. Time allocations and station operation would be the responsibility of an operating committee working under the board.

The facilities of WDET (FM) then, presented to Wayne U. by UAW (CIO), will be adapted for television broadcasting, according to William E. Stirton, assistant to the president of Wayne. Use of the station's land, buildings and tower will cut construction costs for the Detroit educators, it was explained.

BROADCAST PRODUCT DISPLAY

Gives Product 90% Chance for Sale

A FULL product display at the point-of-sale installed by radio or television stations gives the product a 90% chance for success and sale, in the opinion of Jack Zinselmeier, merchandising director for WLW Cincinnati.

Components of merchandising, were discussed by Mr. Zinselmeier Wednesday before members of the Chicago Radio Management Club and the Television Council. On the same panel were James Shelby, radio-television director of McCann-Erickson, and O. Johler, merchandising manager for the IGA grocery stores.

The trio attempted to explain the specifics of merchandising. Mr. Zinselmeier termed it "a mental nudge" which brings an advertised product to the attention of the consumer at the point-of-sale, bridging the gap between the creation of the desire for a product or service with advertising and the actual sale.

Mr. Zinselmeier heads a merchandising staff which operates separately from promotion or publicity, and which has 25 different merchandising services. He recommended as basic in local outlet merchandising the proper and full-view display of the product, which "glamorizes it," prices on each display which have been set by the local store, and tie-ins with the media story.

At WLW, the merchandising staff has jurisdiction over any activity in which the client or product name is involved, Mr. Zinselmeier said. Publicity handles station activities which are to be brought to public attention, and the promotion staff concerns itself only with audience and show building.

Merchandising, despite some industry belief, has "no black magic in it", he said. It is a very old practice, with women as the best practitioners with their "tight skirts and sweaters and low necklines."

Mr. Shelby outlined promotions and merchandising theories used by McCann-Erickson for Standard Oil of Indiana and its 30 division points in its Midwest distribution area. Merchandising, in his opinion, makes a show and a product more acceptable, and sells the listening habit.

Mr. Johler of IGA detailed merchandising used for the 10,000 stores in the U. S., emphasizing also an upcoming two-week campaign on Mutual in which 5,500 stores are participating.

"In merchandising, it isn't what you know but how you do it," he claimed, citing follow-through and enthusiasm as the most important factors for success. The Mutual campaign begins late this month.

Operator Rules—FCC Solicits Comment

(Continued from page 29)

moval of the "obsolete" first-class operator requirement would greatly increase the possibilities of a station obtaining a staff with the many qualifications necessary to enable it to do the best possible job within its budget. Operating resources of small stations in rural areas are particularly limited, it was noted.

One broadcaster pointed out that the proposed changes would permit the smaller station to hire a local man who could qualify under a restricted license in lieu of having to bid higher and higher on the scarce big-city market to acquire an engineer. He noted that the present requirement specifies that a 250-w local station must use the same calibre engineer as the 50-kw outlet having a complicated directional array. The job demands vary widely, he noted, with engineering talent going to waste most of the time at the smaller station, although still on the payroll.

FCC spokesmen observed that about 20 FM stations are now employing remote control of their transmitters under special authority. According to reports thus far, such operations appear to be working out "satisfactorily," they noted.

FCC's Questions

Concerning the NARTB proposals, FCC's notice stated "the Commission especially requests data and other pertinent information in response" to the following questions:

(a) What duties should an operator perform during a transmitter watch, and what duties must he perform during a transmitter watch which require significant technical training when operating either standard or FM broadcasting transmitters of each power value provided for in the Commission's rules, with non-directional antennas?

(b) If a transmitter failure occurs during a watch, what steps, if any, should be taken by the operator on duty to restore transmitter operation when operating either standard or FM broadcasting transmitters of each power value provided for in the Commission's Rules with non-directional antennas?

(c) If a transmitter failure occurs during a watch, what steps, if any, could be taken to restore service by station personnel holding radiotelephone third class operator permits or restricted radiotelephone operator permits?

(d) To what extent may the amendments requested be expected to affect the percentage of technical transmission difficulties?

(e) To what extent would personnel holding radiotelephone third class operator permits or restricted radiotelephone operator permits be subjected to physical danger when operating either standard or FM broadcasting transmitters of each power value provided for in the Commission's Rules with non-directional antennas?

(f) What are the advantages or disadvantages of permitting remote control of standard or FM broadcasting transmitters of each power value provided for in the Commission's Rules with non-directional antennas?

(g) What degree of control of the transmitting apparatus is necessary at the broadcast operating position in order to provide satisfactory operation by remote control?

(h) To what extent would it be feasible to permit holders of restricted radiotelephone operator permits to change a standard broadcasting transmitter from one frequency to another and from one power to another in times of emergency in order to comply with plans for emergency operation such as the Conelrad Program?

(i) To what extent would it be feasible to permit remote control of standard broadcasting transmitters and still provide for compliance with Conelrad operating objectives?

(j) What contingencies, if any, with respect to conditions of improper operation, interference to other stations, loss of service, damage to equipment, and injury to persons or property would possibly and probably arise from the adoption of the amendments requested and to what extent should the Commission attempt to prevent these conditions by prescribing operator requirements and qualifications?

In requesting FCC permission to operate its AM transmitter by remote supervision, WGNC pointed out that announcers with restricted permits would be able to operate WGNC's transmitter since it is located at the studio site. Telephone readings of the AM transmitter meters would be relayed by direct wire to a first class operator located at the WGNC-FM transmitter on a nearby mountain, the Commission was informed. If any major adjustments were required, they would be made by either the first class engineer or the station manager, who also holds a first class permit, FCC was advised.

WTIP's Explanation

WTIP explained it would operate its transmitter by remote control through the use of two telephone lines in addition to its regular program line. The transmitter is 1⅓ miles from the studio.

The WTIP remote control operation will function in the following manner, FCC was told:

One loop will be used solely for indication of transmitter performance. Sample voltages indicating the final plate voltage, final plate current, antenna RF current, power line voltage, tower light current and transmitter frequency will be selected at the transmitter by means of a stepping relay and fed over one loop to an indicator-recorder installed at the studios. This recorder will scan, measure and record once every minute on the chart moving one inch per hour. It is planned to make the sensitivity of the recording instrument such that all sample voltages read 100 on a 0-150 chart. The recorder will then indicate per cent deviation from originally selected normal values. Variations above or below pre-determined normal values will be called to the attention of studio personnel by a bell or buzzer.

The second loop will provide means for transmitter power adjustment and frequency monitor failure alarm. These functions along with control of the stepping relay to select sample voltages will be accomplished simply by using relays made polarity sensitive with series rectifiers—no carriers, filters, or amplitude sensitive devices will be utilized.

An approved modulation monitor will be installed at the studio and driven by a broadband TRF receiver. The flasher and modulation indicator will be placed convenient to the studio operator. The off the air audio signal from the modulation monitor will drive the studio monitor speaker system. The percentage of modulation will be controlled from the studio.

The program loop will be center tapped at each end to provide another circuit which will be used for turning the transmitter on and off. Lamps indicating whether the transmitter is on or off the air will be installed at the studio—these lamps will be controlled by a circuit energized from the TRF receiver which drives the modulation monitor.

The changes in FCC's rules proposed by NARTB were affixed to the proposed rule-making notice as an appendix. As reported by FCC, they are as follows:

AMENDMENTS PROPOSED BY THE NATIONAL ASSOCIATION OF RADIO AND TELEVISION BROADCASTERS

A. With Respect to the Commission's Rules

(1) AM Broadcast Stations

Section 3.60—Frequency Monitor—

Change first sentence to read: "The licensee of each standard broadcast station shall have in operation at the transmitter *or at the approved remote control point* a frequency monitor independent of the frequency control of the transmitter."

Section 3.65—Inspection of tower lights and associated control equipment—

Change subsection (a) to read: "Make a visual *or other authorized* observation of the tower lights at least once every 24 hours to insure that all lights are functioning properly as required."

Section 3.66—Remote control operation—

Add a new section, Section 3.66, to read: "Section 3.66. Remote control of operation.—The transmitter of each broadcast station to the extent that such station is authorized for omnidirectional operation with power of 10 kw or less may, upon prior authorization from the Commission, be operated by remote control. An application for authorization to operate by remote control may be made as a part of an application for construction permit or license, or modification thereof. For the purpose of this section, remote control is defined as the operation of a transmitter by a licensed operator from an operating position from which the transmitter is not directly accessible to but is under the control of the operator. Authority for operation by remote control shall be subject to the following conditions and applications for such authority shall clearly indicate the means whereby the conditions will be met:

"(1) The equipment at the operating and transmitting position shall be on premises under the control and supervision of the licensee at all times and shall not be accessible to persons other than the licensee or his agents.

"(2) The control circuits from the operating position to the transmitter shall provide positive on and off control and shall be such that open circuits, short circuits, grounds or other line faults will not actuate the transmitter and any fault causing loss of such control will automatically place the transmitter in an inoperative condition.

"(3) Control and monitoring equipment shall be installed so as to allow the operator either at the remote control point or at the transmitter to perform all of the functions required by the Commission's Rules and Standards to be performed by operators on duty at the transmitter in the absence of remote control."

Section 3.165—Operator Requirements—

Change subsection (a) to read: "(a) The licensee of each station shall have a licensed operator or operators of the grade specified by the Commission on duty during all periods of actual operation of the transmitter at the place where the transmitting equipment is located, *or at the authorized remote control point.*"

Add a new subsection (c), to Section 3.165 to read: "(c) The transmitter of each broadcast station to the extent that such station is authorized for omnidirectional operation with power of 10 kw or less may be operated by an operator with a restricted radiotelephone authorization; provided, however, that any operator other than a first class radiotelephone operator may not undertake any internal tuning adjustments, major repairs or overhauls, except under the immediate supervision of such first class operator, the duties of operators other than first class radiotelephone operators being limited to such operations as placing the station on or off the air, keeping the transmitter log, making external tuning adjustments, making such other minor adjustments as may be required as a result of primary power supply variations and failures, and replacement only of such defective parts as tubes, fuses and other items designed for simple plug-in replacement."

Add a new subsection (d) to Section 3.165 to read: "(d) Each broadcast station shall employ a holder of a radiotelephone first class license as its chief engineer or other technical supervisor who shall be responsible for and make or directly supervise the making of, all internal tuning adjustments, major repairs and overhauls, and all other technical installations or corrections not authorized to be undertaken by an operator of another class under subsection (c) above. Such radiotelephone first class operator shall not be required to be in the full-time employ of the broadcast station but shall be on call and reasonably available to fulfill his specified duties."

Section 3.181—Logs—

Change subsection (c) (2) to read: "The time the daily visual *or other authorized observation* of the tower lights was made."

(2) FM Broadcast Stations

Section 3.252—Frequency monitor—

Change the first sentence to read: "The licensee of each FM broadcast station shall have in operation at the transmitter *or at the authorized remote control point* an approved frequency monitor independent of the frequency control of the transmitter."

Section 3.253—Modulation monitor—

Change the first sentence to read: "The licensee of each FM broadcast station shall have in operation at the transmitter *or at the authorized remote control point* an approved modulation monitor."

Section 3.257 — Changes in equipment and antenna system—

Add the following to subsection (b): "(8) Change in the authorized transmitter remote control point."

Section 3.265—Operator requirements—

Change first sentence to read: "One or more licensed radiotelephone first class operators shall be on duty at the place where the transmitter apparatus of each station *with a transmitter power output in excess of 10 kw* is located and in actual charge thereof whenever it is being so operated."

Add a new subsection (b) to Section 3.265 to coincide with the new subsection (c) proposed above to Section 3.165.

Add a new subsection (c) to Section 3.265 to coincide with the new subsection (d) proposed above to Section 3.165.

Section 3.270—Inspection of tower lights and associated control equipment—

Change subsection (a) to read: "Make a visual *or other authorized* observation of the tower lights at least once every 24 hours to insure that all lights are functioning properly as required."

Section 3.274 — Remote control operation—

Add a new Section 3.274 to coincide with the new Section 3.66 proposed above with regard to remote control of AM stations.

Section 3.281—Logs—

Change subsection (c) (2) to read: "The time the daily visual *or other authorized* observation of the tower lights was made."

(3) Non-commercial Educational FM Broadcast Stations

Section 3.552—Frequency monitor—

Change first sentence of subsection (a) to read: "The licensee of each non-commercial educational broadcast station licensed for transmitter power output above *10 watts* shall have in operation at the transmitter *or at the authorized remote control point* a frequency monitor independent of the frequency control of the transmitter."

Section 3.553—Modulation monitor —

Change first sentence of subsection (a) to read: "The licensee of each non-commercial educational FM broadcast station licensed for transmitter power output above 10 watts shall have in operation at the transmitter *or at the authorized remote control point* a mo

ulation monitor approved by the Commission."

Section 3.557—Changes in equipment and antenna system—

Add the following to subsection (b): "(8) Change in the authorized remote control point for the transmitter."

Section 3.565—Operator requirements—

Delete Sections 3.565 (a), (b) and (c) and substitute in lieu thereof new Sections (a), (b) and (c) to coincide with the new Sections 3.265 (a), (b) and (c) respectively proposed above for FM broadcast stations, leaving in continued effect the existing Section 3.565 (d) with respect to non-commercial educational FM broadcast stations operating with powers of 10 watts or less.

Section 3.572—Remote control operation—

Add a new Section 3.572 to coincide with the new Section 3.66 proposed above with respect to remote control for AM broadcast stations.

(4) Part 13 of Rules—Commercial Radio Operators

Section 13.7—Operators, place of duty—

Delete from Section 13.7 (a) the phrases "other than broadcast" and "and broadcast."

Section 13.61—Operating authority—

Change paragraphs (2), (4) and (5) in subsection (e) as follows: "(a) Standard broadcast stations *operating with directional antenna or with power in excess of 10 kw*; or

"(4) FM broadcast stations *with transmitter power rating in excess of 10 kw*; or

"(5) Non-commercial educational FM broadcast stations with transmitter power rating in excess of *10 kw*; or

Change paragraph (3) of subsections (f) and (g) as follows: "Any of the various classes of broadcast stations *operating with directional antennas or with power output in excess of 10 kw*, remote pickup broadcast stations and FT broadcast stations, or

3. With Respect to the Commission's Standards of Good Engineering Practice

(1) Concerning AM Broadcast Stations

Part 12—Construction, General Operation and Safety of Life Requirements—

Change Part D (2) to read: "(a) *Where* an operator must be on duty during operation, suitable facilities for his welfare and comfort shall be provided."

Parts 20, 21 and 22—

These parts relate to the location of frequency and modulation monitors, and rather than modify their complete texts here, it is proposed that these texts be modified to provide for installation of frequency and modulation monitors at the remote point when transmitters are controlled remotely.

(2) Concerning FM Broadcast Stations

Part 8 — Transmitters and associated equipment—

Change Part D (2) to read: "(2) *Where* an operator must be on duty during operation, suitable facilities for his welfare and comfort shall be provided."

Parts 12, 17 and 18—

These parts relate to the location of frequency and modulation monitors, and rather than modify their complete texts here, it is proposed that these texts be modified to provide for installation of frequency and modulation monitors at the remote point when transmitters are controlled remotely.

THIRTY winners have been selected from 100 applicants for the first Westinghouse-John Hopkins Awards in electrical engineering. Group will begin a three-year work study program, first to be inaugurated by the industry on a college level, on June 23.

AUTO TOTALS

Registration Up 5.8% In 1951 Over 1950

AUTO registrations in the United States totaled 42,682,591 in 1951, an increase of 5.8% over the 40,333,591 registered in 1950, according to the Bureau of Public Roads, Dept. of Commerce. Number of trucks registered was 9,000,913, an increase of 4.6% over the year before.

With the percentage of radio equipped passenger automobiles and trucks increasing every year, automobile registration has become an important factor in the broadcasting audience. Researchers have estimated that between 50 and 60% of all registered motor vehicles are equipped with radios.

Florida, Nevada and South Carolina reported increases of more than 11% in total vehicles registered. Only the District of Columbia reported a decrease.

California had the most vehicles registered, 4,926,543; New York was second with 3,931,559 and Pennsylvania third with 3,189,198.

Operators of motor vehicles paid total state taxes of $1,803,802,000 on 38,304,398,000 gallons of motor fuel consumed in 1951, an increase in consumption of 7.2%. Average state tax was 4.74 cents per gallon.

Total motor vehicle registration in 1951 by states (including trucks, buses and publicly owned vehicles) follows:

* * *

State	Total 1951 Registrations	Total 1950 Registrations	Percentage Increase
Alabama	730,104	685,812	6.5
Arizona	293,833	270,799	8.5
Arkansas	499,642	477,265	4.7
California	4,926,543	4,620,078	6.6
Colorado	599,613	564,210	6.3
Connecticut	764,241	715,935	6.7
Delaware	116,750	108,272	7.8

RADIO'S POWER AND PULL

Theme of CBS Radio's Sales Film

A DOCUMENTARY film dramatizing the power and pull of radio as a sales medium was unveiled last week by CBS Radio, which reportedly already has sold 89% as many quarter-hours for this fall as it had on the air last September.

Titled "More Than Meets the Eye" and described as the first business film ever to tell its story through animated abstract art [B•T, June 2], the presentation was revealed first in Hollywood at a Monday night showing for some 400 executives, stars, writers, musicians and newsmen, and was shown in New York at a party Thursday.

CBS Radio President Adrian Murphy, who with Administrative Vice President Louis Hausman flew to Hollywood for the showing there, emphasized radio's impact on the buying habits of Americans. He asserted:

"A few months ago, a general gloom pervaded the entire industry. Despite radio's broad coverage and lowest cost per thousand people reached, many important advertisers were experimenting with a new medium, and pessimists felt that radio was in a decline from which it would not recover.

"Well, I'm happy to report . . . a great renewal of interest in radio by advertisers, star performers, and listeners. Most of the big star programs will be back on the air next fall, and with the new shows that are being developed this summer, next season will be bigger than last year."

The report on fall program orders thus far wrapped up was given by Mr. Hausman. He told the New York group that, as of that time, CBS Radio had orders which, in terms of daytime shows, represent 91% of the number on the network last September. For both daytime and nighttime, the figure was 89%.

"More than Meets the Eye," produced for CBS Radio by United Productions of America and featuring the voice of newscaster Robert Trout, is designed to show visually the power of sound as a medium. It emphasizes that with 105 million sets in 43 million homes and 23 million automobiles, "radio's coverage is greater than the coverage of any other mass medium" and "goes wherever there are people."

Where the average time spent per day with radio is 108 minutes, CBS Radio notes, the average with TV is 43 minutes, with newspapers 34, and with magazines 18. Further, the film notes: "More than 14 million people listen in the middle of the morning, 14 million in the afternoon, 25 million at night. And these totals are conservative—for national rating services regularly measure only about half of all radio sets."

Radio also "reaches prospects at the lowest cost"—934 persons per dollar by radio; 365 per dollar by TV, 334 by magazines, and 240 by newspapers.

In a pitch for CBS Radio in particular, the film claims that "the average audience is bigger on CBS Radio," that "CBS Radio has more top programs—daytime or nighttime—than all other networks combined," that CBS Radio's cost is lowest and has stayed "lower than almost any commodity you can name," and that, as evidence of their belief in the network, "advertisers invest more dollars-to-build-sales on CBS Radio than on any other network."

AM WEVD FM

4 Reasons Why

The foremost national and local advertisers use WEVD year after year to reach the vast

Jewish Market of Metropolitan New York

1. Top adult programming
2. Strong audience impact
3. Inherent listener loyalty
4. Potential buying power

NEW CO-OP REGIONAL FORMED BY EX-LBS AFFILIATES

NEW REGIONAL network comprising over dozen stations in mid-Atlantic area, formerly affiliates of Liberty network, scheduled to start June 16, with one-month experimental news service keyed from WOL Washington. Interested stations set cooperative project in motion at two-day meeting concluded Friday at WOL studios.

Basic experimental plan proposes 7 p.m. news origination for three weeks out of WOL, including Sunday newscast by Joseph C. Harsch, winner of duPont award. Fourth-week programs would come from Chicago during Republican convention. Telephone line extends from Johnson City, Tenn., through North Carolina, Virginia, District of Columbia, Pennsylvania and into northern Ohio. WRFD Worthington, Ohio, owned, like WOL, by Peoples Broadcasting Corp.

Herbert E. Evans, Peoples vice president-general manager, elected temporary chairman at two-day meeting. Group discussed extension of service to two-hour basis.

ONE RADIO, THREE TV SALES REPORTED BY ABC

FIRST WEEK of June provided renewed business activity for ABC, with one new radio sale and three television renewals reported Friday by Charles T. Ayres, radio network vice president, and John B. Lanigan, vice president for TV sales.

TONI Co. (Toni Home Permanent, Tonette and White Rain), Chicago, through Tatham-Laird, same city, purchased weekly hour on radio with backing of Tuesday, Thursday half-hours of *Break the Bank*. Monday, Wednesday and Friday segments continue to be sponsored by Bristol-Myers through Doherty, Clifford & Shenfield.

Three TV renewals involve Nash-Kelvinator Corp., Detroit, which signed for 52 weeks of *Paul Whiteman TV Teen Club* on Coast-to-Coast network, effective June 7. Agency: Geyer, Newell & Ganger, same city. C. H. Masland & Sons, Carlisle, Pa., renewed alternate Friday sponsorship of ABC-TV's *Tales of Tomorrow*, effective July 4, with Jacques Kreisler Mfg. Corp., North Bergen, N. J., backing remaining Fridays as of Aug. 15. Agency for C. H. Masland is Anderson & Cairns, New York, and for Jacques Kreisler, Hirshon-Garfield, also New York.

NEW NBC AFFILIATES

WTMC Ocala, Fla., and WIKC Bogalusa, La., to affiliate with NBC radio network. WTMC, on 1290 kc with 1 kw, is owned by Ocala Broadcasting Co. and managed by Thomas Gilchrist. WIKC, on 1490 kc with 250 w, is owned by Enterprise Publishing Co. and managed by Curt Sieglin.

Formerly affiliated with MBS, WTMC to be replaced on Mutual by WLBE Leesburg, Fla., on 790 kc with 1 kw. Mrs. Eleanor Hunter is station president, with T. Hoke McCallie as general and commercial manager. WIKC, also MBS affiliate, not being replaced by Mutual after it joins NBC Aug. 8.

BOY TROUBLE

WHITEOUT of NBC telecast of Walcott-Charles fight just as decision was announced was due to small boy's desire to "see better." Network officials reported Friday that boy in audience climbed pole from which power for telecast was coming and inadvertently kicked a switch, throwing network off air. By time trouble was located and power restored NBC had had to fill in with audio announcement of decision from its New York studios. Boy was unhurt.

Business Briefly

(Continued from page 5)

cago (Zippy liquid starch), which recently named Roberts, MacAvinche & Senne, same city, to handle its advertising, begins proposed radio and TV schedule this week with participations in Housewives Protective League on WBBM Chicago. Agency handles business for 18-state Midwest area, with divisions on each coast having their own agencies. Henry Senne is account executive.

SERVEL NAMES AGENCY ● Servel Inc., N. Y., has appointed Hicks & Greist, same city, to handle advertising for its refrigerators, water heaters and room air conditioners.

GOSPEL RENEWS ● Gospel Broadcasting Assn., Pasadena, Calif., renews *The Old-Fashioned Revival Hour* on ABC Radio, Sunday, 4-5 p.m. (EDT), for 52 weeks from June 22. Agency, R. H. Alber Co., Los Angeles.

SEALY BUYS ● Sealy Inc., Chicago (mattresses), through Olian Adv. Co., same city, signed for *Balance Your Budget*, audience participation show on CBS-TV, alternate Tuesdays, 10:30-11 p.m., effective Oct. 14.

ESSO ADDS TV CITY ● Esso Standard Oil Co., N. Y., through Marschalk & Pratt Co., that city, effective June 16 will add WFIL-TV Philadelphia to its 15-minute five-a-week telecasts of *Your Esso Reporter*, bringing total television coverage to seven major cities.

RYBUTAL BUYS ● Rybutal (vitamin compound) buys 15-min. program, nine times weekly on five-station Metropolitan Network starting June 9. Agency, Duane Jones Co. Inc.

CLERIC LAUDS NARTB

NARTB has done "big job" in "short time" by enforcing its Television Code, Rev. Theodore H. Elsner, president of National Religious Broadcasters Inc., wrote Rep. Oren Harris (D-Ark.), chairman of House subcommittee probing programs (see probe story page 27). Rev. Elsner is chairman of Radio Commission of National Assn. of Evangelicals and previously had protested code recommendation against sponsored religious programs (see code story page 5). He told Chairman Harris association opposes legislative action, believing more time should be given TV industry to correct offensive programming. He found "definite improvement" as result of industry's "sincere effort" to raise standards.

PEOPLE . . .

RICHARDS W. COTTON, assistant to president of Philco Corp., appointed director of NPA Electronics Div., and also chairman of Electronics Production Board, succeeding J. A. Milling who returns to RCA. Appointment effective June 16.

FCC COMR. GEORGE STERLING elected to life membership in Eastern Assn. of Fire Chiefs, Reading, Pa. He long has been active volunteer fireman in home community Peaks Islands, Me., near Portland.

WILLIAM DOTY EDOUARDE, sales representative for NBC-TV spot sales in Hollywood named TV spot sales manager for Western Div., heading NBC-TV's spot sales activities in 11 western states. Prior to joining network in May 1951, he was sales manager of KFWB Hollywood, and before that served with Compton Adv. and Badger & Browning & Hersey, both New York.

F. STODDARD DRAKE, Compton Adv., N. Y. to Carl S. Brown Co., same city, in executive capacity.

HELEN WHEELER, production assistant of George F. Foley's *Dr. George Gallup Show* transcribed series aired on some 130 stations promoted to production supervisor.

HENRY G. WENTHEN, production staff, Benton & Bowles, N. Y., to Scheideler, Beck & Werner, that city, in similar capacity.

RICHARD L. LINKROUN, CBS-TV producer and director, to Geyer, Newell & Ganger, N. Y. as executive producer.

RONALD G. VAN TINE, Washington newsman, named assistant to George Sandefer radio-TV director of U. S. Chamber of Commerce.

JOHN H. L. TRAUTFELTER, vice president treasurer of WFBR Baltimore, elected president of Maryland Assn. of Certified Accountants, first radio executive to hold this post.

WILLIAM C. KLEIN, member of sales staff at WLS Chicago many years, joins WENR (ABC) Chicago radio spot and local sales.

HOWARD G. SAWYER, vice president for plans and research, James Thomas Chirurg Co., New York and Boston ad agency, appointed member of American Assn. of Advertising Agencies Standing Committee on Research.

JOHN F. REEDER, account executive and head of plans board of William H. Weintraub & Co., N. Y., to Benton & Bowles, same city, as vice president and account supervisor.

STANLEY LUKE, director of industrial relations for International Telephone & Telegraph Corp. and affiliated firms both here and abroad since 1945, elected assistant vice president of IT&T.

NEW TECHNIQUE

NEW experimental technique, combining movie and TV methods, to be used on final program of *RCA Victor Show*, NBC-TV, Friday, 8 p.m. EDT. TV cameras to shoot scenes of Ezio Pinza on location several days in advance for transmission to Hollywood for filming and editing. Orchestra to play "live" during telecast, however.

"IN THE HEART OF AMERICA . . .

KMBC KFRM

Team and It's

Wholehearted"

Wholeheartedly Delivering...**

- **A Larger Market***

  *In the Kansas City Metropolitan Area alone there has been a population increase of 16,900 in the past 12 months. (Sales Management Survey of Buying Power estimate 1/1/51, 820,400—SMSB pop. est. 1/1/52, 837,300).

- **A Richer Market***

  *Typical is the increase in effective buying income in the Kansas City Metropolitan area, (SMSB estimate for 1951, 1 billion, 433 million dollars) — 150 million dollars more than 1950! Retail sales, too, are up with a total estimate for 1951 (SMSB) of over 1 billion, 73 million dollars.

- **The ENTIRE Market***

  *Larger and richer, the important fact is, that The KMBC-KFRM Team delivers the *entire* rectangular Kansas City Primary Trade Area, as established by the Chamber of Commerce of Kansas City and including all of Kansas, western Missouri and adjoining segments of Iowa, Nebraska, Colorado, Oklahoma and Texas.

**Call KMBC-KFRM, Kansas City, or your nearest Free & Peters Colonel. Get prompt, efficient delivery of this year's larger and richer Heart of America.

SELL THE WHOLE HEART OF AMERICA WHOLEHEARTEDLY, WITH

890 KILOCYCLES, 50,000 WATTS, ABC NETWORK—REPRESENTED BY JOHN BLAIR & COMPANY

Some public answers to our mail:

q: What advantages will I get from the use of NIELSEN COVERAGE SERVICE?

a: NCS will give you extensive, up-to-date data on the geographic spread of your station area, the size of your audience, the depth of your coverage, frequency of listening, the characteristics of your listeners, area marketing information.

---

q: What data can I get on my competition?

a: Your competitive standing against other stations locally, and against stations coming in from "outside."

---

q: Can my total station audience be broken down by TV and non-TV homes?

a: Yes. Subscribers to the Comprehensive Report can have it broken down this way, area by area. Subscribers to the Basic Report will be able to classify their audiences as being in TV or non-TV counties.

---

q: If the network with which I'm affiliated subscribes, although I don't, am I entitled to use NCS data for promotional purposes?

a: No. Such use is not permissible.

---

q: Since I operate only until sundown, my rate card includes evening rates. Must this be included in the calculation of NCS price?

a: No. In such cases, price is based on your daytime rate only and there is a special minimum for such stations.

---

q: What's the next step?

a: Send in your order now, qualify for the pre-publication discounts, and get the most thorough, accurate measurement of audiences at your command:

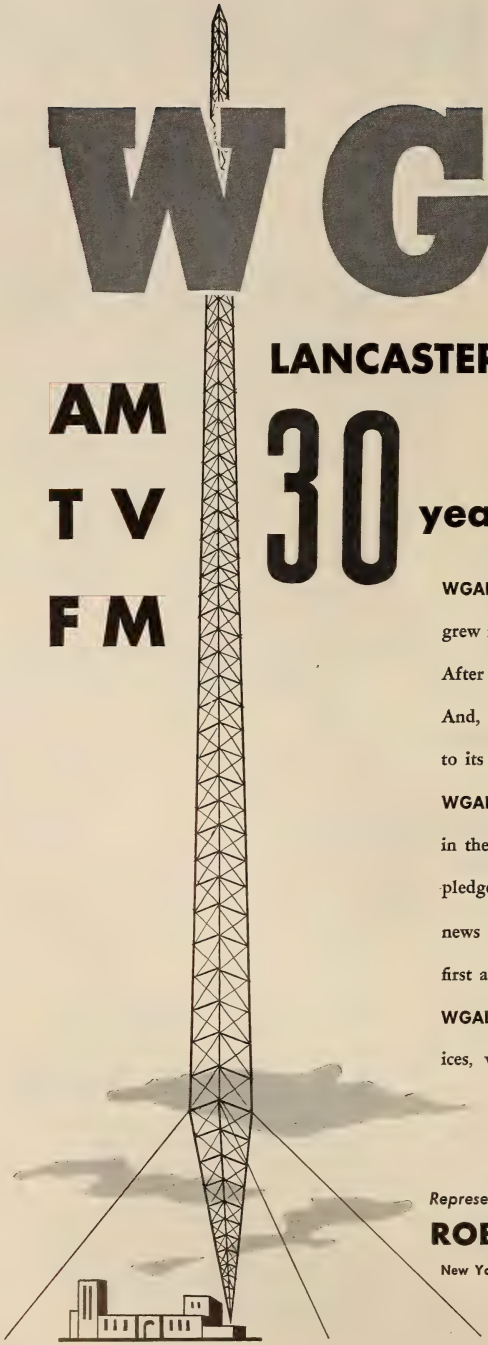
WGAL

LANCASTER, PENNSYLVANIA

AM
TV
FM



30 years of public service

WGAL — one of the pioneer stations in the nation — grew rapidly into a community public service bulwark. After World War II, FM was added to its facilities. And, in 1949, WGAL brought the thrill of television to its viewers.

WGAL, in the future as in the past, is pledged to operate in the best interests of its listeners and viewers. It is pledged to present the best in entertainment; bring news and sports as they happen; place public service first and always.

WGAL, one of America's complete broadcasting services, will keep faith with its thirty years' heritage.

CLOSED CIRCUIT

HOW MUCH has ABC-United Paramount merger proceedings cost ABC radio and TV networks in potential business losses? Educated guess by one key official: $10 million worth of business which would have gone networks' way if it had not been for uncertainty as to what ultimately would be decided.

WHO COMPLAINED to White House about McFarland Bill (S 658) to revamp FCC procedures? That's question stumping Chmn. Paul A. Walker. Last Thursday he asked FCC members individually and collectively about purported complaint which resulted in White House request to withdraw bill from calendar only to have it returned for consideration tomorrow (Tuesday). Answers were all negative (see story page 29).

ON RATE front, there's all sorts of speculation about what's upcoming. There's talk of radical revision of network operations. One suggestion is that networks discontinue regular service after 6 p.m., permitting affiliates to make own arrangements on lines and service after that hour (see story page 23).

ALTHOUGH FCC last week unanimously rescinded its "blacklisting" action wherein several important stations were placed on temporary renewal, FCC legal staff is still moping. Effort to have FCC approve statements, notably answering editorial (FCC Black Magic) in June 9 issue of B•T proved futile.

BING CROSBY, seeking means of diversifying his holdings (he now heads Bing Crosby Enterprises Inc.), has joined with Kenyon Brown, owner of KWFT Wichita Falls, in acquisition of 80% of Westex Boot Co., makers of fancy cowboy boots. It's understood Crosby-Brown combination contemplates TV station enterprises in West, with application for VHF Channel 8 at Monterey, Calif., already in works.

THAT INDEPENDENT theatre television interests intend going all out in applications for TV prior to July 1 filing deadline was indicated last week. It was ascertained that in one Washington law office alone, dozen such applications are being readied for filing.

SINDLINGER & Co., of Radox fame, has been commissioned by United Paramount Theatres Inc. (wholly apart from projected merger with ABC now awaiting FCC decision) to tackle most comprehensive survey of concentrated metropolitan area ever undertaken. Area is within Philadelphia involving one million people and is first of 40-market study to be made on overall listening, looking, motion picture, and reading habits. Study now in fifth week of 14-week project, already has resulted in preliminary conclusion that radio station advertising will do more to boost motion picture box office than any other medium. Conclusion is that judicious use of radio can increase motion picture patronage.

ADVANCE MEETING of CBS affiliates group which arranged July 1-2 conference with CBS on network crisis, meets today (Monday) in Detroit to discuss preliminary planning. Group

(Continued on page 6)

P&G RENEWS SIX SHOWS ON NBC

PROCTER & GAMBLE Co. has renewed six NBC five-a-week daytime programs for another year, representing annual gross billings of $5,649,332 and bringing amount of new and renewed sponsorships on NBC radio network since Jan. 1 of this year to annual gross billings total of $24,361,290, John K. Herbert, NBC vice president in charge of radio network sales, announced Friday. Of total, $5,067,701 represents new business and $19,293,589 renewals, he said.

Programs renewed by P&G, all effective June 30, are: *Welcome Travelers* (10-10:30 a.m.) and *Life Can Be Beautiful, Road of Life, Pepper Young's Family, Right To Happiness, Backstage Wife* (3-4:15 p.m.), all broadcast Monday through Friday. With *Young Dr. Malone* and *Brighter Day*, which starts June 23 for this company (Mon.-Fri., 9:30-10 a.m.), P&G has eight programs on NBC radio, representing annual gross billings of $7,326,000.

P&G renewals, on heels of company's new program purchases, are "heartening evidence of the ability of network radio to attract the wise advertiser," Mr. Herbert said. "We of the NBC radio network are happy that the nation's largest advertiser is leading the way in utilizing radio's mass-coverage-at-low-cost effectiveness."

FCC REBROADCAST ORDER CHALLENGED BY CBS

FCC's "legalized larceny" order aimed at program property rights should be postponed to give networks and stations chance to be heard, CBS stated in brief filed with FCC late Friday. Order handed down last month [B•T, May 19] will increase FCC workload, it was stated (early story page 49).

CBS contends order, which makes stations justify refusal to permit rebroadcasts, amounts to legislation and contends Commission cannot issue rule that supersedes explicit Congressional language merely on ground broadcast business is different today than when law was passed.

Conflict with Federal Reports Act cited by CBS, which added that competitors are free to make indiscriminate and nuisance requests. Requesting party not required to fill out similar reports, CBS notes, asking FCC to omit any reference in rule that places license in jeopardy.

TOM C. GOOCH DIES

TOM C. GOOCH, 72, chairman of board, KRLD-AM-FM-TV Dallas, and publisher of *Dallas Times Herald*, died at 6:45 a.m. Friday at his Dallas home after illness of 10 weeks.

Mr. Gooch spent half-century helping build Dallas and for over 30 years had waged fight in Southwest for better journalism. He had national reputation as vigorous, fair and progressive editor and publisher.

He was born in Bonham, Texas, Jan. 25, 1880, son of Harold and Mattie R. Gooch. His great grandmother, Mrs. Mabel Gilbert, was first white woman to arrive in Dallas soon after establishment of Republic of Texas. He was Episcopalian and 32d degree Mason. His wife, Mrs. Lula Flateau Gooch, survives.

BUSINESS BRIEFLY

RAILWAY COMMENTARY ● Chesapeake & Ohio Railway Co., Cleveland, through Robert Conahay & Assoc., N. Y., planning 15-minute commentary program to be placed locally in cities where railway runs, starting July 2 for 13 weeks. Program will be taped by agency in New York and sent to stations.

FILMS FOR SINGER ● Singer Sewing Machine Co., N. Y., understood to be buying film program *Four Stars* to be used half-hour, alternate weeks. Price is said in neighborhood of $20,000. Network and time not yet determined. Young & Rubicam, N. Y., is agency.

BABBITT BIDDING ● Number of agencies are bidding for $3 million Babbitt & Co. (Bab-O) account, resigning from William H. Weintraub & Co., N. Y., effective July 1. Duane Jones & Co., as well as Harry B. Cohen Adv., are among those in running

SPOT FOR HOSIERY ● Ring Clear hosiery, Boston, through Arnold & Co., that city, buying spot radio announcement campaigns in half-dozen major cities.

RADIO FOR STARCHES ● Hilton & Riggio, N. Y., has recommended spot radio in half-dozen markets for Hood Chemical Co.'s starches. Decision expected in fortnight.

ALLEN ON TV ● Lennen & Mitchell, N. Y., understood to be actively interested in placing new Fred Allen panel show on NBC-TV for its clients, Lehn & Fink.

RTDG CONTRACT WITH NETWORKS

THREATENED STRIKE by New York local of Radio & Television Directors Guild (AFL) was averted when union membership meeting approved terms of 22-month contract with ABC, NBC, CBS, DuMont and Mutual covering radio and TV directors, associate directors and floor managers, union announced Friday. Union authorized its negotiating committee to finalize settlement "if satisfactory contracts can be concluded for free lance TV directors and for network staff personnel in Hollywood, Chicago, Cleveland and Pittsburgh," union reported.

New network contracts provide wage increases of 14% to 21%, with new minimums of $90 for AM local director, $115 for AM associate director, $165 for AM network director, $150 for TV local director, $120 for TV associate directors and floor managers, $175 for TV network directors, subject to WSB approval.

Pact also provides for eight-hour work day for associate TV directors and floor managers, two consecutive days off for AM local directors and both AM and TV network associate directors and floor managers, national guild shop, specific job definitions, military and maternity leaves, removal of "kick-back" clause for TV directors, improved credits for TV director, banning of per diem employment, penalty time provisions distinguished from overtime and improved lunch hour conditions, union said.

NARTSR STANDARDIZES TV IDENTIFICATION

TO SPEED standardization of TV station identification requirements, NARTSR Thursday asked stations for rapid acceptance of four points agreed on by NARTSR TV committee and New York agency group and approved by NARTSR board. Points are:

"1. Trade name of ID segment—It was agreed that for purposes of standardization and definition of spot as specific segment of time these spots would be identified by agencies, as well as stations, as 10-seconds even though actual commercial and station ID portion totalled only 8-seconds.

"2. Position of station ID audio — It was agreed that position of audio portion of station identification would follow audio portion of commercial.

"3. Position of station ID on screen: Agencies agreed to utilize three-quarters of screen area, leaving upper right quarter of screen area for station identification.

"4. Timing: Actual timing would be:

1½ seconds (36 frames)—Open
6 seconds—commercial audio
2 seconds—Station identification audio
½ second (12 frames)—Close"

WWXL SOLD

PURCHASE of WWXL Peoria, Ill., for $17,050 was announced Friday by Hugh R. Norman, manager-owner of KSTT Davenport, Iowa, and Walter Kean, Riverside, Ill., consulting engineer. New owners made $17,050 bid for property after bankruptcy court turned down $11,000 bid made last April by Cecil W. Roberts, president of KREI Farmington, Mo. WWXL has been silent since early this year. It holds license for 1590 kc with 1 kw daytime. It is owned by Central Illinois Radio Corp.

FLYNN PROMOTED BY CBS

HENRY FLYNN, assistant sales manager, promoted to eastern sales manager of CBS Radio Spot Sales. With CBS since 1939, except for war service in Navy, Mr. Flynn has served as network salesman in Los Angeles, as manager of Los Angeles office of CBS Radio Sales, moved to New York in 1949 and has been assistant sales manager of CBS Radio Spot Sales since last October.

WFRO SEEKS CHANNEL

SECOND petition for rule making to add TV channel to town with no assigned channels under FCC Sixth Report [B•T, April 14], expected to be filed today (Monday). WFRO-AM-FM Fremont, Ohio, will request that UHF Channel 59 be assigned there. Originally, UHF Ch. 59 was assigned to Sandusky, Ohio, but under Sixth Report that city got Ch. 42 instead. First petition to allocate channel under provision of 15-mile rule came from Dr. Forbes Farms Inc. [B•T, June 9]. WFRO attorney is Abe L. Stein, Washington.

WVOP NOW MUTUAL

WVOP Vidalia, Ga., joined MBS, with affiliation effective June 15, General Manager Howard C. Gilreath announced Friday. Station, on 1450 kc with 250 w, was formerly affiliated with LBS until that network ceased operations.

In this Issue—

What's the future of network radio? A special BROADCASTING • TELECASTING analysis shows how the present radio network crisis developed and how management hopes to pull the patients through. *Page 23.*

New radio survey in Louisville shows that despite great gains of television radio is bigger than ever. In past year radio set ownership has increased by .56 sets-per-family. People are listening to radio avidly in places TV can't reach. *Page 26.*

Five court actions filed in challenge of FCC's Sixth Report and Order, lifting the television freeze. Though each of the suits attacks only those portions of the report pertaining to their own areas, some of the legal arguments advanced seem to have a bearing on allocations elsewhere. *Page 73.*

If it keeps on with its present system of selling, television may price itself out of the advertiser's reach. Maybe it ought to revise its techniques to sell time as magazines sell space. These are thoughts of a leading advertiser, expressed to the Advertising Federation of America. *Page 74.* For other news of AFA convention see *Page 30.*

Five national advertisers drop fall television network programs and will reallocate the budgets to radio and television spot campaigns. *Page 25.*

NARTB radio and television boards plan vigorous campaign against growing trend toward censorship of broadcasting. *Page 28.*

In this feverish political season, television is alternately blasted and blessed by politicians and political commentators. Both radio and TV will play bigger roles in this Presidential year than broadcasting ever played before. *Page 29.*

McFarland Bill to rewrite the Communications Act is yanked from the House calendar and then replaced, amid rumors that the FCC elements which oppose the measure had put pressure on the White House to stall off a House vote. *Page 29.*

CBS asks FCC to sever the proposed merger of ABC and United Paramount Theatres from over-all Paramount hearing and approve CBS acquisition of WBKB (TV) Chicago, owned by United Paramount's Balaban & Katz. DuMont, however, opposes severance of the case from the Paramount hearing. *Page 73.*

Britain takes first step toward introduction of commercial television competition to the BBC monopoly. *Page 44.*

Upcoming

June 16-18: National Assn. Radio Farm Directors, Raleigh Hotel, Washington.
June 16-19: National Advertising Agency Network, Skytop Lodge, Skytop, Pa.
June 19-20: North Carolina Assn. of Broadcasters, The Carolinian, Nags Head, N. C.
(Other Upcomings page 97)

Closed Circuit

(Continued on page 5)

of nine also will meet June 30 in New York with CBS Radio Affiliates Advisory Board preparatory to two-day sessions. It's likely that registration fee will be charged to conform with possible legal requirements, this being considered on advice of counsel.

EXPECT government to withhold plans to relax controls on construction. Steel strike has NPA officials worried, with some feeling that controls may have to be tightened temporarily not relaxed. Although withholding of scheduled easements will only affect general construction, radio-TV project approvals last week (see story on page 59) may be revised also.

HIGH NETWORK brass has been trekking to Washington during past fortnight because of complications over FCC's interpretation of Section 315, governing equal time for political candidates for public office. Fortnight ago CBS Acting President Joseph H. Ream conferred in Washington over Taft-Kefauver protest against Eisenhower appearances, demanding equal time, and last week NBC President Joseph H. McConnell was in town for same purpose and during course of visit, saw Sen. Taft, as well as FCC officials.

WISECRACK of week: When Joseph H. McConnell, NBC president, and F. M. Russell, NBC Washington vice president, called upon Sen. Taft last Monday to discuss with him class of time to offset Eisenhower Kansas coverage, Mr. Russell commented NBC could not guarantee to give him a Kansas rainstorm. Quipped Taft: "We'll waive that."

ADDITIONAL APPLICATIONS

EIGHT new and amended television station applications filed Friday at FCC. One request for channel change for existing station was also filed (see early story page 75). TV applications since April 14 total 84. Submitted to FCC Friday were these requests:

KLZ Denver, Ch. 7, ERP 72.5 kw visual, antenna height above average terrain 928 ft., cost $440,000.
WHOO Orlando, Fla., Ch. 9, ERP 277 kw visual, antenna height 484 ft., cost $324,415.
Empire Coil Co., Tampa-St. Petersburg, Fla., UHF Ch. 38, ERP 263 kw visual, antenna height 462 ft., cost $391,700. (Empire Coil Co. is licensee of WXEL (TV) Cleveland.)
WBOK New Orleans, UHF Ch. 26, ERP 75.2 kw visual, antenna height 419 ft., cost $285,894.
WWL New Orleans, Ch. 4, ERP 100 kw visual, antenna height 710 ft., cost $545,539.
WDAY Fargo, N. D., Ch. 6, ERP 65 kw visual, antenna height 460 ft., cost $344,000.
WNOW York, Pa., UHF Ch. 49, ERP 95.8 kw visual, antenna height 473 ft., cost $176,500.
WAIM Anderson, S. C., UHF Ch. 58, ERP 200 kw visual, antenna height 378 ft., cost $401,444.
WCPO-TV Cincinnati, Ch. 9, ERP 316 kw visual, antenna height 665 ft., cost of change $206,68 (change *from* Ch. 7 with ERP 24 kw, required under Sixth Report & Order, B•T, April 14).

Meanwhile, *Oklahoma City Oklahoman* and licensee of WKY-TV Oklahoma City, Okla. Friday announced intention to file for Ch. 1 for Wichita, Kan.

MAGAZINE ADS UP

MAGAZINE advertising in May up 14.7% over last May—$54,747,430 this May to $47,728,383 for May of 1951, Magazine Advertising Bureau reported Friday. Cumulative January-May dollar volume of magazine ads up 11.4% this year over last. MAB also reported Sunday newspaper supplement ad volume for first five months of this year down 11.3% from same period of 1951.

7,000 more people for dinner tonight!

Every night the *U. S. A.* sits down to dinner, there are 7,000 *more people* reaching for the meat platter. This is like adding a city about the size of Providence, Rhode Island, every *month*, or a state about the size of Indiana every *year*.

With an average population gain that large, every year's meat supply *has* to be larger than that for the year before—or everybody would have to be satisfied with a smaller serving.

But *nobody* wants smaller portions. Nearly everybody wants *more* meat. That means we must grow more meat animals on America's farms and ranches. It means that the meat packing industry must be able to expand its plants and facilities in pace with the country's need for meat.

It means that production must be encouraged. The best way to do this is to let the economic laws of supply and demand operate freely.

"HIATUS" pays dividends in the TOLEDO area

Why do national sponsors take a Vacation from SALES? Local sponsors for years have financed trips to Florida by snapping up your "HIATUS TIME" because they know that listening and sales pick up in the WSPD area during the summer months. Toledo is the heart of the Lake Erie Vacationland — all summer long transient dollars pour into local coffers. In Southern Michigan with its hundreds of lakes and thousands of vacationists — the blanketing Voice Of Radio is WSPD. This summer be wise — capitalize on WSPD's coverage in Vacationland . . . sell the pleasure spender the "Speedy Way" by keeping your "HIATUS TIME" on Ohio's Pioneer Station WSPD.

on all accounts

MARTIN STONE, president of Kagran Corp., New York, is perhaps one of the most distinguished men in the industry, and one to whom distinctions have come with a frequency rivaled only by the awards to his original creation, *Author Meets the Critics.*

Mr. Stone, a young man in his mid-thirties, and a muscular six feet, two inches, was graduated from St. Stephens College, Columbia U., a Phi Beta Kappa and *Sig Cum Laude.* He was an All-American soccer player in 1935.

Turning down the prospect of a Rhodes Scholarship, he matriculated at Yale Law School, where he captured scholarships his first three years. Upon graduating, he was selected to serve as law secretary to Chief Justice Irving Lehman of the New York Supreme Court.

It was while in Albany with Chief Justice Lehman that he first conceived *Author Meets the Critics.* The program later moved to New York. Its creator meanwhile moved to Washington in 1942 to become a legal aide to Secretary of State Edward R. Stettinius, working on the administration of lend lease. That year he enlisted in the Navy, where part of his assignment was to he on the legal aspects of Preside Roosevelt's speeches and messag

Mr. STONE

In 1946, upon his release fr the Navy, he returned to N York to become a partner in t law firm of Cohen, Bingham Stone. Meanwhile, *Author Me the Critics* had moved to WQ New York, and by 1947 had come a network show (NBC).

It was at that time that M Stone took leave of absence fr his law firm — o which has persist to the present day his radio and T successes have minated more a more of his time a energies.

Author was tak over by Gene Foods in a TV v sion (Sunday, 8 p. NBC-TV). Seve months later M Stone sold anot television progra *Americana,* to Fi stone Tire & Rub Co. (NBC-TV). the end of the sa year, he and E Smith began th fabulous *Howdy Doody* associati on NBC-TV.

By the following year, M Stone's properties also includ *Gulf Road Show* on televisi *Room 416* on radio, and *Somethi Ought To Be Done,* also on rad In addition to his radio and T

THE PLUS NETWORK

WINTER'S TALE... with a year-round moral

What is so rare as a blazing hearth in June? A radio network scoring *gains* during the past winter, that's what. And why do we tell you this tale now? These gains can affect your selling plans any time in the year, that's why.

All last winter (November-March, including latest Nielsen reports) an *increasing* share of the total radio audience was tuned to Mutual... an *8% larger* share than in the same months a year ago. And Mutual has the *largest gain* in share of audience among all radio networks.

During these same heart-warming months, advertisers were steadily *adding* investments in Mutual time... *15% more* than a year ago. And Mutual has the *largest gain* in advertiser billings among all radio networks.

Naturally, it takes a full supply of seasoned advantages to keep these unique plusses going... advantages like the world's-largest-network pattern of the most stations in the most markets (nearly double anybody else's).

And because *all* these advantages are stacked and ready for immediate use, we welcome you to a chair beside the PLUS fireplace *now*—to plan for any kind of sales weather to come.

the MUTUAL network of 550 affiliates

and enjoy the scenery. WGST stays on the job in the busy Atlanta Market selling your merchandise to its big loyal audience. We've been here for 28 years and offer you complete know-how to gain additional sales and distribution in the key outlets. Backed by top net and local shows plus an aggressive merchandising plan we present you the key to Atlanta. Contact WGST or our national reps now—then RELAX.

Scores Grand Slam in Annual Radio and T.V. Awards

Variety Showmanagement Award

FOR ORIGINATION OF NETWORK TV SHOWS—"WCAU-TV's recent addition of its fifth and sixth network originations has virtually given the station exclusive property rights to CBS-TV's Sunday daytime schedule."

George Foster Peabody Award

FOR "WHAT IN THE WORLD"—"For the stimulating manner in which it brings noted scholars to the television screen for a delightfully entertaining and informal display of their learning—a superb blending of the academic and the entertaining."

Ohio State Institute for Education by Radio

FOR "FREEDOM REVISITED"—"For a humble and sincere reiteration of principles of positive Americanism that can be utilized as a daily creed; and for the permanence of auto-impulsion on the individual that a thirty-minute radio program can make."

Alfred I. du Pont Awards Foundation

FOR PUBLIC SERVICE RADIO AND TELEVISION PROGRAMMING—"To Stations WCAU and WCAU-TV, for outstanding public service in encouraging, promoting and developing American ideals of freedom and for loyal, devoted service to the nation and the communities served by it."

Ohio State Institute for Education by Television

FOR "BIG TOP"—"Honorable mention for wholesome entertainment for children at home and skill in capturing the flavor of the circus, a great American tradition."

Freedom's Foundation Award

FOR "FREEDOM REVISITED"—"To WCAU for its public service radio series representing six radio pilgrimages to the shrines of liberty in the Philadelphia area and reconstructing the epic history of the parts they played in the creation of a free America."

This is the third award from Freedom's Foundation in three years.

General Federation of Women's Clubs

FOR "BIG TOP"—A poll of 11,000,000 members of the General Federation of Women's Clubs voted "Big Top" top honors in television programs for children.

No other station in America has EVER won all these important awards in a single year

"Operation Heat Wave"

The hottest thing in town these days, outside of Washington's famous summer weather, is WRC's "OPERATION HEAT WAVE." For the first time, WRC is affording its advertisers a chance to make the heat pay off. . . .

If you're selling a seasonal product that moves best when the sun is hottest, here's your chance to buy radio spots in Washington on those "fair and warmer" days only—and save and save in the bargain.

WHEN: From May 25 through September 25.

WHAT: 20-second station breaks.

WHO: Seasonal hot weather products *only*, such as fans, bathing suits and sun tan lotion. (Products subject to WRC acceptance).

COST: It's lower than you think!

For complete details on how to stretch your radio dollars in the Washington market during the summer months, contact the New York office of NBC Spot Sales or the WRC Sales Department.

feature of the week

RADIO and television teamed up with point-of-sale advertising in Southern California to produce an outstanding promotion in the brewing industry.

Covering a six-week period, Maier Brewing Co., Los Angeles, on behalf of Brew 102 beer, in a wrestler-popularity contest set up by John I. Edwards & Assoc., agency servicing the account, tallied 2,852,842 votes cast at the point-of-sale.

Inviting the public to vote for "King 102, America's Perfect Wrestler," the firm utilized about 15% of its regular weekly spot announcement schedules on KNX and KMPC Hollywood. Also used was part of the 15-minute "cushion" segment on *102 Theatre* and dressing room interviews on *Monday Night Wrestling*, both on KTTV (TV) Hollywood. This tied in with the brewing company's long time sponsorship of telecast wrestling.

Twelve wrestlers, nominated by a committee of Los Angeles radio-TV and sports editors, vied for the honor. They appeared on Brew 102 TV programs and electioneered for themselves by personal appearances. This radio-television promotion was backed up with 500 seven-sheet posters in addition to mentions in the local trade papers.

Voting took place at more than 10,000 ballot-box display units installed at Brew 102 dealer stores during the campaign. Maier Brewing Co. found it necessary to triple its original printing order for ballots, according to Jack O'Mara, promotion director for the advertising agency.

Homage is paid to "King 102" (l) (grappler Lou Thesz) by (l to r) Ed (Strangler) Lewis, former wrestling champion and now Mr. Thesz' manager; Richard A. Moore, KTTV vice president and general manager; Mr. Edwards, and George M. Stout, president of Maier Brewing.

* * *

The campaign was climaxed with coronation of Lou Thesz as "King 102" on the May 12 *Monday Night Wrestling* telecast.

Although disclosing no figures or percentages, 97% of the Brew 102 salesmen and distributors surveyed declared the promotion definitely helped them sell more beer during that period than they would normally have merchandised. The radio-television campaign was described as "conclusive evidence of both media's selling powers."

strictly business

RALPH C. KELLEY

ALTHOUGH television has made inroads into nighttime radio spot business, "there will always be a good demand for daytime spot," according to Ralph Clark Kelley, vice president of the Walker Co., station representative firm, and manager of its midwest office.

Mr. Kelley believes also that a rate adjustment similar to that made by stations and networks on time costs will take place with spot when new television stations span the country in the next few years. For now, however, he says the traditional summer hiatus "doesn't seem to be materializing." Midwest agencies are busily buying spot for fall, seasonal and special campaigns, he reports, in contrast

Better to Give

EDITOR:

. . . About a week ago I ap proached the branch manager of company for a prize of real qualit which I intended to use in a contes in our WFBR "Family Day." H said the company had decide against *give-aways*. This expres sion made me think back to las year when WFBR plugged h product in every local program o a rotating basis for a month an a half. In addition to this hi prize was pictured on the fron page of a Baltimore weekly an identified—space you can't buy The question in my mind is *wh gives what away?* . . .

I think it's about time that radi did something to take the stigm of *give-away* off the necks of pro motion people . . .

There are some real problems i this phase of radio showmanshi and in TV also, I guess. I'll settl for anything that will make manu facturers realize that radio tim is worth something and that the aren't a lot of Santa Clauses wh *give away* . . .

30 Years of Growing

WDEL

AM · FM · TV

WILMINGTON, DELAWARE

1952 marks for WDEL, three decades of broadcast operation—thirty years of growing with the many vigorous, expanding communities in its listening and viewing area.

Established in 1922, WDEL was Delaware's first station. In 1947, it broadened its services to bring frequency modulation to its listeners. And three years ago, in 1949, it pioneered the State's first television station. Today, WDEL is Delaware's only three-way broadcast operation.

On the occasion of its thirtieth birthday, WDEL restates its past and future plans and philosophy of operation. These are to improve constantly its programming and technical facilities and to serve always the best interests of the people in its area — listeners, viewers and advertisers.

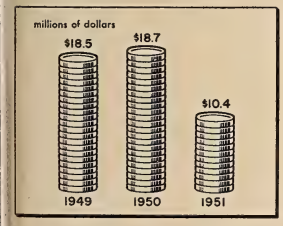
THE RADIO NETWORKS' CRISIS AND CURES

By EDWIN H. JAMES



"CRISIS" is a word that no businessman likes to have applied to his business.

In its common connotation, "crisis" is an unpleasant word, full of anxiety, frequently of fear.

But the word has other meanings. To a doctor it represents a time of anxiousness, but not anxiety, a moment anticipated and prepared for. The doctor scientifically analyzes the reasons for the expected crisis and sets out a careful plan to survive it.

One big element in the U. S. radio business has been in a crisis for more than a year, without a doctor in attendance, or at least without a doctor who could prescribe and treat at will. By last week it had become apparent that the nationwide radio networks cannot survive the crisis without receiving competent and perhaps drastic medication soon.

An indication of the patients' condition may be shown thus:

In some ways, this graphic representation is deceptively favorable. The stacks of dollars above stand for total income (before federal income tax) of the nationwide radio networks and their 18 owned and operated stations. Take out the income that could properly be attributed to the owned and operated stations, and you have little or nothing left.

The truth is that by the most conservative accounts the networks

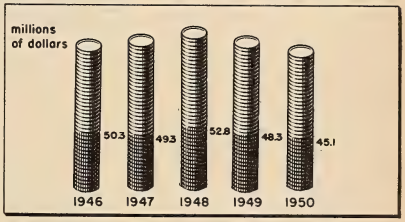
TV Allocations Attacked In Court; Five Appeals Filed

See Page 73

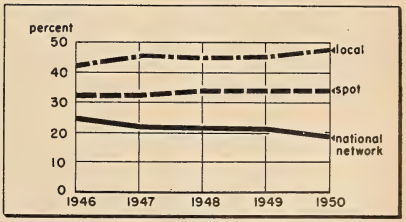
TOTAL RADIO NETWORK TIME SALES TAKE A HEADER

Net time sales (before agency and other commissions) of the four nationwide radio networks rose after World War II to $133.7 million peak in 1948. Then television came along. Last year radio network sales were down to $116.6 million.*



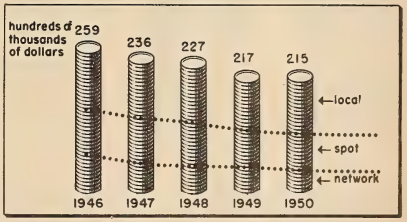
*** Source: FCC for all years save 1951 which is B•T estimate.**

AFFILIATES' REVENUE FROM NETWORKS FOLLOWS SUIT



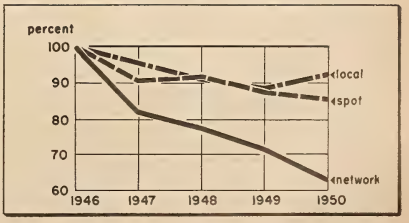
In general total revenue accruing to all affiliated stations from time sales by the major radio networks has followed the patterns of total network sales: $50.3 million in 1946; $49.3 million in 1947; $52.8 million in 1948; $48.3 million in 1949; $45.1 million in 1950.*

*** No figures available for 1951.**



FOR ALL STATIONS SPOT HOLDS OWN, LOCAL RISES

The revenues received by network affiliates from network, spot and local time sales have been changing in relationship. Network business provided 24.5% of all revenues received in these three categories in 1946, only 18.6% in 1950. The proportion of spot has risen slightly. Local now provides almost half—48.1%—of money taken in from these three kinds of sales.



BUT MORE STATIONS MEAN LESS REVENUE FOR EACH

Since 1946, the number of major radio network affiliates included in FCC reports has increased from 791 to 1,130. More stations have been cutting up the pie into pieces of decreasing size. Chart at right shows total revenue for *average* affiliate from network, spot and local time sales and proportions obtained from each of the three categories.

AVERAGE AFFILIATE GROSSES LESS NOW THAN IN '46

Using 1946 as base year (100%), chart at right shows how increase in number of affiliates has meant decrease in revenue for each. For average affiliate, network revenue in 1950 was only 62.8% of the 1946 level; spot revenue was down to 85.8% of 1946; local down to 92.0%.

WEED RE-ALIGNS

Radio and TV Separated

SEPARATION of the radio and television operations of Weed & Co., station representation firm, was announced last week following the establishment of Weed Television in new offices at 501 Madison Ave., New York, under the direction of Peter B. James.

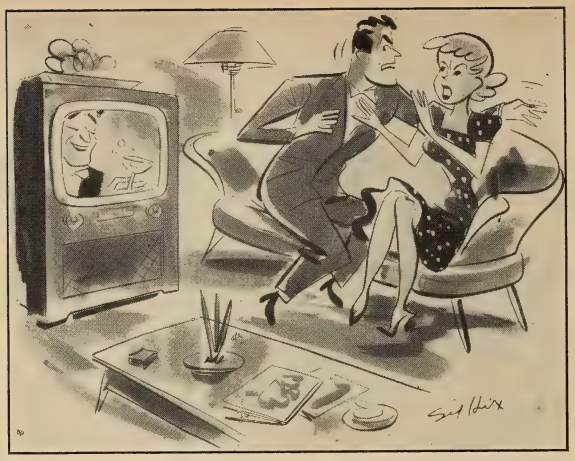
Weed & Co. will handle radio representation, continuing under the managership of Jerry Lyons, while Weed Television concentrates on representation of TV stations. Joseph J. Weed, owner, will continue to maintain overall supervision of both radio and television divisions. Weed & Co.'s New York offices are at 350 Madison Ave.

The new Weed Television organization was described by Mr. Weed as a completely separate organization, fully staffed with sales, service, merchandising, research, and promotion personnel and designed to serve station clients in all phases of TV representation. Among its services, aside from regular sales activities, is assistance to clients in the preparation of FCC applications for new or changed television facilities.

Clients include WBKB (TV) Chicago, WATV (TV) Newark-New York, WJAR-TV Providence, and WOI-TV Ames, Iowa.

Mr. James, who has been manager of Weed & Co.'s television department since its founding in February 1948, meanwhile announced the appointment of two new account executives of Weed Television: Ray Stone, formerly assistant manager of the CBS-TV Network sales service department, and Joseph Miller, who has been associated with the RCA Victor Film Recording Div., Ross Television Reports, and American Film Producers.

For 10 years before World War II, Mr. James was divisional manager of the Kellogg (cereals) Sales Co. in northern New England.



Mr. James

Mr. Weed

Grants WCAR Move

MOVE of the transmitter site of WCAR Pontiac, Mich., to Detroit was authorized by the FCC last week. The Commission authorized modification of a construction permit which it earlier granted to WCAR for change of studio location to Detroit and for change in operating assignment from 1 kw daytime on 1130 kc to 50 kw day, 10 kw night, on that frequency, using a directional antenna. Comr. E. M. Webster voted for hearing on the modification.

"Why, Jim! . . . can't you see the Continental is looking."

GENERAL MILLS

Buys Additional Hours On ABC Radio

GENERAL MILLS last week signed for 3¾ additional hours a week on ABC radio, which coincidentally is planning a major realignment of its afternoon program format with western music slated for the 2:35-4:30 p.m. period [B•T, May 26].

The contract with General Mills called for five half-hours a week (4-4:30 p.m. Mon.-Fri.) plus five quarter-hours (12:30-45 p.m., Mon-Fri.). Cal Tinney tentatively is slated for one of the across-the-board series, and a hillbilly musical group featuring Tennessee Ernie for the other, although exact details had not been worked out.

The 4-4:30 series is slated to start June 30 and will be carried on 274 stations; the 12:30-45 programs will begin on the same date on 165 stations, which will be increased to 172 on Sept. 1. Sale of the half-hours was handled through Dancer-Fitzgerald-Sample, Chicago, and the quarter-hours through Knox Reeves, Minneapolis.

The swing to hillbilly programming in the mid-afternoon block, occasioned in part by recent sponsor cancellations of serials in that segment, will install a sustaining western program with Tennessee Ernie as m.c. in the 2:35-4 p.m. period, after which the General Mills program—probably featuring Cal Tinney—will extend the block to 4:30.

The 12:30-45 p.m. General Mills program, to be broadcast over a substantially smaller number of scattered stations, also will add a rural flavor, according to present plans. The change in format for both the 12:30-45 and the 2:35-4:30 periods goes into effect June 30, when General Mills sponsorship of the additional period begins.

The amount of billings involved in the new General Mills purchase was not disclosed. Some of it represented funds formerly budgeted on Liberty Broadcasting System programs, before LBS ceased operations.

Charles T. Ayres, ABC vice president for the radio network, meanwhile announced that *Silver Eagle* had been renewed for another 52 weeks, over the full radio network. The renewal was through Knox Reeves.

General Mills meanwhile renewed its *Whispering Streets* on ABC radio (Mon-Fri., 10:25-45 a.m.) for 52 weeks, giving the network another strong boost (see story page 25). General Mills also sponsors two other ABC radio shows: *Lone Ranger* (Mon., Wed., and Fri., 7:30-8 p.m.) and *Silver Eagle* (Tues. and Thurs., 7:30-8 p.m.).

COX ELECTED

Pres. of KGW Licensee

H QUENTON COX has been elected president of Pioneer Broadcasters Inc., operating KGW Portland, Ore. He will continue as general manager of the station. He previously had been assistant treasurer.

Mr. Cox

Mr. Cox joined KGW in 1936. His promotion occurs as control of Pioneer Broadcasters Inc. passes from Mrs. Mitzi E. Newhouse to her son, S. I. Newhouse Jr., now in the Army. Mr. Newhouse, a vice president, will participate in management of KGW's TV project when he leaves the service. His brother, Donald, is also a vice president. Charles Goldman, New York attorney, joins the Pioneer board.

SCRIPPS FIRM

Formed with Foss, Duschinsky

NEW telecommunications consulting firm, William J. Scripps Assoc., was formed last week with offices in Washington, New York and at Birmingham, Mich., a suburb of Detroit. Principals are Mr. Scripps, founder and operator of WWJ-AM-TV Detroit; William L. Foss, head of the engineering consulting firm bearing his name, and Walter Duschinsky, planning consultant who has been an adviser to The United Nations.

Mr. Scripps

Serving both civil and military interests in the United States and foreign countries, the firm announces it will provide a complete television service for prospective applicants, including market studies, architecture, engineering, purchase of equipment and legal activities.

Mr. Foss

Mr. Scripps said the consulting service will cover all phases of station planning and management, including programming. He plans to spend most of his time with the firm although he will retain his directorship in the Evening News Assn., operating WWJ and WWJ-TV. He has been in radio over three decades, starting voice broadcasts in August 1920, with call letters 8CS and 8MK, which soon became WWJ.

For some time Mr. Scripps has been active in the Crusade for Freedom movement, as co-chairman with Henry Ford II. Last year he directed the launching of propaganda balloons into Iron Curtain countries. He has submitted to the government a plan for a Friendship Balloon Lift, in which tangible items such as cigarettes would be flown behind the Iron Curtain.

Joins Father's Firm

BEN C. FISHER, son of Ben S. Fisher, partner in the Washington radio law firm of Fisher, Wayland Duvall & Southmayd, has joined his father's office, it was announced last week. The younger Mr. Fisher is a graduate of Harvard Law School, 1951, where he was director of legal research for the *Harvard Law Review*. During the past year he has been clerk to Justice Learned Hand of the U. S. Court of Appeals, New York. The younger Mr. Fisher received his B.A. in 1948 from the U. of Illinois. He is a Phi Beta Kappa.

NEW SWING TO SPOT

In Radio, TV Budgets

By FLORENCE SMALL

IN A DRAMATIC departure in programming at least five national advertisers have almost simultaneously decided to drop their fall network television shows. They will channel their budgets into radio-TV spot campaigns exclusively. In addition, a sixth advertiser is withdrawing its television spot schedule and diverting its money to local radio this summer.

Those were the major findings of a BROADCASTING • TELECASTING spot check in a week which saw the following actions: (1) ABC captured two new radio advertisers and two in TV while recording two renewals in TV; (2) NBC-TV acquired two new shows and NBC one radio show; (3) CBS Radio came up with a new advertiser, and (4) MBS signed another in radio.

The dominating news was the diversion from network TV to spot. Several reasons were being advanced privately by agencies and advertisers for the development. In sum, the conclusions seemed to be that (1) the studied placing of campaigns on a regional basis prevented duplication which occurred when both a network and a spot schedule were used, and (2) the spot method reached a specific market with precisely the required impact. Elaborating on the latter, they said the high cost of network TV gave emphasis to the fact that spot coverage does not commit them to 39 weeks but can be used seasonably and generally can be increased or decreased quickly.

Reasons Advanced

Mennen & Co., New York, one of the spot devotees, has dropped sponsorship of *Twenty Questions* on DuMont TV and is expanding its early-morning radio program schedule. Mennen has been using 10 and 15-minute news shows in early morning time, 7-9 a.m., in about 60 markets on a 52-week contract basis. Effective July 1 the firm will expand the use of the 10 and 15-minute local news shows to at least 90 markets. Mennen was one of the first national advertisers to use early-morning radio schedules. Kenyon & Eckhardt, New York is the agency.

Another advertiser riding the new trend is Lambert Pharmacal Co. (Listerine), which drops its television program (Sammy Kaye on CBS-TV, Sat., 7-7:30 p.m.) to put the money into TV spots, starting in the fall. Agency is Lambert & Feasley, New York. Phillips Petroleum Co. (Phillips 66), Bartlesville, Okla., meanwhile drops its radio program *(Rex Allen Show* on 67 CBS Radio stations, Mon., 10:30-45 p.m.) to sponsor local TV programs in 17 markets. In addition the company is adding at least a dozen radio markets for quarter-hour programs as proper availabilities open. The present radio schedule includes 30 programs, half-hour once a week, and as many quarter-hour shows, across-the-board in markets across the country.

Snow Crop Frozen Foods, New York, which has dropped sponsorship of *All-Star Revue*, Saturday on NBC-TV, will put its television money into radio and TV saturation spot campaigns. The firm is currently realigning its budget and expects to use six or eight-week penetration spot campaigns in markets across the country for all of its products. Maxon Inc., New York, is the agency.

General Foods (Jell-O), which sponsored a half-hour show, *Mr. Bobbin*, on NBC-TV last fall, will use part of its TV budget in a radio and TV spot campaign starting July 1 and running through the summer. In the fall, however, Jell-O is expected to return to a combination radio-TV network program if the proper personality show can be negotiated. Young & Rubicam, New York, is the agency.

Mohawk Carpets is another national advertiser turning to a saturation TV-radio spot campaign this fall. It will start in mid-September, employing one-minute announcements and chain breaks through Maxon Inc., New York (see NEW BUSINESS, page 18).

In possibly the most unusual move of all, Thyoquent (a skin solution), Binghamton, N. Y., which has used spot television for the past two years in 10 markets, is cancelling its TV schedule and putting a reduced budget into radio, using spots and 10 and 15-minute programs in exactly the same markets it previously reached in TV. Contracts start almost immediately and will run for 13 weeks (see NEW BUSINESS, page 18). Advertiser is clearly attempting to use radio to hold markets already gained from TV. Fred C. Zusi, Clifton, N. J. is the agency.

Packard Considering

On another front, Packard cars, which was one of the major advertisers using a half-hour show on a regional basis last season—*Rebound*—has not renewed the series but is currently considering both radio and television, and is looking into markets and costs. A decision is expected early in July. Maxon Inc. is the agency.

Business signed by the networks, meanwhile, included:

Sterling Drug Inc., effective July 7 will launch sponsorship of *My True Story* on ABC radio (Mon.-Fri., 10-10:25 a.m.). Agency: Dancer-Fitzgerald-Sample, New York.

New TV sponsors on ABC-TV are Frank H. Fleer Corp., Philadelphia, underwriting *Pud's Prize Party* (Sat., 11:30-45 a.m.) starting June 21, and American Chicle Co., which has acquired *A Date With Judy* (Thurs., 8-8:30 p.m.). The agency for Fleer is Lewis & Gilman, Philadelphia, and that for American Chicle, Dancer-Fitzgerald-Sample, New York.

ABC-TV renewals include the Billy Graham Evangelistic Assn. for *Hour of Decision* (Sun., 10-10:15 p.m.) through Walter F. Bennett & Co., Chicago, and Canada Dry ginger ale for its portion of *Super Circus* (Sun., 5-6 p.m.) through J. M. Mathes Inc., New York. In addition General Mills signed for five quarter-hours and five half-hours per week on ABC Radio, effective June 30 (see story page 24).

New programs and sponsors on NBC include RCA Victor's sponsorship of the *Meredith Willson Show* (Sun., 8-8:30 p.m., NBC radio), which already is under way, and *Curtain Call* (Fri., 8-8:30 p.m., NBC-TV), which starts June 20, plus a half-hour version of *Kukla, Fran & Ollie* on NBC-TV on alternate Sunday evenings, starting this fall.

Also on NBC, Pepsi-Cola acquired Tuesday and Thursday quarter-hour segments with *Short Short Story* (7:15-30 p.m.).

NBC-TV also announced that R. J. Reynolds Tobacco Co.'s *Camel News Caravan* will go coast-to-coast starting June 30 when KNBH (TV) Los Angeles, KRON-TV San Francisco and KDYL-TV Salt Lake City join 39 other TV stations carrying the program. Seven southwestern stations will carry the show starting July 1, and KING-TV Seattle may be added July 7. Show has been sponsored by Camel via William Esty & Co. for the past four years.

CBS Radio meanwhile signed Sonotone Corp., Elmsford, N. Y., (Kudner Agency) to underwrite a segment of the Arthur Godfrey morning show [B•T, June 9].

Mutual reported that the deep freeze appliance division of Motor Products Corp., North Chicago, Ill., had signed Gabriel Heatter to a 52-week contract for Thursday night newscasts (7:30 p.m.) starting June 26. Roche, Williams & Cleary, Chicago, is the agency (see NEW BUSINESS, page 18).

RYAN WANTS VALUE

For 'Free Plugs'

THE PROBLEM of the "free plug" and its vast potential for depriving radio and television of legitimate advertising revenue [B•T, June 9] was taken up last week by BAB President William B. Ryan, who recommended that broadcasters permit it only when there is "value received."

At the same time, in recognition of the magnitude of the question, BAB solicited the opinions of broadcasters "on all phases of this problem." (See editorial, page 56.)

The "free plug," which in its more unpalatable forms has aggravated members of the NBC Stations' Planning and Advisory Committee into demanding that NBC-TV take affirmative action [B•T, May 5], is an on-the-air mention of the name of a company, product, service, or person not connected with the company sponsoring the program. In television, where the problem appears to be increasing, display of a brand name or a brand-name product can be an even more effective "plug" than aural mention of the name.

The president of radio's BAB suggested the following as probably the most enlightened policy for a broadcaster to follow with respect to acceptance or rejection of planned plugs:

"When you give a plug, make sure it's given for value received *by the station* or *network* and that it's not a giveaway or plug to an otherwise qualified advertiser or to a promoter or client who is making money on your free time."

In other words: Get an equitable return for each plug, or don't give it.

Mr. Ryan conceded that the "sneak plug" may be slipped in ad lib, with the broadcaster having no opportunity to eliminate it in advance. These plugs, it has been shown, result almost invariably in "gifts" to the persons who slip them in, whether the reward is offered in advance or not.

The BAB chief felt, however, that the big appeal of the reward to the writer, performer, producer, etc., lies not in its monetary value, but in "the idea of getting something for free." More than that, he said, the person "who could afford to buy" is probably the most vulnerable to the attraction of "for free" items. Mr. Ryan explained:

"A special greeting at the door by Pierre and a big dinner for the entire party . . . a big, big box of sweets addressed to Mrs. Writer, Producer, Commentator or Comedian . . . a weekend at Broiling Sulphur Springs . . . a delicious ready-to-eat, melt-in-your-mouth ham . . . a waterproof, drop-on-the-concrete-proof 21-jewel watch — these are the tools of the 'free plugger.'

"If we can inculcate a sense of values and ethics in the people who are tempted by these things, then we will have resolved most of the 'for-free' problems."

He added: "BAB would like to hear broadcasters' opinions on all phases of this problem."

It is a subject, Mr. Ryan asserted, on which BAB received frequent complaints.

Some queries, he reported, deal with a different sort of "plug"—the requests, for example of a great number of industries, individually, for radio stations' observance of a "national" day or week paying tribute to whatever industry is making the request.

Very often, he said, the industries making such requests emphasize pointedly that stations are obligated to do this sort of thing from a purely public service standpoint. BAB's advice, when it's asked for, is for the station to schedule such a "day"—but to sell time in connection with it.

NEW SURVEY SHOWS RADIO'S BIGNESS

LAST Oct 1, BROADCASTING • TELECASTING published a survey which caused wide comment because it proved that more people were listening to the radio in Louisville, a city with two big and energetic television stations, than ever listened before TV came to town. Here's a second survey by the same researcher, Dr. Raymond A. Kemper, professor at the U. of Louisville and head of Raymond A. Kemper Assoc., market research firm. Between June 1951, when the first Kemper study was made, and March 1952, the time of his new one, television ownership in Louisville has increased from 37% to 57%. What has happened to radio in that interval?

- Radio set ownership has increased by .56 sets-per-family.
- Portable sets now constitute 15.8% of all AM sets whereas a year ago the proportion of portables to others was only 4.8%.
- Non-portables added since the first survey have without exception been installed in places where television is not usually found—kitchens, bedrooms, etc.
- In a typical week, some 1,150,100 adult-hours are spent in listening to auto radios in Louisville.

It all adds up to the fact that though radio listening patterns are changing (the audience is moving out of the living room to other places that TV doesn't reach), radio is still big and apparently is getting bigger.

By DR. RAYMOND A. KEMPER

LAST JUNE, when we first researched Louisville's 60-mile-market, we concluded: "More people are listening to radio over more sets in 'Louisville Market' homes and automobiles, than ever before." During March of this year, we went back to a majority of the households in the original cross-section to evaluate changes and trends in the market picture. And, again, we can reach but one conclusion: Louisville radio is BIG, and it seems to be getting even bigger, despite an amazing increase in TV-ownership throughout the market!

For example, when we projected the results obtained in March to the estimated population of 315,000 households in the 60-mile-market, we found. . . .

- There are now approximately *897,750 AM sets* (including, *620,550 non-portable* receivers, *141,750 portable sets* and *135,450 auto-radio sets*) among an estimated *308,000 radio-households* in the market.
- Among these radio-families, there are approximately *1,139,600 people (317,250 are adult men, 415,800 adult women* and *243,300 children between 5 and 18)* potentially available as a listening audience, in their homes and/or in their radio-equipped cars.
- The *126,700 auto-radio families* (some with more than one radio-equipped car and truck) make approximately *4,117,570 separate trips in their family-owned autos* and trucks during a typical 7-day week. And, during the course of these trips (which average some 57.4 minutes, including 'parking') they contribute about *864,700 adult man-hours of listening* to the total radio-listening in the market during a typical week.
- And, all of this is in the face of an increase in TV-ownership from 37% in June, to 55% in March.

There can be little doubt that though the patterns of radio listening are changing, radio, as an effective advertising medium, is solid. And, as the logic of the situation clearly indicates, radio can do nothing but become even more solid.

Here's why: Radio reaches into the hard-to-get-to places and, particularly during the summer months, customers cloister in those hard-to-get-to places. And, in these 'hard-to-get-to' places, radio picks up most of the marbles. The listener cannot lug his TV set with him on a family picnic, nor is he very likely to bring along newspapers or magazines to read. But he can bring along the 'portable'. And he can listen to his auto-radio as he drives along to the rustic retreat. So, if there is anything to this idea of a 'summer hiatus', it certainly doesn't apply to present-day radio. If anything, radio is even more vital in the summer—assuming that broadcasters are programming something worth listening to.

Search for Facts

Our March study was, in one sense, a re-test, designed to evaluate changes in the market. In June of 1951, we personally interviewed adult respondents in a 3,500-household sample representative of the 60-mile-market. In March, we went back to some 2,800 of the households in the original sample—with a mail-questionnaire, this time—and we came up with some very interesting data. This second study was one of a continuing series, and as in June, it was sponsored by WAVE (Louisville's NBC affiliate), not as a 'popularity contest', but as an honestly-designed effort to obtain valid and reliable facts.

First, we selected at random but within spatial and demographic proportions 2,800 households from the "Louisville . 60-Mile-Market" panel used in June, 1951. Each of the sample homes had been measured during the June survey. Mail-questionnaires were sent out—in 14 representatively proportioned 'mailings', between March 9 and March 22—to each household, and (following a series of seven 'follow-up' mailings to non-respondents) by April 6 some 1,044 usable questionnaires had been returned us, for a percentage of 37.3%. This relatively high return, no doubt, was due to the unique premium offered respondents.

For each questionnaire returned to us in a usable condition prior to a set time-limit, we offered to pay 25 cents to a medical charity of the respondent's own choice. The questionnaires were pre-coded to allow for the identification of respondent-households and of non-respondents. They were sent out via first class mail, in order that we might obtain some idea of how many panel members had changed their places of residence during the nine-month period.

Comparable Samples

We were particularly gratified by another aspect of the 'return'. The original 2,800-household 'mail sample' had been carefully proportioned (spatially and by city-town-farm distribution) to represent the best available estimates of population parameters (*e.g.*, 1951 Estimates, *Consumer Markets*). The sample of returned questionnaires (see Table I, page 92) was essentially similar to the original sample, in terms of spatial and city-town-farm distribution. On the basis of this similarity, coupled with the similarity between the two samples in respect to demographic data, we may reasonably assume that the cross-section is essentially representative of the 315,000-household population of the 60-mile-market.

When we compared the "average number of AM sets-per-family" statistics, for June (1951) and March (1952), we found:

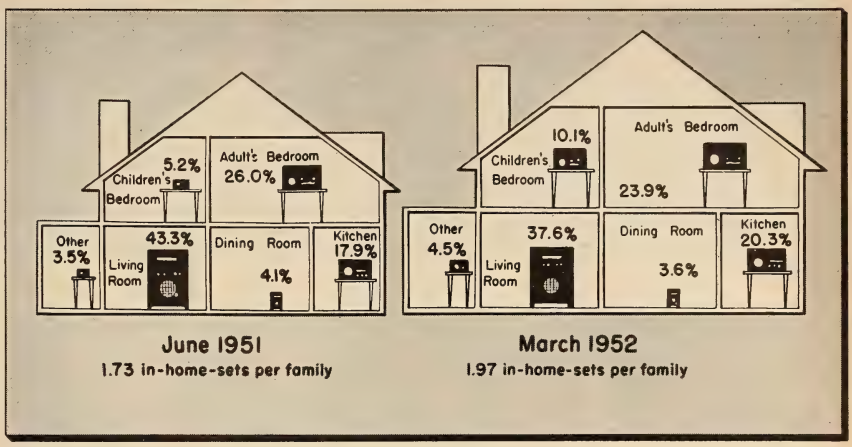
- There has been an overall increase of 0.56 sets-per-family, during the interim period.
- Portable sets now constitute a larger portion of the total (15.8% of all AM sets), than they did in June (4.8% of all AM sets).
- Newly added (non-portable) in-the-home receivers have been placed, without exception, in rooms and other places where televiewing is highly improbable . . . kitchens, bedrooms, utility rooms, barns, etc.

Where, in June of 1951 the 1,044 households had averaged 2.29 AM sets-per-family, they now average 2.85 AM sets-per-family.

	'Average Sets-Per-Family' in: June (1951)	March (1952)
In-The-Home (non-portable) Sets	1.73	1.97
Portable AM Sets	0.11	0.45
Auto-Radio Sets	0.45	0.43
Total AM Receivers	2.29	2.85

And, portable sets have contributed a disproportionate share (0.34 sets-per-family) to this total 0.56 sets-per-family increase. Where in June 1951 portables made up only 4.8% of the AM sets owned by the sample households, they now constitute 15.8% of all AM sets in the cross-section (See chart II, next page.)

When we asked, as we had in June, where AM sets were placed in and about the home, we discovered that all newly-added (non-portable) in-the-home sets have been placed, without exception, in rooms and places that are virtually inaccessible to TV. (See chart I, next page.)



Just as in June, we continued our attempts, in this March study, to help design some new approach

Dr. KEMPER

CHART I—RADIO SETS AND LISTENERS ARE MOVING AWAY FROM TV RECEIVER SITES

The number of sets in the home is growing, but the newly added sets are being placed in rooms where television is seldom if ever found. Note in chart at right how the percentage of sets in kitchens, children's bedrooms and "other" places such as utility rooms, work rooms, bathrooms, etc. has been rising. Meanwhile, the percentage of radios in living rooms, where most TV viewing takes place, has declined from 43.3% in June, 1951, to 37.6% in March, 1952.

to the traditional research methodology, something by means of which we might obtain some equitable, valid and reliable measurement of radio's circulation.

For some time, we have been of the opinion that radio's reputation has been most hurt by its supposed friends, the 'program raters'. In a talk before District 7, NARTB (Nov. 9, 1951), we attempted to point-out the obvious fact that . . . "Ratings are rotten research". And, for two major reasons:

(1) *Because of sampling limitations, or precision-of-measurement limitations, or both, none of the "program rating" methods in present use can possibly provide a true and reliable picture of radio's circulation.* No "ratings" (except, perhaps, the infamous "diary" methods), in present use, include listening reports from non-urban areas, and, in most markets, it is in just these farm and rural nonfarm areas that TV has made its least serious inroads. Most "ratings" (again excepting "diaries") do not include listening involving secondary-sets (tertiary, quaternary, etc.) in-the-home but in places removed, barns, garages, utility rooms, etc. And, no rating system now in use can possibly include adequate and reliable measurement of listening that takes place in automobiles.

Radio Short-Changed

(2) And, secondly, because they place the broadcaster on a different and distinctly unfair 'medium measurement' basis, because they require the broadcaster to justify his circulation on one criterion, while his competition, the publishers and display people, are able to justify their circulation on a dissimilar and much less stringent basis, "program ratings" are the very determinants of radio's sickly reputation.

Just as we did in the June study, we continued in this March study to design and (we hope) make more precise and usable a research methodology which may eventually lead to the really valid and reliable measurement of radio's true effectiveness as an advertising medium.

In June, as some of you will recall, we accomplished two things: (1) We measured radio's circulation on the basis of the same criterion used by the publishers and the display people (volume of 'unit circulation'), and we found that radio led the pack; (2) We measured newspapers and magazines on the basis of the same criterion now used to measure radio's circulation ("readership" of specific items), and, again, radio led the rest!

Double Standard Bad

Having—in our own opinion, at least—clearly indicated that the present "double standard" for media measurement is inequitable, and that it consistently and systematically acts to the detriment of the broadcaster, we were ready to look for some sound path out of the methodological morass in which radio research now finds itself.

In addition to bringing our "radio set distribution and placement" data up to date, we attempted to accomplish two new measurements in this March study:

(1) We obtained information about the number of people available (that is, "in the home, and awake") to radio, hour-by-hour throughout the broadcast day.

(2) We attempted to obtain a valid and reasonably usable evaluation of the nature and extent of the auto-radio listening in the market.

To bring out the information for the first of these, we asked the following questions in series:

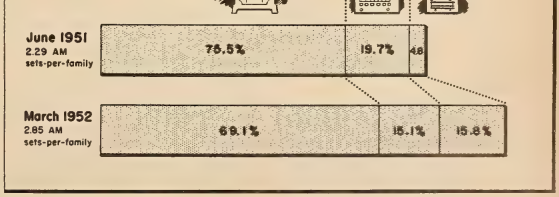
Including yourself, how many people are there in your regular household? (The respondent was required to classify the regular members of the household in these categories: adult men, adult women, children to 5 years, children between 5 and 9 years, children between 10 and 14 years and children between 15 and 18 years.)

The results obtained with this question, in terms of the "typical market household," are summarized as follows (figures in parentheses are projections of the statistics to an estimated population of 315,00 households in the 60-Mile Market):

There were 1.03 adult men per household (324,450); 1.35 adult women per household (425,250); 0.53 children to 5 years of age per family (166,950); 0.35 children 5-9 years per family (110,-250); 0.29 children 10-14 years per family (91,350), and 0.15 children 15-18 years per family (47,250).

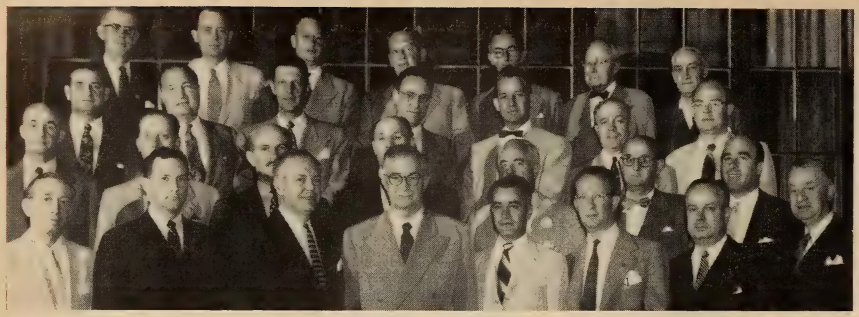
Having determined the size and the composition of a sample household, we followed with this question:

In terms of what happened YESTERDAY, how many of these regular members of your household were IN THE HOME during each of the one-hour periods listed below?



DIRECTIONS: If no one was at home during any particular period, write the word "none" across the row representing that period. If some member of the family was at home for all, or more than half, of a one-hour period, you should record it by writing-in the number of men, women and children in the spaces of the row representing that period. PLEASE record something FOR EACH OF THE ONE-HOUR PERIODS IN the list!

If any or all of the members of the family were asleep during any of the time-periods, please CIRCLE the number(s) in that interval that were asleep.



In Table II, page 92, we have indicated the "average number of household members, in the home and awake, per market family," hour-by-hour, for a "typical weekday," a "typical Saturday" and a "typical Sunday." The subsample mailings were spaced over a con-

(Continued on page 92)

CHART II—PROPORTION OF PORTABLE SETS IS GROWING

There are more sets per family now than in June, 1951, and more of the sets are portables. Above chart shows how total sets-per-family have increased and how proportions of non-portable, portable and auto sets have changed.

ALL members of NARTB Radio Board attended Thursday meeting in Washington, many for their first sessions as directors. Present were (front row, l to r): Jack Todd, KAKE Wichita; Henry B. Clay, KWKH Shreveport, La.; Harold E. Fellows, NARTB president; Judge Justin Miller, NARTB board chairman; Michael R. Hanna, WHCU-FM Ithaca, N. Y.; Leonard Kapner, WCAE Pittsburgh; E. K. Hartenbower, KCMO Kansas City; Harry W. Linder, KWLM Willmar, Minn.

Second row: Thad Holt, WAPI Birmingham; John H. DeWitt Jr., WSM Nashville; H Quenton Cox, KGW Portland, Ore.; Glenn Shaw, KLX Oakland; Robert T. Mason, WMRN Marion, Ohio; Lee W. Jacobs, KBKR Baker, Ore.; Ben Strouse, WWDC-FM Washington.

Third row: Kenyon Brown, KWFT Wichita Falls, Tex.; Paul W. Morency, WTIC Hartford; A. D. Willard Jr., WGAC Augusta, Ga.; William H. Fineshriber Jr., MBS; Albert D. Johnson, KOY Phoenix, Ariz.; E. R. Vadeboncoeur, WSYR Syracuse; Hugh B. Terry, KLZ Denver.

Fourth row: Harold Essex, WSJS Winston-Salem, N. C.; Stanley R. Pratt, WSOO Sault Ste. Marie, Mich.; William C. Grove, KFBC Cheyenne, Wyo.; Merrill Lindsay, WSOY Decatur, Ill.; William B. McGrath, WHDH Boston; C. E. Arney Jr., NARTB secretary-treasurer; Edgar Kobak, WTWA Thomson, Ga.

CENSORSHIP FIGHT

Voted by NARTB Board

By J. FRANK BEATTY

NARTB will meet head-on all efforts of Congress and the FCC to censor programs, suppress the right to cover public events or destroy property rights.

The two NARTB directorates—Radio Board and Television Board—decided last week to fight such crippling proposals as bans on news coverage of House and Senate sessions or censorship of programs. They decided, too, to ask FCC to reverse its recent order putting stations and networks in regulatory irons if they don't allow program rebroadcasts by other stations (see rebroadcast story page 49).

The Radio Board held a long one-day session Thursday at the Mayflower Hotel, Washington, completing the business at one sitting though a two-day agenda had been scheduled. TV directors met Monday-Tuesday at The Homestead, Hot Springs, Va. (see separate story page 36).

Both boards lauded President Harold E. Fellows and the association staff for their opposition to the resolution (S. Res. 319) introduced in the Senate by Sen. Patrick A. McCarran (D-Nev.), proposing to amend Senate rules. The plan would prevent direct or delayed radio or television coverage of Senate floor or committee proceedings [B•T, May 26].

The boards heard a legislative report on the status of the Gathings resolution (H. Res. 278) calling for an investigation of radio and TV programming. Hearings were started in early June by a special House subcommittee [B•T, June 9], under chairmanship of Rep. Oren Harris (D-Ark.). President Fellows and John E. Fetzer, owner-operator of the Fetzer radio-TV stations, are scheduled to appear before the Harris subcommittee late this month.

Ralph W. Hardy, NARTB government relations director, told the Radio Board Thursday that more than 80 pieces of legislation affecting the broadcast field are pending in Congress. He said much of the legislation is of a restrictive nature and even enters the sphere of censorship.

The Radio Board adopted a resolution endorsing the Advertising Research Foundation plan to set up an industry yardstick of audience measurement. A research resolution had been sidetracked at the NARTB Chicago convention and referred to the board.

The original resolution had pointed to the need for accurate information on audience and station circulation in an increasingly competitive advertising sales market.

Earlier in the week the TV Board had tabled a proposal to allocate $10,000 for a measurement study by ARF, cooperatively representing media, advertisers and agencies, pending receipt of a report from Edgar Kobak, WTWA Thomson, Ga., ARF president. Broadcast Advertising Bureau has granted ARF $15,000 for the study.

A fiscal year budget totaling around $567,000 was approved. This is about $30,000 over the tentative budget approved on a three-month basis at the board's February meeting. The budget report was submitted by Harold Essex, WSJS Winston-Salem, N. C., chairman of the Finance Committee, which met Wednesday.

Application of 89 radio and 30 television stations under the combination dues plan were approved. This plan provides discounts for commonly owned station if all are in membership. Enjoyment of retroactive discounts to last April 1 will be granted on applications received up to Aug. 31 deadline.

Michael R. Hanna, WHCU Ithaca, N. Y., reported on progress of the effort to obtain easing of the antiquated FCC transcription rule. He heads a committee that has been in touch with FCC. The group asks elimination of many of the transcription identifications in line with progress of the art.

William C. Grove, KFBC Cheyenne, Wyo., and Bernard Koteen, attorney, reported on the petition of the association for relaxed engineering rules governing radio operators and remotely controlled transmitters.

A problem of growing industry importance—multiplicity of meetings—will be studied by a special committee. Industry groups holding series of meetings all over the nation include NARTB, Broadcast Advertising Bureau, Broadcast Music Inc., Associated Press and others.

The committee is to propose ways of cutting down time and travel costs entailed in attendance at various types of broadcast industry meetings.

Richard P. Doherty, NARTB employe-employer relations director, reported on his activity as a delegate to the International Labor Organization conference held in Geneva recently.

The Radio Board voted to join, and contribute financially, to American Council on Education for Journalism, which accredits journalism curricula in college.

Ben Strouse, WWDC Washington, chairman of NARTB's FM Committee and an FM director, reported on the FM Promotion Plan conducted jointly with Radio-Television Mfrs. Assn. (see FM story page 59). Mr. Strouse reported on behalf of J. H. Smith Jr., NARTB FM Dept. director.

INDUSTRY 'MORALS' REPLY

Set June 25

SPOKESMEN for radio and TV broadcasters will face a congressional subcommittee June 25 and 26 to answer allegations that broadcast programs are "immoral" and offensive to the American public, it was announced last week.

Bulk of the testimony, to be presented to Rep. Oren Harris (D-Ark.) and other members of the House Interstate and Foreign Commerce subcommittee probing programs, will be given by NARTB officials. Also scheduled to appear will be CBS and NBC representatives.

NARTB witnesses scheduled are understood to include Harold E. Fellows, president; Thad Brown, TV director, and Ralph Hardy, government relations director. Leading off will be Michigan radio-TV station owner John E. Fetzer, chairman of the NARTB Television Code Review Board.

Also due to be heard, but not yet scheduled, are the FCC spokesmen. It is understood the Brewers' Foundation also has asked for a chance to appear.

In the three-day hearing two weeks ago, the Harris subcommittee heard a score of witnesses, the majority of whom decried beer and wine commercials and drinking scenes in programs on radio and TV [B•T, June 9].

Other witnesses, including Rep. E. C. Gathings (D-Ark.) who sponsored the resolution authorizing the investigation, objected to what they called "indecent" and "horror" programs. Among objectors was Paul Harvey, ABC news commentator.

Opening sessions of the hearing heard Rep. Gathings use turn-of-the-century phraseology to describe a dance act he witnessed on TV. The words he used were "hootchy-cootchy" and "shimmy."

Rep. Gathings is to be named this week as chairman of a select subcommittee to investigate "filthy" books and pictures. In his original resolution, the Arkansas lawmaker asked for a select committee to investigate the moral level of all media—books, pictures, radio and TV. At the insistence of the House

(Continued on page 52)

POLITICS ON RADIO-TV

Pre-Convention Action Warms Up

WHILE RADIO and television edged ahead with intricate plans for coverage of the national political conventions next month, the politicians last week evidenced—in one case by a challenge to the legality of commercial sponsorship—further mounting faith in the broadcast media as instruments to influence voters.

The Progressive Party, wanting more detailed coverage of its own convention, served notice late Thursday that it would take action charging "four major radio-TV networks" with discrimination and also challenging their right to sell their coverage to sponsors.

TV Will Sway Votes

There were other evidences of superlative political belief that sight-and-sound reporting, especially with television operating nation-wide, will sway votes this summer and fall as votes have not been swayed before (see editorial, page 56). For instance, there were:

● The prompt and vigorous demands of both Sens. Robert A. Taft (R-Ohio) and Estes Kefauver (D-Tenn.) for network time equivalent to that provided Gen. Dwight D. Eisenhower in his Abilene speech [B•T, June 9]—demands that paid off last week, at least in part, for both men.

● The demands by Eisenhower backers who, incensed by what they considered a Taft "steal" of delegates in Texas and other southern states, insisted that the proceeding of the Republican Convention Credentials Committee's session on delegate contests be opened to both radio and TV so that as many voters as possible might hear and see.

● The radio plan unveiled Thursday by Democratic Candidate W. Averell Harriman to expand his "personal" appearances through exclusive transcribed "interviews" in which he would answer, on tape, questions sent him, also on tape, by local station newsmen in some 100 cities to which the offer was extended.

● Vice President Alben W. Barkley's tribute to TV in a letter in which he told Nathan Lord, general manager of WAVE-TV Louisville, that television will "play a larger part in the campaign this year than ever before. . . . Therefore, it is important that the Democratic Party be in a position to take advantage of this new means of publicity and information since many people would be governed by the appearance and manner of the candidates."

Berryman in Washington *Evening Star*

● Democratic Candidate Kefauver's expressed view that television may eliminate decision-making in smoke-filled rooms: "By bringing the conventions into millions of homes it will help to bring politics out into the open. . . . Television will help produce open political decisions openly arrived at. In doing this it will merit the grateful thanks of all people."

The *New York Times* also lauded the value of television in politics. In its editorial, "TV as a Political Force", the *Times* said:

The TV audience is now nationwide for the first time in a national campaign, and the camera is also newly ubiquitous. Television will watch the political conventions in Chicago. It will examine the spellbinders. It makes a goldfish bowl out of every rostrum. It applies the litmus test to shenanigans, phonies and plain bores. It separates the men from the boys. . . . It is one thing for a candidate to mount the platform and read a speech, which he himself may or may not have written. It is another thing for him to face a roomful of newspaper men and submit to informed critical questioning. In no respect has television made a greater contribution of public service, perhaps, than in putting a press conference on the air. The public is able at first-hand to measure the forthrightness, the courage or the evasiveness of a candidate. It watches while the subject speaks on topics he might prefer to avoid. It catches all the hesitations and the nuances.

The Progressive Party's "Legal Actions" were to be filed with FCC and Attorney General James McGranery and were to be announced at a news conference Friday afternoon, according to notices distributed to newsmen late Thursday.

Progressive Party Secretary and Campaign Manager C. B. Baldwin, who sent out the invitations to the Friday news conference, said the complaints would charge the networks with discrimination "in virtually blanking out the Progressive Party Convention in Chicago July 4, 5 and 6 while devoting up to 96 hours each to the two major parties." The GOP Convention gets under way in Chicago July 7 and the Democratic Convention opens there July 21.

In his invitation, Mr. Baldwin also said "the right of the networks to solicit and contract for commercial sponsorship of political campaign coverage, involving such costs as $1.5 million for convention coverage by one network alone, now subsidized by existing contracts with large commercial sponsors will be legally challenged in these actions."

He said the news conference would be conducted by himself and David Rein, Washington attorney who, he reported, will handle the case before FCC and the Justice Dept.

Win Partial Victories

In the Taft-Kefauver joust with the networks via FCC in an effort to secure broadcast time similar to coverage of the Eisenhower Abilene speech, both candidates had won partial victories late last week. NBC radio, NBC-TV and CBS-TV offered Sen. Taft (who accepted) a 7-7:30 p.m. spot on Thursday, while both radio and television networks of NBC offered Sen. Kefauver an evening half-hour for July 1 and CBS Radio and CBS-TV on Thursday offered him a half hour at a time to be mutually worked out.

Following receipt of the offer

(Continued on page 68)

McFARLAND BILL

Derailment Is Thwarted

FATE of the McFarland Bill (S 658) gyrated wildly last week when it was displaced on the House floor calendar on Tuesday ostensibly to permit debate on the $2 billion military construction bill. On Thursday, it was reported that the measure, heavily opposed by the FCC, would be rescheduled for House action tomorrow (June 17).

Mysterious goings-on which saw the bill yanked from the House "program" in what is understood to have been White House pressure, so nettled sponsor Sen. Ernest W. McFarland (D-Ariz.) and other interested legislators that an offensive was immediately launched to ensure consideration of the measure before Congress adjourns—aimed for first week in July.

Sen. McFarland, who is also Senate Majority Leader, conferred with Presidential Special Counsel Charles S. Murphy, House Majority Leader John W. McCormack (D-Mass.), House Majority Whip J. Percy Priest (D-Tenn.) and Rep. Oren Harris (D-Ark.), communications subcommittee chairman of the House Interstate & Foreign Commerce Committee, who is responsible for the bill on the floor.

Differences were "adjusted" and a pledge to reschedule the bill was given to the Arizona Senator.

What prompted the attempt to sidetrack the bill could not be learned at first hand. Consensus of Capitol Hill observers was that the FCC "reached" the White House with its objections. The White House, through Mr. Murphy, then is believed to have requested Rep. McCormack to withdraw the bill from the House schedule.

Major FCC objections were to the provisions (1) separating staff and Commissioners, (2) requiring that a 30-day notice be given before it could set an application for a hearing or grant it without a hearing, and (3) forbidding it to discriminate against newspaper applicants [B•T, May 12, 5].

Protection Against Libel

Fact that it was revealed that "adjustments" will be made—presumably by amendments from the floor—seem to indicate that some of these provisions may be revised or eliminated altogether.

It was also learned that among other amendments expected to be offered by Congressmen is one designed to protect stations against the dangers of libel suits for remarks made over the air by candidates.

According to Section 315 of the Communications Act, stations are not permitted to censor speeches by political candidates—but there is no protection for the station against libel suits.

Pending in Congress is a bill (HR 7062) by Rep. Walt Horan (R-Wash.) which would safeguard broadcasters from libel uttered over their stations by political candidates [B•T, March 17]. Also pending is a bill with similar provisions (HR 7756) by Rep. Pat Sutton (D-Tenn.). A bill (HR 7782), permitting stations to censor libelous and defamatory matter from candidates' speeches, was introduced last month by Rep. Joseph H. O'Hara (R-Minn.). On the Senate side, Sen. Edwin C. Johnson (D-Col.), chairman of the Senate Interstate & Foreign Commerce Committee, which handles radio-TV matters, submitted a bill (S 2539) which would require that candidates post a bond to protect the station from libel actions.

Bound to be heard, it appears, will be angry Congressmen's complaints about rates charged them in political campaign years. The fact that most stations charge candidates national rates, instead of local charges, has aroused the ire of many legislators.

Efforts are being made to ascertain who was responsible for the privately-admitted "terrible mistake" in withdrawing the McFarland Bill from the House floor calendar. Proponents of the bill were struck by the action of the White House in interceding in the matter before the more normal procedure of expressing the President's displeasure by a veto. In the course of his check into the reasons for the displacement of his bill, Sen. McFarland reportedly

(Continued on page 69)

AFA UPHOLDS

Advertisers' Right to Defend

THE RIGHT of American industry to use advertising to defend itself against "hostile acts or assertions" of government officials was upheld in a vigorously-worded resolution adopted by the 48th annual convention of the Advertising Federation of America last week in New York (also see story, page 74).

Another AFA resolution reaffirmed the organization's "approval and support of voluntary measures taken by media, agencies, trade associations and business leaders in maintaining the highest standards of truth, helpfulness and conduct in all advertising functions and practices" and called on the AFA board to establish a committee to create "a pattern and plan" whereby the principles of good advertising "may be implemented and continued."

Robert M. Gray, advertising and sales promotion manager of Esso Standard Oil Co., New York, and general chairman of the AFA convention, was elected AFA board chairman; Rita Eastman, public relations director of Van Sant, Dugdale & Co., Baltimore, was elected secretary, and Ben R. Donaldson, advertising and sales promotion director of Ford Motor Co., Dearborn, Mich., was re-elected treasurer by the AFA board of directors.

Elected to Board

The AFA membership, at a Tuesday business meeting, elected to the board of directors: Martin Lundy, national retail sales promotion and advertising manager, Sears, Roebuck & Co., Chicago; Frederic Schneller, vice president, D'Arcy Adv. Co., St. Louis, and Graham Patterson, publisher, *Farm Journal* and *Pathfinder*, Chicago, previously AFA board chairman.

Re-elected to the board were: Vernon Brooks, associate business manager, *New York World Telegram & Sun;* Fairfax M. Cone, president, Foote, Cone & Belding, Chicago; Henry G. Little, executive vice president, Campbell-Ewald Co., Detroit; George S. McMillan, vice president, Bristol-Myers Co., New York, and Ralph Smith, vice president, Sullivan, Stauffer, Colwell & Bayles, New York.

The Council on Advertising Clubs on Tuesday elected as chairman, Franklin R. Hawkins, Libby-Owens-Ford Glass Co., Toledo, and as vice chairmen: Dale Rogers, advertising manager, Mid-Continent Petroleum Corp., Tulsa, and James Spillan, Benjamin Eshleman Co., Philadelphia. Mrs. Mabel Obenchain, Midwest advertising and promotion manager, Famous Features Syndicate, Chicago, was elected chairman of the Council on Women's Advertising Clubs. By virtue of these offices, these four become AFA vice presidents.

AFA Resolution

The AFA resolution declared that "freedom of advertising is as necessary to the preservation of our democratic system as is freedom of all other avenues of information and education" and that "advertising of a factual nature, published in good faith and with proper identification by any American business or industry desiring to present its case before the bar of public opinion, is vital to preserve our American heritage and the freedom of speech and press guaranteed under the Constitution." The resolution noted that "certain spokesmen of the federal government, including the President of the United States, have questioned the right of American business and industries to defend themselves against hostile acts or assertions of those in positions of power, through advertising or other established means of communication."

Calling this type of advertising "not only proper but necessary in the conduct of American business," the AFA resolution protests "the criticism and implied denial of the rights of American business and industry to present facts and opinions to the public through advertising and other appropriate channels." It further urges "the vigorous support of all those engaged in the business of advertising including media, agencies and management, to defend the right stated herein; and in pursuance thereof, that each member of AFA and its member clubs petition their representatives in the U. S. Congress to use every remedy at their command to defeat any effort whatsoever to curtail or restrain the legitimate use of advertising by any American citizen, business or industry."

ECONOMICS OF CBS

Alexander to Make Study

IN a move calculated to bolster long-range planning for its radio and television networks, CBS last week named Sidney S. Alexander, chief of the general analysis section of President Truman's Materials Policy Commission, as its economic adviser, a new post. Mr. Alexander's first assignment, it was understood, will be to make an economic study of what is generally regarded as CBS No. 1 priority problem — the network radio situation, which already has reached the point where another round of rate cuts by all networks is generally expected (also see story page 23).

Mr. Alexander

He joined CBS last Wednesday, which leaves him relatively little time to make an exhaustive radio appraisal in advance of the July 2 "crisis conference" of top CBS Radio officials with representatives of stations affiliated with the CBS Radio Network [B•T, June 2, 9].

This meeting, called by George B. Storer of Storer Broadcasting Co. and eight executives of other CBS Radio affiliates, will be preceded by a July 1 session in which the affiliates will meet privately, before the network executives are called in.

The sessions, to be held in New York, were set up by the affiliates in consultation with network executives and their stated pupose is to consider "the current network radio situation," which to most observers means the imminence of further, perhaps substantial cuts in network rates, at least for nighttime hours.

CBS Board Chairman William S. Paley, CBS President Frank Stanton and CBS Radio President Adrian Murphy have agreed to participate in the July 2 conference with the affiliates, more than 100 of whom have indicated they will be represented. Mr. Stanton is abbreviating a European vacation in order to be on hand.

No Specific Assignments

The formal announcement of Mr. Alexander's appointment as CBS economic adviser, issued by President Stanton, did not delineate specific assignments for him.

"Through the preparation of special economic studies," President Stanton said, "Mr. Alexander will serve to further strengthen CBS' long-range business planning program."

Spokesmen reported, however, that his job will be to make radio and television business studies similar to self-analyses which companies in other fields conduct regularly as an aid to sound planning for the future.

In his post with the President's Materials Policy Commission, Mr. Alexander has been working most recently with CBS Chairman Paley, who heads the Materials Policy Commission but who now, for all general purposes, is back at CBS on a fulltime basis. All that remains of his governmental assignment is completion and presentation of the Commission's report—which is expected to prove a newsworthy document — to the President.

Mr. Alexander joined the materials policy commission in April. Before that time he had served since 1949 with the International Monetary Fund, where he reached the post of acting chief of the research department's finance division.

Prior to his entrance into the government service, he was an assistant professor of economics at Harvard U. and a lecturerer on economic problems of Occupied Germany in the Staff Officers Training Program at Columbia U. In addition, he conducted several years of research on the financial structure of American corporations for the National Bureau of Economic Research.

During World War II, he headed economic research on Europe for the Office of Strategic Services, holding the rank of first lieutenant in the Army. He also has served as economic consultant to the Office of Secretary of Defense, the Rand Corp., the Economic Cooperation Administration, the State Dept., and the Treasury Dept.

More Samples from the WHO Mailbag

Gentlemen:

I want to express my thanks and appreciation for the last several years of public service that you have given to the general public and also to motoring public in general.

Many times in the past, your news as to the weather and complete road conditions has altered our course of highway travel. My only hope is that in the near future, other states might follow in your path to help in so complete a safety measure. Regular weather reports given out by most stations are not enough to be of much help when over the road truck traffic is depending on positive conditions. You will probably never hear of it, but your station has saved the Trucking Industry many thousands of dollars by its road conditions report.

I, for one, was delayed in a nearby state for two days because of icy highways. Before starting I had tried to contact local police and newspapers for weather conditions and with little success. The report was, colder. I could not reach WHO as we were too far away. If I could have reached your station, I could have altered my route and would not have had any additional mileage. I also made a trip into the snow area of South Dakota last winter on the strength of your station's weather report.

There are more motorists who depend on WHO for their news and road conditions than from any other source. I, for one, am very grateful for having an Iowa station that is interested in the safety of its motoring public.

J. E. McCULLOUGH
McCullough Transfer Co.
Mt. Pleasant, Iowa

Dear Mr. Woods:

Your courtesy in making it possible for some movie scenes to be taken in the WHO studio was greatly appreciated. It was a joy to work with you and members of your staff who cooperated so fine in making arrangements for this filming as well as participating in it.

When the first contact was made with you it was not our intention to spend so much time in your studio. However, it did mean a great deal to the folks from the International Film Foundation as well as for the other participants to be able to take the other sequence of the class also in the studio.

Thanks so much for your help and if we may ever be of assistance to you do not hesitate to call on the Extension Service.

Sincerely yours,
LOUISE M. ROSENFELD
Assistant Director
Cooperative Extension Work
State of Iowa

Gentlemen:

I wish to extend to you the thanks of our community for your announcements for our school and also for the Lions Club. It is a wonderful service. Your coverage is nearly 100% here.

We heard you say how many announcements you made in those few days. Would you mind sending me that number?

Thanks so much.

Yours,
L. R. WELKER
Pres., Murray School Board,
and also Lions Club Member
Murray, Iowa

Dear Sir:

Thank you very much for your wonderful cooperation in scheduling our spot announcements.

It is only through such a program that we can hope to compile the statistics necessary to carry on our work—to find the cause and cure of multiple sclerosis.

Your valued assistance in helping us achieve our aim is sincerely appreciated.

Cordially,
CORNELIUS H. TRAEGER, M.D.
Medical Director
National Multiple Sclerosis Society
New York, N.Y.

Dear Mr. Woods:

We want to thank WHO for the fine cooperation in presenting the Quiz Kids program on Saturday, March 11. We have heard many excellent comments about this program. We hope that it measured up to your professional standards.

The children seemed to enjoy themselves and we felt that they were remarkably poised. All the WHO personnel with whom we worked were most cooperative.

Thank you again for the opportunity that you gave us to show our interest in handicapped children and to demonstrate their ability.

Yours sincerely,
MRS. DOROTHY PHILLIPS
Executive Director
Society for Crippled Children
and Adults, Inc.
Des Moines, Iowa

Gentlemen:

I greatly appreciate your broadcasting the program "The New Frontier." Such programs should be an important factor in the effort to eliminate prejudice. I hope that they may continue.

Yours sincerely,
ERMA X. ANDERSON
Des Moines, Iowa

Topnotch time buyers have told us their work sometimes makes them too "statistical"—sometimes makes them forget that what they're really trying to buy is listeners—confidence—*friends.*

Out here at WHO, we've created millions of friends who know we have earned their confidence. Our mailbags prove it. So do our advertisers' *sales records,* month after month and year after year. . . .

STERLING DEFENDS

FCC Allocation Plan

STRONG DEFENSE of the FCC's television allocation plan was made last Friday by FCC Comr. George E. Sterling in an address to the Maryland-District of Columbia Radio & TV Broadcasters Assn.

Mr. Sterling struck out at critics of the FCC's Sixth Report and Order, saying that their motives were to get more VHF channels into big cities, at the expense of service to smaller communities.

"One of the basic duties of the Commission in establishing the television broadcasting service," he said, "was to make television service available to *all* the people. A recognition of this important duty was one of the prime considerations which impelled the Commission to establish a Table of Television Assignments rather than permit individual applicants to pick any channel they wished for use in any community."

In what was interpreted as a rebuttal to statements of Comr. Robert Jones, who dissented from the majority decision on TV assignments, Comr. Sterling said:

"If we had permitted the assignment of stations on the hit and miss basis of fortuitous applications filed by persons interested solely in the coverage possibilities of their own particular community, we would undoubtedly not have met our obligation to make the best use of our spectrum."

He defended the mileage separations prescribed in the Sixth Report as intended "to insure that the outlying areas receive a high quality picture." To attain the same objective, he said, the FCC had provided for greater antenna heights and higher radiated powers which "are needed so that the stations may make effective use of the potential service that can be rendered by virtue of wide separations."

As to criticisms that mileage separations in the VHF assignments are too wide, Mr. Sterling said:

"As a matter of fact, unless we reduce separations substantially, the number of additional assignments that we would pick up by reduced separations would be few. And if we did take such action, we would be employing separations below those necessary to insure interference-free service. We would be right back in the ice age, flirting with another 'freeze.'

"The memory of some men is, indeed, short."

Despite other arguments advanced by critics, said Mr. Sterling, "when all the smoke clears away, the obvious reason why our critics are urging narrower separations is to get that additional VHF channel into the larger cities."

He said that the FCC recognized that economic facts of life dictated that "television would start in the larger cities most able to support this new expensive medium of communication.

"It is only if the Commission chooses to disregard the interests of the smaller cities and those residing in outlying areas that it can at this time, on the basis of the engineering facts it now possesses, reduce the mileage separations in order to permit additional assignments in larger cities."

WHOL RE-GRANT

Move Proposed by FCC

PROPOSAL to re-grant WHOL Allentown the construction permit for a new station on 1230 kc with 250 w, fulltime in that city—made five years ago—was contained in an initial decision by FCC Hearing Examiner Elizabeth C. Smith last week.

Hearings were reopened when the U. S. Court of Appeals in 1949 remanded the case back to the FCC on the ground that its 1949 decision did not take into account the relative needs of Allentown and Easton, Pa., for new service and the relative abilities of the two applicants to serve the greater need.

The other applicant in the case is the Easton Publishing Co. *(Easton Express)* which operates WEEX (FM).

Miss Smith found that the record "clearly shows" a greater need for additional radio service in Allentown than in Easton. She also placed greater reliance on the WHOL record than that of the Easton applicant.

"The Allentown applicant proposes a program service which is geared to the needs and interests of the community it would serve and includes many local programs not otherwise available to the community," Miss Smith ruled, "as well as the network programs of the Columbia Broadcasting System which, too, are not otherwise available to the city of Allentown and several other nearby cities which would receive service."

The examiner declared that she was unsure of Easton's program proposals, since the applicant was not certain whether it would affiliate with a network or not. She also complained of the "evasiveness" of some of the Easton witnesses. She mentioned that the *Easton Express* had not carried the program logs of WEST Easton, but did those of its own WEEX (FM).

Initial decision also revealed that WHOL, which began operating late in 1948, lost $15,223.64 in 1948, $22,012.86 in 1949, made a small profit of $2,548 in 1950 and an estimated profit of $90,000 in 1951.

Between the first grant and the new hearing, the ownership of WHOL changed hands. WHOL is now controlled by Victor C. Diehm and associates. Mr. Diehm is general manager and 25% owner of WAZL-AM-FM Hazleton, Pa.

Radio Needs Muscle . . . . . *By Blayne Butcher*

MANY of us who grew with the radio business, and who are now also engaged in TV, still have a warm spot in our hearts for the old boy, even though he did grow fat and sluggish in the immediate pre-TV era. After all, radio failings were common human failings—not too much work had to be done to produce a good living—and the fat built up in rolls.

But radio's physique is basically strong, and now that some of the fat has to be worked off in the battle for survival against this brash TV youngster, let's assess the prospects.

First off—radio will always be audio only, or it ceases to be radio. So how interesting can we make that audio? And here is where radio has been given a second chance that comes to few who have been victims of easy living. For now radio has the best chance of its life to develop as it began, as a service to its own community. Freed of network domination by nighttime commercials, and certainly in a more commanding position so far as the daily schedule is concerned, radio stations have the opportunity of developing tune-in, by the broadcasts of more events that directly concern their own community — they have the opportunity of more local spot news broadcasts—they have the wonderful opportunity of again working with the people and things that make up their immediate sphere of activity.

If broadcasters can no longer get all of the people all of the time, they can attempt to get all of the people some of the time, and in these days of plenty of car and portable radios and multi-set homes, they will maintain a sizeable audience worthy of advertising attention. They can try to interest the eyeweary TV viewer, who is perhaps tired of being glued to his screen, and who might like some freedom of movement around the house, without sacrificing contact with what's going on in the world, or without sacrificing the possibility of escape through entertainment.

BLAYNE RICHARD BUTCHER, 49, has been in radio nearly half his life. A native of Blackwell, Okla., he entered radio in the late 1920's at WTAR Norfolk, Va. Up to 1927, he served at WLVA Lynchburg, Va., WGH Newport News, WBAP Fort Worth, WLW Cincinnati and WCAU Philadelphia. From 1934 to 1943, he was radio director at Lennen & Mitchell. He was radio-TV director at the Newell-Emmett Co. (now Cunningham & Walsh) from 1943 to 1950. During 1950-1951 Mr. Butcher was a producer at KTTV (TV) Los Angeles. Last year he joined Cecil & Presbrey.

And to digress for a moment, why are radio stations, especially those with no TV affiliation, so backward about using a positive approach in competing for their audience? There's a welter of words about "promotion," a lot of conversation about the vast audience radio still has, but few direct pitches. Why doesn't radio bluntly say to its listeners—"Rest your eyes awhile—Have freedom of movement around the house—Use your imagination—Youngsters watching the kid shows? Tune in the kitchen or bedroom radio"—and other such phrases that play up the advantages of radio listening from the radio station's viewpoint. Foolish indeed would be the advertiser who didn't point up his legitimate claims . . . what is radio afraid of? This is a fight for survival, and no legitimate holds should be barred.

Radio should again go "grass roots" and cater to the basic interests of people. These interests are the same as they have always been. Interests in themselves, their neighbors, their community, and on up the scale to state, national and international affairs. In the first three categories radio once did, and again can do, an outstanding job—a job that probably will

(Continued on page 94)

Politics and out-of-home listening

Extra values this summer for local RADIO news advertisers

The hottest election year in two decades means that news—the people's favorite Radio fare—will pull bigger audiences than ever this summer.

With 23,500,000 auto radios and 34,000,000 secondary and portables—people wherever they go will be listening to local Radio news.

For instance, did you know that:

"73% of all people with TV sets turn to the Radio for news?

Families with TV sets listen to their auto radios 7 times as much in the afternoon as those without TV?"

These and other pertinent facts about local Radio news are in the "NEWS IS IN THE SUMMER AIR" booklet available at your nearest NBC Spot Sales office.

MBS, WOR-AM-FM-TV Physical Setup Next

WITH THEIR executive lineup for consolidated operations all set and in effect [B•T, June 9], officials of Mutual and WOR-AM-FM-TV New York last week were working on plans for early physical consolidations.

Only moves definitely set late last week called for the Mutual program department—which under the combined operations plan is also the program department of WOR radio—to move from the 19th floor of 1440 Broadway to the 21st floor of the same building, with the combined Mutual-WOR radio and TV advertising, research and public relations department temporarily occupying the space thus vacated on the 19th floor. Both MBS and WOR are largely quartered in the 1440 Broadway building already.

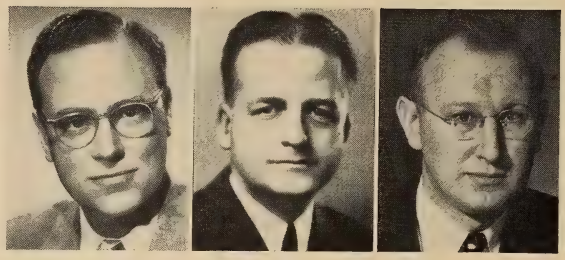
Program Duplication Seen

In addition to the physical realignments, the consolidation is expected gradually to see greater duplication of programs by Mutual and WOR than has been the case in the past. Program operations were said to be high on the priority list for detailed study.

The consolidation plan has been expected since shortly after General Tire & Rubber Co. acquired control of the WOR stations—and with them, control of Mutual—early this year.

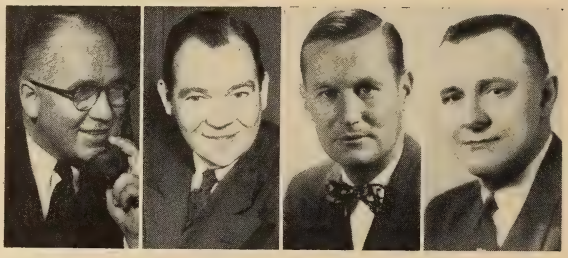
The new executive lineup, disclosed 10 days ago and effective immediately, was devised by top executives including General Tire's Thomas F. O'Neil, Mutual president and board chairman; Mutual Executive Vice President William H. Fineshriber Jr., who heads the combined Mutual-WOR radio operations, and J. Glen Taylor, longtime General Tire executive and now a vice president of its overall radio-TV properties, Thomas S. Lee Enterprises Inc. (including the Yankee and Don Lee networks as well as the WOR stations and about 58% of MBS stock).

Theodore C. Streibert, who has headed the WOR stations, is understood to be slated for special duties in the overall Lee Enterprises organization, with one of his first assignments expected to be a TV film syndication project. His new role has not been officially announced, however.



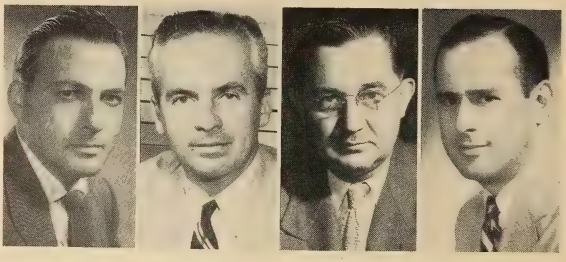
Authorities estimated that approximately 25 persons in the Mutual and WOR organizations are being released as a result of the consolidation.

The Top Realignment



The new executive lineup is as follows, aside from Mr. Fineshriber's responsibility for the combined radio operations of Mutual and WOR:

J. R. Poppele, WOR vice president in charge of engineering for radio and television, now is also in charge of Mutual engineering; E. M. Johnson, who has been Mutual vice president in charge of station relations and engineering, is now vice president for station relations only; Julius F. Seebach Jr., WOR-AM-TV vice president in charge of programming, now is in charge of programming for Mutual and WOR radio; Harvey Marlow continues in charge of programming for WOR-TV.



James E. Wallen, Mutual secretary and treasurer, now has additional responsibility for account and administrative operations of WOR radio and TV; Robert A. Schmid, MBS vice president for advertising, public relations and research, now is also in charge of these functions for the WOR stations; Adolf N. Hult continues as Mutual vice president in charge of sales; William Crawford continues as sales manager for WOR radio, while R. C. Maddux, who has been WOR-AM-TV vice president in charge of sales, will concentrate on WOR-TV sales, assisted by Robert Mayo, WOR-TV sales manager.

Mr. Fineshriber Mr. Poppele Mr. Johnson

Mr. Hult Mr. Maddux Mr. Schmid Mr. Seebach

Mr. Marlow Mr. Mayo Mr. Wallen Mr. Crawford

U.S. TO PROTEST

Korea VOA Shutoff

PROTEST by the U.S. State Dept. was planned Thursday after the South Korean government ordered all Voice of America broadcasts to that country shut off, apparently because they were critical of President Syngman Rhee's attempts to switch Presidential elections from the National Assembly to a popular vote, according to CBS reports.

State Dept. Press Officer Lincoln White said John J. Muccio, U.S. Ambassador to South Korea, is trying to get the broadcasts, which are made in the Korean language, reinstated. American press association news broadcasts also were forbidden by the South Korean government. Korean stations had relayed by longwave the shortwave signals from the U.S.

FOURTH Annual Frolics will be held by American Federation of Radio Artists, June 20, at Los Angeles Breakfast Club.

WTUX RENEWED

Was First Racing Case

WTUX Wilmington, Del., harassed three years by the FCC's anti-racing policy, last week was granted renewal of its license.

First of the list of stations cited for afternoon horse racing broadcasts, the Commission said it was applying to the renewal petition its policy of recognizing a station's changed attitude and discontinuance of programs "which appeared to aid in the violation of law."

Renewal application of WTUX was first heard in May-June 1949 before an examiner, with a grant recommended. The general counsel of FCC excepted and asked for denial, with the FCC itself hearing the case Feb. 17, 1950. The routine continued until Oct. 11, 1950, when FCC denied the renewal.

This denial was based on the thesis that WTUX race results were designed to aid illegal betting and that it had neglected public affairs programming.

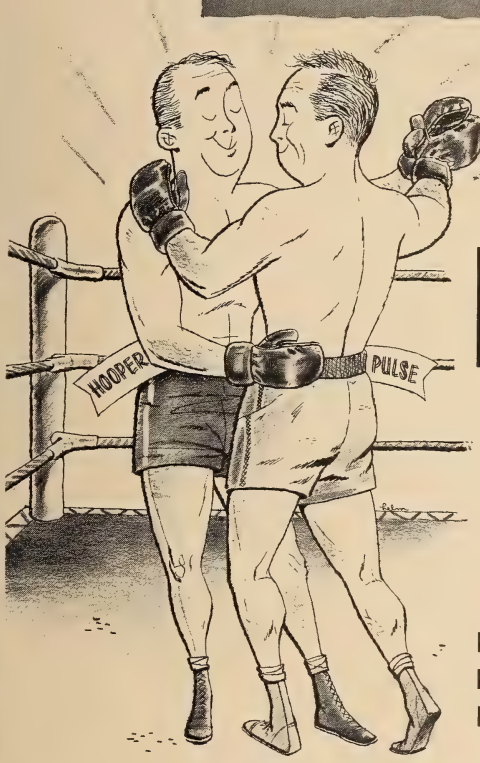
All stations were directed Jan. 16, 1951 to answer a questionnaire on racing programs, with a number set for hearing. Since that time some of the stations have been granted renewals where they discontinued programs which FCC felt might aid in violation of law [B•T, March 3, 10].

Request of Leonard H. Marks, attorney for WHIM Providence, R. I., for a ruling on certain types of racing programs was denied. Mr. Marks had asked [B•T, April 21] if broadcasting a feature race and a summary of results at the close of the day would be contrary to public interest. FCC turned down the petition with the observation that programming responsibility rests with the licensee.

BOSTON AWRT CHAPTER

Organizational Meet June 20

NEW ENGLAND women broadcasters will meet in Boston's Hotel Statler June 20 for the purpose of organizing a local chapter of American Women in Radio & Television, it was announced last week. Highlight of the meeting will be a talk by Harold E. Fellows, president of NARTB, who will act as chief dinner speaker.



An all-day session is slated to include panel discussions, a business meeting and luncheon and dinner sessions. At the morning session will be a panel on "Today and Tomorrow in Radio and TV," moderated by Louise Morgan, WNAC-AM-TV Boston, and Heloise Parker Broeg, WEEI. Panel will include Marjorie Mills, WBZ; Mildred Carlson, WBZ-AM-TV; Claire Crawford, WORL, and Jan Gilbert, Harold Cabot & Co.

Luncheon meeting will be devoted principally to talks by Doris Corwith of NBC, AWRT national president, and Betty Stuart Smith, J. Walter Thompson Co., New York.

REBROADCAST RULE

NARTB Urged To Oppose

NARTB should attack FCC's policy decision interpreting rebroadcast provisions of the Communications Act. [B•T, May 19], in the opinion of the association's TV Board, which met Monday-Tuesday at Hot Springs, Va.

The board stated its opposition to the plan and recommended that the association take action. A similar proposal was adopted by the NARTB Radio Board at its Thursday meeting in Washington (see Radio Board story, page 28; see FCC decision story, page 49).

The board tabled a proposal to allot $10,000 to Advertising Research Foundation for a study of audience research techniques, pending receipt of a report on the project. Broadcast Advertising Bureau, it was stated, will help finance the ARF study with a $15,000 grant. ARF is a cooperative research group conducting projects on behalf of advertisers, agencies and media. Edgar Kobak, WTWA Thomson, Ga., is ARF president.

The TV directors approved NARTB's efforts to protect telecasters' rights in government study of TV towers and air hazards. Continued action was urged.

Code Fees Continue

Present subscription fees for the NARTB Television Code will continue, it was stated. The fees are scaled downward as the number of subscribers increases, with discounts given NARTB TV members. Ninety stations and four TV networks subscribe to the code.

John E. Fetzer, owner-operator of the Fetzer radio and TV stations, reported as chairman of the NARTB Television Code Review Board on the board's activity and developments at its June 5-6 meeting [B•T, June 9].

A three-man TV Board committee will be named to study the whole problem of TV station dues, reporting back to the board in November on any proposed changes. At present TV stations pay the association half the highest quarter-hour or the five minute rate, whichever is lower, as their monthly association dues. AM stations are assessed a rising-scale fee based on their income, a completely different type of levy. Present TV dues will continue to next April.

At this stage in TV's development, the TV Board felt, the rate-card formula is best but it awaits results of the committee's studies.

The NARTB's combination dues plan was set in motion last winter. Under it, stations get a varying discount if all stations under a common owner belong to NARTB. The TV board voted to set Aug. 31 as the last day the discount can be obtained retroactive to last April 1, when the plan went into effect. Station groups applying for the discount after Aug. 31 will not get the retroactive feature, the discount starting at time the application is filed instead of from last April 1.

Henry W. Slavick, TV board member from WMCT (TV) Memphis, informed the group all Scripps-Howard stations were joining. This would add WNOX Knoxville, Tenn., and WCPO Cincinnati to the present list of Scripps-Howard members, which includes WCPO-TV Cincinnati, WEWS (TV) Cleveland; WMC (TV) and WMCT Memphis.

Of the 108 operating TV stations, 88 are NARTB TV members along with the four national TV networks.

The TV Board objected to an FCC requirement covering reports on station programming for a composite period, contending the period is too short. The board suggested the annual log reports should be compiled on a four-week basis to reflect a true picture of program service.

Many of the actions taken by the TV Board were subject to action taken by the Radio Board. In some cases a mail ballot may be needed where subjects require composite action.

All directors attended the Hot Springs meeting with the exception of Frank M. Russell, NBC, who was excused.

NARTB DISTRICTS

Meeting Schedule Approved

APPROVAL was given the schedule of 1952 NARTB district meetings at board meetings held last week. Sessions open Aug. 18 and wind up Oct. 21.

Basic agendas for the meetings are being developed by NARTB board members and district directors, with specific time to be allocated for TV discussions. The final schedule, just completed, follows (including hotels):

District 7 (Ky., Ohio)—Aug. 18-19, Statler, Cleveland.
District 8 (Ind., Mich.)—Aug. 21-22, Grand, Macinac Island, Mich.
District 11 (Minn., N. D., S. D.)—Aug. 25-26, Duluth, Duluth, Minn.
District 17 (Alaska, Ore., Wash.)—Aug. 28-29, Multnomah, Portland, Ore.
District 15 (N. Calif., Hawaii, Nev.)—Sept. 4-5, Mark Hopkins, San Francisco.
District 16 (Ariz., S. Calif.)—Sept. 8-9, Del Coronado, Coronado Beach, Calif.
District 14 (Col., Ida., Mont., N. M., Utah, S. D., Wyo.)—Sept. 11-13, Brown Palace or Cosmopolitan, Denver.
District 12 (Kan., Okla.)—Sept. 15-16, Lassen, Wichita.
District 13 (Tex.)—Sept. 18-19, Texas, Fort Worth.
District 10 (Iowa, Mo., Neb.)—Sept. 22-23, Elms, Excelsior Springs, Mo.
District 9 (Ill., Wis.)—Sept. 25-26, Plankinton, Milwaukee.
District 4 (D. C., N. C., S. C., Va.)—Oct. 2-3, Carolina, Pinehurst, N. C.
District 5 (Ala., Fla., Ga., P. R.)—Oct. 6-7, Biltmore, Atlanta.
District 6 (Ark., La., Miss., Tenn.)—Oct. 9-10, Peabody, Memphis.
District 3 (Del., Md., Pa., W. Va.)—Oct. 13-14, Penn Harris, Harrisburg, Pa.
District 2 (N. Y., N. J.)—Oct. 16-17, Westchester, N. Y.
District 1 (Conn., Me., Mass., N. H., R. I., Vt.)—Oct. 20-21, Statler, Boston.

ACLU COMPLAINT

FCC Votes to Dismiss

REVERSING a previous vote, the FCC last week voted to dismiss the complaint of the American Civil Liberties Union against ABC, CBS, DuMont, NBC and stations WPIX (TV) New York and KOWL Santa Monica, Calif.

Commission's order specifically dismissed only that portion of the ACLU complaint which asked that the licenses of the networks' stations and the other two mentioned be put on temporary extension.

Order also renewed for regular one-year period the licenses of WNBT (TV) New York (NBC) and of WCBS-TV New York (CBS). Both these stations' licenses were due for renewal June 1—but Commission's failure to act on them two weeks ago extended them temporarily. Also involved were a number of remote and pickup licenses by the various networks.

DuMont stations are at present on temporary license due to that network's involvement in the Paramount case and, therefore, last week's FCC order made no mention of them.

Neither did last week's order mention KOWL. That station's license does not expire until May 1, 1954.

Two weeks ago the Commission voted 3 to 2 not to take any action on those licenses up for renewal because of the ACLU complaint. FCC Chairman Paul A. Walker and Comrs. Frieda B. Hennock and E. M. Webster were the majority, Comrs. Rosel H. Hyde and Robert T. Bartley the minority. Comrs. George E. Sterling and Robert F. Jones were out of town.

Last week's vote was unanimous, with all Commissioners present.

It was understood that originally the FCC voted to renew the licenses involved notwithstanding the complaint, but upon the urging of General Counsel Benedict P. Cottone the decision not to renew was taken. [See editorial "Black Magic," B•T, June 9].

The ACLU complaint was filed with the FCC last April [B•T, April 14]. It charged that the networks and individual stations named were "blacklisting" certain performers because their names were listed in the anti-communist *Red Channels*. It asked that the FCC put on temporary license the stations involved, or if such licenses wer renewed that the Commission require the licensees to sign a pledge not to use a blacklist. It also asked that the Commission conduct an inquiry on whether blacklisting was being practiced by radio-TV stations.

Technically, the request for an inquiry still pends before the Commission. It is believed doubtful, however, that anything approaching a full-scale investigation will eventuate.

In replies to the ACLU complaint, the networks and stations denied that they were using a blacklist to keep performers off the air.

1882 William Edmund Scripps 1952

WILLIAM E. SCRIPPS, 70, pioneer broadcaster and publisher, died early Thursday at his country estate near Lake Orion, Mich. Death was due to a heart condition induced by a year's respiratory illness.

A member of a prominent journalistic family, Mr. Scripps and his son, William J. Scripps, started WWJ Detroit in the summer of 1920 and WWJ-TV in 1947. The elder Mr. Scripps encouraged his son's radio activities in 1920 by providing ham transmitters at home and at the *Detroit News*.

W. E. Scripps

Head of the *News* since 1926, Mr. Scripps had been with the newspaper founded by his father, the late James E. Scripps, nearly 56 years.

In directing his radio and newspaper interests, Mr. Scripps preferred to take a behind-the-scenes role. He became interested in aviation as a sport and the *News* soon was pioneering delivery of newspapers by planes.

For some years he had spent much of his time at his well-known farm, Wildwood, which produced prize-winning cattle. The farm included a game refuge of 3,830 acres and he was active in reforestation. He had many charities and had given his private art collection to the city of Detroit as well as his home, which became Mt. St. Mary's Residence for Girls.

Mr. Scripps' father was a half-brother of the late Edward W. Scripps, who had held a controlling interest in the Scripps-Howard newspaper chain. Edward W. Scripps also founded United Press and Newspaper Enterprise Assn.

Born in Detroit May 6, 1882, William E. Scripps attended Michigan Military Academy and joined the *News* in 1896. Besides serving as publisher of the *News*, he was president of Scripps Motor Co., manufacturing marine engines. In 1941 he was a member of the Seaway for Defense Committee, formed by civic and business leaders to get support for the Great Lakes-St. Lawrence Seaway project.

He was a member of the Associated Press, Detroit Board of Commerce, Detroit Athletic and Bloomfield Hills Country Clubs, and Country Club of Detroit.

Surviving are his widow, the former Nina Downey, whom he married in 1901; three children, William J., Robert W. and Mrs. Richard M. Spitzley, all of Detroit; 12 grandchildren and three great-grandchildren.

MUSIC

...the Atlas of the Entertainment World

In ancient fables, Atlas supported the world upon his shoulders. Today it's a fact that music supports the entertainment world . . . a multi-billion dollar industry . . . a world of radio, television, movies, night clubs, dance halls, concerts, musicals, etc.

Entertainment without music would be entertainment without profit, singers without songs, orchestra leaders without orchestras.

And where does this music come from? It comes from hundreds of composers and lyricists who can keep on writing these songs for the entertainment industry only because they receive royalties for the public performance for profit of their works.

That is where the American Society of Composers, Authors and Publishers enters the picture. By acting as a clearing house for the receipt and distribution of performance fees, ASCAP enables these writers to keep turning out the songs and melodies for the enjoyment of the American public. All of the thousands of songs composed by the Society's members are available to you under a single ASCAP license.

And that is what makes this license important to you. It helps make your business profitable by giving you ready access to the best in the music of America — the music people have requested, over and over again, through the years.

This is the first in a series of advertisements telling the story of ASCAP

AMERICAN SOCIETY OF COMPOSERS, AUTHORS AND PUBLISHERS

575 MADISON AVENUE, NEW YORK 22, NEW YORK

APRIL NETWORK SALES

324 Advertisers Buy Radio

A TOTAL of 161 advertisers in April bought $13,943,887 worth of radio network time, averaging $86,608 apiece, while 163 advertisers spent $15,014,091 for TV network time, an average of $92,111 each, according to a BROADCASTING • TELECASTING analysis of advertising expenditures for network time as reported by Publishers Information Bureau.

Network television held a similar slight lead over network radio for the first four months of 1952, as it did in April. During the January-April period, 179 advertisers used time on the radio networks, spending in the four months a combined total of $56,544,685, or an average of $315,892. Meanwhile, TV networks boasted a total of 191 clients who bought $60,686,549 worth of TV network time or an average of $317,731. All dollar figures are calculated at the one-time rate, before volume or frequency discounts, and therefore somewhat in excess of actual out-of-pocket expenditures of advertisers.

Procter & Gamble Co., as usual, stands at the top of the sponsor list in both radio and TV network programs, measured by the amount of time purchased. It is perhaps significant that six companies appear on both lists of the top 10 sponsors (Table I for radio, Table IV for TV)—Colgate-Palmolive-Peet Co., General Foods, General Mills, Lever Bros. and Liggett & Myers, in addition to P & G. Leading advertiser in each product group of advertisers for each network medium is shown in Table II for radio and Table V for TV.

Decline of radio network billings over the past year and the concurrent rise in TV network time sales are detailed by product groups in Tables III and VI, respectively. Class by class, these two tables afford a clear overall picture of the changes in radio and TV sponsorship during the past year, with April of 1952 compared with the same month of 1951 and the first four months of each year compared.

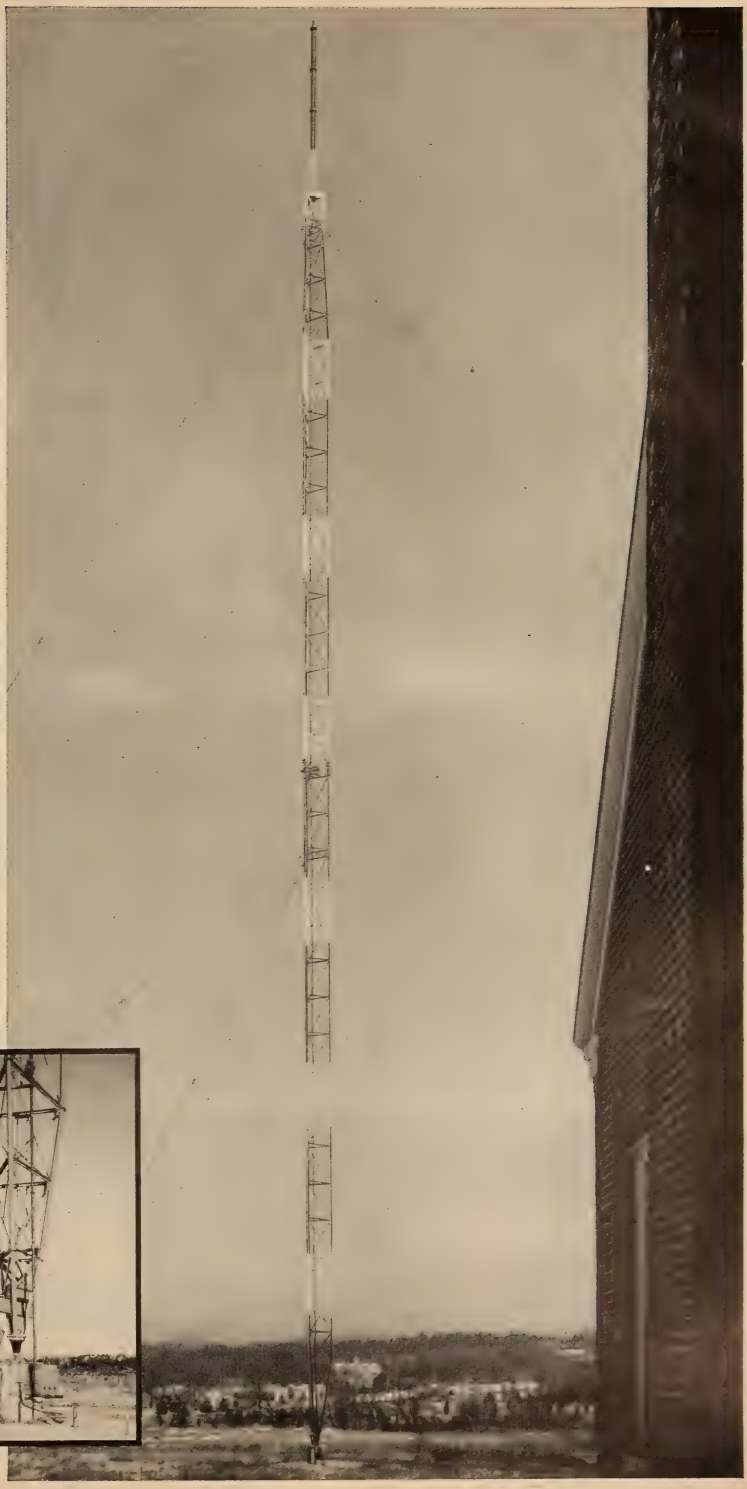
wherever you go there's radio . . .

transmitted through Truscon Steel Towers

Truscon Steel Towers dot the landscape in America and foreign lands, performing dependably under the greatest extremes of geographical and meteorological conditions.

Typical example is the new 409 feet high Truscon Guyed Tower with RCA 4-section HD pylon 56 feet high, erected for WCOP-FM Broadcasting Station at Boston, Mass.

Lessons learned through experience, observation, and coordination with leading tower erectors during construction of hundreds of towers, are reflected in the design, detail, and safe and simple field assembly of all Truscon Steel Radio Towers.



Your phone call or letter to any convenient Truscon district office, or to our home office in Youngstown, will bring you immediate, capable engineering assistance on your tower problems. Call or write today.

NOW...say goodbye to timing error problems!

"SCOTCH" Brand's sensational, NEW 7" plastic professional reel cuts timing error of tape recorded programs up to ONE HALF

If timing problems are the bug-a-boo of your job as a recording engineer, you are no exception. Recording engineers agree that nothing is as distressing as having a tape recorded program run over or under specified time, creating a scheduling problem. But why not relax and breathe easy? You can, you know, because "SCOTCH" Brand, first in sound recording tape, announces its new, exclusive 7" plastic professional reel.

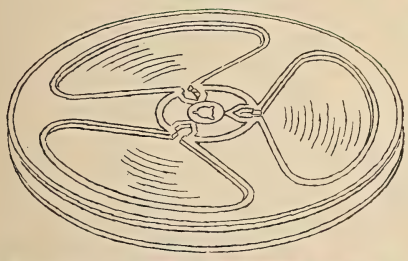
HAILED BY BROADCASTING & RECORDING INDUSTRY LEADERS

Every test on professional recording machines proved conclusively the superiority of "SCOTCH" Brand's exclusive, new 7" reel as contrasted to the standard 7" reel. In every instance the maximum deviation of the recorder speed has been reduced to one-half that experienced using the standard 7" reel.

EXTRA ADVANTAGES OF THE NEW PLASTIC PROFESSIONAL 7" REEL

REDUCTION OF PITCH CHANGES — Pitch changes can be a source of trouble when making continuous long recordings on two machines. Because of the closer speed control made possible by the new plastic professional reel, pitch changes in musical selections are greatly reduced.

MINIMIZED MECHANICAL DISTORTION OF TAPE— On the new professional reel there is only one small threading slot. This minimizes the mechanical distortion of the layers of tape nearest the hub.



MORE UNIFORM WINDING — The new plastic professional reel does not attain as high a rotational speed as the standard 7" reel. This results in less vibration and smoother re-winding.

EXCLUSIVE DEVELOPMENT

IN PROFESSIONAL 7" REELS

OLD

NEW

REG. U.S. PAT. OFF.

SCOTCH BRAND Sound Recording Tape

"SCOTCH" Brand's new, professional reel has an exclusive, large-sized hub (2¾" in diameter as compared to the 1¾" diameter hub for the standard 7" reel). This gives "SCOTCH" Brand's new, professional reel the same ratio of outside diameter to hub diameter as that of the standard NAB metal reel.

While timing is also determined by mechanical considerations in recording machines, tape reels play an important part in this problem. With the standard 7" reel, as tape is spooled from the supply reel on to the take-up reel, tension is constantly varying because of the changes in the effective reel diameters. This change in tension causes slight variations in speed; the tape running faster at the beginning of the reel, and slower at the end. The hub of "SCOTCH" Brand's new plastic professional reel is purposely made large to eliminate tension change while the tape is playing.

More than 1200 feet of "SCOTCH" Brand's exclusive *dry lubricated* Sound Recording Tape is readily stored on the new professional 7" reel.

Quality Guarantee

The Sound Recording Tape supplied on "SCOTCH" Brand's new, professional 7" reel is 100% splice free.

Tape wound on the new 1200 foot reel has an output variation at 1000 cps less than plus or minus ¼ db, and is less than plus or minus ½ db from reel to reel.

in public service . . .

WNAR Norristown, Pa., helped to send a blind bowling team to the National Blind Tournament in New York. The bowling team had wanted to participate in the tournament but needed $150 in travel funds. WNAR conducted a week-long campaign over the *Allan Michaels Morning Show*, getting more than $200 in contributions.

* * *

KGLO Raises Funds

THREE fund-raising campaigns by KGLO Mason City, Iowa, secured $1,100 for flood relief, $800 for a recreation area beautification project and $1,600 for the local polio drive, according to Bud Suter, KGLO program and sports director.

* * *

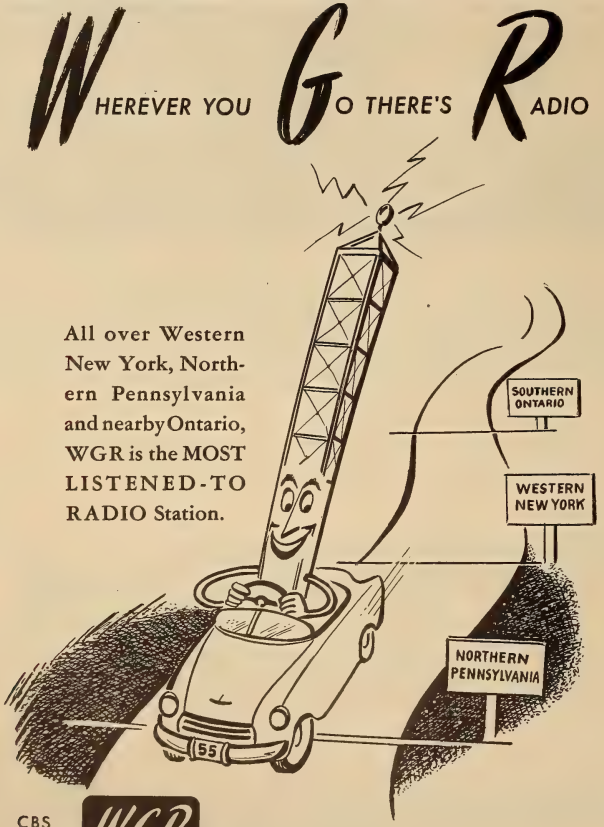
WESC Aids Child

WESC Greenville, S. C., through disc jockeys Fred Heckman and Jack Strong, appealed to listeners for hospital funds for a five-year-old child in need of brain surgery. Listeners responded with $135. This amount, added to $100 donated by the local chapter of the American Red Cross, was enough to have the child admitted to Duke U. Hospital in Durham, N. C.

* * *

Funds for Announcer

STAFFERS of CHUM Toronto, Ont., began a fund-raising drive which eventually reached $941 to pay the medical expenses for Cam Langford, CJOY Guelph, Ont., announcer, who was paralyzed after auto accident injuries. Contributions came from listeners, radio and recording people, and the audiences at a performance of *Treasure Trail*, a radio quiz and celebrities show.



Red Cross Jamboree

RED CROSS drive by KYMA, Yuma, Ariz., saw $14,000 goal there reached with Program Director Bob Vache acting as a "human" gauge in a four-hour climb up the 250-w station's antenna to measure progress of contributions. The KYMA drive featured a "Red Cross Jamboree."

Radio Solves Robbery

WHEN a lone robber held up a bank in California, Mo., he was apprehended three hours afterward. A listener heard a description on the KWOS Jefferson City *MFA Neighbors* and notified law officials.

FOR THE 19th consecutive year, the two persons above have gone through this ceremony of signing a contract. Clothier Henry Holmes (l), president of H. G. Holmes & Sons, once again signs for KTUL Tulsa's *News at Home*, while R. P. (Bud) Akin, KTUL senior account executive, beams satisfaction. Mr. Holmes, the station's oldest continuous advertiser, was one of Mr. Akin's first sales clients, a pleasant relationship that has been lasting.

WTMJ CHANGES

Three Executives Affected

THREE changes in the executive staff of WTMJ-AM-TV Milwaukee have been announced by Walter J. Damm, vice president and general manager of the stations.

Russell G. Winnie becomes assistant general manager of radio succeeding L. W. Herzog. George Comte will be stations' manager succeeding Mr. Winnie. Mr. Herzog's post is to be research and development coordinator.

Mr. Winnie joined the *Journal* stations in 1928 and has been stations' manager since June 1945. Mr. Comte has been at WTMJ since 1935 and became an assistant to the manager in 1950. Mr. Herzog has been with the *Journal* interests since 1924. He became station manager of WTMJ in 1939 and in 1945 was named assistant general manager of radio.

Mr. Winnie

Mr. Comte

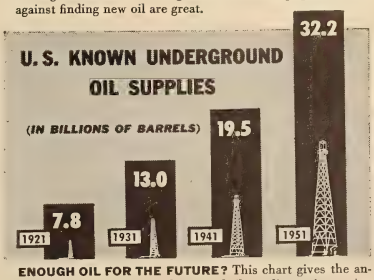
WLPO's New Plant

CONSOLIDATION of office and studio facilities under the same roof by WLPO La Salle, Ill., is scheduled to take place Wednesday without interruption in regular broadcast operations, according to Bill Holm, general manager. The station's new quarters are located at the transmitter site immediately south of La Salle-Peru.

HELICOPTER DROPS OIL EXPLORATION CREW into rough California terrain where geologists will study surface rock structures in their never-ending search for oil. Despite long chances involved, U. S. oilmen last year found twice as much new oil as nation used.

Biggest Search in History Pays Off For U. S. Oil Consumers

Last year oilmen found two barrels of new oil in the United States for every barrel the nation used, in spite of the tremendous odds against finding new sources of oil. As a result, the nation's known underground oil supplies are now at an all-time high—over four times what they were thirty years ago.



These record discoveries are remarkable when you consider the risks oilmen take in their search for oil. The odds are 8 to 1 against bringing in a producing well in an area where oil has never been found before. Yet by drilling more wells in 1951 than ever before, oilmen discovered a record amount of new oil to assure your future needs.

It is no accident that year after year America's thousands of privately-managed oil businesses find more oil in the U. S. than America uses. The odds against finding new sources of oil are great, but the men who compete in the search for oil are willing to accept these odds as long as the chance to stay in business by earning a fair profit exists.

This is America's competitive system at work—and a good example of how it benefits you and the nation.

MINIATURE EARTHQUAKES like this were set off by the hundreds of thousands last year to chart underground rock formations, permitting exploration crews to pinpoint *likely* oil drilling locations. Even using latest scientific equipment, odds against finding new oil are great.

ENOUGH OIL FOR THE FUTURE? This chart gives the answer. America's known underground oil supplies are increasing steadily though U. S. uses more oil every year. Ample oil supplies help make oil products a real bargain. Today's high quality gasoline costs about same as gasoline did in 1925—only taxes are higher. Yet 2 gallons now do work 3 used to do.

Oil Industry Information Committee
AMERICAN PETROLEUM INSTITUTE, 50 West 50th Street, New York 20, N. Y.

BBC'S POLICY

First Step To Commercialism

FIRST STEP toward the introduction of commercial competition to the BBC monopoly in broadcasting in Great Britain was taken last Wednesday, when the House of Commons approved a Government White Paper on the future of broadcasting, including a proposal for privately-owned advertising-supported TV stations to operate alongside the BBC's non-commercial tax-supported stations. In radio, the BBC's exclusive broadcasting rights were extended for another 10 years.

Step was a long one, marking as it did the first time that any official sanction has been given in the United Kingdom to anything but the BBC's monopolistic public service type of radio and TV operation. While only television is mentioned in the measure, informed observers seem to be in agreement that once commercial television has been added to the broadcasting scene, the introduction of commercial radio can not lag far behind.

No Early Commercials

But it should not be assumed that the vote means that the British public will start getting commercial programs on their TV sets in the near future. The date when video commercials first go out into the English air is still some years away, estimates of just how many years varying from 3 to 10 or more. Estimates like the House of Commons vote are based primarily on the political views of the estimators.

Specifically, the government proposed and the House adopted the suggestion "that in the expanding field of television provision should be made to permit some element of competition [to the BBC] when the calls on capital resources at present needed for purposes of greater national importance make this feasible."

Freely translating "purposes of greater national importance" as "rearmament" makes it apparent that no private broadcasters are going to be licensed in England for some time to come. Furthermore, there is as yet no machinery for issuing commercial TV licenses there. The White Paper pointed out:

"As the policy governing the BBC charter and license is always considered by Parliament on the occasion of renewal, the government thinks that Parliament should have a similar opportunity of considering, before the licensing of the first station, the terms and conditions under which competitive television would operate.

"It would be necessary to introduce safeguards against possible abuses and a controlling body would be required for this purpose, for regulating the conduct of new stations, for exercising a general oversight of the programmes and for advising on appropriate matters." It has been commented that if in establishing a British counterpart of our FCC the above language should be retained, that final phrase "advising on appropriate matters" might well prove as plaguing to the English as the "public interest, convenience or necessity" of our communications act has in this country.

"The new stations would not be permitted to engage in political or religious broadcasting," the government states. "Licenses for any new stations would be granted (and, if necessary, withdrawn) by the Postmaster General on the advice of this body, subject to reservation by the government of all rights in time of emergency."

Technical Aspects

On the technical side, the White Paper points out that the private TV stations would have to use "higher frequencies." The introduction of competitive TV service would also require changes in the design of English TV receivers for multi-station reception and the production of adaptors for present sets, which can receive only the single channel now utilized for telecasting by the BBC TV stations.

Even when material is free for such non-defense uses as the erection of TV stations, commercial operators will not be at the head of the line, but must cue up behind the BBC. The Government White Paper states:

"For many years the BBC has been prevented by limitations on capital investment from developing television in certain areas and from introducing very high frequency sound broadcasting. The government considers that the BBC has a continuing obligation to provide adequate national broadcasting services throughout the United Kingdom and the fulfillment of this policy must clearly have first claim when labor and materials become available."

There are now four TV stations in the United Kingdom—three in England and one in Scotland—with a fifth, in Wales, scheduled to be added in August. BBC plans also call for the future erection of five lower powered video transmitters. At present, all stations broadcast the same programs, originated mostly in London.

Half-Million TV Sets

There are about 500,000 TV sets installed in the United Kingdom, which has some 12 million licensed radio sets. License fees of 2 pounds ($5.60) a year on radio sets and of twice that sum on TV sets furnish the money with which the BBC operates.

At present all this revenue goes to the BBC; the government proposes that 15% be put into the nation's general finances, with the BBC operating on the remaining 85%, for the first three years of the new proposed 10-year charter. After the three-year period, opportunity would be provided to review this financial arrangement.

In the debate of the White Paper in the House of Lords, it was reported that the BBC's revenue from license fees runs at the rate of about $32.2 million a year.

During the House of Lords debate, which was pushed vigorously by both proponents and opponents of sponsored programs, it was reported that public opinion polls in recent years have shown about 65% of the British public favor some competition to the BBC. Newspaper associations have opposed the introduction of advertising into TV. Somewhat more surprising is the report that English advertisers and advertising agencies are divided on the advisability of commercial TV, although the majority of each group favors the idea.

The vote of the Incorporated Society of British Advertisers was 169 in favor to 122 against, while the Institute of Incorporated Practitioners in Advertising members voted 201 for commercial television and 181 against.

Youthful Applicants

TWO young men—who evidentally have heard that radio is a young man's game — filed for a new AM station for Oxford, Ohio, last week. The duo, Eugene Napier and Richard Plessinger, are 17 and 18 years old, respectively. They seek 1090 kc with 500 w daytime, and expect that the station will cost $10,350 to build, $23,000 a year to operate, and take in $27,000 a year revenue. "The station will give the sponsor as much time as possible and still not make it hard on the listener," they state in their application. Mr. Napier is a student at the Stewart High School, Oxford, and Mr. Plessinger is a serviceman for McFarland Radio Service, also in Oxford.

ANTI-TRUST CASE

New Delay to September

HEARING on RCA's motion for withdrawal or modification of the government subpoena for RCA records in its anti-trust probe of the electronics manufacturing industry has been postponed to Sept. 2.

The hearing had been slated for last Thursday in the U. S. Court for the Southern District of New York, but was rescheduled for September, government authorities said, upon RCA request and approval of Justice Dept. officials in Washington.

Authorities said the action naturally delays RCA compliance with the subpoena but does not affect that of other manufacturers subpoenaed, which, it is generally accepted, includes virtually all major producers of AM, TV or FM transmitting equipment [B•T, March 3, et seq.].

Except for RCA, it was reported, manufacturers who received subpoenas have complied "in whole or in part" with the Justice Dept. request. Attorneys are now engaged in the substantial task of sifting through the mass of corporate records, correspondence, reports, etc., which have been submitted.

In seeking modification or withdrawal of its subpoena, RCA contends the demand for voluminous data—some dating back to 1934—is "too broad, unreasonable and oppressive." Further company claims are that a part of the subpoena relating to RCA licensing was adjudicated in a 1932 consent decree and that the courts ruled in 1942, when the Attorney General had attempted to re-open the case, that it was closed.

ALAN REED, who portrays Pasquale on CBS Radio *Life With Luigi*, organized marathon broadcasts conducted by Los Angeles area disc m.c.'s, May 26-June 7, sponsored by Irving Thalberg Lodge for benefit of Little Flower Home for Girls.

TEXAS STAR RULING

Court Remands Grant

WHEN the FCC considers an application for a new station, it must balance the proposed gain in service by the applicant against the loss to be suffered by an existing licensee.

This is the most significant portion of the decision issued last Thursday by the U. S. Court of Appeals in Washington which remanded to the FCC its grant of a new station to Texas Star Broadcasting Co. (Roy Hofheinz). Decision was No. 10692, *Democrat Printing Co.* v. *FCC* and *Texas Star Broadcasting Co.*

The Court also held that the Commission may not deviate from its engineering standards in cases decided by examiners. The implication was that the FCC must rule itself when it wished to change a standard.

Case, begun in 1947, involved the grant of a new station to Texas Star in Dallas on 740 kc with 10 kw LS, 5 kw N, DA.

Appealing the decision was daytimer KSEO Durant, Okla., on 750 kc with 250 w, which claimed that intereference to its service area must be considered by the Commission and that the burden of proof must be carried by the new applicant. It claimed that the new station (KACE) eliminated 41% of the population it was serving (164,300 people).

Also involved in the FCC hearings on the Dallas applicant was KTRH Houston (740 kc, 50 kw, DA) which asked for a change in its directional pattern. Initial decision in 1949 proposed to grant KTRH but deny Texas Star. In 1950, however, the Commission reversed the examiner's proposal, granted Texas Star and denied KTRH. In June 1950, KSEO appealed the decision to a three-judge Court of Appeals.

Case was argued last fall before retired Judge Kimbrough Stone and Judges Wilbur K. Miller and David L. Bazelon. Judge Bazelon wrote the decision, in which Judge Miller concurred. The Court ruled:

If the requirements of the public interest are to be satisfied the Commission must consider not only the public benefit from the operation of the new station, but also any public loss which it might occasion. Only by such a balancing can the Commission reach a legally valid conclusion on the ultimate question of the public interest.

By refusing to base its decision upon a 'comparative consideration of KSEO and the Dallas proposal' the Commission effectively disregarded its Rule 3.24 [Showing Required for Broadcast Facilities] . . . the Commission could not regard as irrelevant what Rule 3.24 and the public interest command—a determination as to the comparative merits of the two stations in the area of interference.

The Court also refused to accept the contention that the burden of proof regarding loss of service was the responsibility of KSEO. Texas Star in its FCC presentation attempted to show how KSEO programmed for the area in question, but the examiner rejected this evidence and was upheld in this respect by the full Commission.

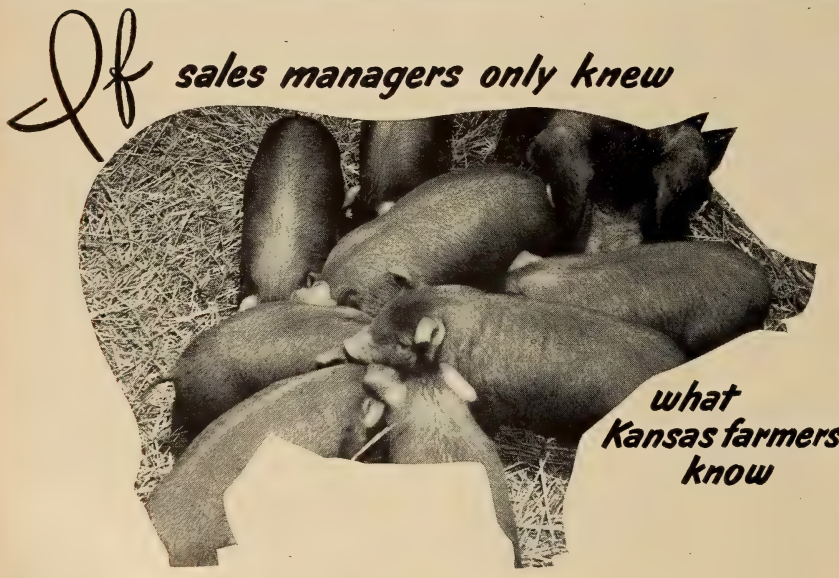
The Court held that the Commission "deviated" from its own engineering standards in approving the grant of the new Dallas station, since the new station violated Par. 4, dealing with blanket areas.

Standards state that a transmitter shall be located so that not more than 1% of the metropolitan population to be served live within the blanket area—the area near the transmitter where radio receivers find it difficult to tune-in other signals due to the strength of the signal from the nearby transmitter.

Commission's Standards

Commissions standards provide that other transmitter locations may be permitted if not more than 1% of the population comes within the 500 uv/m contour, if the applicant submits an affidavit, giving reasons why he cannot live up to the regular requirements, and if the applicant assumes full responsibility for adjusting the receivers of complaining listeners in the blanket area.

The Court pointed out that the Commission's grant to Texas Star violated even that exception, in that 1.3% of the population resided in the 500 uv/m contour and that Texas Star did not submit the affidavit called for.



On another point raised by KSEO, the Court brought up the question of the financial effect on the operation of an existing station when a new grant is made which affects the former's operation.

KSEO claimed that there was no substantial evidence to support the Commission's findings that "the grant to Texas Star will not impair the ability of KSEO to continue to serve the Durant area."

The Court agreed to that. "KSEO may or may not be able to survive financially if its signal is blocked out by the proposed interference," it stated. "The evidence furnishes no basis for an answer."

Mr. Hofheinz owns in addition to the grant for KACE, 50-kw KSOX Harlingen (1530 kc, 10 kw at night) and 5-kw KTHT Houston (on 790 kc).

GOVERNMENT of India Information Services has announced that All-India Radio now operates 22 stations—more than double the number that were in operation before India achieved independence in 1947.

Every farmer knows the trick of introducing a new pig into a family like this. Unless it's done right, the newcomer is likely to go hungry.

There's an equally simple method of introducing a new product to the farm and small town families of Kansas. Tell them about it over WIBW! It's the station most listened to by the state's biggest-spending, most desirable market.*

Because we're a welcome daily visitor in these homes, we'll get you SPEEDY SALES RESULTS . . . just like we have for hundreds of other WIBW advertisers.

REBROADCAST RULE

Opposition Developing

WIDESPREAD protests against FCC's new "legalized larceny" ruling on rebroadcast rights started to develop in the industry last week as legality of the decision was challenged.

NARTB, NBC and CBS were preparing to ask reconsideration of the order [B•T, May 19] as well as stay of execution prior to the July 1 effective date.

Indignation marked meetings of the two NARTB directorates—Radio Board and TV Board—last week. Both boards took up the FCC's order and adopted resolutions calling for quick action (see board stories, pages 28 and 36).

The NBC and CBS protests were about complete at the weekend, with prospect they would be filed early this week. Legal staffs of both networks gave priority to the matter.

Curiously, the most heated criticism of FCC's order—which puts a station on the Commission carpet if its fails to let another station rebroadcast a program — occurred within the government [CLOSED CIRCUIT, June 9].

This criticism developed within the Budget Bureau because FCC had failed to clear its decision with the bureau as required by the Federal Reports Act of 1942.

The Commission found itself on the spot at a Tuesday session of its lawyers and representatives of the Budget Bureau, part of an all-day discussion with the Broadcast Industry Committee of the Advisory Council on Federal Reports. The advisory council consists of business organizations which advise with the Budget Bureau in simplifying and improving questionnaire and reporting procedures of federal agencies.

Benedict Cottone, FCC general council, is understood to have told the broadcast advisory group the subject was not properly before the body, adding that the FCC didn't need the Budget Bureau's consent to issue the order.

After conferring with other FCC representatives, Mr. Cottone apologized for his observations, according to some of those who took part in the meeting.

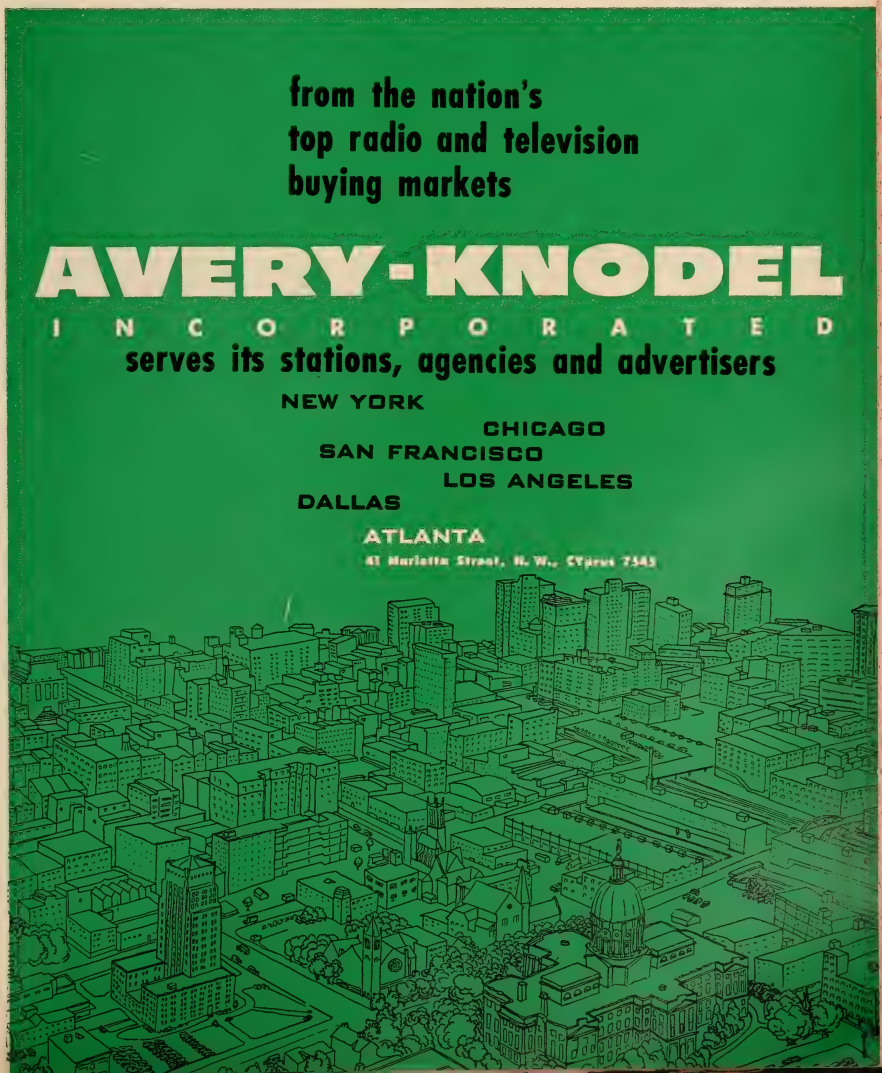
The Budget Bureau, citing the Federal Reports Act, contended no agency shall collect information without its approval. The bureau does not question the FCC's power from a policy standpoint. However, it takes the position that if a Federal agency issues a rule calling for a report, and that report is disapproved by the bureau, the rule would then be invalid.

It was brought out Tuesday that the rebroadcast order had been informally discussed at the staff level by FCC and bureau personnel, but the final FCC rule had not been cleared.

The bureau now has the matter before it, looking into the procedure involved in network and station reports on refusal of permission for rebroadcast. It is holding discussions with FCC on the subject.

Industry concern over the FCC's rebroadcast order continued to mount last week as its impact on stations and networks was studied in detail. The rule specifies that if a station refuses to permit rebroadcast of a program it has carried, it must tell the FCC why it refused.

If the Commission figures the reasons aren't satisfactory, it might question the very qualifications of the licensee under the public service provisions of the Communications Act, it was pointed out.



A broadcaster suggested to the joint committee that a special enforcement problem would arise if a station would demand an exorbitant sum to another broadcaster seeking rebroadcast rights.

The all-day advisory discussions brought out many proposals to simplify FCC questionnaires and ease the burden of filling out all sorts of returns with detailed information. In renewal applications, for example, it was proposed that stations file a simple balance sheet instead of long forms. Use by FCC of an income form resembling income tax computations was suggested as a means of saving work.

In the case of forms covering broadcast properties that are relatively small units in large enterprises, it was proposed that FCC need not examine in great detail all the phases of the commonly controlled properties. Consolidation of annual and interim ownership reports.

Attending the advisory sessions were Ben Strouse, WWDC Washington, chairman of the Broadcast Industry Committee; David Cohen and C. P. Modlin, economists of the Budget Bureau's Office of Statistical Standards; C. T. Lucy, WRVA Richmond; Richard C. Steele, WTAG Worcester, Mass.; E. K. Jett, WMAR-TV Baltimore; Ralph W. Hardy, NARTB, substituting for Secretary C. E. Arney Jr.; Richard P. Doherty and Charles H. Tower, NARTB, observers; Leon Brooks, Carl Burkland, Craig Lawrence, CBS; James E. Greeley, Paul B. Lynch, NBC; Mr. Cottone, Daniel Ohlbaum, Curtis B. Plummer, Robert Leahy, Hugo Reyer, H. H. Golden, James Sheridan, Eric Stewart, FCC.

UNITED NATIONS Radio has produced a special series titled *Jungle in Retreat*, story of three U. N. reporters in southeast Asia, starring screen actor Gene Kelly. Series will be carried by NBC radio June 21, 28 and July 5.

AMONG THOSE attending the West Virginia AP news clinic were (front row, l to r) H. B. Kenny, WCOM Parkersburg; Paul A. Myers, WWVA; Phil Vogel, WGKV Charleston; Frank J. Stearns, AP field representative, Washington, D. C.; Ned Skaff, WCHS; Nick Basso, WSAZ Huntington; Gilbert D. Brooks and Mr. Hays, WKNA; second row, Aud Archer, WCOM; A. G. Ferrise, WMMN Fairmont; Johnnie Villani, WBRW Welch; Mr. Saunders; Mr. Aspinwall; Mr. Rine, and John S. Phillips, WHTN Huntington; standing, Doug Martin, WCHS; Carl Lipps and Charlie Brotman, WRON Ronceverte; Bill Powell, WMMN; Mort Cohen and Bill Buckley, WCHS; Ellis Landreth, WBRW; Cebe Tweel, WPLH Huntington; Mr. Fullerton; Bill Austin, WPLH; Bert Shimp, WSAZ; Charles R. Lewis, AP sports editor, Charleston; Richard K. Boyd, AP correspondent, Huntington, and Flem Evans, WPLH.

W. VA. AP CLINIC

State, Local News Lauded

STATE and local news was termed the "most salable radio commodity" at an AP news clinic June 5 in the Daniel Boone Hotel, Charleston, W. Va. Don O. Hays, program director, WKNA Charleston, told some 40 broadcasters that it behooved them to exploit these programs.

Such news "builds not only audience, listener loyalty and advertiser acceptance, but also serves as an ideal vehicle for promotion and publicity," he said.

Ernie Saunders, WCHS Charleston sports director, in an analysis of sports coverage, said he felt that too much time was devoted to horseracing. More, he said, than stations in small cities want or will use.

Mr. Saunders also urged that the betting odds on all sports events be eliminated from wire copy.

John Aspinwall, AP radio news editor, described the association's New York radio operations. Max R. Fullerton, Baltimore bureau chief, led a discussion of the comparative use of AP copy among member stations. Mr. Fullerton said that it was a happy revelation to him that the day of the "rip and read" announcer has waned. William E. Rine, managing director, WWVA Wheeling, is president of the West Virginia AP Broadcasters Assn.

WILLIAM D. NIETFELD (l), KCBS San Francisco news director, is congratulated on his election to the chairmanship of the California AP Radio Assn. by Les Mawhinney, KHJ news director, and retiring chairman.

PENNSYLVANIA and Delaware AP stations hear Robert K. Richards (l), NARTB public affairs director, urge support of get-out-the-vote campaign. Here Joe Cleary (2d l), incoming president of Pennsylvania-Delaware AP Broadcasters, is greeted by Ed Darlington, WCNR Bloomsburg, Pa., outgoing president. Joe Snyder (r) is AP Philadelphia bureau chief and association secretary.

VOTING GUIDE

Ad Council Catalog Mailed

HUNDREDS OF radio-television broadcasters are among the estimated 10,000 persons receiving The Advertising Council's new 28-page Register and Vote campaign guide, scheduled for mailing to advertisers, agencies, broadcasters and editors early last week.

Prepared by Leo Burnett Co., Chicago, the catalog of advertising and action materials designed to help get out the national political vote was displayed for the first time at the annual convention of the Advertising Federation of America in New York's Waldorf-Astoria Monday.

This material will be distributed to radio and TV stations through the council's regular allocation plan, with monthly supplemental material issued by the American Heritage Foundation and the NARTB.

Radio outlets will be supplied scripts and program ideas to urge citizens to vote, with special programs and tie-ins planned for both network commercial and sustaining shows.

TV stations will receive one-minute and 20-second film spots, contributed by Five Star Productions, Hollywood. Main campaign themes are dramatized through live-action and art techniques, with emphasis of all announcements on the final "See you at the polls" message.

Austrian Quiz

USING an American-type quiz show with participants donating their prizes, the U.S. Dept. of State's Red-White-Red network in Austria won over many Austrian, Hungarian and Czechoslovak Catholics in a drive to rebuild the war-damaged 800-year-old St. Stephan's Cathedral. Using two new 100 kw transmitters, one near the Czech border and the other near Hungary, RWR is preferred by 76% of the Austrians to the Russian-controlled RAVAG, according to Paul A. Shinkman, public information officer.

NARTB 'VOTE' DRIVE

Maine, Illinois Join

TWO more states, Illinois and Maine, have joined the NARTB "Register and Vote" campaign, conducted in conjunction with the American Heritage Foundation. Formation of four committees previously had been announced, with NARTB President Harold E. Fellows contacting all 38 state associations in connection with the drive. Goal of the campaign is a record election vote.

New state committees follow:

ILLINOIS—William Holm, WLPO LaSalle, chairman; Charles Cook, WJPF Herrin; Oliver Keller, WTAX Springfield; Harold Safford, WLS Chicago; Tom Gavin, WIRL Peoria.

MAINE — Faust Couture, WCOU Lewiston; Carleton Brown, WTVL Waterville, secretary; William Rines, WCSH Portland; Sam Henderson, WGUY Bangor; Elden Shute, WLAM Lewiston; H. D. Glidden, WGAM Presque Isle.

POPULARITY poll conducted by *TV Digest* indicated that John Facenda, WIP Philadelphia, is the favorite local news commentator in that area.

WWJ 'LIVE' POLICY

Urges Return to Spontaneity

INCREASED importance on the value of spontaneity in radio has become the policy at WWJ Detroit, Don DeGroot, manager, announced last week.

In a statement to his staff, Mr. DeGroot said, "Radio has always served the public best as an 'on the spot' medium. Since taping or recording removes shows, interviews and special events an additional step from the spontaneity which is one of radio's greatest assets, and since 'live' programs get the advantage of word-of-mouth publicity from the participants, please make it a matter of policy in the future to schedule radio programs on a 'live' basis whenever possible.

"If it is impractical to keep the entire program 'live,' then at least the narrator, the announcer, or the voice that ties it together should be done 'live.' Your cooperation in this can help maintain the public consciousness of radio's matchless immediacy."

WVLK Change

FCC granted permission last week to WVLK Versailles, Ky., to change its main studio location to Lexington. WVLK will maintain a remote studio at Versailles, the Commission noted. Station is licensed to Blue Grass Broadcasting Co. and is assigned 1 kw fulltime on 590 kc, directional. It is a Mutual affiliate.

NEW COLOR FILM SHOWS WONDERS OF MODERN COAL MINING—

Actual on-the-job scenes show—

- **MARVELOUS AUTOMATIC MINING MACHINES AT WORK**
- **SAFETY MEASURES THAT PREVENT MINE ACCIDENTS**
- **HOW COAL CONTRIBUTES TO ELECTRIC POWER... STEEL... CHEMICALS... AND SYNTHETIC FUELS.**

This new film shows what coal mining is actually like today. It contains some of the finest high-quality color sequences ever made of mechanized underground mining.

Now audiences can see the extensive measures that are taken to insure miners' safety . . . marvelous machines harnessed to produce coal at almost unbelievable speed . . . mining aboveground, where giant shovels high as eight-story buildings peel back the earth to expose the coal.

Modern coal "laundries" are shown that wash, size, grade and treat coal to do its many jobs. Exciting scenes show coal doing these jobs. There are scenes, too, of the chemical marvels that are possible because of coal, including views of a new synthetic fuels plant where coal is transformed into gasoline and oil.

This 25-minute film is 16 mm., in full color and sound. It is free of any advertising or propaganda, and is being hailed, for its high interest value and dramatic qualities, as one of the finest industrial films ever produced.

HOW THE FILM CAN BE SEEN

"Powering America's Progress" is available for schools, colleges, scientific and technical societies, business and civic organizations, and other recognized groups. Prints can be obtained through the Bituminous Coal Institute and from the Graphic Services Section, U. S. Bureau of Mines, 4800 Forbes St., Pittsburgh 13, Pa. Copies of the film are also available for television.

For further information write to:

BITUMINOUS COAL INSTITUTE

320 Southern Building, Washington, D. C.

Industry 'Morals' Reply

(Continued from page 28)

Interstate & Foreign Commerce Committee, which has jurisdiction over radio and TV, the probe into broadcast programs was handed to it.

In the first hearings, most witnesses and committee members agreed no censorship nor legislation was required. Only concrete proposals were: (1) that the investigation be continued indefinitely to give publicity to objections and (2) that a National Citizens' Advisory Board be established to perform a similar function.

General agreement also was voiced that the TV Code, which went into effect March 1, was a step in the right direction. There were some expressions of doubt that the broadcasters could police themselves.

Broadcasters should abandon any idea that the program probe is something to be casually brushed aside or laughed off, according to Rep. Arthur G. Klein (D-N. Y.), a member of the group.

"It is very important that the television and radio industry should not take this too lightly," Rep. Klein told BROADCASTING • TELECASTING Thursday.

Rep. Klein's Views

Expressing personal antipathy to any form of official censorship, Rep. Klein emphasized his belief that if broadcasters fail to take a serious view of criticisms of some types of programs seen and heard on the air today "they may find themselves faced with a situation that we'd all like to avoid."

The subcommittee, he said, would like to know more about the NARTB code and its enforcement provisions, so it can decide whether the industry is capable and willing to police itself or whether some outside control is necessary to protect the public from objectionable fare broadcast into homes.

As an example of how serious could be the failure of the broadcasters to present a full and adequate answer to critics' charges, Rep. Klein cited the appearance before the subcommittee of a number of representatives of groups opposed to advertising of alcoholic beverages on the air.

"The subcommittee had no intention to get into this subject," Rep. Klein said, "but we got literally thousands of letters asking that beer and wine advertising on radio and television be stopped." This public pressure could not be ignored and the subcommitee heard the complaints of the "dry" spokesmen, he said.

Spurred by a "large number" of complaints, particularly from "church groups," Rep. Thomas J. Lane (D-Mass.) closed the June 10 session of the lower house of Congress on the subject "Is TV Running Wild?"

Although admitting he is not a regular TV fan himself, Mr. Lane told BROADCASTING • TELECASTING he was dismayed at the "cheap stuff on TV" and its effect on children. He referred to crime and horror shows and programs that featured "burley" scenes.

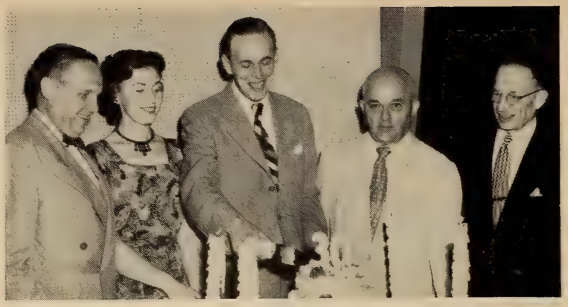
In his House remarks, the Massachusetts Congressman warned that unless the industry cleaned itself up, Congress would have to impose controls.

He also seemed to be recommending some form of "pay-as-you-see" TV. After alluding to surveys proving "that the people are willing to pay for good movies, plays, operas, prize fights and for better entertainment," he added:

"If the show is to go on and improve, there must be a combination of better taste and better financing." Excerpts from his speech follow:

The social impact of this new medium of communication is beginning to alarm the nation, because the televisers are not in a mood to discipline themselves.

Even atomic energy has to be controlled in one way or another, or it would destroy us physically.



So too much TV become subject to certain limitations before its unbridled power corrupts the taste, the intelligence, and the character of our youth.

The mass-production of murder, aggravated assaults, horrors, on TV has the effect of being a 'school for crime' to openmouthed youngsters.

And there are other sophisticated or 'cheesecake' programs which are too revealing for their tender years.

There are ways of entertaining children without keeping them in a state of morbid tension, but the brains of the new industry are working at the tabloid level and are failing to create suitable and satisfying shows for young America.

I cannot understand why advertisers do not realize their greater responsibilities to the public in this very sensitive field. Surely they don't mean to sponsor programs that will lose business.

OPEN HOUSE for persons born June 8, 1922, was held by WFBR Baltimore on its 30th anniversary the same day this year. At cake cutting are (l to r) John E. Surrick, WFBR vice president and general manager; Mrs. Regina Conzelmann, one of 13 birthday guests; Robert S. Maslin Jr., on behalf of WFBR President Robert S. Maslin, unable to attend; J. H. L. Trautfelter, vice president and treasurer, and Bert Hanauer, program director.

WALKER FETED

For VOD Contest Aid

LUNCHEON honoring FCC Chairman Paul Walker was held at the Mayflower Hotel, Washington, D. C., Friday with Allen M. Woodall, president of WDAK Columbus, Ga., as host. The luncheon was held in recognition of Chairman Walker's participation in the Voice of Democracy contest.

Dwight Clark Jr. of Fort Collins, Col., one of the four 1951-52 national winners, was a guest. Mr. Clark is being conducted on a speaking tour around Georgia by Mr. Woodall. Robert Burnett, a 1950-51 winner, also was a guest. He is employed on Mr. Woodall's stations.

Among Washington guests were Judge Bolitha Laws, Chief Judge, U. S. District Court for District of Columbia; Harold E. Fellows NARTB president; Judge Justin Miller, NARTB board chairman and general counsel; Rep. William S. Hill (R-Col.); Rep. E. L. Forrester (D-Ga.); Leeman Anderson, secretary to Sen. Richard Russell (D-Ga.); Robert K. Richards, NARTB assistant to the president and public affairs director as well as national chairman of the VOD Committee; Ray Ringson, manager of WRDW Augusta, Ga., one of Mr. Woodall's stations; Sol Taishoff and J. Frank Beatty, BROADCASTING • TELECASTING; Oscar Elder, NARTB assistant public affairs director.

GERMAN PACT

VOA, RIAS to Continue

AGREEMENT signed Wednesday with Germany permits operation of two U. S. broadcasting stations in the Federal Republic—Voice of America in Munich and RIAS (Radio in American Sector) in Hof—for an indefinite period. Both stations have been powerful anti-Communist weapons, the VOA station beaming broadcasts in several languages, including Russian, behind the Iron Curtain, and RIAS airing East German news to East Germany.

The agreement, signed by Chancellor Konrad Adenauer and Samuel Reber, acting U. S. high commissioner, was to have been signed at the time of the Bonn peace contract, but high German officials demanded time for "further study."

'PRESS' RADIO POLL

WGAR Again Wins Cleveland Paper's Honors

TOP HONORS in the *Cleveland Press'* seventh annual local radio poll went to WGAR Cleveland for the sixth straight year, according to results announced Wednesday which gave WGAR 30½ points, WERE 17½, WHK 15½, WTAM 10, WDOK 7 and WJW 1½. Winners are:

Best program: Ohio Story (WTAM), Bill Gordon (WHK), Fairytale Theatre (WGAR).

Best performer: Bill Gordon (WHK), Esther Mullin (WGAR), Bill Randle (WERE).

Women's program: Ladies' Day (WGAR), Maggie Wulff (WERE), Jane Stevens (WJW).

Children's program: Fairytale Theatre (WGAR), Toddler Time (WERE), Kousin Kay (WDOK).

Public service: City Club (WGAR), Ask City Hall (WGAR), Press Club (WHK).

Male vocalist: Reg Merridew (WGAR), Dick O'Heren (WHK), Ken Ward (WTAM).

Female vocalist: Gloria Busse (WDOK), Judy Dell (WDOK), June Anthony (WDOK).

Instrumentalist: Henry Pildner (WGAR), Walter Trimmer (WERE), Tommy McCormick (WGAR).

Live music: Clevelandaires (WTAM), Starlight Trio (WGAR), Say It With Music (WHK).

Record show: Bill Gordon (WHK), Bill Randle (WERE), Ten O'Clock Tunes (WGAR and WHK).

Disc jockey: Bill Gordon (WHK), Bill Randle (WERE), Bill Mayer (WGAR).

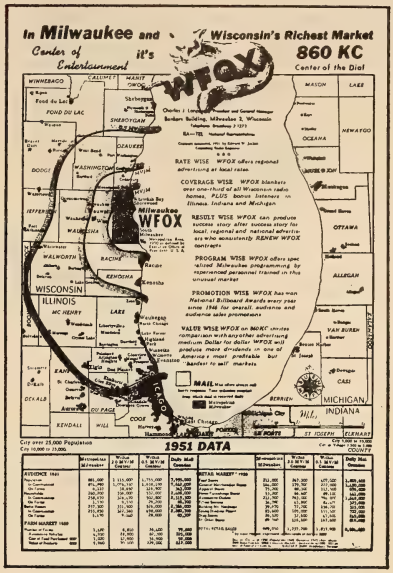
Sportscaster: Jim Dudley (WERE and WJW), Bob Neal (WERE), Jack Graney (WERE).

Newscaster: Wayne Johnson (WERE), Jim Martin (WGAR), Tom Field (WTAM).

Studio announcer: Tom Armstrong (WGAR), Tom Field (WTAM), Bob Smiley (WGAR).

Best commercial: Cleveland Electric Illuminating Co. (D'Arcy agency), Ohio Bell (McCann-Erickson), Clark Restaurant (no agency).

KGW



THE People's Choice IN PORTLAND, OREGON

1,246,540 active, young-minded Westerners comprise KGW's market in 12 big, prosperous metropolitan Oregon counties, plus a generous slice of Southwestern Washington.

REPRESENTED NATIONALLY BY EDWARD PETRY & CO., INC.

want to meet more national advertisers?

...at the time they are considering your market and how best to cover it?

A Service-Ad like this takes advantage of an important fact—CONSUMER MARKETS is used continuously by men seeking market information . . . and always with the underlying purpose of finding the best way to reach the right people in the markets they select.

All year 'round thousands of national advertisers consult CONSUMER MARKETS. Here is a busy traffic point where you can "meet more national advertisers." Here your Service-Ad can interpret the facts about your market; tell how your station serves your trading area.

Look at it this way—nobody, except perhaps an occasional college professor, ever opens a copy of CONSUMER MARKETS just for the sake of assembling statistics. Nearly *everybody* who uses CM is interested in *markets for a specific product;* and has an interest in *how best to cover each market.*

Your Service-Ad next to the data on your market encounters: *Sales Managers* working up market plans • *Advertising Managers* originating or revising campaigns • *Account Executives* drafting proposals or defending those they have already made • *Research Directors* making comparative market studies • *Media men* planning and preparing lists.

More than 450 separate media placed Service-Ads in the 1951-52 edition of CM to help their prospects make better use of the market facts it contains.

1952-1953 edition, to be issued in September, closes July 1st, 1952

how national advertisers use CM

Assistant Research Director, Large Advertising Agency: "I would say that the principal use we make of CONSUMER MARKETS is in connection with our test market work, of which we do a good deal. An important stage in these tests is the determination of typical towns in which the tests will be conducted; and also to define the areas that we would want to use or would consider using from a research point of view."

Account Executive, Large Advertising Agency: "CONSUMER MARKETS is a terrific book. I was in the Media Department before I became an account executive, and I used it constantly. It combines all the information about a market, in capsule form, that I would normally have to go to several sources for. It is a wonderful handbook to have around."

Media Buyer, Medium-to-Large Advertising Agency: "I have found the maps in CONSUMER MARKETS extremely useful; it is the only source I know of where the maps are set up in so helpful a form."

Market Research Analyst. Medium Sized Advertising Agency: "Our clients expect us to spend their money where it does the most good, so we concentrate the advertising in those regions which have a good potential. We use CONSUMER MARKETS for the breakdown of markets for the retail sales potentials, and if the client asks us to justify our selection of regions, we refer him to the statistical information that CM gives us."

Plug-Uglies (The McCoys)

IT IS futile to try to estimate, within the limitations of a margin-of-error that does not approximate the size of the national debt, the value of radio and television advertising that is being, has been, and—unless firm corrective measures are taken—will be given away for absolutely nothing through the device known, rather innocuously, as the "free plug."

Broadcasters and broadcasting would be far better off, however, if all hands would pause for a few minutes to attempt to make such an estimate, despite the unlikelihood that anyone would reach a reasonably accurate dollar figure.

The menace of the free plug—that is, the free mention of a product or service on a program which is sponsored by some other advertiser, or, indeed, not sponsored by anyone—and the machinations behind it were examined in detail last week [B•T, June 9].

We do not quarrel with contentions that some plugs are "good"—i.e., that they "contribute something" to the program. Our prime complaint is against the type of plug which indiscriminately employs brand names in gags and stunts which never would have been used if the writer, performer, producer—or somebody—had not been offered a case of liquor or some other reward which is equivalently inexpensive, compared to the advertising value received, for getting the names mentioned on the air.

It is time for broadcasters to appraise the entire free-plug question and to take firm action—punitive action, if necessary—to put a stop to practices which give advertising time away for nothing and alienate audiences in the process. The problem is big enough to demand, too, the attention of an overall radio-television committee or organization. Radio's BAB already has shown an interest (see story, this issue). We commend it also to the NARTB.

Machine Against TV

UNTIL THIS Presidential year, the elections have been decided, machine against machine. That has been so at the nominating conventions. It has carried through to the elections.

This year, it's crystal clear that it's machine against TV. The travail over TV time has exceeded even that which had been predicted. The Eisenhower forces obviously are pinning their hopes on the open-faced sincerity of their candidate. They want all the preliminaries of the GOP convention on the air, to offset the steam-roller power of the Taft organization.

On the other side of the political street, the Democrats, with no candidate yet in clear focus, are making quiet but detailed TV plans. They have drafted into their camp an old hand at air campaigning—J. Leonard Reinsch, and his consulting duties are exclusively TV.

In no other national campaign can we recall anything approaching the tugging and hauling over radio and TV time. Section 315 of the Communications Act, prescribing equal time for qualified candidates, is becoming better known to the electorate than Point Four. Crackpots and other irresponsible people seeking public office are being given *open sesame* to the microphones and cameras on equal footing with bona fide candidates, by simply citing Section 315 to the FCC.

The Kefauver lesson has been learned by the politicians. The appearance and the manner of a candidate, given access to the TV networks and 75 million people, may well offset the power of the well-oiled political machines.

As for Section 315 relief, it looks like a forlorn hope until the campaign is over. It's a simple case of the political controversy being too controversial for the politicians in an election year. The broadcasters themselves actually did little to protect themselves. If, for example, they had charged the candidates for the lines and cables (not for the time) many of the irresponsible elements invoking Section 315, for free, would have just dried up.

The time to do the 315 job is in an off-election year, when things are quiescent.

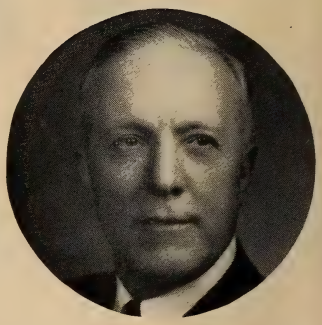
We're not given to political soothsaying. But we'll venture the 1952 Presidential elections will be won and lost on the air.

Murder at Midnight

UP ON Capitol Hill they're pondering a whodunit that wends its mysterious way from the FCC to the White House to the House floor.

Who killed the McFarland Bill (S-658), was the question? After many months of doing, this measure, which would take away from the FCC staff the authority it had usurped, finally hit the House calendar. It was to have been considered by the House last Thursday. On Tuesday, Majority Leader McCormack summarily announced that the bill would be replaced and that there would be no time this session to consider it.

Things began to happen. Senate Majority Leader McFarland, author of the measure which had passed the Senate four times, hit the war-path. It wasn't long before word seeped out that the White House had instructed Mr. McCormack to kill the McFarland Bill. And to the White House went Sen. McFarland, who for six years had shepherded his bill through the tortuous legislative processes, and against persistent sabotaging by FCC people.



What transpired between Wednesday and Thursday may never be pieced together. But enough happened to cause Mr. McCormack to announce on Thursday that it was all a mistake and that the McFarland Bill would be rescheduled for consideration this week. That there was White House intercession isn't refuted. And the participation of certain FCC people can't be, since it is the only agency, public or private, that has voiced objection.

Now the McFarland Bill, as revised by the House, is far from perfect. Broadcasters won't go along with its suspension and fine provisions—tantamount to the supreme penalty and as objectionable as revocation. Nor do the larger entities like the "double jeopardy" provision. There's opposition from the whole FCC to the provision that would isolate the Commissioners from the staff. The House proposal that would specify non-discrimination against newspapers, thereby implying that they should get preferential treatment over non-newspaper applicants certainly lacks unanimous endorsement. (It's better to provide there shall be no discrimination because of the nature of the applicant's business.) We have looked with trepidation upon the provision permitting "cease and desist" orders.

At all events, there was the tacit understanding that differences between Senate and House would be composed by the conferees. Everything was in order—until the White House, goaded by one or more individuals at the FCC—moved in.

It looks like there'll be legislation after all, thanks to persistence and courage of Sen. McFarland. We think FCC Chairman Walker should ascertain forthwith who went to White House Presidential special counsel Charles S. Murphy with the anti-McFarland Bill pitch. We doubt whether Mr. McFarland or Chairman Ed Johnson of the Senate Interstate Commerce Committee will allow this to become a closed incident without explanation.

our respects to:

CLEM JOHN RANDAU

A WIDELY-KNOWN radio and newspaper executive for over 30 years, Clem J. Randau is looking westward and reappraising his place in the broadcasting industry after taxing but rewarding service with the federal government.

This westward movement is spelled out in Mr. Randau's purchase, subject to FCC approval, of KXOB Stockton, Calif.; another step in a variegated career that has spanned radio, newspapers, oil interests, a press association and other pursuits.

This reappraisal is indicated by the fact that Mr. Randau is moving to Stockton and resuming radio interests after some 16 months with the Federal Civil Defense Administration. It may safely be reported that the native-born Iowan will not find himself embarked in strange waters despite his semi-retirement prior to government service.

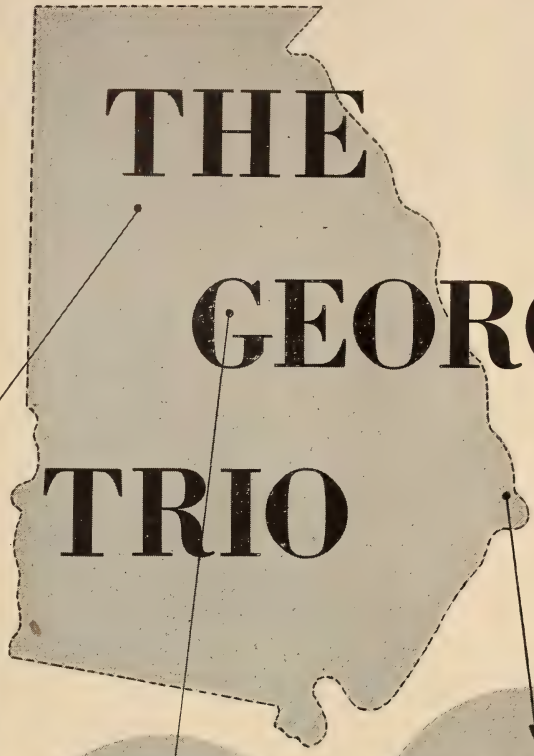
Mr. Randau resigned his FCDA post last April 30. From January 1951 to May 1952 he survived the rigors of office with no noticeable scars, though the task peculiar to alerting America on civil defense is generally a thankless and unenviable one.

FCDA's success has been due in no small part to Mr. Randau's acceptance of myriad duties and responsibilities. Originally special assistant to Millard F. Caldwell Jr., agency administrator, and later executive director of FCDA, Mr. Randau functioned at top strata as chairman of its Policy Committee.

"My work with [FCDA] is the most challenging and toughest assignment I have ever tried," he has freely acknowledged.

While he retired from active business in 1947, Mr. Randau retained some newspaper and oil interests and still is director-minority stockholder in WNEW New York. He also was president-director of KFBI Wichita, Kan., in the late '40s.

As a result of the new transaction, he and his wife will own 55% of stock in KXOB, an MBS affiliate on 1280 kc with 1 kw. Mr. Randau, with other principals, bought the station from Lincoln Dellar for a reported $200,000.



"Having learned the radio business at the top, I'm starting now to learn radio and TV in orderly fashion," Mr. Randau explains in reference to KXOB to which he plans to devote his time.

A modest man in demeanor and disinclined to discuss his own achievements since he began learning the business topside, Mr. Randau has, nevertheless, certain accomplishments

STANTON P. KETTLER (l), southern district vice president, Storer Broadcasting Co., presents an award to Jack Callaghan, who was named the 1951-1952 outstanding member of the U. of Miami radio and TV department. Presentation was made Memorial Day at a dinner, jointly staged by the department, Alpha Epsilon Rho honorary radio fraternity, and the Television Advisory Council. Mr. Kettler is retiring chairman of the Advisory Council.

PHILCO'S 'CHEF'

Recipes Beamed by WRUL

WRUL BOSTON has just begun a novel feature as part of *Philco Rendezvous*, a weekly program beamed at Latin America.

The station selected a "Chef of the Month" to share a favorite recipe with listeners in the West Indies, Central and South America. The June selection was Chef Manuel Orta of New York's Hotel Pierre. Mr. Orta, a native of Spain, broadcast in both Spanish and English. After the program, Philco International Corp., the sponsor, offered a special recipe to listeners upon request. Programs originate in New York and are carried by leased wire to five transmitters at Boston.

WRUL is independently owned and operated by Walter S. Lemmon, president of World Wide Broadcasting Corp. Mr. Lemmon commented, "It occurred to me that a similar type of program might be of value to many of the managers of local radio stations who could use the idea for food and restaurant accounts in their own areas."

KBIG AVALON

New Station Is on the Air

KBIG AVALON, Santa Catalina Island, Calif., 10 kw on 740 kc, began operations June 1 with ceremonies and program previews.

In a day without commercials, mayors of 24 Southern California communities gave brief welcoming talks from Hollywood studios at 6540 Sunset Blvd. Many radio, TV and motion picture entertainers also added their greetings.

John H. Poole, licensee of experimental UHF station KM2XAZ Los Angeles, and former owner of KALI Pasadena, is owner-operator of KBIG. Cliff Gill is operations manager and Robert J. McAndrews, commercial manager.

The staff includes Stuart Wilson, production manager and director of special events; Alan Lisser, program director; Carl Bailey, disc jockey; Gene McGhee, John Haradon and Larry Berrill, announcers; H. Phillip Dexheimer, Joe Seideman, Carl Hill and Wayne Muller, salesmen; Gordon Calcote, Sam Margolin, William Dalton and Judson Edwards, engineers, and Phillis Nungester, traffic manager.

HOLLYWOOD AD CLUB

Morgan Elected President

JAMES MORGAN, vice-president in charge of radio-TV, Raymond R. Morgan Co., last week was elected president of Hollywood Advertising Club. He succeeds Robert J. McAndrews, commercial manager, KBIG Avalon, Calif. Mr. Morgan served as club vice president during the past year.

Harlan Palmer, managing editor and assistant to the publisher, "Hollywood Citizen-News," and Donn B. Tatum, ABC Western Div. director of television, were named first and second vice presidents, respectively. Elected secretary was Benton Paschall, vice president of the suspended Liberty Broadcasting System. Irving Eckhoff, partner in Roche-Eckhoff & Assoc., Hollywood agency, was named club treasurer.

New to the board of directors are Leon Wrey, sales manager, KHJ Hollywood; Robert C. Coleson, West Coast representative, Advertising Council Inc.; Mary Roche, sales representative, United Air Lines; David R. Showalter, assistant manager-publicity director, National Safety Council, Los Angeles.

T. H. PATTERSON, manager, WRRF Washington, N. C., elected president of city's Lions Club. . . . **T. E. PAISLEY Jr.**, assistant to sales director, WFIL Philadelphia, father of girl, Melissa, May 28. . . . **BOB COVINGTON**, assistant vice president, WBT and WBTV (TV) Charlotte, N. C., father of boy, May 26. . . . **LEE GORE**, account executive, WOAI-TV San Antonio, and Jane Seligmann Strauss were married June 6.

V. D. RAMSEUR, president, WAKE Greenville, S. C., elected president of city's Chamber of Commerce. . . . **EDWARD LAMB**, president, Edward Lamb Enterprises, to sponsor 1952-53 season of Junior Concerts by Toledo Orchestra. . . . **CHARLES E. SALIK**, president, KCBQ San Diego, presented plaque by city's Council of Churches on behalf of station's "outstanding community service."

CHARLES A. COMISKEY, former vice president in charge of sports for Liberty Broadcasting System, returns to Chicago and the White Sox baseball team as vice president.

ANNE NELSON, administrative assistant director of business affairs, CBS Radio, Hollywood, mother of girl, Gaye, June 9. She is wife of **HARMON NELSON**, assistant to vice president **ROBERT WOLFE**, Keynon & Eckhardt Inc., that city. . . . **IRA HIRSCHMANN**, president, WABF(FM) New York, was guest of Holland Music Festival Committee at annual cultural event at The Hague June 15.

JOINT FM TEST

Drafted for Regional Use

JOINT campaign, developed in a series of experimental FM promotions, has been drafted by NARTB and Radio-Television Mfrs. Assn. for regional use. A score of areas are on the waiting list and will be selected if there is a community of interest in FM development and evidence that broadcasters and distributors want to cooperate.

The formula was developed in North Carolina, Wisconsin and District of Columbia. It was credited with selling over 9,000 FM sets. Currently a joint AM-FM promotion is under way in New York state (exclusive of Manhattan). The details will be included in a guide titled "How to Sell More Radio Sets With F-M-phasis."

Two key selling aids will be offered participating distributors at cost by RTMA: Industrywide FM display piece at $1.70 each and self-mailer dealer brochure on FM Month at $84 per thousand. Manufacturer-wholesaler strategy is guided by an RTMA subcommittee headed by David H. Grigsby, Zenith Radio Corp.

No Longer Experimental

J. H. Smith Jr., NARTB FM director, said announcement of plans to extend the project marks the end of the experimental period and stamps the promotion formula as a "proven product." Mr. Smith supervised development of the plan. He added:

Conditions in each market now become the primary factor. There must be a sound sales reason for FM throughout the area involved and a uniform interest by the FM stations in that area in telling their own FM stories. Radio listeners in the area must be able to get either more program choices or greater hearability on an FM-equipped receiver. Broadcasters must be enthused enough to work hand-in-hand with radio dealers and to carry spot announcements boosting FM. Distributors must really want to move FM sets. The geographic size of an ideal campaign area is entirely dependent on its FM cohesiveness. It is for these reasons that the two associations must now ask requesting stations to take the initiative in selling the idea to their contemporaries.

James D. Secrest, RTMA general manager, who is liaison with NARTB in the promotions, said areas selected for the campaign can be assured of adequate distribution of FM-equipped receivers. He said scheduling will be determined by RTMA's committee so timing can be geared to production and can avoid conflicts with "selling seasons" in other appliance lines.

Areas that have requested campaigns are: Alabama, Tri-state Mississippi River area, New York City, Florida, Northern Illinois-Chicago, San Antonio, Philadelphia, Eastern Ohio, Boston, outstate Massachusetts, Pittsburgh, San Francisco Bay, Greater St. Louis, Indiana, Michigan, Georgia, Iowa, Kentucky, Cleveland and South Carolina. Future requests must emanate from NARTB members, although non-members can participate in the drives.

DETROIT GREETING is extended to Charles L. Shugert (second from left), Shell Oil Co. assistant advertising manager, on his visit there. Left to right: Gayle V. Grubb, managing director, WJBK-AM-TV; Mr. Shugert; "Miss Activated"; Tom Harker, Storer Broadcasting Co. national sales representative.

NPA APPROVALS

Given 15 Radio-TV Projects

APPROVAL of 15 radio-TV construction projects amounting to more than $12 million for the third quarter of 1952 was announced by the National Production Authority last week.

The total approvals for 830 construction projects amounted to more than $1 billion. For 54 electronics and communication equipment projects, of which radio-TV is a part, total approvals amounted to $96,656,178. Bulk of approvals in that category were for expansion of electronics manufacturing facilities.

Most of the 15 radio-TV projects were for TV expansion, although the list also included one community TV system—Vermont Television Inc., Barre, Vt.

Radio-TV Authorizations

Following is a list of radio-TV approvals followed by the total amount of the project:

Clark Associates Inc., Binghamton, N. Y. (WNBF-AM-FM-TV), new offices and studios, $300,000; Columbia Broadcasting System Inc., Los Angeles, Calif. (KNXT (TV)), four TV studios, $5,330,000; Allen B. DuMont Labs. Inc., New York (WABD (TV)), TV offices and studios, $1,750,000; Empire Coil Co., Cleveland, Ohio (WXEL (TV)), TV tower, $47,695; Storer Broadcasting Co., Detroit, Mich. (WJBK-TV), TV tower and transmitter building, $299,504; Havens & Martin, Richmond, Va. (WTVR (TV)), TV tower, $165,000.

KTAR Broadcasting Co., Phoenix, Ariz. (KTAR), new quarters, $400,000; National Broadcasting Co., New York, N. Y. (WNBT (TV)), wiring new equipment, $8,500; National Broadcasting Co., Los Angeles, Calif. (KNBH (TV)), two studios, $2,700,000; Radio Broadcasting Inc., Hot Springs, Ark. (KTHS), construction of new station in Little Rock, Ark., $295,313.

Southern Radio & Television Equipment Co., Miami, Fla. (WTVJ (TV)), TV antenna system, $50,000; Vermont Television Inc., Barre, Vt., community television system, $26,000; Wachusett Broadcasting Corp., Fitchburg, Mass. (WFGM), TV antenna system, $118,569; WHEC Inc., Rochester, N. Y. (WHEC), remodeling and new building, $419,023; WWSW Inc., Pittsburgh, Pa. (WWSW-AM-FM), new radio tower, $60,803.

SMPTE Region Meet

THREE television-film topics are on the agenda of the Pacific Coast Section, Society of Motion Picture & Television Engineers, meeting at ABC Radio Center, Hollywood, tomorrow night (Tuesday). George Cain and Rudolph Vlasak are to discuss "The Teleprompter." Sid Solow is to speak on "Current Motion Picture and Television Practices in England and France." Frank J. Somers is to talk on "Video Effects."

'VOTE' CAMPAIGN

KMBC, KFRM Set Example

OUTSTANDING example of how stations are helping get out the vote is being shown by KMBC and KFRM, both Midland Bcstg. Co. stations in Kansas City, Mo.

"We are spending nearly a thousand a day in air time," said Harold W. Storm, stations' promotion director, adding that there were "over 6,000 new registrants in Kansas City, Mo. yesterday [June 9] alone."

Drive was begun in mid-May under the banner, "Make the Heart of America Truly American." All live broadcasts are carrying a reminder to listeners to register. Station breaks have been designed to carry the slogan—"Be American —Register and Vote!" This same slogan has been incorporated into drop-in slugs of various sizes and furnished in mat form to newspaper advertisers in Greater Kansas City and the entire trade area.

In addition, stations are giving full cooperation to civic workers doing house-to-house campaigning, and to organizations engaged in similar efforts.

TAREN Corp., Hollywood, packaging quarter-hour radio and TV version *Handy Andy Show*, which features title character demonstrating use of everyday tools in making household articles and repairs.

CAB CLARIFIES

Network Salute to Queen

SPECIAL anniversary tribute network broadcast last Monday on Queen Elizabeth's birthday was conceived by a group of private stations in Montreal and marks the first time in 15 years the Canadian Broadcasting Corp. has given permission for a coast-to-coast private station network in Canada, the Canadian Assn. of Broadcasters has emphasized.

CBC assumed the cost of lines only for those stations which normally receive its network services. Line, program and other costs for the special broadcast were to be assumed by the privately-owned stations involved who do not regularly receive these services, the CAB said. The broadcast also was scheduled in the U. S. on a 1,000-station network by NBC, ABC and MBS, and in Britain by the BBC. CAB expressed thanks to CBC for assuming costs as indicated and to the artists and musicians unions for their cooperation in the broadcast.

No Curtailing Curley

JAMES M. CURLEY, 77, former Massachusetts governor, four times Boston mayor and former U.S. Congressman, who was pardoned by President Truman after serving a prison sentence on mail fraud charges, was scheduled to begin today (Monday) as a commentator on WBMS Boston. An announcement of Mr. Curley's three one-hour broadcasts weekly on politics and Irish independence, said, "It is specifically stipulated in the agreement that he is to be allowed to talk about anything he pleases, without censorship or hindrance for the station."

air-casters

ROBERT HITCHINS promoted to supervisor of sales promotion, NBC radio network, succeeding **HAROLD W. SHEPARD** now manager of sales development, advertising and promotion for NBC Spot Sales [B•T, May 26].

CHARLES E. McDANIEL to production staff, WHAS-TV Louisville.

Mr. McDaniel

JOE O'NEILL, musical director, KVOO Tulsa, Okla., appointed program director succeeding **TOM DeVORE**, now director of area development, new department created by KVOO.

BARBARA LYNCH appointed traffic manager, WCBT Roanoke Rapids, N. C., succeeding **BARBARA TURNER BRADLEY** who has resigned.

DR. ROY K. MARSHALL, educational director, WFIL-AM-TV Philadelphia, presented with honorary Doctor of Science degree at annual commencement of Philadelphia College of Pharmacy and Science.

JOHN S. STANLEY, parttime announcer, WDRC Hartford, Conn., joins station fulltime following graduation from Trinity College, Hartford.

CAPT. MAURICE DALLIMORE, account executive, D. J. Keymer & Co., Bombay, India, and formerly with Indian Army, to NBC-TV New York's advertising staff handling network sales space advertising.

RICHARD A. COBB, radio producer, WBZ Boston, received Master's degree at Staley College, Brookline, Mass.

LYNN GEORGE, WSVS Crewe, Va., to WPAZ Pottstown, Pa., as women's feature and Hollywood news broadcaster.

WALTER WHITE, author, newspaper columnist and executive secretary, National Assn. for Advancement of Colored People, adds duties of radio commentator with weekly program at WWDC Washington.

JACK KRUSCHEN, Hollywood radio actor, assigned role in Republic Pictures feature film, "Tropical Heat Wave."

A. WAYNE BAKER named promotion manager, KSL Salt Lake City.

NORMAN REED, program director, WWDC Washington, presented Commissioners Traffic Advisory Board Award on behalf of station.

NICK NELSON, star of KTTV (TV) Hollywood *Mr. Whistle*, cited for "outstanding showmanship in the field of juvenile entertainment" by Hollywood Actors Council.

FRAN ALLISON, star of NBC-TV's *Kukla, Fran & Ollie*, was guest of honor at Coe College, Cedar Rapids, Iowa, her alma mater, at annual alumni dinner June 7.

WILL JONES, photographer, WSYR Syracuse, graduated from School of Speech and Dramatic Art, Syracuse U.

GUY EWING, WEOL Elyria, Ohio, to WGAR Cleveland, as summer replacement announcer. **KATHY CONWAY**, WHK Cleveland music librarian, to WGAR in same capacity replacing **HELEN MAE KAMPS** who transfers to traffic.

NORMAN NOWICKI, TV floor manager, WTMJ-TV Milwaukee, and **ROBERT PETRIE**, program director, WHBY Appleton, Wis., appointed producer-directors at WTMJ.

Mr. Nowicki

Mr. Petrie

RALPH EDWARDS, star of NBC radio *Truth or Consequences* and NBC-TV *Ralph Edwards Show*, named best groomed male personality in radio-TV by National Men's Fashion Pageant.

FRANK DANE, actor on NBC-TV's *Hawkins Falls*, father of a son June 3.

HELENE SATINOVER, continuity supervisor, WFIL-TV Philadelphia, and Dr. Bertram A. Ruttenberg will be married June 22.

JEFF WAUGH, continuity chief, WDVA Danville, Va., father of girl, Candice. **BOB CLARKE**, station's new promotion director, father of girl, Elizabeth.

BY COLVIG, copy writer, ABC Hollywood sales promotion department, father of girl, Malinda, June 2.

***News* • • •**

RAY SNYDER, chief announcer, WWSW Pittsburgh, adds duties of news editor.

JACK BILLINGS to KUGN Eugene, Ore., news staff as AP correspondent after recent separation from U. S. Marine Corps.

CLIFTON UTLEY, NBC Chicago local and network commentator, elected to board of directors, South Side Crime Commission.

CANADIAN RATINGS

Elliott-Haynes Reports

FOUR CANADIAN evening programs are listed among the first ten during May, according to the national rating report of Elliott-Haynes Ltd., Toronto. Leading the Canadian evening network shows were *Charlie McCarthy* with a rating of 29.1, *Radio Theatre* 28.3, *Amos 'n' Andy* 26.4, *Our Miss Brooks* 23.7, *Twenty Questions* 18.5, *Take a Chance* 18.2 (Canadian), *Ford Theatre* 17.8 (Canadian), *Great Gildersleeve* 17.7, *Share the Wealth* 16.3 (Canadian) and *Treasure Trail* 16 (Canadian).

Daytime leading five programs were *Ma Perkins* 16, *Big Sister* 15.8, *Pepper Young's Family* 14.4, *Happy Gang* (Canadian) 14.3, and *Road of Life* 14.2.

KGAE OPENING

Oregon Outlet Begins

DEDICATION programs marked the first day on the air for KGAE Salem, Ore., on June 2. The new station is on 1430 kc with power of 1 kw day, according to W. Gordon Allen, director of operations who also operates KGAL Lebanon, Ore.

Other staff members are: Tom Kelly, business manager, formerly of WCDL Carbondale, Pa.; Byron Stevenson, news director, formerly of KERG Eugene, Ore.; Del Olney, program director, formerly of KGAL; David B. Thompson, chief engineer, a veteran of 20 years at KOAC Corvallis, operated by the State Board of Higher Education and Oregon State College, and Pat Withers, traffic manager, from the U. of Oregon.

Hollywood Ad Club Meet

TAPE recording for radio and television will be discussed by Boyd McKnight, field engineer for Minnesota Mining & Mfg. Co. and Harry L. Bryant, vice-president, Radio Recorders, at a Hollywood Ad Club meeting in the Hollywood Roosevelt Hotel today. Jack O'Mara, media director, John I. Edwards & Assoc., Hollywood agency, will preside.

NBC PUBLIC SERVICE

Messages Are Personalized

PUBLIC service messages prepared by the Advertising Council and aired on a number of programs weekly get special treatment once a day on the NBC radio network: People, personally affected by the organizations, tell by transcription of their experiences.

Primarily responsible for illustrating "the human interest in terms of the people themselves," to use her own phrase, is Hilda Watson, assistant to NBC's Ed Stanley, who started the whole thing with an announcement for the Girl Scouts of America last March. Miss Watson decided to have a girl scout make the organization's appeal and ended up with a 55-second report from a blind child who told how, as a scout, she helped others learn she did not require extraordinary help by becoming the group's fastest walker.

Since then, public service messages have been delivered on Cancer by doctors, nurses and researchers; on the need for nurses' aids by hospital personnel; on forest fires by parachutists who fought blazes; school children who gave graphic explanations of the need for highway safety, and many other such personalized messages.

One transcribed message is included every Monday, Wednesday and Friday on the network's sustaining Merrill Mueller program; Tuesday and Thursday on the morning *World News Roundup*."

Our Respects To

(Continued from page 56)

which are a matter of record. One involves his service with United Press, in the mid-'30s, which served as the springboard for UP's entrance in the radio field.

He also compiled an enviable record with Field Enterprises Inc., helping to put the Field radio-newspaper properties on a more profitable basis in the past 10 years.

A cornhusker by birth (Jan. 7, 1895) and the son of Fred and Bertha (Eymann) Randau, youthful Clem, his brother Carl and mother moved to Wellington, Kan., about five years after his father's death. In 1906, they settled in Los Angeles.

As a youth, Mr. Randau toiled as carrier boy and, later, advertising clerk for the *Los Angeles Express*. He became an advertising salesman at 18, worked his way through high school and entered Stanford U. in 1914 on the strength of his savings.

In a throwback to those times, Mr. Randau recalls that the major universities and high schools played rugby instead of American-style football—by presidential decree at Stanford and California. When a knee injury curtailed his rugby activities, he dabbled in track and became proficient at tennis.

In the summer, young Mr. Randau sold Wear Ever cooking utensils house to house, "hashed" for his board, kept books for the University Press, acted as agent for the Pacific Navigation Co. and helped found the Stanford *Illustrated Review*, of which he was business manager.

In the summer of 1916, Clem and Carl Randau shelled out $400 for a Ford to peddle Wear Ever. Their earnings came to about $800 "but we were puzzled by the problem of supporting the Ford during the school year," Mr. Randau recalls. But it worked out: "We bet $500 on Woodrow Wilson to beat Charles Evans Hughes for the Presidency. Our bets were scattered over the Stanford campus. Wilson squeaked by, so we were able to keep the Ford."

Worked for 'Review'

As a Stanford junior, Clem Randau found life hectic, soliciting advertisements for the *Review*, and he admits his grades "dropped off seriously—but not quite to the flunking-out stage." That fall he helped organize the First Stanford Ambulance Unit, which went to France. A second was formed early in 1917 and Mr. Randau was set to leave with it when World War I broke.

Mr. Randau then enlisted in the Aviation Section of the U. S. Signal Corps (now the Air Force). After two months training at Cornell U. "ground school," he was sent to Foggia, Italy. He received his wings and commission about Christmas 1917. After being shunted around, 1st Lt. Randau was named officer-in-charge of flying at

BONE-RATTLING warning to motorists was anchored along U.S. Highway 81 by WNAX Yankton-Sioux City, S. D., as part of a three-day safety program. This reminder, and safety announcements on station breaks, plus an accurate count of highway mishaps in the area which was reported on each newscast, comprised the station's Memorial Day safety drive.

Field Seven, Issoudun—training field for the Third Aviation Flying Center.

Lt. Randau won a promotion to captain in the fall of 1918 and got himself assigned to the front with the 22d Squadron, Second Pursuit Group, First Army, AEF. Dissatisfied with his lack of service there, Capt. Randau dickered with the Bolivian Military Mission in Paris for a position of chief of its air service. He also applied for service with the Kosciusko Squadron.

But he by-passed these ventures and attended Sorbonne U. in Paris for four months. He also reunited with his brother Carl, who by then (spring of 1919) was covering the Peace Conference in Paris.

Returning to the U. S. that year, Mr. Randau wanted to re-enter Stanford to complete his senior year. After three days he quit—and joined UP as a reporter. (Stanford later gave him an A.B. by giving him credits in view of his military service and Paris courses.)

He pushed rapidly ahead as a reporter. He covered the 1920 Democratic National Convention in San Francisco, the Jack Dempsey "slacker" trial, and the famous Armistice Day murder trial at Centralia, Wash., among other newsworthy events.

After other Pacific Coast assignments, Mr. Randau was shifted in 1921 to UP's sales staff in New York where he left his mark of progress. During the next 20 years he became salesman, division manager, sales manager, general business manager and finally vice president—with considerable worldwide travel thrown in.

Under Mr. Randau's guiding hand, UP launched its radio client service—in the mid-30's—and beat out its competitor, Associated Press, by at least two years. Additionally, the service contributed to UP's eminence in the news service field, Mr. Randau feels.

In 1942, Mr. Randau was appointed business manager of the Fields' *Chicago Sun*, then gasping for breath (and now breathing easier as the *Sun-Times*). He later became vice president of Field Enterprises Inc., which also owns WJJD and WFMF (FM) Chicago; KOIN-AM-FM Portland, Ore., and KJR Seattle, Wash. Also part of the Field empire are Pocket Books Inc., and a controlling interest in Simon & Schuster and World Book Encyclopedia Inc.

KFBI Interest

After Mr. Randau quit the *Sun* in November 1946, he bought interest in KFBI Wichita, of which he was president; Illinois-Wyoming (Oil) Co., which he also headed; Faresac Co.; and the *New Milford* (Conn.) *Times*, of which he still is co-publisher. He also has served on WNEW New York's board of directors the past five years, and is a director of the New Rochelle, N. Y., Coal and Lumber Co.

Though it generally was not known at the time, Mr. Randau's appointment to FCDA shortly after its formation in December 1950 resulted from a long distance telephone call from Washington. W. Stuart Symington, then chairman of the National Security Resources Board, prevailed upon the radio-newspaper executive to join the agency and help fight the home front battle.

"If, as all reports indicate, America is likely to be attacked by Russia, there is no more important work that anyone can do to help inspire Americans to prepare to meet and defeat such an attack," he remarked. As Policy Committee head, Mr. Randau watched FCDA mushroom in importance within two years and command the cooperation of radio, TV and other media toward a common objective despite the always present lack of federal funds. Some months ago, he and his wife took an extended business-social trip to Europe.

Mr. Randau married Beatrice M. Lyons, a former *Boston Telegram* reporter, on Jan. 30, 1926. They have two sons, John, 21, and Paul, 20, who attended Yale U. in recent years, and now at Stanford. John, who graduates this year was a Yale correspondent for UP, and is an aspiring journalist. Paul's inclinations lean toward becoming a doctor. Mrs. Randau has engaged in voluntary hospital work "and has so far resisted my urgings that she take up writing as a profession," he adds.

Mr. Randau has been a member of the American Legion, Sigma Chi, and Sigma Delta Chi professional journalism fraternity. He numbers among his clubs the Union League, the Tavern Club of Chicago, the Stanford Club of New York and the National Press Club of Washington—with membership at one time or another.

Some years ago Mr. Randau resumed piloting "strictly for pleasure, and only in small planes." His other current recreations, which presumably will not suffer for lack of suitable climate in California, are golf "and sedate tennis."

'HAMS' FIELD DAY

6,000 to Participate

MORE THAN 6,000 amateur radio operators will participate in a 24-hour demonstration of disaster communications facilities this Saturday and Sunday during the 16th annual field day sponsored by the American Radio Relay League.

To simulate actual emergency conditions, field day stations will be set up away from commercial electric power, according to F. E. Handy, league communications manager. He said each station in contact with other stations will transmit brief messages of the location and a signal report.

Portland Radio Homes

STANDARD metropolitan area of Portland, Me., contained 33,985 radio homes, 98.3% of the 34,565 homes tabulated by the Census Bureau, according to figures just compiled by the bureau. The Maine radio-TV census count showed the state with a 96% radio saturation [B•T, June 9]. The Portland SMA TV count as of April 1950 was 330 sets, a 1% TV saturation. Portland's urbanized area had a 98.3% radio saturation, or 32,150 of 32,710 homes reporting. There were 300 of the 32,505 reporting homes with TV, a saturation of 0.9%. The Portland incorporated area had 22,375 radio homes out of 22,835 reporting. This area had TV in 195 of 22,665 homes.

Adage Disproved

CONTRARY to popular opinion, lightning can strike twice in the same place, according to report from WCHS Charleston, W. Va. Bill Dixon, chief engineer, relates a bolt of lightning struck one of the WCHS towers last month causing $600 damage and putting the station off the air for an hour. Thirteen hours later, same tower was struck again. Second time the station was unable to broadcast for 15 minutes but cost of the repair was negligible.

New GE Tube Plant

GENERAL ELECTRIC Co. opened its new $6 million electronic tube plant to the public last Thursday, following dedication ceremonies at the plant near Anniston, Ala. Principal speaker at the ceremonies was Dr. W. R. G. Baker, GE vice president and general manager of the company's Electronics Div., of which the Anniston Tube Works is a part. By next year, it was said, the plant will employ an estimated 2,000 persons, 85% of them women, in production of miniature glass receiving tubes for radio, TV and a variety of other communications and industrial equipment.

Strictly Business

(Continued from page 18)

with the dog days of February and March.

Mr. Kelley, a young and energetic newcomer to the station representative field, has covered midwest agencies for The Walker Co. since last October. Selling some 50 AM stations, he works out of Chicago and in Detroit, Cincinnati, St. Louis and Cleveland.

He went to Walker from WAAF, the *Drovers Journal* station in Chicago, where he sold and serviced local accounts on the music-news independent, which concentrates its coverage on the metropolitan area. Previously, at WOKZ-AM-FM Alton, Ill., he was sales manager.

Mr. Kelley's first job after attending Loyola U. in Chicago was selling space for a trade publication. At school he majored in English and philosophy, and was feature editor of the college newspaper.

A native Chicagoan, he is unmarried and lives with his parents on the city's far north side. In the summer, he carries on his winter habits of listening to the radio and watching television, adding in Chicago's heat, mint juleps and golf.

A theorist as well as a pragmatist when it comes to radio and TV, Mr. Kelley works closely with his stations, advising them on agency buying trends which he foresees. A current trend is the desire on the part of almost every agency and client, "the biggest ones, too," to find out in advance what a station will do in the way of merchandising and promotion. Many times, he says, contracts are placed with this knowledge in mind.

MAN BITES DOG

Editor Salutes Radio, TV

AN EDITORIAL in the *Hardin County Enterprise*, Elizabethtown, Ky., salutes radio and television in general, and WIEL Elizabethtown in particular, as a friend and welcome competitor.

The editorial observed that "There is not a sporting event, a political convention or any other event of major importance which cannot be more accurately reported and interpreted if all three media are represented rather than only one or two."

As for advertising, the newspaper commented, "Each one compliments the other. Actually, advertising begets advertising. The station has developed accounts . . . heretofore non-advertisers and many of these accounts, once being sold on the value of advertising, have become regular users of newspaper space."

Speaking of WIEL, the editorial said that, "The city, and the trade area, are fortunate that the station is owned, managed and operated by such a group of public spirited, high type men. We wish WIEL many more years of accomplishment—and of success."

Radio Networks' Crisis and Cures

(Continued from page 23)

as a group are at best breaking even and are probably losing money on radio network operations. When a business as well established as network radio loses money, or is on the verge of it, "crisis" is not too strong a word to apply.

The purpose of this article is to examine the nature of the crisis and what brought it on.

About 14 months ago, after CBS had announced a 10-15% reduction in radio network time rates and while other radio networks were preparing to cut their prices accordingly, a high official of a leading network told BROADCASTING • TELECASTING that not a single program had been sold by any major network on a clean, above-board basis and at card rates during the preceding six months.

So far as can be learned, about the same can be said for the interval since then. Though the 10-15% rate reductions last July may have brought some business into some radio networks without under-the-table concessions, by far the bulk of network radio contracts signed in the past 20 months have, in one way or another, involved "deals."

Actually, the "deal" originated earlier.

The Talent Wars

Toward the end of 1948 developed the now-historic wars for talent among the networks. Such former NBC stars as Jack Benny, Amos 'n Andy, Ozzie and Harriet and Red Skelton, and Bing Crosby from ABC, wound up under contract to the CBS Radio Network.

The theory of CBS at the time seemed to make sense, from the competitive, inter-network point of view: Hire a handful of the most popular entertainers to build up the network's ratings, and they would attract customers not only for themselves but for other shows in the program structure which was strengthened by their presence. Even if the high-priced talent under contract to the network could not itself be sold for as much as it was costing, the total returns from the general sales that were to be enlarged would more than offset the losses on the principal talent.

The principle is not unknown in the retail trade. In a retailer's sense, Messrs. Benny, Skelton and the others were to be "loss leaders."

It must be remembered that CBS was not alone in adopting and pursuing this principle. Other networks did the same. Whether in self-defense against CBS "raiding" or for other reasons, ABC and NBC wrote substantial contracts of their own with some stars.

Quite possibly the radio networks would have been able to amortize the very large commitments to radio talent if television had not progressed as rapidly as it did. Though no one of high office at the network will officially admit it, CBS management in 1948 anticipated a much more halting rate of television advancement than actually took place. The time at which advertisers began investing heavily in network television and quit buying high-priced talent on network radio arrived sooner than the network policy-makers had guessed. The TV timetable estimates of other networks also must have been askew, else they would not have countered CBS bidding for talent with bidding of their own.

When the talent prices began to soften, a hole was opened in the dike.

The early "deals" in network radio were mostly concessions in the prices of talent and production. But as television competition developed and a buyer's market grew up in network radio, the concessions inevitably were extended to cover time as well. Long before the four networks invoked the rate reductions of last July 1, both time and talent were being bartered in some instances at price levels far below the 10-15% that was officially knocked off network rates by the announced reductions.

At least two networks, it can now be reported, would have liked to cut the rates more drastically, but they believed that the 10-15% was the most they could get their affiliated stations to agree to without insurrection.

To many affiliates, the chaos in the network business was hardly comprehensible. Though their revenue from network time sales had been decreasing, their spot and local business had held up well.

As shown by the chart on page 23, the average major network affiliate had experienced a decline in general revenue from 1946, an easy money year before the radio station population began its postwar expansion, to 1950. But the decline was not alarming, at least in respect to spot and local business, and it was understood as being primarily caused by the increase in the number of stations.

From 1946 to 1950 the number of major network affiliates rose from 791 to 1,130. That meant that more of them were whacking up the pie. In the case of spot and local, the pie itself was getting bigger and hence the individual pieces, though divided among more stations, did not diminish as much as the pieces cut from the network pie which began to shrink after TV arrived.

Network Spot Revenue

In 1950, the latest year for which such figures are available, the average network affiliate's revenue from spot time sales was 85.8% of average revenue from that source in 1946 and from local time sales, 92.0% of 1946 levels. Network revenue, for the average affiliate in 1950 was down to 62.8% of what it had been in 1946.

But averages can be deceptive. Though figures for such a grouping are not obtainable, it may be properly assumed that the general business levels of the 791 stations that were affiliated in 1946 probably held up better through 1950 than did those of the 339 that joined networks after 1946. Well-established stations generally do better than new ones, and, additionally, in the 1946 group of 791 were all the powerful outlets which customarily take in large business volume.

Obviously, however, even the most powerful and well-established network affiliates have suffered a decline in network revenue in the past two or three years.

It is not easy to explain this phenomenon to operators who have not encountered serious advertiser hesitancy in their personal selling to local sponsors or even in national spot sales through their representatives. Especially in the latter case, the station operator wonders why a national advertiser will quit network radio and at the same time buy spot radio time in the very television markets where he feels his network radio has gone to pot.

The networks have an answer to that quandary. An analysis of spot and network rates shows, they say, that on the average an advertiser can buy a one-minute announcement on a spot basis on a station for about one-sixth of the time cost of a half-hour network show on that station. Hence he can buy three one-minute announcements (the maximum allowed in a half-hour network show) on a spot basis at half the cost of time alone for the half-hour network program on that station. Addition of program production costs to the network show make the discrepancy between buying three one-minute announcements by spot placement and by network programming even greater.

This argument would seem to lead inevitably to the conclusion that there is no economic reason for the continuation of networking. But the networks point out that spot time would not be worth a tinker's dam if it were not inserted in or between programs that attracted audiences.

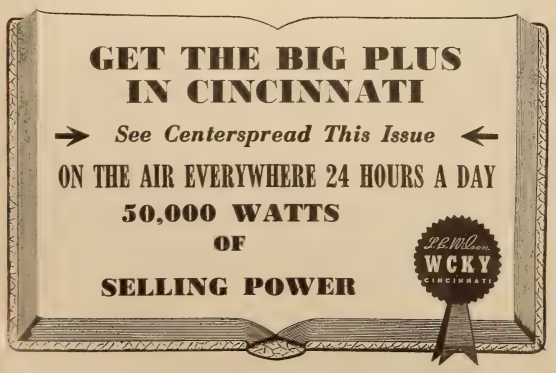
And networks, the networks say, are the only instrumentalities that can provide quality programming in quantity.

How can networks continue to provide quality service if they go on losing money? Not even the networks have pat answers to that one.

It is known, however, that the two leaders that bill the biggest business feel that the first step must be to restore stability in network pricing.

One top executive of one of these networks told BROADCASTING • TELECASTING that the next rate cuts must be severe enough to "administer shock" to the industry. The reductions, in his view, must be at least down to the basement levels at which network business has lately been conducted and probably should be enough below those levels to utterly discourage further "deals."

Agrees in Principle



Though he put it more mildly, a policy-level executive of the other network agreed in principle.

He said that the cuts must be deep enough to get radio network business back on the rate card and further that the new rates should embrace such attractive discount structures as virtually to "compel" advertisers to stay on the air 52 weeks a year.

One of the economic curses afflicting network radio is the "summer hiatus." Come June and July, programs regularly scheduled through the rest of the year and many of their sponsors desert the air in swarms, leaving gaps that must be filled by network-created programming.

In the richer days of network radio, the summer hiatus was not as severe a problem as it is today. Indeed in some respects networks counted it an advantage for it provided an opportunity to test out new shows and new personalities.

Nowadays, however, the additional expense of filling summer schedules with replacements for the sponsored programs that have gone on vacation adds to an overhead that already is taxing in the extreme. Costly tryouts of summer shows are luxuries which network

radio cannot afford any longer.

Achieving year-around continuity in programming is one way of cutting down operational expenses. Other means of reducing overhead will also have to be found.

In the view of policy-makers at CBS and NBC, the strong medicine which must be administered to network radio comes in three doses. First must be the rate cuts to stabilize the pricing structure of the industry. Second must be a severe retrenching to reduce expenses. Third must be a build-up of business volume.

If this triple dosage effects its hoped-for cure, the patient will emerge somewhat more lean than it was before the crisis, but it will survive, the networks think. The fat talent costs will have been melted away. In place of the high-priced, star-studded, glamour programs there will be shows that are of more realistic cost in relation to today's audience size.

These doses add up to pretty strong medicine, but the networks believe that weaker stuff will only prolong a crisis which the radio network business cannot perpetually endure.

Are there other remedies which could be used successfully without cutting network rates? Many operators of affiliated stations, including a lot who are businessmen of proven judgment, believe there are.

In the view of these affiliates, networks should hold the line on rates, take economy measures wherever possible, and invigorate their sales efforts. In the long run, after the dizzying glamour of television has worn off, advertisers will be reconvinced that network radio still is a worthwhile buy.

An inherent element in this argument is that network radio was terribly underpriced at the time television competition developed. It is pointed out that even today, with radio audiences demonstrably reduced in television markets, radio still delivers more advertising impressions for the advertiser's money than other media.

Statistically, this argument is unanswerable. But the networks feel it does not take into consideration all the realities in the case. Underpriced though it may have been up to 1949, network radio today does not offer the advertiser anything like the values it offered two to three years ago. Try though they may to persuade the advertiser that network radio in 1952, in relation to other media, still is priced favorably, the networks have been unable to distract the advertiser's attention from the fact that radio in 1952, in relation to pre-television radio, is costing infinitely more.

Moreover, the advertiser is unmoved by the argument that he got an almost unbelievable bargain when he bought network radio in its underpriced pre-television days and that the dwindling of the radio audience has meant only that radio network prices have been brought into more comparable association with those of other media.

The advertiser dismisses that argument with the explanation that if network radio were underpriced, it was not his fault but that of the network management. He bought radio, underpriced or not, in relation with purchases in other media. The decrease in the network radio audience (which means higher cost per listener reached) has thrown his media allocations out of pre-television proportions.

All sides of these questions will be argued thoroughly in the next few weeks. The first big discussion on the radio network crisis will come July 1-2 when CBS Radio affiliates and CBS heads meet in New York (see story, page 30).

Whatever course the arguments take, the ultimate outcome seems reasonably clear.

Networks are going to reduce rates, whether affiliates like it or not. Present planning is to cut night rates by 40-50%, perhaps to increase morning rates by 12-18%, thus obtaining an over-all rate cut in the order of 25% or slightly more.

After cutting rates, they will then trim expenses and try to build radio programming that competes effectively with television but at what they regard as a realistic cost.

The hope must be held that those measures will not only keep the patient alive but restore its energy. If they fail, the radio network, as traditionally constructed and operated in the U. S., will disappear. What would replace it, no one of authority ventures to predict.

SCOTUS REVERSES

Seattle Case Conviction

QUESTION whether to retry Ralph Casey, George La Clair and Edward Plesa, whose conviction of operating a radio transmitter illegally was reversed by the Supreme Court 6 to 3 last week, was being weighed by Federal officials in Seattle this week. Complaints that the men were illegally operating a radio transmitter enabling them to place bets with bookies after a race had been run but before bookmakers had received news of the results were the basis for the FCC investigation.

CHICAGO ACTIVITY

On Convention Handling

REPUBLICAN Committee on National Political Convention Arrangements glanced only briefly at plans for broadcast coverage during a special meeting in Chicago last week. It also postponed its discussion on use of radio and television advertising in the Presidential campaign until after the nominee is selected.

Ed Ingle, Radio-Television Chairman for the Republican National Committee, said plans for convention coverage from Chicago's International Amphitheatre are completed, and that purchase of time will not be decided on specifically until after the convention closes.

He reportedly visited networks in New York after the Monday and Tuesday meetings in Chicago to outline in general terms what the National Committee may want in time and programming for the fall political campaign.

The 46-member Arrangements Committee toured the Amphitheatre Monday to check convention facilities for delegates, speakers and press-radio accommodations.

At the same time $1 million worth of radio and television equipment arrived at ABC Chicago for convention use. All of the equipment, made up of portable field units, will be installed in the Amphitheatre and at the Conrad Hilton Hotel under supervision of Central Div. Chief Engineer E. C. Horstman.

KTUR AND TAFT

Turlock Time Available

SOME radio stations are not too proud to go after business. When Sen. Robert A. Taft (R-Ohio) complained to the FCC that he was rebuffed by radio and TV networks in asking for time equivalent to that given Gen. Dwight D. Eisenhower's Abilene speech [B•T, June 9], 1-kw, independent KTUR Turlock, Calif., heard about it and immediately sent him the following wire:

"Why ask the FCC to give you broadcast facilities . . . when you can buy all the time you want on KTUR? KTUR . . . will be happy to sell you all the time you want at regular national rates. . . . Speak, by transcription, to all the home folks on their local independent stations. People know and trust their local independents. . . ."

KTUR News Editor McDowell Starkey initiated the action, backed by Station Manager H. A. McMillen. As of Wednesday the station had not received word from Taft headquarters.

CONDENSER Products Co., Chicago (electronic equipment), has been acquired by New Haven Watch & Clock Co. Combined companies are expected to have a total annual sales volume of $10 million, according to Max A. Geller, president of the purchasing firm.

LBS RIPPLES

Reactivation Proposed By Dallas Committee

PROPOSAL to reconstitute Liberty Broadcasting System, which suspended operation May 15 [B•T, May 19], was made last week to ex-Liberty network affiliates by the Liberty Reorganization Committee, Box 27, Dallas.

Chairman of the committee, William A. Ware, said the committee wants to reactivate Liberty, with programming to resume between June 20 and July 1. Mr. Ware's letter said President Gordon McLendon of LBS, "will be freed of his many administrative duties in order that his great talents may be used consistently in improving the network's programming.

"A greatly improved 16 hours a day will be offered you—new shows, new talent including a topflight comedian, several of the former commentators plus new ones—programs as fine and as appealing as any network can offer and that you will be proud to air."

Going into finances, Mr. Ware said the network "must also be able to operate economically and at a profit. LBS was dependent on baseball for its principal income; the new network will not be. This does not mean that we will not carry baseball, for we will, but it does mean that we will build on a foundation of sponsored programs. Baseball and other sports, which we will continue to carry on a par with LBS, will be in addition.

"Now, let's examine the contractual arrangements that will be necessary between your stations and the new corporation. The corporation will pay for your time at the same rates LBS was paying. With regard to the affiliation fee, it will remain approximately the same as before based on the cost of providing line and service to you."

Mr. Ware said LBS was forced to cease "because it did not have sufficient time available from its affiliates to meet its operating costs. In order to operate on a reasonably profitable basis, the new network will require from you, two hours per day at no charge to the network. In addition, on non-sport days, one hour and 15 minutes will be sold nationally, the other half by you. You will be paid your contract rate for this time sold nationally. We believe that upon careful analysis you will find this to be a fair arrangement.

"An escrow fund to safeguard your initial advance affiliation fees has been established with a bank in Dallas. In accordance with the provisions of the fund, it will not be available for use by the corporation until the day the switch is thrown delivering service to you."

WSYR's Local Radio Sales

UP 39%

For the period ending April 30, WSYR's local radio sales were 39% ahead of 1951. The local advertisers responsible for this increase are the ones in the best position to test the effectiveness of all media. They know which advertising keeps the cash registers ringing.

BABY ROBINS

Mig Figi Aids Transfer

WHEN progress of construction at a bank displaced the nest home of a family of robins, Mig Figi, general manager, WAUX Waukesha, Wis., was instrumental in finding the baby robins a new home—and a new mother. The resulting story was carried on a national news wire service.

Since it would be necessary to move the nest, WAUX, the bank and the construction company offered a $25 Defense Bond for the best idea. At first, Mr. Figi and a construction superintendent transferred the nest from inside the bank to a sheltered area on the roof. The mother and father robin could not be guided to their three babies. Another solution had to be found.

The construction superintendent remembered that another robin was nesting in a tree of his front lawn. Mr. Figi removed the fledgling robins from their home in the tree and replaced them with the bank babies. The displaced babies are older and can be cared for by humans. The foster mother robin settled on the nest with her new trio and the father robin soon began bringing worms.

SIGNING a joint contract between KULA and KPOA Honolulu and the Honolulu Stadium for broadcast coverage of all sports events played in the stadium are (l to r) seated, Jack Burnett, general manager, KULA; Fin Hollinger, station manager, KPOA; standing, Pump Searle, promotion manager, and Lew Tate, general manager for the stadium.

milestones . . .

► WILLARD L. DOUGHERTY, assistant sales manager of WSRS Cleveland, was honored upon his 20th year in radio by staff members and friends at a party. Formerly with other Cleveland stations, Mr. Dougherty began in radio at WMBO Auburn, N. Y.

► KFQD Anchorage, key station of the Alaska Broadcasting System and CBS affiliate for central Alaska, has celebrated its 28th year of operation. A special anniversary program traced the growth of radio in Alaska. Charles Mohler is manager.

► ELBERT HALING, regional radio-press officer, U. S. Dept. of Commerce, Dallas, is currently enjoying his 32d year in the broadcast and newspaper fields. Mr. Haling began his career in 1920 when, age 10, he operated 5HY, his own "ham" station.

► FIVE CHILDREN born on the same day WJMO Cleveland went on the air five years ago were given prizes on the station's anniversary, June 1, and spots throughout the day carried the children's voices wishing WJMO a happy birthday, according to Dave Baylor, general manager.

► WPRS-AM-FM Paris, Ill., honored its advertisers at a day-long open house May 23 marking its first anniversary. Each guest received a small birthday cake and heard taped interviews with local civic leaders and congratulations from Gov. Adlai Stevenson. During the noon hour, boys distributed dummy newspapers in the town square bearing the headline, "Extra! WPRS Birthday Today! Come Out and Visit the Studios!" AM and FM outlets are programmed separately.

► New England's first TV station celebrated its fourth anniversary last week. WBZ-TV Boston went on the air June 9, 1948. In the brief period since it began operation, the station claims many firsts, among them the first football game to be telecast in the region four years ago, and the initial use of the Zoomar-lens in the area in 1949.

NIAA MEETING

Set June 30 in Chicago

THE NATION'S industrial advertisers will meet in Chicago June 30 through July 2 to study the economic, social and advertising problems confronting them. The 30th annual convention of the National Industrial Advertisers Assn. will be held at the Palmer House.

Fairfax N. Cone, president of Foote, Cone & Belding, will outline "Current Public Relations Problems of Business." Other speakers and their subjects include Chester H. Lang, vice president, General Electric Co., "How Advertising Men Can Help Explain American Economic System to Workers and the Public," and H. I. Orwig, vice president, Buchen Co., "Discussion of Export Advertising."

Pre-conference registration and a supper party are scheduled for Sunday, June 29. Separate functions have been planned for women guests.

Politics on Radio-TV

(Continued from page 29)

from NBC, Sen. Kefauver said he would withdraw the complaint which he had filed with FCC against that network, and it was assumed he would do so in the case of the CBS networks in view of their subsequent offer. ABC spokesmen said they had heard no more about the matter after sending FCC copies of their letters rejecting the original requests of Sens. Taft and Kefauver.

Candidate Averell Harriman's offer of personal—albeit at long distance—radio interviews was outlined in a letter sent Thursday to stations in 100 cities which Mr. Harriman is not likely to visit.

"Put on tape 7½ IPS, any five questions you want Mr. Harriman to answer," the letter instructs. "On July 1 Mr. Harriman will go into a studio and answer your questions. The answers, on another roll of tape, will be sent to you along with your tape of questions. With a simple editing job you'll have an exclusive news feature."

Offer, exclusive to one station in each city, is the brainchild of Lou Frankel, Harriman campaign director of radio and TV, former manager of WFDR (FM) New York.

While the networks' legal experts were juggling candidates' demands and claims, plans for programming before, during and after the conventions were gradually shaping up. The scheduling of actual convention pickups was more difficult, owing to lack of finality about the times when convention sessions would get under way, plus the usual uncertainty as to which sessions were apt to prove most newsworthy.

Probable Opening Times

Reports on probable opening times for the convention sessions ranged from 10 a.m. to 1 p.m. EDT for the daytime meetings and from 1 p.m. to 10 p.m. EDT for the night sessions. For the most part the networks—radio and TV—indicated they would carry the session openings, but how long they would continue in any specific case would depend to a great extent upon the news interest of the proceedings involved.

NBC-TV announced plans for 14 convention "p r e l u d e" programs starting July 1 and scheduled as follows: July 1, 7-7:30 p.m. EDT; July 2, 8-9 p.m. and 10-10:30 p.m. EDT; July 3, 8:30-9 p.m. EDT; July 5, 4:30-5:30 p.m. and 10-10:30 p.m. EDT; July 6, 4-5 p.m. EDT; July 7 and 8, 10-11 a.m. and 7-7:30 p.m. EDT; July 9, 10-11 a.m. and 8-9 p.m. EDT, and July 10, 8:30-9 p.m. EDT. The July 6-10 shows in this series will be under Philco sponsorship as part of its underwriting of NBC radio and NBC-TV coverage of both Republican and Democratic Conventions.

NBC radio meanwhile has scheduled five special broadcasts preceding the Republican Convention: June 28, 8-8:30 p.m. EDT; July 1, 10:35-11 p.m. EDT; July 3, 10:35-11 p.m. EDT; July 5, 10-10:30 p.m. EDT, and July 6, 9:30-10 p.m. EDT. The first three of this series are being offered to NBC radio affiliates for local sales on a co-operative basis, as are two others scheduled immediately preceding the Democratic Convention: July 16, 10-10:30 p.m. EDT, and July 17, 10:35-11 p.m. EDT.

CBS Radio, while hopeful that more rigid convention pickup schedules will be possible this year than in the past, noted that no firm plans for convention-floor broadcasts can be made until after the convention leaders have set definite hours for getting sessions under way.

Looking toward the convention itself, the network already is carrying a Monday night political analysis program (11:15-30 p.m. EDT), and for the Sunday before the conventions get under way a "preview" show is planned (probably in the 4:30-5 p.m. spot). Between June 30 and July 4, *You and the World* (Mon.-Fri., 6:15-30 p.m. EDT) will present five convention newsmen and editors in rotation to explain convention procedures, terminology, and plans for CBS Radio coverage—which, as is the case also with CBS-TV coverage, is sponsored by Westinghouse.

HEALTH AIDS FIRM

Cited by FTC

COMPLAINT of false and misleading advertising has been filed by the Federal Trade Commission against National Health Aids Inc., Baltimore, Md., a large user of radio and TV, it was announced today (Monday).

The charge that NHA Complex, a vitamin-mineral preparation, has been advertised as a virtual cure-all prompted the complaint, FTC stated. Company, including its president Charles D. Kasher and its advertising agency, Television Advertising Associates Inc., has 20 days to answer the complaint. Hearing is scheduled in Washington July 21 before FTC Hearing Examiner Frank Hier.

Except where such diseases or disorders are the result of mild vitamin and mineral deficiencies, NHA Complex is of no value, the FTC complaint alleged.

Singled out also in the complaint is the allegation said to have been made in NHA advertisements that "all persons in the United States consume a diet which is deficient in vitamins and minerals and must use a dietary supplement to assure their bodies of the minimum daily requirements. . . ."

Among the radio-TV programs cited in the FTC complaints, were the following: *Who Ya Laffin' At, Let's Live a Little, Stop Fooling Yourself* and *Animal, Vegetable, Mineral.*

ABC-UPT

Sass Testifies at FCC

CHICAGO theatre operator Arthur F. Sass was the only witness to testify during last week's session of the lengthy Paramount hearing at the FCC [B•T, June 9].

The hearing is concerned with proposal for merger of ABC and United Paramount Theatres Inc., among other issues.

Mr. Sass, who testified under direct examination May 23, returned last Thursday and Friday for cross examination by Louis Phillips, Paramount Pictures Corp.'s New York attorney.

Mr. Sass was questioned about the advice he received from Barney Balaban after Lubliner & Trinz, a Balaban & Katz affiliate, received 25% interest in Mr. Sass's Alamo Theatre. The advice was part "payment" for L&T's interest in the theatre, Mr. Sass testified.

Last month Mr. Sass testified he was required to enter into the agreement with L&T in order to get films from Paramount Pictures Inc., which was then the parent company to B&K. At that time he also testified that B&K threatened to build a competing theatre nearby if he didn't "sell" B&K the 25% interest.

In his earlier testimony Mr. Sass indicated that the advice he received from Mr. Balaban appeared to be inconsistent with Mr. Balaban's practices in the operation of the B&K theatres. In last week's testimony, Mr. Sass said Mr. Balaban had advised against installing air conditioning in the Alamo Theatre. When air conditioning was installed several years later, Mr. Sass claimed it was instrumental in raising attendance at the theatre.

Under cross examination, Mr. Sass testified he was not actually prevented from making improvements in his theatres but was merely discouraged from doing so by Mr. Balaban.

Last year Mr. Sass filed anti-trust suits against five major motion picture companies totaling nearly $2 million [B•T, May 26].

KBKO STOCK SALE

Allen, Kelly to Buy

SALE of 70% interest in KBKO Portland, Ore., to W. Gordon Allen and Tom Kelly, operators of two Oregon stations, was announced last week. Sale is subject to FCC approval.

Price of controlling interest in the 1 kw daytime independent on 1290 kc was $28,000 plus an employment agreement for the present owners, Harold Krieger and Gordon E. Bambrick.

Mr. Allen owns 60% interest in KGAL Lebanon, Ore., 33⅓% of KGAE Salem, Ore., 50% of KSGA Redmond, Ore. (CP only), and has an application on file with the FCC for a new AM station in Lewistown, Idaho. Mr. Kelly is associated with Mr. Allen in managerial operations of the Oregon stations. The KBKO sale was handled by Blackburn-Hamilton Co.

McFarland Bill

(Continued from page 29)

asked FCC Chairman Paul A. Walker who was responsible. It is believed that the Senator will pursue this matter further unless he receives a satisfactory reply.

Although broadcasters are generally backing the McFarland Bill, there are a number of provisions they do not like. Among these are the provisions giving the FCC authority to (1) issue cease and desist orders, and (2) impose temporary suspension and fines. Failure to eliminate the "double jeopardy" provisions of the present Communications Act also disappointed representatives of larger stations and networks. This section permits the FCC to revoke licenses if licensees or their parent companies are convicted of antitrust violations.

WCBS' SALES

CBS Radio Handles in N. Y.

CBS RADIO's Spot Sales department will handle New York sales for the networks WCBS New York, starting today (Monday), in addition to representing the station in all other markets, as it has in the past.

Carl Ward, general manager of WCBS, asserted that the station's local sales staff "has done an excellent job" with May billings, "up 29% over last year," but that "we have long felt the need for enlarged representation and service to New York advertisers." He continued:

"Through the facilities and personnel of CBS Radio Spot Sales, the station will expand its coverage of New York agencies and advertisers. At the same time, it will reduce duplicate calls from two different sales staffs calling on the same agencies."

The change puts WCBS local sales operation on a parallel with WCBS-TV's, which already is handled by CBS TV Spot Sales.

Wendell B. Campbell, general sales manager of CBS Radio Spot Sales, reported meanwhile that five new account executives—including four transfers from the WCBS sales staff—are being added to the sales force in his New York office to handle sales for WCBS while maintaining the department's service to all of the 13 stations it represents.

The five are Don Miller, who has been sales manager of WCBS; Sam Maxwell, former eastern sales representative for CBS-owned WBBM Chicago; Kent Patterson, John Crandall, and Tom Gorman, all former WCBS account executives who will work exclusively on local and retail accounts for WCBS radio.

Two other members of the WCBS sales staff are being let go, it was understood.

RICHARDS

Named Asst. to NARTB Pres.; Public Affairs Expanded

ROBERT K. RICHARDS has been advanced to a new NARTB post, assistant to the president, by President Harold E. Fellows, in line with a program to expand the association's services.

Mr. Richards continues as director of public affairs, a post he has held since 1947. An administrative assistant will be added to the Public Affairs Dept.

Mr. Richards

The expansion plan provides for opening of a West Coast office in charge of a field representative of the Station Relations Dept., which is headed by William T. Stubblefield.

Budget provisions for the program were approved last week by the Radio Board and TV Board, which held separate meetings (see main TV board story, this issue).

Since he joined NARTB, Mr. Richards has directed promotion activities of the association and developed the Voice of Democracy contest for high school students, one of the nation's outstanding scholastic competitions. He has taken an active part in policy decisions and has handled many NARTB contacts with associations and commercial enterprises. He is a member of the Advisory Council to the National Assn. of Radio News Directors and secretary to the Council on Radio-Television Journalism. Recently he was named to direct NARTB's participation in the "Register and Vote" campaign.

Served in Censorship

Mr. Richards was editorial director of BROADCASTING • TELECASTING before joining NARTB in 1947. During the war he served as assistant broadcasting censor under J. Harold Ryan, who headed this operation in the Office of Censorship. He is 39 years of age and a graduate of Ohio State U. After graduation he was employed at Campbell-Ewald Co., the *Cincinnati Post* and its affiliated WCPO, and Fort Industry Co., now Storer Broadcasting Co.

He is a member of Radio Pioneers Club and Sigma Delta Chi, honorary journalistic fraternity.

The new addition to the Public Affairs Dept. will report to Oscar Elder, assistant director.

In announcing expansion of the Station Relations Dept., with a West Coast office to be opened in San Francisco, President Fellows said two important objectives will be achieved. First, the department will be able to broaden its services to TV stations now belonging to NARTB. Second, the department will be able to broaden services to overall membership with addition of the San Francisco offices and at the same time continue recruiting new members.

The Radio Board, at its Thursday meeting, approved a resolution under which each of the 17 district directors will appoint district membership committees for their respective areas. These committees are to be in operation not later than July 15. They will work directly with the Station Relations Dept., seeking closer liaison between stations and the association.

Resolution for the membership project was introduced by H Quenton Cox, KGW Portland, Ore., chairman of the NARTB Membership Committee. Other members of the committee, which met Wednesday prior to the board session, are Henry B. Clay, KWKH Shreveport, La.; Thad Holt, WAPI Birmingham; E. K. Hartenbower, KCMO Kansas City; Jack Todd, KAKE Wichita; Stanley Pratt, WSOO Sault Ste. Marie, Mich.; Campbell Arnoux, WTAR-TV Norfolk, Va., representing TV.

BMI N.Y. CLINIC

Agenda Set for June 23-24

WITH its early May whirlwind campaign of 42 field clinics in two weeks now history, BMI will wind up its spring clinic season June 23-24 with a two-day session in New York, 19th program clinic BMI has staged in its headquarters city.

Herbert V. Akerberg, CBS Radio and CBS TV vice president in charge of station relations, will act as chairman for the first day's meeting. The agenda includes talks by Ben Laird, president, WDUZ Green Bay, Wis.; J. Scott True, farm director, WFTM Maysville, Ky.; John M. Outler, general manager, WSB Atlanta; Harry Bannister, NBC vice president in charge of station relations; Dorothy Gordon, moderator, *New York Times Youth Forum* on WQXR New York; George J. Higgins, vice president, KMBC Kansas City.

Leonard Patricelli, program manager, WTIC Hartford, will be the second day clinic chairman and will present a special session of WTIC's *Mind Your Manners* program at the luncheon session. Speakers will include Norman Reed, program director, WWDC Washington; Clarence L. Menser, general manager, WJBS Deland, Fla.; Ted Cott, NBC vice president and general manager of WNBC-WNBT (TV) New York, and others.

Although the New York meeting will conclude BMI's program clinic activities until fall, the industry's music licensing organization in cooperation with Colorado broadcasters is conducting a one-week seminar at Denver U., Aug. 3-8.

NOTRE DAME football games will be carried next season by WCUE Akron, which has exclusive rights in that city.

BMI

Cordially Invites You to attend its

19th PROGRAM CLINIC

IN NEW YORK

MONDAY JUNE 23

and

TUESDAY JUNE 24

at the

Waldorf Astoria Hotel

This is one BMI Program Clinic you won't want to miss! The subjects coming up for discussion have not been covered before.

Herbert V. Ackerberg will be your Clinic Chairman on Monday; Paul Morency is Tuesday's chairman; Harry Bannister, luncheon speaker.

Your panel speakers bring to the Clinic fresh, hard-hitting facts and practical ideas.

Question and answer periods and the chance to have your specific problems discussed are added reasons for your presence.

REGISTER NOW

No attendance fee, but advance application is requested. Write or call BMI Station Service Dept. today.

BROADCAST MUSIC, INC.

PRINCIPALS in signing for WJHP Jacksonville's *Cousin Wilbur, Blondie Brooks & The Log Cabin Folks Show* include (l to r, standing) Robert Buck, asst. adv. mgr., Pet Milk Co., producer of Golden Key milk and the sponsor; "Blondie Brooks"; "Cousin Wilbur"; John Thorwald, radio and TV dir., John H. Perry stations; seated, O. F. Thomas, dist. sls. mgr., Pet Milk; Milford A. Reynolds, WJHP gen. mgr., and "Little Wilbur." Mr. Thorwald has resigned from Perry stations since picture was made [B•T, June 9].

ARRANGING for six-a-week half-hour program on WFAA-570 Dallas are (l to r): Alex Keese, WFAA mgr.; Earl Hayes, Earl Hayes Chevrolet Co., Dallas; Joe Reichman, bandleader, and Reuben Bradford, who will alternate three days a week with Mr. Reichman, and M. O. Rike, v. p. & mgr., Bozell & Jacobs Inc., Dallas, handling account.

book reviews....

BROADCASTING: RADIO AND TELEVISION by Henry L. Ewbank and Sherman P. Lawton. Harper & Bros., 49 E. 33d St., New York 16, N. Y.; 528 pp.; $4.50.

THIS BOOK, written in "non-technical" language "primarily for college students and program staff members of radio and television stations," is in textbook style with reading lists, exercises and assignments after each chapter. Book includes a basic bibliography and glossary.

In four parts, the book first discusses broadcasting history and background, "in the public interest," mechanics, government and "non-government" controls.

Second part, on program planning, describes program types and audience building. The third, on preparing the program, gives samples of talks and interviews, conversations and discussions, documentary, actuality and dramatized discussions, adaptations, original plays, variety and audience participation shows, news and sports as well as programs for specific audiences, continuity, titles and commercial copy.

Fourth part instructs on direction of radio and TV programs, use of the voice, evaluation of programs and effects of listening.

Dr. Ewbank is chairman of the U. of Wisconsin Radio Committee, and of the State Radio Council, which operates WHA Madison and WLBL Auburndale, and is in charge of an eight-station FM network. Dr. Lawton is professor of radio and coordinator of broadcasting instruction at the U. of Oklahoma.

★ ★ ★

THE ASCAP Biographical Dictionary of Composers, Authors & Publishers, edited by Daniel I. McNamara. Thomas Y. Crowell Co., 423 Fourth Ave., New York 16, N. Y.; 636 pp.; $5.

SECOND EDITION of this musical reference work devotes most of its pages to thumbnail biographies of the creators of popular songs who comprise ASCAP's membership. Appended lists of members by place of birth, date of birth and residence should prove time-saving to continuity writers preparing special musical salutes to dates, months or places. Another appendix lists publisher members. ASCAP's organization and operation are succinctly described in a preface by the book's editor, ASCAP's director of public relations.

★ ★ ★

ADVERTISING TERMINOLOGY by H. Victor Grohmann. Needham & Grohmann Inc., 30 Rockefeller Plaza, New York 20, N. Y.; 86 pp.; $1.

PRIVATELY printed by Mr. Grohmann "as a service and token of gratitude to the field of advertising," this book defines 600 terms used in advertising in five divisions: art, general, media, production and radio and television, plus listings of initials and names of associations in advertising and proofreader's marks.

★ ★ ★

TELEVISION, THE MAGIC WINDOW, by Frank Denman. The MacMillan Co., 60 Fifth Ave., New York, N. Y.; 60 pp.; $2.

TELEVISION is traced from its earliest beginnings in terms easily understood by any junior high school pupil in this book by Frank Denman, an advertising executive. It is an excellent book for children interested in the scientific aspects of how television operates. Perhaps its chief value to professional telecasters, is that it would be perfect gift for any uninitiated who wants to know, "What makes television run?"

VAB Meet Is Set

FCC Comr. Rosel H. Hyde and NARTB President Harold E. Fellows headline the list of speakers slated for the annual meeting of the Virginia Assn. of Broadcasters to be held June 26-27 at the Chamberlin Hotel, Fort Monroe, Va. Among other speakers are George C. Davis, Washington consulting engineer; Ben Strouse, manager, WWDC-AM-FM Washington, and Joseph L. Brechner, manager, WGAY, Silver Spring, Md.

Bavarian Set Output

GRUNDIG-RADIOWERKE, German radio receiver manufacturer, last week at its plant at Fuerth, Bavaria, announced that it had produced a million radio receiving sets since the war. The company, which resumed production in 1946 with only 40 workers, now claims to be the largest and most modern manufacturer in Europe. It was reported also that the West Germany radio market should remain active because 30% of the West German population still is without radio sets, and some 6-7 million radio listeners have no FM receivers.

Scrubber Harris

IN A BROADCAST, Jack Harris, announcer for *Tello Test*, Walter Schwimmer Productions' giveaway, on KGCU Mandan, N. D., offered to do the family laundry for the housewife identifying, the person "whose last words were 'so little done, so much to do'." Woman who came up with the winning answer, which was "Cecil John Rhodes," was laundress for the State Training School in Mandan. Mr. Harris had a scrubbing day for the benefit of 300 inmates. His comment: "So little done, so much to do."

SIXTH REPORT IN COURT

Five Stations File Appeals

THE SIXTH REPORT and Order —FCC's final TV allocation plan which lifted the TV freeze—was taken to court last week by five applicants on appeals protesting their respective city channel assignments but which may have broad import affecting the entire allocation plan.

The first protest, presented to the U. S. Court of Appeals, Third Circuit, Philadelphia, was filed by WWSW Pittsburgh [B•T, June 9]. It challenges FCC's failure to allocate VHF Channel 4 to the Pittsburgh metropolitan area because the Pittsburgh area site (Braddock, Pa.) would be a fraction of a mile less than the 170 miles required for co-channel spacing from WLWC (TV) Columbus, Ohio. Latter is to switch to Channel 4 under the Sixth Report.

The WWSW appeal, filed by Paul Segal, Washington radio-TV attorney, complains only of the Channel 4 situation at Pittsburgh and is not intended to challenge basic legality of the Sixth Report. Certain legal observers, however, contend the WWSW protest does raise issues fundamental to the lawfulness of the Sixth Report. Opinion on this point was mixed among Washington practitioners last week.

Filed by Scharfeld

The four other appeals, filed by the Washington law office of Arthur Scharfeld, were presented to the U. S. Court of Appeals for the District of Columbia in behalf of WLOA Braddock, Pa.; KVOL Lafayette, La.; WISC Madison, Wis., and WLAN Lancaster, Pa. The WLOA complaint also protested legality of the failure to allocate Channel 4 in the Pittsburgh metropolitan area.

Although these four appeals protest specific allocation rulings, observers note certain of the appeal arguments, particularly that of KVOL, have direct relation to allocations throughout the U.S. and challenge basic premises of the Sixth Report.

At the same time, it was learned additional petitions for reconsideration of provisions of the Sixth Report are in preparation by Washington attorneys and are expected to be filed this week. June 23, next Monday, is considered the last day on which such petitions can be presented to the FCC under its 20-day rule. The Sixth Report became effective June 2 upon publication in the *Federal Register*.

Further protest of the Sixth Report is understood to be developing within the Federal Communications Bar Assn. Last Wednesday, the FCBA Practice and Procedure Committee voted to recommend that the association's Executive Committee present to the entire membership the consideration of a petition to FCC for review of the Sixth Report provision which precludes applications where no channels have been allocated.

The majority of the Practice and Procedure Committee indicated the Sixth Report illegally deprives applicants of a hearing under Sec. 309(a) of the Communications Act in instances where they apply for channels not in the assignment table. They held this policy unnecessarily will preclude service to many areas of the country.

The recommendation is to be considered tonight (Monday) by a special meeting of the FCBA Executive Committee. It was called by Mr. Scharfeld, FCBA president.

On Friday, Comr. George E. Sterling was to defend the Sixth Report and specifically answer its major critics, including Comr. Robert F. Jones [B•T, May 26]. Comr. Sterling was scheduled to address the Maryland-D.C. Broadcasters Assn. (see story, page 32).

All of the appeals tendered last week to the courts were filed under the terms of the Hobbs Act of 1950 which replaces certain provisions of Sec. 402(a) of the Communications Act. Formerly, Sec. 402(a) set no time limit after an FCC ruling became effective within which appeal of that order might be made. The Hobbs Act puts a 60-day limit on such appeals.

Segal Appeal to Court

Mr. Segal's WWSW appeal was taken directly to the court and no petition for reconsideration was filed first with the Commission. This is allowed under the Hobbs Act.

Although Mr. Scharfeld has petitions for reconsideration in his four cases pending before the Commission at this time, he filed the court appeals as a tactical measure to prevent losing the right to appeal under the 60-day limit of the Hobbs Act. It was pointed out that the courts have not determined whether the filing of a petition for reconsideration with FCC automatically "tolls" the deadline for filing of an appeal until after FCC acts on the petition to reconsider.

The WWSW appeal was filed in Philadelphia on Wednesday. The appeals of the other four stations were filed in Washington on Thursday and Friday.

Regarding FCC's final allocation of VHF Channels 2, 11 and reserved 13 and UHF Channels 16, 47 and 53 to Pittsburgh, WWSW there contends the allocation "is on its face so inadequate as to constitute error in law and abuse of discretion.

"The FCC thereby has failed to perform its statutory duties: To provide an efficient nation-wide service with adequate facilities; to make proper regulations to prevent interference between stations; to encourage the larger and more effective use of radio in the public interest; to establish areas and zones to be served by stations; to make such distribution of licenses, frequencies and hours of operation, and of power among the several states and communities as to provide a fair, efficient and equitable distribution of radio service to each of the same; and has placed itself in such a position that it has abnegated all discretion and is unable to consider the standard of 'public interest, convenience or necessity' in passing upon applica-

(Continued on page 82)

ABC-UPT MERGER

CBS Supports Severance

CBS came to the support of a competitive network, ABC—in the interest of bolstering network competition—when it petitioned FCC last week to sever the proposed merger of ABC and United Paramount Theatres Inc. from the overall Paramount hearing (see story page 68).

DuMont, however, failed to share to share CBS' view and filed a petition opposing the severance.

CBS asked the Commission for prompt approval of the merger and for grant of the contingent sale of WBKB (TV) Chicago from Paramount's Balaban & Katz to CBS for $6 million. ABC-UPT on June 6 filed the joint petition for severance and grant which CBS now supports [B•T, June 9].

Favorable action on the proposed merger is hoped for by August in order that network operations respecting the fall business line-up will be strengthened. Schedules for fall programs begin to finalize during that month, it was noted. The competitive status of ABC as well as its owned stations and affiliates, both radio and TV, was held to depend on prompt action.

In addition, both CBS and Balaban & Katz last week filed oppositions to the earlier protest of Zenith Radio Corp. with respect to the status of Channel 2 at Chicago, the facility to which WBKB would be switched, from its present Channel 4, under terms of the Commission's Sixth Report which finalized allocations and lifted the TV freeze.

Zenith holds that FCC legally cannot prejudge the assignment of Channel 2 to WBKB through the use of the show cause order and must afford all applicants there the opportunity to compete equally in a comparative hearing. In its petition supporting the ABC-UPT request, CBS told the Commission it "believes that granting the relief sought by ABC-UPT would be in the public interest. Based on its own experience in, and knowledge of, the business and economics of the industry, CBS believes that the extended additional delay which, absent severance, appears to be inevitable in the final disposition of the entire proceedings will adversely affect not only ABC but will, as ABC and UPT state, tend to frustrate the statutory objective of achieving nation-wide competitive networking."

The petition added, concerning the contingent WBKB sale, that "while the hardship upon [CBS] attendant on further delay is not comparable, either in kind or degree, with the hardship on ABC, nevertheless, a considerable finan-

(Continued on page 76)

HIGH TV RATES

Cited at AFA Meet

By BRUCE ROBERTSON

CHARGE that television is pricing itself out of the reach of American advertisers was vigorously debated Wednesday morning during a panel discussion of the significance of the "TV thaw" to advertisers, agencies, station and network operators.

The panel was part of a morning session on television held as part of the 48th annual convention of the Advertising Federation of America at New York's Waldorf-Astoria Hotel June 8-11. (Also see stories below and on page 30.)

Henry Schachte, advertising director of Borden Co., opened the attack on TV's price structure by pointing out that "today a television show with a modest talent budget and a line-up of about 30 stations costs around $1.5 million." When new stations are added and a TV network will comprise 150 to 200 stations, the sponsor's annual cost will rise to more than $2 million, he said, pointing out that during 1951 only 67 advertisers spent as much as that amount for all media except newspapers "and that total does not include radio or TV talent charges."

He said each TV network has 56 half-hour evening periods a week for sale, but said that even if there were only two networks and if the top 11 advertisers (those spending more than $10 million a year in all media) were to sponsor two network programs apiece, with the top five advertisers sponsoring three each, this still would account for only 83 sponsored evening half-hours on TV.

Speaking for the broadcasters, J. Leonard Reinsch, managing director of the Cox radio and TV stations, reviewed the inevitable delays before new TV stations will begin operations, with hearings certain in every major market and with the FCC staff able to handle only about 50 cases a year.

May Be Years Yet

"In hotly-contested markets it may be three or four or even five years before new TV stations are licensed," he said. Educational channels not applied for within the next year may be thrown into the commercial station picture, complicating things further, he noted.

When stations do go on the air, they must adopt pricing policies that will enable the advertiser to use television profitably, Mr. Reinsch said, estimating that VHF stations in new TV markets probably will start with base rates of about $200 and UHF stations with base rates of about $150, increasing them with the TV audience.

The anticipated slow increase in TV markets is a good thing from the advertising agency viewpoint, Charles E. Midgely Jr., manager of broadcast media for Ted Bates Inc., reported, because "a heaping platter of 2,000 new TV stations would be a huge portion to digest all at once." If by April 1953 10 new TV markets have been opened up, he said, they probably will be added to the current network program lists by advertisers.

Echoing Mr. Schachte's views, Mr. Midgely declared: "There is a very real danger of TV pricing itself out of all consideration. At a current rate of $52,000 gross for a nighttime hour on 63 stations, what will the cost for a network of 150 stations be? Somewhere along the line the whole philosophy of pricing TV must undergo a complete revision, and I think that it will."

Concluding the panel discussion of the effects of the "TV thaw," Fred M. Thrower, CBS-TV vice president, discounted the arguments that TV is pricing itself out of business. "Costs have increased, it's true," he said, "but our critics always seem to forget that television's rising costs are accompanied by tremendous increases in value received.

"Actually, television has become a better buy each year," Mr. Thrower stated. Since 1949, he said, CBS-TV Network time costs have increased about eight times, but TV circulation increased 18 times, resulting in a decreased cost per thousand TV homes from $3.45 in January 1949 to $1.74 in June 1952.

Mr. Thrower reported that comparison of the advertising budgets of the 60 leading food and drug firms for 1950 and 1951 showed 80% with increased budgets in 1951 over 1950. "However," he noted, "42% cut magazines, 61% cut newspaper supplements, 72% cut radio and 98% added to their TV appropriations."

With national television expenditures for the first three months of 1952 running about 75% ahead of last year, "we can expect TV to account for about $850 million this year—or about 10% of the total money spent for all advertising media," he said.

Raymond F. Guy, NBC manager of radio and allocations engineering, in a talk on "Taking the Mystery Out of UHF" explained that from a performance viewpoint, "the difference lies in the way in which these waves scatter and bend as they carry the television message from the transmitting point to the receiving point. . . . UHF . . . does not bend and fill in behind objects as well as VHF . . . now in use."

Mr. Guy reported that in using 300 ft. towers and maximum power, a VHF TV station on Channel 4 would cover an area of about 50 miles from the antenna, a VHF station on Channel 10 or 11 would get about 45 miles coverage and a UHF station about 40 miles. With antennas 1,000 feet high the Channel 4 station would reach 75 miles, the Channel 10 station 63 miles an[d] the UHF station 59 miles, he sai[d].

Improvement in both the manu[-] facture of films for television an[d] in their broadcast techniques ha[s] eliminated much of the former pre[-] judice against TV film program[s], George T. Shupert, vice presiden[t] Peerless Television, reported.

Quoting a Katz Agency stud[y] stating that "an advertiser ca[n] buy a group of 39 inter-connecte[d] station markets on a spot bas[is] using a half-hour film progra[m] for 19% less than on a networ[k] basis," Mr. Shupert said tha[t] "comparatively few advertiser[s] want or need national coverag[e]. More want regional or local cover[-] age. Limited advertising budget[s] handicap their desire to use tele[-] vision because most of them ar[e] bound to be dissatisfied with any[-] thing less than big-time entertain[-] ment. The solution seems to li[e] largely in sharing costs throug[h] local sponsorship of national show[s] or purchases of film on a spo[t] basis."

Filmed demonstrations of a num[-] ber of new camera techniques pro[-] viding rainstorm effects, reflec[-] tions on water, performers defy[-] ing gravity by appearing upsid[e] down and the introduction of liv[e] actors into photographed scenery—all done electronically with actor[s] performing on a dry studio stage—were supplied by CBS-TV. Walte[r] Craig, Benton & Bowles vice presi[-] dent, also talked on "The Futur[e] of Live Television Production."

Eugene S. Thomas, vice presi[-] dent, George P. Hollingbery Co. presided at the morning TV session.

VIDEO'S STANDARD

Admen Must Aid—Fetzer

ADVERTISING must join the TV industry in raising video's standards, John E. Fetzer, chairman of the NARTB Television Code Review Board, told the 48th annual convention of the Advertising Federation of America. (See story this page.) Mr. Fetzer, also owner of the Fetzer radio-TV stations, urged the effort to preserve the American system of operation in the public interest.

Emphasizing the advertisers' responsibility in seeking proper program standards, Mr. Fetzer told the AFA: "Our system of free television will survive if people want it—and they will want it if it satisfies them."

While people are buying TV-advertised products, this "does not necessarily indicate that there is any real understanding of the system that advertised it," he said, adding that this means elimination of bad advertising practices and attention to "our vital responsibility toward the family group.

"Let the critics of advertising remember that it supplies the dollars without which we could not have a free television system," Mr. Fetzer said. "It's the advertiser who buys freedom for the viewer at the same time that he is buying time and talent."

Going into programming, he observed that "as the productivity of our nation has increased, millions of people are receiving incomes which have outrun their cultural development. It is a fact not to be denied that these people must be appealed to at their own intellectual level. It's a great enigma, but it entails probably the greatest opportunity for advertising and television today."

Program standards must not be judged "by the gate alone," Mr. Fetzer said. "We must go farther than the show concept alone. We must entertain, but so must we attempt to instruct, we must use the comedy, but so must we bow in supplication; we must dramatize, but so must we cover every important world event. In short, we must, with equal force, represent the best standards of the show business, the press, the educational institution, the church and the public forum.

MR. FETZER

"I cannot help but entertain the feeling that many times we lost our sense of perspective by relying so heavily upon mass program ratings."

Going into TV code problems, Mr. Fetzer recalled the successful operation of voluntary radio censorship during the war, when he was assistant director of censorship in charge of broadcasting. "I firmly believe that government program censorship can never occur without the consent of the American people," he said. "Therein lies our real court of appeal, as well as our ultimate source of confidence."

The Television Code Review Board believes in cooperation, he said, adding that the board recognizes "there is more than one way to do a thing right. That's why the code is subject to revision, based on operating experience."

television applications

Digest of Those Filed With FCC June 7 through June 12

(† Indicates pre-thaw application re-filed.)

Boxscore	VHF	UHF	Total*
Applications filed since April 14	49	25	75

* One applicant did not specify channel number.

ELEVEN applications for new television stations were received at the FCC last week, bringing to 75 the number of TV requests filed since the issuance of the Commission's Sixth Report and Order [B•T, April 14].

Four new and seven amended applications were submitted to the FCC. There were eight requests for VHF stations, while three applicants seek UHF facilities.

Three TV stations now on the air filed requests to change their channel, as required under the Sixth Report. There are 30 stations which have to change frequency. So far, 16 have applied for permission to do so. Most of those which have to change channels also are seeking higher power.

Nine of the 75 applications filed have been returned. However, two of these have already been resubmitted.

(Continued on page 78)

BOOTH PLANS

To File for Five TV Outlets

PLAN to file for the legal limit of five TV stations at one time was revealed by Booth Radio & Television Stations Inc. last week.

The Michigan company expects to submit its applications to the FCC within a fortnight.

Booth Radio & Television is the licensee of WJLB-AM-FM Detroit, WBBC Flint and WSGW Saginaw, Mich.

Here are the cities and facilities sought:

Detroit, UHF Channel 62, ERP 224 kw visual, antenna height 467 ft. above average terrain.
Grand Rapids, UHF Channel 23, ERP 196 kw visual, antenna height 562 ft.
Lansing, UHF Channel 54, ERP 21.6 kw visual, antenna height 528 ft.
Flint, Channel 12, ERP 20 kw visual, antenna height 333 ft.
Bay City, Channel 5, ERP 79.44 kw visual, antenna height 271 ft.

Legal counsel for Booth is Pierson & Ball, Washington.

Booth Radio & Television is the second company to announce its intention of seeking a group of TV outlets around Detroit's perimeter. Last month, WJR Detroit said it would seek four stations near Detroit, one in Cleveland [B•T, May 5].

Forerunners of anticipated flood of applications from independent motion picture theatre interests also were disclosed last week when two large theatre chains announced their intentions of filing for facilities in the South. The Martin Theatres of Georgia Inc., operating exhibition houses in Georgia, Florida and the Carolinas, announced that it would file for UHF Channel 28 in Columbus, Ga. Almost simultaneously, Southern Television Inc., made up of a dozen stockholders including four identified with Independent Theatres Inc., announced it would file for Channel 12 at Chattanooga.

President of Martin Theatres of Georgia Inc. is E. D. Martin. He said that "for several years Martin Theatres has been giving careful consideration to the possibility of building, owning and operating a television station in Columbus. . . . All the talents of Martin Theatres —which for over a century has dealt exclusively with a moving, visual media of communication—will be utilized by the TV station."

Southern Television Inc. expects to file its application this week.

Moses Lebovitz is president of STI, and also is president of Independent Theatres Inc., which operates suburban and drive-in theatres in the Chattanooga area. STI vice president, Z. Carter Patten, is chairman of the board of the First Federal Savings & Loan Assn. and prominent in Chattanooga civic affairs. Other stockholders are Manuel Russ, president of Wesco Paving Co. and Chattanooga Rock Products Co.; John Martin, a building contractor; Burton Seagle, associated with Mr. Martin; Abe Solomon, chairman of the board of Independent Theatres; Joel Solomon, treasurer and general manager of Independent Theatres and president of Chattanooga Jaycees; Robert Lebovitz, secretary of Independent Theatres; Felix Diamond, in real estate and insurance business; W. C. Hudlow Jr., president and general manager of Arrow Transfer & Storage Co., and J. Homer Hardy, Chattanooga CPA.

Estimated construction cost will be more than $300,000, Mr. Lebovitz said. He also revealed that STI has completed negotiations with the International Ladies Garment Workers Union for option to buy the former building and grounds of its FM station on Walden's Ridge. Studios would be located in downtown Chattanooga.

Mr. Lebovitz said "the only thing we need is the 'go ahead' signal from the FCC." He hopes that the station will be on the air in time to telecast the results of the national elections.

Applications for both Martin Theatres of Georgia and Southern Television Inc. will be filed by the Washington law firm of Cohn & Marks.

ABC-UPT Merger

(Continued from page 73)

cial loss to CBS accumulates daily. As established at the hearings, the annual rate of profit of WBKB is substantially in excess of $1,500,000; such profit is, of course, permanently lost to CBS for the period during which the application for assignment remains pending. Further, during such period, not only economic resources, but other benefits necessary to competitive network equality, are lost to CBS. And the uncertainty for so long a period makes proper long-range planning difficult."

The Paramount hearing, in addition to the proposal for merger of ABC-UPT and sale of WBKB to CBS, involves the license application of Paramount Television Productions Inc. for KTLA (TV) Los Angeles; the license and renewal of license applications of Allen B. DuMont Labs. for WTTG (TV) Washington, WDTV (TV) Pittsburgh and WABD (TV) New York; the license and renewal of license applications of Balaban & Katz for WBKB and WBIK (FM) Chicago; applications of Paramount Pictures Inc. for consent to transfer control of Paramount Television Productions Inc. and Allen B. DuMont Labs. to Paramount Pictures Corp.; application for transfer of control of Balaban & Katz from Paramount Pictures Inc. to United Paramount Theatres, and application of Paramount Pictures Inc. and E. V. Richards Jr. for transfer of control of WSMB Inc., licensee of WSMB New Orleans, to United Paramount Theatres Inc.

The ABC-UPT petition contended that "the consolidation of the several applications involved in this proceeding . . . was ordered by the Commission not because of legal necessity or requirements but as a matter of convenience."

The petition asserted that "none of said applications are mutually exclusive or competitive in the sense of requiring contemporaneous or comparative hearings but merely involve, in differing degree, the same or similar questions of fact and law."

The petition observed that the hearing to date has consumed 78 days of testimony covering 11,200 pages of transcript and 700 exhibits, many quite detailed, and "more than 75%" of the record pertains to history of the motion picture anti-trust proceedings by Justice Dept.

The petition concluded that all evidence which is material to the proposed merger of ABC-UPT and sale of WBKB "has now been taken and that such evidence establishes an adequate and proper basis for an initial and final decision on said applications."

The petition asserted that the evidence pertaining to all other applications involved in the hearing "cannot be completed for a matter of many weeks, or even months."

ABC "is now and for the foreseeable future will continue to be in need of capital, not only for the purpose of meeting its normal and ever-increasing operation expenses, but to improve its program service and to establish and maintain additions to its plant and equipment necessary for its continued effective operation."

Ample precedent exists for approving the transfer of WBKB to CBS, the petition pointed out. FCC approved the sale of KFWB Los Angeles by Warner Bros. Pictures to KFWB Broadcasting Corp., the petition noted, even though KFWB was then on temporary license because of anti-trust violations described in the government's major movie case. Similarly, FCC renewed the licenses of the Richards' stations (WJR Detroit, WGAR Cleveland and KMPC Hollywood) and approved their involuntary transfer to new owners, the petition observed, without first determining that G. A. (Dick) Richards would have been entitled to renewal of the licenses if he had not died. This was done over the protests of the Commission's own General Counsel and chief of its Broadcast Bureau, the petition noted.

In its opposition to the severance, DuMont told the Commission that "earlier in this case" it petitioned FCC to sever its applications, noting "the Commission did not grant that petition. The failure of the Commission to separate the DuMont applications signified as a practical matter the relationship of a television network to motion picture company derived from Paramount Pictures Inc. would be studied in the light of all the issues of the consolidated proceeding."

Cites Sec. 1.724

Observing that FCC's rules (Sec. 1.724(a)) permit the Commission to consolidate relative cases, DuMont's petition stated "it follows that the Commission considered the issues evolved from the proposed merger to be interwoven with the problems arising from the original transfers of licenses from Paramount Pictures Inc. to Picture Co. and the Theatre Co. pursuant to the consent decree" terminating the Justice Dept. movie anti-trust case.

"The integration of all the applications into the 'same cause' became apparent after the failure of the Commission to grant the DuMont petition for severance," the petition argued.

Noting ABC emphasizes its need for capital to operate its network, the DuMont petition commented that "the need of ABC does not exceed the requirements of other parties to this proceeding. This record clearly demonstrates the competitive disadvantage under which the DuMont network finds itself because of its inability to own and operate five television stations. The effective operation of DuMont as a national television network also depends on an expeditious decision in this case."

Balaban & Katz, in reply to the Zenith petition, held that Zenith's position in the proceeding was untimely and that its petition has no substantative basis to warrant a grant of its requests. Balaban & Katz explained that the Chicago allocation as finalized was proposed in the Third Report, comments to which were due June 11, 1951. WBKB agreed to the proposed change to Channel 2 in May 1951, the petition recalled, but Zenith did not ask for declaratory ruling respecting the status of Channel 2 until July 24 of that year.

The change of assignment of WBKB, as in the case of 30 other stations, the WBKB petition pointed out, was directed by the Commission by show cause order pursuant to the provisions of Secs. 303(f) and 312(b) of the Communications Act as an integral part of the total allocation plan, to reduce interference, and to provide for the maximum utilization of channels. The petition continued to explain that "there is no requirement for comparative hearings between applicants and existing stations effectuated by show cause proceedings instituted by the Commission as part of this proceeding."

Neither Sec. 309(a) of the Communications Act nor the *Ashbacker* case requires such procedure, the petition asserted.

MEDICAL VIDEO

Ulcer Operation Telecast

COMMERCIAL television made medical history in Chicago Tuesday night as a 60-year-old patient suffering from an ulcer for 34 years went under the knife at Wesley Memorial Hospital before viewers from coast to coast.

For the first time, the American Medical Assn., meeting in convention at Chicago for four days, permitted telecasting of two half-hour live programs. Time was bought by Smith, Kline & French, pharmaceutical laboratory in Philadelphia.

The ulcer operation was featured Tuesday night from 8:30 to 9 p.m. CDT, followed Wednesday evening, 9 to 9:30 CDT, by a symposium on the latest developments in group therapy for the overweight, military medicine, with the showing of a new portable anesthesia unit.

Dr. Roy K. Marshall, WFIL-AM-TV Philadelphia, was narrator, with Ad Schneider, NBC-TV New York, as producer and Don Meier, of the network's Chicago staff, as director. The second demonstration originated at Navy Pier, where 14,000 physicians met for their 101st annual convention.

TV-UNLIMITED

Offers European Facilities

TV-UNLIMITED Inc., newly organized and incorporated in New York, will replace the Broadcasting Program Service, President Herbert Rosen, announced last week.

Firm will specialize in the production of low-cost and syndicated television shows, and will work through its established European affiliates in conjunction with American producers and agencies interested in utilizing production facilities abroad, Mr. Rosen said.

KTTV (TV) BACKED

On 'Unscheduled' Events

GENERAL Petroleum Corp., Los Angeles, (Mobilgas dealers), through West-Marquis Inc., that city, has signed with KTTV (TV) Los Angeles to sponsor all future "unscheduled" local special events telecast by the station.

The TV contract, believed to be the first of its kind, is on an "open" basis. Under well-defined terms, "unscheduled" events are "newsworthy" and "of great timely interest to the public and the presentation of which is a service to the community." No limits are placed on the number of events or extent of coverage. Financial arrangements depend on activity and start with a base minimum of $75,000 annually, according to Richard A. Moore, station vice president and general manager, who described the plan as "a broadcaster's dream come true." Contract provisions give KTTV a "roving commission" to develop to the maximum, TV's capacity for rendering public service by on-the-spot reporting of events, he said.

WAGES SUIT

WICU Denies Charges

SUIT to recover $5,144.50 in "overtime" wages allegedly due three former employes of WICU (TV) Erie, Pa., brought an answer from Herbert S. Stewart, WICU general manager, that "employes, past and present, have been paid for all overtime work."

Mr. Stewart said that, "According to records, employes are paid for all hours submitted on weekly time card."

William Hargadine Jr., region director, U. S. Dept. of Labor's Wage & Hour and Public Contracts Div., announced last month that the suit had been filed in Federal District Court.

The suit was filed on behalf of Alan G. Payne, production man; Samuel J. Anderson, announcer-traffic manager, and Donald H. Goldberger, camera and film man, who seek to recover back wages allegedly due them for overtime. As a result of an investigation supervised by Mr. Hargadine, a civil complaint charging Dispatch Inc., station owner, with violations of the Fair Labor Standards Act was originally filed in November 1951. Disposition of this complaint still is pending. Mr. Stewart had denied the charges.

ADDITION of KNBH (TV) Los Angeles and KRON (TV) San Francisco makes a total of 26 markets carrying United Television Programs' *Double Play with Durocher and Day*, quarter hour film package starring Laraine Day and Leo Durocher. California State Tire Dealers, through Paul Castleman agency, S. F., will sponsor show on KRON.

SALISBURY, Md.—The Peninsula Bcstg. Co. (WBOC). Returned to attorney; obsolete forms and incomplete.

PROFIT PATTERN

Textbook in Preparation

TEXTBOOK titled "Pattern for TV Profit" is being prepared for the guidance of executive, engineering and operational staffs of new VHF and UHF television stations by five leading AM and TV engineers. Book is slated for publication in the fall.

Text has chapters on FCC functions, space requirements, layout, operating efficiency, air conditioning and installation plans for all-size stations. Charts and diagrams are included for each subject.

Five engineers who collaborated on the book are A. B. Chamberlain, CBS; Raymond Guy, NBC; Rodney D. Chipp, DuMont; Frank Marx, ABC, and Thomas E. Howard, chief engineer, WPIX (TV) New York.

JETT SELECTS

CBS-TV Interim Group

E. K. (JACK) JETT, vice president and general manager, WMAR-TV Baltimore, last Thursday named four other managers of CBS-TV basic affiliates to serve with himself as an Interim Committee, pending the organization of a permanent CBS-TV Affiliates Advisory Board, whose members will be elected by the CBS-TV affiliates themselves.

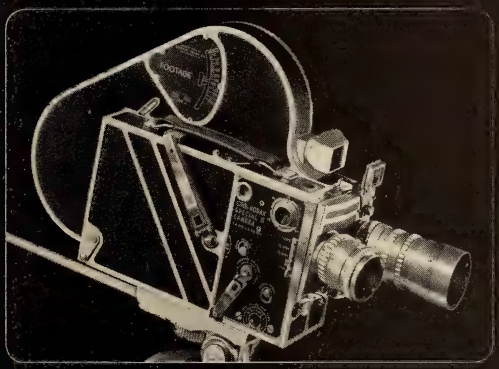
Purpose of the Interim Committee—as well as of the permanent board when it is established—will be "to better acquaint the top operating and policy executives of the CBS Television Network with the problems faced by affiliates, and also to make it possible for CBS-TV officials to share and help with problems peculiar to individual stations."

Chosen on the basis of providing good geographical representation, as the advisory board will do, members of the Interim Committee, in addition to Mr. Jett, are: Philip G. Lasky, general manager, KPIX (TV) San Francisco; Clyde W. Rembert, general manager, KRLD-TV Dallas; James C. Hanrahan, vice president and general manager, WEWS(TV) Cleveland; Glenn Marshall Jr., general manager, WMBR-TV Jacksonville, Fla.

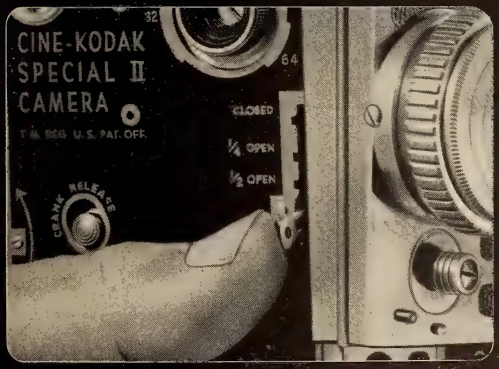
Plans for setting up the permanent advisory board call for a division of the country into a number of regional districts corresponding roughly with the CBS-TV network's operational plan. Affiliated CBS-TV stations in each district would elect a representative to serve on the board each year, the board to meet several times a year with officials of the network.

To accept a place on the interim committee, Mr. Marshall has resigned as District 4 representative on the Columbia Affiliates Advisory Board, nine-man affiliates consultant group which formerly handled both radio and TV matters, but now presumably will confine itself to problems of the affiliates of the CBS network. An election is now being conducted in District 4 for a successor to Mr. Marshall.

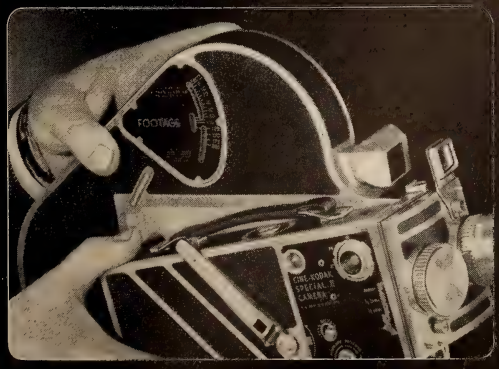
EADEH APPOINTED



To DuMont Research Post



EDWARD R. EADEH, for the past five years director of coverage and market research at ABC, has been named manager of the research department of the DuMont Television Network, General Manager Chris J. Witting announced Thursday. He succeeds Melvin A. Goldberg, who has been granted a leave of absence in order to join the U. S. Department of State.



Mr. Eadeh

Tops for TV

the 16mm. Cine-Kodak Special II Camera

One minute you're filming a commercial in a studio . . . the next you're shooting an on-the-spot news event. Television calls for a camera that's versatile enough for every assignment, yet easily portable. That's why a great number of America's television stations use the Cine-Kodak Special II Camera. No other easily portable 16mm. camera gives you so many special features!

- It's the only 16mm. camera with a *true* reflex finder. Focusing and framing are fast and accurate through the lens—without rack-over. You *know* your scenes are sharp and on target.
- The variable shutter (shown center left) gives you unusual command of exposure and depth of field.
- Multiple film chambers (shown left below) come in 100- and 200-foot sizes, allow extra film chambers to be threaded ahead of time, ready for emergency use.
- The basic twin-turret camera comes complete with one of Kodak's truly superb Ektar Lenses, finest ever made for 16mm. cameras.
- It accepts either single- or double-perforated film.
- Fades, dissolves, mask shots, double and multiple exposures, montages, and stop-motion effects—all can be made with the basic camera. No need to resort to special laboratory work. The film is set to show as soon as it's processed!

These are a few of the "Special II's" highlights. Let your nearest Kodak dealer give you the full story—or mail us the coupon below.

TV Color Schemes Are Explained

(Report 220)

NEW reference book for artists, scenic and costume designers explaining relative hues of 200 colors for use in black-and-white television has been prepared for NBC television by Albert W. Protzman, NBC-TV technical production director, and Cliff Stiegelbauer, network supervisor of design. Text was edited by Robert J. Wade, NBC executive coordinator of production development.

"The whole point of this guide is to tell designers not what to do but what to avoid," Mr. Wade explained. "Whereas an easel painter can use his eye to judge, the eye isn't sufficient in television. No designer has an opportunity to test 200 different gradations of color."

In order to avoid last-minute—and often expensive—changes in scenery, drapes or costumes, the book offers the "NBC comparative gray color chart." An arrangement of calibrated color-aid and Munsell neutral gray scale swatches, the chart provides a quick method of determining the gray scale equivalent of any desired color. If chart is to be used properly, spokesmen added, texture and surface of materials must also be considered.

Walcott-Charles Bout Rates 56.9 in New York

JOE WALCOTT - Ezzard Charles fight on NBC-TV June 5 received a TV-home Hooperating in metropolitan New York of 56.9, and an 85.7 share of TV audience. Sets-in-use during the telecast was 66.4, according to figures released last week by C. E. Hooper Inc., New York.

* * *

Growth of 14% In Seattle Sets

THE SEATTLE area TV set survey by the fifth annual *Seattle Times* Consumer Analysis indicates 32.1% of 5,000 homes checked had TV sets compared with 17.9% in 1951 and 5.2% in 1950. Estimated total as of January 1952 was 58,131 sets.

The survey indicated 58.7% of the sets were less than a year old. Preferred sets were RCA Victor (9.6%), Motorola (8.8%), Silvertone (8.3%) and Admiral (8%). Plans to buy a new set in 1952 were indicated by 9.8%, compared with 6.1% of those questioned in 1951.

Meck Suggests Standard On TV Air Time

ALL TV stations should be required to program "a substantial portion" of their air time with local news, discussion and educational material. In addition, political and controversial remarks made on network shows not billed as controversial should be "taboo."

These are the opinions of John S. Meck, president of Scott Radio Labs., Chicago, who a fortnight ago charged that "a handful of television network officials hold the greatest power over the votes of the American people ever held by any small group in the country's history."

Total Markets on Air 64* Stations on Air 109* Estimated Sets in Use 17,323,374

* Includes XELD-TV Matamoros, Mexico

Editor's Note: Totals for each market represent estimated sets within television area. Where coverage areas overlap set counts may be partially duplicated. Sources of set estimates are based on data from dealers, distributors, TV circulation committees, electric companies and manufacturers. Since many are compiled monthly, some may remain unchanged in successive summaries. Total sets in all areas are necessarily approximate.

A nice picture for advertisers who want returns today . . . and tomorrow

Here is where looking at WSB-TV is becoming a habit

The coverage* pattern you see is unique in telecasting.

A *unique* telecasting formula makes it possible: 50,000 watts of radiated power from a 1,062-foot tower over Channel 2.

Fortify this with WSB-TV's ability to program for the South and you come up with one of the country's standout advertising buys.

This coverage can be had only on WSB-TV. Nothing else in the area can touch it.

*During a single 30-day period, four WSB-TV staff produced shows pulled over 7,000 pieces of unsolicited mail from shaded counties on the map.

tions for station construction permits and licenses."

The Pittsburgh allocation decision "accordingly should be held unlawful and should be set aside," WWSW argues.

"Particularly the provisions of the allocation are inadequate in that Channel 13 . . . may be used only by pedagogical organizations for non-commercial programs upon a non-profit basis and hence is not available for general service," the petition declares.

It also contends the provisions of the allocation are "inadequate" in that the three UHF channels assigned there have "little, if any, immediate or prospective use in Allegheny County."

UHF Performances

"The performance of television transmission at the ultra-high frequencies is a speculative matter about which little is known," the petition explains, continuing: "Only one station in the world has ever attempted to render a regular television program service at ultra-high frequencies and its attempts are under circumstances which do not make the results useful for the Pittsburgh area. It is universally conceded that ultra-high frequencies are especially unsuited for rugged, hilly and wooded terrain such as prevails in and about Allegheny County."

The petition notes that on May 1 there were 428,000 TV sets in the Pittsburgh area, about 70% saturation. None of these can receive UHF, the petition states, contending that "if it is at all possible to bring about the creation of listening and viewing audience" for UHF there, "it would take so long and would be at such heavy and prolonged losses as to make it entirely impracticable for the petitioner to make application for the use" of a UHF channel.

Therefore, the "only available general-service VHF channel there is Channel 11," the petition concludes, pointing out that since six applications already have asked for VHF there and more are expected to be filed, "there must inevitably be a prolonged, difficult and expensive competitive hearing amongst the various conflicting applications."

The petition notes this hearing cannot be resolved for three or four years "and it is therefore likely that Allegheny County during that time will have but one" VHF station.

"Neither one nor two stations are, or even can be, adequate to serve the public needs of the Pittsburgh community even if three UHF stations were to be established," the petition states.

'Committed an Abuse'

Contending "FCC refused to allocate Channel 4 anywhere within Allegheny County and thereby committed so manifest an abuse of discretion as to constitute error in law," WWSW notes "the 1945 regulations of the FCC specified that the same television channel may be used by stations 150 miles apart" and that the "required separation might be modified according to interference and service conditions which called for modification.

"Under the 1952 regulations challenged by this petition," WWSW says, "there are set up basic and irrefutable presumptions by which the FCC declares itself finally bound and from which it says it will not depart."

The "conclusive presumptions" of FCC which WWSW cites are:

(a) That every television station will use maximum permissible power (here, 100 kw) in an antenna at the maximum permitted height (here, 1,000 ft.) and thereby cause the maximum permissible interference to other stations using the same frequency.

(b) That such maxima will be used regardless of the size or importance of the community in which the television station is located, regardless of the importance of the market which it serves and regardless of the financial ability of the licensee or the prudence of the investment which such maxima would require. (At present prices a 1,000-ft. tower costs approximately $150,000.)

(c) That no physical circumstances such as deviation from average conditions due to unusual terrain will be considered by the Commission in determining by what distances stations should be separated.

(d) That interference between stations will not be considered in making allocations of frequencies, and that the service area of stations will not be considered in making allocations.

(e) That in the area here involved stations must be located no less than exactly 170 miles apart (which the regulations interpret to mean no less than exactly 169.5-plus miles apart).

(f) That 170-mile separation does not in the first instance apply to radio-television broadcasting stations at all. If a request is made, as in this case it was, to assign a channel to a specified area, the FCC will commence its consideration of the proposal by ascertaining what nearby stations there are in operation at the frequency in question. Then the Commission resolves the 170-mile question as follows. It determines the distance from the existing station to what it calls the coordinates of the city from which the allocation proposal originates. If these coordinates are not contained in a book published by the Department of Commerce and entitled "Air Line Distances Between Cities in the United States" (which was prepared for some irrelevant purposes having no connection with the problems of radio-television broadcasting), the FCC then uses the site of the main post office (which was established, of course, without regard to radio-television broadcasting even though the FCC well knows that no private person will ever be permitted to establish his television station in or on any main post office anywhere).

The petition notes that the distances from the exact location of the antenna of WLWC (TV) Columbus, Ohio, "to what the Department of Commerce has said are the coordinates for Braddock (Pa.)," FCC determined the distance from WLWC's antenna to be 169.39 miles.

It was because these separations fall short of the 170-mile (169.5-plus mile) minimum spacing rule that the allocation of Channel 4 to the Pittsburgh area was denied, WWSW notes.

"The FCC assumes that Pittsburgh is exactly at the pinpoint intersection of longtitude 80 degrees, 00 minutes, 00 seconds west with latitude 40 degrees, 26 minutes, 19 seconds north, whereas there are in fact substantial areas in the Pittsburgh area from which adequate service can be rendered that area from an antenna located more than 170 miles from the antenna of WLWC," the petition professes. "There is no excuse for using Department of Commerce coordinates when actual transmitter sites are available for consideration.

"In the case of Braddock, the use of the post office site is entirely unwarranted," WWSW argues. "Even if there were any legal or regulatory justification for the use of the post office site, the decision of the Commission to deny Channel 4 to the Pittsburgh area because of the post office site is entirely capricious and fantastically unrealistic."

Since the regulations provide that in computing distances sufficient decimal figures be used to determine the distances to the nearest mile, WWSW assumes that were the distance of the Braddock post office 169.51 miles from the antenna of WLWC, Channel 4 could have been assigned to Pittsburgh. Since FCC set the distance at 169.39 miles, "this is 12 one hundredths of a mile too little."

Braddock Too Close

"Some part of the post office at Braddock . . . is 633.6 feet too close to a point that happens to be the site of the tower of WLWC," the petition comments.

The petition cites, "It appears unlikely that WLWC is going to use an antenna tower having the full permissible height of 1,000 ft. which is the assumed height upon

SKYROCKETS

LAGGING AUTOMOBILE SALES

Around Jan. 1, auto sales lagged. To whip this lag, Bill Piggott, head of Rock Island Nash agency bearing his name, got Nash dealers in area to sponsor late Saturday night film series on WOC-TV. Program titled "Airflyte Theater" debuted Jan. 19—fifteen dealers participating.

By end of January, Piggott had sold 15 new cars. Appearing on Feb. 16 program, he displayed chart showing only 3 new cars left at his agency. Told viewers to hurry if they wanted one of these. With sale of these 3 cars by 11 o'clock next morning, *Piggott had moved 31 new Nashes 3 demonstrators. . . .* ALL WITHIN MONTH OF FIRST TELECAST.

"Airflyte Theatre" is now in its second 13-week cycle and other Nash dealers sponsoring series report sales successes similar to Piggott's. Proof that WOC-TV *Sells* . . . for further proof get facts from your nearest F & P man . . . or us, *direct.*

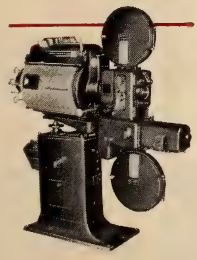
Brilliant and Steady

BACKGROUND PROJECTION



for World-Wide Settings in YOUR TV Studios

First Professional 16 mm TV Background Projector Provides 2,000 Lumens

46 ampere arc lamp, f/1.5 20 mm lens, air-cooled film gate, sprocket intermittent that ends film wear and holds old film steady.

TV Version of Famous Simplex X-L 35 mm Projector: 7,000 Lumens

An incomparable projector used in 80% of all theatres; now equipped for TV use with "2-3" intermittent. 80-110 ampere arc; f/1.9 2" lens.

Here, at last, is background projection made practical for any TV studio or network . . . brilliant, steady motion pictures that make any action scene in 16 mm or 35 mm film libraries available as a setting for TV programs.

No complex phasing needed with TV cameras. Simply focus camera on the background screen for a perfect picture. The GPL "2-3" intermittent pulldown, coupled with a 60 light-pulse per second shutter, automatically meets the camera's requirements. Special optical systems for each projector reduce "throw" required, save studio space.

Get full details on these outstanding projectors, now in use on major networks. Consider them in your new studio planning; add to the utility of your present equipment.

COMMUNITY TV GROUP *Forms National Lines*

TAXES, government regulation and expansion of TV broadcasting were the topics that most concerned more than 70 community TV operators at the first annual convention of the National Community Television Assn. at the Hotel Necho Allen in Pottsville, Pa. last Monday.

Members voted to fight a Bureau of Internal Revenue ruling that closed circuit relay systems are liable to the 8% tax imposed on leased wire services. Picked as the test case for the benefit of this offshoot of telecasting was Trans-Video Corp. of Pottsville.

Community TV operators—there are some 75 in operation in the country today—feed signals from metropolitan stations to TV-isolated communities. Most of these areas are in valleys beyond the reach of regular TV broadcasts. The organization puts up a high gain, directional antenna on top of a nearby mountain, runs coaxial cable down the mountain side attached to telephone or power poles, with tap-offs to subscribers' homes.

There are believed to be another 75 such operations in the construction or planning stage.

Tax problem was by far the most important of the matters before the less-than-a-year-old association. According to Revenue Bureau interpretation, consumers must pay 8% tax on installation and on monthly charges.

Pottsville company, headed by young (34) Martin F. Malarkey Jr. (also president of NCTA and owner of a retail appliance store in Pottsville, has 1,500 customers who paid the $135 installation charge and also pay $3.75 per month for maintenance and service. This involves more than $200,000 in installation fees and $2,625 per month in charges.

The Pottsville company, which began operation in February 1951, has its master antenna (located atop Sharp Mt.) tuned to Philadelphia stations (Channels 3, 6, 10) 75 miles away. The system cost $200,000 to build, Mr. Malarkey revealed last February [B•T, Feb. 11].

Test case—on grounds the tax discriminated against TV set owners in areas into which TV signals cannot reach—was recommended by special NCTA attorney Thomas C. Egan of Philadelphia. Mr. Egan also expressed the opinion that if the test case is adverse to community TV operators, it might be necessary to get sponsors in Congress for legislation to exempt systems from tax.

It was disclosed that the Lansford, Pa., city government originally proposed a 20% tax on gross revenue. This was finally reduced to a 5% imposition on gross income. It also was announced that the Public Utilities Commission of Pennsylvania officially disclaimed jurisdiction over community TV systems. The Maine PUC, however, assumed jurisdiction and the California commission was understood to be considering the matter.

Fact that FCC was reported too heavily engaged in other matters to make up its mind whether community TV should be regulated was considered heartening, according to expressions of members.

The effect of TV station expansion, particularly in the UHF band, elicited much interest. Subject was handled by Humboldt J. Grieg of WHUM Reading, Pa., (TV applicant for that city) and Dr. Frank G. Kear, of the Washington consulting engineering firm Kear & Kennedy.

Consensus was:

(1) UHF when it comes will cover at first 15-20 miles. Mr. Grieg quoted FCC reports to the effect primary and secondary UHF service theoretically was possible out to 75 miles unde maximum power and antenna heigh conditions (1,000 kw and 2,000 ft.) (2) In most communities, there wil be only one or two UHF signals. (3 Therefore, community TV can expec to continue in business, since viewer still will want other signals, par ticularly network, even though the can receive off-the-air local broad casts.

Manufacturers exhibiting equip ment at the meeting were Jerrol Electronics Corp., Philadelphia, an Spencer-Kennedy Labs. Inc., Cam bridge, Mass. RCA showed a docu mentary film of the Pottsville sys tem.

NCTA was organized in Novem ber 1951. It claims to represen half of the present 75 communit TV systems operating.

The convention re-elected Mi Malarkey president. Also re elected were: Claud E. Reinhard Palmerton, Pa., vice president George H. Bright Jr., Lansford Pa., secretary; Melvin L. Boyer Tamaqua, Pa., treasurer. One year directors elected were: Ken neth A. Chapman, Honesdale, Pa. J. Holland Rannels, Cumberland Md.; Eli Kramer, Harrisburg, Pa. C. C. Daker, New Philadelphia Ohio. Two-year directors electe were: G. B. Henderson, Carmel Calif.; A. J. Malin, Laconia, N. H Clyde Davis II, Wilkes-Barre, Pa

FORD SERIES *Breakdown of Boycot By Major Film Makers*

COLUMBIA PICTURES Corp., through its subsidiary Screen Gem Inc., will produce a series of 39 half-hour TV films for Ford Motor Co in an agreement negotiated by J. Walter Thompson Co., the agenc servicing the account.

This contract is said to be first of its kind between a major movie studio and a national advertiser for the production of films especially for television.

Titled *The Ford Theatre*, the series will start on 51 NBC-TV stations Oct. 2, as the replacement for NBC-TV's *Ford Festival*.

In each teleplay, name motion picture actors, directors and writers will be employed by Columbia-Screen Gems producer, Jules Bricken. The studio's own contract players, among them Broderick Crawford, Audrey Totter, Donna Reed, Aldo Ray and others will be utilized should the roles be suitable.

The Columbia agreement stirred speculation that other major movie studios soon might follow suit, particularly in view of the expected eventual increase in television stations and the resultant loss of more audiences to movies in more cities, now that the TV thaw is taking place.

Twentieth Century-Fox was among major studios believed to be considering making films for video. President Spyros P. Skouras has announced his firm is considering making "appropriate" movies for TV.

The Wall Street Journal estimated that the seven major studios have a backlog of 5,000 movie features of which a minimum of 2,000 are suitable for TV, which if sold en masse to television would bring an average minimum of $10,00 each, or $20 million in earnings.

The 2,000 features are thos made between 1930 and 1948, whe the Screen Actors' Guild steppe in to demand a share of TV reve nue for pictures made afterwards

Reports in Hollywood said Co lumbia has received an offer o $20 million for its old pictures an that Howard Hughes' RKO Pic tures Corp. may sell its old film for TV. President Barney Balaba of Paramount Pictures said hi company's old movies would not b sold to TV until "the right time."

WKZO

FETZER BROADCASTING COMPANY

JOHN E. FETZER
Pres. & General Mgr.

KALAMAZOO · MICHIGAN
Studios: Burdick Hotel
590 Kilocycles · 5000 Watts
Columbia Broadcasting System

November 21, 1951

Mr. Martin Silver
Federal Telecommunication Laboratories, Inc.
500 Washington Avenue
Nutley 10, New Jersey

Dear Marty:

Sometime ago in talking with you or Brad on the telephone, you were interested in knowing the total transmitter outages for the past year. After looking through our logs, we find that outages due to equipment failure run something like this:

Outages: October 21, 1950 - October 21, 1951

Visual Transmitter: 22 minutes and 27 seconds

Aural Transmitter: 11 minutes and 30 seconds

The total transmission time during this period was over 4600 hours. You will see that disregarding power line failures, which are not the fault of the transmitter, outage time has been remarkably low.

Kindest regards.

Cordially yours,

Carl

film report

HOWARD D. MORRIS, of Cavanaugh Morris Adv., Pittsburgh, has announced the formation of **Cavanaugh Films Inc.** Director of film production is **Ted Mason**, of Mason Marionettes.

Mr. Morris said the new company will specialize in production of puppet and trade mark films "for moderate budget advertisers."

A series of 15-minute TV shows is being prepared, the first of which, *The Enchanted Nutcracker*, will be ready for release Aug. 1. Other films planned are *Jack and the Beanstalk, Frivolities of 1952* and 12 others, which will be released at weekly intervals.

Address of new firm is Chatham at Wylie, Pittsburgh 19, Pa.

Sales . . .

SALES ORGANIZATION for the distribution of more than 50 full-length European feature films, live and animated short subjects is being set up in Chicago.

Herbert Spitzer and **Burton A. Neuberger**, executive vice president who recently resigned as manager of the Chicago office of Marfree agency, have exclusive theatre and television rights in North, Central and South America for film products made by several leading European studios, Mr. Neuberger said.

Re-recording on the features is being completed now with lip sync and voice over sound tracks in English. Ready for release is a 13 quarter-hour series of operas, made with the Bavarian State Opera company, ballet and orchestra. A series near completion consists of 13 half-hours with stop-action puppetry in famous fairy tales.

The company, **Switzer & Assoc.**, will produce films for stations, packagers, agencies and clients "at a half to a third" of the U. S. cost, Mr. Neuberger said, and will also supply European studio services to American performers.

MILITARY TV

'Vital Factor' Says Sarnoff

TELEVISION will be a vital factor in all military operations and conceivably the public may watch battles on home TV sets if global warfare ever breaks out again, Brig. Gen. David Sarnoff, RCA board chairman, told the graduating class of Pennsylvania Military College last Tuesday.

Gen. Sarnoff asserted that electronics have become an indispensable ally in aviation, controls and atomics.

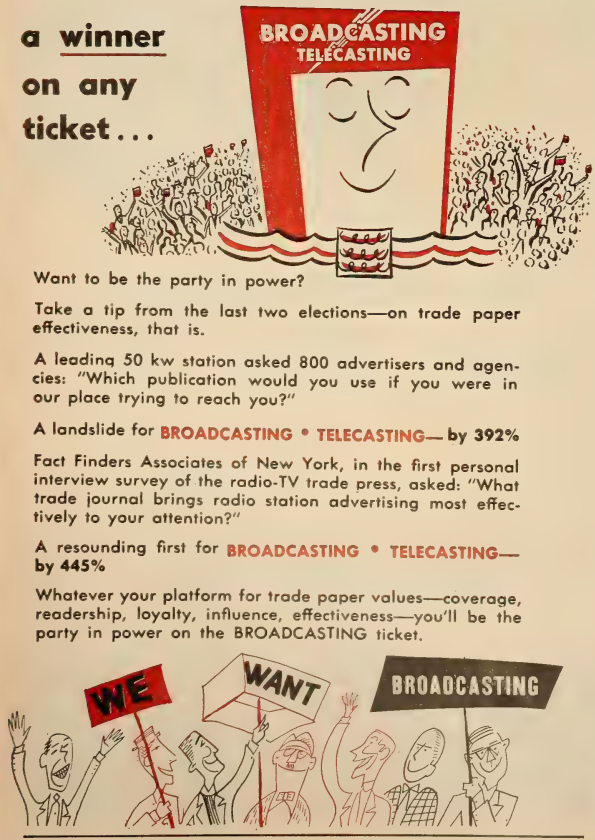
Gen. Sarnoff warned that no nation can relinquish its interest in the sciences and remain strong. When war comes, "it becomes a race of science against time, and America must be strong and 'at the ready,'" he declared, admonishing that the importance of interest in science applies to the science of government as well as to physical sciences.

He was awarded an honorary degree of Doctor of Science during the commencement exercises of the 131-year-old educational institution.

New CBC-TV Sponsor

CANADIAN TV's second definite advertiser when it opens this fall will be Canadian Westinghouse Co. Ltd., Hamilton, Ont. The firm currently is preparing its own commercials for *Studio One*, which it will sponsor for CBC-TV Montreal beginning in August and CBC-TV Toronto in September. S. W. Caldwell Ltd., Toronto is agency.

WHAM-TV BIRTHDAY



Marked By Blood Campaign

WHAM-TV Rochester observed its third birthday anniversary through a special blood donor drive which enriched the Rochester Chapter of the American Red Cross blood bank by 23,051 pints.

Blood donor campaign began May 20 and built up to last Wednesday which was WHAM-TV's anniversary. Climax of the drive on the last day was a live telecast from a local hospital showing a patient receiving a pint of blood which had been contributed that morning at WHAM-TV's Radio City.

Special programs included films made in Washington of Reps. Kenneth B. Keating (R-N. Y.) and Harold C. Ostertag (R-N. Y.), both of whom urged western New Yorkers to get behind the campaign.

FCC Chairman Paul A. Walker, in a talk also recorded on film, said, "Here is an example, I think, of the kind of public service that both radio and television are particularly able to render."

AFM 5% PLAN

Must Stay, Says Petrillo

CHARGING "selfish interests" with trying to scuttle the AFM welfare fund 5% royalty formula to which TV film producers must contribute, James C. Petrillo, president, at the American Federation of Musicians' National Convention in Santa Barbara last Tuesday, squashed all hopes it would be repealed.

Admitting the formula "isn't perfect," Mr. Petrillo declared, "We'll stick to it until someone comes along with something better".

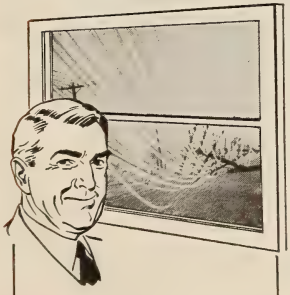
"The formula must stand," he added. "I wouldn't give up the 5% plan for a $5 million working guarantee in Los Angeles annually. It will be changed only when it will be to the benefit of all locals."

His fiery plea killed a reported move by members of Los Angeles Local 47 [B•T, June 2, May 12] and New York Local 802 to introduce resolutions asking the international executive board to eliminate the royalty arangement.

Both locals contend the fund set-up as it now stands prevents musicians from getting TV work because it discourages filming of video shows with live music. Los Angeles musicians several weeks ago circulated appeal petitions among members, getting around 2,500 signatures. They were sent to Mr. Petrillo for his and executive board consideration.

Mr. Petrillo, in a 45-minute ad lib talk, assailed "some members" of Local 47 for their activity in the campaign, declaring that they once earned $800 per week and are unhappy because they're making $400. He charged they were stirred up by vague conversation regarding TV employment if the formula were lifted.

He said Local 47 officers had met with a group of these TV employers to learn what guarantee would be made if the royalty formula were lifted. Nothing came out of it. They didn't even offer to hire a piano player, Mr. Petrillo reported.



Musicians in the petition campaign, he declared, were willing to give $5 of each $50 they earned instead of 5% tax, but this contribution to the fund would be minute compared to benefits gained through the formula.

Mr. Petrillo's defense of the royalty formula came as a complete surprise to delegates. The subpect was not on the convention agenda. Any changes in the welfare fund setup would have to be made by the international executive board, was the explanation.

He reported approximately $186,000 in the trust fund from the royalty formula. Disbursement of the money for free public music through locals will start next January.

Mr. Petrillo, unopposed, was re-elected AFM president for his 12th year. Re-elected vice-president was Charles L. Bagley, Los Angeles; Secretary, Won Cluesmann, Newark; treasurer, Harry J. Steeper, New York.

The Los Angeles local failed to put over a proposal calling for AFM to "prevail" upon a member of Congress to introduce legislation that would stop importation of foreign-made instrumental music sound tracks and recordings for radio and TV.

"Thanks to our 'US' Electric Plant we're on the air!"

In choosing a stand-by electric plant, more and more stations are turning to "U. S." units because of their reputation for *dependability*. U. S. specializes in stand-by power. We'll gladly send you information on U. S. electric plants suitable to your needs.

Telethon by Hope

BOB HOPE will hold his first coast-to-coast television marathon—for benefit of the U.S. Olympic team — over NBC-TV beginning Saturday at 11 p.m. and continuing through Sunday at 1:30 p.m. EDT. Working with Mr. Hope will be Bing Crosby in what NBC claimed is the latter's first TV appearance.

BAPTIST GROUP

Plans TV Use in 1953

SOUTHERN BAPTISTS plan to use television more extensively to put forward their program in 1953, it was announced at the 94th meeting of the Southern Baptist Convention in Miami.

Dr. S. F. Lowe, executive secretary of the organization's radio commission, said 15-minute films featuring outstanding Baptist leaders are being prepared for TV.

RUNYON FUND

$570,211 From Berlethon

HAVING raised a total of $570,211 in cash and pledges, Milton Berle on June 8 completed his fourth television marathon on NBC-TV for the benefit of the Damon Runyon Memorial Fund, rounding out a four-year grand total of more than $4 million.

The 22½-hour telethon began at noon EDT June 7 and continued through 10:30 a.m. June 8. Produced by Warren Jacober and employing five camera crews in shifts, it originated in New York's Radio City. The comedian was on the air almost continuously except during regularly-scheduled Saturday shows.

Station-by-station breakdown of cash and pledges donated during the telethon was shown as follows:

WOI-TV Ames, $805; WSB-TV Atlanta, $2,433; WBAL-TV Baltimore, $1,293; WBZ-TV Boston, $8,571; WBTV (TV) Charlotte, $1,544; WNBQ (TV) Chicago, $9,550; WLWT (TV) Cincinnati, $1,510; WNBK (TV) Cleveland, $6,695; WLWC (TV) Columbus, $520; WLWD (TV) Dayton, $746; WWJ-TV Detroit, $2,896; WOOD-TV Grand Rapids, $116; WFMY-TV, Greensboro, $633; WSAZ-TV Huntington, $126; WFMB-TV Indianapolis, $1,205; WMBR-TV Jacksonville, $1,088; WJAC-TV Johnstown, $321; WGAL-TV Lancaster, $2,611; KNBH (TV) Los Angeles, $11,697; WAVE-TV Louisville, $400; WMCT (TV) Memphis, $703; WSM-TV Nashville, $2,129; WNHC-TV New Haven, $631; WNBT (TV) New York, $417,066; WTAR-TV Norfolk, $1,435; WOW-TV Omaha, $533; WPTZ (TV) Philadelphia, $5,434; WDTV (TV) Pittsburgh, $1,955; WJAR-TV Providence, $3,133; WTVR (TV) Richmond, $1,661; WHAM-TV Rochester, $539; KSD-TV St. Louis, $5,402; KSTP-TV St. Paul, $10,080; KDYL-TV Salt Lake City, $662; KFMB-TV San Diego, $4,717; KRON-TV San Francisco, $6,016; WRGB (TV) Schenectady, $130; WSYR-TV Syracuse, $4,407; WKTV (TV) Utica, $280; WNBW (TV) Washington, $5,620; WDEL-TV Wilmington, $915; WNBF-TV Binghamton, $217; WBRC-TV Birmingham, $1,142.

SEATTLE RELAY

Towers Go Up For TV

SCHEDULED for completion last week were four towers in the Pacific Telephone & Telegraph Co.'s radio relay system, for live telecasting of political convention coverage via KING-TV Seattle [B•T, May 26].

The towers were erected at Orting, Tenino, Castle Rock and Kalama, all in Washington, with two one-ton antennas atop each tower. Four network-affiliated radio stations—KOIN KGW KEX KPOJ—are cooperating to bring the KING-TV political coverage to Portland, Ore.

NEDA Meet

PRACTICAL discussion of UHF will be participated in by independent parts distributors at the National Electronic Distributors Assn. convention in Atlantic City Sept. 22-25. A 20-minute RCA film on UHF will be supplemented with discussions and a lecture. Louis B. Calamaras, NEDA executive vice president, will describe UHF as "a new windfall which experts estimate will bring more than $800 million in business to the service man and parts distributor."

PRO FOOTBALL

DuMont Lines Up Sponsors

MILLER Brewing Co., Atlantic Refining Co., and the Admiral Corp. are among the first sponsors announced by the DuMont Television Network for its $1 million pro football coverage, Aug. 15 to Dec. 21.

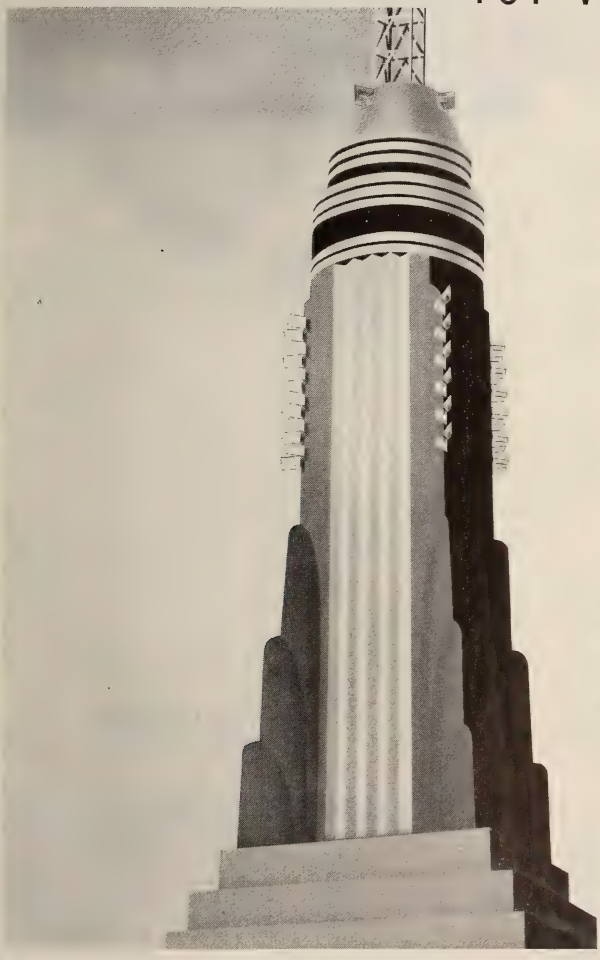
The scheduled 29 professional and championshop games will start with the annual midsummer all-star game in Chicago's Soldiers Field, Aug. 15, with the telecast sponsored by the Admiral Corp. Chicago, through the Russel M. Seeds agency. Exact number of cities to see this year's play has not been announced, but it was noted by network spokesmen that 34 DuMont stations carried the game last year. This year's contest will be between the college selectmen and the Los Angeles Rams National League champion for 1951, and as usual, will be held under the auspices of the *Chicago Tribune*.

Miller Brewing Co., Milwaukee, through Mathisson & Assoc., same city, will sponsor the DuMont Thanksgiving Day telecast of the Detroit Lions-Green Bay Packers contest in Detroit. It also will back the National Football League championship playoff Dec. 21. Site of the game and the list of participating stations are to be announced.

DuMont also will carry as many as four games of the National Football League each Sunday during the regular season, splitting the network on a regional basis. Multiple-game technique was adopted last season to assure comprehensive coverage and to provide football with greatest local interest in each market.

National league games between the Philadelphia Eagles and the New York Giants will be sponsored jointly by Miller Brewing and the Atlantic Refining Co., the latter through N. W. Ayer & Son, New York. Atlantic will also sponsor Pittsburgh Steelers coverage.

TV networks and stations for all National League games are yet to be announced. Six games, consisting mostly of New York Giants' play, will be seen over WABD (TV) New York, reportedly marking the first time since 1948 that New Yorkers will be able to see professional football on television.



DuMont will cover the 28th annual East-West Shrine all-star game from Kezar Municipal Stadium in San Francisco, to be telecast over the entire network Dec. 27 (Saturday).

The sponsorship of all games, it was pointed out, represents an outlay in excess of $1 million for time and rights.

WBAL-TV Baltimore and WDAF-TV Kansas City have signed with INS Telenews, N. Y., for its 12-minute daily TV newsreel now in production.

ANDREW "SKEW"* ANTENNA

for VHF and UHF television

The ANDREW "Skew" Antenna is the *only* antenna which provides a circular radiation pattern from antenna elements placed around a supporting structure which is larger than a half wave-length on a side! With the "Skew" Antenna, it is possible to mount a multiplicity of TV antennas on the sides of tall buildings, on the sides of existing towers — even towers which also support a standard antenna on top. The economy offered by a joint operation of this type is obvious.

At present, the "Skew" Antenna is custom built for each installation and consequently general performance specifications cannot be delineated. However, ANDREW engineers will be glad to discuss its application to specific situations.

*Patents applied for

ANDREW four element "Skew" Antenna on the conical end of the mooring mast of the Empire State building, used as auxiliary by WJZ-TV. Lower on the mooring mast, artist's sketch shows the 48 element ANDREW "Skew" Antenna to be installed for WATV.

ALASKA PROGRAMMING

Tape Use Cuts Materials, Shipping Costs

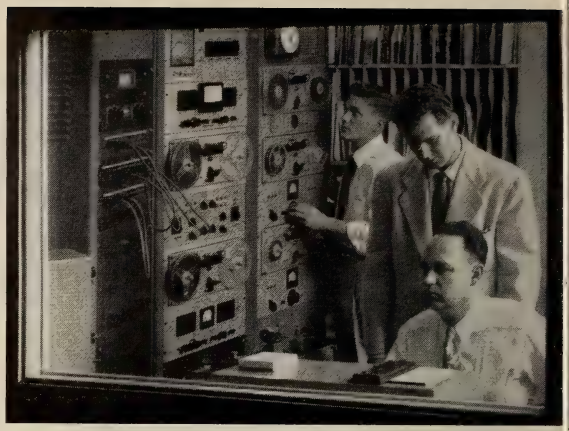
HIGH COST of providing transcriptions in large volume for isolated stations has been solved through the use of tape.

For the Midnight Sun Broadcasting Co., which operates KFAR Fairbanks and KENI Anchorage, Alaska, the use of tape has reduced materials costs 85% and cut shipping charges in half.

The Alaska company was faced with the problem of economically bringing stateside network programs to its listeners. Extreme weather conditions, coupled with great distances, made radio pick-up impossible. An alternative—disc recordings of stateside network shows shipped by plane—was too expensive.

Company officials consulted John Keating Inc., a Seattle-Portland recording studio, which advised the use of tape recordings.

Jack D. Ellison, Keating manager, explained that, "Air transportation was a costly necessity—it was the only way to get the programs to Alaska while they were still fresh. But tape recordings would reduce these shipping costs since the reels of tape were light in weight and not easily damaged and would require no special heavy packaging.



"In addition, the tapes could be used over and over again, cutting down the cost of recording material. This was important since Midnight Sun's eventual volume of recordings would be great."

By the spring of 1949, the tape recording program was in operation. Forty hours of programs weekly were being recorded in Seattle and flown to Alaska. The system worked so well that today 67%—some 80 hours weekly—of Midnight Sun's programs are taped.

Direct lines to the Keating studio from Seattle stations KOMO (NBC) KJR (ABC) and KVI (MBS) provide the network links. All recording is done on "Scotch" III-A sound tape.

Since the taping program started, Keating-Midnight Sun has placed in operation some 1,500 reels of sound tape. Both 600 and 1,200-foot reels are used.

"Using conventional recording methods at the present rate of 80 hours of recording a week, the two-year cost of recording materials would have been more than $25,000. Cost of recording tape over the two-year period has totaled $4,000—only 15% as much," Mr. Ellison said.

Monitoring programs in Keating's Seattle studios are (l to r) Lew Lathrop, engineer; Mr. Ellison, and Lyle Thompson, engineer.

HELEN RYAN ELECTED

Heads L. A. Ad Women

HELEN L. RYAN, promotion director, Ray W. Smith Co., has been elected president of the Los Angeles Adv. Women Inc. She succeeds Helen Edwards, president, Helen Edwards & Staff.

Installation is scheduled for this Wednesday with Neil Reagan, vice president, McCann-Erickson Inc., Hollywood, and president, Adv. Assn. of the West, serving as m. c. Other officers elected were:

Mimi K. Phillips, owner, Adv. Service, first vice president; Margaret H. Finfrock, executive secretary-treasurer, Miracle Mile Assn., second vice president; Mary M. Cripps, account executive, The Shaw Co., corresponding secretary; Alicia K. Smith, advertising manager, Rose Marie Reid Co., recording secretary; Muriel Schulze, assistant to the president, E. J. Elson Press, treasurer, and Ida Russell, assistant manager, Lisle Sheldon Adv., assistant treasurer.

Directors include Miss Edwards; Charlotte De Armond, public relations director, Pacific Airmotive Corp.; Claire Hughes, traffic manager, KWKW Pasadena, and Nancy Grobert, public relations department, Prudential Insurance Co.

Donald B. Hause

FUNERAL services were conducted in Chicago last Tuesday for Donald B. Hause, 55, advertising manager of Armour & Co., who died June 8 in St. Francis Hospital, Evanston. A coordinator of the American Heritage Foundation and former advertising manager of Sprague, Warner Co., Mr. Hause was a graduate of Lake Forest (Ill.) College and a World War I Navy veteran. He is survived by his wife and a son.

N.Y. MEDIA NEWSMEN

Assn. Okays Constitution

RADIO-Newsreel Television Working Press Assn. of New York has voted favorably upon a constitution for its membership. Temporary Chairman Chester Burger of CBS said last week that "now the decks are cleared for more positive action."

The association was set up to act as a single voice for on-the-scene radio and TV newsmen as well as newsreel cameramen, sound men, contact men and tape reporters. It was estimated that more than 300 radio and TV newsmen are engaged in on-the-spot coverage in metropolitan New York.

White on WLIB

WALTER WHITE, executive secretary of the National Assn. for the Advancement of Colored People and also an author, newspaper columnist and war correspondent, started a weekly radio commentary program over WLIB New York June 2 (7-7:15 p.m. EDT). Mr. White observes news and world affairs during the program and interviews leading news figures. Mrs. Franklin D. Roosevelt was his first guest. Sponsor is Vim stores, through Frederick-Clinton, N. Y.

KRDU Open House

OPEN HOUSE for KRDU Dinuba, Calif., brought 1,150 visitors to the station's new offices and studios May 30. New site consists of six acres. The new building, 40x60 feet, was designed by H. A. McMillen, manager KTUR Turlock, Calif. Egon Hofer is president and general manager of KRDU.

ADDITION of 45 rpm system to present facilities at WCCM Lawrence, Mass., has been announced by the station.

'Music Magazine'

EXECUTIVES, continuity writers and members of the music department at WQXR New York were represented with musical compositions and arrangements, when work composed by staff members was broadcast on the station's *Music Magazine* program from 9:05-10 p.m. EDT June 2. Works included concert, popular and experimental songs, piano pieces, minuets, toccata, variations, and dance suite by station manager James E. Kovach, continuity writer Jack Ringgold, director Alfred Simon, producer Fred Grunfeld, music director Abram Chasins, announcer Jacques Fray, recorded - program director Harold Lawrence, and staff members Marilyn Parrish and Eleanor Williams.

CBA CONVENTION

Is Set June 20-22

CATHOLIC Broadcasters Assn. will hold its Fifth National Convention in New Orleans, June 20-22. The Rev. Michael J. Killoughey, of the Catholic Information Center in New Orleans, will be host and chairman of the convention.

Information concerning the meeting may be obtained from Father Killoughey, 608 Common St., New Orleans, or from the CBA office, P. O. Box 1573, Wilmington, Del.

Webb Jay

WEBB JAY, 82, president of the operating company which established WIOD Miami, Fla., died June 4. Mr. Jay, a long-time resident of Miami Beach, also was an automotive engineer and inventor. WIOD is owned and operated by the *Miami Daily News*.

DPA TAX LIST

190 Facilities Amortized

CERTIFICATES of necessity for accelerated tax amortization of 190 new or expanded defense facilities have been approved by the Defense Production Administration for the week of May 23-29, it was announced last week.

Amounting to a total of $169,686,166 in five-year allowance amortization for tax purposes, the week's list of companies receiving certificates included the following electronic manufacturers (figure after name of company is total amount certified, followed by percentage allowed):

Raytheon Manufacturing Co., electronic equipment and parts, $431,000, 65%; Sylvania Electric Products Inc., tubes, $431,000, 65%; Raytheon Mfg. Co., tubes, $260,172, 65%; Allen B. DuMont Labs., electronic equipment, $35,743 65%; Treitel-Gratz Co., electronic parts, $2,523, 80%; David Bogen Co., electronic equipment, $48,934, 65%; Electric Tachometer Corp., distance transmitters for Navy, $13,635, 80%; Forged Washer Co., aircraft and electronic parts, $154,010, 50%; RCA, tubes, $325,000, 65%; Continental Can Co., electronic equipment, $100,000, 65%; Sylvania Electric Products Co., tubes, $451,970, 65%.

GENEVA VACANCY

Communications Post Open

VACANCY for a Class 3, Technical Assistant, has been announced by the International Telecommunication Union in Geneva, Switzerland. Salary ranges from about $2,900 to about $4,400, free of income tax. Requirements include a degree or diploma in physics or electrical engineering and at least three years experience in a responsible post in radio-communications.

Applications should be sent directly to Leon Mulatier, Secretary General, International Telecommunications Union, Palais Wilson, Geneva, Switzerland, in time to reach there by July 25. Although not required, it was suggested that interested persons file a duplicate application with the office of Harvey B. Otterman, Acting Chief, Telecommunications Policy Staff, Dept. of State, Washington 25, D. C.

ARMED FORCES Radio Service, Hollywood, awarded citation by Calif. Legislature on AFRS' 11th anniversary, fortnight ago.

KWBB'S 'MANHUNT SALE'

Sells 101 Used Cars in Five Days

LINED UP outside the "Big House" are (l to r) Jack E. Grant, account executive, Lago & Whitehead Inc., agency handling the account; John Merrell, KWBB commercial manager; Don Schmid, motor company president; Rex Johnson, sales manager; Charles Proctor, assistant sales manager, and Joe Andrews, Ralph Stern, Charley Andrews, N. R. Sidel, Chuck Tarbeck, Andy Kimes, "Ace" Kuhn and Homer Knight, all salesmen.

* * *

KWBB Wichita has just completed a highly successful sales campaign for Don Schmid Motors Inc., one of Wichita's leading new and used car distributors.

Using the theme, "The Manhunt Sale," terms such as "sawed-off rate books," "casin' the joint," and "murdering prices," were tied into all copy.

The auto firm, using three 15-minute programs and a schedule of 40 floating spots, established an all-time high during the sale. In a five-day period, 101 used cars were sold, the station reports.

Under the title, *Don Schmid's Used Car Parade*, the three programs included spot descriptions of several cars. The programs were m.c.'d by KWBB's John Merrell.

Spot campaign was built around such attention-getting lead-offs as "Calling All Cars," and "Get that Man!" Lead-offs carried over to the "manhunt" angle, warning that a man was "wanted" and then asking who desired a specific type of car described on the air.

Salesmen were given aliases. Customers were asked to be sure and see Charles "Shaky" Tarbeck, Rex "Muscles" Johnson and Charlie "Ears" Proctor. Each salesman wore a prison-striped jacket and cap. The home office was known as the "Big House."

Campaign generated so much enthusiasm among the public that at one point extra police were assigned to handle traffic, the station notes.

KSID AFFILIATES

With ABC and WC Networks

KSID Sydney, Neb., new daytime station on 1540 kc, has joined ABC network and Wyoming Cowboy Network. The station, which took the air a fortnight ago, is owned jointly by William C. Grove, general manager of KFBC Cheyenne, Wyo., and his brother, Lewis W. Grove of Denver.

The station is applying for full time on 1340 kc. Maxwell Young has been named KSID manager with Art Westergaard as chief announcer and program director. KOWB Laramie, Wyo., last week also joined Wyoming Cowboy Network and ABC.

FM Remote Control

REMOTE control operation of the transmitters of WRAK-FM Williamsport, Pa., and WFRO-FM Fremont, Ohio, was approved by FCC last week through waiver of Sec. 3.265 of its rules. In each case, the FM transmitter will be controlled remotely from the transmitter site of the respective AM station. About 20 other FM stations now are employing this type of operation on a temporary basis, an FCC spokesman indicated earlier upon issuance of the Commission's proposal regularly to allow remote control operation of certain FM and AM stations and to ease transmitter operator requirements in some cases [B•T, June 9].

FARM DIRECTORS

Now On MSA Foreign Tour

FOUR radio farm directors are among 12 farm experts now on a six-weeks tour of European and Middle East farm communities. The radio men were selected by Mutual Security Agency to teach local farm agents better ways to use radio to spread agricultural information.

Farm directors include Sam B. Schneider, KVOO Tulsa, and president of the National Assn. of Radio Farm Directors; Claude Mahoney, CBS Radio; C. W. Jackson, KCMO Kansas City, Mo., and Lawrence Haeg, WCCO Minneapolis. The group left May 23 and will return about July 1.

Young Performer

BOB VESEL, program director of WMTR Morristown, N. J., thinks he has helped set a record for the youngest performer to appear on radio. Two days after his wife had given birth to a daughter April 28, Mr. Vesel had recorded the infant's cry and played the tape during a WMTR commercial for Jersey Central Power & Light Co. Sales message: Modern lighting and power make today's maternity ward a pretty safe place for mother and child.

Meet your BEST CUSTOMER

Who is he? He's the American Farmer, the current American capitalist. He's the real owner of his own business—and farming is big business today.

He makes a lot, he saves a lot, he spends a lot. He's your best prospective customer.

One-tenth of all these prosperous prospects for your product live in WLW-Land—One-tenth of America. The best way to reach them is by Radio . . . and the most effective and economical radio in this area is WLW.

The full story of "Your Best Customer"—all the facts and figures—is on film. Ask to see it.

WLW The Nation's Station

New Survey Shows Radio's Bigness

(Continued from page 27)

secutive 21-day period (including "follow-up" questionnaires), with each separate subsample proportioned in terms of the population estimates. As a result, we were able to obtain an adequate representation for each day in the 7-day cycle.

All "program rating" systems in present use are limited in terms of one common aspect. None of them can possibly provide an adequate measurement of radio's circulation, because none of them include auto-radio listening among their data. This limitation was not too important ten years ago, perhaps, but today—when some 40% of the market households have one, or more, radio-equipped automobiles or trucks — the auto-radio audience constitutes a highly important segment of the total listening audience. And, this is particularly true during the spring, summer and fall months when use of autos for family pleasure trips is greatly increased.

For years, broadcasters have heard so much talk about "summer hiatus" that they have come to believe that radio really does die a little come June. Here again, program ratings are at the core of the problem. The "summer hiatus" concept has been justified on the basis of rating evidence that in-the-home listening drops off sharply in urban homes with the coming of warmer weather. But, when people in urban homes leave their homes for recreation, where do they go? Some of them—on the basis of the evidence in hand, *many* of them—make increasing use of their automobiles for recreational purposes. And, when a man uses his auto for recreation (or for business) he is quite likely to tune-in his auto-radio, at least for part of the trip.

Auto Listening

In order to obtain some measure of the extent and characteristics of this auto-radio audience, we asked the following series of questions.

In terms of what happened YESTERDAY, how many times was the family auto(s) used for separate and different trips?
About how long (in hours and minutes) did the particular trip take? (asked about each separate trip)
"About how long (in hours and minutes) was the CAR-RADIO in use during the trip? (asked about each separate trip)
How many people . . . men, women and children (by age-groups) . . . were in the car during that particular trip?

The data obtained with this question-series are rather extensive, and they will be discussed more fully in a separate report. In general, however, we found that . . .

- The average auto-radio family makes about *32.5 separate trips*, in the family car, *during a typical 7-day week.*
- The *average auto-trip consumes about 57.4 minutes* (including "parking time"), and the *auto-radio use averages 12.6 minutes per trip.*
- On a typical trip in a family-owned auto there are *about 1.71 people (including the driver) in the car, on the average.* This includes *0.81 adult men, 0.52 adult women* and *0.24 children between 5 and 18 years of age.*

When these statistics are projected to the estimated 126,700 households with auto-radio, we find that approximately *4,117,750 separate trips are made in family-owned radio-equipped automobiles during a 7-day week*, and that these trips involve some *3,936,570 hours of auto use, including "parking time"* during a typical week. And, of this total, *auto-radios are tuned-in about 22% of the total time for an approximate total tune-in of 864,700 hours* during a typical 7-day week. All in all, some *1,150,100 adult-hours* are spent in auto-radio listening in a typical week.

In summary: Radio continues to hold its prime place among the media in the Louisville Market. However, some definite changes in "listener behavior" are becoming more apparent. The great increase in the ownership of portable sets, the widespread distribution of AM sets in "work rooms" in and about the home, and the relatively heavy use of auto-radio, all of these point-up the fact that radio's audience is changing, rapidly and markedly, in TV markets.

Radio enjoys one important advantage that the other media cannot match. It is the only solely auditory medium. Radio reaches people when they are concurrently engaged in other activities. And, if the broadcaster is to successfully satisfy the needs of his working/transient/relaxing audience, he must play radio's unique advantage to the very hilt. He must design "stopper" commercials—messages with high attention-getting effectiveness. And, in between these attention-grabbers, he must program easy-to-listen-to material that does not tax the attending powers of the listener too much. In short, he must program for "tomorrow's audience"—because "tomorrow" is almost here.

*Assuming the essential representativeness of the sample, any 'within cell' statistic ma be multiplied by the estimated population of households in the market (315,000) to obta an estimate of the available in-the-home audience in that category.

Film Report

(Continued from page 86)

Clyde Bruckman and **Harold Goodwin.** Negotiations have already started for release in South America and Europe.

* * *

Sterling Television Co., New York, has acquired from The Michelangelo Co. exclusive rights to "The Titan," Robert Flaherty's Academy Award winner based on life of Michelangelo.

Production . . .

Maurice Kosloff Productions, Hollywood, is preparing a half-hour TV film series, *Roaring Twenties—U.S.A.,* for mid-July production. Based on the experiences of ex-New York detective, **Barney Ruditsky** of the Broadway gangster squad, each film will dramatize highlights in the lives of such underworld characters as Dutch Schultz, Lucky Luciano, Jack "Legs" Diamond, Waxey Gordon and Louis Buchalter.

Writing the scripts is **Hal Biller,** radio-screen writer, which Mr. Ruditsky will open and close with narration. **George Moskov** is to be the director and **Louie Diaz** will be the associate producer.

* * *

Sam Hersh, president of **Family Films,** Beverly Hills, Calif., announces completion of the first group of 13 *Living Bible* films, produced in color for release in color and black and white. The 15-minute lesson units portray events in the life of Christ. **Nelson Leigh** portrays Christ in the films and **Edward Dew** is the director. According to Mr. Hersh, these are the first films using the literal text of the modern English of the revised standard version of the Bible. Release dates are set for September.

* * *

Wizard Telepictures Co., Hollywood, has started production on a quarter-hour TV film series, *The Wizard of Dreams.* Fantasy-comedy-musical series co-stars film actors **Chick Chandler** and **Franklin Langborn. Boris Petroff** is the producer-director.

* * *

Gene Autry's Flying A Television Co., Hollywood, is producing 13 half-hour TV film series, *Death Valley Days,* for **Pacific Borax Co.,** New York (20 Mule Team Borax), sponsor of the radio version. **Stuart** and **Darrell McGowan,** motion picture producer and director, have been signed to serve in those capacities with **Ruth Woodman** adapting scripts. **McCann-Erickson Inc.,** New York, is the agency.

* * *

Bing Crosby Enterprises, Culver City, has started production on its recently-acquired **Bret Harte** short story, "Tennessee's Partner," for inclusion in *Rebound,* a half-hour TV film series. **Jack Patrick** wrote script adaptation for producer-director, **Bernard Girard.**

* * *

Supporting roles assigned to **Dennis Ross, Howard McNear** and **George Pearson** in "The Gentle Years," first in *Ethel Barrymore Theatre* half-hour TV film series being produced by **Interstate Television Corp.,** Hollywood, a subsidiary of Monogram Pictures. **Walter Brennan** stars in the first film, which is narrated by **Ethel Barrymore. Will Jason** directs from an original script by **Jack Ruben** and **Jameson Brewer.** Producer is **Lee Savin.**

* * *

Three more films will soon go into production for CBS-TV *Schlitz Playhouse of Stars* with directorial duties assigned to **Edward Mann** by producer **Edward Lewis. Virginia Field** and **Willard Parker** co-star in "Mr. and Mrs. Trouble", now being filmed. **Irene Dunne** narrates the half-hour series.

* * *

Lou Lilly Productions, Hollywood, has been formed by **Mr. Lilly,** production supervisor and scenario department head for Jerry Fairbanks Productions, to film TV programs and commercials. Headquartered at KTTV (TV) studios, production starts immediately on a 13 half-hour situation comedy TV film series, *The Boy Friend,* featuring screen actor **Todd Karns.**

* * *

Six more half-hour films in **Kellogg Co.'s** *Wild Bill Hickok* TV series, filmed by **William F. Broidy Productions,** Hollywood, get underway June 18. **Guy Madison** and **Andy Devine** head the cast.

Twin Celebration

NOT only did new 10 kw station KBIG Avalon, Calif., start operating on 740 kc, June 1, but President-General Manager John H. Poole, was father of twin girls, Caroline Marie and Claudia Maria, the preceding evening. (Story on KBIG opening page 58.)

Film People . . .

Walter Klinger, in charge of sales for **Scandinavian-American Television Co.,** Beverly Hills, has returned from Copenhagen where the firm is filming *Hans Christian Andersen* TV series. Already completed are "Emperor's New Clothes", "Little Claus and Big Claus", "Simple Simon" and "The Swineherd." Mr. Klinger is arranging for distribution on 26 which are to be ready for fall release. Recently added to company is **Reginald Wyer,** head cameraman for *Seventh Veil, Quartet* and *Trio.*

* * *

Roland Reed, head of **Roland Reed Productions,** Culver City, Calif., is abroad for six weeks to study the feasibility of television film production outside of the United States. With several proposed TV film series in mind. Mr. Reed will tour England, Italy, Sweden, France and Norway inspecting studios and facilities.

* * *

Arthur B. Canning has joined the **George F. Foley** TV packaging and production firm as a sales representative. Formerly an account executive with Newell-Emmett Co. and divisional sales manager of the Brown Co., Boston, Mr. Canning will handle such programs as *Tales of Tomorrow, Dr. George Gallup Show,* and *Coast Guard Cadet on Parade.*

* * *

Arline Judge, former screen star, is to make her TV film debut in *Kerry Drake* series being produced by **Hafner-Halperin Inc.,** Culver City. She will portray *femme fatale* to **Sterling Hayden's** detective.

* * *

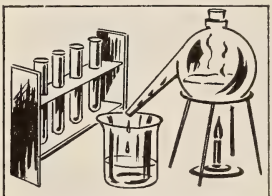
Hedy Lamarr has been signed for 36 half-hour television films to be produced in color by **Victor Pahlen** and associates in Mexico City. The series, titled *Great Loves,* will feature Miss Lamarr as the feminine partner in famous love stories. Production is scheduled to start July 1. Each film is budgeted in excess of $20,000, it was reported. In addition to her salary, Miss Lamarr will also share in the profits from the venture. Director of the series is **Edgar Ulmer.**

* * *

William Castle, contact director for Columbia Pictures, is on loan to **Pennant Television Productions Inc.,** Hollywood, as alternate director with **Harold Schuster** on *Date With Destiny,* half-hour TV films.

* * *

Hillary Brooke and **Clarence Kolb** have been signed for supporting roles in CBS-TV *My Little Margie,* summer replacement of *I Love Lucy* for **Philip Morris,** being produced by **Hal Roach Jr.** and **Roland Reed Productions,** Culver City.



* * *

William Asher, Hollywood director, has been signed to write and direct 26 quarter-hour TV films for **Proktor Syndicated International,** New York, with shooting to start July 21 on the first 13. **Bernard Prokter** is the producer and **Don Ameche** is the m.c.-narrator.

Headline Club Meet

WILLIAM RAY, director of news and special events at NBC Chicago, speaks to the Chicago Headline Club, chapter of Sigma Delta Chi journalism fraternity, at a dinner meeting tomorrow (Tuesday) night. He will appear in a forum on news coverage plans for the upcoming political conventions in Chicago with Charles Hacker, Republican Convention manager, W. Neil Roach, Democratic Convention manager, and Alvin Orton, AP chief in Chicago.

EDGAR BERGEN, star of CBS Radio *Edgar Bergen-Charlie McCarthy,* starts first of several night club engagements, June 21, to break in material for next season's TV appearances.

And the final test is cost per 1000!

Radio Needs Muscle

(Continued from page 32)

be largely neglected by TV, partly because of commercial demands on TV time and partly as a simple matter of TV economics.

Don't get me wrong. TV is a marvelous medium. And like radio it is a great challenge to those of us working at it. I want to see both mediums prosper. But TV is a glamour boy. If you're wed to him alone, he can get real wearisome and demanding. Radio might be compared to the unglamorous husband who has been bringing home the bacon but may get unbearably dull at times. Fortunately it's permissible to be bigamous and wed to both, and both will be welcome under the same roof.

And fortunate indeed are those station owners who have a stake in both mediums, for they can complement each other. TV can bring the complete sight and sound, at a price, but may never be able to economically operate locally as radio does with its opportunity to do more things less expensively and with less advance planning.

From the station's viewpoint, it's less trouble to sit on one's fat fanny and just take network feeds, only now that the feeds are largely sustaining, the fanny is going to thin out. So since it's going to thin out anyway, why not replace the fat with a little muscle. Programming muscle, that is.

The lack of network night commercials has given radio stations this opportunity for a new start, and it is to be hoped that the chance isn't muffed. Currently national spot business is pretty healthy, so stations have a far better start than when they originally began, for national station representation hadn't yet been formulated, and station income was of the most haphazard variety. How long national spot will now prevail as a major source of income will depend on radio's appeal to the public. As TV continues its inroads on public attention via inevitable expansion, radio must have good sound business reasons for survival. Despite its record of frequent impressions at low cost, a dwindling radio audience will of necessity become suspect under the eagle eyes of the agency research boys.

So it is to be hoped that the industry just doesn't sit around and fret too much about possible network rate cuts with a per cent of a percentage involved. Some rate cuts may be inevitable, and many adjustments may be in the offing. It certainly is no time for crying, but a time for displaying some of the guts that built radio in the first place. Radio stations might well invest in more programming people—give bonuses to employes who are alert and come up with suggestions for feasible local programs and program stimulants. A revival of the imagination and drive that pioneered the industry will certainly please the most important friend and ally the radio station has—his representative—for certainly they have a mutual interest in making the station's audience attractive to the card rate buyer, who is always very jealous of his dollar's buying power.

Whether prosperity continues for radio, or whether austerity sets in, the medium should put its house in order by doing the things it does best, plus the things that TV is least apt to do. Tune-in incentive should be heightened, if radio will again become a more integrated part of the community.

Radio has to stay. We can ill afford to lose such a medium. True, radio is on a reducing diet not of its own choosing, but it will eventually become a harder hitting, leaner looking fellow, and will be healthier and more attractive.

DOLLY REED, beauty editor, *McCall's* magazine, joins advertising partment, Sales Builders Inc., L. A. (distributors Max Factor Hollyw make-up and Signature products).

KFBB TRANSFER

ACLU Urges Hearing Be Held

INFLUENCE of Anaconda Copper Mining Co. in the affairs of Montana was cited last week by the American Civil Liberties Union in a letter urging FCC to hold a hearing on the proposed transfer of control of KFBB Great Falls, Mont., to Fairmont Corp., wholly-owned Anaconda subsidiary.

ACLU contends approval of the transfer without a hearing would violate "the civil liberties principle of diversification in the ownership and policies of the media of mass communication." ACLU noted Anaconda "already owns or controls six Montana newspapers and has an interest in a seventh."

The transfer application, filed with the Commission early this year, requests approval to acquisition of control of KFBB by Fairmount Corp. through purchase of 51% interest for $157,080 from Fred Birch [B•T, Feb. 5]. Mr. Birch would retain a minority interest. KFBB is assigned 5 kw fulltime, directional night, on 1310 kc.

UP PLANS

Underway for Convention

FINAL U.P. plans for political convention news coverage, on behalf of member radio stations, have not been drawn, but will be effected on scale corresponding to reporting for newspaper members, which calls for "record strength" staffing, John J. Madigan, U.P. radio news manager, has announced.

News for TV station members will be filed over special TV script wire, it was reported, with film coverage by United Press Movietone News to be processed specially in an on-scene plant. TV coverage is to be headed by William C. Payette, U.P. television manager, assisted by Chiles Coleman, southern division news manager, William R. Higginbotham of the Washington bureau, and John Zischang and Charles Schuman of New York Movietone bureau.

PRESENTATION of honorary plaque has been made to WGAR Cleveland by 4th Group, Ohio wing of the Civil Air Patrol for "outstanding contributions to the field of aviation."

RADIO REPUBLIC INDONESIA

Is "Most Important" Way To Reach People

"RADIO is the more and more important way to reach our people," the director-general of Radio Republic Indonesia said while visiting New York.

The official, whose complete name is Mr. Maladi, explained that broadcasting is about the only mass medium in a country where more than 60% of the people can not read the Roman alphabet.

Indonesian radio is not limited to educating and informing the people, or to explaining the 3,000-mile-long archipelago to neighboring countries, but can even be identified as one of the primary sources of the democratic government, itself, Mr. Maladi said.

The facts might best be told in Mr. Maladi's own story:

As a teacher in Surakarta (on the island of Java), he was asked to help write scripts for the local radio station, not too long after radio was introduced to the islands in 1933. He started writing sports commentaries for the athletic-minded Indonesians, who reacted so strongly to such radio fare that today blow-by-blow accounts of major American boxing matches are rebroadcast on the islands two days after the event.

Sports Successes

The success of sports shows led him to suggest that the station branch out similarly in other fields and develop beyond the purely Javanese art programs it featured almost exclusively. He was given the chance to put his ideas into effect, and at the end of the four years was made honorary secretary of BBRK, the federation of national radio in Indonesia. It was a post he held proudly, albeit modestly, however, for he received no salary.

Then the Second World War started, the Japanese took Indonesia, and radio was seized by the invader. People were forbidden to listen to anything except "permitted" broadcasts and their frequently inspected radios were fixed to receive only Japanese stations, with the adjustments sealed by an imperial imprint. Workers of the underground reproduced the seal, broke the original on their sets, listened to forbidden channels and then replaced the official mark on their receivers. Mr. Maladi remembers that at that time (1943), San Francisco's Voice of America became the primary source for the commodity otherwise controlled by the Japanese: world news.

Chris J. Witting (standing), director-general manager, DuMont Television Network, and Mr. Maladi inspect TV control room equipment.

* * *

When the Japanese were replaced by Dutch troops at the end of the war, the same local people who resisted invasion fought against colonization and continued to operate the native radio system. Today, the history of the republic's founding can be read in radio logs maintained by radio people during these troubled times.

After independence, Mr. Maladi, like other underground leaders, was given a post in the government he had helped establish and was named director-general of the national radio network. Since 1950, he has maintained his offices in Djarkarta, the capital city, where broadcasting and government continue to be centralized.

As director-general of the state-owned network, Mr. Maladi supervises a system of 24 stations, to be increased by 10 additional outlets as soon as equipment ordered from the United States arrives.

Newspaper circulation is estimated at about 15,000. The lead in educating the nation's 80 million persons is thus taken by radio via the country's 225,000 sets—with one receiver often serving as many as 200-300 people in a single community listening center.

The director-general since April 10 has been making a three-month tour of American radio markets. After visiting, observing and inspecting network operations in New York, he scheduled stops in other principal cities.

O Tempora! O Marconi!

CLIMAX to radio giveaway shows was reached when Mrs. Franklin R. Hart, as prize in a guessing contest by WHIL Medford, Mass., was given the station itself—for one day. Mrs. Hart invited in all the neighbors last Monday to watch WHIL engineers and disc jockeys operate from her home.

On All Accounts

(Continued from page 12)

packages, Mr. Stone now handles the merchandising elements for Sonja Henie, Jackie Robinson, Penguin, Howdy Doody, and Gabby Hayes.

Currently, in addition to *Howdy Doody*, which is a fully-sponsored half-hour each day across the board on NBC-TV, the firm is represented by the *Gabby Hayes Show*, sponsored by Quaker Oats, five times weekly on television; *Author Meets the Critics* on DuMont, *Howdy Doody* on NBC radio, and *Jackie Robinson*, sponsored by Best Foods on NBC radio.

Mr. Stone has been married to the former Lyndel Laura Schwartz since Aug. 1, 1940. The Stones have two children, Judith, 9 and Richard, 6.

NBC AFFILIATE IN DETROIT

Owned and Operated by THE DETROIT NEWS

National Representative THE GEORGE P. HOLLINGBERY COMPANY

LANG-WORTH's newest show, *This Is the Hour*, 60 minutes daily of broadway show tunes, light classics and songs from movies, is drawing favorable sponsor and audience reaction, according to C. O. Langlois, Lang-Worth president. Mr. Langlois says that *This Is the Hour* was especially designed as a show case for commercial spots and that it is the first of five new shows of broad popular appeal being added at monthly intervals for release to the Lang-Worth Transcribed Program Service.

programs promotion premiums

BILLBOARD PLUGS RADIO

OPENING of new super highway to Virginia Beach has prompted WCAV Norfolk, Va., to contract for three outdoor billboard locations on the new highway. Billboards will be used to plug station's summer resort programming. Business was placed through John McLaughlin Advertising.

FIRST HAND ACCOUNT

KOREAN airlift assignment has been completed by Esther Van Wagoner Tufty, Washington correspondent for 300 newspapers and 21 radio stations. Objective was to pick up a GI wounded at the front and fly back with him to the homefront. Report written by Mrs. Tufty deals with her experiences and those of Douglas MacKissock, the wounded soldier.

WHAS-TV INTERNSHIP

FOUR radio arts majors at the U. of Kentucky have been selected by WHAS-TV Louisville for a 10-weeks summer TV internship at the station. The program will offer the students working experience with WHAS-TV, co-sponsor with the university of the training plan.

'WLBE JAMBOREE'

ENTIRE three hours of *WLBE Jamboree* on WLBE Leesburg, Fla., has been sold to Howard & Ferguson Inc., distributor for Shell Oil Products, and 21 area Shell dealers. Heard from 5-8 p.m. Saturday, *WLBE Jamboree* is a hillbilly request show. J. Allen Brimmer is m. c.

BUSY BEE PROMOTION

HONEY colored promotion folder has been distributed by Beehive Network consisting of KSL Salt Lake City and KSUB Cedar City, Utah, and KEEP Twin Falls, KEYY Pocatello and KID Idaho Falls, Ida., announcing that business wise "Everything's humming here!" Copy points out that network's outlets in Utah and Idaho have a potential audience of 45,740 more radio families than any competing radio network.

'MUSIC TO MOW BY'

MUSIC to read by, music to dine by and music to buy by has always been featured by WCCC Hartford. Now it has *Music to Mow Your Lawn By*, a new program sponsored by the Hartford Equipment Co. The firm offers to mow the lawn for the lucky listener who can identify the "Mower Mystery Melody." Come winter, says Walt McGowan, WCCC news editor, and listeners probably will hear music to shovel snow by.

BEST MICHIGAN TALENT

BEST Michigan amateur teen-age vocal talent will be aired by WJR Detroit this summer. Talent hunt is being staged by WJR and the Junior Chamber of Commerce. Don Large, WJR choral director, will visit the entire state and will act as a judge in all regions. The WJR mobile studio will be used for most outstate programs. Broadcasts are being handled by Ron Gamble, director; Donn Chown, script writer, and Jim Garrett, m.c.

GEORGIA SONGWRITERS

YOUNG Georgia songwriters are being given a chance to introduce their works by WSB Atlanta. Each day, a Georgian's tune is aired. At the end of the month a champion song will be selected, recorded and forwarded to a publisher for consideration.

SPOT GETS RESULTS

MATCHING a current spot announcement on *Jewish Varieties* on WERE Cleveland dollar-for-dollar with an ad in newspapers for Mothers Day last year, the Davis Restaurant in Cleveland enjoyed 85% more business this year than the previous one, according to station reports. Show is aired on Saturday night and is written, produced and broadcast by Isadore Scheon, one-time program director at WEVD New York.

PRIMARY COVERAGE

CAMERAS were taken into the city room of the *Greensboro Daily News* by WFMY-TV Greensboro, N. C., to cover the May 31 Democratic primary. Arthur C. Stringer, promotion manager, said, "We are very proud of this special coverage which I am sure marks a 'first' in the Carolinas if not in the entire South." Gomer Lesch was in charge of the TV operation.

AIDS SHRINERS' EXPOSITION

SHRINERS' Exposition at Pleasure Beach, Bridgeport, Conn., was helped to success by WICC Bridgeport's Wallie Dunlap and Bob Crane. All of the more than 80 exhibitors in the five-day fair reported favorable business. Paid admissions were estimated unofficially at 80,000, with all proceeds going to the Cerebral Palsy campaign.

STATION'S SALES FORMULA

SERVING a market rather than selling it is topic of promotion piece issued by KMMJ Grand Island, Neb., and KXXX Colby, Kan. Experienced farm programming, copy points out, leads to sales. Reprint of a letter from Ball & Davidson Adv., Denver, giving results of survey conducted by the agency which placed KXXX on top in radio listenership, is featured in the brochure.

HEALTH PROGRAMS

NEW radio series giving news behind the news of progress in health, medicine and science began June 7 on NBC, *Your Key to Health*, scheduled for weekly broadcast, stars Jane Froman, relating health feature stories, and Ben Grauer reporting health news. Series is being presented in cooperation with Health Information Foundation.

KIDDER, PEABODY & Co.'s mutual funds department, New York, is testing series of one-minute commercials via WGHF-FM New York. Firm has also extended *Your Money at Work* on WOR same city every Sunday through July. Doremus & Co., N. Y. is the agency.

CONCISE PROGRAMMING

EFFORT is being made by WAAM (TV) Baltimore to give Marylanders complete news, sports and weather information. Three consecutive five-minute programs are being presented each weekday evening. Ted Jaffee, Nick Campofreda and Bill Watson will disperse news, sports and weather information, respectively, in the programs, *The Newsman, The Sportsman* and *The Weatherman.*

TV'S SERVICE STRESSED

STORY of community service through TV has been told by WEWS (TV) Cleveland in brochure treating station's public service activities. There is a pictorial account of efforts of the station in cooperation with religious civic and educational leaders to utilize the medium to its best advantage. Booklet's introduction states "Television—combining all the arts of sight and sound—can be the clearest, brightest light to illuminate our world today."

SPOTS INCREASE

TO reach Southern California swing shift workers, Orby's Women's Apparel Store, L. A., purchased some spot announcements on *Alex Cooper Show* on KLAC Hollywood six times weekly. Results were so gratifying that store started 32 spot announcements per week for 52 weeks. Agency for Orby's is Joyce True Adv., Santa Monica.

'QUEEN' TO TOKYO

AUDIENCE for July 23d broadcast of MBS *Queen for a Day* must be composed of women with sons or husbands serving with Armed Forces in the Far East. The Old Gold cigarettes sponsored show will send the queen to Tokyo, via Philippine Airlines, for an eight-day visit with son or husband. Military leave will be granted as soon as contestant is selected. On her way home, winner will have stop-overs in Manila and Honolulu.

WORC TREASURE HUNT

TREASURE hunt was sponsored by WORC Worcester, Mass., fortnight ago. Clues were broadcast by Dick Dowling leading participants along a circuitous route which finally ended at the new WORC studios. Mrs. Muriel Porter, first to reach the prize, won $100. Other people finding the finishing point were awarded merchandise prizes.

SALES FORECAST

SMARTEST place to spend the summer is at WCAU Philadelphia, according to promotion folder released by that station. Copy builds idea that wherever you go WCAU goes too. Reader is advised to "put your sales story on WCAU where there's never any vacation from listening or *buying*."

THIS is the architect's drawing of the new studio-office building of WIRK West Palm Beach, Fla. Joseph S. Field Jr., WIRK president, said that when the building is completed late this summer, it "will be one of the most modern structures in the Palm Beaches." It was designed by architect John L. Volk of Palm Beach.

PAY RAISES

WSB Okays for CBS N. Y.

AN ACROSS-THE-BOARD salary increase of 7½% for CBS New York employes in the labor grade category and on the payroll March 31 was approved by the Wage Stabilization Board last week.

Several hundred employes of CBS and three of its divisions were affected—CBS Radio, CBS Television and CBS Labs.

Spokesmen for the company said it was trying to pay the retroactive adjustments last Friday, but that because of time limitations some employes might not get the extra money until next Friday. Additional adjustments for overtime put in since March 31, they said, will be paid "at the earliest possible date."

The 7½% cost-of-living increase is based on salaries as of March 31. CBS spokesmen said it was accepted by the employe group of the Employe-Management Committee early in April and then submitted to WSB for its approval.

CD EXHIBIT

KCBQ Airs Preview

PREVIEW broadcast by KCBQ San Diego of the traveling federal civil defense exhibit brought impressive response from listeners.

Charles E. Pearce, CD official, commended the station for "the extremely inspiring program. Your timely half-hour broadcast indicates the great power of radio in arousing public interest."

KCBQ News Chief John Halvorsen toured the exhibit with visiting officials and workmen who were setting up the displays. At the request of Mr. Pearce, KCBQ sent the program tape to Washington as a guide to other stations planning similar programming.

INTERIM dividend of 12½ cents a share on common stock has been declared by directors of Capitol Records payable June 25 to holders of record June 14. Also declared is regular quarterly dividend of 65 cents per share on $2.60 cumulative convertible preferred stock payable July 1 to holders of record June 15.

SHEPHEARD NAMED

Heads Marketing Assn. Unit

JOHN E. SHEPHEARD, research director, Fletcher D. Richards Inc., has been elected president of the New York Chapter of American Marketing Assn. for the coming year, AMA announced Thursday.

Other officers for the 1952-53 season include: John Coleman, supervisor of consumer research, General Foods Corp., vice president; Philip Agisim, assistant director of Advertising research, Cowles magazines, treasurer; Caroline Garnsey, associate director of marketing research, *Woman's Day* magazine, secretary; Melvin J. Davis, assistant research director, Cecil & Presbrey, assistant secretary; Ernest E. Engel, market research department, Thomas J. Lipton Inc., assistant treasurer.

Edward B. MacDonald, manager of media research, Young & Rubicam, and Charles W. Smith, associate manager, McKinsey & Co., were elected directors for two years; Margaret C. Boos, research director, D'Arcy Advertising Co., was elected a director for one year.

Chapter board members serving the second year of two-year terms are: Donald B. Armstrong Jr., vice president, McCann-Erickson; Allen B. Sikes, service manager, ANPA Bureau of Advertising; William A. Reynolds, head of copy and media research, BBDO. Out-going Chapter President A. Edward Miller, director of marketing research, *Life* magazine, will serve ex-officio on the new board.

BOARD of directors of Admiral Corp. have declared a regular quarterly dividend of 25 cents per share on stock outstanding payable June 30 to stockholders of record June 16.

Docket Actions . . .

OPINION AND ORDER

WTUX Wilmington, Del.—Port Frere Bcstg. Co. By memorandum opinion and order FCC granted petition for rehearing and other relief and supplements thereto filed by WTUX directed against FCC decision released Oct. 12, 1950 [B•T, Oct. 16, 1950], which denied license renewal. FCC set aside decision insofar as it denied renewal application and granted renewal of WTUX (see story this issue). Order June 12.

INITIAL DECISION

WHOL Allentown, Pa. — Allentown Bcstg. Co. FCC Hearing Examiner Elizabeth C. Smith issued initial decision looking toward grant of 1230 kc, 250 w fulltime. Simultaneously, Hearing Examiner Smith denied application of Easton Publishing Co. seeking same facilities at Easton, Pa. (WHOL is now broadcasting under special authorization on 1230 kc, 250 w fulltime, pending conclusion of proceedings in this case which was remanded to FCC by U. S. Court of Appeals for D. C.; see story this issue.) Decision June 11.

Non-Docket Actions . . .

AM GRANTS

Mobile, Ala.—The Gadsden Radio Co., 960 kc, 1 kw daytime; condition. Estimated construction cost $11,525. Principals include Cary Lee Graham and Edwin H. Estes, who are licensees of WETO Gadsden, Ala. (Original application requested 1340 kc. 250 w fulltime, B•T, April 9, 1951.) Granted June 11.

Menominee, Mich.—Green Bay Bcstg. Co., 1340 kc, 100 w fulltime, engineering condition. Estimated construction cost $12,550, first year operating cost $54,000, revenue $70,000. Applicant is licensee of WDUZ Green Bay, Mich.

TRANSFER GRANTS

KCLF Clifton, Ariz.—Granted assignment of license from Dwight Hawkins Amusement Enterprises Inc. to Saguaro Bcstg. Co. through formation of new corporation, 50% of stock in which will be owned by Dwight Hawkins Amusement Enterprises Inc., and 50% by H. Chester Darwin, general manager of KCLF, who will become president of new corporation.

KPAS Banning, Calif.—Granted assignment of license from Byron-Wood Motors, d/b as Pass Bcstg. Co., to Kenneth L. Colborn for $10,400. Mr. Colborn is owner of The Center Inc., which controls business property in Palm Springs, Calif.

KDAC Fort Bragg, Calif.—Granted assignment of license from Charles R. Weller, receiver pendente lite of Mendocino Coast Bcstg. Co., to Edward Mertle, for whom court judgment has been granted following conclusion and settlement of partnership litigation, during which time Superior Court of Mendocino County appointed Mr. Weller receiver pending final court disposition of case. Mr. Mertle is owner of Golden West Hotel, Fort Bragg, and Welcome Inn Restaurant & Bar, Fort Bragg.

KMOR Oroville, Calif.—Granted assignment of license from J. Steventon, d/b as Oroville Bcstrs., to Oroville Bcstrs., new corporation composed of Mr. Steventon and two others. New stockholders will pay about $7,751.55 for their interest.

KBLF Red Bluff, Calif.—Granted assignment of license from Arvo Haapanen and Victor Lahti, a partnership, to Hal K. Shade for cancellation and release of Tehama Bcstg. Co.'s obligations. Mr. Shade pays Russell G. Frey, holder of Tehama Bcstg. Co.'s promissory notes, $27,500, of which $5,000 is paid at close of agreement and remainder at $150 monthly for not more than five years. Mr. Shade owns 30% of KNPT Newport, Ore., and is general manager of H. W. Critchlow Co. (syndicated radio sales), Red Bluff, Calif.

WBIB (FM) New Haven, Conn.—Granted transfer of control from The Church Court Co. to Samuel Botwinik, Louis Botwinik, Meyer J. Botwinik, Norman I. Botwinik and William Horowitz through stock transfer; same individuals continue to hold proportionate shares of stock. No actual change of ownership or control, no monetary consideration. Simultaneously, consent granted to assignment of license to Connecticut Radio Foundation Inc.

WCNH Quincy, Fla.—Granted acquisition of control by Andrew B. Letson through sale of 320 out of 500 shares of stock for $18,400. Mr. Letson is general manager and chief engineer of WCNH, and already holds 26% interest in station; he will hold 78.2% of stock. He also is applicant for new AM station in Tallahassee, Fla.

KCLO Leavenworth, Kan.—Granted assignment of license from Leavenworth Bcstg. Co. to Cecil W. Roberts for $31,000. Mr. Roberts is owner of KREI Farmington, Mo., KNEM Nevada, Mo., and KCHI Chillicothe, Mo., and is applicant for new AM station in Chanute, Kan.

WUST-AM-FM Bethesda, Md.—Transfer of control from Harold S. Russell, Parker W. Jones, Willard D. Egolf and Carl J. Batter, who each hold 25%, to same group, except that Mr. Egolf's stock is retired, Mr. Jones' stock is decreased to 0.46%, Messrs. Russell and Batter's stock is increased to 40.57% each and a new stockholder, W. Parker Jones, acquires 18.40% interest. W. Parker Jones is a Washington, D. C., attorney.

KOBK Owantonna, Minn.—Granted transfer of control from William F. Johns Jr. to Myles H. Johns for $6,888.50. Myles H. Johns is president and 50% owner of Broadcasting Service Inc., St. Paul, Minn., and a brother of William F. Johns Jr.

KOB-AM-TV Albuquerque, N. M.— By memorandum opinion and order granted transfer of control from T. M. Pepperday to Time Inc. and Wayne Coy for $900,000 [B•T, June 2]. After series of reorganizations, which will transfer assets of Albuquerque Bcstg. Co., a Time Inc. subsidiary, 50% interest in station will be sold to Mr. Coy for $75,000, plus eight-year contract as general manager at $26,000 per year. In addition, Mr. Coy will remain consultant to Time Inc. at fee of $24,000 per year. Time Inc. publishes *Time, Life, Fortune* and other periodicals. In memorandum opinion and order, FCC said approval was subject to any action it may take to carry out mandate of U. S. Court of Appeals as set forth in ABC v. FCC; further, FCC ordered *denial* of (1) petition of ABC requesting dismissal of pending application of KOB for mod. CP and for license, (2) request that node above mentioned be carried out prior to action on transfer application case, and (3) request that Special Service Authorization by which KOB is presently operated be rescinded.

WTRF-AM-FM Bellaire, Ohio—Granted relinquishment of negative control from Thomas M. Bloch and Betty Bloch Harris, co-executors of estate of Jesse A. Bloch, deceased, and Gordon C. Dix and Albert V. Dix, to the same parties plus Robert W. Ferguson through a stock transaction.

KUGN-AM-FM Eugene, Ore.—Granted relinquishment of negative control by O. E. Berke and P. R. Beebe to Ewing C. Kelly. The Messrs. Berke, who each hold 25% interest, will sell total of 5% interest to Mr. Kelly for $4,602.91 (leaving them with total of 45% interest); in addition, Mr. Kelly has option to buy remaining interest within the next two years for $41,426.19 plus 5% interest from time sale is closed. If Mr. Kelly does not elect to buy remaining 45% within two-year period, the Messrs. Berke have option to buy 5% interest they sold to Mr. Kelly for $4,602.91. Other 50% interest of KUGN owned by C. H. Fisher not affected in agreements between the Messrs. Berke and Mr. Kelly.

KFDA - AM - FM Amarillo, Tex.— Granted transfer of control from Gilmore N. Nunn, J. Lindsey Nunn and Gilmore N. Nunn, trustee, to Amarillo Bcstg. Co. (a Delaware corporation), which is owned equally by C. C. Woodson, Wendell Mayes, Charles B. Jordan and Gene L. Cagle, for $240,000. Mr. Woodson owns 95% interest in Brownwood Newspapers Inc. (*Brownwood Bulletin*), Brownwood, Tex., and other Texas and Florida newspapers; he has oil and gas interests in Texas; he is applicant for new television stations in Austin, Tex., and Amarillo, and at one time owned 50% interest in KBWD Brownwood and KNOW Austin, 24% interest in KRIO McAllen, Tex., and WACO, Waco, Tex.; his interest in various AM stations was sold by 1950. Mr. Mayes now is president and owns controlling interest in KBWD and KNOW; he had interest in KRIO and WACO which was sold in 1949. Mr. Jordan was associated with WRR Dallas for 20 years, last seven of which he was managing director; he is now vice president and assistant general manager of Texas State Network and vice president of KABC San Antonio, WACO, KRIO and KFJZ Fort Worth. Mr. Cagle is president, director and general manager of Texas State Network, KFJZ, KABC, WACO and KRIO; he also owns 34% of capital stock of Texas State Network, which in turn owns 100% of capital stock of KFJZ, WACO and KRIO; Texas State Network is applicant for new television station in Fort Worth.

WDVA Danville, Va.—Granted relinquishment of control by John S. Meade to Virginia-Carolina Bcstg. Corp., through transfer of 22% of Mr. Meade's 52% interest. Transferred will be 3,550 shares of stock, of which 2,150 shares will be transfered to other stockholders and remaining 2,150 shares will be transferred to Harry Meade and John S. Meade Jr., Mr. Meade's sons.

KPUY Puyallup, Wash.—Granted assignment of license from Clarence E. Wilson to partnership composed of Mr. Wilson and P. D. Jackson, d/b as Radio Station KPUY. Messrs. Wilson and Jackson are equal partners owning KWCO Chickasha, Okla., KTMC McAlester, Okla., and applicants for new TV station in Oklahoma City, Okla. Mr. Jackson pays about $15,130 for his interest in KPUY.

WTRW Two Rivers, Wis.—Granted transfer of control from Two Rivers Bcstg. Co. to Chris Hansen, fruit grower and fruit farm operator; Charles Whitford, also fruit grower and fruit farm operator, and Wendell Hansen, trainer-exhibitor of "Bertelles' Birds," for $40,000 for 95% interest.

New Applications . . .

AM APPLICATIONS

Richmond, Ky.—Richmond Bcstg. Co., 1340 kc, 250 w fulltime. Estimated construction cost $12,388, first year operating cost $60,000, revenue $80,000. Equal ⅓ partners include J. W. Betts, general manager of WFTM Maysville, Ky.; Charles P. Clarke, farm owner, and J. M. Finch Jr., Maysville building contractor. Filed June 2.

Pontiac, Mich.—William R. Reed, 1460 kc, 500 w daytime. Estimated construction cost $15,556, first year operating cost $90,000, revenue $105,000. From 1947 to 1951 Mr. Reed was administra-

tive assistant, U. S. Senate, Washington. Filed June 10.

Columbia, Miss. — Southwestern Bdcstg. Co. of Mississippi, 980 kc, 500 w daytime. Estimated construction cost $9,225, first year operating cost $24,000, revenue $30,000. Principals, all equal 1/3 partners, are: Louis Alford, Phillip D. Brady and Albert Mack Smith, who are equal partners in WAPF McComb, Miss. Filed June 10.

Oxford, Ohio—Eugene Napier and Richard Plessinger, 1090 kc, 500 w daytime. Estimated construction cost $10,350, first year operating cost $23,000, revenue $27,000. Equal 50% partners are Eugene Napier, student at Stewart High School, Oxford, Ohio, and Richard Plessinger, serviceman for McFarland Radio Service, Oxford. Filed June 12.

Raymondville, Tex.—Willacy Bdcstg. Co., 1470 kc, 1 kw daytime. Estimated construction cost $23,350, first year operating cost $36,000, revenue $40,000. Principals are Kelly Bell (75%) and J. C. Stallings (25%). Mr. Bell owns KOSF Naogdoches, Tex., and 50% of KBRZ Freeport, Tex. Mr. Stallings owns 25% of KBRZ. Filed June 2.

Keyser, W. Va.—Glacus G. Merrill, 1270 kc, 1 kw daytime. Estimated construction cost $19,970, first year operating cost $21,000, revenue $30,000. Mr. Merrill is president and treasurer of WHAR Clarksburg, W. Va. Filed June 2.

FM APPLICATIONS

Jacksonville, Fla. — WIVY Inc., 93.7 mc (Ch. 229), ERP 3.256 kw. Estimated construction cost $5,000, first year operating cost $4,800, revenue $5,000. Applicant is licensee of WIVY Jacksonville. Filed June 4.

San Mateo, Calif.—San Mateo Junior College, 91.1 mc, 10 w. Estimated construction cost $16,500. Non-commercial educational FM. Dr. Elon E. Hildreth is president of San Mateo Jr. College. Filed June 9.

TRANSFER REQUEST

KTOK Oklahoma City, Okla.—Transfer of control from O. L. Taylor Co. to Amarillo Bcstg. Co. for $225,000. Principals in transferee include: President Wendell Mayes (25%), president and major stockholder in KBWD Brownwood, Tex., and KNOW Austin; 25% owner of KFDA Amarillo; former partowner of KRIO McAllen, Tex., and WACO Waco, Tex., sold in 1949. Vice President C. C. Woodson (25%), 95% owner of *Brownwood* (Tex.) *Bulletin*, and other Texas and Florida newspapers; he has oil and gas interests in Texas; applicant for new TV outlets in Amarillo and Austin, Tex.; 25% owner of KFDA; at one time owned 50% interest in KBWD and KNOW, and 24% interest in KRIO and WACO; interest in these stations was sold by 1950. Secretary-Treasurer Charles B. Jordan (25%), with WRR Dallas for 20 years, last seven of which he was managing director; now vice president and general manager of Texas State Network and vice president of KABC San Antonio, KFJZ Fort Worth, KRIO and WACO; he is now 25% owner of KFDA. Gene L. Cagle (25%), president and general manager of Texas State Network, KABC, KFJZ, KRIO and WACO; owner of 34% capital stock of Texas State Network, which in turn owns 100% of capital stock of KABC, KFJZ, WACO and KRIO, and is applicant for new TV station in Fort Worth; he also is 25% owner of KFDA. Sale terms: $10,000 in escrow, $140,000 cash at transfer date, $75,000 promissory note to be paid off by $1,000 monthly at 4% interest.

New Program Firm

PILSBURY PUBLISHERS Inc., New York, has announced formation of a new television division called Pilsbury Productions Inc. Firm will package and distribute both live and film TV programs. It is located at 170 E. 79 St., New York. Telephone is Trafalgar 9-9208. Larry Merchant, president of the publishing firm, will be executive producer and Bob Blum, formerly of NBC, is in charge of directing and script editing. First effort, a children's program, is being shown to agencies for presentation in the fall.

Sixth Report Taken to Court

(Continued from page 82)

which the 170-mile separation is based." It notes WLWC in its application to change from Channel 3 to Channel 4, as provided for in the Sixth Report, proposes to use a tower of only 436 ft.

"A reduction in height of only a few feet below the 1,000-foot permissible maximum would make the allocation of Channel 4 to Braddock entirely within the Commission's standards as regards interference, yet WLWC proposes to use only 44% of the maximum permissible height," the petition continues, remarking that this decision of WLWC "is obviously a proper one in view of the size of the Columbus market. It is equally unlikely that any applicant for the use of Channel 4 in the Pittsburgh area will be able prudently to use a 1,000-foot tower."

The petition explains that "the Pittsburgh metropolitan district is irregularly shaped, having a maximum length of 62 miles and a maximum width of 80.8 miles. It is illogical, unreasonable and arbitrary to fix the site of this huge metropolis at the exact pinpoint of the latitude and longitude fixed in its book by the Department of Commerce for entirely unrelated purposes."

Refusal Unjustified

"Accordingly," the petition concludes, "the refusal to allocate Channel 4 to Pittsburgh or to Braddock is entirely unjustifiable."

The petition requests the court to "remand to FCC the matter of the assignment of Channel 4 to Pittsburgh or Braddock, with instructions that by appropriate proceedings the FCC redetermine on the basis of cogent reasons particularly related to the provisions and purposes of the Communications Act of 1934 whether or not Channel 4 may be assigned to Pittsburgh or Braddock and that the Commission publish its findings, conclusions and order in the premises."

The other court appeal respecting the failure to add Channel 4 to the Pittsburgh area, filed by WLOA, contends this action was "arbitrary and capricious" because such an allocation could be made "in accordance with the Commission's Rules by changing the assignment" of WLWC from Channel 3 to Channel 10 (instead of Channel 4 as done) and changing WBNS-TV Columbus from Channel 10 to Channel 4. Separation between Braddock and the transmitter of WBNS-TV is 170 miles, the allowable minimum, the petition notes.

The WLOA petition points out that in assigning Channel 4 to WLWC, a co-channel separation of only 159.043 miles results between WLWC and WWJ-TV Detroit, whereas assigning Channel 4 to WBNS-TV would increase this less-than-minimum separation to 162.9 miles.

"Permitting sub-minimal co-channel mileage separations in favor of existing licensees and permittees—which in itself constitutes an arbitrary and unlawful discrimination in favor of existing licensees and permittees—does not legalize the Commission's proposed assignment of Channel 4 to WLWC for two reasons," the petition asserts. These are: "(1) No existing licensee or permittee is presently authorized to operate on Channel 4 at Columbus and (2) the co-channel separation of WLWC on Channel 3 (from WDTV at Pittsburgh) of 162.459 miles would be *reduced* to a co-channel separation on Channel 4 (from WWJ-TV at Detroit) of 159.043 miles."

The petition further asserts that the "standard of notice established by the Administrative Procedure Act was not met in the television rule making proceeding in view of the entire lack of correlation between the Commission's notice of the technical standards on which it proposed to base its allocation of Channel 4 to WLWC and the technical standards which is actually adopted and used in the Sixth Report. Thus, petitioner had no notice that the co-channel assignment separation for VHF channels in the Braddock-Columbus area would be 170 miles rather than 180 miles; or that 'reference points' and methods of determining distances selected by the Commission would involve distances between transmitters of existing stations and post offices of certain cities."

Lack of adequate legal notice fundamentally "derives from the failure of the Commission to adopt technical standards for television stations before requiring interested persons to plead to the Commission's proposed specific allocation table of assignments of television channels." Petitioner's right to "full and fair" notice and hearing, WLOA asserts, "was debased in this proceeding to a guessing gam in which petitioner had, at it peril, to guess which of the in finite possible technical standard the Commission might adopt simultaneously with its decisio on allocation of channels—and t base its participation therein o such a guess."

The WLOA appeal challenges th legality of FCC's use of "assign ment spacing" (city - to - city rather than "facility spacing (transmitter - to - transmitter WLOA argues the Sixth Repo therefore "elevates administrativ convenience above the substantiv standards of the Communication Act and defeats the public inte est."

'Reconsider Such Assignment'

The petition further challenge the legality of the FCC sho cause order to change WLWC fro Channel 3 to Channel 4 since i precludes comparative considera tion with the mutually exclusiv request for Channel 4 at Brad dock.

The petition asks the court t "set aside and determine to b invalid" the Sixth Report in s far as it denied the allocation o Channel 4 to Braddock or in s far as it modified the assignmen of WLWC from Channel 3 t Channel 4. WLOA asks the cour to remand the matter to FCC "wit instructions to reconsider such as signment on reasonable and law ful grounds."

WISC appeals to the cour respecting FCC's failure to al locate UHF Channel 21 for con mercial broadcasting at Madiso and failure to allocate VHF Char nel 3 there for noncommercial edu cational use. WISC earlier had pr tested the inter-mixture of VH and UHF for commercial telecast ing on the ground it would preclud "truly competitive" commercia service. The other two UHF char nels allocated there are Channel 27 and 33.

WISC contends FCC erroneousl considered its "objections to inte mixture" in place of the station "comments" on the city-by-cit allocation of channels at Madiso and hence was denied full and fai hearing.

FCC's failure to assign VH Channel 3 to education at Madiso is attacked by WISC as being con trary to the Commission's "avowe policy" to assign VHF to educa tion wherever possible in a majo educational center. "In 21 com munities the Commission has re served a VHF channel for educa tional use where only one VH channel has been assigned. Thes 21 communities include 16 com munities in which UHF channel were available for assignment t educational use," the appeal ob serves. It asks that the matter b remanded to FCC for reconsidera tion.

Taking a position similar to tha argued by WLOA, KVOL in its ap peal contends the Commission vio lated the Administrative Procedur Act when it failed to give du

notice and full hearing on its unexpected action assigning Channel 5 to Alexandria, La., instead of Lafayette.

KVOL also attacks FCC's failure to give adequate legal notice through failure to adopt technical standards before requiring the parties to plead to the proposed table of city-by-city allocations.

"Independent of considerations of notice," the petition asserts, "FCC's action favoring Alexandria since it has a population of 35,000 while Lafayette has only 34,000 is arbitrary and capricious."

KVOL Assertions

KVOL further asserts that Secs. 309(a) and 307(b) of the Communications Act have been violated by FCC's Sixth Report since its pending application for Channel 5 cannot be considered with the channel removed.

"What the Commission has done in its rule making proceeding," KVOL asserts, "is to prejudge the petitioner's application without giving petitioner the opportunity of presenting, by means of its rightful hearing, all of the facts relevant to determining that the facilities requested by the petitioner would provide a fair, efficient and equitable distribution of television facilities and has decided on the basis of inadequate and partial information that Channel 5 should be used in Alexandria rather than in Lafayette."

In its appeal, WLAN contends that FCC's show cause order switching WGAL-TV from Channel 4 to Channel 8 unlawfully deprives it of comparative hearing on its application for Channel 8.

The petition notes that the memorandum opinion and order dismissed WLAN's protest of the FCC proposal to switch WGAL-TV to Channel 8 on the ground that the protest was filed before the final assignment of the channel at Lancaster and because WLAN's application, in common with all pending applications, would have to be amended to conform with the new rules and regulations or be dismissed.

Final assignment of Channel 8 there was described as 30 days after publication of the Sixth Report in the *Federal Register*, hence WLAN could amend its application and again bring up the question of whether it was entitled to comparative hearing with WGAL-TV respecting Channel 8, the petition recalls from the memorandum opinion of the Commission.

WLAN Argues

WLAN's appeal argues that the Commission "has arbitrarily failed to consider all of the prayers for relief" recited by WLAN in its petitions. "More particularly, the Commission has failed to consider the *matters of law* involved in petitioner's requests that (1) the order to show cause (re WGAL-TV) be set aside and (2) the petitioner's applications be accorded a comparative hearing prior to any assignment of Channel 8 to WGAL Inc."

WLAN contends the order to show cause issued to WGAL-TV "is invalid to the extent that it purports to decide what WGAL-TV shall operate on Channel 8, if that channel is allocated to Lancaster, in a rule making proceeding which can decide only the communities to which channels shall be assigned. Any advance decision . . . that WGAL Inc.'s subsequent application for Channel 8 must be granted deprives any timely applicant for the same channel at Lancaster of its hearing rights under 309(a) of the Communications Act and the *Ashbacker* case."

Meanwhile, WLAN filed with FCC another petition for comparative hearing of its application with that of WGAL-TV for Channel 8. The petition also asked that WGAL-TV's license renewal application, filed in late April, be included in the proceeding.

WGAL-TV in turn filed with the Commission its opposition to the earlier WLAN petition for reconsideration. WGAL-TV asks FCC to dismiss the WLAN request "because it does not set forth a single reason which has not been previously considered by the Commission."

WGAL-TV charges WLAN "has consistently in all of its subsequent actions and pleadings misconstrued this type of proceeding and has been attempting to confuse and confound the issues."

WGAL-TV contends "it is to be noted the Commission announced at the outset that the proceeding under the show cause order" respecting WGAL-TV "was a proceeding under Sec. 303(f) and 312(b) of the Communications Act. . . . This was not a proceeding under Sec. 309."

WGAL-TV further argues that Peoples Broadcasting Co.'s petition for reconsideration, in addition to being repetitive, should be dismissed because, in part:

(a) Peoples seeks for its own peculiar and selfish reasons to discriminate against and reduce an existing licensee, WGAL-TV, with hundreds of thousands of dollars invested in its pioneering operation in television over the past several years, to the status of a new applicant for a television station. In so doing, Peoples seeks to destroy not only the large investment of WGAL-TV in television, but it also seeks to foreshadow and belittle the good-will and prestige established by the pioneering efforts of this licensee when the possibility of financial returns from television operations were vague and unknown at the outset.

(b) Peoples forgets and fails to reiterate that its own engineer when testifying in its behalf at a hearing in this proceeding, stated in substance that Peoples was not interested in pioneering a UHF channel in Lancaster if a VHF assignment was not available. . . . Instead of seeking UHF Channel 21 now available . . . Peoples prefers to: (1) adhere to the policy announced in the testimony of its engineer; (2) reiterate its untenable position now finally determined by the Commission as moot and (3) continue to harangue and harass an existing and pioneering licensee in television, WGAL-TV.

(c) The prayer of Peoples is for a reconsideration of the Sixth Report and Order, as well as the Memorandum Opinion and Order. . . . Nowhere in the petition does Peoples set forth any facts or reasons outlining the necessity or propriety for the reconsideration of the entire Sixth Order of the Commission, with its many ramifications and allocations covering the whole country. Peoples request for a reconsideration of the entire Sixth Order by the Commission without any cited reasons therefore is too frivolous to be worthy of serious consideration.

CAPT. Willis Henry Beltz (r), former RCA engineer, takes over as director of the Naval Research Laboratory, Washington, from Capt. Frederick Raymond Furth, who, in turn, succeeds Capt. Beltz as assistant chief of the Bureau of Ships for Electronics.

Alexandria Broadcasting Co., new TV applicant at Alexandria for Channel 11, in its opposition and request for dismissal of the petition for reconsideration filed by KVOL, argues that if KVOL has any right to have its application for Channel 5 acted upon, then Alexandria has equal right to consideration of its bid for Channel 11. The Sixth Report deleted Channel 11 from Alexandria, substituting Channel 5.

Alexandria Broadcasting, answering KVOL's claim of no prior notice to the channel changes, observes, "There is no legal requirement of identity between proposed regulations and the regulations as finally adopted. Such a requirement would defeat the very purpose of the rule-making proceeding."

Petitions FCC

Since KVOL did not file comments on the allocation proposals within the deadlines set by FCC, Alexandria Broadcasting comments that KVOL appears to have "overstated its claim to procedural rights."

Meanwhile, the State Radio Council of Wisconsin, through Gov. Walter J. Kohler Jr., last week petitioned FCC to amend its allocation of VHF Channel 3 at Madison so as to reserve the lone VHF facility for noncommercial, educational use rather than UHF Channel 21 [B•T, June 9]. It is the first of five petitions to seek reserved allocation of VHF channels for educational use also at Eau Claire, Green Bay, LaCrosse and Wausau. UHF channels are reserved in those cities now.

In a brief, supplemental petition to its earlier request for reservation of Channel 3 rather than Channel 21, WISC last week also points out that "the open and forceful statement of its position by the State of Wisconsin now brings its participation in these proceedings into full accord with the Commission's announced allocation policy" to reserve VHF channels where possible in major educational centers.

In other quarters, more educators were reported working toward use of reserved channels. On Tuesday, joint sponsorship by several counties of an educational TV station in Tampa, Fla., where Channel 3 is reserved, was explored by educators. Principal speaker was Dr. I. Keith Tyler, Ohio State U., JCET member.

One plan drafted by a committee under the chairmanship of Denton L. Cook, supervisory principal of Plant City schools, calls for establishment of a five-county program to divide the costs among the respective counties. Construction cost was estimated at about $250,000 with operating costs per year ranging from $50,000 to $250,000 depending on the hours of operation.

A similar area meeting was held among local educational representatives in Milwaukee on June 3 while a like session is planned at Baltimore June 19.

More than 100 Iowa educators met June 9 at the WOI-TV studios on the Iowa State College campus at Ames to further explore the utilization of television in enriching the school curriculum. The conference was sponsored by WOI-TV in cooperation with the Iowa Department of Public Instruction.

Martha Gable, director of radio and TV education in the Philadelphia public schools; Dr. Franklin Dunham, chief of radio and television, U. S. Dept. of Education, and Richard B. Hull, Radio-TV director of Iowa State College, were featured speakers. Miss Gable also produced a demonstration telecast similar to those used in the Philadelphia school system.

McCONNELL SAYS TV RIGHTS ARE CLEAR

NBC PRESIDENT Joseph H. McConnell, in Friday evening address before North Carolina Bar Assn. at Wrightsville Beach, N. C., urged legal profession to use its great influence to oppose any restrictions on television reportage of matters of public interest. Mr. McConnell said he recognized that there are proceedings which "should be held in closed sessions to protect the national interest or private rights.

"But," he declared, "where the public is physically admitted, we must assume that public attendance is proper. In these cases the only limitation on the number of people who can attend is a physical limitation. Television gets rid of this limitation. It permits everyone to attend. And we must stand on the basic principle that wherever the public is admitted the television camera should be admitted, so that all can see."

WMAW NOW WCAN

WMAW Milwaukee has become WCAN, with approval of FCC. Following transfer of station May 15, call letters of 5 kw regional were shifted. Station, ABC affiliate, operating on 1250 kc, was sold by Midwest Broadcasting Co. stockholders, headed by Clifford Randall, to group headed by Alex Rosenman, formerly vice president of WCAU Philadelphia, and Lou Poller, owner of WPWA Chester and part owner of WARL Arlington, for $235,000. Mr. Rosenman has taken over active direction of station as president and general manager. He replaced Jack Bundy, who resigned.

'LUCY' BEATS WALCOTT

MILLION and half people in Chicago in 500,000 homes saw Charles-Walcott fight, which earned rating of 43.4, according to June Videodex. First hour rating of 46 slumped to 33.1 after picture and sound were lost. Also in Chicago, Gen. Eisenhower had 3 rating on Tuesday morning press conference from Pentagon, 12.8 on Wednesday night Abilene speech, and 7.2 on Thursday morning press conference. Chicago top 10 for June were: *I Love Lucy*, 50.5; Charles-Walcott fight, 43.4; *What's My Line*, 37.3; boxing on Wednesday night, 36.2; Red Skelton, 36.1; *Talent Scouts*, 35.2; *Godfrey & Friends*, 34.4; *My Friend Irma*, 27.1; *The Web*, 26.5; *Strike It Rich*, 26.1.

MARYLAND-D. C. STATIONS HOLD SPRING MEETING

MEMBERS of Maryland-District of Columbia Broadcasters Assn. opened two-day spring meeting Friday at Ocean City, Md., with 60 members and wives attending.

Jack Surrick, WFBR Baltimore, president of association, said medium hasn't even scratched surface of promotional potentialities in showing advertisers value of medium. He compared broadcast advertising to promotional job done by newspapers and magazines. Describing work of new association, he said it obtained passage of bill giving some measure of libel protection in political talks but added that political maneuvering had softened bill somewhat in legislature.

PEOPLE...

J. E. BAUDINO, vice president and general manager, Westinghouse Radio Stations Inc., elected to BMI Board to serve until October, completing unexpired term of late Walter C. Evans, WRS president at time of his death May 28 [B•T, June 2].

RICHARD ASH, formerly with Getschal & Richard and Blaine Thompson Co., N. Y. advertising agencies, has joined McGraw Assoc., that city, radio & TV program producers, as co-partner in charge of sales.

SYDNEY JURIN has been named national sales manager for Majestic Radio & Television, Div. of Wilcox-Gay Corp., N. Y., having formerly served with Pilot Radio Corp. and Tele-Tone Radio Corp. in similar capacity. To be in charge of sales of company's radio and TV receivers, Mr. Jurin, along with Harold Ashbach, Majestic vice president, has begun seven-week tour of major TV markets to promote summer sales.

JAY RUSSELL, formerly DuMont TV Network publicity director in Pittsburgh, has joined Sidney Koretz & Co., Newark agency, as director of radio-TV.

WILLOUGHBY (BILL) WALSH, staff member of DuMont TV Network's accounting department since 1947, named network purchasing agent, succeeding late Roy Skaar.

ROLAND P. S. CAMPBELL, product manager in charge of Post Cereals sales and advertising, division of General Foods, joins Andrew Jergens Co., Cincinnati, in charge of Jergens and Woodbury advertising and public relations.

WILLIAM F. MILLER, for past year New York sales representative for CBS-owned KMOX St. Louis, named general sales manager of network's WCBS New York, effective today (Monday).

Progressive Party Challenges Sponsored Political Coverage

LEGALITY of sponsorship of radio-TV political coverage challenged by Progressive Party Friday in letters sent to FCC and to Attorney General McGranery. Letters also accused networks of discriminating against third party—they've scheduled 96 hours' coverage for each of major party conventions and 15 minutes for Progressives', spokesmen claimed —and asked FCC to act before Progressives convene July 4, 5, 6 (also see early story page 29).

Citing Westinghouse sponsorship of CBS Radio-TV convention coverage, Philco's on NBC radio and TV, and Admiral's on ABC radio-TV, C. B. Baldwin, party secretary, told attorney general that "sponsoring of these programs" violates Federal Corrupt Practices Act, and that "the conduct of these corporations constitutes a violation" of Hatch act. Corrupt practices act, he said, forbids this type of contributions or expenditure "in connection with" a "political convention" . . . held to select candidates. Hatch act, he continued, forbids purchase of goods or advertising if proceeds of purchase "directly or indirectly inures to the benefits of . . . any candidate . . . or any political committee or other political organization." Mr. Baldwin asserted:

"It is perfectly evident that the sponsorship of these programs by these corporations, thus making such extensive coverage of the convention possible, will inure to the benefit of both the candidates and the political organizations involved."

Mr. Baldwin also said "it is our understanding that there is an implicit condition in the contract between the networks and these advertisers that coverage on this program be given only to the views and candidacies of those on the Republican and Democratic ticket, and that no coverage be afforded to the Progressive Party and its candidates." Such condition, he told FCC, would violate political broadcast section of Communications Act.

Letter to attorney general, asking "investigation and prosecution," named NBC, CBS, and ABC networks and their respective convention sponsors. Letter to FCC, charging "discrimination," said "all of the major networks" had announced plans for full coverage of Republican and Democratic conventions but that Progressives' convention will suffer "virtual blackout" unless present coverage plans are changed.

David Rein, Progressives' Washington attorney, said party's reliance on equal-opportunity requirement of Communications Act got strong support from FCC's recent decision upholding demand of William R. Schneider, St. Louis attorney, who had entered New Hampshire and Oregon preferential primaries as candidate for GOP Presidential nomination, for time on CBS Radio Network [B•T, June 9, 2]. CBS Radio announced Friday its *Presidential Profiles* series would be extended one week to permit broadcast by Mr. Schneider (Thurs., 10:30-11 p.m. EDT).

In other political coverage developments, Robert C. Doyle, ABC producer and director, was named executive producer for pooled portions of Democratic and Republican convention pickups. He will be assisted by TV director named by each TV network covering conclaves.

Meanwhile, United Press announced that, whereas, final details are yet to be worked out, UP's coverage of Chicago conventions will call for "record strength" staffing.

News for television station members will be filed over special TV script wire, with film coverage by United Press Movietone News to be processed specially in on-scene plant (see story, page 95).

TRUMAN STATISTICS

CAPITAL confusion hit new high last week when President Truman, answering news conference query on stumping plans, said U. S. has *47 million TV sets*. This tops B•T circulation figure by 30 million receivers. Wrapping it up, Chief Executive said TV ownership shows how prosperous nation has been in last few years.

Interviewers found that Whitley County families listen to WOWO almost twice as much as to all other stations combined

Newspaper Survey Develops Startling Lesson in Midwest Time-Buying

COLUMBIA CITY, IND.—A market survey of Whitley County, Ind., recently completed by the Columbia City *Post*, indicates that Whitley County families listen to WOWO *6 times* more frequently than to its nearest competitor.. and almost twice as often as to all other stations combined.

Since Whitley County lies within shopping range of Fort Wayne, it was expected that Station WOWO would figure prominently in replies to the question "What stations do you listen to most?" But the preferences expressed in the survey were even more one-sided than had been anticipated.

Listed in the survey were 2,232 families with radios and only 40 without (better than 98% ownership).

This typical survey of a typical county underscores the fact that WOWO is simply indispensable in reaching the rich tri-state area centering in Fort Wayne. A powerful signal and popular programs.. aided by continuing promotion packed with local color.. keep thousands and thousands of sets tuned to the WOWO wavelength, from the early-morning Farm Show till post-midnight sign-off. Availabilities are limited, but WOWO or Free & Peters will do their best to help you get the schedule you want.

Fire Prevention Award Again Won by WOWO

For outstanding public service in Fire Prevention, the National Board of Fire Underwriters has again named WOWO the winner of its Gold Medal award. This makes a total of two gold medals and two honor citations presented to WOWO by the NBFU since 1945.

"Five Alarm Follies," a puppet performance presented in schools throughout the Fort Wayne area, spearheaded WOWO's 1952 fire prevention activity.

Go where there's GROWTH...

GO WHAS!

FARMING IN KENTUCKY IS BIG BUSINESS!

There's more to the Kentucky Farm Story than last year's record crop! There's the story of tractors and trucks . . . 59,193 tractors were in use in 1950; an increase of 142.5% over 1945! 50,032 farm trucks were in use in 1950; up 102% over 1945! From 1939 to 1949, farm gasoline and other petroleum fuel and oil purchases increased 410% . . . and tractors in use were up 396%!

That's a lot of tractors, trucks and petroleum fuel! FARMING IN KENTUCKY IS BIG BUSINESS!

GO WHAS!

No other station, or group of stations in this market can match the audience delivered by WHAS . . . seven days a week; morning, afternoon and night. WHAS farm programs have an average listenership 329% *greater* than that of the next highest rated station. *(Benson and Benson)*

CLOSED CIRCUIT

PRESSURES of advertisers and agencies for lower radio rates now being turned also against proposals that daytime rates be boosted as partial offset for widely expected cuts in network nighttime charges. Group of major agencies, who contend daytime charges should be reduced, too, though probably not as much as nighttime rates, is seeking permission to appear and present arguments when CBS Radio affiliates and CBS officials meet July 1-2 to consider network radio problems. Another request for "outside" participation—by NARTSR—was rejected by affiliates' group on theory these are in-the-family meetings.

IS THERE change in Detroit affiliation of CBS upcoming? CBS, it's learned, is making coverage survey of Detroit area presumably against day it negotiates with WJR for contract renewal. Station gets network's highest rate—full rate minus usual sales commissions, amounting to about 50% of card rate. This as against maximum 37½% for major market stations carrying full schedules.

DON'T WRITE off deal involving KMPC Los Angeles in not distant future. Transaction in neighborhood of $1 million is entirely possible, either with NBC which is only network not owning Los Angeles key, or syndicate headed by John McNeil, former ABC executive and now with Doherty, Clifford & Shenfield, national advertising agency, or group headed by Robert O. Reynolds, vice president-general manager and part owner of KMPC.

NEWS OF SALE of NBC's KOA Denver may come any day. Network officials were said Friday to be still undecided whether to sell, but it was acknowledged they'd had several "flattering" offers—one of which led Financial Vice President Joseph V. Heffernan to Denver for negotiations earlier in week. Among bidders: Bob Hope and Denver Mayor Quigg Newton, for one; Don Searle and Herbert Hollister (owners of KMMJ Grand Island, Neb., and KXXX Colby, Kan.), for another [CLOSED CIRCUIT, June 9, May 19].

BROADCASTERS in South have been alerted to plan of NABET-CIO to undertake "Operation Dixie" looking toward organization of technical and programming staffs. Report reaching them is that $300,000 war chest has been established and that 35 to 40 organizers will be assigned in area.

NEW TWIST to proposals for amendment of FCC temporary processing procedure to get big cities off bottom of city priority listing will be suggestion that cities with applications in hearing prior to freeze be given preference. Pioneer applicants would gain indirect equity at least for efforts. Request expected to be made today (Monday), deadline for petitions for reconsideration of Sixth Report lifting TV freeze. Several other bids for rehearing also expected today (see page 63).

FURTHER evidence that TV towers won't be major menace to air navigation—as feared by aviation groups when FCC issued Sixth Report heralding 2,000 stations and 2,000-ft. anten-

(Continued on page 6)

MARTIN QUITS CROSLEY, JOINS GENERAL TELERADIO

DWIGHT D. MARTIN, vice president and assistant general manager of Crosley Broadcasting Corp., resigning to become vice president of General Tire & Rubber Co.'s radio-TV subsidiary, which today (Monday) officially changes name from Thomas S. Lee Enterprises Inc. to General Teleradio Inc. Announcement of his appointment by General Teleradio, being released today, does not specify his duties except to say that he will be vice president and general officer. He has been especially active in TV.

General Teleradio is licensee name of WOR New York radio and TV properties, which were acquired by General Tire early this year. New General Teleradio is incorporated under California laws, encompasses all General Tire broadcasting properties: Don Lee and Yankee networks, controlling interest (about 58%) in Mutual, plus WOR stations.

K & E RESIGNS KELLOGG

KENYON & ECKHARDT, New York, Friday resigned estimated $3 million Kellogg Co. account, effective Oct. 1. Leo Burnett Agency, Chicago, is expected to pick up some of Kellogg business since it already handles part of it. It was understood that K & E may have another cereal company to service in near future.

BUSINESS BRIEFLY

PONTIAC HOUR SHOW ● Pontiac dealers signed for 15-week series of full-hour evening shows, *Pontiac Film Theatre*, on WCBS-TV New York, starting Tuesday (8-9 p.m.). Purchase represents estimated $75,000 in billings. Agency, MacManus, John & Adams, New York.

HARRIS MAY EXPAND ● Harris Chemical Co., Cortland, N. Y. (Fly-Ban insecticide), currently in two-week radio spot campaign, will expand to 40 or 50 markets if test is successful. Marfree Agency, N. Y., is servicing.

NAME AGENCY ● Economics Lab., St. Paul (Soilax household cleaner and electra-sol dishwater compound), names Scheideler, Beck & Werner, N. Y., as its advertising agency. Account formerly serviced by Cunningham & Walsh.

SWANSDOWN MAY EXPAND ● General Foods, N. Y. (Swansdown cake flour), which is sponsoring *The Second Mrs. Burton* on CBS Radio (2:15 p.m., five times weekly), is considering possibility of increasing station lineup or adding another network radio show to combat competitors' increasing use of daytime radio.

SEABROOK LOOKING ● Seabrook Farms, Bridgeton, N. J. (frozen foods), through its agency, Hilton & Riggio, N. Y., asking for half-hour radio availabilities in about 110 markets. Campaign will start mid-August.

Without Discounts Network Sales Up

ADVERTISERS in May spent $28,696,746 for time on national radio and TV networks, rise of 7.9% over broadcast network time sales of $26,598,029 in same month of last year, according to figures released today (Monday), by Publishers Information Bureau, which reports its figures in terms of gross time sales, calculated at one-time rate, before discounts of any kind.

Combined gross of four nationwide radio networks for May totaled $13,994,919, decline of 15.6 percent from May 1951 gross of $16,576,895. Concurrently, time sales of four TV networks totaled $14,701,827 in May of this year, increase of 46% over TV gross of $10,021,134 for May 1951.

Network-by-network tabulations of PIB for May and January-May, this year compared with last, show:

NETWORK RADIO

	May 1952	May 1951	Jan.-May 1952	Jan.-May 1951
ABC	$ 3,323,092	$ 2,991,227	$16,402,402	$14,664,888

THREE MORE PROTEST SIXTH REPORT; FCC REPLIES

THREE MORE petitions for reconsideration of FCC's Sixth Report to lift TV freeze were filed with Commission Friday. FCC concurrently made public its reply to protest of Pittsburgh Mayor David L. Lawrence respecting failure of Commission to allocate more VHF channels to that rugged terrain area (see story, page 63). Letter includes new war of words between Comrs. Robert F. Jones and George E. Sterling.

Chesapeake Television Broadcasting Inc., Baltimore TV applicant, seeks reshuffle of UHF channels there and in Harrisburg and Reading, Pa., to make channels workable in area. Firm points out UHF allocation in area overlooks minimum spacing provisions and contends site to south of city which meets minimum separation prevents inadequate coverage because of terrain.

WFOX Milwaukee, TV applicant prior to freeze, seeks "same procedural and substantive rights" on Channel 12 as it had on Channel 8, for which it went through hearing and, when extra applicant withdrew, petitioned for grant just days before September 1948 freeze order. Otherwise, WFOX asks restoration of four VHF channels there. FCC now assigns three VHF (one reserved) and three UHF.

WJDX Jackson, Miss., challenges legality of Sixth Report in establishing zone system and wider spacings in Zone III than proposed in earlier Third Report. WJDX asks modification of order to switch city to Zone II and permit allocation of VHF Channel 3 there.

FCC told Mayor Lawrence it couldn't comment on VHF allocations at Pittsburgh since case has been appealed to courts and is also before Commission for reconsideration. Pittsburgh fared as well as other major cities in priority list, FCC indicated. Comr. Jones, however, in separate view charged letter constituted amendment of processing procedure since FCC said Group A and Group B applications would be processed simultaneously. Thus, he argued, some Group B cities with multiple services would get still more before Pittsburgh got second service or some Group A cities got first service. Comr. Sterling, in additional view, opposed Comr. Jones' holding letter constitutes no amendment of procedure since simultaneous processing of A and B applications was provided in Sixth Report.

ABC SIGNS EIGHT

SIGNING of eight new affiliates reported by ABC Radio on Friday, bringing total to 336. They were listed as:

KGPH Flagstaff, Ariz. (1230 kc, 250 w), owned by Frontier Bcstg. Co. and managed by A. S. Holm; KCLF Clifton, Ariz. (1400 kc, 250 w), licensed to Saguaro Bcstg. Co. with Chet Darwin as manager; KGAN Kingman, Ariz. (1230 kc, 250 w), owned by J. J. Glancy; KTBB Tyler, Tex. (600 kc, 500 w daytime, 1 kw night), owned by Blackstone Bcstg. Co., managed by M. E. Danbom; WGRA Cairo, Ga. (1300 kc, 1 kw day only), owned by Grady Mitchell Bcstg. Co., managed by Jim Honey; WDWD Dawson, Ga. (990 kc, 1 kw day only), owned by Dawson Bcstg. Co., managed by W. C. Woodall Jr.; WARN Fort Pierce, Fla. (1330 kc, 1 kw), owned by Hurricane Bcstg. Service, managed by Claude C. Tillman Jr.; WBCU Union, S. C. (1460 kc, 1 kw), owned by Union-Carolina Bcstg Co., managed by C. P. Stribling.

In this Issue—

Regular commercial sponsors are figuring out how to adjust their schedules to the disruptions that are bound to be caused by radio-television coverage of the political conventions. And the Democratic Party has made contracts for radio-TV network time next fall. The political season is both help and headache to broadcasters. *Page 23.*

NBC moves toward reintegration of radio and TV. Pat Weaver is put in charge of both radio and television networks, and Frank White becomes general manager of both. Meanwhile, CBS Radio affiliates committee, planning strategy for July 1-2 meeting of all CBS Radio affiliates in New York, swears to resist any rate reductions. *Page 27.*

House passes McFarland Bill with some important changes from version that the Senate passed. One is an amendment to make broadcasters immune to libel suits arising from political broadcasts. Some other discrepancies between House and Senate measures will have to be ironed out in joint conference committee. *Page 25.*

Wise sponsors will buy both radio and television, the "best unduplicated buy an advertiser can make," Edward D. Madden, NBC vice president in charge of TV sales and operations, tells American Marketing Assn. *Page 26.*

Tall TV towers won't be the navigation hazard that aviation interests first feared they would be. A study in preparation for the industry-government committee investigating this question shows that most new telecasters will not want to put up towers tall enough to interfere with the airways. *Page 63.*

TV applications and arguments over the processing procedure proposed by the FCC are on the increase. Commission denies petition to amend its processing plan and says it will stick with its city priority listing. *Page 63.*

This week broadcasters will come to their own defense in the radio-TV morals hearings of the House subcommittee which two weeks ago saw a demonstration of the "hootchie kootchie" by a Congressman who said he had seen it on TV. *Page 38.*

After-midnight broadcasting is attracting listeners and sponsors. Here's a special B•T report on 24-hour-per-day radio broadcasting. *Page 28.*

Upcoming

June 22-26: Advertising Assn. of the West, Olympic Hotel, Seattle.
June 23-26: RTMA Convention, Palmer House, Chicago.
June 26-27: Virginia Assn. of Broadcasters, Chamberlin Hotel, Fort Monroe, Va.
June 29-July 2: National Industrial Advertisers Assn., Palmer House, Chicago.

(Other Upcomings page 44)

Closed Circuit

(Continued from page 5)

nas—contained in fact that nearly half of 1,200 communities assigned channels have populations around 10,000. Such cities economically can't support big power, tall tower stations, observers point out. Statistics of towers currently planned also show minority above 1,000 ft. (see story page 63).

AMICABLE solution expected soon in only major problem thus far tossed into lap of NARTB Code Review Board. Details still under wraps but it's known there aren't any necklines or morals involved.

LOOK FOR ANNOUNCEMENT this week that one of major radio-TV set manufacturers is making substantial grant to help noncommercial educational television get off ground on nation-wide basis, coupled with plan looking toward raising multi-million dollar fund for similar purposes through manufacturers in number of fields.

SPACE accommodations for independent stations desiring to cover political conventions no problem but cost factor poses obstacle. As with networks, stations must bear facilities installation costs. National committees' formula was to pro-rate costs based on number of indies wanting in. Some have dropped plans, however, with resultant higher tab for others. Plan to parcel out space set off by sound-proof curtains.

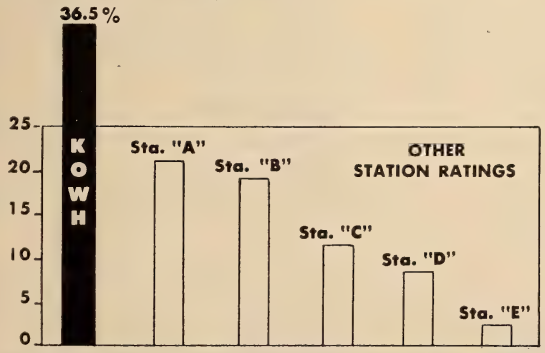
LAPFULL of political time lost by major network when all its brass happened to be "in conference" or "busy" while buyer cooled heels in reception room, and finally went across street.

THERE'S TALK that Harris subcommittee of House investigating morals of radio-TV programs is thinking seriously of inviting advertising and talent agencies to answer charges of "offensive" performers and shows. Some committeemen also understood to be impressed with "dry" testimony regarding frequency and "sell" of beer and wine commercials, want to ask agency men who's responsible—they or advertisers.

GENERAL FOODS, N. Y., through Young & Rubicam, N. Y., late Friday was still trying to clear daytime strip on CBS Radio for sponsorship of Bing Crosby by Jell-O. Talent figure said to be in neighorhood of $16,000. If radio time not acceptable to all sides, GF-Crosby negotiations probably will dissolve and advertiser will be forced to start again with another show.

STORM CLOUDS are gathering over FCC proposal to relax transmitter operator rules, permit remote operation of some transmitters [B•T, June 9]. It's broadcaster vs. engineer as comments begin to flood FCC, NARTB and unions. Management says technical help is short, wages forced disproportionately high. Engineers, some seeking tougher rules, say stations want cheap operation, bigger profits. Watch for this argument against relaxation: Unattended transmitters will be wide open to enemy sabotage.

PRIVATE study of TV program sources understood to show no network produces even half of commercial programs on its facilities, with one said to "own" less than 5%.



for more AT DEADLINE see page 98

All It Took was a Hot Lick . . .

. . . And Joshua really "sent" Jericho—tumbling, that is.

KOWH swiped the page from history and tried it on the Omaha, Council Bluffs area. Darned if it didn't work! Popular music "hath charms" . . . especially when served up a la KOWH, garnished by program techniques that have placed KOWH first in the nation! For an idea of how many walls are being penetrated by KOWH, glance at the below Hooper share-of-audience chart averaged for October, 1951-April, 1952, 8 A.M.-6 P.M., Monday through Saturday.

- *Largest total audience* of any Omaha station, 8 A. M. to 6 P. M., Monday through Saturday! (Hooper, Oct., 1951 thru April, 1952.)

- *Largest share of audience,* in any individual time period, of any independent station in all America! (April, 1952.)

PROMOTION IS

BIG BUSINESS AT WGY

Sponsors using WGY have the benefit of tremendous support for their sales messages through the station's many promotional activities—

AUDIENCE PROMOTION:

- WGY publishes *Mike and Camera* monthly and distributes it to an up-to-date mailing list containing over 20,000 subscribers.
- Over 900 hard-hitting promotional announcements are scheduled each month.
- Over 10,000 lines of advertising are placed in Albany and Schenectady newspapers each month.
- One minute movies of station artists are shown on WGY's sister station—WRGB.
- Motorists on area highways have their attention called to the station by seven 8' by 24' colorful scotchlited billboards.
- WGY artists are furnished with promotional postcards on which they answer their large volume of mail.
- The complete WGY program schedule is carried in 14 area dailies having a circulation of 332,934 and in three Sunday papers with a circulation of 217,797.
- Many remote broadcasts are conducted throughout the year, including several from N.Y.S. Fair and County Fairs in the area.

MERCHANDISING:

- Dealer letters and postcards are mailed on request to 1436 grocers and 299 druggists.

WGY IS A TOP PROMOTIONAL BUY! The extensive promotional activities insure a maximum audience for all sales messages broadcast by this pioneer station which serves 840,000 radio families in 53 counties in Eastern New York and Western New England.

FORECAST FOR ARKANSAS:
WEATHER AND POLITICS... HOT

In this election year, something besides the weather is going to be HOT in Arkansas! Folks down here like their politics at a boil and their politicians "pouring on the heat"! It makes for more interesting elections just as it makes for a more enlightened electorate.

★ With five men in the race for governor, with a Congressional seat at stake, with other state, county and local offices being contested for . . . summer in Arkansas will surely be "Hot and Unsettled"!

★ KLRA will cover the state political scene from all angles. Only KLRA with the state's only full-time News Department (soon to be implemented with special personnel), is in a position to fully report the news of politics as well as the usual run of events.

★ Special coverage of the Democratic Primary on July 29, as well as the Run-Off Primary on August 12, has been planned. The general election in November will be covered by CBS on a national scale and by KLRA on a state-wide basis.

★ Gubernatorial candidates will be heard on special public service broadcasts as well as paid political time. Significant, we believe, is the fact that the first gubernatorial candidate to make his opening address chose KLRA alone of the Little Rock stations to carry his message to Central Arkansas.

★ The National Conventions of both parties will be completely covered by CBS Radio under the sponsorship of Westinghouse. This is an ambitious coverage, and Arkansas will be listening avidly, because the choice of both Republicans and Democrats will be important to the people of Arkansas. KLRA, which has proven itself "Arkansas's Listening Habit", is proud of the fact that it is "CBS Radio for Arkansas".

So there will be no "summer slump" in listening to KLRA this summer (there NEVER has been!) but advertisers with a message for this up-and-coming market will get MORE VALUE than ever with a schedule on KLRA.

Chary of Charity

EDITOR:

Your report on "Free Plugs" in the June 9 issue of BROADCASTING • TELECASTING was welcome coverage of a most irritating income loss to radio stations and networks —but it stopped short of the most serious "steal" of all.

You failed to mention the fact that one entire industry depends almost entirely for its success on radio—and spends only pennies for paid advertising on the air while pouring literally thousands into newspapers and magazines . . . and thousands more into the palms of individuals on the talent payrolls of the nation's stations.

Of course, I mean the phonograph record folks. For 25¢ or less —the manufacturing cost of one of their discs—they can "buy" a minimum of three minutes of commercial devoted entirely to their product. And when you hear some of the DJ's slobbering over a platter that arrived a day ahead of the rest, you realize that the cash value of these "commercials" runs into staggering figures. . . .

The interesting thing about it all is the fact that any group of stations in a sizable area could torpedo the whole "steal" in 30 days. All it takes is a little organized effort. No label mentions, for example. Some judicious "knocking" of pet releases. The omission of a major label for a month—from all stations, all programs. Tearing up all those "top-ten" reports and those return postcards from the publicity departments. If that treatment doesn't slam sales down and scare up some fast, legitimate advertising dollars, then our medium is no good in the first place and the record people are simply being charitable, sending out all those "free" records!

It will be suggested that my interest in this subject stems from my connection with the transcription library field. Not at all. Long before I reached here, I was pounding away at this "steal", in company with a lot of self-respecting operators who learned long ago that "you can't sell it if you give it away."

War or Peace?

EDITOR:

I see in your June 9 issue that you have declared a state of war exists: "Research Wrangle—Nielsen, SAMS Battle." Please tell me who invaded whom. All I know is that we announced we were a going business producing a very up-to-date new kind of coverage service, NCS.

There was a time when we had hoped a single combined service (Nielsen-SAMS) might have been offered to the industry, but SAMS preferred to fan the embers of a once live BMB, rather than tackle the real problem of answering radio and TV's currently different problems on coverage and audiences. So we went on alone to research the problem and develop NCS.

Way back in B. B. (before Baker), BMB said no to personal in-

Yankee Home-Town Food Show is the sensation of New England food shows — and for good reasons:

1. It's a great show featuring Ruth Mugglebee, Woman's Editor Boston Record-American and Sunday Advertiser and Bill Hahn, Yankee Radio and TV Personality —

Monday thru Friday, 1:15-1:45 P.M.

2. It reaches *locally* into more places where volume sales are made than any other food show.

3. The merchandising plan is exclusive and distinctive in New England. Renewals prove the high selling impact of this show.

Go Yankee! Go Home-Town — with the Yankee Home-Town Food Show!

THE YANKEE NETWORK

DIVISION OF THOMAS S. LEE ENTERPRISES, INC.

21 BROOKLINE AVENUE, BOSTON 15, MASS.

By any measure
WGAC is first

COVERAGE:

With 5,000 watts on 580 k.c. WGAC and only WGAC blankets the twenty county, 500,000 population, four hundred million dollar Augusta Retail Trading Area, with an average daytime penetration of 71% and with 80% more listeners than its nearest competitor (Broadcast Measurement Bureau Study No. 2).

RATINGS:

WGAC captures first place in 47 of 52 quarter hours daily, Monday through Friday, 7 A.M. to 8 P.M., in the Augusta Retail Trading Area (Pulse, January 1952).

ADVERTISING:

More local and national spot advertisers spend more money on WGAC than on any other Augusta radio station.

MAIL PULL:

Always Augusta's top mail pull station, WGAC demonstrated its marked superiority in this category last Christmas when, to eliminate confusion among the small fry all four Augusta radio stations carried the same Santa Claus at the same time. WGAC accounted for a fat 40% of the total mail response:

WGAC	2,174 Letters
Station B	1,345
Station C	1,002
Station D	489

Right now? Typically, Busby's Bargain Block is averaging 1,000 letters a week in response to its Mystery Tune contest on WGAC.

TOP TALENT:

WGAC's local personalities capture first place in the 1952 Pulse ratings whenever they are on the air.

1. Claude Casey and the WGAC Sagedusters at 7:15 A.M., 12:15 to 1:00 P.M. and 6:30 P.M. daily.

2. Joyce Hayward, who conducts Augusta's only women's program, 1:15 to 2:00 P.M. daily.

3. Hugh Grant, former U. S. Minister to Albania and Thailand, and Augusta's only news commentator, at 7:00 P.M. daily.

4. Warren Hites, WGAC's star newscaster, at 7:00 A.M., 7:55 A.M., 8:30 A.M. and 12:00 Noon daily.

5. Farmer Chambers, Richmond County Agent and Augusta's only farm commentator, 6:15 A.M. daily (not rated because of early hour).

COMMUNITY ACTIVITIES:

WGAC, its personnel and its management are active in nearly every phase of Augusta's civic life. Included on its staff are the Chairman of the Augusta Chapter of the American Red Cross, the President of the Civitan Club, the Chairman of the Hospital Entertainment Committee of the Red Cross, the Campaign Chairman and Treasurer of the Boys' Club of Augusta, the Chairman of the Scrap Mobilization Committee of the Augusta area and members of the Boards of Directors of the Community Chest, the Red Cross, Boys' Club, Kiwanis Club, the American Businessmen's Club and the Merchants' Association.

COMMERCIAL:

By any measure, by any yardstick, WGAC is the Augusta area's *first* station. No matter what measurement you prefer, we've got it. For results, use WGAC. For action, see our

DUDLEY D. CARROLL, manager of N. W. Ayer & Son, Honolulu, returns to Philadelphia office, replaced by **JAMES P. SMITH**. **FRANCIS M. WATERS**, assistant to president, Assn. of National Advertisers, to agency's New York office on public relations staff. **DIRK A. WATSON** returns to latter office in radio-TV department after tour of duty with Navy.

on all accounts

A BRIEF newspaper career on the *San Francisco Examiner* served as the portal for entrance into the agency field for Maury Baker, radio-TV director of the San Francisco office of BBDO.

Born at Salt Lake City in 1915, the son of a newspaperman there, Mr. Baker was graduated from the U. of California, but admits he learned more as managing editor of the informal *Daily Californian* than he did in the halls of learning.

His newspaper work led to general assignments and beat work on the *Examiner*. When World War II began slenderizing city room staffs, he joined the advertising department of Associated Oil, and shortly afterward was appointed assistant director of public relations for the western division of the American Red Cross.

After an interim of three wartime years as a commissioned officer in the China-Burma-India theater, he entered radio with KGO San Francisco, ABC's owned and operated station there. When ABC opened its extensive television plant, Mr. Baker took over promotion and publicity operations.

"The pace was fast, but the preconditioning in so many fields has come in mighty handy since I've been with BBDO," Mr. Baker says. He joined BBDO in June, 1951.

Not so much an account man as he is a radio-TV specialist, Mr. Baker works on all accounts at present active in the broadcasting media. These are Standard Oil of California, Gallo Wine, Pacific Telephone, MJB Coffee and Circus Foods.

Mr. BAKER

In 1949, Mr. Baker won a national award for his promotional and advertising activities with KGO-TV. He is a member of Alpha Delta Sigma and a long-time member of the San Francisco Press Club.

Married in 1945, he is father of two sons, ages 6 and 1. He lives in Palo Alto.

Although Mr. Baker is an enthusiastic booster of both radio and television, he admits: "TV grabbed me by the ears when ABC first opened its San Francisco video plant. It hasn't let go yet."

beat

LEONARD H. RUSSELL, supervisor of research operations, Young & Rubicam, N. Y., to Warwick & Legler, same city, as director of research and member of plans board.

terviews (and it was my voice that was used). There just wasn't a well-trained available Nielsen field staff that could tackle such a job; and, anyway, it wasn't necessary to get answers from non-owners, radio owners and TV owners in proper proportions. Nor had anyone developed the "family edit" to insure full interview cooperation. But times have changed.

NCS has to find all those missing pieces of radio (and TV) listening —in the living room, up in the back bedroom and yes, out of home, too. And we don't want any "forgetting" or "exaggerating." Our Audimeter will help us there because we have the perfect check in what these machines record against what the *same* homes report. The machines must be pretty good or NRI and NTI subscribers wouldn't use them for programs, far more demanding than circulation measurements. And as for programs, Page 5 of our ballot only goes to a subsample and isn't used for station coverage anyway regardless of what SAMS would like to think.

These trade press "wars" get wearisome after 20 years. We have a job of helping radio and TV and that's battle enough. How about a crusade instead of a civil war for a change.

John K. Churchill,
Vice President,
A. C. Nielsen Co.

[EDITOR'S NOTE: Mr. Churchill, who once was director of research of BMB, is advised that if war exists, BROADCASTING • TELECASTING did not declare it.]

* * *

Thank-You Note

EDITOR:

At this time it is possible to examine the results of our efforts in obtaining cooperation from the radio and television industries for our 1952 crusade . . .

During the month of April, Cancer Crusade Month, and the early part of May, into which the crusade was extended, the radio networks gave us 346 appeals as compared with 240 last year. For the same period, the television networks gave us a total of 156 appeals as compared with 135 last year. We had three simulcasts, 12 radio and 18 television integrations, and 10 advertisers using national spot radio gave us mentions running well above 200. In radio there were four network programs devoted either completely or mostly to the American Cancer Society and in television there were seven features . . .

The figures I gave above are for network cooperation, but our field representatives tell me of areas throughout the country where it was impossible to avoid hearing the subject of cancer throughout the month of April.

We are grateful to you for helping us tell the industries of our crusade and we are thankful to the good men and women in radio and television for helping so admirably in the fight to control cancer.

Walter King
Dir. of Radio-TV
American Cancer Society
New York

in the public interest . . . .

IN an all-out safety drive, WABJ Adrian, Mich., 27 months ago enlisted 13,000 students in 11 high schools and more than 100 grade schools in Lenawee County, awarding pennants and students' "safety" buttons in the case of schools with no accidents for a month. Weekly *Safety Quiz* is recorded in various schools for broadcast and Mon.-Fri. *Safety Story Lady* promotes safety.

* * *

Share-Ride Service

DURING transportation strike, WGSM Huntington, L. I., secured transportation to New York for 200 commuters through morning disc jockey Bob Murphy, who acted as intermediary between the strike-bound Nassau-Suffolk commuters and 53 car owners who offered rides during the program's 6:15-9:15 a.m. period.

* * *

Air Raid Instructions

AIR RAID test alert in Hartford, Conn., found WDRC there ahead of time with a mobile unit cruising the streets giving instructions to listeners on what to do when the sirens went off. In the mobile unit were Station Manager Walter Haase, a civil defense public relations official and announcer Leif Jensen.

WBAL Aids Reunion

AFTER a 20-year separation, Navy seaman Robert Phipps and his father, Ralph Hamblin of Geneva, N. Y., were reunited last Monday on NBC-TV's *Today* (Mon.-Fri., 7-9 a.m. EDT and CDT). Seaman Phipps had written to news commentator Archdale J. Jones of Baltimore *News - Post's* WBAL, seeking aid in locating his real father, whom he had not seen since his adoption as an infant by another family. Knowing only that Robert had been born 21 years ago in Waterloo, N. Y., Mr. Jones enlisted the aid of his radio audience and followed tips until he located Mr. Hamblin in Geneva, N. Y. Until their belated introduction during the program, neither Seaman Phipps nor Mr. Hamblin knew the reason for his invitation to appear on *Today*.

"I love politicians"

Photograph by RALPH STEINER

Ray Henle has a long, sincere and requited affection for the political genus. It goes back to his first years in Washington and one of his first big political stories — when President Coolidge chose not to run. In the intervening years, Henle has covered every convention and traveled extensively with each president as well as candidates Landon, Willkie and Dewey.

As editor-in-chief of THREE STAR EXTRA, his understanding of and continuing interest in politicians stands him in good stead.

With Albert Warner as expert on international affairs, Ned Brooks covering domestic news, and Henle on the Washington beat, the Sun Oil Company's THREE STAR EXTRA presents nightly the interpretations of three experts — each working in his special field.

Credit NBC with another unique format for broadcasting news, and credit NBC for having such eminently able newsmen as Henle, Warner and Brooks.

It's not easy to hold news leadership in both radio and television as NBC consistently does. It has to be done the hard way — by having a larger, more distinguished news force and by broadcasting more hours of news every week. That's why most people hear the news first and hear more of it from NBC.

NBC *radio and television*

a service of Radio Corporation of America

Mrs. MUFFIN IS NO Myth ANYMORE!

- We're not lisping, either . . . when we say there's no myth to Mrs. Muffin's capturing the interest and imagination of "the younger set" in New Orleans.
- Bright and early each Saturday morning, young ears are literally glued to their radios (WDSU, of course) between 8 and 9 o'clock. During these sixty magic minutes, Mrs. Muffin weaves fascinating stories . . . as well as giving tips on health, safety, and good deeds.
- As proof of her magnetic personality, recently Mrs. Muffin received more than 6,000 letters during a single week. If sales to the "small fry" is your problem . . . Mrs. Muffin can easily provide the solution!
- Don't ever be fooled by myths . . . let WDSU show you real sales in the "Billion Dollar New Orleans Market."

Ludlam's Lodge

Do you want to know whether you can take a dog into Canada on a hunting trip? Or the cost of a hunting license in Ohio? Or how to cook blowfish?

Or do you want to know how to sell more fishing tackle and hunting equipment, or beer, or potato chips, or soft drinks?

If you have a product which appeals to the outdoorsman, young or old, man or woman, "Ludlam's Lodge" can answer these questions.

In the 5-5:30 p.m. Saturday spot on WRC for over a year, "Ludlam's Lodge" is now available to national advertisers. Kennedy Ludlam solves problems in the field of outdoor sports for all his listeners. He's also the man who can solve your selling problems in the Washington market—so why not call your nearest NBC Spot Sales office now for details?

Represented by NBC Spot Sales

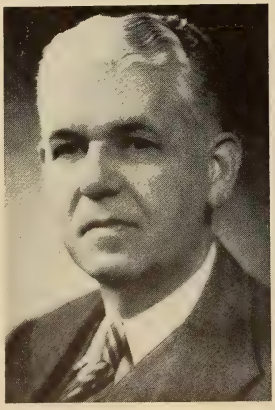
feature of the week

FIRST SHOWING of cars "live" on television by a new and used car firm in the Philadelphia area is claimed by John B. White Inc., Ford dealer there.

Capitalizing on the new WCAU-TV studios' accessibility from ground level, permitting cars and trucks to enter the studios, the White company initiated "live" demonstrations in the commercial portions of its news show a week after opening of the WCAU center [B•T, June 2].

The firm's advertising agency, J. Cunningham Cox, reported the "live" demonstrations televised excellently with favorable consumer reaction. Firm plans demonstrations on all future shows.

Six cars, "television specials," are shown on each program, and the firm thus can keep track of sales attributed to TV.



Keyed in this manner, the firm has been able to keep track of sales directly attributed to their TV expenditures. A company spokesman stated a "good number" of sales have been traced to television, of which the greater percentage were used cars.

Mr. Facenda, star of news program sponsored by John B. White Inc., helps "sell" a new Ford during a commercial.

strictly business

JACK HALEY

APPEAL to advertisers to join the TV industry in raising video's standards, made June 11 by NARTB Television Code Review Board Chairman John E. Fetzer, probably will fetch a wholehearted approval from John W. (Jack) Haley, advertising manager of Narragansett Brewing Co. of Cranston, R. I.

Head of the brewing firm's advertising since 1933, Mr. Haley this year breezes through his 25th year in radio. His associates tag him "an extremely vocal proponent of good taste in radio and TV."

He is proud of the several occasions Narragansett and his other clients have been honored for excellence of entertainment. Narragansett, with its heavy use of radio and its pioneering advertising on television making it one of the biggest advertisers in New England, received a certificate Award of Merit from City College of New York in 1947.

A Brown U. man (treasurer, Class of 1919), Mr. Haley first appeared on radio as commentator, actor and commercial announcer on a wide variety of local broadcasts sponsored by firms with products ranging from chewing gum to public utilities.

He probably has established some sort of a record by writing, producing and being featured on *Rhode Island Historian*, one of radio's oldest commercial programs. Sponsored continuously by the Providence Institution for Savings, a Mutual Savings Bank, from 1927 through 1949, the weekly radio program was supplemented only with occasional newspaper institutional advertising.

Radio scripts of the *Historian* program have been printed in pamphlet form and widely distributed to request mailing lists, and four bound volumes still are in demand at libraries and schools —each has passed the 20,000 copies mark. Many have been printed in Braille.

Mr. Haley is in national demand

Greener Pastures for EUROPE too!

SAM SCHNEIDER

At the request of the Mutual Security Agency of the United States Government, Sam Schneider, KVOO Farm Director and President of the National Association of Radio Farm Directors will head a delegation of his co-workers on a six weeks' tour of Europe to help establish a more effective farm radio service on the continent.

An important part of Sam's work, in addition, will be to set up a GREENER PASTURES PROGRAM modeled after the highly successful KVOO Greener Pastures Program which has already been adopted in several South American nations.

Translations of this highly important and effective plan* have already been made available to European farm directors in order that they may be prepared to plan progressive steps toward its accomplishment when the American delegation arrives.

The success of the KVOO GREENER PASTURES PROGRAM is a source of pride to us and we are happy for the opportunity of sharing it with our friends in South America and Europe. The land is basic, whether here or any other place in the world. Let's all work to improve and restore it to its rich, original beauty and fertility.

*Your copy of this important Program is free for the asking. Just address your request to KVOO or your nearest Petry & Company office.

POLITICS ON AIR: $10 MILLION HEADACHE

Democrats Already Are Buying Up Time

By JOHN OSBON

PACTS for "excellent time periods" in radio and television have been corralled by the Democratic National Committee for the post-convention political campaign, it was revealed last week.

While actual sums were not specified, it was learned that the contracts involve "hundreds of thousands of dollars" covering basic time purchases on all major radio-TV networks.

In announcing that contracts have been signed, Committee Chairman Frank E. McKinney boasted that the Democrats, for the first time, had skirted time pre-emption problems at a great saving to the national committee—and incidentally minimizing the headaches of network executives later on.

The purchases cover basic time only on "all national networks" for programs to be broadcast and telecast starting next September and ending just prior to the election Nov. 5. The announcement came as the committee accelerated its Victory Chest drive to raise funds for radio, television and other media. Results for radio-TV funds thus far have been gratifying.

CHAIRMAN McKINNEY

. . . He beat commercial sponsors to the punch

In the feverish campaigning for the Presidential elections, political broadcasting will play hob with commercial schedules on radio and television throughout the summer and the fall. Regular sponsors are already making plans to adjust their spots and programs to the dislocation bound to be made by the broadcasts of next month's political conventions. And politicians have already entered the market to buy up time next fall.

Details were not available late last week but will be released shortly so Democratic officials can coordinate state and local campaign plans with the national schedule. The Joseph Katz Co., Baltimore, has been instructed to push ahead on programs.

Early Bird

"I believe we have secured excellent time periods which will reach every city, every town, every community and rural area in the country," Chairman McKinney said. "By moving early, we have saved substantial sums of money. We plan to see that this time is used to achieve the maximum effect."

Thus, the contracts presumably were signed with ABC, CBS and NBC radio and television networks; with MBS, and with DuMont Television Network. There were some reports that commitments will approximate $1 million, give and take either way.

It was reliably learned the Democrats had purchased 10:30-11 p.m. Election Eve network segments.

Chairman McKinney pointed out that choice time periods were obtained early—"before commercial sponsors have signed their fall contracts." In a letter to Democratic party workers, Mr. McKinney explained:

. . . By contracting for this time now we are saving substantial sums which in previous campaigns we have had to pay to remove regularly scheduled sponsored shows to make way for political broadcasts. This expense—whatever amount it cost to produce the program—was in addition to the money paid to the network for the time.

To give you some idea of what kind of money this involved, the production cost of many top television shows is as much as $40,000 or $50,000, over and above the cost of the network time.

This year, however, we have secured choice time periods on television and radio *before* commercial sponsors have signed their fall contracts. If we had waited until late summer to sign these contracts we would have had to pay money running well into six figures to remove sponsored shows in order to get the same time we now have under contract.

Mr. McKinney noted that the Victory Chest drive [B•T, June 9] "is off to a good start," although most of the contributions have not been large and "it takes a lot of these contributions to meet the high cost of radio and TV time." In fact, the radio-TV appeal bids fair to become "the most successful campaign" the party has ever conducted, he added.

The Democratic chairman assured party workers that emphasis on the radio-TV fund did not mean "we are going to rely only on those media." He proposed a "well-rounded publicity and advertising program, utilizing every medium of communication to the maximum that our legal campaign ceiling will permit."

Fund Raising

Mr. McKinney referred to the $3 million ceiling imposed on campaign expenditures during an election year under the Hatch Act. Early estimates placed radio-TV funds for the Democrats at somewhere between $1-$2 million.

"We will be able to do a better job in all [media] fields because we are moving early to raise our radio and TV fund to contract for basic national network time," Mr. McKinney observed. He called on party workers to send in any con-

(Continued on page 97)

How Sponsors Plan To Meet Disruptions

By FLORENCE SMALL

AN ESTIMATED seven to ten million dollars worth of radio and TV spot announcement schedules will be disrupted by the networks' coverage of the political conventions during July, with agencies split in their demands for either time-credit or substitute ("make good") time, the latter to be cleared with the agencies in advance.

The situation derives from the fact that the networks anticipate that during the conventions' keynote addresses and dramatic occasions like the first balloting, coverage will not be interrupted for station identification. However, during predictable convention action all the networks will strive for at least half-hour breaks in radio of the usual 30 seconds duration and at least one break during the hour in television.

Disappearing Spots

Thus, since the individual station on the network will be able most of the time to retain the 30 seconds for station identification, that revenue will not be unduly affected, but the stations still face the loss of the quarter-hour spot.

One of the first radio station representatives to query New York agencies on the problem last week was the O. L. Taylor Co. President Lloyd G. Venard sent letters to the agencies asking approval of a suggested method to be used in handling affected national accounts.

Mr. Venard's plan as expressed in his letter suggested that "if a national account is missed during the convention, the station is to run that announcement on the first break that is open. If for instance, an announcement is scheduled for 11 a.m. and is knocked out by the convention, it would run at the first open break."

Although it was too early for Mr. Venard to have received complete replies, B•T was able to spot

LBS VS. MAJORS

Trial Date Now Jan. 19

THE EXPIRING Liberty Broadcasting System was revived a bit last week as a Chicago federal district court judge set Jan. 19 as the trial date in the network's anti-trust suit charging conspiracy by major league baseball clubs.

Liberty's Chicago law firm, McConnell, Lutkin & Van Hook, on Tuesday requested and received a January trial date. The early date is expected to influence creditors so they may agree to continuance of the costly litigation.

Creditors of Liberty—to whom almost $1½ million is owed—will meet in Dallas July 8 to select the trustee in bankruptcy, who is the permanent replacement for the receiver. The receiver is William J. Rochelle, Dallas attorney, who may also be named trustee.

The trustee and creditors will decide what disposition is to be made of the baseball suit. Should the network win a favorable decision, creditors would stand to collect everything owed them. However, they might decide to drop the suit because of litigation costs and the possible time involved in getting a decision. As it is now, debts might be paid off at the rate of 10 cents on the dollar. Liberty's liquid assets are unknown, but presumably include accounts receivable from former affiliates and equipment.

COPYRIGHT BILL

Senate Group Okays

BILL to broaden the Copyright Act to protect recording rights of authors of non-dramatic literary works [B•T, March 31, 24] was reported favorably last week by the Senate Judiciary Committee. Bill (HR 3589) is substantially the same as the House-passed version, which would require broadcasters to secure the consent of the author for airing.

Maximum damages of $100 are permitted "where the infringing broadcaster shows that he was not aware that he was infringing and that such infringement could not have been reasonably foreseen."

HUMPHREY LAUDS

Talent on OPS Shows

PRAISE for patriotic services donated by radio and film talent in connection with radio programs of the Office of Price Stabilization was given by Sen. Hubert H. Humphrey (D-Minn.). He paid the tribute to their "patriotism and selflessness" in response to charges that broadcasters and artists were aiding OPS "propaganda" programs.

Sen. Humphrey's statement, introduced in the *Congressional Record*, pointed out that the people must understand the OPS program to check inflation as well as maintain and expand production. He said:

I am confident that your contribution of talent and time has the appreciation of all Americans who fear inflation and desire to protect their economy. You and your associates have been criticized by a small handful of my colleagues for assisting your government. If helping your government in its anti-inflation program is to be considered controversial and political, then I say that we are only a step away from condemning any individual who desires to help his government carry out a program enacted by law through Congress.

BAB CLINICS

Management Units Held

SERIES of Broadcast Advertising Bureau clinics for station managers and sales managers was held in the East last week, with sessions at Philadelphia, Baltimore, Washington and Richmond, Va. Kevin B. Sweeney, BAB vice president, and Jack Hardesty, director of local promotion, made the tour.

Morning programs covered BAB's internal operations, with presentation of income distribution and jobs accomplished along with plans for the rest of the year. These plans include extensive advertising and retail sales promotion drives.

Afternoon sessions were devoted to sales discussions with station sales and program executives. BAB projects were described in detail.

DORLAND ASSETS

Liquidation Authorized

LIQUIDATION of the fiscal assets of Dorland Inc., New York, was authorized last week after the agency, with liabilities said to be $190,000, filed an assignment for benefit of creditors in New York County Court.

The authorization was given to A. Alan Reich, attorney for the assignee, at a meeting at which 32 of the agency's largest creditors —among them WOR New York ($28,260) and the DuMont TV Network ($25,000)—met to appoint a committee of five creditors. They are: Merrell Morgan, representing DuMont Network, Chauncey H. Levy, General Television-Radio; Muriel Henle, ABC; Joseph Lewis, Bingham Photo Engravers, and Leo M. Rogers, Rogers Engravers Co.

The creditors' committee also employed an accountant to go over the books and report to the committee within a fortnight.

Among the questions for the accountant to pursue are the relationships, if any, (1) among Dorland Inc., Dorland Adv. Ltd., and Dorland International, and (2) between Dorland Inc. and the Wesley Assoc. agency, which occupies office space with Dorland Adv. Ltd. and whose staff includes Dorland President Atherton Pettingell and Executive Vice President Walter Maas.

At the creditors' meeting, Eugene Roth, attorney for Dorland Inc. said that merchandising activities of radio-TV division under Harold Kaye were the main cause of the agency's financial break-up. He said Mr. Kaye was part owner of some of the companies that were delinquent in paying their bills.

Lewis Ullman, attorney for Mr. Kaye, who was not represented at the meeting, pointed out that in a settlement back in March Mr. Kaye paid Dorland Inc. approximately $15,000 and that there is still a possible rebate of $2,000 or so owed to Mr. Kaye by Dorland. The original settlement of $15,000 was made, he said, after Mr. Pettingell stated in a letter during the Dorland-Kaye litigation that "we may have been in error with respect to the amount of $46,142.04, which we asserted was due. . . . The figure alleged now appears to have been unduly large."

Clandestine VOA?

IS THE Voice of America violating the law of Japan? The Japanese Foreign Office and Radio Regulatory Commission, according to newspaper accounts, think perhaps VOA and Korean language broadcasts may run afoul of Japan's electric wave law. A section of that law stipulates that no license for operating a station shall be given to a foreign country. But the U. S. expressly demanded the right of broadcasts when it negotiated the security pact with Japan. Nipponese authorities hold the broadcasts are not intended for U. S. forces there but the local populace.

FRENCH SARDINE BUYS

Godfrey Show Segments

FRENCH SARDINE Co. of Terminal Island, Calif., has bought two weekly quarter-hours of the simulcast of Arthur Godfrey's morning show on CBS radio and CBS-TV, effective Sept. 2, bringing to 14 the number of 15-minute simulcast segments already sold for this fall.

CBS-TV Network Sales Vice President Fred M. Thrower announced the purchase of the simulcast on Tuesday and Thursday for the firm's Starkist Tunafish product, through Rhoades & Davis, San Francisco.

HOUSE PASSES McFARLAND BILL

Also Libel Measure

By EARL ABRAMS

FIRST major revision of the Communications Act in 18 years is in the hands of Senate-House conferees this week, following passage last Tuesday of the House version of the Senate-passed McFarland Bill (S 658).

Only major amendment adopted on the House floor was a provision to exempt radio stations from damages for libel uttered by political candidates or their authorized spokesmen. This was offered by Rep. Walt Horan (R-Wash.).

The same amendment would forbid stations from charging political candidates more than the comparable commercial rate.

Horan amendment was adopted 92 to 27, after the House defeated by 59 to 37 an amendment offered by Rep. Joseph P. O'Hara (R-Minn.) which would have permitted station operators to censor candidates' speeches for defamation and obscenity.

House also defeated by voice vote an amendment by Rep. Harry R. Sheppard (D-Calif.) to strike the provision to forbid the FCC to discriminate against newspaper applicants "solely" because of newspaper ownership.

This motion, and the debate preceding and following it, brought the admission from the bill's managers—Reps. Oren Harris (D-Ark.) and J. Percy Priest (D-Tenn.)—that the newspaper provision does not bar the FCC from turning down a newspaper applicant if in its judgment a favorable grant would conduce to monopoly in the dissemination of news in the community involved.

This is one of the provisions which was believed to have been at the root of the White House's objections to the McFarland bill, and which led to its removal from the House schedule two weeks ago [B•T, June 16].

Bill as passed by the House follows the general outline of the legislation passed in February 1951 by the Senate with several important differences (see summary of principal points below).

Senate-House conferees are scheduled to meet this week behind closed doors. No major changes are expected to be made in the McFarland bill, although it was said two weeks ago that the FCC had "reached" the White House which had ordered that certain provisions be "adjusted."

Fact that the only attempt to "soften" the bill was made by Rep. Sheppard surprised industry observers. The four-and-a-half-hour debate produced no opposition to the bill. Most of the time was spent on the newspaper section and the political censorship amendment.

Representing the Senate in the conference committee are Democratic Sens. Ernest W. McFarland (Ariz.), author of the bill; Edwin C. Johnson (Col.), Lester C. Hunt (Wyo.), and Republican Sens. Charles W. Tobey (N. H.) and Homer E. Capehart (Ind.).

Representing the House are Democratic Reps. J. Percy Priest (Tenn.), Oren Harris (Ark.), Homer Thornberry (Tex.) and Republican Reps. Charles A. Wolverton (N. J.) and Carl Hinshaw (Calif.).

Agreement Seen

Little difficulty is expected in "compromising" differences between the House and Senate bills.

Broadcast spokesmen are hopeful that the provisions relating to suspensions, cease and desist orders and fines will be eliminated. They also believe that the provision regarding the purchase of the apparatus of unsuccessful applicants for license renewal by the successful grantee can be deleted. They feel that the language of the Horan amendment referring to political charges will be clarified.

Spokesmen for major broadcasters also are hopeful that House conferees will accept the Senate provision eliminating the double jeopardy clause.

Most spirited debate was on the respective merits of the Horan and the O'Hara amendments. The former, which was adopted, would exempt broadcasters from liability for libel uttered on the air by political candidates or their authorized spokesmen. The latter would have permitted stations to censor political speeches for "defamation and obscenity."

The O'Hara amendment was defeated by a House which felt political candidates' speeches should be inviolate and that it was unfair to station owners to require them to give time to political candidates and forbid them to censor such talks, while at the same time permitting them to be sued for libel.

Adoption of the Horan amendment evoked strong words from Mr. O'Hara. After raising the question of constitutionality, Mr. O'Hara declared:

I do not believe, and I assure you I say this in all sincerity, that the Congress of the United States could pass an act which would exempt someone . . . from the libel laws, either civil or criminal, of the States, and that is just what you are going to be passing on in this provision.

Adoption of the amendment drew even stronger words from Rep. Clare E. Hoffman (R-Mich.):

"This amendment . . . is an in-

(Continued on page 36)

Horan Amendment

REVISED Section 315 of the Communications Act, adopted by the House by a vote of 92 to 27 upon a motion by Rep. Walt Horan (R-Wash.), is as follows:

"'Facilities for Candidates for Public Office

"'Sec. 315. (a) If any licensee shall permit any legally qualified candidate for any public office in a primary, general, or other election, or any person authorized in writing by such candidate to speak on his behalf, to use a broadcasting station, such licensee shall afford equal opportunities in the use of such broadcasting station to all other such candidates for that office or to persons authorized in writing by such other candidates to speak on their behalf.

"'(b) The licensee shall have no power to censor the material broadcast by any person who is permitted to use its station in any of the cases enumerated in subsection (a) or who uses such station by reason of any requirement specified in such subsection; and the licensee shall not be liable in any civil or criminal action in any local, State, or Federal court because of any material in such a broadcast, except in case said licensee shall willfully, knowingly, and with intent to defame participate in such broadcast.

"'(c) Except to the extent expressly provided in subsection (a), nothing in this section shall impose upon any licensee any obligation to allow the use of its broadcasting station by any person.

"'(d) The charges made for the use of any broadcasting station for any of the purposes set forth in this section shall not exceed the minimum charges made for comparable use of such station for other purposes.

"'(e) The Commission shall prescribe appropriate rules and regulations to carry out the provisions of this section.'"

Main Points in House Version of New Bill

SALIENT features of the McFarland Bill (S 658), passed last week by the House and now the subject of Senate-House conference, are as follows:

Cease and desist orders, suspension of licenses, fines—House bill gives FCC power to suspend licenses up to 90 days, issue cease and desist orders, levy fines up to $500 per day per infraction. This is in addition to existing authority to revoke licenses for cause. Senate bill permits issuance only of cease and desist orders.

Newspaper ownership — House bill forbids FCC to discriminate against newspaper applicants "solely" because of newspaper ownership or association. Senate bill does not contain this provision.

Political broadcasts—House bill exempts broadcasters from damages for libel uttered by political candidates speaking over stations. It also forbids stations to charge more than the "minimum charges made for use of such station for other purposes" for political broadcasts. Senate bill does not contain these provisions.

Double jeopardy—Senate bill deletes that portion of Section 311 of Communications Act which gives FCC power to revoke licenses of any licensee found guilty by Federal court of anti-trust violations in radio or communications business. House version does not touch this provision, leaving this section as *status quo*.

Separation of staff and Commissioners—Both bills forbid staff of FCC from consulting with or making recommendations to Commissioners regarding decisions on cases before them. Both bills set up a review staff whose only function is to digest evidence for Commissioners. Senate bill adds a legal assistant to staff of each Commissioner. House bill adds a "professional" assistant to staff of each Commissioner. House bill is more rigid than Senate version.

Action on cases—Both bills require FCC to reach final decision on applications within three months after filing on cases not requiring hearings, within six months after close of hearing on hearing cases. Both also require full report to Congress on cases not acted upon which are on file for longer than above periods.

Job jumping—Senate bill prohibits any Commissioner from representing a client before FCC for one year after resignation. It also applies to staff executives. House bill does not include this provision.

Declaratory orders—Senate bill orders FCC to issue declaratory orders only when requested. House bill does not include this provision.

Sale of equipment—House bill requires FCC to compel a successful grantee to purchase equipment of unsuccessful applicant when latter is licensee of facility involved. Senate bill does not include this provision.

Renewals—Both bills put burden of proving that a licensee is not qualified for renewal of license on the FCC.

Hearing procedures—Both bills require FCC to notify applicant and other interested parties of time and place of hearing and reasons why grant cannot be made. Applicant is permitted to object to FCC's reasoning. If FCC, after reply of applicant, still feels it cannot grant application without hearing, it may then set case for hearing.

Protests and petitions for rehearing—Both bills permit protests against grants or petitions for rehearing to be filed up to 30 days after a grant. Both bills also require FCC to answer protests or petitions for rehearing within 15 days after filing.

COMBINED RADIO-TV SELLS BEST

Says NBC's Madden

"BEST unduplicated buy an advertiser can make is the combination of radio and television," Edward D. Madden, NBC vice president in charge of TV sales and operations, said Tuesday in an address before the American Marketing Assn. meeting in Cincinnati.

Mr. Madden

Citing Nielsen figures on "an actual experience of last year," Mr. Madden reported that an advertiser sponsored a network radio program reaching 14.1% of all U.S. homes and a network TV show reaching 7.9% of the nation's homes, but with only 1/10th of 1% of all homes reached by both programs.

Duplicated Audience

"The important thing here is that the duplicated audience—the number of homes reached by both programs—is only 43,000 out of almost 10 million homes reached by the advertiser with this combination," Mr. Madden pointed out.

"Radio," he declared, "has too much basic circulation—and, in addition, secondary sets, portable and auto sets—to be passed over. It has too much grass roots penetration, too much advertising impact, for it to be omitted from any advertiser's schedule."

Answering critics who have charged TV with pricing itself out of the reach of most advertisers, Mr. Madden stated that "day or night, television gathers an audience for the advertiser at an economical cost per viewer. And its price is low in comparison with the cost of reaching people through the older visual media."

He backed up these statements with figures showing that an average NBC-TV sponsored evening half-hour cost the advertiser $37,600 for time and talent and reached 11,192,000 viewers in 4,204,000 homes for an average cost of $3.36 per thousand viewers. The average NBC-TV daytime half-hour, costing $15,100 and reaching 4,224,000 viewers in 2,057,000 homes, delivers viewers at the price of $3.57 a thousand, he reported.

In contrast to these TV costs of $3.36 for an evening half-hour and $3.57 for a daytime half-hour per thousand persons reached, Mr. Madden said that a black-and-white page in *Life* costs $3.83 per thousand and a 500-line ad in the leading newspaper in 64 markets costs $5.17 per thousand. "The most economical medium is television," he noted, "which is substantially below either the largest magazine or newspaper advertising."

Realizing several years ago that as TV circulation increased, costs would also increase, NBC-TV "introduced new selling concepts of multiple participating sponsorship, which are making network television advertising available to moderate budget advertisers," Mr. Madden stated.

"They also enable advertisers with somewhat larger budgets to co-sponsor programs which they alone couldn't afford," he commented, reporting that of the 50 leading advertisers, 48 are using television and of those 48, "36 are using some form of participating sponsorship." In the next 50 advertisers, 35 are using TV and 19 some form of participating sponsorship, he said.

"Actually, what we're doing is to make it as easy for the advertiser to buy TV as it is for him to buy space in magazines," Mr. Madden said. He pointed out that an advertiser who wants to reach housewives can buy 15 minutes of the *Kate Smith Hour* (Monday-Friday, 4-5 p.m.) for $12,044, at a cost per thousand of $2.27. A quarter-hour of *Howdy Doody* (Monday-Friday, 5:30-6 p.m.) costing $12,541, will deliver viewers (90% kids) at a cost of $1.93 per thousand. To reach the whole family, Mr. Madden noted, the advertiser can use as little as a five-minute segment of *Today* (Monday-Friday, 7-9 a.m.) for $2,352, or a cost per thousand of $1.36. The three advertisers who jointly sponsored the middle half-hour of *Your Show of Shows* paid $17,329 each a week, he said, reaching viewers at 85 cents a thousand.

"I'm not saying that you will not have individual sponsorship of individual programs," Mr. Madden declared. "What I want to get across to you is that television advertising will not be frozen into the traditional patterns of network radio."

Asking, "Do these new TV selling concepts vitiate the soundness of advertising practices established in radio?" Mr. Madden pointed out that "in radio you had the same advertiser sponsoring the same program on the same stations week after week in 13-week cycles. You had frequency and continuity of advertising impressions on a mass market of consumers.

"If you analyze that situation, you find it's made up of two important elements: One, the program, which listeners could get by turning to the same station, on the same day, every week; two, the frequent and continuous advertising impressions the advertiser could make on the audience attracted by the program.

"These two elements—the mass audience and the frequent, continuing advertising exposure—we must and will retain in the new selling plans television will develop. In many instances we will have to forego the luxury of exclusive advertiser identification with the program, as you had in radio."

Research organizations should revise their radio evaluation methods

(Continued on page 97)

PROFIT SQUEEZE

Theme of Doherty Talk At Nags Head Meet

BROADCASTERS, one of few industries to absorb rising operating costs out of profits, must avoid or minimize the squeeze between income and operating costs, Richard P. Doherty, NARTB employe-employer relations director, told the North Carolina Assn. of Broadcasters, meeting Friday at Nags Head, N. C.

★

At the same time, he said, radio seems to be the only industry content to reduce profits to pay higher costs of operation. The results could be "devastating" if inflation continues, he added.

John H. Smith Jr., NARTB FM director, called on broadcasters to get FM out of the "foreign language class and into the great radio family" by talking "radio and TV" instead of "FM, AM and TV."

In his analysis of labor and operating costs, Mr. Doherty said the upward spiral will continue "regardless of the political outcome of the November elections." He said inflationary forces "have jumped the national income from $233 billion in 1947 to $328 billion in 1951—an increase of 41%. During the same period the revenue of the radio broadcasting industry rose by 30%. Radio stations and networks need a combined additional income of some $153 million if the industry is to get the same proportionate share of the nation's income as was received in the 1946-50 period."

Lists Operating Problems

Operating problems of the broadcaster are shaped and influenced by broad and complicated national trends, Mr. Doherty said. He listed these as: National policies which generate inflation; national tax programs which affect potential sponsor advertising budgets; national wage and employment patterns; nationwide union practices; national radio rate tendencies; national legislation which directly affects, or threatens, the standards of all radio and TV operations.

"Never before in the history of broadcasting," he continued, "has there been such a crying need for industry-wide cooperation and for outside operating services and aids if profit-making stations are to maintain their profits and 'red-ink' stations are to get into the black."

Referring to radio's absorption of rising costs out of profits, Mr. Doherty said:

Newspapers and other lines of business have raised rather substantially the prices of their product or services to cover the steady upward march of costs. In fact, it is ironical that so many businessmen who, in their own businesses, know full well the impact of higher costs upon prices virtually fail to realize that radio has been equally subjected to higher wages, higher costs of equipment, higher taxes, higher costs for services and, in total, higher operating cost ratios.

NARTB's three-year campaign for better control of operating and labor costs has assisted a substantial segment of the radio and TV industry and has contributed greatly toward the improvement in the industry's profit margin. . . .

Operating costs for the majority of radio and TV stations are too high. These relative high operating costs result primarily from excessive payroll expenditures. While many stations operate with an efficient minimum staff, a full 50%, if not more, of the nation's stations employ too many persons. . . .

Chiding management, he said: "The fault with many station managements is that they are content to sit complacently on their profit margains—many of which are not too fat—and ride out the 'liquidation' of radio broadcasting. . . . Established businesses don't die; they wither from managerial hardening of the arteries. We like to think of radio as one of America's younger industries; some of radio's management wants to act like old men sitting out the green bench era . . . . There is nothing wrong with radio that creative, courageous and competent management cannot solve. . . ."

In calling for recognition of FM broadcasting, Mr. Smith said "the great FM discovery" is being made in many more places, including radio manufacturing firms that had grown apathetic about FM. At least two firms are resuming production of FM sets, he said.

MEETING THE CRISIS

NBC Reinforces; CBS Stations Buck Cuts

THE biggest problem facing network radio—how to re-stabilize it—was approached in separate but significant moves last week by the management of NBC and a group of affiliates of CBS Radio.

● NBC, to coordinate its radio and TV activities more fully, put NBC-TV Vice President Sylvester L. (Pat) Weaver Jr. in charge of both the radio and TV networks and installed Frank White as vice president and general manager of both, almost simultaneously starting to promote the use of radio and TV in combination as the most effective advertising buy.

● Looking toward the July 1-2 "Crisis Conference" of CBS Radio affiliates and CBS officials, members of the affiliates' steering committee met in an agenda session whose tenor gave notice that the network faces a scrap if and when it undertakes any major reduction in rates.

The NBC realignment, calculated to result in "more use of radio in both radio-only and television homes," as well as to benefit TV, came without warning. Announced by President Joseph H. McConnell late Tuesday, it makes Mr. Weaver's abilities—recognized especially in the programming field—available to the radio as well as the TV network, while giving both radio and TV the benefit of Mr. White's broad experience in administration and sales and also in labor and talent negotiations and relations.

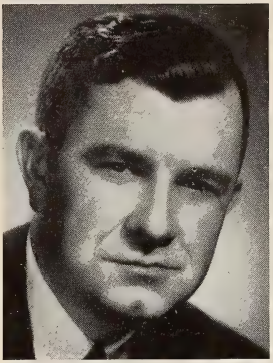
Mr. White, who resigned as president of Mutual effective May 31, joined NBC June 10 and had been slated to head the network's projected television film division. This post went, almost simultaneously with the Weaver-White appointments, to Vice President Robert W. Sarnoff, who will be responsible for all NBC film activities including planned expansion of film syndication, reporting to Mr. White (see separate story, this page).

Denny Status

The exact future role of Charles R. Denny, executive vice president of NBC and acting head of the radio network, was not defined. Officials said, however, that he would remain in an executive capacity.

President McConnell's statement of the goals of the Weaver-White appointments—which represent a reversal of the concept which led the network to separate its radio and TV operations a few years ago—was as follows:

"Placing of the actual operating management of the radio and television networks under a single, coordinated control will benefit our audience and our customers. NBC radio network listeners will gain access to the outstanding personalities and attractions which have made our NBC television network such a success. The NBC television audience will have the advantage of a coordinated schedule of entertainment and information programs on both radio and television.



"We expect this coordinated management to give new excitement to our radio programming by bringing into radio many of our television stars and attractions. This will benefit our audience in homes which use radio as the primary source of entertainment and information. This same coordinated planning will also offer television homes a more exciting supplementary program schedule on radio. We expect the result to be more use of radio in both radio-only and television homes."

Mr. McConnell also felt the new arrangement would mean improved sales service to advertisers using both radio and TV, and more coordinated supervision and guidance for NBC employes.

Almost simultaneously with the new appointments—which became effective immediately—NBC's approach to advertisers began to emphasize the advantages of coordinated use of both radio and television as combined sales tools, and authorities expected that this would become standard procedure.

Mr. WEAVER
. . . heads radio and TV networks

Mr. WHITE
. . . vice president & gen. manager

* * *

The 43-year-old Mr. Weaver, with NBC since August 1949, has won reputation as a new-program idea man. Some of the departures from standard programming concepts which he has installed at NBC-TV are represented in the Saturday-night *Show of Shows*, with its rotation of stars, and *Today*, the two-hour early-morning communications program.

He started his career with advertising copy writing in Los Angeles following graduation from Dartmouth College in 1930, moved next into radio program production with CBS-Don Lee network, and became program manager of Don Lee's KFRC San Francisco. Moving to New York in 1935, he produced the *Fred Allen Show* for Young & Rubicam. By 1936 he had become manager of the agency's radio department. In 1938 he joined American Tobacco Co. and a year later—at 31—he was its advertising manager. After wartime service which started in 1941, he returned to American Tobacco in 1945, then went back to Y&R, where he was vice president in charge of radio and television—the post he held before moving to NBC.

Mr. White, who reports to Mr. Weaver in the new organizational structure, served both CBS and Mutual before joining NBC early this month. His entry into the broadcast field came in 1937, when he joined CBS as treasurer. In 1942 he was elected a vice president and director, continuing also as treasurer until 1947 when he was named president of the subsidiary Columbia Records Inc. He moved from CRI into the Mutual presidency on May 1, 1949. Substantial advances in MBS sales were made under his three-year administration.

CBS Radio Session

The CBS Radio affiliates' steering committee members met in Detroit on Monday. Though the details of their plans for the July 1-2 sessions were not made public, it was learned that they shared the conviction that reductions in rates—the subject which is expected to occupy the limelight at the meetings, in view of wide speculation that CBS Radio is planning cuts—will never stabilize radio, but instead will lead to greater uncertainties and losses.

The group, it was learned, felt that officials of the networks tend to rationalize the "inevitability" of reductions in rates, and fail to take into account the full vitality that does exist in the medium. Stabilization of the network radio situation can be achieved better by rate increases, if anything, and by rejec-

(Continued on page 34)

ROBERT SARNOFF

Heads New NBC Film Division

ROBERT W. SARNOFF, vice president of NBC and director of Unit Productions in its television network, last week was named to head a new NBC film division which will encompass all film activities of the network including a projected expansion of film syndication.

Announcing creation of the new division and the appointment of Mr. Sarnoff to direct it, NBC President Joseph H. McConnell said "we at NBC believe that films will play an ever greater role in the future of television" and that "we intend to stay in the forefront in this field as we have in other aspects of television."

Mr. Sarnoff

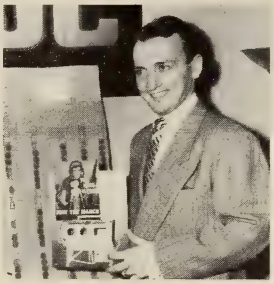
In his new post Mr. Sarnoff, who joined NBC-TV as an account executive in network sales in January 1948, will report directly to Frank White, vice president and general manager of the radio and TV networks under the reorganization which installed Sylvester L. (Pat) Weaver Jr. as vice president in charge of both networks (see story above).

The new film division chief was elected a vice president of NBC in June 1951, and became director of NBC Unit Productions last June 22. Before that he had progressed from network sales account executive to production manager for the television network, and manager of program sales.

As Unit Productions director, he was responsible for the several special NBC production units for *The Comedy Hour, All-Star Revue, Saturday Night Revue, Kate Smith Hour*, and the *Victory at Sea* documentary which will be released this fall.

Mr. Sarnoff, a son of RCA Board Chairman David Sarnoff, was assistant to the publisher of *Look* Magazine, and previously had served with the *Des Moines Register and Tribune* in a similar capacity, prior to joining NBC. He was in the Navy for three and a half years, with rank of lieutenant, and before that he served in the office of Gen. William Donovan, Coordinator of Information, in Washington.

THE "wee small hours" have meant big business for many station operators who have kept a surprisingly large listening audience entertained and informed between midnight and 6 a.m. Formats vary from a program including information on how fish are biting to that of a mysterious female disc jockey whose signature is "Lovingly Yours, Laura."



SALES LIFT

Joe McCauley interviews celebrities such as Rudy Vallee (r) on WIP Philadelphia, The Dawn Patrol.

Jim O'Leary, KCBQ San Diego, Midnight to Dawn *record man.*

Felix Grant, WWDC Washington, combines sales and public service.

Del from Dixie and Bob McKee alternate as emcees after midnight on WGN Chicago

BROADCASTING after midnight can be successful, too.

Stations on the air 24 hours a day report happy sponsors and worthwhile revenue from the 12 p.m. to 6 a.m. segment of their operation.

Others admit that while extra-hour programming does not always pay its way in cash it is a prestige builder for the station and makes radio more attractive to advertisers in other time classifications.

Increased local and national spot business is making many a station manager take a second look at the possibilities of these usually "blacked out" hours.

Advertisers who have difficulty finding the time they want during daylight or early evening hours or who like a lot of time for a comparatively low rate are looking at this "neglected" period, too.

A baker's dozen station managers in all parts of the country who have operated 24 hours a day anywhere from one year to 20 were checked by BROADCASTING • TELECASTING. Here are some of their conclusions:

- Favorite format: Records and news.
- Average personnel: Disc jockey and engineer.
- Typical sponsors: Local business (wishing to appeal to night listeners) and national advertisers (a good part of these per inquiry on some stations).
- Success: Every station reported satisfactory listener reaction.

Of course there are many variations. While most stations prefer to keep to a format of popular music, chatter and regular news roundups, others have found variations that appeal to their markets. KFAC Los Angeles uses classical music instead of popular. WWJ Detroit has a mystery girl disc jockey. WIP Philadelphia interviews celebrities. KDAL Duluth tells how fish are biting.

Proof that there is a substantial after-midnight audience has come from a number of sources. Advertest Research made a report in mid-March of this year on a study of the New York market that showed one in every ten homes in that area uses the radio after midnight. The report indicated that on the average week-day 10.3% of all families used the radio from 12 to 1 a.m.; 4.3% from 1 to 2 a.m.; 1.7% from 2 to 3 a.m.; .4% from 3 to 4 a.m.; .4% from 4 to 5 a.m. and .6% from 5 to 6 a.m.

Other markets with substantial swing shift factory operation or other night activity report an even larger percentage of late night listeners.

Since stations checked included those in every part of the country and formats varied widely the following capsule reports should prove interesting to advertisers considering this time segment and to station managers who are thinking of expanding into late-hour programming.

WGN Chicago

The WGN *720 Club* takes over promptly at midnight daily except Monday and continues to 6 a.m. Programming consists of records with five minutes of news each hour on the hour. First four hours of the show is devoted to popular music while the 4 to 6 a.m. period is made up almost entirely of hillbilly tunes.

Two personalities handle the show: Bob McKee, a staff announcer who became interested in the new and different selling methods needed for mail order commercials and Delores (Del from Dixie) Ward of Macon, Ga. Mr. McKee believes he is perhaps the only hillbilly announcer who ever went to Harvard. Miss Ward, with her soft southern voice, has a great following both above and below the Mason-Dixon line. The two alternate hours during the night.

Much of the program is seasonal advertising. Best results are obtained, WGN reports, from the 12 to 1 a.m. and 4 to 6 a.m. periods. Many advertisers are on a per inquiry basis. Advertisers participate in either 10 or 15-minute segments.

WIND Chicago

Beer and amusement advertising give a solid background of sponsorship for the midnight-to-morn-

WITH THE SWING SHIFT

Ted Jones presides over Night Beat *on KNUZ Houston.*

ing segment on WIND Chicago. The station started its extra-hour operation with a 22-hours-a-day schedule in January 1933. On Dec. 8, 1941 the schedule was expanded to 24 hours and has continued since.

The program first had the name *Milkman's Matinee* but this was changed in 1936 to *The Night Watch.* Popular music on records is used, with five minutes of news each half-hour.

While the program is not a big revenue producer for the station, continuance is felt worthwhile. Management of the station believes a large industrial population is necessary to make this type of program self-sustaining.

WCKY Cincinnati

The nighttime audience in the Cincinnati area is largely male, in the opinion of WCKY's management. The station has been on the air all night since 1947 with its *Nighthawks* program. To cater to men listeners WCKY plays pop with a sprinkling of pop hillbilly until 4 a.m. with five minutes of sports highlights every hour. At 4 the format is changed with an hour of relaxing waltz music.

Frank Taylor, disc jockey handling the show, claims 5,000 members belong to the Nighthawks club. Most sponsors are mail order advertisers.

The late show boasts a number of outstanding success stories. One occurred last summer when the South Carolina Peach Growers' Assn. reported a bumper crop with few truckers coming into the market. The agency, Henderson Adv., of Greenville, S. C., bought a saturation schedule telling fruit truckers in what area the peaches were ripe. Agency and association were pleased with results.

While WCKY finds it difficult to make the late programming pay its own way with direct advertising revenue, management believes the public service it performs is worthwhile.

WSRS Cleveland

Newcomer to the 24-hour operation field, WSRS Cleveland is still experimenting with format and as yet has not investigated its commercial possibilities. In its sixth month on the station, the late shift is covered by one disc jockey who plays request numbers and makes dedications. Advertisers have been attracted to the program and are buying spot announcements. WSRS management is pleased by the mail count and listener response attracted.

WJR Detroit

Constantly successful in drawing vast amounts of mail is the WJR Detroit format of transcribed music with five minutes of news every hour from midnight to 5 a.m. The station employs four disc jockeys for the period, including Marty McNeely, Johnny Russell, Bill Barber and Vic Cotton. Bob Conger reports news during the period while the disc jockeys keep listeners informed of the regional weather reports, road conditions and time.

The station has received mail from 43 states, six Canadian provinces, Alaska, Greenland, Cuba, Puerto Rico and New Zealand. One example of the program's pull came during a Chrysler-sponsored segment when an offer was made to give those who wrote in within 24 hours an automatic pencil. Although the offer was made on Sunday morning and many postoffices were closed, 17,129 requests postmarked within the time limit were received.

While the after-midnight segment is currently unsponsored on WJR, station management believes it well worth continuing because of the prestige and listener interest it builds. Interest in the program has been shown by several national advertisers because of its apparent pulling power and present favorable rates.

WWJ Detroit

From 2:05 to 6 a.m., WWJ Detroit listeners are soothed and entertained by the station's mysterious girl disc jockey, who signs herself, "Lovingly Yours, Laura." For more than a year she has spun discs and dispensed chatter six nights a week. On the seventh her counterpart, Lorraine, takes over. Beyond their voices the audience has no knowledge of who they are. Her secret identity, WWJ executives feel, adds relish to the program.

Laura does a five-minute newscast on the hour and between records chats anonymously about her family, friends, apartment, and the neighbors' dogs and children. Her voice has a very practical side, however. It has sold such commodities as new and used cars, men's clothes, women's clothes, gasoline, river boat cruises, department store items and ale. When Laura announced a special Mother's Day offer for a florist, his entire supply of special plants was sold out by 9 a.m. Her signature, "Lovingly Yours, Laura," has caught on in Detroit and listeners have given her name to favorite pets. Biggest thrill came when a man and his wife sent her a birth notice. The couple had waited for a taxi and the stork at the same time while they listened to her program. When the stork won, the baby was named for Laura.

The midnight-to-2 segment on WWJ is handled by Johnny King, an old showman and night club m.c. who uses show business for the basis of his between-record comments.

KDAL Duluth

So greatly did KDAL Duluth's audience seem to appreciate the station's first experiments with 24-hour operation and its *Vacationland Calling* program that it continued the plan after the vacation season. Since favorable comment has followed and actual loss is small in carrying the program through the months when there is little sponsorship, management plans to continue.

Decision to begin extra-hour programming came after a long, cold spring in 1950 threatened Minnesota's second greatest industry, the tourist business. KDAL checked schedules of other stations on 610 kc and found only one station, on the Atlantic Coast, operating after midnight. Assured of a big area of audience the station immediately started *Vacationland Calling.*

With Robert Daniels, an expert on fishing and woodcraft, in charge, format consisted of recorded music, time and temperature reports. Detailed descriptions of fishing conditions in Northern Minnesota lakes were given, plus information on camping sites and on the many resorts equipped for tourists. Within two weeks inquiries were received by the Minnesota Arrowhead Assn. and KDAL from 15 states as far south as Texas, and tourists started to arrive. It was estimated 70% of the early tourists on the Gunflint trail reported they had heard the program and became interested in the area.

Advertising during the vacation season has been brisk, much coming from hotels and merchants that profit from the influx of tourists. During the winter all-night filling stations and similar establishments have continued to use the program.

KNUZ Houston

Houston's only 24-hour station, KNUZ, programs its 12 to 5 a.m. segment with *Night Beat,* a music and news record show emceed by Ted Jones and its 5 to 7 a.m. segment with *123 Ranch.* Write-ins and wires prove the popularity of both programs.

Good example of past-midnight

(Continued on page 85)

Frank Taylor is disc jockey for WCKY Cincinnati Nighthawks Club.

ON HAND for signing of contract for Amoco's 10th year of sponsoring the Washington Redskins National Football League games on WMAL-AM-FM-TV Washington were (l to r) Ben Baylor, WMAL assistant general manager; K. H. Berkeley, WMAL vice president-general manager; E. F. Kalkhof, American Oil Co. advertising manager, and Joseph Katz of the Joseph Katz Co., Baltimore, Amoco's agency. In 1943, WMAL fed the games to only one other station. This season outlet will feed 35 other radio stations and six other TV stations.

Advertisers to Meet Disruptions

(Continued from page 23)

the following approaches to the situation:

Best Foods and General Foods, through Benton & Bowles, New York, will be guided by suitable "make good" arrangements. In the case of a participation show, however, they will not consider a spot outside the show as a substitute fill-in. They will agree to retaining the spot in the participation show if the show as a whole is aired at a later or different time.

Spot radio-TV advertisers such as Utica Club Beer, Four-Way Cold Tablets, Lydia Pinkham, Black Draft Beer, Groves Chill Tonic, will accept substitutes, providing the time is first cleared through the agency. If the agency—Harry B. Cohen—does not agree to the new time it would prefer credit.

On the other hand, an executive at Young & Rubicam told B•T that "if the spots do not run as scheduled" its accounts will expect full credit and will not accept substitute time. Among the major spot advertisers that this policy applies to are Lipton Tea, Borden products, General Foods and International Silver.

At the Ted Bates agency, such summer advertisers as Minute Maid Coffee, American Sugar Refining, B & B Mushrooms and Carter products will ask for "credits" unless equally acceptable time is presented, a spokesman told B•T As for Colgate-Palmolive-Peet, at the same agency, no definite plan has yet been formulated but C-P-P usually accepts "make-goods."

At Compton agency, clients such as Standard Coffee and Tea, Hubinger Starch, Goetz Beer and Crisco, will take omission credits during the convention.

Dancer-Fitzgerald-Sample, New York, will also demand credits for its General Mills and Procter & Gamble spot omissions.

BBDO, New York, indicated that it had no firm policy but will leave it entirely to the account to say whether "make goods" or credit would be in order. "We will treat each one individually," a BBDO executive said. Among the agency's accounts which will be affected are Lever Brothers, Breeze, Bromo Seltzer, General Electric, Vick Chemical (TV only), Schaefer Beer, Polaroid Corp. and Johnny Mop.

SSC&B, New York, on behalf of Arrid and Filbert will accept "make-goods" within a reasonable time after the convention sessions but if time is not available shortly it will take credit.

Kenyon & Eckhardt, New York, has advised station representatives that the agency would like "make good" offers wherever possible for Kellogg Co. Agency will take "make goods" instead of credit where possible. Amazo Desserts are also using "make goods" in some cases and taking credits in others.

Cunningham & Walsh, New York, for Chesterfield Cigarettes will accept substitute time providing the "make good" is comparable to the original time scheduled—for example, before and after the convention.

Scheideler, Beck & Werner, New York, expects to take credit in most cases, unless the "make good" is so attractive that it can't be turned down. Agency summer spot accounts are Muellers Products, Sterling Salt and A-1 Sauce.

WISMER QUITS

Redskins for N. Y. Giants

AFTER a nine-year association as radio-TV commentator with the Washington Redskins professional football team, Harry Wismer has resigned and will do the telecasts of the New York Giants' football games this fall, Jack Mara, Giants president announced last week.

Mr. Wismer, an MBS vice president, handles five shows a week from New York and gave this as the reason for making the change. Marty Glickman will continue to call the Giants' plays on radio.

Pre-Convention Radio-TV Developments

Spivak, Rountree Set Series; Expand 'Meet the Press'

LAWRENCE E. SPIVAK and Martha Rountree, owner-producers of *Meet the Press* and *Keep Posted* programs, will launch a new half-hour TV show, *Nation's News Conference* in a special pre-convention series on NBC-TV, starting July 1 (7 p.m.). Current plans call for the program to be telecast frequently during the conventions.

Meanwhile the owner-producers will present special full-hour *Meet the Press* shows on NBC-TV interviewing all leading candidates for the nomination on the nights before the Republican and Democratic conventions (July 6 and 20, 7-8 p.m.). These special pre-convention programs, double the usual length of *Meet the Press*, will originate in NBC-TV convention coverage headquarters in Chicago. Show is sponsored by Revere Copper & Brass Inc., through St. George & Keyes, New York.

★ ★ ★

CBS Radio Series to Trace Convention Strategy

TO advise listeners when and where to expect the strategic moves at the Republican and Democratic national conventions, CBS Radio will broadcast a five-day series, *You and the Political Conventions*, June 30-July 4 at 6:15-6:30 p.m. Wells Church, CBS Radio director of news and public affairs, and CBS Radio newsmen Charles Collingwood, Griffing Bancroft, Eric Sevareid and Bill Shadel will be heard on the series, with Dwight Cooke as host.

★ ★ ★

GOP Film Unit Moves To Chicago July 7

REPUBLICAN National Committee is planning to move its TV film equipment to Chicago with the idea of "shooting" Republican Senators and House members on the floor of the convention which opens July 7.

Sixteen-millimeter films will be processed in Chicago and airmailed to the Congressmen's local TV stations without cost. Idea is to insert the 3½-5 minute clips during dull moments of networks' coverage of convention.

Plan is dependent on acceptances from TV stations. Managers who desire the service can write to Ken Adams, director of TV films, Republican National Committee TV Studio, 210 First St., S. E., Washington.

Studio produces six to eight programs a week. Programs run from 9½ to 13½ minutes. Studio includes an Auricon film camera and associated equipment, it was noted by party spokesman in setting convention plans.

Eastman-Kodak Plans Rapid Processing in Chicago

RAPID processing for 16mm Cine-Kodak film at its Chicago Processing Lab. in connection with film coverage of the national political conventions was announced last week by Eastman Kodak Co. There will be no extra charge for the special service during the conventions, it was added.

The company suggested that M. D. Francis, Eastman Kodak Co., 1712 Prairie Ave., Chicago, 16, be notified of intentions to use the laboratory facilities. The laboratory will remain open on weekends for prompt processing.

★ ★ ★

Convention Conduct to Change Because of TV—India Edwards

POLITICAL conventions next month in Chicago will be tailored especially for television, with demonstrations cut down in order to hold the attention of televiewers, India Edwards, vice chairman of the Democratic National Committee, said last week.

In a speech prepared for delivery Saturday before the Sixth Annual Political Institute of the New York State committee's Youth Division at Hobart College in Geneva, N. Y., Mrs. Edwards noted that "continuous TV coverage will cause more complications than are immediately apparent." She warned that TV cameras could catch delegates in situations not calculated to impress home audiences.

Television now has a "new secret weapon," the Zoomar or telescopic lens, that could focus on delegates without warning. "I suspect the men will have to watch their shaves and women their lipstick a little more closely this year," she added.

Mrs. Edwards also used TV as projection board for favoring national conventions — "the biggest political show on earth"—over national Presidential primaries because of color and drama.

FELLOWS AT AWRT

Stresses Vote Messages

SUPPORT of the drive to bring out voters in the Presidential election was asked by NARTB President Harold E. Fellows in a June 20 address to the New England chapter of American Women in Radio & Television at the Hotel Statler, Boston.

Women in radio and TV can play a great part in the campaign, Mr. Fellows said, "because as a group you talk to more women than any other single professional group in the action. You have, therefore, special obligations in the field of citizenship."

NARTB currently is conducting a "Get Out the Vote" campaign.

More Samples from the WHO Mailbag

Dear Mr. Shelley:

These few lines are just a "Thank You" note for the article concerning our son, Robert, which you received and so kindly sent on to us. I had thought of writing to you for this but didn't know whether you kept these articles on file or destroyed them after they were used. Bob is our only son and has been over in Korea since the beginning of the War.

And since I've never had any special reason for writing to WHO before I'm going to take this opportunity to tell you how much our family enjoys your station and it's the station most often listened to in our home. We can even tell when a strange announcer's voice is heard. We enjoy all your entertainment and what I wouldn't give to be able to play the piano like Bill Austin, sing like the "Chore Gang" and that guy, Gene Godt and his witticism. I'll bet his wife could choke him sometimes. We even like the chuckles he provokes from the fellows in the studio. To make a long story short we just enjoy all of WHO. Only one thing that we haven't heard for a long time that we enjoyed a great deal, Jack Kerrigan's singing. The last we heard of him he was in the office, too.

My "Thank You" has gotten quite lengthy but did want you to know how much we appreciated your thoughtfulness.

Mr. & Mrs. Thos. McClelland
Madrid, Ia.

Dear Mr. Loyet:

This letter is to express the appreciation of the Iowa Milk Dealers Association and Association of Ice Cream Manufacturers of Iowa for the fine program conducted by Herb Plambeck on your Radio Station WHO.

We appreciate the fact that Mr. Plambeck evidently took a considerable amount of time to make a study of our industry which was so interesting and so capably explained during his broadcast Wednesday morning, May 17th.

Thanks again for the splendid cooperation your Radio Station has given the Iowa Industry.

John H. Brockway
Executive Secretary
Association of Ice Cream Manufacturers
Des Moines, Iowa

Dear Sirs:

This is to tell you how high we rate WHO above all other stations especially for News. We left our home at Greene, Ia. last June & have been in Miss., Montana, Wash., Oreg., Calif., full length, then here in very south of Texas. We couldn't get you on the West Coast & surely were delighted to hear you here. We heard the basket ball broadcasts & scores on billboard often & were on the night our Marble Rock won over Allison to take tournament. Many Iowans here & all are anxious for the weather items at 10:15 P.M. often cold there & 92° here during day. This is a nice place. Very pretty country —

Mr. and Mrs. Galen R. Gates
Val Verde Motel, Dorma, Texas

To WHO-all!

I am determined to write you a letter right now, and do you s'pose I can find any paper?

But I just wanted to greet each and every one of you and thank you for the joy you have given us this past year thru WHO!!

Herb Plambeck, Gene Godt — oh what a kick I get out of your humorous episodes! We *sure* enjoyed the WHO kids' hour Saturday! Bud Hovland & Lucia congrats on baby! Jack Shelly — Song fellows — We *love* you! In fact we love *all* of you down there.

From all of us
Samuel (11)
Karl (10)
Peter (9)
Tom (8)
Miriam (4)
Knute (11 mo.)
Olaf & Bernice Watne
Galt, Iowa

Dear Mr. Shelley:

I wish to express my appreciation for the emergency broadcast announced by your station today on the 12:30 News to locate me. My family had been trying since last night to reach me to inform me of the death of a member of my family.

A friend in Marshalltown heard the broadcast and told me on my arrival there this afternoon. Many thanks for your trouble and kindness.

Yours very truly,
L. R. Binder
Des Moines, Iowa

Gentlemen:

This is a note of appreciation in behalf of the thirty-eight churches in the Presbytery of Des Moines for airing the Presbyterian News of our General Assembly meeting at Cincinnati, Ohio.

We wish to thank the sponsors of the Lowell Thomas program for relinquishing their time so that the more than 9800 members of our denomination in this presbytery might have the opportunity of hearing the highlights of the Assembly.

Sincerely yours,
Harold S. Gilleney
Stated Clerk
Presbyterian Church in the U.S.A.
Presbytery of Des Moines

As a sophisticated, big-city advertising man, it may be difficult for you to realize what WHO *means* in Iowa Plus.

Day in and day out, our mailbags are jammed with personal letters of friendship and confidence — "stamp-of-approval" evidence, from *your customers,* that WHO is giving a unique radio service to the millions of people in Iowa Plus.

REPRESENTED BY RAYMER

Meeting the Crisis

(Continued from page 27)

tion of under-the-counter deals even though such an attitude might mean temporary loss of some business, it was contended.

George B. Storer of the Storer Broadcasting Co., one of the principal initiators of the July 1-2 conference, was named chairman for the July 1 meeting, which will be confined to the affiliates themselves. Victor A. Sholis, of WHAS-AM-TV Louisville, is slated to deliver the "keynote" address at the opening session. CBS officials will participate in the July 2 conferences. Top executives are expected to be on hand, headed by Board Chairman William S. Paley, President Frank Stanton, and CBS Radio President Adrian Murphy.

The steering committee in its Detroit session rejected a request of the National Assn. of Radio and Television Station Representatives that NARTSR be permitted to take part in the July 1-2 sessions, to be held at the Ambassador Hotel, New York. The rejection, it was reported, was based solely on the belief that in these meetings the discussions would be more fruitful if participation is confined to the affiliates and the network alone.

Steering Committee

Steering committee members at the meeting were Messrs. Storer and Sholis; William Quarton, WMT Cedar Rapids; John E. Fetzer, WKZO Kalamazoo; Hulbert Taft, WKRC Cincinnati, and John F. Patt, WGAR Cleveland and WJR Detroit. Members unable to attend were Kenyon Brown, KWFT Wichita Falls, Tex.; Saul Haas, KIRO Seattle, and Ray Herndon, KTRH Houston.

In the discussion of rates, it was understood, there was some feeling that reductions may be justified in some cases, though this feeling was not shared by all members. Those who did indicate such a view, however, maintained that any reductions that might be made should be decided upon only on a case-by-case basis.

CBS Radio also was said to have come in for criticism for its renegotiation of affiliation contracts to obtain the right to change affiliates' network rates virtually at a moments notice. Affiliates felt the network originally asked for this contract change so that it would be able to adjust quickly in case some other network reduced rates, and not for the purpose—which some affiliates now apparently suspect—of initiating a round of cuts itself.

Population Rises

TOTAL population of the United States was approximately 156,602,000 as of May 1, 1952, according to Roy V. Peel, director of the Census Bureau. This figure, which includes armed forces overseas, is 3.6%, or 5,469,000 persons, above the April 1950 total.

RADIO-TV HEALTH

McDaniel Notes Growth

PUBLIC confidence in advertising has permitted the "healthy growth and development of both radio and television broadcasting" which in turn have been responsible for the growth of the set manufacturing industry, Glen McDaniel, president of Radio-Television Mfrs. Assn., told the annual conference of the Assn. of Better Business Bureau, Friday at Swampscott, Mass.

Advertising, to be effective, must be honest, he said, adding that the economic soundness of many broadcasting operations would be imperiled if the public were to lose confidence in the advertising it sees and hears.

RTMA is encouraging and promoting improved ethical trade practices, Mr. McDaniel said, referring to current negotiations with Federal Trade Commission to expand the radio trade practice code to include television. He predicted the new code would contain clauses on color TV, adaptors for UHF, size of viewing screen and effectiveness of antennas.

Since the formation of RTMA in 1924, he said, only one case involving an FTC order against advertising of radio or TV sets has come to the federal courts, and this involved technical questions. He cited factors in TV set advertising, such as erratic behavior of electromagnetic waves.

At the same time, Mr. McDaniel said, radio set makers are entitled to indulge in time-honored "puffing" practices and cannot be expected to dwell on adverse or derogatory factors in advertisements.

Description of picture tube areas and diameters presents a special problem, he said.

Mr. McDaniel said RTMA's engineering standardization work has eliminated much public confusion.

D.C. BOXING BILL

Set for Senate Debate

BOXING COMMISSION for the District of Columbia will be cut in for 10% of any income from the sale of radio-TV and motion picture rights, as well as from general admissions if the Senate approves a House-passed bill (HR 5768) reported favorably last week by the Senate District Committee.

Bill was scheduled for Senate debate Saturday (June 21). It is based on the fact that the D. C. Boxing Commission does not have the power to collect a percentage of gross income, only of admissions. It was passed by the House last month.

In a letter to the Congress in 1951, former president of the D. C. Board of Commissioners John Russell Young stated that the impact of TV on the income of the local Boxing Commission has been "disastrous." He cited figures showing that the Boxing Commission's income has slumped from a high of $37,900 in 1944 to $13,031 in 1950 and $12,548 in 1951.

House Passes McFarland Bill

(Continued from page 25)

vitation to a foul, dirty, vilifying campaign over the radio."

And Rep. George A. Dondero (R-Mich.) added: "I think the amendment . . . is an invitation for the lowest kind of a political campaign."

Mr. Hoffman's interest in the amendment stemmed from his concern over the technicalities of legal service for damages against defamation when uttered over the air. He has pending a bill to make liable the speaker who broadcasts defamation in the district in which the victim resides or where the defamation is heard.

References to discrimination against newspapers if radio stations are absolved of liability for defamation were answered by spokesmen for the amendment who pointed out that stations are licensed, that they are required to give equal treatment to political candidates and that they are forbidden to censor such speeches.

Potent support for the Horan amendment was furnished by Rep. John W. McCormack (D-Mass.), the House Majority Leader. He also led the fight for inclusion of the section prohibiting stations from charging candidates more than comparable commercial rates. He said:

Certainly, if we are going to do anything now about proper and justifiable protection of men and women who aspire to public office in the use of radio stations and television stations, now is the time to see that we are not charged more than the minimum commercial rate charged to others.

Mr. McCormack's sentiments were echoed by other House members.

Discrimination Point Debated

Import of the provision forbidding the FCC to discriminate against newspaper applicants aroused the greatest amount of debate.

Rep. Harris, was asked repeatedly whether the provision might be construed to hamstring the FCC from deciding against a newspaper applicant if a grant meant monopoly of the means of news dissemination.

Time and again, Mr. Harris and other members of the House Interstate & Foreign Commerce Committee answered that it did not—that if the Commission determined that a grant to a newspaper applicant might unduly concentrate the media of communications, it could decide against such a grant.

"If there is a question of monopoly involved, where you have two applicants, then certainly the Commission could not say that it would be in the public convenience and necessity to give it to a station that would bring about a monopoly in this field," Mr. Harris asserted.

Exact meaning of the provision, in this light, was given by Rep. Priest, House Majority Whip and author of the provision:

I am just as strongly opposed as any member of the House to any proposition that would authorize and establish or encourage a monopoly of newsgathering and news-disseminating agencies in a community . . . [But] I feel that simply because an individual is a publisher of a newspaper, and applies for a license to operate a radio or television station, there should not in a sense be two strikes against him to begin with . . . The public interest must always be paramount. I do not believe that the public is best served by granting a monopoly to newsgathering or news-disseminating agencies.

Rep. Harris, in answer to other questions, emphasized that: "It was in no way to give any preference to newspaper applicants" that the provision was recommended.

Speaking enthusiastically for the amendment was Ohio publisher Rep. Clarence J. Brown (R.) He warned:

I say to you that if the FCC, through an arbitrary ruling, can say an American citizen who happens to have an interest in a newspaper or magazine, or who is engaged in the publishing business, shall be considered unfit to receive a radio or television license, then just as easily the Commission might rule that if a man has red hair he shall be considered unfit to own a radio station or to engage in television, or the Commission can say, if you please, that if a man belongs to the Methodist Church or the Catholic Church he shall be barred from radio and television.

Similar sentiments were voiced by the Republican Minority Leader, Rep. James W. Martin Jr. (Mass.), also a newspaper publisher.

Clarifying questions were asked by Rep. Clinton D. McKinnon (D-Calif.), former owner of KCBQ and the *San Diego Journal*.

Mr. McKinnon pleaded for additional funds for the FCC: "Congress, I think, sometimes has been penny-wise and pound-foolish in not providing the FCC with sufficient funds to operate efficiently and with good speed, and as a result of that we have denied a lot of people the right to be in business who would otherwise be serving the public and making tax money for Uncle Sam."

FCC Legal Staff Scored

FCC's legal staff came in for castigating, as did some former FCC charimen, by Rep. Eugene E. Cox (D-Ga.), long-time baiter of the Commission. He urged the adoption of a provision to forbid practicing before the FCC for one year following resignation of commissioners and key staffmen. This provision was in the Senate version, but is not in the House bill.

After relating the history of recent chairmen of the Commission, Rep. Cox declared, "I am told that the process of washing it out is very rapidly going forward."

In Mr. Harris' description of the bill, which he revealed had been under executive consideration by House Interstate & Foreign Commerce Committee for 23 days following the close of hearings, he pointed out that most "vital" portion related to separation of staff from commissioners. He said:

The committee [House Interstate & Foreign Commerce Committee] believes that this will have a very salutary effect on the operations of the Commission and will make it act in a manner similar to that of a court in these contested proceedings . . . The committee regards this particular provision of the bill as of vital importance in guaranteeing fair and open hearings in cases involving applications for licenses.

Matter of requiring stations to tape-record all programs was brought up by Rep. Albert P. Morano (R-Conn.). He referred to the WMCA-Barry Gray situation last year when it was alleged the New York disc jockey had "ad libbed" criticisms of a column in the *Greenwich* (Conn.) *Times* [B•T, Oct. 29, 1951]. Attempts by the editor of the newspaper to ascertain what was said were fruitless, it was said, because the station had no tape recording of Mr. Gray's remarks.

Reason for the inclusion of the provision requiring a successful applicant to purchase the equipment of the unsuccessful applicant, where the latter is a licensee, was given by Rep. Carl Hinshaw (R-Calif.) in answer to a question by Rep. James G. Donovan (D-N. Y.).

He said FCC granted WJKS Gary, Ind., which deleted WPCC and WIBO Chicago through no fault of the latter. Subsequently, the Supreme Court upheld the right of the FCC to act in this manner in 1933, Mr. Hinshaw said.

ABC AGAIN ASKS
Denial of KOB Requests

ABC on Tuesday petitioned the FCC again to dismiss pending applications of KOB-AM-TV Albuquerque for modification of permit and license to operate KOB on 770 kc. ABC's WJZ New York is the clear channel outlet assigned 770 kc.

The ABC petition for dismissal of KOB's application for transfer of ownership from T. M. Pepperday to Time Inc. and Wayne Coy was refused by FCC on May 28 [B•T, June 2], the transfer permit was granted and the FCC was notified June 13 that the transfer transaction had been made.

ABC based its new petition on Paragraph 4 of the FCC memorandum opinion and order of May 28 granting permission for the KOB sale. The paragraph stated in part that "whether the Albuquerque applications should be dismissed is not properly before us at this time since, as a matter of law, we cannot say that the corporate licensee is now owned by new parties. We therefore must deny that portion of the petition seeking dismissal of the pending Albuquerque applications and we do so without passing upon whether, in the event the transfer is consummated, those applications would be dismissed by us."

The ABC petition Tuesday stated KOB had been given 11 years of special service authorizations for "temporary" operation on 770 kc. In its memorandum opinion May 28, the FCC conditioned its approval for the transfer to whatever action the Commission may take to carry out the mandate of the U. S. Court of Appeals to reconsider KOB's status on 770 kc.

This oft-repeated scene has become a tradition between Clothier H. V. Holmes and KTUL Account Executive R. P. (Bud) Akin. For the 19th consecutive year, these two men have swapped signatures on KTUL advertising contracts. The satisfaction is obviously mutual.

'MORALS' PROBE

Industry Prepares for 'Day in Court'

MORAL tone of radio-TV programs will be defended June 25 and 26 when broadcast representatives appear before the Harris subcommittee investigating "immorality" and "offensiveness" on radio and television [B•T, June 16, 9].

The right of broadcasters to self-regulate themselves is also expected to be urged when NARTB and network officials take the stand before the House subcommittee, headed by Rep. Oren Harris (D-Ark.).

Committee was set up under a resolution by Rep. E. C. Gathings (D-Ark.) which authorized a probe of radio-TV programs.

Expected to be the first industry witness is John E. Fetzer, chairman of the NARTB Television Code Review Board. Mr. Fetzer is owner-operator of WKZO-AM-TV Kalamazoo and WJEF-AM-FM Grand Rapids, Mich.

Other NARTB witnesses will be Harold Fellows, president; Thad H. Brown, TV director, and Ralph Hardy, government relations director.

CBS is scheduled to be represented by Jack Van Volkenburg, president of CBS Television; NBC by Charles R. Denny Jr., executive vice president.

Gordon P. Brown, WSAY Rochester, N. Y., who proposes to set up American Assn. of Affiliated & Independent Radio & Television Broadcasters to take advantage of the FCC's rebroadcast rule, has requested a chance to testify following NARTB's appearance. His topic would be radio monopolies and network influence on the type and character of programs as well as FCC's past views on networks.

Brewers Foundation also is expected to have a witness testify in rebuttal to complaints of temperance leaders that beer and wine ads are blatant and repetitive.

A subsequent session will be scheduled for FCC officials, it is understood. The Commission already has furnished the subcommittee with a breakdown of complaints in its files.

In the *Congressional Record* for June 18, Rep. Joseph R. Bryson (D-S. C.) inserted an editorial by *Memphis Press-Scimitar's* editor Edward J. Meeman. *Memphis Press-Scimitar* is affiliated with WMC, WMCF (FM) and WMCT (TV) in Memphis and through Scripps-Howard Radio Inc. with WCPO-AM-FM-TV Cincinnati, WEWS (TV) Cleveland and KNOX Knoxville.

Mr. Meeman's editorial took advertisers to task for appealing to the "common denominator . . . [which] is pretty common."

This is how Mr. Meeman reasoned: "In choosing programs the advertisers are motivated by these desires: (1) to get the attention of the largest possible number of viewers (2) to persuade them to buy their goods (3) to get the viewers to think well of the company which offers the product." Mr. Meeman did not think the last factor looms large in the advertiser's mind these days.

After reciting the great potentialities of TV, Mr. Meeman closed with these words: "We are allowing the tremendous influence of television to be shaped by the desire for entertainment and the gratifying of our whims.

"Not only is there too much entertainment, but too much of it is provided by the same source as provide entertainment for night clubs and the sophisticated Broadway theatre, and it isn't suited for the family at all."

When Rep. Gathings sponsored the investigation of radio-TV programs, he also asked for a probe of pornography in books, magazines and comics.

This week, the special committee to study the morals of printed media was tentatively given $25,000 by a House Administration subcommittee. The sum must still be approved by the full committee and then by the House.

Appointed to the special committee, which Mr. Gathings heads, were Democratic Reps. Reva Beck Bosone (Utah), Emanuel Celler (N.Y.), Francis E. Walter (Pa.), George P. Miller (Calif.) and Republican Reps. Edward H. Rees (Kan.), Louis E. Graham (Pa.), Katherine St. George (N.Y.) and Carroll D. Kearns (Pa.).

TRIAL EXAMINERS

Celler Urges 'Quality'

CALL for "high quality decisions, concisely reasoned and expeditiously rendered" was made by Rep. Emanuel Celler (D-N. Y.) in a speech before the Federal Trial Examiners Conference annual dinner in Washington two weeks ago.

Discussing the Administrative Procedure Act, which set hearing officers apart from the agencies in which they work, Mr. Celler said:

We are interested in the maintenance of complete independence and freedom of decision on the part of the administrative hearing officer. We owe an obligation to the people who are subject to prosecution or those whose investments in radio, television, airlines, railroads, motor carriers or securities are daily subject to regulation and adjudication by administrative agencies to insure that these agencies do not control the decision of their hearing officers either by hope of reward through selective promotion, or through imposition of sanctions by discriminatory assignment of cases, or, worse, through arbitrary budget manipulation so as to cause reduction in the trial examiner force. . . .

It is important that the litigating agency not be in a position to influence the trial examiner functions. . . .

Mr. Celler, who is chairman of the House Judiciary Committee, also made a plea for reasonable haste in decisions:

Justice before the heavily burdened administrative agencies often depends upon the rendition of a final decision within a reasonably short time. The applicant for a television license or an airline route who must wait five years or more before the ultimate result is known may not be able to earmark his resources for such a period. Delay in processing always favors the "haves" . . . [not] the "havenots."

ABC PROGRAMS

Summer Changes Announced

DETAILS of ABC radio's summer program format re-alignment, highlighted by a two-hour mid-afternoon block of hillbilly music and commentary effective June 30 [B•T, June 16], were announced last week by Leonard Reeg, vice president for radio programs.

Evening lineup changes will bring *The Mayor of Times Square*, featuring band leader Vincent Lopez, into the 8-8:30 p.m. EDT Tuesday spot beginning tomorrow (Tuesday) and a weekly half-hour of sentimental songs in the 8:30-9 p.m. Wednesday period under the title, *Valentino*, starting July 2.

Postmark U. S. A. moved into the 8-8:30 p.m. Wednesday slot last week, featuring Jimmy Blaine in a new type audience participation show, and *Summer Cruise*, a program of light classical and musical comedy music was to take over the Friday 9:30-10 p.m. period. *Masquerade*, another light musical program, is to start July 6 in the Sunday 9:15-9:45 p.m. spot.

Mr. Broadway, described as "a latter-day counterpart" of O. Henry will be presented Thursday 8-8:30 p.m. beginning July 10.

Afternoon programming for youngsters will start at 5 p.m., with *Big Jon and Sparkie* from 5-5:30, followed by *Fun Factory* in the 5:30-5:50 p.m. slot. *World Flight Reporter* will be heard at 5:50-5:55 and a sportscast featuring Frankie Frisch will be aired from 5:55-6 p.m.

Mid-afternoon programming will offer a sustaining hillbilly musical program with Tennessee Ernie from 2:30-4 p.m. Monday-through-Friday. The following half-hour, featuring commentator Cal Tinney, will be sponsored by General Mills (Monday - Friday). Additionally, General Mills for Pura Snow, Rex and other products, will sponsor *The Bill Ring Show*, new 15-minute program of western and country-style music, in the 12:30-12:45 p.m., EDT time slot, effective June 30.

Rounding out the afternoon, the network will present pianist Ronnie Kemper from 4:30-4:45 p.m., followed by news commentator Dean Cameron, from 4:45-5 p.m.

Coincident with its new afternoon programming, the network will offer, effective June 30, a new forenoon series, *Top of the World*, featuring Tom Reddy as commentator, 11:15-11:30 a.m., EDT.

Willson Radio-TV Plan

WHAT is believed to be the first comprehensive television spot campaign in the sun glasses industry is being inaugurated by Willson Products Inc., Reading, Pa., and will include radio and TV during the summer months, covering 20 major markets on TV immediately before the Fourth of July and participating in *Stop the Music* jackpots on ABC radio network, 8 p.m. Sunday. Agency is Beaumont, Heller & Sperling Inc., Reading.

where are these 24 million listeners?

Now, for the first time, timebuyers will know where are the 24,000,000 car radios . . .

THE 1952 BROADCASTING-TELECASTING MARKETBOOK

will contain a county-by-county listing of automotive registrations. This is the information that buyers have requested. These are the figures that key radio research men have said will be used throughout the year.*

Automotive listening has become a basic part of *total* radio circulation. Automotive listening is big. Automotive listening is adult. Automotive listening today is an important factor in buying and selling radio time.

The big push is on out-of-home and automotive listening. Hook your promotion to a car–24,000,000 of them. Put your sales into high gear and reserve space in

THE 1952 BROADCASTING-TELECASTING Marketbook *today!*

*These facts are also to be included in the 1952 Marketbook that will be used throughout the year:

Spot Rate Finder • Radio Homes • Foreign Language Markets • State Maps • and other features

RELAX RULES

Md.-D. C. Group Endorses

PROPOSED relaxing of its operator requirements rules by FCC [B•T, June 9] was endorsed by the Maryland-District of Columbia Broadcasters Assn. at its June 13-14 meeting at Ocean City, Md. The association adopted a resolution approving the plan, long advocated by NARTB.

Next meeting of the group will be held in November at Baltimore. Jack Surrick, WFBR Baltimore, association president, presided at the weekend sessions [B•T, June 16].

In a sales clinic, John S. Hayes, WTOP Washington, laid down five rules for sale of time to retailers, explaining that retailing is the only major industry in Washington aside from the government.

First, Mr. Hayes said, the station must understand the retailer's selling problems, including items to be sold, type of customer to be reached, locale, and appropriate media.

Second, he continued, the retailer must be indoctrinated with knowledge of the radio medium since he is newspaper conscious and his advertising employes are generally newspaper-trained. "I think you will find that any time you invest personally in simply discussing radio, the makeup of radio audience, the intricacies of radio research, and tricks of radio copy and presentation with every retailer with whom you come in contact, will in the long run pay dividends."

Community Action Urged

Mr. Hayes urged stations to be active in community affairs, so the community-minded retailers will think of the broadcaster when he has a sales problem. Fourth, he said, the account must be well serviced since retailing is a day-by-day operation and the retailer expects a day-to-day interest in his radio advertising.

Retailers are bound to find out what you charge for your facilities, he added, urging that time be sold by the rate card.

William T. Stubblefield, NARTB station relations director, discussed future trends in broadcasting and telecasting at the closing luncheon session. A check of transmitter manufacturers, he said, indicated that no UHF transmitters are in production.

Attending the two-day meeting were E. K. Jett, WMAR (TV) Baltimore; Mr. Surrick; Charles E. Smith, WTBO Cumberland, secretary-treasurer; Charles J. Truitt, WBOC Salisbury, vice president; Mr. Hayes; Ed Gross, Sydney Hollander Co.; R. C. Embrey, WITH Baltimore; William Cochran, DuMont; Frank Stearns, Associated Press; Norman Reed, Herman M. Paris, WWDC Washington; H. B. Cahan, WAAM (TV) Baltimore; E. S. Clammer, R. L. Haeseler, RCA; Bert Hanauer, WFBR Baltimore; Rudy Frank, Frank King, WELI New Haven, Conn.; Ed Tracy, RCA; Frank Barnes, William Cody, General Electric Co.; FCC Comr. George E. Sterling; Leslie H. Ryan, Broadcast Advertising Bureau; Roy H. Knotts, WCUM Cumberland.

BOARDWALK GROUP at the Maryland-D. C. association session, held at Ocean City, Md. (l to r): Jack Surrick, WFBR Baltimore, president; Joseph L. Brechner, manager, WGAY Silver Spring; Herman M. Paris, WWDC Washington; FCC Comr. George E. Sterling; Charles E. Smith, WTBO Cumberland.

NABET WRITERS

May Strike in Chicago

ABC and NBC Chicago have been notified staff newswriters, members of the National Assn. of Broadcast Engineers and Technicians (CIO), will strike if contract negotiation agreement has not been reached July 1.

The news writers, who recently bolted from Radio Writers Guild (independent) to affiliate with the engineers union, seek $130 weekly for staff writers employed more than one year, $110 weekly for beginners, name credits on commercial shows and commercial fees, as well as a one-year instead of a five-year escalator.

Under terms of the old RWG contract, which expired May 31, beginners received $325 monthly with a maximum of $500 over a five-year period. Companies reportedly have offered to raise the minimum to $350 and the maximum to $530.

George Smith, president of the Chicago local, is representing the newsmen, five at ABC and eight at NBC. WBBM (CBS) and WGN (Mutual) are excluded because they do not belong to NABET. Attorneys Walt Emerson and Tom Compere represent ABC and NBC, respectively.

TSN's 20th Affiliate

KTTB Tyler, Tex., on June 29 will become the 20th affiliate station of the Texas State Network, according to Gene L. Cagle, TSN president.

CRIME HEARINGS

Chicago Okays Some Casts

MAJORITY of Chicago City Council's nine-man Emergency Crime Committee last week voted to permit broadcasting and telecasting of committee hearings, which have been opened to the public. Still banned to broadcast newsmen, however, are the more informative and colorful sessions in which subpoenaed witnesses will testify in the campaign to rid the city of crime. First meeting open to radio-TV newsmen is July 14, when committee policies and procedures will be set.

Although one broadcast concession has been made by the council, bigger ones are sought by militant newsmen, including Bill Ray, news director at NBC who formerly headed the Freedom of Information Committee of the National Assn. of Radio News Directors, and Sigma Delta Chi, professional journalism fraternity. They protest discrimination in favor of newspapers.

The council's closed-door stand on broadcasting presumably is based on a declaration by members of the Chicago Bar Assn., who say witnesses can object to radio and TV on constitutional grounds.

HOWARD FIRM

Is Formed in New York

FORMATION of Sandy Howard Productions, New York, television and radio packaging firm, was announced early last week by Sandy Howard, president. Company is located at 152 W. 42nd St., New York, 36. Telephone: Bryant 9-6286.

As its initial project, the new firm has taken over complete production of WOR-TV New York's daytime children's show *The Merry Mailman*, starring Ray Heatherton. Under terms of contract with station, SHP will also handle promotion, publicity, sales, and act as licensee on profit-sharing basis for merchandising the program. Additionally, SHP has been authorized by WOR-TV to handle production of the new *Dave Elman's Curiosity Shop* (WOR-TV, Sunday, 8-8:30 P.M. EDT).

From where I sit
by Joe Marsh

Well, What Do You Know?

Do you believe in a bunch of old tales about lightning—about how it's attracted by cats or the warmth of cattle . . . how it never strikes in the same place twice . . . or how it's liable to turn milk sour? Lots of people often do—but they're wrong.

Dad Hawkins inspired this column today. He's really studied up on lightning since his own cow barn was struck that time.

"Trouble is, most of us don't know half enough about the subject," Dad says. "And about half of what we *do* know is false!"

From where I sit, Dad's statement applies to a lot of things besides lightning. Too many people think they know their neighbor's wrong when he votes for his candidate instead of theirs. Some people even resent our right to enjoy a friendly glass of beer if and when we choose. Opinions based on misinformation and prejudice, instead of being "grounded" on true facts can cause more damage than lightning ever did.

Joe Marsh

Strictly Business

(Continued from page 20)

as a public speaker, often in the person of the "Rhode Island Historian," the radio character he created. Once he addressed an Indian pow-wow. He has produced outstanding documentary films, in addition to many TV public service sequences.

For the past 25 years Mr. Haley also has written, produced and been featured in an annual Christmas radio program for the Outlet Co., owners of WJAR-AM-FM-TV Providence. This dramatization of religious and Yuletide themes has been such a high spot of southern New England broadcasting that a juvenile mail response to this special feature exceeded 25,000 as far back as 1929.

Under Mr. Haley's supervision, Narragansett Brewery at present co-sponsors Red Sox broadcasts and telecasts, with a 31 radio station network and three TV station hookups (WBZ-TV WNAC-TV Boston and WJAR-TV), plus heavy spot schedules regionally and live weekly sports show over WNHC-TV New Haven.

Other Public Activities

He has served as chairman of the New York World Fair Commission for Rhode Island. He is an active member of the Rhode Island Historical Society and American Legion, and during World War II was chairman of the Aviation Cadet Committee.

He is director of the Rhode Island Cancer Society and the Nickerson Settlement House. He is a member of the corporation of the Rhode Island Hospital, Butler Hospital, Roger Williams General Hospital and the Rhode Island District Nursing Assn.

With his wife, Beatrice, he lives on Blackstone Blvd., Providence. The Haleys have four children—John Jr., who is in the advertising and printing business; Nancy, a registered nurse, now Mrs. Alexander G. Lyle Jr.; Jane and Ann, twin daughters, 19, who recently were graduated from Southern Seminary, Buena Vista, Va.—and four grandchildren, whom Mr. Haley says are "naturals" for radio careers.

SINGLE RATE

WMDN Begins New Policy

WMDN Midland, Mich., last week announced a new single rate policy for national and local accounts during all hours.

Joseph A. Sturgeon, WMDN general manager and news director, said that studies and tests "satisfied me that all time was equally valuable, and that local stations could and did hold their audiences with the right programming. And the advertiser could expect returns on his advertising dollar in proportion to the placing of his messages at the proper times."

Gee I Want to Hear . . .

GIs in England are soon to hear a recorded tape taken directly off the air from WSPD Toledo. Cpl. Frank Roach, native Toledoan, wrote to WSPD, requesting a "recording of several of your programs—and include the commercials. Here in England, radio just isn't the same—or as good—and we're homesick for American radio and commercials." In response, WSPD taped segments of the noon newscast featuring Jim Uebelhart; the *Sidewalk Interview* program of John Saunders, and of *Petticoat Partyline*, a disc jockey show m. c.'d by Emerson Kimble.

MULTIPLE SETS

Double One-Radio Homes

THERE are twice as many multiple-set radio homes (66.1%) as there are single-set homes (33.9%), according to "Extra Sets," a brochure released last week by BAB.

Reporting on a survey of 5,000 families in 20 metropolitan areas conducted last January by Pulse Inc. covering the number of radios and their location in the home, "Extra Sets" reveals:

"There are more families with two radios (37.1%) than with one radio (33.9%) and nearly as many families with three or more radios (29.0%) as there are with one radio. More than one home in ten (10.8%) now has four or more radios.

"Today's radio family is a two-radio family." On the average, each family would own 2.11 radios.

"Radio-television homes have more radio sets than radio-only homes"—2.34 to 1.87.

Other findings of the BAB-financed study indicate ownership of extra sets tends to parallel the family's economic status, that there are more radios outside living rooms than in them, with roughly half of all radio homes having sets in bedroom and kitchen, and that the distribution of sets in TV homes is "significantly different" than in radio-only homes.

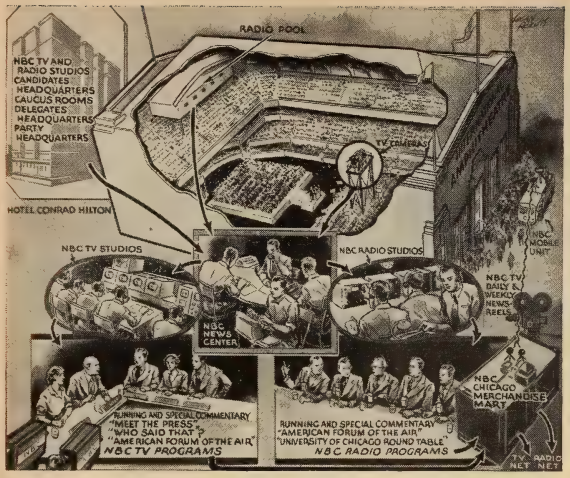
The survey did not count auto radios nor sets not in regular use in the home.

The brochure was announced Monday by Kevin B. Sweeney, BAB vice president, at a BAB sales clinic at Philadelphia's Barclay Hotel, attended by 85 management and sales representatives of member stations in eastern Pennsylvania. Another BAB clinic was held Thursday at the Hotel Statler in Washington, D. C., and a third Friday at the Jefferson Hotel, Richmond.

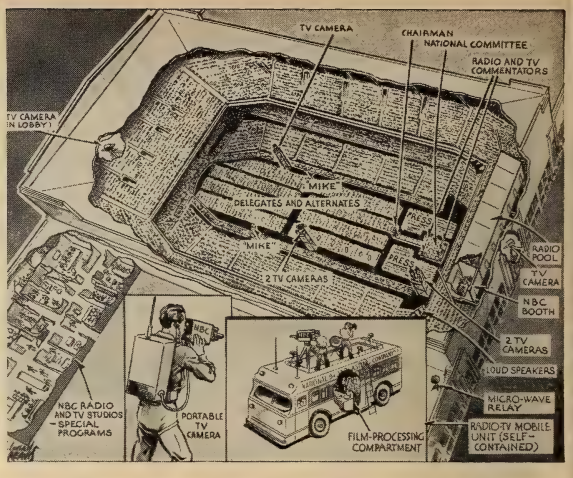
The schedule calls for 27 more BAB clinics, with the chairmanship rotated among William B. Ryan, BAB president, Mr. Sweeney and John F. Hardesty, director of local promotions.

Vic RADIO PROFIT Diehm Says:

"Time Buyers Meet My 'Airem!"



WAZL... What a beautiful buy! She has the figures to prove it, too! From 8:00 to 10:00 AM 57.4% of the audience; 2:00 to 4:00 PM 66.3%; 6:00 to 8:00 PM 69.3% and 8:00 to 10:30 PM 70.4%. Who listens to any other station in Hazleton, Pa.? Nobody!



WHOL... Speaking of beauties - here in this Allentown, Pa. trading area there are 6 stations, but the one that always wins the popularity contests is sound, solid and sales-wise WHOL. Want to measure her figures against the other five? Just drop me a note... I'll give them to you.

WHLM... In my "airem" this lovely blossom from Bloomsburg, Pa. is one of my favorites. And why not? She covers a prosperous manufacturing and farming area far in the lead of other stations, and this is her 5th straight year for major league baseball.

WIDE... Here is the newest member of my "airem". She hails from the Biddeford-Saco Old Orchard Beach area of Maine. She is the "must-listen" to station in a prosperous manufacturing center and the leading resort section of that great state.

Dec. 27-29: American Marketing Assn., Conference, Palmer House, Chicago.

KINGAN RADIO *Pays Off in Results; Godfrey Show Renewed*

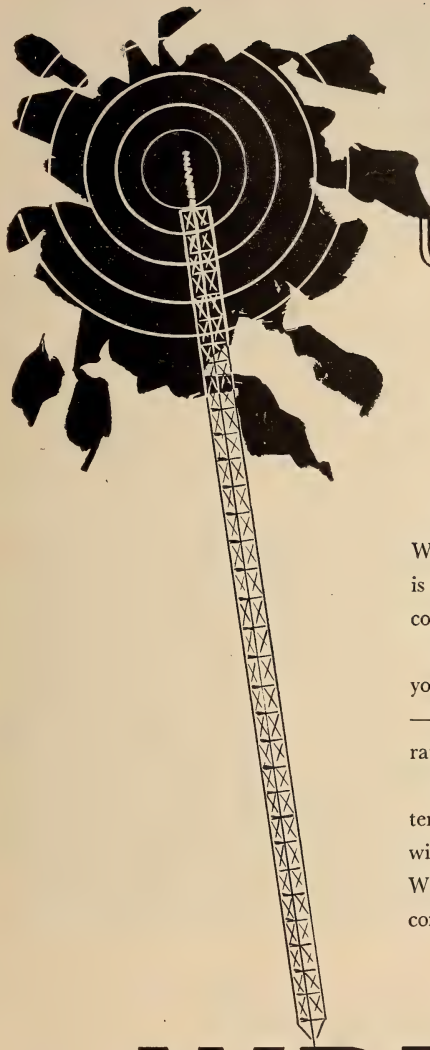
KINGAN & Co., whose first investment in network radio last fall involved more money than the company had been spending in all media, found the investment paid off in sales results, Kingan Sales Vice President N. Bruce Ashby reported last week.

His statement came with the announcement that Kingan is renewing *King Arthur Godfrey and His Round Table* on CBS Radio (Sunday, 5-5:30 p.m. EDT) for another 52 weeks, starting in October [B•T, June 9]. Warwick & Legler, New York, is the agency.

"The CBS Radio Network program has paid off for Kingan or we would not have renewed at this time for our coming fiscal year," Mr. Ashby asserted.

When Kingan embarked on the Godfrey *Round Table* series in October 1951, the meat company executive said, "there still were a number of major points where we had inadequate or no distribution on our consumer identified products."

Since then, he continued, "Definite gains have been made in all classes and types of retail trade handling meat products, from the independent operator right through the large corporate chains."



In this connection, he said:

"Some of the specific advantages that have been gained through the combination of *Godfrey and His Round Table*, CBS Radio and Kingan merchandising are a definite pin-pointed attack on selected consumer identified items on which we have desired to expand distribution and volume. . . . The Godfrey personality and our particular type of program has been very well adapted and very well used for point - of - sale merchandising material and in - store promotions. Local CBS Radio stations have been very cooperative in helping make the promotions successful.

"Finally, of course, the sales results warranted renewal. I attribute these sales results to an excellent sales job by Arthur Godfrey over the air and a well-coordinated selling and merchandising job by CBS, Warwick & Legler, and Kingan."

Mr. Ashby pointed out that when Kingan undertook *Round Table* sponorship, "the program called for a major investment, in network radio alone, greater than total company expenditures for all types of advertising during recent preceding years," and that Kingan officials "obviously" feel their decision "was sound."

The *Round Table* series consists of recorded highlights from the Godfrey morning programs, integrated into a weekly half-hour show and presented at a time suitable for listening by persons unable to hear the morning shows.

wonderful spot

Want to buy spots for less than in 1946? Well, the place is Memphis, and the Station is WREC—where your advertising actually costs 10.1% less than in 1946.

That's because more people are hearing your message—the area has grown, and also —WREC has the highest average Hooper rating of any Memphis radio station.

Ask salesmen who travel the huge WREC territory—ask advertisers on WREC. They will tell you from experience your spot on WREC is a wonderful spot in a thriving area completely covered by WREC.

WLFH LITTLE FALLS

Ready to Make Air Bow

WLFH Little Falls, N. Y., announced last week that it expected to begin operation within 10 days. The station, an MBS affiliate, is to operate on 1230 kc with 100 w. WLFH co-owners are Arthur Feldman, MBS director of special events, and M. Robert Feldman, of Little Falls.

Heading a list of well-known public figures to participate in the special opening-day program is Herbert Hoover, the nation's only living ex-President. Robert Earle, formerly with WKAT Rome and WKTV Utica, both New York, is general manager. Ed Dumas, formerly with Pan-American Airways Communications in South America, is chief engineer.

CARSON NAMED

For Seven-Year FTC Term

PRESIDENT Truman last Wednesday nominated John Carson for re-appointment to the Federal Trade Commission for a seven-year term beginning Sept. 28. The nomination was referred to the Senate Interstate & Foreign Commerce Committee, which has not yet scheduled action.

Almost simultaneously, FTC was brought to full strength for the first time since last January as Albert A. Carretta, Washington attorney, was sworn into office. Mr. Carretta, confirmed by the Senate June 12, fills the unexpired term of the late William Ayres ending in September 1954. The oath was administered to Mr. Carretta Wednesday by Chief Judge Harold M. Stephens, U. S. Court of Appeals for the District of Columbia.

Mr. Carson, former research and information director for the U. S. Cooperative League, was the center of controversy during committee hearings on his nomination three years ago. He was nominated in April 1949 to fill the unexpired term of then Comr. Robert Freer, who resigned to re-enter private practice. Mr. Carson was confirmed that September.

'GREEN CAMPAIGN'

WTMA Builds Used Car Sales

WTMA Charleston, S. C., is credited with making a success of a campaign which ties the wearing of green hats by salesmen to the idea of saving used-car buyers "on the long green."

Advertising stunt was staged by Frank Norris Motors of Charleston. Manager Bevie L. Machen equipped his used-car salesmen with green hats. With Ralph J. Shade, WTMA account executive, he worked out a system of spots. Spots included teasers and then a continuing series of telephone conversations between WTMA announcer Red Munro and automobile salesmen.

Norris used-car sales jumped about 100% the first month, WTMA reports, and each succeeding month has brought continued increases. WTMA Sales Manager Grange S. Cuthbert Jr. wore a green hat as a gag and in one afternoon picked up three prospects for the automobile agency, station observes.

Mr. Machen comments, "The man-in-the-green-hat campaign, conducted by WTMA for Frank Norris Motors, was one of the most successful advertising campaigns we ever tried. The enthusiasm generated among our own salesmen and the public was of the highest order of any campaign yet undertaken."

NEW WISN CENTER

Planned on Milwaukee Site

ERECTION of a radio-television center will be carried out by WISN-AM-FM Milwaukee at a downtown site which the station has purchased on West Wisconsin Ave., Milwaukee's main thoroughfare, at N. 19th St., according to Harry D. Peck, manager.

The 120,000-sq. ft. site cost $145,000, Mr. Peck said. He said plans now are on the drawing board for the new center, which will house all broadcasting and telecasting activities and offices. WISN is a division of the Hearst Corp.

NU-NBC INSTITUTE

57 Enroll for Session

SIX-WEEK professional session in radio and video training which begins today (Monday) at the 11th annual Northwestern U.-N B C Summer Institute has 57 enrollees from 25 states and three foreign countries.

Of the students, 15 are employed at broadcasting stations, and a smaller number work in broadcast departments at educational institutions. Foreign students include one from Italy, two from Canada and one from the Philippines.

$50,000 a day—for waiting!

These manufacturers are waiting.

In their factory, the production line has halted, the men are idle. And every day of this inactivity is costing them $50,000—and more!

What happened? One small breakdown in an important machine has stopped the works!

Even though replacement parts are hundreds of miles away, there's one way they could cut those days of waiting to *hours*. It's an answer that is saving thousands of manufacturers thousands of dollars every day.

That answer is—Air Express!

Air Express speed means *production* line speed. Whether your business is factories, films, or food, you can profit from regular use of Air Express. Here's why:

IT'S FASTEST — Air Express gets *top priority* of all commercial shipping services — gives the fastest, most complete door-to-door pick-up and delivery service in all cities and principal towns at *no extra cost*.

IT'S DEPENDABLE — Air Express provides one-carrier responsibility all the way and gets a *receipt upon delivery*.

IT'S PROFITABLE—Air Express service costs less than you think, gives you many profit-making opportunities.

Call your local agent of Air Express Division, Railway Express Agency.

milestones . . .

► STARTING his 25th year in broadcasting on June 12 was C. L. (Chet) Thomas, KXOK-AM-FM St. Louis. He began at WLW Cincinnati and became general manager of KXOK in March 1943.

► JOCKO MAXWELL, sports director of WWRL Woodside, L. I., billed as the nation's first Negro sportscaster, observed his 20th anniversary in radio last Saturday. He started in 1932 on the former WNJ Newark with a morning sports program. After WNJ ceased operations, he moved in 1937 to WWRL, where he conducts a weekly *Sports Digest*. He also writes a weekly sports column, and magazine articles and is author of a book.

► HOUSEWIVES took over at the 10th anniversary of Edith Hansen's radio homemaking on KMA Shenandoah, Iowa, June 6, when more than 1,200 honored her at the station auditorium. A Shenandoah housewife, Mrs. Hansen airs programs heard today on 54 radio stations throughout the country. She started on KMA. Edward May, president, KMA, presented her with an engraved silver tray. Also taking part in the festivities were J. C. Rapp, president, and A. W. Ramsey, vice president, Tidy House Products Co. Mr. Rapp is a former general manager of KMA, Mr. Ramsey a former sales manager at the station.

► TWELVE-year-old *Quiz Kids* will be feted at Chicago's Bismark Hotel on the program's June 26 birthday. Host is Louis G. Cowan, owner and originator of the radio-TV package. Joe Kelly, m.c., and Mr. Cowan will greet more than 400 former and present program kid stars. Show will be tape-recorded for broadcast on its CBS Radio Saturday time period.

WOR NEW YORK supplied about 30 portable radios to Ebbets Field, Brooklyn, last Thursday, when some 400 blind persons attended Dodgers-Cubs game as guests of Dodgers.

SUMMER MUSIC

Replaces MGM Shows on MBS

MUSICAL SHOWS have been picked by Mutual as summer replacements for the MGM productions which occupy the 8-8:30 p.m. EDT periods Mon.-Fri.

Julius F. Seebach Jr., in charge of MBS programs, announced last week that the Mon.-Fri. summertime schedule would see the following programs in the 8-8:30 spot, starting June 30:

Monday, *Jazz Nocturne*, featuring Sylvan Levin, MBS musical director in New York, and orchestra plus singer Jean Tighe and a quartette, the Mac and Jack Singers; Tuesday, *Jimmy Carroll Show*, with Jimmy Carroll, guest vocalist, and Emerson Buckley and orchestra; Wednesday, *Music for a Half-Hour*, a program of operetta and musical comedy melodies with Jimmy Carroll and guests; Thursday, *Symphonic Strings*, with Emerson Buckley and orchestra; and Friday, *Concerto Festival*, with Sylvan Levin and orchestra, plus guests.

A participation quiz, *The Great Day Show*, is scheduled for the 8:30-9 p.m. period on Wednesday, which currently is the second half of the hour-long *M-G-M Musical Comedy Theatre*.

MGM shows vacationing for the summer in addition to *Musical Comedy Theatre*, are *Woman of the Year*, starring Bette Davis and George Brent; *Black Museum*, with Orsen Welles; *Modern Adventures of Casanova*, with Errol Flynn, and *Adventures of Maisie*, with Ann Sothern.

Locke Buys Programs

LOCKE Stove Co., Kansas City, through Calkins & Holden, same city, has bought a half-hour on a 27-station southern NBC network for broadcast of a folk music and variety show originating in Nashville. Contract is effective for 13 weeks from Aug. 16, Saturdays, 9:30 to 10 p.m. CT.

PHILCO Corp., Philadelphia, has established new scholarship fund for engineering students at Lehigh U., Bethlehem, Pa. Grant of $18,000 will provide for three scholarships valued at $1,500 annually for next four years.

BAB SIGNS

For Special Nielsen Service

BAB has contracted for a special Nielsen service, making available to BAB members information developed from the Nielsen Radio Index Service, Nielsen Coverage Service and Nielsen Food-Drug Index Service, it was announced Thursday in a joint release from W. B. Ryan, president of BAB, and Arthur C. Nielsen, president of A. C. Nielsen Co.

Signing of the contract followed months of negotiations between the radio industry's self-owned promotion organization and the market research firm, in which Edgar Kobak, business consultant, whose clients include the Nielsen firm, and also chairman of BAB's executive committee, reportedly played a major part.

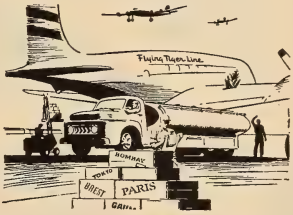
First reports to be developed by BAB from NRI material will include analyses of general radio listening and TV viewing habits, early morning and late evening radio audiences, evening radio listening in TV areas, cumulative weekly and monthly audiences of programs broadcast more often than once a week and audience size studies of national spot radio campaigns, Mr. Ryan said.

Auto Data in Fall

Food and Drug Index Service will provide material for additional reports on seasonal variations in the sale of packaged goods, importance of rural and small town markets for various types of products and case histories of radio advertising successes as reflected in store sales records, the joint release stated. In the fall the first NCS report will give BAB subscribers up-to-date information on automobile and other out-of-home listening.

"Through the Special Nielsen Service" Mr. Ryan said, "BAB members will be armed with important new facts about radio listening and the movement of goods resulting from radio advertising. We expect that some of BAB's most significant presentations for local and national advertisers will be based on the tremendous fund of information which A. C. Nielsen has spent many millions of dollars to acquire."

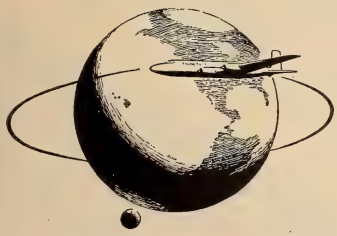
BAB officials would not comment on the amount the organization is paying for Nielsen service other than to indicate the sum is "reasonable."



Gallup Sales Expand

EIGHT additional sales of *Dr. George Gallup Show*, transcribed radio program, were announced last week by George F. Foley Inc., N. Y., film packaging and distributing firm. Bringing total sales to 130 markets, new station sales include WWVA Wheeling, W. Va.; WMAZ Macon, Ga.; WMT Cedar Rapids, Iowa; WDNC Durham,, N. C.; KMED Medford, Ore.; KMO Tacoma, Wash.; WLOK Lima, Ohio; WMAS Springfield, Mass.

How the Flying Tigers got over the Hump



1. In November, 1945, we told the story, in this series, of 12 India-China "hump" flyers from the American Volunteer Group who came home from the war and started an air freight business. They called their company The Flying Tiger Line Inc.

2. As we told you then, the veterans pooled all their savings but they still needed additional capital to launch their project. Several Los Angeles businessmen offered to furnish this capital on a 50-50 basis—the veterans to operate the company. This capital enabled them to start operations on June 25, 1945, with 8 war surplus Conestoga cargo planes.

5. The company has used Union Oil aviation products since it began operations in 1945. But that doesn't seem nearly as important to us as the fact that the men were able to accomplish these things. It could hardly have happened under anything but the American profit and loss system.

3. Over the last seven years the company's growth has been spectacular. Their fleet of planes has grown from 8 to 39. In 1949 they received the first certificate to fly U.S. Air Freight Route 100. And they now operate daily transcontinental schedules to 43 cities, in addition to world-wide contract and charter services. The company has now contracted for seven new DC-6A's—the largest order ever placed for cargo planes.

4. Last year their fleet earned a total revenue of $15½ million compared to $458 thousand the first year. In 1951 their planes flew a total of over 13½ million miles compared to ½ million miles the first year. Today The Flying Tiger Line Inc., is the world's largest certificated freight and contract air carrier.

6. For without the *profit incentive* the businessmen wouldn't have put up the capital to start the business in the first place. Without the hope of gaining financial independence, the veterans wouldn't have had the *incentive* to sweat out the problems of starting the company and developing it. Altogether, we think it's a wonderful example of the advantages of our American free enterprise system over others.

UNION OIL COMPANY
OF CALIFORNIA
INCORPORATED IN CALIFORNIA, OCTOBER 17, 1890

This series, sponsored by the people of Union Oil Company, is dedicated to a discussion of how and why American business functions. We hope you'll feel free to send in any suggestions or criticisms you have to offer. Write: The President, Union Oil Company, Union Oil Building, Los Angeles 17, California.

Price War

NO MATTER whose the fault (if indeed anyone can be singled out for blame) much radio network business in the past year and a half has been conducted in the haggling traditions of a Near Eastern bazaar, where nobody pays the first price asked unless he is a rich and stupid tourist.

A wandering rug merchant may be able to do his pittance of business that way, but it does not work out well for larger enterprises. It certainly has not worked out well for radio, as a special article in last week's issue of this publication made disturbingly clear.

The trouble has been that not very many people in radio have brought themselves to admit that radio network business has really degenerated to the hawker's level. It is not easy to believe that an enterprise dealing in more than $100 million a year could have let its price structure fall into utter chaos.

Only recently, it seems to us, has the radio industry as a whole begun to recognize this problem. The next step, which it appears will soon be taken, is to deal with it realistically.

The heart of the problem is prices.

Quite obviously, many of their canniest customers think that radio networks today are overpriced. Although we certainly do not agree, we must concede that, whatever the reason, the networks have been unable to persuade these customers that the price (or at least the announced price) is equitable.

It was an unhappy consequence that haggling came about once enough customers objected to the first prices asked. There is no point now in wondering whether the line could have been held if the networks as a group had steadfastly stuck to their prices.

Radio networks now have no choice other than to set a new price scale. It must be reasonable enough to attract buyers but high enough to enable networks and their affiliated stations to make a living.

Above all, the price scale must be one to which all the networks will adhere. If, after the readjustment that seems inevitable, a new period of haggling ensues, the demoralization of radio networks will be complete and their destruction unavoidable.

Timely Testimony

INERTIA, which has plagued broadcasters for years, is nowhere apparent in the approach toward the so-called Gathings investigation in Congress, which so far has been marked primarily by side-show exhibitions and an oblique effort of prohibitionists to force alcoholic beverage advertising from the air.

A formidable team of spokesmen for broadcasters and telecasters will testify next week before the House Interstate and Foreign Commerce Subcommittee. They will come prepared to show that radio and television are entirely capable of regulating themselves.

Many broadcasters were deluded by what transpired when the hearings opened three weeks ago. The witnesses launched diatribes against "hootchy-cootchy" dancers and "beercasts." It looked like more of the headline-hunting that animates many Hill hearings.

A timely note of caution is sounded by Committeeman Arthur G. Klein (D-N. Y.). He urges complete and forthright testimony. And he cited the appearance of the prohibitionists, who earlier in the session were thwarted in a drive to get through a Senate committee a bill to prohibit alcoholic beverage advertising. This happened by the slim margin of one vote. So the campaign was carried to the House, smuggled in under the broad terms of the Gathings Resolution, theoretically aimed at purported "offensive" TV programs.

Thus far, an NARTB delegation headed by President Harold E. Fellows and including Code Review Board Chairman John E. Fetzer has scheduled appearances before the subcommittee. Network representatives plan to testify. The Brewers' Foundation, recognizing the ruse of the blue-nosers, also contemplates an appearance.

This is gratifying. The foe hasn't been underestimated. A strong showing should spell the end of these forays against free media (for the moment, anyway). It will become apparent that Congress can't legislate program content without contravening the Bill of Rights.

Revision Needed

IN SOME DETAILS, the version of the McFarland Bill passed last week by the House is unacceptable.

Though retaining some of the major provisions of the original measure, as proposed by Sen. Ernest W. McFarland (D-Ariz.) and passed by the Senate, the House version strayed in just enough particulars to pervert what could be a useful piece of legislation into an extremely dangerous one.

Discrepancies between the Senate and House versions are summarized elsewhere in this issue. Those which strike us as especially in need of straightening out include:

The failure of the House to change Sec. 311 of the existing Communications Act which permits the FCC to refuse broadcasting licenses to persons found guilty in federal court of monopolizing radio communications. This section was eliminated from the act in the Senate bill on the quite justifiable grounds that it constituted "double jeopardy."

The addition by the House of a section authorizing the FCC to suspend licenses for 90 days and levy fines of $500 a day for violations of the Communications Act. The Senate, in its bill, would give the FCC power to issue cease and desist orders, which would be bad enough. The House would make the situation intolerable. An intemperate or willful Commission could wreck a station easily by exercising such punitive powers. The FCC's present power of license revocation is adequate.

The House bill subsection preventing stations from establishing political broadcasting rates that exceed "the minimum charges made for comparable use of such station for other purposes." In the absence of further explanation, this subsection could be interpreted most unfairly. Suppose the political broadcast replaced a show regularly scheduled under a long-term contract earning a favorable discount. Would the discount be figured in when computing the "minimum charges"?

These and other apparent flaws in the House version must be eliminated before broadcasters can regard this legislation favorably. Fortunately, the measure will be taken up by a joint Senate-House committee where, it is to be hoped the ills will be removed.

There would seem to be a chance that a sensible bill may emerge. It is interesting that the roadblocks which certain FCC personnel tried to place in the way of the measure proved ineffective in the House, which passed the bill overwhelmingly. This would indicate that if the conferees can produce a compromise bill reasonably soon, it would have a chance of adoption before the adjournment of Congress.

But one thing must be kept in mind. It would be better to have no new bill at all than one containing serious shortcomings.

our respects to:

BENEDICT GIMBEL JR.

TO BENEDICT GIMBEL Jr. there's no business like show business, unless, of course, it's broadcasting.

Happily, Mr. Gimbel, president-general manager, Pennsylvania Broadcasting Co., licensee of WIP-AM-FM Philadelphia, has been able to combine both of his loves.

Twenty-two years ago, Mr. Gimbel assumed the presidency of WIP and since that time has directed its efforts in entertainment and civic affairs.

How successful has he been? Mr. Gimbel's answer to that query shows that whereas, he brings much imagination to his programming, his feet are solidly on the ground insofar as the practical aspects of station operation.

He has a one-word yardstick with which to measure success. That word is simply: Results.

"Many people have been depreciating radio and its effectiveness," he commented. "We at WIP feel differently. The year just past shows an increase of 26% in local billing over the year before . . . the highest in the 30 years of WIP's existence.

"Next year is going to be even better," he added optimistically. "I don't think any other medium can offer a serious challenge to radio on a coverage basis or on a cost basis.

"Everyone knows that the set sales are the highest ever and radio sales volume is the highest in its history.

"It all adds up," said Mr. Gimbel, "to more penetration, more listeners, more business. Radio is a great medium and I think it will continue to be for years to come. It's economical and it produces. Isn't that the answer to any good medium?"

The early direction of Mr. Gimbel's life was not pointed toward broadcasting. It was assumed that he would inherit the mantle of his family's famous mercantile business.

A native Philadelphian, Mr. Gimbel attended Central High School there, then completed his secondary education at Thorpe School, Stamford, Conn., and at La Villa, Lausanne, Switzerland.

College training at the U. of Pennsylvania's Wharton School was interrupted in Mr. Gimbel's sophomore year when he joined the Army during World War I. He was discharged as a sergeant after 16 months' service. He was graduated from Wharton in 1921.

Then, as planned, he began his business career with the Gimbel store in Philadelphia. Following an apprenticeship of two years, during which he served in every department, young Mr. Gimbel was made assistant mer-

(Continued on page 54)

Here's how to

DOUBLE your impact in the Detroit Market

MARKET MAGIC is a combination selling plan that ties your WWJ on-the-air advertising to A&P in-the-store merchandising. It adds to WWJ's powerful radio salesmanship the direct eye-catching impact of point-of-sale promotion in the 93 A&P stores dominating the Detroit area.

MARKET MAGIC advertisers who distribute their products through A&P stores—where Detroiters spend $100,000,000 annually—are assured a one-week preferred position display in each of these stores, for any one product during a 13-week cycle.

MARKET MAGIC produces double impact from one sales campaign, at one low cost, through one medium. WWJ, Detroit's NBC station.

ASK YOUR HOLLINGBERY MAN FOR A MARKET MAGIC BROCHURE. IT CONTAINS ALL THE DETAILS.

Kaphan's RESTAURANT Speaks Out for K-NUZ Pull Power . . .

Here is a letter K-NUZ received from Peter Petkas, owner of Kaphan's Restaurant in Houston.

Gentlemen:

As we begin our 40th week on K-NUZ I would like to thank the personnel of your station for their friendly co-operation and assistance. As evident in our fourth renewal of our original contract, we are more than pleased with the results we have obtained from our program "Dinner Date" with Paul Berlin. I think you will appreciate knowing that our over-all volume of business has increased 16%, and holidays have shown a 19% increase over the same period before going on K-NUZ.

We are looking forward to continued success with your station.

Very truly yours,
Peter Petkas

Our Respect To

(Continued from page 52)

chandise manager of the ready-to-wear departments. A year later he was named merchandise manager of those sections.

In 1922, Gimbel Bros. purchased WIP as an adjunct to its advertising department. The station shared time in those days with WFAN, then owned by the Levy brothers of CBS fame. In the early 30s, Gimbel Bros. bought out WFAN, deleted the call letters, and WIP started to hit its stride under the guidance of Benedict Gimbel Jr.

During those long months while he was learning merchandising, Mr. Gimbel had longed for some active participation in show business. When the radio station came along, he seized the opportunity. Here was a field in which he could enlist his knowledge of show business on behalf of the station's advertisers.

Under his imaginative direction, WIP was the first station in the Philadelphia area to go on a 24-hour daily, seven-day-a-week operation; it was the first in Philadelphia to broadcast from airplane to ground and the first to broadcast from the bottom of the sea.

This progressive programming has led to well satisfied advertisers. A source of pride with Mr. Gimbel is the fact that many of the station's current sponsors have been with WIP for 10 to 15 years. One advertiser has just celebrated its 21st anniversary with the station.

Mr. Gimbel not only sets the policy of the station, but he is active also in helping carry it out. He is at his office usually before 9 a.m. and remains in harness as long as he feels he is needed. This sometimes means that he still is working at midnight.

Covers Local Stories

Many ideas are originated by him. And, since WIP tries to give full coverage of local happenings, he often covers stories himself. He is an honorary Philadelphia fire chief.

Philadelphia being his "home town," Mr. Gimbel takes an active part in civic affairs. He lately was honored by the Boys Clubs of America for his more than 15 years of service as a member of the board of the Crime Prevention Assn. He also is a member of the board of directors of MBS and serves as president of the Philadelphia Radio & Television Broadcasters Assn.

On June 3, just three weeks ago, he was awarded an honorary degree of Doctor of Humane Letters by Lincoln U., Oxford, Pa., during the university's 98th commencement.

He has attended every major show's opening night performance in Philadelphia for the past 17 years. Mr. Gimbel's home guest book bears the names of most of the great and near-great of the theatre, movie and radio world; his collection of autographed photographs number nearly 1,500; his personal record library is an enviable collection, as are his collection of strange hats, brought from far parts of the world.

As a youth, Mr. Gimbel was an avid polo player. He rode for the Lancaster Polo Club and for the Philmont Polo Club. A team mate was William S. Paley, CBS board chairman. Incidentally, Mr. Paley also is a "brother" in Zeta Beta Tau fraternity.

Polo playing now, however, attracts only a spectator's interest from Mr. Gimbel. At 49, he follows more sedentary pursuits such as the study of words, their meanings, derivations and proper usage. His library of dictionaries and reference books boasts more than 100 volumes, and includes a research library on curious and little-known facts.

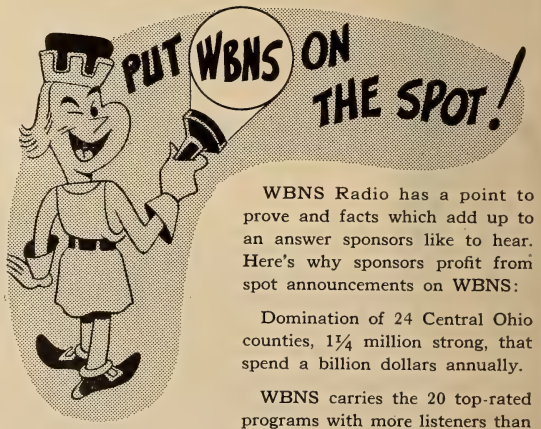
Club Memberships

In addition, Mr. Gimbel is a member of Philadelphia's Poor Richard Club, the Radio Executives Club of New York, the Radio Pioneers, the Lamb's Club of New York and the Variety Club of Philadelphia.

He is now married to the former J. Jessie Kane, of Philadelphia. A son of Mr. Gimbel by a former marriage is Edward Nathanson, ABC-TV producer-director.

As for future ambitions, the Pennsylvania Broadcasting Co. has just filed for UHF TV stations in Philadelphia, Milwaukee and Pittsburgh. Also, Mr. Gimbel plans extensive expansion of WIP.

He has full faith in the future of radio but TV quite naturally, has a fascination for him, too. Every new show would mean an "opening night" and the familiarly beloved backstage call, "Curtain going up!"



WTSP BALLCAST

Studio Outdraws Ballpark

STUDIO recreation parties held by WTSP St. Petersburg, Fla., to stimulate fan interest in minor league baseball have become so successful that the station actually outdrew the ballpark in attendance on one occasion.

This was the enthusiastic report from Jack Faulkner, WTSP program director, in commenting on the station's newest activity. The parties have been a regular feature the past few weeks, with attendance at the baseball broadcasts hitting 120 for each game. Admission is free and cooperative sponsors supply free sandwiches, soft drinks, ice cream and cigarettes.

When the local Saints team played the weak second-division Fort Lauderdale Braves in a Florida International League game, some wags wagered the studio party would draw more people than the game at Fort Lauderdale. It did—by 20 fans.

WBNS Radio has a point to prove and facts which add up to an answer sponsors like to hear. Here's why sponsors profit from spot announcements on WBNS:

Domination of 24 Central Ohio counties, 1¼ million strong, that spend a billion dollars annually.

WBNS carries the 20 top-rated programs with more listeners than all other local stations combined. For more sales, put Central Ohio's only CBS outlet to work for you.

WGEZ DUNKS
Stages Sears Day

WGEZ Beloit, Wis., helped dunk three top local Sears Roebuck & Co. executives into a river as a result of the success of an annual Sears sale.

For several days preceding "Sears Days," and throughout the nine-day sale, WGEZ aired 11 spots daily plugging the event. In addition, Sears co-sponsored Chicago White Sox baseball games over the station.

Immediately preceding the sale, a "planning party" was given. John Barrows, store manager, set the quota, and announced that if 129% of it were reached, he would submit himself, fully dressed, for a thorough dunking in the Rock River, just north of Beloit. If 131% were reached, Gordon Wedge, assistant manager, would be dunked, and if 135% were reached, Alvin Collins, credit manager, would receive the same treatment.

Opening night brought the largest crowd in the history of the store. In three hours, about 10% of the quota was reached. At the end of the nine-day sale, total business equalled 141% of the quota.

Employes declared "D (for dunking) Day" and Messrs. Barrows, Wedge and Collins lived up to their end of the bargain.

WGEZ was on hand at the dunking to give a gurgle-by-gurgle description.

All three executives praised WGEZ's part in making the sale a success. Mr. Wedge commented, "We feel that the success of the sale was due greatly to the power of radio and especially in the kind of promotion we have come to expect of your station after two years of advertising with you."

KAUFMAN AGENCY
Wins 18 NAAN Awaards

HENRY J. KAUFMAN & Assoc., Washington, received 18 awards at the 21st Annual Conference of the National Advertising Agency Network, which met Monday-Friday last week at Skytop, Pa.

The annual creative awards competition had 384 entries by the 30 advertising network members. Kaufman clients who won awards include:

WMT Cedar Rapids; Christian Heurich Brewing Co., Washington, local merchandising campaign and spot radio advertising; Potomac Electric Power Co., local general newspaper campaign and radio program; First Federal Savings & Loan Assoc., Washington, spot TV announcements, and Mason Root Beer Bottling Co., Washington, TV program.

Judges included Stuart M. Armstrong, National Radio Institute; Joseph L. Brechner, WGAY Silver Spring, Md.; John S. Hayes, WTOP-AM-FM-TV Washington; Gene Juster, NBC; Charles L. Kelly, WMAL-AM-FM-TV Washington; Robert K. Richards, NARTB, and Sol Taishoff, BROADCASTING • TELECASTING.

In the Employment Office, too..

GOOD COMMUNITY RELATIONS

are essential. *Radio* can be a real help!

In countless companies, the Employment Director faces a terrific task these days. Management calls for continuing additions to the force, while competition grows stiffer all the time.

Good community relations can be of tremendous assistance. And, as many companies have shown, radio is an excellent tool for fostering friendship in a plant's neighborhood. Radio programs help make friends not only with families near at hand, but also with those in outlying areas that other media usually fail to reach.

If you're not already using radio as an aid to recruitment, it will pay you to look into it. And if you're located in any one of six leading industrial areas.. Boston, Springfield, Philadelphia, Pittsburgh, Fort Wayne, or Portland, Oregon.. you're in luck. You can count on the specialized programming experience of a Westinghouse radio station to help you make friends with your neighbors.

operation critical

the chips are down... the client's ok is in the balance

This is the crisis of the schedule. The agency is presenting its media recommendations for the year ahead. The client men listen in stony-faced silence.... Their turn will come soon enough.

The account executive finishes his presentation; a cold silence falls on the group.

What do they think of it? Why doesn't somebody say something?

The client's ad manager shuffles his papers; steals a look at his boss. The agency men force themselves to keep still. They know it's the client's turn to speak. The media director unconsciously fingers his copy of Standard Rate ... and waits for the inevitable storm of questions to come.

Every agency man who's been through it knows Operation Critical. A recommendation in five figures—or six—is on the table . . . the result of weeks of research, dozens of interviews with helpful and hopeful representatives, agency sessions far into the night, untold man-hours of just plain work. And all for nothing, if the client doesn't go along.

The questions begin:

"How much of a break in rates would we get if we put the whole magazine campaign into these top five?"

"This newspaper—how well does it cover the city and trading area population?"

"Has there been any study of listening habits in the Kansas City region?"

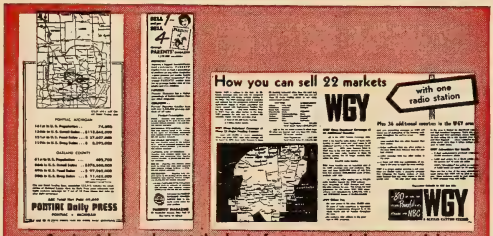
"Do these business publications get read by employees below management level?"

Questions, questions. They range from simple to complex, from naive to shrewd. But they must be answered, then and there. The time for preparation is gone. This is it—*Operation Critical.*

The media director's fingers fly as he flips to a figure in CONSUMER MARKETS, quickly turns to a fact in Standard Rate & Data. The account executive cites a previous experience while the media man digs.

As usual, the "standard" questions are relatively easy to answer. Standard Rate & CONSUMER MARKETS have most of the facts organized. But some of the questions go beyond facts, into interpretations; comparative studies; trends . . .

"Which of these women's magazines carries the most ethical drug advertising?"



"Do young people read this Sunday supplement?"

"Has this station's audience grown in the last year? How much?"

"Would it be worthwhile to add a second paper in this city?"

Listings of standard facts cannot answer many such questions — they're not supposed to. But the need for quick access to summarized information has been *anticipated* by many publishers and station operators who know from experience what goes on day and night in the media department, in the agency review sessions, and in Operation Critical.

That's why approximately 1,050 individual media used 8,500 Service-Ads in 1951 to supply needed information in packaged form . . . and to place this information near their market listings (in CONSUMER MARKETS) and near their media listings (in SRDS).

Service-Ads supplement the basic facts . . . and they are right there, in the conference room, when this supplementary information is most needed. They help buyers *buy*... they help buyers *sell*.

KBLA BURBANK

Begins in California

KBLA Burbank, Calif., 250 kw on 1490 kc, was to begin fulltime operation Saturday from its transmitter studio at 239 Amherst Drive. Permanent studios and executive offices at 11516 Oxnard St., North Hollywood, are expected to be ready this weekend.

Licensed to Broadcasters of Burbank, KBLA is owned equally by Floyd J. Jolley, Burbank councilman; Arthur J. Crowley, attorney; Gordon A. Rogers, contractor; Walter Mansfield and Albert S. Hall, realtors. Robert S. Marshall, formerly of KFMV (FM) Hollywood, is KBLA general and commercial manager.

The staff includes Nicholas Muskey, assistant manager and program director; Charles Powers, account executive; Julie Cummings, copy writer-traffic manager; Robert Skiles and Robert Miller, announcers; and Thomas Payne, engineer.

Arthur M. Semones

ARTHUR M. SEMONES, 53, who worked at Henri, Hurst and McDonald agency, Chicago, since it was organized in 1916, died Tuesday after a long illness. Funeral services were conducted Friday. Three years ago he became a vice president. Surviving are his wife and two sons.

MORE AND EARLIER CHRISTMAS RADIO

NRDGA Studies Department Stores '52 Plans

RADIO, widely used in department stores' pre-Christmas promotions last year, is expected to do as well or better this year, while TV is still an unknown factor with most stores, according to Howard Abrahams, sales promotion head of the National Retail Dry Goods Assn.

In the June issue of *Promotion Exchange*, NRDGA bulletin service, Mr. Abrahams said that although Thanksgiving Day is the traditional starting time for retail Christmas advertising, reports from stores indicate that "1952's Christmas promotions will definitely be on the earlier side." Plans are made much earlier, with "newspaper and radio themes planned on the most part during late summer, although actual Christmas formats are not created until later in the season," he said.

"Of 91 stores studied, 52 used radio in the 1951 Christmas season," Mr. Abrahams reported. Stores with regular programs on the air generally reslanted them at Christmas time, while "a substantial number" of stores added special pre-Christmas programs, Mr. Abrahams added.

"From their reports," he said, "it is evident that stores will put as much and probably increased emphasis on Christmas radio programming as compared with last year."

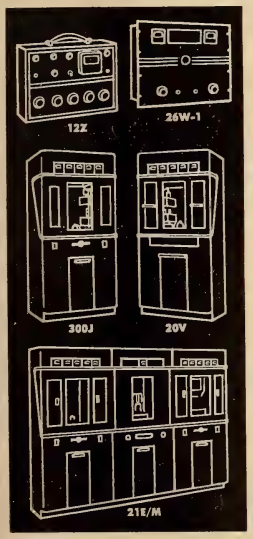
On the video front, Mr. Abrahams reported that "only a small percentage of the stores reporting Christmas plans, use television regularly as a selling medium. Generally, the TV users reslanted their telecasting, whether it consisted of programs or spots, to Christmas themes. Last year, several stores added TV at Christmas time. These stores are divided in their thinking as to whether they will repeat their TV this Christmas.

"However, stores which had specialized programs slanted to children's audiences are definitely enthusiastic about the effect of these programs and will repeat these techniques this year."

RADIO FESTIVAL

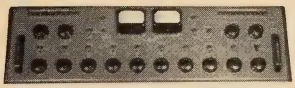
Inaugurated by WBEZ

POLITICS of Britain and the drama of Oscar Wilde highlighted the first summer radio festival sponsored last week by the Chicago Board of Education on its FM station, WBEZ. The five-day programming from 9 a.m. to 4 p.m. included shows relayed to educational stations throughout the country by the National Assn. of Educational Broadcasters.



The radio festival included programs from the U. of Michigan, U. of Illinois and U. of Chicago, Northwestern U. and the British Broadcasting Corp. George Jennings, director of the board's radio council, said the effort will be continued during school holidays and summer vacations if response is favorable.

Safety by Radio



PENNSYLVANIA ASSN. of Broadcasters, noting mounting traffic deaths, is planning a saturation public service spot campaign on all holiday weekends in the interest of traffic safety. PAB board of directors, who met in Harrisburg June 12, is advocating that all members participate in the plan. It is believed, said Robert Trace, station manager, WMGW - AM - FM Meadville, Pa., that radio can play a major role in reducing traffic accidents by constantly alerting motorists of dangers which lurk on crowded highways. Plan is to incorporate messages in station breaks.

BMI is sponsoring series of 10 concerts by the Berkshire String Quartet, which will perform new works of chamber music by 29 contemporary composers. Series will be held at Music Mountain, near Falls Village, Conn.

MEMBERS OF A GREAT RADIO EQUIPMENT FAMILY

COLLINS . . . for broadcast equipment of unquestioned quality

Collins 212A Studio Console

Your studio installation deserves the built-in quality and superior performance the Collins 212A speech input console will supply. Unit amplifiers are individually shock mounted. Main frame and end castings are solid aluminum. Tilt-to-service feature allows installation against window or wall. Write for complete technical information.

air-casters

ROLLAND C. BOURBEAU appointed merchandising manager, WBAL Baltimore, succeeding **J. WILLIAM MASON**, who transfers to sales service, WBAL-AM-TV.

PATRICIA SCANLAN to CBS Radio public affairs staff, Washington.

ROBERT C. CURRIE, producer-director, WCAU-TV Philadelphia, appointed production manager.

PAUL SCHRIMPF, news editor, KWOS Jefferson City, Mo., to farm programming department, WDAF Kansas City, Mo.

GEORGE SANDERS, Hollywood disc m.c., adds similar duties at KBIG Avalon, Calif.

DONALD McGILL, announcer and producer, CBM Montreal, appointed program director.

TIM OSBORNE, senior announcer, KTHT Houston, promoted to program director, replacing **JOHN KNAPP**, who transfers to KSOX Harlingen in same capacity.

Mr. Osborne

Mr. Knapp

KNOX TAUSSIG Jr., account executive, KMOX St. Louis, appointed merchandising manager at station.

ART WOLDT to announcing staff, WSYR Syracuse, N. Y.

GRANT RECKSIECK, assistant advertising-promotion manager, NBC Chicago, to KNBH (TV) Hollywood as director of sales promotion.

A. C. WILLIAMS, disc jockey, WDIA Memphis, promoted to promotion consultant.

JOSEPH C. BEAL, program consultant, WDSU - TV New Orleans, named production manager.

Mr. Beal

ROBERT M. ADAMS, director of press and public relations, WOL Washington, to WRC and WNBW (TV) that city, in similar capacity.

JERRY REUTER, KLRA Little Rock, Ark., to announcing staff, KWK St. Louis.

HAL LAWSON to WJR Detroit announcing staff.

MORTON COHN, program director, WCHS Charleston, W. Va., and **HARRY BRAWLEY**, public affairs director there, elected to presidency of Kanawha Players and Charleston Open Forum, respectively.

FRANK FONTAINE, star of CBS Radio *Frank Fontaine Show*, assigned role in Paramount Pictures feature film, "Scared Stiff."

ED F. SHADBURNE, sales staff, WAVE-TV Louisville, Ky., to advertising staff, KVOR Colorado Springs.

NORMAN HANSEN appointed assistant farm commentator for Pacific region of Canadian Broadcasting Corp., Vancouver.

FRED GREGG, promotion man with Scripps - Howard papers, to WLWT (TV) Cincinnati, as head of new client service department. Assisting him will be **JAMES ALLEN**, former city editor, *Cincinnati Post*, and **JACK FRAZIER**.

Mr. Gregg

JACK ROSS, WCRO Johnstown, Pa., to WCFM (FM) Washington, as special events director.

JOSEPH R. COX, coordinator of traffic operations for DuMont Television Network, appointed area supervisor in station relations department succeeded by **JAMES P. O'BRIEN**, who tranfers from WTTM Trenton.

E. S. COATSWORTH, formerly with moving picture interests including J. Arthur Rank Organization, Toronto, and National Film Board, Ottawa, named TV publicity director for Canadian Broadcasting Corp., Toronto.

MAX TERHUNE, star of KNXT (TV) Hollywood *Alibi's Tent Show*, named president of Hollywood chapter of Society of American Magicians and West Coast vice president of national chapter.

CHRIS MACK, farm service director, WNAX Yankton-Sioux City, S. D., granted six-month leave to service as radio consultant on agriculture information to Mutual Security Agency. He will be headquartered in Paris.

Mr. Mack

CHARLES KURALT, U. of North Carolina student and former winner of NARTB "Voice of Democracy" contest, to WBT and WBTV (TV) Charlotte, N. C., for summer months.

BOB MENEFEE, WIP Philadelphia announcer, and Barbara McGowan were married June 7.

WAYNE GIBBS, mail department, ABC Hollywood, father of girl, Linda Marie, June 3.

WALTER DUNDON, manager, script department, CBS Radio, Hollywood, married **JACQUELINE AKERS**, executive secretary, Anderson-McConnell Adv., that city, June 2.

GEORGE DOBSON, sports announcer, KTFS Texarkana, Tex., father of boy, William.

BINGO PIVER, star of KECA-TV Los Angeles *Accent on You*, and Keith Whipple will be married July 26.

TOM McCOLLUM, director, WSYR-TV Syracuse, N. Y., and Jean Zimmerman were married June 13.

WSYR's Local Radio Sales UP 39%

For the period ending April 30, WSYR's local radio sales were 39% ahead of 1951. The local advertisers responsible for this increase are the ones in the best position to test the effectiveness of all media. They know which advertising keeps the cash register ringing.

SAFETY ON THE MARCH

Neither Sergeant H. A. Ries, of the Pennsylvania State Police, nor Sergeant John Eihleiter, School Safety Officer of the Lancaster City Police, was available on May 3 to conduct WGAL-TV's regular Saturday afternoon safety program. Both were busy supervising the FIFTEENTH annual Lancaster City and County Parade of School Safety Patrols, an event sponsored by the AAA in conjunction with the Pennsylvania State Police and the Lancaster City Police. WGAL-TV covered the parade with 3,500 safety patrolmen marching to the music of 26 high-school bands. Forty thousand spectators watched the parade and 11,000 saw the safety demonstration which climaxed the event. Purpose of the parade was to highlight once again the instruction youngsters receive in highway safety. Through alternate Saturday afternoon safety programs—"Guardians of Safety," conducted by the City Police, and "Highway Safety," conducted by the Pennsylvania State Police—WGAL-TV plays an important role in safety instruction to many young people throughout a wide area.

TALL TOWER HAZARD

Study May Reduce Fears

By LARRY CHRISTOPHER

AIR HAZARD potential of tall TV towers does not appear as serious as aviation interests once feared, according to statistics contained in a study now being prepared for the industry-government "ad hoc" committee considering the problem.

The study shows there is but one application pending before a regional airspace subcommittee for a 2,000-ft. tower (Dallas-Ft. Worth) while there are only three requests pending before airspace subcommittees in the entire U. S. for towers in the 1,500-1,999 ft. category. Two towers in this range already have been approved, the study shows.

Aviation Interests Alarmed

Aviation interests became alarmed at the prospects of 2,000-ft. towers sprouting over the country when FCC announced its Sixth Report and Order lifting the TV freeze and finalizing the allocation of channels for some 2,000 TV stations in about 1,200 communities [B•T, April 14]. The Sixth Report provides for tower heights up to 2,000 ft.

The ad hoc committee is a working group studying in detail the tall tower air hazard problems and their possible solutions. It is composed of TV, aviation and government representatives, both FCC and CAA, and was appointed to the task by the first major conference on tall towers held in April under the joint chairmanship of FCC Comr. E. M. Webster and CAA Deputy Administrator F. B. Lee [B•T, April 28]. The ad hoc group will submit its reports shortly to Comr. Webster and Deputy Administrator Lee, at which time another large industry-government conference is expected to be called to act on the reports.

Meanwhile, in FCC correspondence disclosed last week on Capitol Hill, it was learned that the Commission considers it has full authority under the Communications Act to deny "any applications which may involve a hazard to air navigation."

The statement was made April 18 by Comr. Rosel H. Hyde in a letter to Rep. Robert Crosser (D-Ohio), chairman of the House Interstate & Foreign Commerce Committee. The letter replied to a request by S. G. Tipton, general counsel for the Air Transport Assn. of America, that Congress amend the Communications Act to specify that authority [B•T, April 7].

The study of the probable instance of high towers, based on statistics available today, is being compiled for the ad hoc committee by Robert E. L. Kennedy, Washington radio-TV consulting engineer. It is one of four subcommittee reports being prepared for the ad hoc group.

According to the Kennedy study, of 92 TV applications on file at FCC early last week, 47 specify towers less than 500 ft. high (above ground, not above average terrain). In most cases, towers less than 500 ft. do not require CAA clearance. The study also shows that 25 applications specify towers 500-599 ft., three fall within 600-699 ft., four each 700-799 ft. and 800-899 ft., none 900-999 ft., seven 1,000-1,499 ft. and none 1,500 ft. and above.

The study also finds that as of June 1 there were 133 tower approval requests pending before regional airspace subcommittees throughout the country. This is based on cities of 50,000 population or greater.

The various airspace subcommittees, the study finds, already have approved 62 towers, and have 21 applications pending, in the 500-599 ft. category. For 600-699 ft. there are 11 approvals plus 12 applications pending; 700-799 ft., 11 approvals and 11 applications; 800-899 ft., four approvals and four applications; 900-999 ft., two approvals, three pending; 1,000-1,499 ft., 11 approvals, 28 applications; 1,500-1,999 ft., two approvals, three applications; 2,000 ft. up, one application pending.

The study also discloses that two towers over 1,000 ft. have been approved in Zone I, the eastern U. S., and four requests are pending before airspace subcommittees there, but it is considered doubtful they will be employed since less than maximum power would be required. FCC's Sixth Report limits towers to 1,000 ft. in Zone I when maximum power is used.

The ad hoc committee last Tuesday considered its second subcommittee report, that of the special projects committee. This report puts into layman's language major problems such as placing all TV antennas on a single tower in each community and the use of satellite booster stations to eliminate the

CITY PRIORITY

FCC Rejects KXEL Petition

FCC's TEMPORARY processing procedure for handling new TV station applications "will . . . make possible the affording of television service to the greatest number of people in the shortest period of time."

That is what the Commission declared Thursday in denying the petition of Josh Higgins Broadcasting Co. (KXEL-AM-FM Waterloo, Iowa) for amendment of the temporary processing procedure in order to place Waterloo in a more favorable position [B•T, May 5].

Smaller Cities Cut Out

KXEL maintained that by using city population as the basis of priority, applications for the larger cities with no service would get relatively prompt consideration, but smaller cities would have no chance of getting service "for months or even years, even though stations in these smaller cities may serve other substantial populations outside the city to which the channel is allocated."

FCC, however, noted big cities have rural areas which would get service as well.

The temporary processing procedure stems from the Commission's Sixth Report and Order lifting the TV freeze [B•T, April 14].

The city priority listing, compiled in accord with the temporary procedure, was issued by FCC about a month ago [B•T, May 26] and places Waterloo 61st in Group A-2. Waterloo's population was given as 65,198. It is 72 miles from the nearest TV station, FCC's listing states.

Applications for Group A-2 cities (more than 40 miles from existing stations) will be processed beginning July 1 in order of the city listing by population, according to the temporary procedure. Concurrently, applications for Group B cities (less than 40 miles from service) will be processed, starting with Group B-1.

In other allocation developments last week:

● Both WLWC (TV) and WBNS (TV) Columbus, Ohio, filed oppositions with FCC to the petition of WLOA Braddock, Pa., for reconsideration of the Sixth Report so as to assign Channel 4 at Braddock (greater Pittsburgh) [B•T, June 9]. WLOA suggests channel changes involving both Columbus stations.

● WIBA Madison, Wis., asked FCC to dismiss the petition of the State Radio Council of Wisconsin which seeks conversion of the noncommercial educational reservation there from one of three UHF channels to the only VHF channel [B•T, June 16].

● Mayor David Lawrence of Pittsburgh has written FCC: "I am gravely disturbed by what seems to us to be the unfortunate manner in which our city has been treated by the Commission in the assignment of commercial VHF channels." He asked reconsideration. The Sixth Report allocated two VHF and three UHF commercial channels there.

● Rep. L. Mendel Rivers (D-S.C.) on Friday, attacking the Sixth Report, told the House "if there is anything on earth which needs revision, it is the policy and the way of doing business" at FCC. He lauded the Sixth Report dissent and late speeches of Comr. Robert F. Jones.

Amend 15 Mile Rule

● WKDN Camden, N. J., petitioned FCC to amend the newly adopted Sec. 3.607 (b)—the "15 mile rule"—so it can seek a Philadelphia commercial channel at Camden. WKDN explained the rule now precludes such a request since Camden has a noncommercial channel allocated there.

● FCC advised consulting engineers J. G. Rountree and A. Earl Cullum Jr., Dallas, that while minimum station spacings are not provided in the rules by the Sixth Report with respect to Canada and Mexico, the U. S. minimums should be used since they may figure in

(Continued on page 72)

WITH 35 new and amended television station applications filed last week at the FCC, the total number of requests for new TV outlets filed since the FCC Sixth Report & Order [B•T, April 14] rose to 110.

There were 13 new applications filed and 22 amended requests submitted.

Fourteen applicants seek UHF stations, the remaining 21 applicants want VHF facilities.

There was only one request for a change in channel, filed by WCPO-TV Cincinnati [B•T, June 16]. One application was returned.

Three TV applications came from the Empire Coil Co., licensee of WXEL (TV) Cleveland. It seeks stations in St. Petersburg, Fla., Portland, Ore., and Denver. Westinghouse Radio Stations Inc. filed two applications; it asks for facilities in Pittsburgh and Portland, Ore.

ST. LOUIS BID

University, Businessmen Apply For Channel 11

ST. LOUIS U. and 10 St. Louis businessmen, with an authorized capital of $1 million as St. Louis Telecast Inc., are applying for VHF Channel 11 allocated to that city for commercial TV operation, the Very Rev. Paul C. Reinert, S.J., university president, announced Tuesday.

Father Reinert said the new company's application to the FCC for a construction permit will be filed by June 30, supplanting an earlier application filed by St. Louis U. Jan. 29, 1948. He said all necessary equipment for operation of a TV station has been ordered from RCA.

He said plans were to devote at least 24% of the station's time to educational and public service programming, but that St. Louis U. would continue, nevertheless, to work with other city educational agencies to put on the air a non-commercial educational TV station to occupy Channel 9, tentatively assigned St. Louis for educational purposes.

The university presently owns and operates WEW St. Louis, which he said in 1921 became the second station in the U. S. to go on the air.

Officers of St. Louis Telecast Inc. are: Father Reinert, president; George A. Volz, WEW general manager, vice president; Frederick A. Bertram, university director of business and finance, treasurer; Henry J. Lunnemann, university controller, secretary.

Stockholders, besides the university, are: Howard F. Baer, president, A. S. Aloe Co.; Donald Danforth, president, Ralston Purina Co.; Russell L. Dearmont, counsel for trustee of Missouri-Pacific Railroad Co.; Leo C. Fuller, board chairman, Stix, Baer & Fuller Co.; Gale F. Johnston, president, Mercantile Trust Co.; Bernard C. MacDonald, president, B. C. MacDonald & Co., manufacturers' representative; Richard C. Muckerman, executive vice president, City Products Corp.; James J. Mullen Jr., president, Moloney Electric Co.; Daniel M. Sheehan, vice president and controller, Monsanto Chemical Co.; Leif J. Sverdrup, president, Sverdrup & Parcel Inc., consulting engineers.

Directors are Father Reinert and Messrs. Dearmont, Johnston, Bertram and Volz.

The university owns the necessary tower for the station at 3673 West Pine Blvd. and location of the transmitter would be 3621 Olive St., according to Father Reinert.

Tall Tower Hazard Study

(Continued from page 63)

need for high tower, high power stations.

The ad hoc group earlier considered the report of the subcommittee on criteria for use by airspace subcommittees in making aeronautical studies of TV tower applications [B•T, June 2]. The report, now being circulated, is considered the basic document of the ad hoc group in that it recommends the "status quo" in handling of tower approval applications on a case-to-case basis as now provided in Part 17 of FCC's rules and regulations.

The alternative proposal has been to adopt fixed "criteria" to guide airspace subcommittees in handling tower applications [B•T, April 7].

Concerning the fixed criteria proposal, the report states "the subcommittee doubts that general standards can be developed for use in special aeronautical studies which can be applied to tower applications in a purely mechanical manner to determine whether or not a specific tower could or could not be approved from an air navigation hazard viewpoint."

Elsewhere, the report notes the subcommittee considered the proposed criteria "and concluded these criteria related solely to the establishment of minimum en route altitudes and therefore were not pertinent for inclusion in Part 17 of the FCC rules." Rather, they should be included in Part 610 of the regulations of the Civil Aeronautics Administrator governing the establishment of minimum en route instrument altitudes, the report says.

Use Single Tower

Suggesting that airspace subcommittees work with TV applicants to put their antennas on a single tower where practical, the subcommittee report indicates that "in order to assist in such encouragement, the airspace subcommittees may recommend adjustments in the use of the airspace, en route altitudes, or other traffic flow changes as may be required to permit the establishment and protection of high television tower sites.

The report, however, notes that towers of 1,000 ft. and above extend into altitudes normally used by small aircraft "and regardless of the day and night marking placed on them, present some degree of hazard." The report urged that "encouragement should be given to selection of sites on tall buildings or located on well-defined landmarks."

The criteria subcommittee was composed of Chairman D. D. Thomas, L. R. Wright and O. F. Thomas, all CAA; R. G. Dinning, ATA; Capt. R. G. Armstrong, Navy, and A. B. McMullen, National Assn. of State Aviation Officials. Mr. Kennedy, representing the Assn. of Federal Communications Consulting Engineers, was an observer but he was not associated with the proposals.

The criteria subcommittee report states:

The subcommittee considered the suggested criteria for use by airspace subcommittees which have been under consideration by the main committee and concluded these criteria related solely to the establishment of minimum en route altitudes and therefore were not pertinent for inclusion in Part 17 of the FCC rules.

The intent of these criteria would be implemented more appropriately if they were included in Part 610 of the Regulations of the Administrator governing the establishment of minimum en route instrument altitudes.

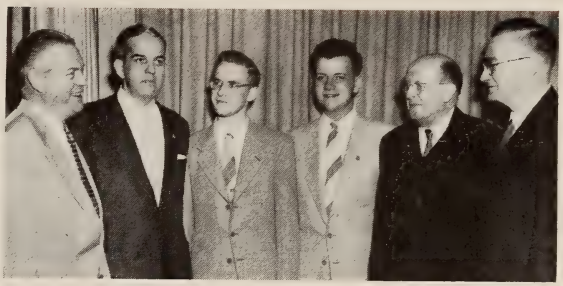
Prior to publication they will be coordinated in the normal routine manner and the comments of the TV industry will be solicited. It was noted that neither Part 17 nor TSO-N18 includes criteria for the establishment of radio range, ILS, and VOR instrument approach procedures, nor do they relate to the establishment of minimum en route altitudes on the civil airways.

The subcommittee recommends that the suggested criteria be withdrawn from consideration by the joint group and published by the CAA in the appropriate part of the Regulations of the Administrator.

The subcommittee doubts that general standards can be developed for use in special aeronautical studies which can be applied to tower applications in a purely mechanical manner to determine whether or not a specific tower could or could not be approved from an air navigation hazard viewpoint.

However, it is probable that guidance can be provided to the airspace subcommittees in working out television tower problems at specific locations.

The idea involves the over-all consideration of aviation and television requirements at any given community and a concerted joint effort to resolve any conflicts of interest that may exist. In general, airspace subcommittees would determine maximum heights of antenna structures in various areas surrounding a given community and would seek to minimize the hazard introduced by tall towers to the extent practicable in consideration of required coverage of the television stations.



It is suggested that the following general guides be used, with the understanding that they in no way change or affect FCC Part 17, which requires special aeronautical study of antenna towers over 500 feet above the ground:

(1) All applications be handled in accordance with current FCC Part 17 and Airspace Subcommittee coordination and recommendation procedures.

(2) All tower applications involving proposed towers under 500 feet in height above the ground be considered on the same basis as they have been considered in the past.

(3) The airspace subcommittee make every effort to work with television applicants to recommend sites or areas within the community which will accommodate television towers 500 ft. and above in height. Whenever practical, the siting of towers in one, rather than several areas of a community should be encouraged by the airspace subcommittees. In order to assist in such encouragement, the airspace subcommittees may recommend adjustments in the use of the airspace, en route altitudes, or other traffic flow changes as may be required to permit the establishment and protection of high television tower sites. Towers of 1,000 ft. and above extend well into the altitudes normally used by small aircraft, and regardless of the day and night marking placed on them, present some degree of hazard. Therefore, the airspace subcommittees must carefully evaluate the risks, difficulties and restrictions these towers will present to aviation operations of all types if approved. Encouragement should be given to selection of sites on tall buildings or located on well-defined landmarks.

(4) The FCC table of assignments of television channels contemplates the use of very high towers to provide maximum coverage of the United States. The television industry in attempting to provide the service is expected to bid for channels and propose very high towers. Both the aviation and television industries must cooperate toward the end that neither industry is expected to accept unreasonable restrictions.

TWO Voice of Democracy winners and FCC Chairman Paul A. Walker were honor guests at Washington luncheon June 13, with Allen M. Woodall, president of WDAK Columbus, Ga., as host [B•T, June 16]. Left to right: Harold E. Fellows, NARTB president; Mr. Woodall; Dwight Clark, Fort Collins, Col., 1951-52 winner; Robert Burnett, 1950-51 winner; Chairman Walker; Judge Justin Miller, NARTB board chairman.

Mr. Tipton's letter to the House Interstate & Foreign Commerce Committee sought to amend the Communications Act by amending S 653, the McFarland Bill, passed by the House last week (see story page 25). A full explanation of the procedure and policy of FCC respecting towers and the air navigation hazard problem is presented by Comr. Hyde in his reply, sent to Rep. Crosser.

Commissioner Hyde, as acting FCC chairman, wrote in part:

The Commission has carefully considered this proposal and wishes to submit the following comments to your committee.

Mr. Tipton has made his proposal in light of his stated belief that it is necessary to remove any doubt as to the Commission's authority to deny applications which involve radio or television towers which might constitute a hazard to air navigation. The Commission is of the belief that it already has full authority, under the existing provisions of the Communications Act, to deny any applications which may involve a hazard to air navigation. The question of hazards to air navigation is clearly one element of public interest which sections 307, 309, and 319 of the Communications Act direct the Commission to consider in granting applications for licenses and construction permits. Section 303 (q) of the Communications Act gives the Commission specific authority to require the painting and/or illumination of radio towers where they may constitute a menace to air navigation. That section does not purport to limit in any way the licensing power of the Commission and the Commission's duty in the exercise of that power to determine whether or not in individual cases the grant of an application would serve the public interest. The authority contained in section 303(q) certainly does not mean that the Commission is powerless to deny an application on the ground that the hazard of air navigation created by a proposed antenna is such that it would not be eliminated or sufficiently minimized by painting or illumination. Moreover, the Commission's authority in this field was specifically upheld in the case of *Simmons v. Federal Communications Commission* (79 App. D. C. 264, 145 F. 2d 578), where the Court of Appeals stated (79 App. D. C. at 266): "We think that public convenience, interest, and necessity clearly require the Commission to deny applications for construction which would menace air navigation."

Pursuant to its statutory powers and duties, the Commission has promulgated rules which prescribe certain procedures and standards with respect

(Continued on page 66)

MERCHANDISING

NBC TV Plan By Oct. 1

NEW NBC-TV merchandising service, to be available by Oct. 1, was announced Tuesday by Edward D. Madden, NBC vice president in charge of TV sales and operations. He also announced that later this year NBC will release a study made with Schwerin Research Corp. demonstrating through actual case histories ways in which TV advertisers have been able to improve their commercials.

Speaking at the American Marketing Assn. convention in Cincinnati (see separate story, page 26), Mr. Madden said that the new television merchandising service is being developed along the lines of the radio service started by NBC less than a year ago. This service "has proved its value by knitting the network, the individual affiliated stations, the national advertisers and the local retailers into a compact and powerful sales team," he reported.

The Schwerin study to be released by NBC-TV is the latest in a series of television research studies which have cost NBC about a quarter of a million dollars and have produced three reports—the Hofstra Study, Television Today and Summer Television Advertising, Mr. Madden said.

These studies, he explained, "provide precise measurements of the sales effectiveness of television advertising" by comparing, not TV homes with non-TV homes, nor TV areas with non-TV areas, but program viewers versus matched non-viewers.

The frequently used technique of comparing TV markets with non-TV markets is "predestined" to give the average advertiser an incorrect answer of the effectiveness of his TV advertising, Mr. Madden said, because "in the TV market his brand is bucking the competition of other television advertising for competing brands. In the non-TV market this competitive television advertising is not present."

Tall Tower Hazards

(Continued from page 65)

to the Commission's consideration of proposed antenna structures which are designed to serve as a guide to persons intending to apply for radio station licenses. These rules are contained in part 17 of the Commission's Rules and Regulations, a copy of which is enclosed, and were formulated in conjunction with the Civil Aeronautics Administration, the Department of Defense, other Government agencies and the radio industry after exhaustive consideration of all facets of the problems and in light of many years of experience in this field of the parties concerned. We would also like to point out that the Civil Aeronautics Administration and the Federal Communication Commission are now jointly considering the possibility that part 17 of the Commission's rules may have to be amended or amplified in light of the expected filing of a vast number of applications for new television stations as a result of the lifting of the Commission's television "freeze."

In accordance with part 17 of the Commission's rules, proposed antenna structures, which in light of the criteria set forth in the rules, require aeronautical study, are referred by the Commission to the Airspace Subcommittee of the Air Coordinating Committee for its recommendation as to whether a proposed tower will constitute a menace to air navigation. The Air Coordinating Committee was created in 1946 by Executive Order No. 9781 to provide for the development and coordination of aviation policies. The voting members of the Airspace Subcommittee are representatives of various Government agencies and representatives of the aviation industry sit on the subcommittee but not have a vote.

It is important to note that while the Airspace Subcommittee makes recommendations with respect to proposed antenna structures, the final determination as to whether an application must be denied because it proposed a tower which will be a menace to air navigation must necessarily be made by this Commission in accordance with its statutory duties. If the Airspace Subcommittee recommends denial of an application and no adjustment satisfactory to both the subcommittee and the applicant can be reached, the applicant must be afforded a hearing as specified by section 309 (a) of the Communications Act.

As explained above, the Commission believes that it now has adequate authority to deny applications which may involve hards to air navigation and that the procedures established by part 17 of the Commission's rules are functioning satisfactorily, and therefore, we are of the opinion that no amendment to the Communications Act vesting the Commission with specific authority to deny such applications is necessary. The amendment suggested by the Air Transport Association provides for procedures which are similar to those now followed by the Commission in part 17 of its rules, but the Commission considers that it would be unwise to freeze these procedures unnecessarily by making them part of the Communications Act. Both the aviation and radio industries are now undergoing unprecedented growth and change which may require reevaluation and readjustment of the Commission's procedures for dealing with the problem of hazards to air navigation caused by antenna towers.

The Commission appreciates your action in affording us an opportunity to comment on this proposal and we shall be happy to furnish any additional comments or information that your committee may desire. The Bureau of the Budget has informed us that it has no objection to the submission of these comments to your committee.

Eidophor Showing

FIRST American demonstrations of the Eidophor system for projection of large screen theatre television with CBS color are being held at private showings this week in New York. Private showing for the press is being given by 20th Century-Fox Film Corp., owner of the American rights to the Eidophor system, developed at the Swiss Federal Institute of Technology in Zurich.

For the Tardy Tuner

AN ANSWER to the problem of tuning in a TV "movie" after it has started and never discovering how it began has been found by WJZ-TV New York. Beginning June 7, station launched *Complete Theater* starting at 8:30 p.m. and continuing until sign-off. Two consecutive showings of one full-length film will be offered each Saturday, one starting at 8:30 and the other at 10:30 p.m. According to station spokesmen, nine advertisers have already signed for spot announcements on the program, which is offered for sale on a participating sponsorship basis.

FILM CENTER

Asked by FPA of N. Y.

APPOINTMENT of a committee to explore prospects for a TV film production center in New York was made last week at a meeting of the Film Producers Assn. of New York with city governmental, business, and civic authorities.

David I. Pincus, Caravel Films president, was named to head a four-man FPA committee to work on the project, and a city committee is to be named by Mayor Vincent R. Impellitteri and City Commerce Commissioner Walter Shirley, spokesmen reported.

The movement for a city-built film center for New York's 300 film producing companies is motivated by fear most future film production may center in Hollywood, with an estimated $2 billion loss to New York in five years unless greater facilities are available. New York real estate and insurance representatives, along with Chamber of Commerce and other businessmen, are cooperating in the project, an FPA official said.

He reported a preliminary search for a site already has been launched.

Named by FPA to the committee with Mr. Pincus were: Ed Lamm, Pathescope Productions; Walter Lowendal, Transfilm Inc., and Pete Mooney, Audio Productions, who also is president of FPA.

Ken Murray Signed

KEN MURRAY, producer-star of CBS-TV's *Ken Murray Show*, has signed a new long-term exclusive contract with CBS Television Network, Hubbell Robinson Jr., vice president in charge of network programs, announced last week. Plans are now underway for the comedian's new series of programs for CBS-TV this fall, Mr. Robinson noted. *Ken Murray Show* went off the air June 14 for a summer hiatus.

MARCH OF TIME

To Do Miller Series

MILLER Brewing Co., Milwaukee, has commissioned the March of Time, New York, to film a series of 26 half-hour news-documentaries for sponsorship next fall. The March of Time will be converted from the popular theatre format to television for the first time.

Miller's agency, Mathisson and Assoc., Milwaukee, will begin buying time in some 50 markets early next month. The TV campaign will be implemented by a similar radio drive. Plans for radio are not definite, a company spokesman said, and no decision has been made about purchase of regional network and/or spot. Miller dropped its Mutual network sponsorship of Gabriel Heatter late in March, and this summer will use only occasional radio spots and TV shows.

Current news footage will be shot by the March of Time staff each week for the film series. Westbrook Van Voorhis will handle narration. Fred Feldkamp is supervisor and director.

March of Time staffs throughout the world will work on the Miller series. The brewing company previously sponsored *Crusade in Europe* on TV, filmed by the same concern.

BUILDING ORDER

More Aluminum for Radio-TV

NEW government directive permitting radio-TV broadcasters and other industrial-classified groups to self-authorize greater quantities of aluminum for construction and remodeling projects was issued last Wednesday.

Broadcasters now may write their own ticket for 2,000 pounds of aluminum per quarter per project instead of the previous 1,000 pounds. Carbon and alloy steel quotas (25 tons) and copper and copper-base alloys (2,000 pounds) remain the same. Aluminum may be substituted for copper in certain instances.

In announcing the revised order, Henry H. Fowler, National Production Authority administrator, said increased shares were made possible by availability of copper imports and failure of demands for aluminum to materalize.

Radio-TV broadcasters have continued to receive authorizations in late months for materials above self-ordered ceilings on larger building projects. One such approval was for 15 construction programs totaling over $12 million for the third quarter [B•T, June 16].

WHK Legal Counsel

WHK-AM-TV Cleveland, Ohio, which has filed application with FCC for UHF Channel 19 [B•T, June 9], retains Loucks, Zias, Young & Jansky as its Washington legal counsel. Resumé of the WHK-TV application incorrectly listed its Washington counsel as Hanson, Lovett & Dale.

SAG TERMS

ATFP Would Agree on Pay

FACED with a Screen Actors Guild walkout tomorrow (June 24), members of the Alliance of Television Film Producers in an eleventh-hour move last weekend indicated they would agree to SAG terms on re-use payment for actors in video films. Issue has been holding up signing of a new collective bargaining contract by both groups.

With four member companies of the Association of Motion Picture Producers—Columbia, RKO Radio, Universal International and Republic—having started negotiating an interim deal with SAG for re-use payment to actors in films for television, ATFP members feel that to avert a strike they have no choice and must follow pattern set by these major studios.

Residual Rights Issue

In negotiations for some months on a new collective bargaining contract, SAG and ATFP talks have been stymied over the residual rights issue. TV producers have stiffly resisted SAG demands for such additional payment. Both groups, however, are in accord on all other issues of the new contract.

The guild, in conformity with the Taft-Hartley Act, last April served a 60-day notice that it would "assert its legal rights" and cancel existing arrangements with ATFP members unless an agreement on all issues of the new contract was reached by June 24, thus stressing the importance placed on the question of residuals.

Since there is no actual existing contract between the groups, it was explained that SAG's executive board can legally instruct members not to work. However, the customary guild policy is for the board to take a strike vote and then send out a referendum to its membership.

TV 'SUPER CIRCUS'

Available on Co-op From ABC

ABC's successful television feature, *Super Circus*, is being sold for the first time on a cooperative basis to stimulate sales during summer months. Canada Dry ginger ale, a regular winter sponsor, through J. M. Mathes agency, New York, retains alternate weeks of the first half hour of the Sunday, 4-5 p.m. Chicago-originated show.

The first portion is offered for co-op sponsorship in various markets every other week until Sept. 14 and the second portion weekly until Aug. 31. The first half-hour has been telecast live on 22 stations, with a total lineup of 38; the second-half, live on 30 with a total of 48. Dean Milk Co., Chicago, for Scoop ice cream, will sponsor the second segment through Leo Burnett agency, same city, until Mars Inc., Chicago candy concern, resumes sponsorship Sept. 14.

Trendex, Nielsen Report; TelePulse Expanding

(Report 221)

TOP TEN network TV programs, according to Trendex Inc. ratings for week of June 1-7, were released last week as follows, based on the one live broadcast during that week:

1. I Love Lucy (CBS)	49.6
2. Talent Scouts (CBS)	38.1
3. Godfrey's Friends (CBS)	32.1
4. Red Skelton (NBC)	31.8
5. What's My Line (CBS)	31.0
6. Gangbusters (NBC)	29.7
7. Star Theatre (NBC)	28.0
8. Big Town (CBS)	27.8
9. The Web (CBS)	27.7
10. Strike It Rich (CBS)	27.1
SPECIAL SPORTING EVENT:	
Walcott-Charles Boxing (NBC-TV)	58.6

* * *

TelePulse Expanding To 26 Markets

THE PULSE Inc., New York, announced last week that beginning with multi-market TelePulse for June, the number of markets included will be increased to 26, covering more than nine million TV families. New markets are Milwaukee, Pittsburgh, Richmond, San Antonio, Toledo and Syracuse.

Three additional markets—Providence, San Diego and Rochester—will be included in monthly reports beginning in September when the surveys resume after a summer hiatus.

Network TV programs seen in four or more markets will be included in the reports, with individual market ratings computed according to the number of TV families in the area.

* * *

'Boys Life' Surveys Set Ownership

HALF the families of a group of boys, 10 to 17, representing more than 2 million boys, own TV sets, according to a survey by *Boys' Life*, official magazine of the Boy Scouts of America.

The study indicated 80% of families own record players and nearly all own radios, 53% owning three or more. Most popular TV sets and phonographs were RCA Victor, while Philco radios ranked first, *Boys' Life* reported.

Asked about record-purchasing, most of the boys said they first heard their favorite records on the radio. Others listed TV, juke boxes, record shops, movies and individual programs such as the Arthur Godfrey show.

Quizzed on record speed preferences, the boys indicated 70% of families own 78 RPM phonographs, 19% had 45 RPM machines and 7% owned 33⅓ RPM players. Three-speed players were owned by 26% of the families.

The boys chose the *Red Skelton Show* as their favorite radio and TV program. Next TV choices were *Colgate Comedy Hour* and *I Love Lucy*. Next radio favorites were *Dragnet* and *Lone Ranger*.

Viewers Love 'Lucy,' Nielsen Report Shows

VIEWERS throughout the nation apparently still love the CBS-TV Monday night show, *I Love Lucy*, sponsored by Philip Morris. The top-ranking show stars the husband-and-wife team of Lucille Ball and Desi Arnaz. Other shows which rated Nielsen's top 10 for the two weeks ending May 24, are:

NUMBER OF TV HOMES REACHED

Rank	Program	Homes (000)

Total Markets on Air 64* Stations on Air 109* Estimated Sets in Use 17,537,316

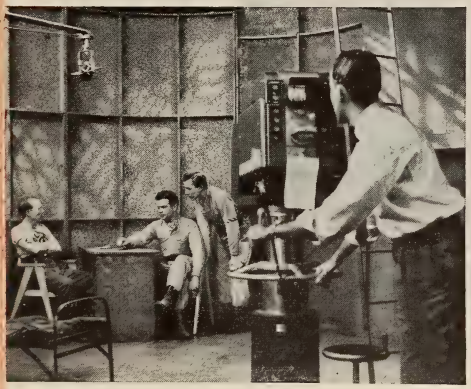
* Includes XELD-TV Matamoros, Mexico

Editor's Note: Totals for each market represent estimated sets within television area. Where coverage areas overlap set counts may be partially duplicated. Sources of set estimates are based on data from dealers, distributors, TV circulation committees, electric companies and manufacturers. Since many are compiled monthly, some may remain unchanged in successive summaries. Total sets in all areas are necessarily approximate.

he turns the ladies' heads

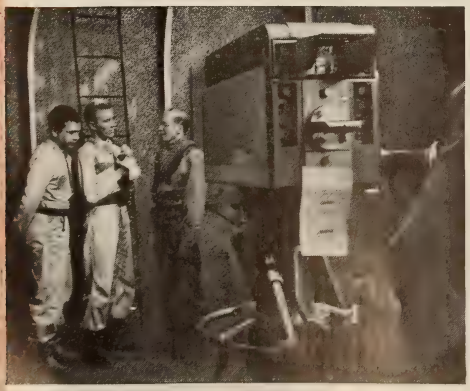
Carolina ladies by the thousands turn to their TV screens at 3 (M-W-F) when cavalier Kurt Webster animates their afternoon with his half-hour "Kaleidoscope." Appearances by authoritative guests from the worlds of fashion, gardening and entertainment are aptly integrated with Snader telescriptions to produce a gay and intimate setting for your advertising message. Let us show you how "Kaleidoscope" creates new Carolina buying patterns.

WBTV

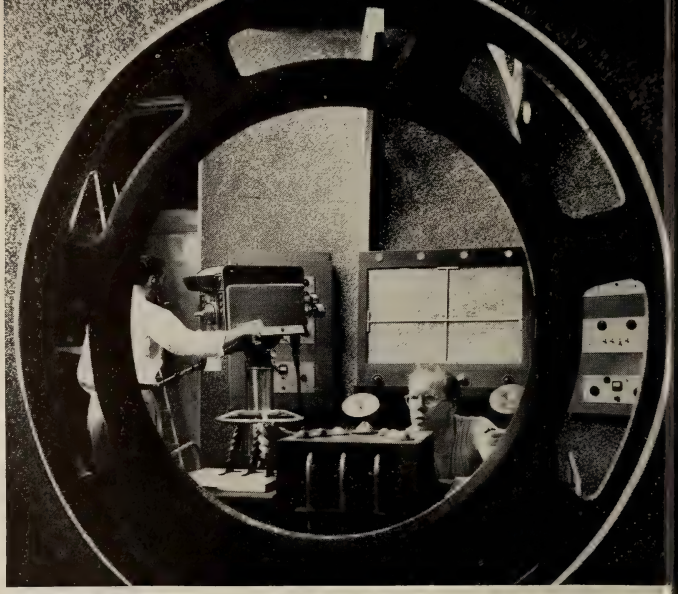


SERVING THE CAROLINAS' BIGGEST TELEVISION AUDIENCE

JEFFERSON STANDARD BROADCASTING COMPANY



Represented Nationally by CBS Television Spot Sales



ABC VICE-PRESIDENT Frank Marx says: "These new G-E studio camera channels are being used on one of the most difficult shows we produce. They have been in daily operation for 5 months and have given satisfactory service."

DOLLYING-IN FOR CLOSE-UPS is no major operation with new camera, which fits any standard TV tripod or dolly. Low center of gravity permits camera head to remain steady while in motion. Channel components easily accessible.

FLUSH VIEWFINDER WINDOW and adjustable, removable visor provide full picture viewing from any angle. All essential control knobs are recessed—easy to adjust, yet protected against accidental misalignment. Note cue sheet below lens handle.

QUICK CHANGE OF IMAGE ORTHICON can be effected in 2 minutes. Only one thumb screw and turret to remove. Silent blower system cools I. O. tube uniformly, lengthening tube life.

NEW G-E TELEVISION CAMERAS HANDLE TOUGH JOBS AT ABC

Network finds intricate shows like "SPACE CADET" no problem for new fast-focus, multi-lens G-E units

● Lightweight, quiet, and a vast improvement over conventional studio equipment, General Electric's latest TV camera channel is setting new standards of technical efficiency for ABC. Only 3 hours after these cameras were turned over to ABC operations, they were on the air handling tough commercial shows like "SPACE CADET"—at a remarkable saving in installation, maintenance and operating expense.

More than 30 specific improvements over previous models and those now installed are incorporated in the new units. Engineers at Electronics Park, General Electric's television headquarters near Syracuse, New York, spent 2 years perfecting the equipment now in quantity production.

TV broadcasters who want all-purpose reliability in studio camera channels will find it here—*and these units are completely interchangeable with most existing standard makes.*

The G-E Broadcast specialist at our office near you has more data on the complete G-E line of transmitters, antenna and studio equipment. Call him for full information, or write: *General Electric Company, Electronics Park, Syracuse, New York.*

Nothing like it in the industry!

QUICK, POSITIVE FOCUS. Shooting through skyport of space ship "Polaris", cameraman can 'line up' using outside crank or inside coupling knob. Viewfinder tube is aluminized for bright, sharp pictures. Magnification up to 25 times.

Complete Television Equipment for UHF and VHF

GENERAL ELECTRIC

HIGH-SPEED COATED LENSES, made for G.E. by Bausch & Lomb, are provided with each camera. More than 15 different lens types can be fitted to the turret, will snap into operating positions without jiggle or wobble.

FCC On City Priority

(Continued from page 63)

international agreements in the future.

Executive Committee of the Federal Communications Bar Assn., meeting last Monday, turned down a proposal to petition for reconsideration of the Sixth Report. Reasons: Petition would only reaffirm FCBA majority view of a year ago that a fixed allocation plan is illegal and the association is not in a position to carry its case to court.

The KXEL petition, first of two directed to the Commission's temporary processing procedure, specifically asked amendment of footnote 10 of Sec. 1.371 of the rules. Footnote 10 sets forth the temporary procedure.

The other protest respecting the procedure was filed a fortnight ago by Westinghouse Radio Stations Inc., which submitted an alternative plan in part [B•T, June 9]. FCC has not acted on the Westinghouse petition.

Applicant for Channel 7 at Waterloo, KXEL told the FCC it "is in general agreement with the policies adopted by the Commission regarding the consideration of applications for new or changed television facilities [but] feels that the population of the city to which a channel is allocated should not be the sole factor in determining the precedence which should be given to applications."

KXEL Quotes Census

KXEL pointed out that the census figures shows 43.5% of the population lives in rural areas and that less than 29% lives in cities with population over 100,000. There are about 100 cities with populations over 100,000, KXEL noted, 100 cities with populations between 50,000 and 100,000 and about 200 cities between 25,000 and 50,000.

Because of the Commission's limited staff and available funds, KXEL said, there will be "substantial delay" in application processing. This, plus the factor of big cities coming first in processing, will put off service to smaller cities with large rural areas to serve, KXEL contended.

Long delay in the granting of service to rural areas "is tantamount to a temporary denial," KXEL argued, hence, consideration of applications solely upon the population of the principal city to be served "unfairly discriminates against rural areas and smaller cities."

In denying the KXEL petition, FCC observed the station "advances no specific amendment for adoption. Moreover, petitioner contends erroneously that the only consideration the Commission has established for priority in the processing of television applications is population of cities."

FCC's explanation continued:

In fact, the Commission has established a detailed breakdown of cities into numerous groups and subgroups in light of several factors without regard to population, factors such as service received from existing stations, whether only UHF channels are assigned to a community, whether any stations are presently operating in the community, etc. In formulating these categories, population was not considered by the Commission. Within each subgroup, it is correct, the Commission has established as a controlling factor population of cities.

We are of the view, however, that this is the most fair and equitable means for the processing of applications within each such category. We believe that the processing procedure we have established will, within each group as categorized, make possible the affording of television service to the greatest number of people in the shortest period of time.

Furthermore, it is not true that the priority afforded to the largest cities within each subgroup will mean that rural areas will be deprived of service. Extensive rural and sparsely settled areas surround the larger cities and, consequently, such areas would receive service from stations located in these larger cities. Petitioner supplies no adequate basis for changing the temporary processing procedure as presently set out in footnote 10, Sec. 1.371 of the rules.

Both WLWC and WBNS-TV contend that the WLOA petition seeking addition of Channel 4 at Braddock should be denied on grounds that full opportunity for comments and participation were afforded by the Commission and should not now be repeated.

WLOA contends Channel 4 can be allocated to Braddock since the failure to meet the 170-mile minimum spacing rule is so negligible. Braddock's post office is 169.39 miles from the transmitter of WLWC. The latter station is to change from Channel 3 to Channel 4 under terms of the Sixth Report.

As an alternative, WLOA suggests WLWC switch to Channel 10 and WBNS-TV change from Channel 10 to Channel 4. WBNS-TV is 170 miles from Braddock, WLOA notes.

Both Columbus stations, however, charge this alternative cannot be considered by the Commission after the final order since it is a new proposal. Full opportunity was given during the proceeding to consider all proposals, they argue, and to consider new proposals now makes the Sixth Report only tentative, not final.

Charges Untimeliness

Similar charge of untimeliness was made by WIBA respecting the "counter proposal" of the State Radio Council to switch the educational reservation at Madison to the sole VHF channel. The council, which operates the state's educational FM network, is seeking to establish a similar TV network.

Pittsburgh Mayor David Lawrence, concerning failure of FCC to allocate more VHF channels there, concluded in his letter, "I hope that I will be able to retain the conviction that this unfair treatment was the result of inadvertence which the Commission will be prompt to correct and it is in that hope that I am writing asking you to reconsider the matter of assigning commercial VHF channels to Pittsburgh."

The Mayor noted "the consensus of engineering opinion is that because of the unusual character of the terrain in Pittsburgh and the surrounding area a UHF station will not provide a comparable or competitive service to a VHF station. To all intents and purposes, therefore, the Commission assigns to Pittsburgh only two commercial television stations."

WDTV (TV), a DuMont-owned station, is the only TV outlet serving Pittsburgh. It is assigned Channel 3 but under the Sixth Report will change to Channel 2. Other VHF channels allocated there are Channels 11 and 13. Latter is reserved. Three UHF channels are assigned.

Mayor Lawrence's letter continued:

Pittsburgh is the eighth largest metropolitan market area in the United States. The seven markets which are larger were assigned by the Commission an average of over four commercial VHF stations apiece, the assignments ranging from seven in some cases to three in others. Despite the fact that the Commission states in its Sixth Report and Order that population is the most important factor in assigning channels, 27 markets smaller (some much smaller) than Pittsburgh are assigned three or four commercial VHF channels. No market of comparable size in the United States is given so few as two commercial VHF channels. The Commission in its Sixth Report

ABC-UPT INQUIRY

Dr. Rosenthal Testifies

THE PARAMOUNT hearing before the FCC, which involves a number of issues including the proposed merger of United Paramount Theatres with ABC, entered its sixth month last week with two days of testimony from Dr. A. H. Rosenthal, an inventor.

Dr. Rosenthal, called the inventor of the dark trace (Skiatron) TV tube, underwent lengthy examination by FCC Counsel Max Paglin and FCC Hearing Examiner Leo Resnick.

He discussed in highly technical language the dark trace tube and its possible military and domestic applications.

Dr. Rosenthal was employed by Scophony Corp. of America, of which Paramount Pictures Inc. and General Precision Equipment Corp. owned 25% each.

Development Suppressed

Earlier in the hearing, Arthur Levy, Scophony president, testified Paramount had tried to suppress the development of SCA. Paul Raibourn, now Paramount Pictures vice president in charge of television, testified the SCA patents were of no military value and while World War II was on he felt Paramount need not encourage the development of the SCA inventions.

Dr. Rosenthal is no longer with SCA. He joined Freed Radio Corp. in 1948.

Meanwhile, FCC Comr. Frieda B. Hennock granted FCC Broadcast Bureau Chief Curtis Plummer an extension of time from June 16 to June 23 to file a reply to the joint petition of ABC and UPT for removal of the merger issue from the hearing [B•T, June 16, 9]. ABC and UPT, which were supported by CBS but opposed by DuMont, indicated it is important that action be taken on the merger by August, in view of ABC's financial status.

and Order (paragraph 363) explicitly recognized the fact that Pittsburgh was entitled to more commercial VHF channels. Notwithstanding this explicit recognition, it refused to put Channel 9 in Pittsburgh in preference to Steubenville. (The Wheeling/Steubenville area is given two commercial VHF channels—the same number as Pittsburgh—although it is only one-seventh the size of Pittsburgh in population. Despite the fact that the smaller area involved in Wheeling/Steubenville would much more adequately be served with UHF than the Pittsburgh area, the Commission decided to permit the use of VHF in Wheeling/Steubenville and assigned UHF to Pittsburgh rather than Channel 9.)

A comparison of the Commission assignments of VHF channels to the State of Pennsylvania and to the State of West Virginia shows that West Virginia received nine VHF channel assignments and Pennsylvania seven, notwithstanding that the population of Pennsylvania is 10,500,000 and the population of West Virginia is 2,000,000. Ohio, with only 8,000,000 population, has received thirteen commercial VHF assignments, exclusive of the two channels allocated to Wheeling/Steubenville. The Ohio allocation is thus practically double that of Pennsylvania.

VHF Channel 4 could also be used for commercial service in Pittsburgh without violating in any manner the Commission's minimum separation of 170 miles between stations. The Commission's contention that the distance must be measured from a Channel 4 station in Columbus, Ohio, to an arbitrary point (Smithfield Street and Fourth Avenue) in the City of Pittsburgh at which no station would ever conceivably be built rather than to an actual site on which a Pittsburgh Channel 4 station could be constructed, led it to the erroneous conclusion that the separation between a Channel 4 station in Pittsburgh would be less than 170 miles from an existing Channel 4 station in Columbus. (Incidentally, Columbus, which has a metropolitan area of 500,000—less than one-fourth the size of Pittsburgh—is assigned three VHF channels.) This unrealistic adherence to technicalities is in marked contrast to the Commission's own action in other cities—for example, Milwaukee—in requiring a station to change from Channel 3 to Channel 4, notwithstanding that the change would require Channel 4 operation in Milwaukee at only 165 miles from another Channel 4 station.

It is apparent from the above that Pittsburgh could have been assigned four commercial VHF channels instead of two, had the Commission considered Pittsburgh important enough to permit it to disregard its fictitious method of measuring station separations (which would have made Channel 4 available) and if it had considered—as it claims it did—population to be the important criterion in comparing Pittsburgh with Wheeling/Steubenville (which would have required the assignment of Channel 9 to Pittsburgh rather than to Wheeling/Steubenville).

No amount of argument can get around the basic fact that Pittsburgh has fewer commercial VHF stations than any comparable market in the United States and that it could be provided with four commercial VHF channels,—which is less than the average of the seven markets larger than Pittsburgh and is no more than many smaller markets were assigned—if the Commission had considered Pittsburgh in the same light that it viewed other less important cities. This could be accomplished simply by providing for the use of Channels 4 and 9 in Pittsburgh and would not affect the present assignment of a VHF channel for educational use in Pittsburgh in any manner.

Almost by way of adding insult to the injury Pittsburgh will sustain if it is limited by two VHF commercial television channels, the Commission, in listing the city-by-city priorities for processing of applications for new television stations, has ranked Pittsburgh 23rd from the bottom of the list of all of the some 1,276 cities in the United States and its possessions. I do not think that anyone can avoid the conclusion that the City of Pittsburgh, both substantively and procedurally, has been badly treated by the Commission in its Sixth Report and Order.

WKDN, in seeking amendment of Sec. 3.607(b), notes that under the Third Report of FCC, issued in March 1951, "an applicant for Camden could have filed for a channel allocated to Philadelphia" and this would be in accord with Sec. 307(b) of the Communications Act which prescribes fair distribution of radio facilities among the states and communities.

"However, as a result of a request by the Commissioner of Education of the State of New Jersey," the WKDN petition explains, "the Commission in its Sixth Report assigned a noncommercial educational channel to Camden (UHF Channel 80).

But, WKDN points out, since the Sixth Report assigns UHF Channel 80 there on a reserved basis for noncommercial, educational use, the present wording of Sec. 3.607 (b) prevents a Camden station from seeking a Philadelphia channel.

"It is believed that this untoward result is entirely inadvertent. If not, it is arbitrary, contrary to the public interest and in contravention of Sec. 307(b) of the Communications Act," WKDN contends.

WKDN asks FCC to amend the rule by adding to Sec. 3.607(b) this final sentence: "For the purpose of this section a community shall be deemed 'unlisted' if no commercial television channel has been allocated thereto."

Concerning the inquiries of consulting engineers Rountree and Cullum as to the mileage separations to be observed between U.S. stations and assignments or stations in Canada, Mexico and Cuba, FCC wrote the following:

As you are aware, the Sixth Report . . . and the rules adopted therein discussed television agreements entered into between Mexico and the United States and Canada and the United States only. No agreement has been entered into between Cuba and the United States with respect to television assignments and except for special cases which may possibly arise mileage separations need not be considered between United States television stations and Cuban television stations and assignments.

With reference to separations that should be maintained between United States stations and Mexican or Canadian stations or assignments, it should be observed that no minimum separations have been specified in our rules and standards. However, as indicated in the Sixth Report and Order mileage separations above the minimum specified in the Commission's Rules have been observed in connection with separations between stations across the

(Continued on page 74)

KPIX NEW ANTENNA

Operation Begins July 1

NEW type antenna, part of a modernization program begun last January, will be pressed into action July 1 by KPIX (TV) San Francisco which hopes it will solve certain transmission and reception difficulties.

A low gain, wide beam General Electric antenna will operate from a new transmitter site on the summit of Mt. Sutro. It will share the same tower now used by KGO-TV that city under a leasehold arrangement. Cost of development is estimated at $100,000. By using the new antenna, the station expects to extend its service area by more than 1,680 square miles to 5,236 square miles. Al Town, KPIX engineering director, supervised the construction.

borders. Accordingly, in locating transmitters for United States television stations, station separations shall be maintained as close as possible to the assignment separations which have been established.

In this connection your attention is invited to Section 3.608 of newly adopted television rules which provides that authorizations issued by the Commission for television broadcast facilities are subject to the provisions of agreements entered into by the United States with Canada and Mexico and that these foreign countries may make timely objection to any authorizations issued.

With respect to the method of measurement of distances from Monterrey, Nuevo Leon, Mexico, or any other foreign city it is expected that measurements will be obtained with reasonable accuracy from appropriate maps. In the event there are existing transmitters in the foreign cities the distances may, of course, be calculated from these transmitters.

Rep. Rivers' statement to the House charged that FCC's television plan "not only keeps one great segment of our country in a twilight era but results in a calculated blackout for countless hundreds and thousands of people hoping to buy television sets and utilize them with pleasure as other sections of the nation are now enjoying." He noted hearings on competitive applications will delay service two years.

Bringing Comr. Jones' dissent to the Sixth Report and his Pittsburgh and Columbus speeches particularly to the attention of conferees on the McFarland bill (see story page 25), Rep. Rivers said the nation "is entitled to know the facts behind the delay in bringing to the American people adequate television. As soon as it is completely understood by the Congress, I am confident we will be better able to handle this magnificent avenue of entertainment, information, education and indispensable means of communication."

First strong defense of the Sixth Report, answering the attacks by Comr. Jones and others, was made by Comr. George E. Sterling June 13 before the Maryland-D. C. Radio and TV Broadcasters Assn. He contended the report fulfills Congress' mandate that service be provided all the people and not just part of them [B•T, June 16].

Sterling Answers Critics

Comr. Sterling countered that "all too frequently those who criticize" the table of channel assignments "have made the public interest synonymous with the interest of the public residing in the large metropolitan areas."

He pointed out a table of assignments reserves for the smaller communities channels "which are available for use by these communities when they are ready to enter television." Citing the high cost of TV, Comr. Sterling said "most smaller cities and rural areas are not in a position to support local television service at this time. But it is clear that every community, insofar as it is possible, should have an opportunity to receive television service from a local station."

Citing conservation of the spectrum and reservation of educational channels as additional reasons for adopting a table of assignments, Comr. Sterling explained a block of frequencies for educators and small towns would not be practical since this could have been done "only . . . at the expense of unnecessarily reducing the total number of channels available to meet other television needs, especially the needs of the larger cities."

Concerning the Commission reasoning respecting technical standards for station spacings, antenna heights and powers, Comr. Sterling stated:

Here again, the Commission was required to consider the effect of its standards upon the television service which would be available to the smaller communities and the rural areas of the nation. For merely making a reservation of channels for use by these smaller communities is not enough to insure that these communities will receive adequate service. If the Commission by reason of the reservation of channels for the smaller cities had been led to believe that this was a guarantee of adequate service to these communities, it would, indeed, have made the error of confusing circles on a map for real service. As I have pointed out, the basis for the reservation was that the smaller cities and rural areas could not generally support local television service at this time or in the immediate future. But even if the smaller cities were ready at this time to establish television, could we expect cities and communities with a population of 30,000 or less to support two or maybe more than two television stations?

It is one of the inescapable facts of our economy that people residing in fringe areas away from the large cities and people residing in rural areas are forced, in the first instance, to rely on television service at all. Under these circumstances, the Commission was required in establishing mileage separations and maximum antenna heights and powers to insure that adequate service from the large city stations would get to that family on the farm.

How do standards with respect to mileage separations between stations and maximum antenna heights and powers insure service to the outlying areas? The answer is that making it possible for each station to have the widest coverage possible consistent with an efficient utilization of the spectrum extends the television signal out to the farm. When the stations in the larger cities are placed far enough apart, the signals in the fringe areas render service and do not blot each other out with objectionable interference. The Commission in establishing the Table and the engineering standards had to make sure the separations were adequate; and in this connection, I want to point out that the signal that comes to the farm must be of good quality, if not the best quality picture.

The family that lives on the farm is entitled to more than a picture with a lot of snow and venetian blinds. It may be unfortunate that the outlying and fringe areas cannot receive the very high quality picture which most of the viewers in the large cities may receive. But nothing is more important to insure that the outlying areas receive a high quality picture, than the minimization of interference by the establishment of wide mileage separations between stations.

Similarly, greater antenna heights and higher radiated powers are needed so that the stations may make effective use of the potential service that can be rendered by virtue of wide separations. The maximum antenna heights and maximum effective radiated powers the Commission has established are both designed to permit each station to serve the widest possible area consistent with efficient utilization of the spectrum so that the people in the outlying areas will get a good quality picture. And may I point out here that these high antenna heights and high effective radiated powers also improve the quality of the picture inside the large city. They make possible the use of antennas in apartment houses and help overcome the man-made obstructions which make it so difficult for many city television owners to secure a good picture. . . .

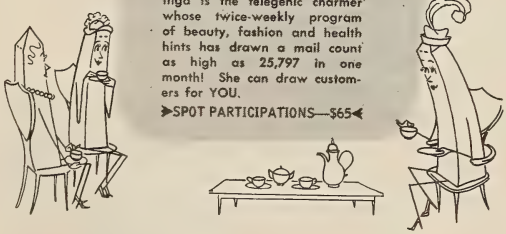
I find it amusing and interesting that the very same critics who attack the Commission for not making more assignments in the smaller cities also criticize the Commission for maintaining wider separations and permitting higher antenna heights and powers. In fact, the particular effect of wider separations between stations and higher antenna heights and powers is the assurance of service to the smaller cities and to the rural areas. I also find it puzzling that some of the critics who claim we have not made adequate provision for the interests of smaller cities, also argue—just as vehemently and in the very same breath—that we should have no Table of Assignments at all. . . . I fail to see how, in the absence of a Table, it would be possible to prevent big cities from gobbling up a disproportionate share of the scarce channels at the expense of the smaller cities. No panacea has been called to my attention which would limit the number of assignments for larger cities if assignments were to be made on a demand basis alone.

It is not true, as some have implied, that we have placed on smaller cities the onerous burden of maintaining television installations similar to those which must be maintained in the giant cities. . . . In fact any city with a population of less than 50,000, may under the Rules, operate with a minimum of 1 kw radiated power with a 300 foot antenna so long as they lay an adequate signal over the principal community to be served.

The loudest criticism directed against our decision is that we have maintained separations in the VHF that are too wide. But why should we have reduced these separations? The ready answer of the critics is that we can get more assignments that way. As a matter of fact, unless we reduce separations substantially, the number of additional assignments that we would pick up by reduced separations would be few. And if we did take such action, we would be employing separations below those necessary to insure interference-free service. We would be right back in the ice age, flirting with another "Freeze." The memory of some men is, indeed, short. . . .

Now a word about the UHF. I must say that on the whole the criticism of the UHF portion of our plan is not as vociferous as the VHF portion. This in my mind is only an indication that most of our critics are only interested in obtaining more VHF channels for larger cities. . . .

I should like to point out here that while the so-called disparity between UHF and VHF coverage may presently be of some substance, it will, I believe, in the long run be minimized. In fact, the service areas of the UHF and VHF stations in the same cities will under very many instances be almost the same size.



One thing is certain—that UHF will in general provide a TV service free from the effects of several forms of interference that plague VHF frequencies. From a technical standpoint, higher quality of pictures is insured.

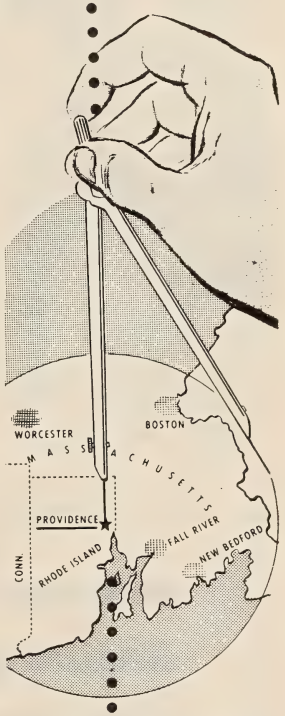
NBC-TV EXPERIMENT

Show Kinescoped On Location



NBC-TV June 13 telecast of the *RCA Victor Show Starring Ezio Pinza* was kinescoped on location June 7 in a special programming experiment.

Using "Stop-start" camera technique of motion pictures, each take was microwaved from San Juan Capistrano to NBC Hollywood, 60 miles south. Video and audio then were reported by "hot kinnie" and edited until the reel was complete. After negatives were cut, the picture was ready for screening.

To circumvent the American Federation of Musicians' 5% prerecording fee, orchestral music by David Rose was fed by master control to New York and piped back along cable with taped dialogue track, thus making entire sight and sound positions originate from New York.

The experiment, resulting from two months planning by Program Producer Ted Mills, might eliminate the necessity of filmed TV for network programs, it was reported.

SCHOOL SERIES

WICU Earns Plaudits

WICU (TV) Erie, Pa., has just completed a series of public school telecasts which brought an expression of "lasting appreciation" from school officials.

Twenty programs were aired on a thrice-weekly basis during the final seven weeks of school. More than 800 children participated. Plans are taking shape for continuing the programs in the next school-year. A similar series is being developed jointly by WICU personnel and administrators of the Erie Catholic Diocesan school district.

John M. Hickey, Erie schools superintendent, wrote Edward Lamb, WICU president, "The reactions to the program *(Erie Public Schools At Work)* indicate wide-spread appreciation on the part of the people and justify the tremendous amount of extra effort on the part of so many principals, teachers, and pupils. Be assured of our lasting appreciation," Mr. Hickey concluded.

TAFT AGAINST TV

During Committee Hearings

SEN. ROBERT A. TAFT (R-Ohio), a candidate for the Republican Presidential nomination told a Washington National Press Club audience last week, that a Congressional committee could not carry on its business satisfactorily while being telecast.

When asked about televising activities of the GOP credentials committee in Chicago, Sen. Taft said:

"I'm inclined not—just as for the same reason that if I were chairman of a committee in Congress that I would not permit television proceedings. It seems to me that where you have a proceeding in which you're trying to determine a semi-judicial proceeding or legislative question, the presence of television cameras makes it almost impossible to give any reasonable attention to what you're doing. Now I don't favor any rule in Congress. That's my own feeling. But as chairman I wouldn't permit proceedings to be televised. I wouldn't object to them bringing a camera in to take pictures before starting. But as far as trying to conduct business under television lights, I think it's utterly impossible to reach a successful conclusion."

His view was an apparent tightening of his opinion set forth last February in BROADCASTING • TELECASTING [B•T, Feb. 4].

TRADE RULES

Third Conference Held On Revised Standards

REVISED rules to guide manufacturers, dealers and distributors in the commerce of radio-TV sets moved a step closer last week when a third government-industry conference was held in Washington, D. C., under the auspices of the Federal Trade Commission.

Suggested trade practice standards drafted by a special all-industry committee were discussed last Wednesday. When finally promulgated—perhaps by the year's end—the rules will cover television as well as radio practices, which manufacturers have followed the past 13 years.

There is general agreement, if not unanimity, on the rules proposed by an industry group under Louis B. Calamaras, executive vice president of the National Electronics Distributors Assn. Top officials of Radio-Television Mfrs. Assn. also participated.

At the conclusion of Wednesday's session, Paul Butz, FTC Trade Practices Conference Bureau, told manufacturing representatives and dealer-distributor trade groups that the commission staff would study the record and summarize the evidence for FTC members. FTC then will publish a final set of rules and hold a hearing, probably this fall.

Major discussion last week centered on proposed rules on pricing (inclusion of excise taxes), breakdown on tube count, uniformity of reference to viewable picture tube area, cabinet designs and so-called "push money."

RTMA President Glen McDaniel said he felt the industry had not been guilty of any deception in advertisements on picture size, which have followed a historic pattern in the industry since TV developed.

Mort Farr, president of the National Appliance and Radio-TV Dealers Assn., asserted that the problem is less one of actual size measurements than deceptive claims involving such adjectives as "giant-size" screens when such is not the case.

Mr. Butz informed industry representatives that the National Better Business Bureau suggested a rule governing deception as to type of cabinet — type of wood, veneer, etc. He agreed some rule should be included to spell this out.

Twenty-nine rules were drafted by the industry group, differing slightly from the FTC staff draft of last year [B•T, May 12]. Two other rules (33 and 34) were omitted in the industry draft because of lack of agreement among industry members, it was explained. These cover "prohibited discrimination" (prices, rebates, discounts, credits, advertising or promotional allowances) and coercion in "aiding or abetting use of unfair practices."

RTMA was represented by Mr. McDaniel and Ray Donaldson, legal counsel. Besides Mr. Calamaras of NEDA and Mr. Farr of NARDA, representatives of most of the major set manufacturing firms attended the conference.

MARKET RESEARCH

MBS, NBC-TV, ABC Join ARF

MBS, NBC-TV and ABC (as a group, to get both radio and television market research information) have become subscribers to the Advertising Research Foundation, joining CBS Radio, which had heretofore been the only broadcasting organization on the ARF roster.

Election of the networks to membership by the ARF board was announced by the foundation, which also reported that eight publications—*Advertising Age, American Home, Better Homes & Gardens,* BROADCASTING • TELECASTING, *Newsweek, Redbook, Sponsor, Successful Farming*—and one advertiser, Phillips Petroleum Co., had become participating subscribers of ARF, bringing the total number to 148.

MILES Labs., Elkhart, Ind. has signed with WMAQ Chicago for sponsorship of 10 football broadcasts Saturday afternoons starting Sept. 27. Agency is Geoffrey Wade Adv., Chicago.

FOUNDATIONS

$75,000 Probe Budget Voted

TENTATIVE approval of a $75,000 appropriation for the Cox select committee to investigate tax-exempt foundations was given last week by a House Administration subcommittee by a vote of 4 to 3. Sum must be approved by the full committee and then by the House.

Resolution authorizing the study was presented by Rep. Eugene E. Cox (D-Ga.) for the purpose of inquiring whether foundations' activities are un-American or subversive or otherwise "not in the interest or tradition of the U. S." It passed the House last April by a 194 to 158 vote amid charges that it would be a probe of ideas. [See editorial, "Cops and Robbers Congress," May 12].

Opposition to the appropriation was voiced at the House Administration subcommittee meeting by Clarence Mitchell, director of the Washington bureau of the National Assn. for the Advancement of Colored People. He claimed that the investigation would attack efforts to improve the opportunities of Negroes.

Besides Rep. Cox, who is chairman, the select committee comprises Democratic Reps. Donald L. O'Toole (N. Y.), Aime J. Forand (R. I.), Brooks Hays (Ark.) and Republican Reps. Richard M. Simpson (Pa.), Angier L. Goodwin (Mass.), and B. Carroll Reece (Tenn.).

NBC TV CENTER

Unit To Be Ready in Sept.

FIRST two studios of the proposed new $25 million NBC Television Center in Burbank, Calif., now under construction at 3200 W. Olive Ave., will be ready for use by the end of September.

Built at an estimated cost of $2.7 million, the two-studio unit with service building, is about 20% completed, according to John K. West, NBC Western Div. vice-president. Each studio will have seating arrangements for 500 persons.

NBC in mid-April was given permission by the NPA for a second unit of studio buildings. The network last year bought 49 acres from Warner Bros. and the city of Burbank for its planned television center.

Jones Dismissal Ruling

THE APPELLATE division of the New York Supreme Court last week awarded Duane Jones Co. a dismissal of the suit brought against the agency by nine former employes seeking compensation for their stock holdings. But spokesman for Scheideler, Beck & Werner, agency formed by the nine former employes, said the dismissal was made with leave to file an amended complaint within ten days and that one will be filed within that time.

CIVIL DEFENSE

Showings Via Closed Circuits

FEDERAL civil defense planning takes on an expanded closed circuit TV network face next Thursday with a presentation for policemen in 10 U. S. cities in eight states.

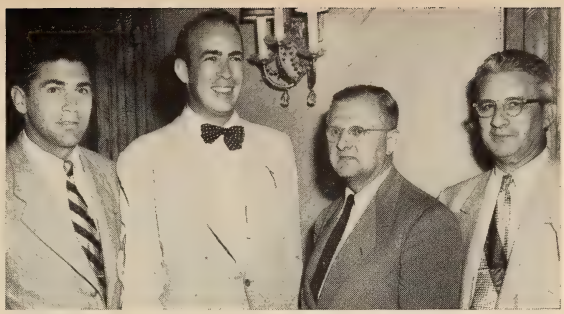
Flushed with enthusiasm over two previous demonstrations beamed to select CD target groups, government authorities last week wrapped up plans for a more ambitious venture.

Over 32,000 city policemen will be briefed in a one-hour closed circuit telecast originated from the studios of WMAL-TV Washington. Microwave and coaxial cable facilities will link from the East Coast to the Midwest theatres in Boston, New York, Baltimore, Philadelphia, Pittsburgh, Cleveland, Toledo, Detroit, Chicago and Milwaukee.

In announcing the presentation, Millard F. Caldwell Jr., Federal Civil Defense Administrator, explained that the 10-city network—"the first of its kind ever attemped"—stemmed from FCDA's success in its first two "experiments."

So successful were these previous ventures in eastern cities that agency authorities now shy away from any reference to this and any future presentation as an "experiment" in civil defense training by closed circuit theatre TV. Yet, withal, FCDA has been a pioneer in a type of program that has impelled other government departments to analyze this method for their own possible use [B•T, May 5].

On Non-Profit Basis



Joining the federal planners on Thursday's project are United Paramount, Warner Bros., Loew's, RKO and Skirball Bros., all of which are offering their theatres on a non-profit basis. Cost of the presentation is borne by FCDA.

Theatres by cities taking part: Loew's State in Boston; Paramount in New York; Warner Stanley in both Philadelphia and Baltimore; Loew's Penn in Pittsburgh; RKO Palace in Cleveland; Rivoli in Toledo; Palm State in Detroit; Warner in Milwaukee; Uptown in Chicago.

City and state police will assemble in local theatres at 10 a.m. for a program designed to acquaint them with the magnitude of policing problems in the event their cities are bombed. Regular policemen form the nucleus of a civil defense police service force. Admission is by invitation.

Two-way audio broadcast communication, over which police will be able to fire questions at instructors, will climax the hour-long program. This setup will permit questioning by officers in Chicago, Detroit, Pittsburgh and Boston.

FCDA Deputy Administrator James J. Wadsworth will open the telecast with a presentation in graphics. An animated sequence, showing potential damage from an atomic blast in Baltimore, will follow. Use of civil defense in peacetime disasters and duties of police and auxiliaries will be outlined.

OFFICERS chosen at the first annual meeting of the National Community Television Assn. at Pottsville, Pa. [B•T June 16], were (l to r) George H. Bright Jr., Lansford, Pa., secretary; Martin F. Malarkey Jr., Pottsville, Pa., president; Claude E. Reinhard, Palmerton, Pa., vice president, and Melvin L. Boyer, Tamaqua, Pa., treasurer.

GIVE US ENTERTAINMENT

Public Tells KFMB-TV; Letters Hit Code

WHILE political and pressure groups agitate for strict supervision and even censorship of TV programs, signs of public resentment against the NARTB TV Code and would-be censors are appearing.

Pro and con comments on the NARTB code were received by KFMB-TV San Diego, Calif., following a recent forum program on the subject, according to Howard L. Chernoff, KFMB-TV general manager.

In a typical observation, Robert T. Logan, of 902 19th St., San Diego, said his set was purchased "for one purpose only, and that is entertainment. So far you people have done a marvelous job of providing that entertainment. Please don't ruin it by your all-too-rigid TV code."

Mr. Logan wrote KFMB-TV that if he wants to hear people "put the hush hush on a drinking joke" he can "walk across the street and go to church." If he wants to further his education, he added, "San Diego provides excellent adult education classes in its schools. Thousands of people depend on the church for our moral guidance, thousands depend on the schools for education, and thousands depend on KFMB-TV for one thing—entertainment."

Stand Against Censorship

Another comment from L. L. Miller, 5208 Chollas Park Way, San Diego, took a sharp stand against censorship of theatres and radios "so that individuals and small groups of people have the right to choose programs and shows that they think are good for the common people."

He continued, "I thought it was too good to be true that TV had escaped for so long. As the old story goes—all good things must come to an end. I think that a person that buys a TV set should have the right to view the program he wishes." In the case of children, he said, parents "should have the intelligence to choose their own entertainment for their children. If there is anything wrong with Red Skelton's program they better start banning western programs because about 50% of the scenes are taken in saloons."

Finally, Mr. Miller wrote:

"The next thing you know we'll be having bootleg TV—where you knock on the door and say Joe sent you. I found that most people who own TV sets after the first few weeks of owning them do a pretty good job of censoring their own programs. On your channel there are some programs that I wouldn't be caught dead watching and others I wouldn't miss for the world, and I govern myself accordingly."

CBS-TV DISCOUNTS

Formula Is Explained

AN INCREASE in CBS-TV's maximum station-hour weekly discount, making it 15% compared to 10% heretofore, was announced fortnight ago after advertisers, agencies, and prospects had been advised in letters from Network Sales Vice President Fred M. Thrower [B•T, June 9].

Mr. Thrower pointed out that the new discount table affords substantial benefits to CBS-TV advertisers effective June 1. It provides discounts graduated as follows (based on the number of station-hours which the advertiser sponsors per week):

Less than 5 station-hour a week, net; 5 through 9 station-hours, 2½%; 10 through 19 station-hours, 5%; 20 through 34 station-hours, 7½%; 35 through 49 station-hours, 10%; 50 through 59 station-hours, 11%, with each additional 10 station-hours increasing the discount by 1% until the maximum 15% discount is reached with sponsorship of 90 or more station-hours per week.

WAVE-TV

First IN KENTUCKY!

PAY FORMULA

AFM Board Weighs Change

RE-USE payment plan on all TV film productions rather than the present AFM welfare fund 5% royalty formula to which producers must now contribute, may result from a study made by the union's international executive board.

Talk of revamping the present formula, first step of which would be to revise the ruling on TV film commercials, highlighted a closed special session of the board with Los Angeles Local 47 executives in Santa Barbara following the American Federation of Musicians' 55th national convention there June 13.

Changes proposed are being examined and the board will attempt to come up with a new plan in keeping with President James C. Petrillo's convention declaration that the AFM royalty formula must stand "until someone comes along with something better" that will be "to the benefit of all locals" [B•T, June 16].

Revision of the TV film commercial spots ruling was urged by Local 47 President John Groen, Vice President Phil Fischer, Recording Secretary Maury Paul and local executive board member, Arthur J. Rando.

Their plan, it is understood, is based on a fixed fee rather than a percentage deal. Under such an arrangement, it was pointed out, if a set fee were established for a 13 week period, covering so many repeat uses of a commercial on a station, it would be an incentive to producers to use more musicians rather than voice-only backgrounds for spots.

Under a re-use payment formula for TV filmed shows, reportedly favored by some members of the AFM international executive board, a certain percentage of the original music cost would be paid by the video producer on each showing of film. This money, under the plan, would be paid to the AFM trust fund rather than to the individual musician, it was said.

There is growing activity in TV production through subsidiaries on the part of major Hollywood movie studios. Mr. Petrillo and the AFM international executive board last Thursday had a closed meeting with top executives of those production companies.

The meeting, it is understood, centered around royalty payment plans for music in TV film. It was set up as an exploratory means to pave the way for future conferences on music fees when all major producers will be making movies for television.

film report

Production . . .

Interstate Television Corp., Hollywood, has started second in its *Ethel Barrymore Theatre* series of half-hour TV films. "Daughters of Mars," adapted by **Zoe Akins** from a short story by **Louis Bromfield**, stars **Miss Barrymore** and stage-film actors, **Selena Royle, Elizabeth Risdon** and **Phillip Terry. Lewis Allen** is director with **Lee Savin** producing.

* * *

Edward Lewis is in Mexico City to produce five half-hour films in CBS-TV *Schlitz Playhouse of Stars* series. Directors, **Arthur Pierson** and **Herbert Kline**, will handle "The Trial," starring **Gertrude Michael**; "This Plane for Hire," starring **Lloyd Bridges**; "Port of Call," starring **Victor McLaglen**; "Marriage of Lit-Lit," based on an **O. Henry** short story, and "Calamity Jane."

* * *

Television film rights to 8,000 **Damon Runyon** stories have been acquired by **Howard Welsch**, executive producer, **Fidelity Pictures**, Hollywood, from King Features. Production on first of the 39 half-hour TV films starts in August at Motion Picture Center. Negotiations were concluded by **William Morris Agency**, Beverly Hills, who will furnish talent from its free-lance list.

Also scheduled for August production is *The Lady From Lloyd's*, a half-hour TV film series, whose plans were delayed until finalization of the Runyon story deal [B•T, May 12].

* * *

Sterling Television Co., New York, TV film distributors, has begun production on a new music series titled *Music for Everybody* featuring music expert **Sigmund Spaeth** as narrator. The series—produced for Sterling by **Israel Berman** of Viking Films—will cover all phases of music and is being prepared for fall release.

* * *

W. R. Frank, Minneapolis motion picture exhibitor, is now in Hollywood to start a half-hour TV film series, *Medal of Honor*, which he will co-produce with **William Dean.** Series, dealing with lives of Congressional Medal of Honor winners, goes into production at General Service Studios July 8, under banner of **W. R. Frank Productions.** Completed scripts are "Julius Langvein," which concerns 14-year old Civil War drummer boy, and "Dr. Mary E. Walker," only woman so decorated, both of which were written by **Lynn Bowers.**

* * *

Major Television Productions Inc., recently organized by **Irving Lesser** and **Seymour Poe**, has opened West Coast headquarters at RKO Pathe Studios, Culver City. **Maurie Gresham**, the firm's general manager, upon completion of this assignment, will set up sales offices in Chicago and Atlanta.

* * *

Commodore Productions, Hollywood, will resume production on *Clyde Beatty* TV film series in August with new headquarters at Motion Picture Center.

Sales . . .

Jose Escalante & Co., Chicago (Corina cigars), is starting *Corina Academy Theater* on KECA-TV Los Angeles, for 13 weeks from June 23. The program is made up of 13 half-hour TV films produced by **Revue Productions**, Hollywood, for **Gruen Guild Theatre** and **Chevron Theatre** series, now available for second runs. The agency is **Guenther Bradford & Co.**, Chicago.

* * *

Screen Gems Inc., Hollywood, has signed **John English** to direct *Jefferson Davis*, a half-hour film in the NBC-TV *Cavalcade of America* series being produced for **duPont. Jules Bricken**, Screen Gem's producer-director, will devote his time to NBC-TV *Ford Theatre*, now being filmed for **Ford Motor Co.**

* * *

Guild Films Inc. is to open New York sales headquarters at 510 Madison Ave. with President **Reuben Kaufman** in charge. **Wilmer Clark**, West Coast sales representative for DuMont TV Film Sales, joins the firm in similar capacity with headquarters at 5746 Sunset Blvd., Hollywood.

Film People . . .

Gilbert Kay, assistant director at MGM, joins **Flying A Television Pictures Inc.**, Hollywood, in similar capacity.

WABD (TV) Business

WABD (TV) New York, key outlet of DuMont TV Network, last week reported that it had sold $243,640 worth of business during the last week in May, with contracts ranging from single announcements to 52-week schedules of spots and participations.

CBS TV FILM

Sales Service Outlined

OPERATION of CBS Television Film Sales' new merchandising service was outlined last week by Walter A. Scanlon, sales promotion manager, who set up the plan.

The merchandising staff, it was explained, "will make a full set of selling tools available" and visit the sponsors' markets to give on-the-scene assistance, where indicated, regardless of the type of program involved.

Merchandising tools, Mr. Scanlon said, include sales promotion displays and literature, premiums and "gimmicks," information on public relations techniques, publicity releases, personal appearances and other exploitation devices. The merchandising program is handled by the sponsor with the assistance of the CBS merchandising counsel, to form a "community saturation campaign" calculated to "sell the consumer from his living room right into the store to buy," Mr. Scanlon said.

Mr. Scanlon joined CBS Television Film Sales three months ago after extensive experience with Alexander Smith Inc., Quality Bakers of America, World Broadcasting System, Capitol Radio Program Service, USO and National Distillers Products Corp.

WHO LEASES SITE

In Plan for Television

WHO Des Moines has leased a downtown roller skating rink for possible use as a television studio. Station has an application for Channel 13 before the FCC. Col. B. J. Palmer, president of the Central Broadcasting Co., licensee of WHO, said that the rink contains more than 17,000 square feet of floor space.

It is not anticipated, added Col. Palmer, that internal remodeling will begin before July 10, 1953, effective date of the 10-year lease. The leased building is on a midtown corner, one block from where WHO is located.

CHURCH FILMS

Rev. Mack Named Director

THE REV. S. FRANKLIN MACK was appointed director of films for the Broadcasting and Film Commission of the National Council of Churches of Christ in U. S. A. effective June 1, according to the council's general board in Chicago.

Rev. Mack

Rev. Mack will retain his present position as executive secretary of the Committee on Radio, Visual Education & Mass Communication of the Council's Division of Foreign Missions.

CBC-TV ON TEST

Commercial Policy Pends

FIRST test patterns were telecast at Montreal during the first week of June, from temporary antenna at CBC-TV Montreal, on top of Mount Royal. News of tests was withheld by CBC for about a week. A permanent 282 foot antenna on Mount Royal is to be installed soon, CBC officials stated

At Toronto, a temporary antenna will be used in the beginning when CBC-TV Toronto goes on the air in September simultaneously with CBC-TV Montreal. Three hours at least will be telecast each evening as a starter, judging by the increase in staff now at 175 at each production center.

No decision has been announced yet on commercial policy, but it is understood that perhaps 25% of program content will be U. S. commercial programs piped in from Buffalo to Toronto. Commercial content will likely be about 60% of all programming, with remainder of the commercials being taken by Canadian advertisers. CBC has as yet no money available for sustaining programs, but funds are expected to be allocated before the Canadian Parliament recesses at end of June.

At same time, Canadian government may give some sign as to how soon private interests can start TV stations in Canada. According to the Massey Royal Commission report, this would be when national production centers have been set up by CBC at Toronto and Montreal. This will be accomplished by this fall when CBC transmitters at Montreal and Ottawa go on the air. It is understood that the CBC board of governors are anxious to get a ruling from the Canadian government as to how soon they can start holding hearings for TV licenses in view of the Massey recommendations. The CBC board has a number of applications for TV stations at Toronto, Montreal and Hamilton, Ont., on file.

No decision has been made as yet on the annual TV receiver license fee to be charged by Ottawa, which is to be turned over to the CBC for its national production centers.

Canada Set Sales

TELEVISION receiver sales were up in April over those of a year ago, according to the Radio-Television Mfrs. Assn. of Canada. April sales totalled 4,582 units with retail value of $2,172,624, as compared with 4,409 sets in April 1951 valued at $2,500,867. (Reduction of excise tax accounts for partial difference in retail value.) Sales of TV sets for first four months of 1952 totalled 18,433 valued at $9,-997,864. This compares with sales in first four months of 1951 of 8,461 sets valued at $10,197,722. There are now about 97,000 sets in use in Canada, half of them in the Toronto-Hamilton area.

BUSINESS is transacted at WTVN (TV) Columbus, Ohio's new Television Center as its owner, Edward Lamb, signs a contract with Yount Advertising Agency during the dedication. L to r: John Rossiter, WTVN's manager; Mr. Lamb; Herbert Stewart, WICU (TV) Erie, Pa., manager, and Malcom Yount, Yount Advertising Agency of Erie. WICU (TV) also is owned by Mr. Lamb.

GE'S BAKER

Sees 53 Million TV Sets

PREDICTION of an eventual 53 million U. S. TV sets was made by Dr. W. R. G. Baker, General Electric vice president and general manager of the GE Electronics Div., at the dedication of GE's $6 million miniature receiving tube plant June 12 at Anniston, Ala. GE President Ralph J. Cordiner dedicated the new plant.

Dr. Baker also predicted at the ceremonies an eventual 2,000 TV stations. Dr. Baker said almost 100 new stations would be in various stages of construction by June next year and that the demand for receiving tubes would reach 500 million annually within the next five years.

A new GE automatic blanket plant was dedicated at Asheboro, N. C., earlier this month and plans have been announced for a new transformer power plant in Rome, Ga., for a total GE $50 million annual payroll and 13,500 employes in the Southeast. A major appliance center at Louisville, Ky., that is planned, "will almost double these figures," President Cordiner said. William M. Nave, Anniston tube works manager, said the new plant will employ 2,000 people.

VHF TRANSMITTER KIT

GE Claims Improvement

GENERAL ELECTRIC CO. is making available to owners of its VHF TV transmitters a modification kit for conversion of the final video stage to permit use of thoriated filament GL-6039 tubes, GE announced last week.

Frank P. Barnes, GE broadcast equipment sales manager, claimed that the conversion will result in improved performance, lower operating cost, lower power consumption and longer tube life. "Based on a 15-hour operating day, the conversion will in one year save more than twice the cost of the modification kit," Mr. Barnes said.

WTVN (TV) Center

SEN. ESTES KEFAUVER (D-Tenn.), now campaigning for the Democratic Presidential nomination, interrupted his tour to participate in opening ceremonies of WTVN (TV) Columbus' new Television Center a fortnight ago. Sen. Kefauver took part in a telecast interview along with Dave Nichols, WTVN news director, and Edward Lamb, WTVN owner. More than 100 newspaper and radio representatives were in the audience.

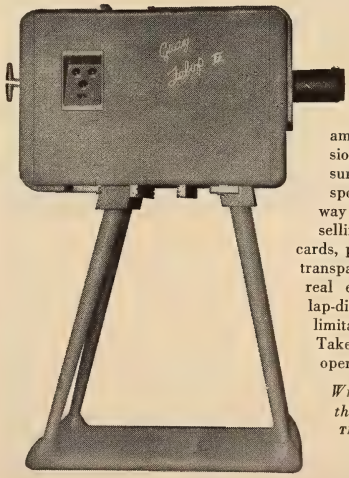
HEMISPHERIC TV

Montreal Debut Hailed

ADVENT of video in Montreal this summer was hailed by J. B. Elliott, RCA Victor vice president for consumer products, as an important step toward realization of a Western Hemisphere TV network.

"We shall see the day when Canada, the United States, Mexico, Cuba, Central and South America, and the countries of the West Indies exchange programs regularly," Mr. Elliott told members of the Quebec Radio-Television Distributors Assn. at a meeting last Wednesday in Montreal.

In discussing business outlook for TV dealers, Mr. Elliott told his audience that "Montreal is in for some exciting changes, and I know you'll like them."

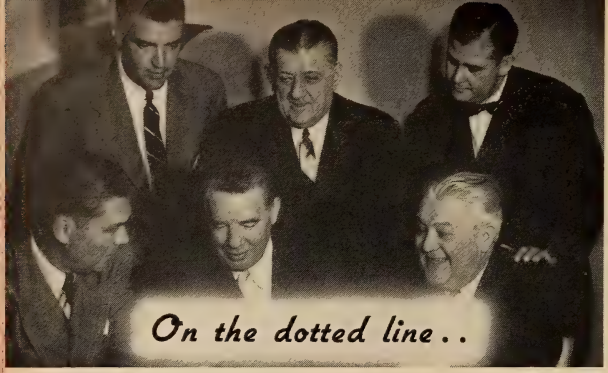


He said that the beginning of TV operation in a city stimulates business conditions in not only that particular field but also in such allied fields as furniture and public utilities.

Mr. Elliott cautioned dealers, however, to prepare for this event, if they expected to benefit from it.

After completion of the Western Hemisphere network, Mr. Elliott foresaw trans-ocean TV, linking the North American continent to Europe.

"As TV girdles the globe," he said, "the new medium will prove to be a great unifying force . . ."



PRODUCE PROFESSIONAL COMMERCIALS AT LOW COST with the New Gray TELOP II

● Now, with the new, versatile Gray TELOP II you can produce and broadcast an amazing variety of professional-quality commercials at surprisingly low cost. Local sponsors will marvel at the way TELOP II presents their selling message with opaque cards, photographs, art work and transparencies. *And* you get the real effect of superimposition, lap-dissolve and fade-out. Only limitation is your imagination. Takes up very little space. One operator does it all!

APS TV ENTRY

Offers Britannica Catalog

ASSOCIATED PROGRAM SERVICE, New York, last week announced release of its first catalog of Encyclopedia Britannica Films, marking its official entry into the television field.

Catalog includes four suggested plans for use of the films with emphasis on library arrangement, suggested program series, and a special events calendar relating historical dates to films on the EBF list. A 20-page book in loose-leaf form, catalog is being distributed to all TV stations as well as to interested advertisers and agencies.

In addition to the EBF catalog, APS also announced two sales of its *Great American* television series —26 quarter-hour programs based on the lives of men and women in American history. Southwestern Bell Telephone Co., through Gardner Adv. will sponsor the series on WDAF-TV Kansas City. WDTV (TV) Pittsburgh will carry the programs sponsored by North Pole Real Ice Cream Co., through Wasser, Kay & Phillips, that city.

APS General Manager Maurice B. Mitchell, meanwhile, reported that in the radio field, APS has added 23 new subscribers to its specialized library services, bringing the firm's total to more than 1,000 broadcasters. "We believe this is the largest number yet reported in the transcription library field," he added.

SUCHMANN WINS

Awarded WAAM Fellowship

WILLIAM SUCHMANN, graphic artist and designer with ABC, was awarded the WAAM Television Fellowship last Friday by the Examining Committee. The Fellowship carries a $6,000 stipend and a year's graduate study at Johns Hopkins U., Baltimore.

First of its kind to be offered in the TV industry, the Fellowship was created by the board of directors of WAAM (TV) Baltimore and the university.

"This Fellowship was established," the university said, "in order that a mature person of high standing and currently active in television may have nine months free from his professional duties to pursue special studies of his own choosing which will add to his effectiveness when he returns to his regular work in the industry."

Mr. Suchmann was graduated from the U. of Pennsylvania in 1939 and from the Franklin School of Professional Art in 1948. He has been with ABC's art department since 1949, where he has been assistant director in charge of visual presentations for TV commercial advertising and graphic portions of several types of programs.

During his residency at Johns Hopkins, Mr. Suchmann plans to study visual education and psychology.

Playful Lucifer

THE DEVIL popped up where a politician was supposed to appear—and was popped off again in much haste—on the Doug Edwards news show on CBS-TV, sponsored by Columbia Records Inc., June 10. A series of slides showing former Republican Convention keynoters was being displayed to accompany Mr. Edwards' commentary on the selection of Gen. Douglas MacArthur to deliver this year's GOP keynote address. By error, a slide from the sponsor's commercial—a picture of the devil, to advertise CRI's new "Faust" album — got into the place where a picture of former Gov. Dwight Green of Illinois should have appeared. The operator hastily snapped back to the preceding slide, and the commentator proceeded to talk about Mr. Green while a picture of California's Gov. Earl Warren showed on the screen.

KING NAMED

F&P Detroit TV Sales Hea

PROMOTION of Lon King to succeed Keith McKenney as head o TV sales in Detroit for Free & Peters, station representation company, has been announced by F&P Vice President and Television Director Lloyd Griffin.

Mr. King has been on the company's TV sales staff in San Francisco for the past 18 months. He is being replaced there by Richard Rothlin of the sales staff of KRON-TV San Francisco, an F&P client. Mr. King previously was with NBC in San Francisco eight years of which five were in NBC in sales activities. Mr. Rothlin, before joining KRON-TV, was assistant account executive for Young & Rubicam in San Francisco on the Kaiser account.

Citrus Group's TV Plans

THE FLORIDA Citrus Commission has discussed concentrating most of its TV funds on a single children's show, Ida Mae Stilley's *Happy's Party*. David O. Corey of J. Walter Thompson Co., estimated a 13-week trial, beginning in mid-August, live, over DuMont in Pittsburgh, New York and Washington, would cost $25,000 to $30,000. If successful, the commission could sponsor 26 more weeks in those cities, plus eight others where it now uses TV, for a grand season total of about $160,000. Frank Roper, chairman of the commission, said his group hopes some day to have a TV show of its own.

FILM MAKERS

Modifying TV Stands

CURRENT motion pictures, telecast to private homes direct from the studios that produce them, is a rapidly approaching reality.

So declared Y. Frank Freeman, vice-president of Paramount Pictures Corp. to delegates at the annual Western Institute of Commercial and Trade Executives in convention at Whittier College, Whittier, Calif., June 12.

Making indirect reference to Telemeter, a pay-as-you-see system which is 50% Paramount owned, Mr. Freeman said that, "Transmission facilities for broadcasting television showings of current pictures are now being perfected. Present indication, however, is that the process may be quite expensive."

He stated that motion picture and TV producers now work closely together and complete cooperation in producing quality pictures and programs is assured.

With four big companies already active, imminent entry of all the major studios into TV film production gains momentum daily on the West Coast.

Columbia Pictures Corp., through subsidiary Screen Gems Inc. [B•T, June 16]; Interstate Television Corp., subsidiary of Monogram Pictures; Universal-International Pictures, through United World Films Inc.; and Hollywood Television Service Inc., a division of Republic Pictures, are already in TV production.

20th Century-Fox has blueprinted an off-the-Culver City lot TV film production subsidiary and it is said that M-G-M will do likewise by early winter. RKO Radio Pictures and Warner Bros., among strong holdouts, are reported to be doing TV research and planning behind closed doors.

Paramount is actually in the TV film production business through its subsidiary, Paramount Television Productions Inc. Besides operating KTLA Hollywood, it syndicates *Time for Beany* and other video programs.

KOIN TV CENTER

Portland Site Purchased

PURCHASE of a half-block of downtown Portland property as site for a television center was announced last week by Harry H. Buckendahl, vice president-general manager of KOIN Inc., Portland, Ore.

Mr. Buckendahl said that the 20,000 sq. feet of available ground space thus acquired will provide adequate facilities for the earliest establishment of KOIN-TV if and when FCC approves the company's TV application.

THREE CBS-TV film series, *Gene Autry Show, Range Rider* and *Files of Jeffery Jones,* have been sold to Societa Radio Audiziani Italia, Rome, Italy, for three year run starting January 1953.

IT'S WEWS (TV)

In 'Press' Polling

NINE of 13 first-place awards went to WEWS (TV) in the 1952 *Cleveland Press* viewer popularity poll of local Cleveland TV shows, released Thursday. WEWS (TV) shared one first with WXEL (TV), which won two first places, while WNBK (TV) took one first. Results are:

Best program: Giant Tiger Amateur Hour (WEWS), On the House (WEWS), Polka Revue (WEWS).

Best performer: Bob Dale (WEWS), Gene Carroll (WEWS), Paige Palmer (WEWS).

Best women's program: Beauty for You (WEWS), Living Fashion (WNBK), Women's Window (WEWS).

Best children's program: Charming Children (WNBK), Uncle Jake's House (WEWS), The Big Wheel (WEWS).

Best public service program: Meet Your Schools (WEWS), Western Reserve U. Telecourses (WEWS), Pooch Parade (WEWS).

Best male singer: Randy Culver (WEWS), Ken Ward (WNBK), Bob Whelan (WXEL).

Best girl singer: La Reyne Dahl (WEWS), Janet Haley (WEWS), Judy Dell (WEWS).

Best live music: On the House (WEWS), Pappy Howard (WEWS), Polka Revue (WEWS).

Best sportscaster: Bob Neal (WEWS and WXEL), John Fitzgerald (WXEL), Tom Manning (WNBK).

Best newscaster: Dorothy Fuldheim (WEWS), Warren Guthrie (WXEL), Tom Field, (WNBK).

Best disc jockey: Bob Dale (WEWS), Barbara Page (WEWS), Linn Sheldon (WEWS).

Best movies: WXEL, WNBK, WEWS.

Best commercial: Sohio Reporter (McCann-Erickson on WXEL), 10:30 Theatre (Ketchum McLeod and Grove on WEWS), and Leisy's Premiere Theatre (McCann-Erickson on WXEL).

ROGELL TO FILM

VFW 'Medal of Honor'

FILMING for TV of the Veterans of Foreign Wars radio series, *Medal of Honor,* has been arranged with Rogell Productions Inc., Hollywood. The series dramatizes the stories of American heroes who won the Medal of Honor.

The announcement came last week from Frank C. Hilton, VFW commander-in-chief, after what was described as "protracted negotiations." The half-hour pictures will feature Medal of Honor winners in the Civil War, Indian wars, Spanish-American War, Philippine Insurrection, World Wars I and II and the Korean Campaign. The radio series featured men in only the three last-named conflicts.

The TV plans originally were made when the *Medal* radio series began early in 1950. The radio program series received a special award from Freedoms Foundation of Valley Forge, Pa., last February. The TV films, to be made in cooperation with the Dept. of Defense, will contain film footage made in actual combat, in the heroes' home towns and in Hollywood studios, according to Albert S. Rogell, director-producer and president of Screen Directors Inc.

Jon Yost, radio-TV director of the Russell C. Comer Co., which produced the radio series, will be script supervisor and writer for the TV series. He already has prepared the first 13 scripts.

programs promotion premiums

INITIAL broadcast of *Time Capsule*, described as first regularly scheduled program designed for re-broadcast 100 years from now, was heard on ABC radio last Sunday. Producer Bill Berns attempted to "capture the rhythm, color and shape of events which identify the people of today." Each program in the series will be recorded on magnetic tape, sealed and deposited in suitable repository for revival in 100 years.

MUSICAL EXPERIMENT

AUDIENCE reaction shows that many musical radio programs in the future may be slated for a change, according to an experimental broadcast presented by KXYZ-AM-FM Houston. Fortnight ago, *Saturday at the Shamrock*, show carried on the full ABC network, was set up so that listeners could hear music in three dimensional sound. Resulting full richness of tone, station relates, was picked up only by listeners who tuned in both AM and FM receivers at the same time.

TV TEACHES SWIMMING

SWIMMING lessons are now available to televiewers in the Baltimore area on WBAL-TV. A series of three remote broadcasts from Carlin's Park pool are planned with Red Cross instructors giving lessons.

SPOTS STRESS CAUTION

SCHEDULE of 130 spot announcements was carried by WROL Knoxville, Tenn., during the first two weeks in June in connection with a safety campaign emphasizing careful driving. Campaign will continue throughout the month and will include a special announcement each time an accident occurs in the city or in Knox county.

CLUB NEWS SHOW

CLUB women in the Detroit area are given a chance to air news of their organizations on *Gal About Town*, new program broadcast twice weekly on WXYZ Detroit and sponsored by Modern TV & Appliance Co., that city. Show features Mary Lee Lippincott who discusses a "Club of the Day," telling how the group was formed and particulars about leading members.

TV SET sales were 24% higher in May for Admiral Corp., Chicago, than in the same period last year. Dealer inventories were at the lowest point in 12 months, with company distributors having only one-third as many TV sets in stock as a year ago, according to Wallace C. Johnson, Admiral vice president in charge of sales.

NEVER SAY DIE

DAYTIME only stations can provide thorough election coverage too, according to KBOE Oskaloosa, Iowa. Station was unable to broadcast evening returns of the primaries held in the state June 2 so an "election party" was held in the studio. Everyone was invited. Coffee and doughnuts were served and as the returns came in, they were posted on the blackboard in the lobby of KBOE for station's guests to read.

AIR-RAID BROADCAST

MULTI-remote broadcast of Connecticut's first air raid test was handled fortnight ago by WTIC Hartford and fed to a group of stations through the state. Pickups were made from air raid shelters, the state's Civil Defense communications center and local control center. Eight engineers, seven announcers and three producers were assigned to the broadcast.

REBROADCAST PLANS

CUSTOMS, music and personalities of Austria compose format for *Viennese Varities*, new weekly half-hour show on KFAC Los Angeles. Sponsor is Baker Boy Bakeries Inc. Station relates that city's Austrian colony has given the broadcast such support that tape recordings are being prepared for rebroadcast on Austrian State Radio.

TV LAW CASES

SERIES using "real" people in fictional law cases was begun at WTOP-TV Washington on June 17. *Letter of the Law* each week will present real judges, lawyers and personalities playing themselves in everything but the fictional case under consideration. TV audience will be "sworn in" as a jury and will decide the fate of the defendant.

REQUESTS PROVE PULL

SUCCESS story titled "2,252 Requests—Or One Bank Run That Made the Bankers Happy" fronts a program schedule released by WSM-TV Nashville. First National Bank in that city sponsored a one-time announcement offering listeners plastic dime savings banks. Following day, 2,252 banks had been given out in 14 branches throughout the city, according to bank officials. To further prove station's pull, requests were received from people who had heard the spot in 94 towns in Tennessee and Kentucky.

'OPERATION SUNBURST'

AUDIENCE and sales promotio drive for summertime viewers an sponsors was launched last week b WLWT (TV) Cincinnati. "Opera tion Sunburst" features $50,00 contest for viewers with six-roo completely furnished modern hom going to the first-place winne Theme of competition is "If I We a President." Contestants are aske to answer 90 questions pertainin to the Presidency and write a sho essay on what he would do if h were the White House resident.

HOME DECORATING SHOW

WEEKLY quarter-hour Sunda night show, *Royal Tile Time*, mad its bow last Sunday on WFIL-T Philadelphia. Program, sponsore by Royal Tile Co., is designed t provide home owners with uniqu home improvement ideas. Husban and wife team of Mark and Vivia Olds are featured in dramati sketches presenting hints for hom decorating. Agency for the accoun is Robert J. Enders Adv., Phila

DRUGGISTS ATTEND SEMINAR

TELEVISION seminar was hel for Gallaher Drug Co., midwestern chain, in WLWD (TV) Dayto studios last week. Speeches were made by several station executives Workshop, demonstrating various types of commercials and showing camera tricks, was featured on th program. Question and answer per iod was also arranged for the Gal laher personnel.

COURTESY TICKETS

COURTESY Week in Cleveland is providing material for TV programming. Newsreel cameramen are sound-filming motorists in the city as policemen order them over to the curb to give them a ticket. Surprised reaction of the motorist who has been driving carefully and his change of attitude when he receives the "ticket"—for a Cleveland Indians ballgame—are recorded for broadcast by the cameraman. Gimmick, originated by WEWS (TV) station manager J. Harrison Hartley, is being used by all three local TV outlets.

Sales Lift With Swing Shift

(Continued from page 29)

pulling power came when KNUZ campaigned for blood donors and got 500 pledges. Amusing experience happened when the Houston Sport Shop, one of the night program's sponsors, offered a free spool of nylon fishing line to listeners who called at the shop on Saturday morning. Copy was intended to read to the "first ten" who appeared, but the agency omitted the qualifying number. Result was a deluge of customers at the sports shop, the management of which now is convinced of radio's power. The shop carries two half-hour segments giving weather reports, fishing data and similar information each fishing season.

KFAC Los Angeles

After 18 years' experience with all-night programming, KFAC Los Angeles has worked out a format differing from most other 24-hour operations. While the 12-to-1 a.m. programming is of movie music and show tunes, from that time on the music becomes definitely classical in nature. At 5 a.m. music reverts to more popular songs to blend with the 6-8 a.m. *Coffee Cup Concert* with which the station starts its daytime broadcasts.

The entire 12-to-6 a.m. segment is sold to the Hollywood Ranch Market, a large independent that operates 24 hours a day. Management of the market agrees that the program has been successful, for it points to various instances of unusual sales. At Christmas, a year ago, the market was able to sell 10,000 Christmas trees at a time when the items were a drug on the Los Angeles market. Another example was the sale of 3,000 cases of eggs in two nights. In neither case was any other advertising medium used except radio.

While the late operation has not always "made money" for the station, General Manager Calvin J. Smith feels that "it enhances our dial position and builds a certain amount of listening habit which is valuable to our daytime operation."

WIP Philadelphia

In Philadelphia, WIP has been on the air continuously since Dec. 5, 1938, when it launched its late hour *Dawn Patrol*. The same m.c., Joe McCauley, has handled the program nearly ten years. The show follows a music and news format with Mr. McCauley playing requests sent in by letter or telegram. From 20,00 to 25,000 letters and telegrams are received yearly.

From March 8, 1939, for more than eight years The Pep Boys, auto appliance firm, sponsored the program. Their results were clear and definite and were proven over and over by store "specials" that tied in with the show. During the time the firm used the show its only other advertising was in the mail order section of the Sunday newspaper.

In 1947 format of the show was changed to accommodate three sponsors: a night club, a beer distributor and a TV and radio store. From this beginning the show gradually has changed to the present co-op sponsorship plan. Program is sold on a 13-week basis with each sponsor receiving 22 quarter-hours a week. Time is rotated each night. Three quarter-hours are given for six nights and four on the seventh. At present, the program accommodates seven sponsors.

So popular has *Dawn Patrol* become that top recording artists and other talent consent to frequent guest appearances. Recently Krass Bros., clothier using the program exclusively, announced a sale on the program to such success that police had to control the crowd. Other present advertisers include Kaiser-Frazer, Premier Record Co., exclusive on the program, and Charles Antell.

KCBQ San Diego

Rounding out its first year as San Diego's only 24-hour station, KCBQ reports the after-midnight segment of its operation successful both financially and in listener interest from the first. The station programs Monday through Saturday, allowing one night a week for maintenance of studio and transmitter.

Music follows the regular KCBQ format of popular and pop-concert with most numbers on the "sweet" side. No race, western or hillbilly records are used. First two hours are primarily new tunes in the straight pop field with accent on vocals but with a good instrumental spotted about every third disc. Second two hours are devoted to pop-concert and largely employ LPs of show music. The third two hours are early morning format—bright tunes, some novelties and an occasional march or polka. Announcer (no disc jockeys at KCBQ) is Jim O'Leary, 25-year-old Marine Corps veteran. News is an important part of the program.

The entire segment has been sponsored since it began. Ruling out participating programs, management decided to sell the show to one or two sponsors. First segment was sold to a local used car account and the second to a small television retailer, The Video Store, which was so successful that the owner reported the program "one of the best media buys we ever made. The overall advertising impact of 36 hours per week on the community even at that late hour was very evident from our increased business."

At the end of the second 13-week period the TV store transferred its business to other times on the station and the account was sold to Waldorf-Dawson, a home freezer distributor.

Charles E. Salik, president and general manager, says 24-hour operation pays off in programming, promotion and sales and is practical for stations in any major market.

KMOX St. Louis

Since 1948 KMOX has been on a 24-hours-a-day basis with its *All Night Frolics* from 11:35 p.m. to 5:45 a.m. Hillbilly, western and folk music records are used almost exclusively. News is presented on the hour and half-hour and complete weather reports covering the entire area are aired three times nightly.

Some time ago, Stan Levey, manager of night operations for the station, experimented by cutting down the hillbilly programming and using pop records instead, but after six weeks complaints were so heavy the former format was restored.

Sponsorship is good with most of the advertisers having used the program two years or more. The majority of the accounts are on a per inquiry basis and firms using the station also use similar programs throughout the country.

KMOX is the only station in the St. Louis metropolitan area operating around the clock at present.

WWDC Washington

Since 1942 WWDC Washington has operated 24 hours a day with a simple format of news on the half-hour, interviews with celebrities and with just ordinary people and popular records that don't jar the ears. Important element in an

Sales Lift

(Continued from page 85)

all-night show, WWDC management feels, is that it is relaxing without putting people to sleep. Since the audience ranges from cab drivers to late spooners WWDC feels the disc jockey handling the show should not be a "cornball" comedian. Their answer to this problem is Felix Grant who conducts the program from 1 to 6 a.m.

On weekends, the records are mostly dance music since Washington is not a night club town and at-home parties usually tune to stations with that type of music.

Consistent sponsors of WWDC's *Yawn Patrol* have been Peoples Drug stores (newscasts), Super Music stores (one hour nightly), Eastside Cab Co. (spots each night), Marvin's Clothing Store (spots), White Tower restaurants (half-hour) and others. All the accounts use WWDC during daytime periods as well.

NATIONAL business accounts placed with WKRC Cincinnati are 65% higher now than they were at this time last year, according to David Taft, manager of Radio Cincinnati Inc.

'RETURN TO QUALITY'

Ed Craney Urges Network Affiliates

A RETURN to "quality programming" by all network affiliates was urged last week by Ed Craney, of the Pacific Northwest Broadcasters.

Mr. Craney is president-general manager of KXLY Spokane, Wash., an affiliate of CBS.

With the CBS Radio Affiliates meeting in New York July 1-2 in mind, Mr. Craney sent a letter last week addressed simply, "Mr. Network Affiliate." Its overall tone is:

"Radio must again be made important."

Mr. Craney pointed to a current decline in network radio. "One reason for the decline is, of course, due to the same people selling TV, the glamour child, as have been selling radio.

"This is being overcome," he added, "in the most part, by establishment of separate radio and television organizations within the framework of an overall communications company.

"If those operating the radio and television networks believe the only way a schedule of national network programs on radio can be maintained in the 1952-53 season is through a radio network rate cut, then, of course, a rate cut is inevitable.

"Such a rate cut distributed to the stations equally on a national basis is most unfair," Mr. Craney charged, "and as the first rate cut a year ago will solve nothing except momentarily placing a few dollars on network radio. Some fundamental thinking and action must be effected," he urged.

"Radio must again be made important," he declared. "This means we must see what radio can do best, music, news, word pictures. It means we must again view what we, who are responsible for radio, are doing to it. Radio must have some important shows not duplicated by TV. Radio must have a house cleaning. The lengthy, repetitious, non-interesting commercial must be abolished as should double, triple and sometimes even four or more commercials via the cowcatcher and hitch-hike method. The advertising of products we considered questionable in the past, should be reviewed."

Mr. Craney concluded "There are only two methods of lawful radio operation possible — *quality* or *quantity*. It is not possible to simultaneously emulate both. America has looked to network operation for *quality* in the past. Let us, the affiliates, sit down and find a way to again return *quality* to our airways. Let us again give the people of America a reason for listening."

NO RATE CUTS

Several Stations Up Prices

TEN of 17 stations at the semi-annual convention of the Assn. of Independent Metropolitan Stations held May 26-28 in Louisville, Ky., announced plans for increases in their rates.

None were contemplating a rate cut, despite vigorous rate competition attributed to network affiliates in several markets, it was reported. One station owner, Todd Storz of KOWH Omaha, said, "Our audiences are larger than ever. We deliver them at a lower cost per thousand than any other media, and, in most instances, at a lower cost than competing stations. Our business volume is at a record high. We cannot agree with those persons in high places who are willing to sell radio short. We believe our rates are disproportionately low in relation to value delivered. We're ready for an immediate upward revision."

ROTATING bulletins, 12½ x 47 feet, placed throughout metropolitan Los Angeles, read "Music You Like—Just Enough News—All Day Long—KBIG The Catalina Station, 740 on Your Dial" and pictures housewife at kitchen radio and motorist at car radio.

WOV RATES RISE

Revenue Figures Also Grow

WOV NEW YORK announced last week that not only are its revenues up, but that its rates are following suit.

General Manager Ralph N. Wei reported that the independent out let's revenue for May was 28% higher than the same month year ago.

The rate card revision was de scribed as "generally upward." WOV's daytime and nighttim rates are the same, under a 10 year-old policy.

Referring to the May 1952 gai over May 1951, it was pointed ou that WOV "has been proving ra dio's vitality in all the statistic it has released for months."

WISN BIRTHDAY

Gray Joins Trustee Board

LECTION of Gordon Gray, president of WSJS Winston-Salem, . C., and the U. of North Caroa, and of William Balderston, resident of Philco Corp., to the oard of trustees of the Committee r Economic Development was anounced last Thursday by Marion . Folsom, CED chairman.

Among others elected trustees f the non-profit economic research nd education organization were: ames L. Allen, of Chicago, senior artner and chairman of the exective committee of Booz, Allen & Iamilton, station brokerage firm, nd Stanley Marcus, of Dallas, resident of Neiman-Marcus Co. ED now has 143 trustees.

Three Silenced

HREE stations — WNEW and WMCA New York and WAAT Newark—went off the air with one wipe last Monday when the top f a heavy crane, replacing a worn ater main in the Jersey City ater supply system, struck power nes leading to the New Jersey ransmitters of the three stations. WNEW and WAAT were off the ir about 20 minutes and WMCA bout 40 minutes, when it put its uxiliary transmitter into service.

Cow Story

LATEST reason for a station sign-on failure comes from General Manager James H. Fitzpatrick of WLYC Williamsport, Pa. Engineer Paul Bosted, who was to open the transmitter, got caught behind an unbudging herd of cattle one morning on a country road that leads up a mountain toward the station's transmitter. Cattle proved unconvinced that radio is on deadline. Result: Station signed-on 25 minutes late.

RADIO 'FARMERS' *Plow Program Furrows In Washington Meet*

AGRICULTURAL programming on TV and information services provided by the government highlighted a two-day conference of the National Assn. of Radio Farm Directors at the U. S. Dept. of Agriculture in Washington last week.

Nearly 60 farm broadcasters, many of them representing combined AM-TV broadcast operations, met with Agriculture Dept. officials and Congressmen Monday and Tuesday.

Television at the station and government level dominated discussions, with government specialists sounding the theme that eventually farm broadcasters will occupy the same niche in television as in radio.

Problems in presenting video farm shows were thrashed out in a panel session led by Maynard Speece, Radio & TV Service, Dept. of Agriculture. Kenneth Gapen, assistant director of information for radio-TV, also participated.

Mr. Speece stressed the importance of variety and "idea presentations" in reaching both the consumer and the rural audience. He sounded out farm broadcasters on a kit (scripts, visual aids), which the Dept. of Agriculture proposes to distribute to the 100-plus TV outlets for use with agricultural shows.

Special Events Value

Value of agricultural programming lies in planned special events rather than in spot news coverage, Mr. Speece noted, citing the medium's continued search for new techniques in airing news. Additionally, station policy on target audiences — consumer vs. rural viewers—was reported as varying in different communities. Emphasis was placed on general programming until such time as TV penetrates rural areas and on the exchange of program material among TV stations as an economy measure.

Farm broadcasters were urged to take the initiative on programming consonant with community needs. The Dept. of Agriculture is severely limited by lack of funds, they were advised, with a budget pegged at $34,000 covering radio-TV, lowest for any section in the department. The department was cut 25% for fiscal 1953, in addition to another 10% under the Byrd economy rider affecting numerous government agencies. As a result, all but network radio has been affected.

The agency has been active on one TV front—preparation of a series of five-minute films for distribution to TV outlets. Production costs run close to $1,250 for the prints.

Suggestions for improvement of the government's information newsletter to NARFD members and other services were reviewed. R. L. Webster, director of the Office of Public Information, headed a panel that included Homer Martz, KDKA Pittsburgh; Mal Hansen, WOW Omaha and others.

The TV and information session capped formal discussions Tuesday morning. Later RFDs met with farm organizations with a luncheon at the Washington Hotel. Farm broadcasters made recordings for local station use.

Highlight Monday was a meeting with Agriculture Secretary Charles F. Brannan and with the Agriculture Committees in Congress. Panel talks with government research, production and marketing officials rounded out the agenda. A reception and dinner were held at the Mayflower Hotel Monday under NARFD auspices. Tuesday session opened with a Point Four progress report.

Registration at the meeting follows:

FTC ACTIONS

On Tobacco, Pass Book Firms

ALLEGED advertising misrepresentations in radio, television as well as in printed media figured in actions taken by the Federal Trade Commission last week. Involved were manufacturers of two name-brand cigarettes and a firm handling pass book advertising.

An FTC trial examiner, in an initial decision, recommended that a false advertising complaint against American Cigarette & Cigar Co., New York, (Pall Mall cigarettes) be dismissed "for want of prosecution." Decision becomes final next month unless docketed for commission review.

Examiner Earl J. Kolb observed that the firm has discontinued some of its advertising claims and that other charges "are not sustainable by proof." While the media in which the ads appeared were not specified, the company has used radio-TV broadcasting in late years. Claims were made for protection of the throat against irritation.

In a second cigarette case, FTC held oral argument last Tuesday on a similar complaint involving Philip Morris & Co. Firm had appealed an initial decision by a hearing examiner.

Similar complaint was directed by FTC at respondents trading as Metropolitan Pass Book Co., New York. They were accused of misrepresentations in radio and TV commercials involving a "pass book advertising scheme."

According to the complaint, the co-partners represented that purchasers of the books would receive $175.50 worth of guaranteed passes" entitling them to admission to theatres, bowling alleys and skating rinks—all without extra cost beyond the $1.98 charge for the book.

PHIL DAVIS Musical Enterprises, N. Y., has been commissioned by Arizona Brewing Co., through Advertising Counselors of Arizona, to write 30 and 60 second musical commercials for A-1 Pilsner beer. Spots will be used in Arizona and New Mexico.

1880 Thomas C. Gooch 1952

FUNERAL SERVICES for Thomas Caraby (Tom) Gooch, 72, board chairman of KRLD-AM-FM-TV Dallas and publisher of Dallas' *The Daily Times Herald*, were held June 14. Burial was in Greenwood Cemetery, Dallas.

Mr. Gooch died June 13 at his home after an illness of nine weeks [B•T, June 15].

One of the nation's leading newspaper men, Mr. Gooch served on the staff of the *Times Herald* for more than 50 years. This half century spanned the development of the Southwest, in which the *Times Herald* and Mr. Gooch played a prominent part.

Born in Bonham, Tex., Mr. Gooch was a son of Harold Gooch, who had been born in England. The family included an ancestor who had won the title of knight as an officer under the first Duke of Marlborough. The elder Mr. Gooch had come to the West to seek his fortune in buffalo hides.

Tom Gooch's mother, the former Mattie Revel Taylor, was a granddaughter of Mrs. Mabel Gilbert, who belonged to one of the first U. S. families to settle in what was then the Mexican-Spanish region.

As a boy, Tom Gooch moved with his family to Chicago where he attended the Chicago Art Institute. He abandoned his art career to become a reporter on the *Fort Wayne* (Ind.) *News*. His next job was with the *Fort Worth* (Tex.) *Record*, but when a better opportunity arose, he went to Dallas, 30 miles east. His rise with the *Times Herald* was meteoric, thanks largely to the interest of the late *Times Herald* owner, E. J. Kiest.

Mr. Kiest had exhibited an early interest in radio, and had founded WRR, one of the first municipal stations. In 1926, Messrs. Gooch and Kiest opened KRLD. One of the highlights of Mr. Gooch's life was the birth of KRLD-TV. First telecast of the station was the Southern Methodist U. - Notre Dame football game in December 1949.

Mr. Gooch had decided against a special dedicatory program. He

said simply, "If we do a good job, the people will support us. If we don't do a good job, it won't make any difference what kind of a dedication you have had. It's what comes after the dedication which counts."

During the closing months of his life, Mr. Gooch repelled all suggestions that he take things easier. Until the day he went home for the last time, he arrived at his office by 9 a.m. to confer with business and newsroom executives.

Mr. Gooch married the former Lulu Flateau Nov. 12, 1908. She is his only survivor.

RUNYON ELECTED

Is Tom Gooch Successor

JOHN W. RUNYON last week was elected board chairman of *The Daily Times Herald*, Dallas, succeeding the late Thomas C. Gooch.

Mr. Runyon

Mr. Runyon previously had been first vice president of the *Times Herald*, chairman of its executive committee, and president of KRLD-AM-FM-TV, the newspaper's broadcast affiliate.

His new post comes in Mr. Runyon's 42d year with the *Times Herald*. He began in 1910 as a collector in the display advertising department. Since World War II, he has supervised an expansion program of *Times Herald* properties which cost more than $2½ million.

He was elected vice president of KRLD in 1937, and president in 1941.

STANDARD Radio Transcription Services Inc. has added KXOA Sacramento, Calif., KFAL Fulton, Mo., and CKTB St. Catherines, Ont., to stations subscribing to Standard Program Library.

TEXAS CITY FIRE

KTSA Airs Full Coverage

JOHN RASCO, newsman of KTSA San Antonio, was credited with an outstanding performance in covering a fire at Corpus Christi, Tex.

In all, KTSA reported the fire with some 12 hours of recordings. KTSA claims to have "even scooped the Corpus Christi stations on this one."

After having aired two telephone interviews with police workers and Corpus Christi radio newsmen, Mr. Rasco was dispatched to the Gulf city, 150 miles south. KTSA remained on the air to take Mr. Rasco's reports from the scene. Both that night and the following day, Mr. Rasco brought KTSA listeners practically every tense episode.

A total of 11 live broadcasts were aired by KTSA during the fire fighting. In addition, follow-up features and news developments were broadcast.

Mr. Rasco (extreme left) interviewing fire workers.

Ad Council Appoints

ADVERTISING COUNCIL has announced that Kenyon & Eckhardt, New York, will serve as the volunteer agency next fall for the council's new "Engineers Wanted Campaign," to be headed by George T. C. Fry, K&E vice president. Staff for the campaign to encourage high school students to train for engineering careers will include Chester H. Lang, General Electric Co. vice president in charge of public relations, who will act as volunteer coordinator, and Grant Harper serving as the council's account executive on the project.

CITY NEWS COVERAGE

Municipal Officials Urged to Cooperate

LOCAL radio stations and municipal governments would greatly improve their services to the public if they banded together in a closer working relationship and took advantage of radio's effectiveness as a news and public relations tool.

These thoughts were raised by Rex Howell, president of KFXJ Grand Junction, Col., at a conference of mayors and city councilmen in that city June 12. The session was devoted to a discussion of public information problems. Mr. Howell stressed the role of radio in news coverage and emergencies, and emphasized the growing threats of censorship.

Scoring the belief of a "surprising number of people" that radio is exclusively an entertainment service, Mr. Howell said that local stations "need some help from the city in order to adequately cover the news of interest." He noted that many news sources are bypassed "simply because there is not a strong liaison between the city hall and the station."

Mr. Howell ascribed a tendency to ignore radio on news tips to lack of a central source from which it can get necessary information on all city activities. He pledged support of the Colorado Broadcasters Assn., of which he is past president, behind a move for the creation of a liaison committee to help coordinate maximum use of the medium.

"In spite of the seeming apathy toward radio coverage of the day to day news of municipal government, there seems to be ready recognition of radio's importance *in time of emergency*," Mr. Howell observed. He cited examples involving fire, explosions and other tragedies.

The KFXJ president also emphasized current incidents in some Colorado cities whereby broadcasters have been barred from court rooms and council chambers. Such censorship has been based on "mistaken notions" in most instances and broadcasters "are most willing to cooperate thoroughly" on proper broadcast safeguards, he added. Mr. Howell suggested a committee, representing the council, to assist the station in preparation of the final broadcast production.

"Modern methods of recording make possible a completely uninhibited discussion, with objectionable sections removed from the final broadcast," Mr. Howell explained, referring to editing techniques.

SCHOOL RADIO

Theme of U. of Ill. Seminar

SEMINAR on "Public School Broadcasting" was begun June 15 and will continue through Wednesday at the U. of Illinois' Allerton Park. Representatives of 21 school systems were expected to attend.

Problems to be considered are the place of broadcasting in the public school curriculum, the nature of public school broadcasting, the validity of the use of broadcasting as an aid to instruction, the goal educational broadcasting can reasonably be expected to reach, and the distinctive responsibility and opportunities of public school broadcasting.

'Raccolta Fede'

RICHARD E. O'DEA, president of WOV New York, English and Italian-language independent, last week was granted a special audience with Pope Pius XII during which Mr. O'Dea presented His Holiness with a check for $1,737.10 to be used toward reconstruction of Italian churches and religious properties. Entire sum was contributed to WOV's "Raccolta Fede" (Faith Fund) by station listeners and was offered to the Pope in their name.

Blackmon Jr., KUNO Corp Christi, vice president, and Vernon Townsend, KIOX Bay City, treasur

'VOICE' PULL

Listenership Mounting

DESPITE "gag" laws enacted in many Soviet satellite countries, radio listening behind the Iron Curtain has mounted steadily and mail pull of the State Dept.'s Voice of America has jumped three-fold in the past three years, with a daily average of 1,000 letters.

This estimate is given by Howland H. Sargeant, assistant secretary for public affairs, in a current report on the State Dept.'s international information program.

"Radio . . . is our primary means of hammering holes through the Iron Curtain to carry messages of truth to those peoples," Secretary Sargeant emphasized.

The report made these significant points:

- **Reception is about 25% inside Moscow and Leningrad and between 75% and 80% in many outlying areas.**
- **About 98% of radio listeners in western Berlin are regular VOA listeners and 9 out of every 10 listeners in the Soviet zone of Germany are Voice fans. Listenership in the U. S. zone has increased from four to six million.**
- **Listeners caught "warmongering" are subject to imprisonment in Czechoslovakia and other satellite countries under "defense of peace" laws. This would apply to listeners caught repeating what they hear over VOA or BBC.**
- **Licensing and tax levying of all persons in possession of radio equipment are common practices in t Soviet satellite area. Owners a under constant scrutiny.**
- **The communists have taken turning off electric power in so towns and villages during hours wh American broadcasts are comi through.**
- **A great percentage of Sov officers in eastern Germany listen the Voice.**

MEAT STRIKE DISPUTE

Aired by WTAM, WNBK (TV

COMMENDATION went to Ham ton Shea, general manager NBC's WTAM and WNBK (TV Cleveland last week from the ci council for "noteworthy interest public affairs" during a strike 1,000 butchers in some 300 co munity meat shops.

Mr. Shea had persuaded May Thomas A. Burke, Internation Meatcutters, AFL Vice Preside Harry Poole and Food Indust Committee Chairman Howard En lish to meet at the studios for simulcast airing grievances on bo sides. After the discussion th principals agreed to further discu sion which after six hours settl the strike.

SIGNALIZING the tenth anniversa of its weekly ACI survey of songs mo heard on the air, the office of resear has released a list of the top t tunes of each year 1942 to 1951, bas on the number of station broadcas each received.

Docket Actions . . .

INITIAL DECISIONS

WKEY Covington, Va.—Earl M. Key. FCC Hearing Examiner Hugh B. Hutchison issued initial decision looking toward grant of application for CP to change transmitter location and make changes in antenna; engineering conditions. (WKEY on 1340 kc with 250 w fulltime.) Decision June 17.

KURV Edinburg, Tex.—James Cullen Looney. FCC Hearing Examiner James D. Cunningham issued initial decision looking toward denial of application for CP to change from 250 w D to 1 kw D, 250 w N, DA, on 710 kc. Decision June 17.

Non-Docket Actions . . .

AM GRANT

Blackwell, Okla.—Star Bcstg. Co. Granted 1580 kc, 250 w daytime; engineering condition. Estimated construction cost $14,870. Principals include President A. C. Reid (93¼%), contractor; Vice President Randall L. McCarroll (3⅛%), formerly general manager of KMMO Marshall, Mo., and Secretary-Treasurer W. J. Britton (3⅛%), on staff of Arkansas Polytechnic College. Granted June 19.

FM GRANTS

McComb, Miss.—Southwestern Bcstg. Co. of Mississipi. Granted 100.1 mc (Ch. 261), ERP 270 w; antenna height above average terrain 178 ft., above ground 223 ft.; engineering conditions. Estimated construction cost $2,575, first year operating cost $5,000, revenue $7,500. Applicant is licensee of WAPF McComb. Granted June 19.

Duluth, Minn.—Head of the Lakes Bcstg. Co. Granted 92.3 mc (Ch. 222), ERP 64 kw; antenna height above average terrain 750 ft. Applicant is licensee of WEBC Duluth. Granted June 19.

New Applications . . .

AM APPLICATIONS

Lebanon, Ky.—Lebanon-Springfield Bcstg. Co., 1470 kc, 1 kw daytime. Estimated construction cost $14,620, first year operating cost $28,800, revenue $36,000. Equal partners are Charles R. Shuffett, announcer for WKLX Lexington, Ky., and Clarence H. Hulse Jr., chief engineer for WKAY Glasgow, Ky. Filed June 17.

Indianola, Miss.—W. W. Chapman, 900 kc, 250 w daytime. Estimated construction cost $12,475, first year operating cost $36,000, revenue $46,000. Mr. Chapman is manager and 50% owner of *Indianola Enterprise* and owner of *Sunflower Tocsin*. Filed June 18.

FM APPLICATION

Clemson, S. C.—Clemson Bcstg. Co., 105.3 mc (Ch. 287), ERP 53.4 kw.; antenna height above average terrain 376 ft., above ground 354 ft. Estimated construction cost $35,400, first year operating cost $50,000, revenue $60,000. Principals include: President S. Haskel Lusk (25%), president and 80% stockholder of Pendleton Lumber Co.; Vice President, Secretary and Treasurer John W. Gillespie (25%), chemist at Clemson A & M College; Vice President Charles W. Boyd (25%), announcer-salesman at WSNW Seneca, S. C., and Vice President Fred C. Shealy (25%), salesman at WSNW. Filed June 11.

TRANSFER REQUESTS

WCUE Akron, Ohio—Transfer of negative control from Akron Bcstg. Co. to Herberich-Hall-Harter Co. through sale of 50% interest (held by George K. Stroupe and Dorothy P. Stroupe, husband and wife) for $30,000. Transferee deals in mortgage loans and real estate. Principals in transferee are President Walter Herberich (2.91%), Vice President Alfred Herberich (12.5%), Vice President Charles G. Herberich (27.76%), J. D. Crawfis (15.48%), Mary Herberich (22.63%) and eight others with minority interest.

KWKH-AM-FM Shreveport, La.—Transfer of control from Times Pub. Co. to William H. Bronson, voting trustee, to replace John D. Ewing, president of KWKH, former voting trustee now deceased. No monetary consideration.

TRANSFER REQUESTS

KCSB San Bernardino, Calif.—Assignment of license from Essie Binkley West to F. P. D'Angelo for $50,000. Mr. D'Angelo is owner of F. P. D'Angelo Adv. Agency, North Hollywood, Calif.

KVEC San Luis Obispo, Calif.—Assignment of license from Christina M. Jacobson to herself and Leslie H. Hacker, new partnership tr/as The Valley Electric Co. Mr. Hacker will have ⅓ interest, for which he pays $25,000, and Mrs. Jacobson will have ⅔ interest. Mr. Hacker has been general manager of KVEC since 1937 and is former licensee of KPRL Paso Robles, Calif.

WIVY Jacksonville, Fla.—Assignment of license from WIVY Inc. to Edward J. Oberle. Mr. Oberle is sole stockholder and assignment is from corporation to sole proprietorship. No actual change of ownership or control; no monetary consideration.

WJCM Sebring, Fla.—Assignment of license from The Highlands Bcstg. Co. to Clearfield Bcstrs. Inc. for $6,000. Assignee is licensee of WCPA Clearfield, Pa., WAKU Latrobe, Pa., and publisher of *Clearfield* (Pa.) *Progress*.

WWXL Peoria, Ill.—Assignment of license from William H. Young, trustee in bankruptcy, to Hilltop Bcstg. Co. for $17,050 cash to liquidate bankruptcy estate. Principals in assignee include President Hugh R. Norman (50%), president and majority stockholder of KSTT Davenport, Iowa; Secretary-Treasurer Walter F. Kean (50%), consulting radio engineer, Riverside, Ill., and Vice President E. C. Schocde, partner with his father in Rock Island, Ill., law firm.

WLCS Baton Rouge, La.—Transfer of control from A. M. Cadwell and Willis B. Nelson, co-administrators of estate of Harry R. Nelson, deceased, to Lewis Gottlieb and Roland C. Kizer through sale of 35% of stock for $46,580. Mr. Kizer is senior partner in Baton Rouge law firm of Kizer, Heaton & Craig. Mr. Gottlieb is owner and manager of Standard Motor Car Co., Baton Rouge.

WIHL Hammond, La.—Assignment of license from Sidney S. Rosenblum and Forrest E. Curnutt, partnership d/b as WIHL Bcstg. Co., to Mr. Rosenblum through his purchase of Mr. Curnutt's ½ interest for $10,000 cash.

KMLB Monroe, La.—Involuntary acquisition of control by Melba Liner Gaston, individually and as administratrix of estate of J. C. Liner, deceased. Melba Liner Gaston now holds 4,990 shares of stock out of 10,000 shares; after transfer she will hold 7,500 shares. J. C. Liner III holds 2,500 shares. No monetary consideration.

KTHS Hot Springs, Ark.—Transfer of control from John D. Ewing, voting trustee, to William H. Bronson, voting trustee, due to death of Mr. Ewing. No monetary consideration.

WLDM Detroit, Mich.—Transfer of control from old partnership of Ellis C. Thompson, Harold I. Tanner and John A. Ross to new partnership consisting only of Messrs. Tanner and Ross through sale to them by Mr. Thompson of his ½ interest for $18,000. Mr. Tanner will become general manager, retaining his present title and responsibility of program director. Mr. Ross will continue to serve as comptroller.

WSHB Stillwater, Minn.—Transfer of control from William F. Johns Jr. and Penrose H. Johns d/b as St. Croix Bcstg. Co., a partnership, to St. Croix Bcstg. Co., a corporation. William F. Johns Jr. will continue to hold 95% interest and Penrose H. Johns will continue to hold 5% interest. Change from partnership to corporation only; no actual change of ownership or control. No monetary consideration.

WBRM Marion, N. C.—Transfer of control Lake City Bcstg. Corp. through sale of 21 shares of stock (10.4%) from Mrs. Bessie P. Hunt to W. P. Erwin (who now already holds 39.9%) for $2,100. After transfer Mr. Erwin will have 102 shares of stock (50.2%).

KGW-AM-FM Portland, Ore.—Transfer of control from Donald E. Newhouse to Samuel I. Newhouse Jr. through transfer of 233⅓ shares of stock (out of 700 shares) for $116,666.67. Samuel I. Newhouse Jr. now already holds 233⅓ shares and after transfer will hold 466⅔ shares.

KVOZ Laredo, Tex.—Assignment of license from E. J. Harpole and W. J. Harpole, d/b as Uvalde Bcstrs., a partnership, to Border Bcstrs. Inc., a corporation controlled by them. No actual change of ownership or control; no monetary consideration.

WRJN-AM-FM Racine, Wis.—Transfer of control from First National Bank & Trust Co. of Racine, as executors under will of Frank R. Starbuck, deceased, and Harry R. LePoidevin, to The Journal-Times Co., through transfer of 197 shares of stock out of 200 shares for $157,600. Transfer will produce no new elements of control but will recognize interest of the Starbuck family in its control of The Journal-Times Co. and the Racine Bcstg. Corp., WRJN-AM-FM licensee.

PHILCO SALES

All Time Record Seen

PREDICTION that "Philco Corp. . . . will celebrate the 60th anniversary of the founding of the company by setting an all-time sales record . . . in 1952," was made by William Balderston, president of the company.

Mr. Balderston spoke before the Philco Distributing Organization at a June 20-21 meeting at the Waldorf-Astoria, N. Y. Previous sales record was $335,318,054 in 1950. Occasion of the meeting was announcement of the new 1953 radio-TV line.

Mr. Balderston said "there will be 40 million TV sets in use within the next four or five years and that television continues to be the greatest of all growth industries." The speaker pointed out that over 10 million small screen TV sets will soon be obsolete. This will make the replacement market a substantial factor in the growth of the industry, he added.

WDAF-AM-TV

$1.5 Million Plant Formally Opened

NEW $1.5 million plant housing WDAF-AM-TV Kansas City was opened formally Monday, giving the stations greatly expanded facilities and improved equipment.

Dwarfing the original TV station erected in 1949, the new radio-TV home adds 21,000 square feet to the original 7,000. It is designed to anticipate needs of the stations for years to come.

WDAF is being transferred from present quarters in the *Kansas City Star* building on a piecemeal basis. The new center, completely modern in conception, is located at 31st and Summit Sts.

Leading local and national figures participated in the formal ceremony, among them Niles Trammell, NBC board chairman; Roy A. Roberts, publisher of the *Star;* Dean Fitzer, managing director of the radio and TV stations, and Ed Sullivan, m.c. of CBS Television's *Toast of the Town.*

Mr. Roberts predicted TV will have a revolutionary effect on American politics, ending smoke-filled room decisions in both parties. He predicted the nation will have "fewer whistlestop campaigns and more television." Televised news conferences will become routine and accepted as part of the political life of the nation, he continued.

Radio Given Attention

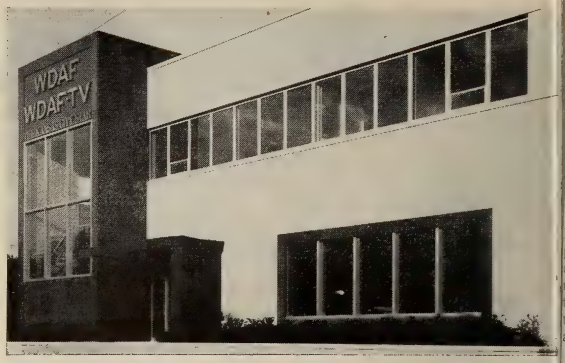
Tracing the growth of WDAF-TV from a garage plant servicing a few thousand sets, he said the service area is nearing a quarter-million sets.

Radio has been given careful attention in the WDAF development, Mr. Roberts said, adding, "Our faith in the future of radio is best exemplified by the fact we have installed entirely new radio equipment both at the transmitter plant out in Johnson County and in the controls in this new building."

Introducing Mr. Trammell, Mr. Roberts recalled that WDAF was one of the five stations that constituted the first radio network. NBC's board chairman said he believed the building was "the most modern, best-equipped and most efficiently arranged I have seen, and I have seen almost all of them in this country." He recollected the old Nighthawks radio show and said he hoped the quarter-century NBC-WDAF association, pleasant and profitable, would continue many more decades.

Mr. Fitzer was praised by Mr. Roberts as the guiding force in establishing the *Star* in the television and radio fields in the last 25 years. In turn, Mr. Fitzer commended the work of the radio-TV station staffs along with that of Arthur C. Wahlstedt, first president of the *Star,* and Joseph Flaherty, technical engineer for both stations.

The stations were complimented for their service to the area by Gov. Edward F. Arn, of Kansas, and Lt. Gov. James T. Blair Jr., of Missouri, along with municipal officials.



Randall Jessee, news and special events director of the stations, took the listening and viewing audiences on a tour of the new building. Mr. Sullivan praised the new project. He produced a Kansas City *Toast of the Town* Tuesday night.

Other guests included Henry I. Christal, Henry I. Christal Co., New York; James Thompson, of the Christal Chicago office; John Harrington and V. F. Righter, New York, and Carroll Layman, Chicago, all of Harrington-Righter-Parsons; and Sol Taishoff, editor and publisher of BROADCASTING • TELECASTING.

WDAF-TV's original 18 x 20-foot studio will be used for interviews and similar programs, with major productions being staged in the new 40 x 60 studio. Smaller studios are available. The second floor of the center is devoted to radio with the main studio 30 x 40 feet, supplemented by 20 x 30 and 10 x 16 studios.

Back of the building is the 724-foot tower. The main building is of contemporary design featuring metal, stone, crystal and light color tones. The two-story stair tower has an exterior trim of polished dark red marble, furnishing background for two-foot cast aluminum call letters. The free-standing stairway seems to float but actually is supported by hidden steel beams.

The center was designed by Everett L. Peterson, architect, and built by Winn-Senter Construction Co.

FRONT VIEW of WDAF's new TV-Radio Center, representing abou $1,500,000 investment in plant and structure alone.

PRINCIPAL participants in last Monday's ceremonies dedicating the new modern WDAF-AM-TV facilities: (l to r) Niles Trammell, NBC broad chairman; H. Dean Fitzer, managing director of the *Kansas City Star* stations; Roy A. Roberts, president of the *Star.*

ARCHITECTS of the new WDAF properties: (l to r) E. Manne Russo, com mercial manager of WDAF-AM-TV; J. A. Flaherty, chief engineer; H. Dea Fitzer, managing director; Bill Bates, manager of WDAF-TV.

NEWSPRINT MEET

Increased Output Weighed

NEWSPRINT problems were aired before the National Production Authority last Wednesday, emphasing high investment and production costs, but with relatively low returns.

Conference was called by the agency's Pulp, Paper and Paperboard Div. to explore the question of increasing newsprint output in the U. S. by using wood as a basic raw material. Newsprint has been under steady scrutiny in various committee quarters on Capitol Hill in view of skyrocketing prices and possible effects on national and local advertising budgets.

NPA indicated a possible inquiry into the feasibility of installing new facilities in areas where newsprint is not now produced.

NEWS CENSORSHIP

Moody Picks Advisory Uni

SEN. BLAIR MOODY (D-Mich.) chairman of the Senate Anti-Cen sorship subcommittee, has ap pointed an advisory committee o Washington newsmen to aid him i his investigation of the President' security order. Object of the inves tigation, proposed by the forme Washington correspondent for th *Detroit News,* is to uncover an unjustified barriers by governmen agencies to legitimate public infor mation [B•T, May 26].

Roscoe Drummond, chief of th Washington Bureau of the *Christia Science Monitor,* is chairman of th advisory committee. Other member are: Elmer Davis, ABC; George Cu len, Bureau of National Affairs Sterling F. Green, AP; Clark R. Mil lenhoff, *Des Moines Register and Tr bune;* John G. Norris, *Washingto Post,* and James Reston, *New Yor Times.*

Mr. Drummond asked all Wash ington newsmen to let the com mittee know of any case in whic a government agency has at tempted to distort the President security order to suppress legit mate public information.

Members of Sen. Moody's sub committee are Sens. A. S. Mik Monroney (D-Okla.), John L. Mc Clellan (D-Ark.), Andrew F Schoeppel (R-Kan.) and Richar M. Nixon (R-Calif.).

Democrats Buying Time

(Continued from page 23)

tributions—no matter how large or small—because "to reach all voters . . . we must have more radio time and more TV time."

Mr. McKinney is signing and mailing out certificates to all contributors to the committee's fund. Plans for other media are to be revealed later, he added.

Adhering to past procedure, the Republicans are keeping mum on plans for fall campaign time purchases until after the conventions next month. GOP practice is for the nominee's campaign manager to select the advertising agency and map program schedules.

Preliminary forays into these problems have been taken by Edward Ingle, radio-TV chairman, Republican National Committee.

While time purchases were not disclosed, figures were made available which cast light on the depth of the respective treasuries of each national committee. They were filed with the Clerk of the House on Capitol Hill.

As of June 1, the Democrats had a $267,391 balance. During the three-month period, March-June, the national committee took in $529,490 and spent $551,805, shrinking funds from a previous level of $289,705.

Whether this $550,000-plus sum included money expended on radio or television was not immediately known. The breakdown covered the period immediately preceding the kick-off of the Victory Chest radio-TV fund.

As of the same date, the Republican National Committee showed a balance of $228,790. GOP reported that it received $361,097 in contributions during the three-month period.

Sarnoff Honored

BRIG. GEN. DAVID SARNOFF, RCA board chairman, was awarded an honorary degree June 18 at the 196th commencement exercises of the U. of Pennsylvania. Gen. Sarnoff received the degree Doctor of Laws.

REBROADCAST RIGHTS

CBS Says FCC 'Legislating'

FCC last week was told by CBS that in issuing its ruling on rebroadcast rights, the Commission was placing an interpretation on Sec. 325 (a) of the Communications Act that is "not justified by its clear langauge. It is, in effect, legislating."

The CBS petition last Monday was another in the widespread series of protests that followed the May 15 report and order of the Commission that would put any station on the carpet if it refused permission to rebroadcast its programs to another station [B•T, June 16, May 19].

FCC's new rule requires a station, when it denies a rebroadcast request, to report the facts to FCC.

CBS noted that "while an administrative agency may, by adoption of rules in a rule-making proceeding, fill in details where a statute is in general terms and Congress has left to the agency this task of implementation, it may not amend a statute or alter its purpose by the device of issuing rules deemed by it to be desirable or in the public interest."

The petition further held that rules promulgated by the FCC may not supersede explicit Congressional language "merely on the grounds that, in general, the business of broadcasting today is different from what it was when Sec. 325 (a) was enacted."

Accordingly, CBS held, since the FCC lacks such authority, the report and order should be amended by deleting "any inference" that such refusal by a licensee to permit a rebroadcast would place his license in jeopardy.

CBS also said that the reporting requirement set forth is "inconsistent with declared Congressional policy, and imposes an intolerable burden on broadcasters." Citing the Federal Reports Act of 1942, the petition held that unless the submission of such information is essential for a "desirable and lawful" purpose, it should not be sought.

CBS also pointed out that in a great majority of cases, consent to rebroadcast is so conditioned as to render it useless. This referred to the necessity to obtain clearance of music, labor and other type of contracts commonly entered into by networks, a point which the FCC mentioned in its report and order.

Among other assertions in CBS' petition were that one station could be given power to "harass" others by utilization of the amendments; the FCC has not imposed any burden on the party seeking rebroadcast and that there is nothing to discourage indiscriminate requests for permission with the hope that fear of a drastic penalty may induce consent where it otherwise might not have been given.

In its conclusion, CBS said the report and order should be amended to delete any inference that a license would be jeopardized by refusal of rebroadcast rights; that such reporting requirement is not essential; FCC should postpone effective date of the new rules (July 1), pending further opportunity for comments.

540 KC RULE

FCC Would Add To AM Band

RULE-MAKING proceeding to add 540 kc to the standard (AM) band of broadcast channels in the U. S. was proposed by FCC last week. If adopted, the rule would permit Class II stations to be constructed on 540 kc in a few parts of the country. The AM band now ranges from 550 kc to 1600 kc.

The proposal, considered in industry quarters a long-sought victory for Arthur B. Church, owner of KMBC Kansas City, Mo., would permit KMBC to prosecute its application for 540 kc at Concordia, Mo., where the station's licensee, Midland Broadcasting Co., now operates KFRM on 550 kc, daytime only, with 5 kw directional. KFRM duplicates KMBC programs.

The rule-making proceeding was initiated by FCC in conformity with the provisions of the 1947 Atlantic City convention, as supplemented by the 1951 Geneva agreement. The latter specifies Dec. 1, 1952, as the date for bringing the 540 kc provision into effect.

U. S. and Canadian broadcasters sought for years to extend the broadcast band into the more desirable lower frequency area just above 500 kc, the international distress call channel. First effort was at the Madrid telecommunications conference in 1932. The Canadian delegation, supported by U. S. broadcasters, sought the broadcast use of 520, 530 and 540 kc in addition to the present band. The U. S. delegation, however, opposed this proposal.

Extension of the broadcast band to 540 finally was approved at the Atlantic City conference in 1947.

Comments on FCC's proposed rule change are requested by July 28. Replies are due 10 days thereafter.

The Commission notice observed that 540 kc "is close to the frequencies used in other radio services, such as the government and marine services. Consequently, the action announced by the Commission . . . will have interest even beyond the broadcasting field. In that connection, it may be noted that the marine services have been on notice since 1947 that 540 kc was intended for broadcast purposes and the Safety of Life at Sea Convention, which come into force next November, provides higher standards for new types of auto-alarms used on shipboard."

The latter are automatic monitoring devices which sound when a call is intercepted on the 500 kc distress channel.

Under the North American Regional Broadcasting Agreement, 540 kc is designated as a Canadian clear channel, hence its Class II status in the U. S. In 1938, by executive agreement, the U. S. conceded to Canada the use of 540 kc in the province of Saskatchewan. It has been used since 1939, with full 50 kw power, by the Canadian Broadcasting Corp., CBK Watrous.

In 1948, Mexico filed formal notice that it planned to employ 540 kc with 150 kw power. XEWA San Luis Potosi now is operating on 540 kc, but it is not believed full 150 kw is used. The State Dept. strongly protested the Mexican action, reportedly at the instance of the military which uses the contingent 410-535 mc band, but no relief was obtained.

Midland Broadcasting Co. first filed for 540 kc at Kansas City (for KMBC) in May 1944. The application was dismissed by the Commission in 1946.

Radio-TV Sells Best

(Continued from page 26)

and devise an effective system of measuring total in-home and out-of-home listening, Robert E. Dunville, president of Crosley Broadcasting Corp., told the AMA.

Some efforts have been made toward better research, Mr. Dunville said, but the task ahead should serve as a "great challenge to research - minded and marketing-minded people."

Mr. Dunville asserted that a horizontal reduction in radio rates is unsound and unwarranted. Radio, he said, has the ability to offer advertisers circulation at a low enough cost - per - impression to make it a profitable and usable medium.

Conceding that radio currently is in a period of readjustment, the Crosley executive noted that the medium survived "the greatest watering down period that any industry had to take" from 1940 to 1950 when the number of stations jumped from 814 to 2,234. That decade was one of inflation which, together with the advent of television, led to today's state of readjustment, Mr. Dunville said.

"Radio tomorrow will consist of a fewer number of stations and, I believe, one outstanding network of 55 to 65 stations with reduced talent and production costs. Radio of the future will continue to grow but on a sounder basis right alongside television," he predicted.

Mr. Dunville was introduced by Dr. Charles Sandage, U. of Illinois faculty member and the meeting chairman. Cincinnati chapter of the association was host to the three-day conference at the Netherland Plaza Hotel.

ADDITIONAL APPLICATIONS FOR TV STATIONS

FOURTEEN new and amended television station applications filed Friday at FCC, raising total filed during week to 49 (see early story, page 64). New applications were:

† **KIDO Boise, Idaho,** Ch. 7, ERP 52.4 kw visual, antenna height above average terrain 80 ft., construction cost $189,018, operating cost first year $91,300, revenue $120,000.

WTAX-AM-FM Springfield, Ill., Ch. 2, ERP 100 kw visual, antenna height 521 ft., construction cost $331,275, operating cost $325,000, revenue $370,000.

KGLO-AM-FM Mason City, Iowa, Ch. 3, ERP 100 kw visual antenna height 464 ft., construction cost $348,540, operating cost $237,600, revenue $240,396.

† **New Orleans Television Co., New Orleans, La.,** UHF Ch. 20, ERP 182 kw visual, antenna height 505 ft., construction cost $441,500, operating cost $365,000, revenue $420,000 (applicant made up of **R. L. Wheelock, W. L. Pickens** and **H. H. Coffield,** equal partners, each independent Texas oil operator).

† **WLOS-AM-FM Asheville, N. C.,** Ch. 13, ERP 200 kw visual, antenna height 2,087 ft., construction cost $323,450, operating cost $60,000, revenue $60,000.

† **WHUM Reading, Pa.,** UHF Ch. 55, ERP 261 kw visual, antenna height 1,784 ft., construction cost $614,339, operating cost $570,000, revenue $630,000.

WCOS Columbia, S. C., UHF Ch. 25, ERP 90 kw visual, antenna height 649 ft., construction cost $247,117, operating cost $244,630, revenue $355,476.

(† Indicates pre-thaw application refiled.)

DISTRICT 14 MEETING

SITE for NARTB District 14 meeting Sept. 11-13 will be Cosmopolitan Hotel, Denver, according to William C. Grove, KFBC Cheyenne, Wyo., district director (see full meeting list, B•T, June 16). District 14 adds extra day of workshop sessions to regular NARTB schedule.

ALL-STAR COVERAGE

NBC-TV coverage of All-Star baseball game, July 8, will be extended to include four TV stations of MBS—WOR-TV New York, WGN-TV Chicago, WNAC-TV Boston and KHJ-TV Los Angeles. Gillette Co., Boston, sponsoring both telecasts on NBC-TV and broadcast on MBS, through Maxon Inc., N. Y.

107 TV STATIONS TO AIR LIVE CONVENTION COVERAGE

ONLY 1% of nation's TV sets will not be able to receive live coverage of national political conventions from Chicago, according to AT&T, which reported Friday that 107 out of 108 stations in 65 cities will carry live proceedings. New cities on network will be Miami, New Orleans, Dallas, Fort Worth, Houston, San Antonio, Oklahoma City, Tulsa, Phoenix and Seattle. Non-TV areas, Portland, Denver and Fresno, will see closed circuit telecasts in theatres and hotels. In addition, more than 1,200 network radio affiliates will be serviced. Five thousand miles of radio relay and coaxial cable have been added.

WLAC SALE GRANTED

CONSENT was granted Friday by FCC to assignment of license of WLAC Nashville from J. T. Ward, trading as WLAC Broadcasting Service, to Life & Casualty Insurance Co. of Tennessee in transaction involving $1,250,000 [B•T, April 21]. In other actions, FCC granted assignment of license of WBGE-AM-FM Atlanta to General Broadcasting Co. (Edgar B. Pool, 20%; Robert N. Pinkerton, 80%) for $90,000 and granted consent to George H. Thomas to sell 10% interest in KANE New Iberia, La., to Dierrell Hamm for $12,000. Mr. Thomas retains 50% interest.

PEOPLE . . .

RAY VIR DEN, recently resigned president of Lennen & Mitchell, N. Y., opening own agency at 270 Park Ave., N. Y.

WILLIAM E. JOHN JR., Ruthrauff & Ryan N. Y., to Grant Adv., N. Y., as account executive and supervisor of five regions handled by agency's New York office for Dodge Division of Chrysler Corp.

GERALD W. JOHNSON, political analyst and author of many books, signed by WAAM (TV) Baltimore for campaign commentary series.

NARTB, NBC OPPOSE FCC REBROADCAST RULE

DANGER that FCC's rebroadcast rule may put Commission into position of regulating charges was advanced by NARTB as one reason for vacating or at least suspending July 1 effective date of order until fuller hearings are held, according to petition filed Friday.

On same day, NBC, also asking for revocation or suspension of rule, observed, "The rules put the shoe on the wrong foot," declared that asking station should be required to report to FCC why it considered refusal of rebroadcast rights unreasonable."

Both petitions question FCC's legal right to require stations refusing permission of rebroadcast rights to justify refusals to Commission, with implied threat that unless such are reasonable FCC may question fitness of station to be licensee. (Earlier in week, CBS also expressed doubt that FCC had such power; see story on page 97.)

WESTINGHOUSE SPONSOR

WESTINGHOUSE Electric Corp. to sponsor *Pick the Winner* on CBS-TV for 13 weeks starting Aug. 14 (Thurs., 9-9:30 p.m. EDT) as part of its sponsorship of get-out-the-vote campaign and political convention coverage on CBS networks. Agency: Ketchum, MacLeod & Grove, Pittsburgh.

N. C. Group Asks Free Radio-TV Planks

PLATFORM COMMITTEES of Republican and Democrat National Conventions in Chicago were urged last Friday by North Carolina Assn. of Broadcasters to "re-affirm their convictions that radio and television should be accorded all of the privileges traditionally granted the press."

At closing session of two-day meeting at Nags Head, N. C., NCAB unanimously adopted resolution for free radio planks in platforms of each party. Association petitioned state delegations to each convention to seek action by platform committees. Resolution recited that Senate and House by arbitrary action had excluded microphones, recorders and TV cameras from Congressional hearings, contrary to privileges heretofore accorded broadcast reporting "as counterpart of the pencil and paper in the hands of the reporter for the printed media."

With about 100 present, NCAB also adopted resolution expressing appreciation to FCC for its recognition of technical manpower shortage through interim authorization of less-than-first-class operators for transmitters. It thanked NARTB for its follow-through, and pledged to conform to requirement as to first-class operators when manpower situation changes and permits compliance without undue hardship.

Principal speakers were Richard P. Doherty, NARTB employe-employer-relations director and John H. Smith, Jr., NARTB FM director (see story page 26).

Ed Ruggles, director of North Carolina State College, explained plan for establishment this September of technical school in Gastonia to ease shortage of first-class operators. School expected to turn out 25 during first year.

E. Z. Jones, WBBB Burlington, state director of civilian defense, urged cooperation of broadcasters on big job immediately ahead. He said he had just returned from Washington indoctrination and that world situation is "very tense." In North Carolina, he added 8,000 volunteers will be needed for new air detection operation.

Successful litigation against 3% tax on transcriptions imposed by state was outlined by Allen Wannamaker, WGTM Wilson, with State Supreme Court upholding broadcasters. Assessment, however, construed to apply to towers but this is not recurring item.

Two-day session was presided over by T. H. Patterson, general manager of WRRS Washington, N. C. Other officers are Cecil B. Hoskins, WWNC Asheville, vice president, and Jack S. Younts, WEEB Southern Pines, secretary-treasurer.

NATIONAL does a complete job...

SO DO HAVENS AND MARTIN, Inc. STATIONS . . .

WMBG
WCOD
WTVR

Up-up-up go sales of National Bohemian and National Premium Beers in the rich Virginia markets of which Richmond is the center. And small wonder. National brews to a strict policy of "Not how much—but how well." It knows its business well. And it knows how to sell Virginians via Havens & Martin radio and TV stations of Richmond.

WTVR (TV) and WMBG (AM) are sound buys for any advertiser. Why? Their adherence to high broadcast standards, their long-time reputation for service, their pioneering progress have won the affection of Virginians. Today WTVR, now in its fourth year, is still the only TV station in Richmond. And WMBG means NBC for its millions. Here's a duo that's a sound investment for a sound (and sight) advertiser.

FIRST STATIONS OF VIRGINIA

WMBG AM WCOD FM WTVR TV

Entered as second class matter March 14, 1933, at Post Office at Washington, D. C., under act of March 3, 1879.

the human side of the news

One of the survivors of the recent tragic collision between the Destroyer "Hobson" and the Aircraft Carrier "Wasp" was Fireman 2nd Class Joseph F. Arnold, of Lebanon, Pennsylvania. Nineteen-year-old Arnold was a witness at the Naval Inquiry investigating the collision.

In line with its policy of presenting the human side of the news, WGAL-TV arranged for young Arnold to appear before its cameras. Thousands of people in the area heard Arnold's graphic, first-hand account of the collision.

It's a habit of long-standing, at WGAL-TV, to present informative human-interest news programs such as the one featuring Fireman 2nd Class Arnold. Bringing its viewers the human side of the news is just one of the many ways in which WGAL-TV fulfills its public-service obligations.

CLOSED CIRCUIT

THOUGH TOP PLANNERS under NBC's newly re-integrated radio-TV command [B•T, June 23] say they're still "in the casing and planning process" and have mapped no definite moves, speculation persists that studies are in works to determine possibility of devising new discount structure which, without involving "tie-in" sales, would give special credit to advertisers who use combination of radio and TV in certain volume. It's said to be under study as part of NBC's new emphasis on radio-TV as complementary media, following appointment of Sylvester L. (Pat) Weaver Jr. as vice president in charge of both radio and television, and Frank White as vice president and general manager of both.

UPCOMING is sale of WJMO Cleveland independent, 1 kw daytimer on 1540 kc. to Richard Eaton, operator of five stations in East (WOOK Washington; WANT Richmond; WARK Hagerstown; WSID Baltimore; WINX Rockville). Price understood to be $100,000 which includes current assets of perhaps $50,000. Seller is W. J. Marshall, who established station in 1947. It's presumed station, upon FCC approval of transfer, will cater largely to Negro population.

EDWARD G. SMITH, who resigned recently as manager of radio at ABC's central division, and was formerly General Mills radio-TV director, will join WTCN Minneapolis as general manager. F. Van Konynenburg, vice president and general manager of Mid-Continent Broadcasting, licensee of WTCN AM-FM-TV, expected to supervise TV activity after FCC approval of stock transfer in which CBS acquires TV station. WTCN, under proposed new ownership, has applied for TV channel [B•T, June 9, May 26, April 21].

ANNOUNCEMENT shortly will be made of election of W. C. Swartley, station manager of Westinghouse Radio Station's WBZ-AM-FM-TV Boston, and Ralph Harmon, WRS chief engineer in Washington, to Board of Directors of Westinghouse Radio Stations Inc.

ACQUISITION by John (Mystery Man) Fox of *Boston Post*, generated new reports last week of his possible entry into Boston radio. While emphatic denial came from CBS, speculation arose that Mr. Fox's next acquisition might be CBS-owned WEEI Boston, followed by application for TV. Forty-five year old financier is reportedly worth $25 million and holds substantial interest in Western Union.

INSIDE GOP headquarters there appears to be smug reaction to claim Democrats have jump in buying choice radio-TV time for post-convention network campaigning, with indication Republicans have bought plenty but aren't tipping hand to opposition.

FORD FOUNDATION about ready to reveal details of 90-minute Sunday afternoon program to start on CBS-TV right after election. Series will reportedly attempt to reflect diverse facets of contemporary life, using both live

(Continued on page 6)

McDANIEL RESIGNS AS RTMA PRESIDENT

GLEN McDANIEL resigned Friday as president of Radio-Television Mfrs. Assn. "solely because of personal considerations which require that I return to New York" [CLOSED CIRCUIT, Jan. 28]. Resignation, effective Oct. 1, drew expression of regret from RTMA board in Chicago (see RTMA story page 34) along with praise for his achievements since taking office April 1, 1951.

A. D. Plamondon Jr., new RTMA board chairman, named committee of past presidents to recommend successor to board. Members of committee are Robert C. Sprague, retiring chairman of board, chairman; Paul V. Galvin, and Leslie F. Muter.

Mr. McDaniel lauded by board for long list of major achievements on behalf of industry and skill in presenting as well as solving problems. Staff has been expanded since he assumed office and organization has grown. He piloted trade practice proposals through Federal Trade Commission conferences. In letter of resignation he thanked entire association and staff for cooperation.

BURNETT GETS ALL KELLOGG BUSINESS

LEO BURNETT Co., Chicago agency, takes on remainder of Kellogg Co., Battle Creek, business, adding seven products to current list of five Oct. 1. New products represent annual billings of $4 million, which switched from Kenyon & Eckhardt, New York [B•T, June 23]. New products are: All Bran, Pep, Bran Flakes, Raisin Bran, Shredded Wheat, Gro-Pup, feed division, added to products already serviced by Burnett: Corn Flakes, Rice Crispies, Sugar Corn Pops, Corn Soya and Gold Medal Macaroni and Spaghetti. In addition, Burnett will handle Kellogg Co. Ltd. of Canada. James E. Weber, vice president, is account supervisor, working with three product men. Burnett agency acquired initial Kellogg business in fall of 1949. Client looking at syndicated film, *Superman*, which would be spotted nationally for children's audience in fall.

YOUNG QUITS WORKSHOP

JAMES WEBB YOUNG has resigned as consultant on mass communications to Ford Foundation, effective Aug. 1. In announcing his resignation, Henry Ford II, Foundation's acting president, said, "We are pleased . . . that the Television-Radio Workshop, which was established by the Foundation at Mr. Young's suggestion and with his guidance, will continue along the lines envisioned by Mr. Young under Robert Saudek, director of the Workshop." Mr. Young said: "Now that the Workshop is established and is proceeding with plans that Mr. Saudek and I worked out together, I feel that it is time for me to turn my attention to a number of personal affairs that I have been neglecting during the last year. I have enjoyed working with the Foundation's officers and hope to be of additional service to them on some future occasion."

BUSINESS BRIEFLY

TEXACO SPOTS ● Texas Co. (gasoline and motor oil), through its agency, Erwin, Wasey & Co., N. Y., considering spot radio campaign in northeast section of country.

TEA ADDS MARKETS ● Tetley Tea Co., Greenwich, through W. Earl Bothwell, N. Y., adding small number of markets, effective immediately, for six weeks.

SEEK 100 MARKETS ● Garret Wine Co., N. Y., through David J. Mahoney, that city, starting to line up radio-TV spot campaign to start Oct. 6, in 100 markets for ten weeks.

PREEN PARTICIPATION ● A. S. Harrison Co., South Norwalk, Conn. (Preen Floor Polish), looking for participation radio—segments and spots—to start after Labor Day on New England coast, through Calkins & Holden, Carlock, McClinton & Smith, N. Y.

STRIKE CANCELS SCHEDULE ● Radio spot schedule destined to start July 21 in five sales districts for Lincoln-Mercury has been temporarily cancelled because of steel strike.

MC FARLAND COMPROMISE EXPECTED SATURDAY

COMPROMISE between Senate and House versions of McFarland bill (S 658) expected to be reached Saturday by Senate-House conference committee. Led by Sen. Ernest W. McFarland (D-Ariz.) and Rep. J. Percey Priest (D-Tenn.), committee met Friday, discussed several non-controversial sections of bill and was scheduled to meet next day at 10 a.m. to iron out remaining differences.

General consensus among Capitol Hill watchers is that final bill will include these provisions, of those significantly in conflict: (1) FCC will have power to issue cease and desist orders in addition to revoking licenses. However, fine provision of House bill may be retained for non-broadcast services. (2) Newspaper anti-discrimination provision will either be rewritten to make it apply to any lawful business or occupation or it will be deleted entirely on ground White House has objected to it, might veto measure because of it. (3) Horan amendment will be accepted, but section forbidding charge of premium rates for political candidates will be rewritten to take into account broadcast practices. (4) Double jeopardy clause in Senate version will be retained. (5) Forced purchase of equipment of licensee who fails to get renewal will be dropped.

DE ROCHEMONT MOVES

RICHARD DE ROCHEMONT, former executive producers of *March of Time*, has joined Transfilm Inc., New York, as producer and consultant on new business matters, moving his business film accounts to Transfilm in deal said to involve more than half-million dollars worth of commercial film production. Mr. De Rochemont plans to release two topical TV programs this fall.

MOORE NAMED PRESIDENT OF VIRGINIA ASSOCIATION

JAMES H. MOORE, WSLS Roanoke, elected president of Virginia Assn. of Broadcasters at business session held Friday noon, winding up two-day meeting at Old Point Comfort, Va. (see VAB stories pages 30, 51). Robert H. Smith, WCYB Bristol, elected vice president and Frank E. Koehler, WROV Roanoke, secretary-treasurer.

Resolutions supported NARTB get-out-the-vote campaign and FCC plan to relax operator rules. Bernard Koteen, Washington radio attorney, cited cases supporting NARTB effort to have operator rules eased. NARTB President Harold E. Fellows spoke at Thursday night session.

Indication some UHF TV stations will be granted soon after July 1 given by FCC Comr. Rosel H. Hyde in question session after his talk. He declined to get into discussion of directional TV antennas. C. T. Lucy, WRVA Richmond, discussed legislative activities as chairman of committee handling that work. Others taking part in floor debates were John W. Shultz, WMVA Martinsville; Charles P. Blackley, WTON Staunton, retiring VAB president; Richard F. Lewis Jr., WINC Winchester; Philip P. Allen, WLVA Lynchburg, and Robert M. Lambe, WTAR Norfolk.

Elected to VAB board were Fred L. Hart, WLPM Suffolk; John L. Cole Jr., WHLF South Boston; Charles R. Maillet, WFLO Farmville; Earl M. Key, WKEY Covington; E. S. Whitlock, WRNL Richmond.

COURT ORDERS KFDM CASE REOPENED

REOPENING of 560 kc case concerning KFDM Beaumont, Tex., and KWTO Springfield, Mo., was ordered by U. S. Court of Appeals in decision Thursday (No. 10888). Court remanded case to FCC to (1) hear testimony on possible directional antenna design proffered by KFDM and (2) compare amount of interference between what was estimated and what actually has occurred.

In 1947, FCC granted KFDM authority to boost power from 1 kw to 5 kw. Short time before grant, KWTO applied for power increase from 5 kw local sunset and 1 kw night to 5 kw full time, thus throwing interference into KFDM's expanded service area. Commission then revised KFDM grant to condition it on acceptance of any interference that might ensue if KWTO application granted. If KFDM rejected condition, FCC said it would set both applications for comparative hearings. KFDM accepted condition. In 1948, FCC held hearing on KWTO application, granted power boost. KFDM appealed to Court of Appeals.

In other parts of decision, Court denied KFDM complaints that (1) it was denied comparative hearing and (2) that FCC violated 10% rule in granting KWTO increased power. Court held that when KFDM accepted condition on its grant, it waived rights to comparative hearing. Court also said that 10% rule is part of Engineering Standards, and FCC must have flexibility in deviating therefrom in public interest.

AVCO REPORT

NET INCOME of Avco Mfg. Co. for six months ended May 31 totaled $3,542,928 against $5,547,211 in same period of 1951. Earnings in first half of 1952 were 38 cents per common share on 8,887,959 shares compared with 61 cents on 8,731,058 shares for similar period last year. Dividend of 56¼ cents on corporation's $2.25 cumulative convertible preferred stock, payable Aug. 1, 1952, declared Friday.

In this Issue—

A summary of television station applications filed since the freeze was lifted shows the average applicant expects to spend $367,000 to build his station and $292,000 to run it the first year. Average anticipated revenue for first year is $314,000. *Page 23.*

General Telecasting System is formed by General Teleradio Inc. (subsidiary of General Tire & Rubber Co. and principal stockholder in MBS) to produce and distribute television programs. *Page 23.*

This is the week that may settle the immediate future of network-affiliate relationships in radio. CBS Radio affiliates meet with top network executives July 2 to straighten out differing opinions over network rates. *Page 24.*

Monday isn't blue any more for Pomeroy's department store in Pottsville, Pa., since it started using Sunday radio advertising. A special B•T report. *Page 26.*

Despite summer heat, advertisers and agencies are beginning to plan fall schedules on radio and television. *Page 27.*

The President throws his support behind educational television, tells FCC members he hopes private foundations will ante up the enormous sums needed to build non-commercial facilities for educational broadcasters. Meanwhile, Emerson Radio & Phonograph Corp. puts up $100,000 for educational stations. *Page 51.*

Detailed plans for radio and television coverage—the most ambitious in history—of the Republican National Convention next week. *Page 25.*

Harold Fellows, NARTB president, warns against the dangers of "organized efforts at censorship" as he testifies before the House subcommittee investigating morals of radio-TV. *Page 29.*

The 1953 NARTB convention is set for Los Angeles starting either April 28 or 29. *Page 31.*

National Production Authority relaxes its ban against color television production, but concedes that it won't mean anything like mass production of color will be possible. *Page 53.*

FCC's proposed relaxation of transmitter operator rules draws violently opposed reactions. Station operators, on the one side, say engineer shortage requires easier rules. Engineers and unions say there is no shortage but that stations want to hire cheap help. *Page 28.*

Upcoming

June 30-July 2: National Industrial Advertisers Assn., Palmer House, Chicago.
July 1-2: CBS Radio affiliates meeting, Ambassador Hotel, New York.

(Other Upcomings page 73)

Closed Circuit

(Continued from page 5)

and film presentation in flexible format similar to that of leading picture magazines. Understood that series will be available for participating sponsorship.

WHEN FCC appears before House subcommittee on Gathings investigation, it will be called upon to analyze complaints received from public on radio-TV programming. These, as of now, show roughly that main complaints have been against liquor advertising (Hawaii and Alaska), running better than 3-1 over all others. Poor runners-up are low necklines on TV and blatant commercials.

UNDERCURRENT of opposition evident in FCC legal ranks over plan of General Counsel Benedict P. Cottone to hire outsider to fill vacancy of Assistant General Counsel in charge of litigation. J. Roger Wollenberg, of Anti-Trust Div., Dept. of Justice, is mentioned. Staff supports merit promotions from within, particularly on ground that litigation will require trained top personnel. Suggestion strongly favored is promotion of Assistant Broadcast Bureau Chief Joseph M. Kittner to AGC for administration, with AGC Richard A. Sollomon promoted to litigation, and Paul Dobin, who ably directed final TV allocations project, succeeding Mr. Kittner in Broadcast Bureau. All salaries involved are at $10,800.

DON'T kiss off request of Sen. Joseph McCarthy (R-Wis.) for list of State Dept. contacts with radio-TV newsmen. It's likely to come up in election campaigning as basis of charge State Dept. is using private industry for propaganda.

USE of closed circuit TV for civil defense alerting believed to have stirred keen interest inside White House after theatre TV demonstration for policemen last Thursday.

AMERICAN Civil Liberties Union is preparing brief to support its petition asking that hearing be held by FCC on alleged use of blacklist by radio-TV networks and stations. Commission several weeks ago turned down ACLU pleading asking that network stations be placed on temporary license pending hearing [B•T, June 16], but left unresolved request for hearing on subject.

YOU CAN put this down as fact: Even if Democrats remain in White House, former U. S. Sen. James Mead will submit his resignation as FTC chairman early next year.

WMAL EXECUTIVE CHANGES

WITH resignation of Ben Baylor as assistant general manager and sales manager of WMAL-AM-FM-TV Washington, Charles L. Kelly, program director of stations, becomes assistant general manager. Kenneth H. Berkeley, general manager of Evening Star Broadcasting Co., also announced appointment of Mahlon Glascock as director of radio and television sales. Mr. Glascock, now with Kal, Ehrlich & Merrick advertising agency, formerly director of radio sales for WRC Washington, NBC-owned capital outlet. Appointments effective July 1.

CONVENTIONS TO WICHITA

KANS Wichita Friday completed arrangements to bring conventions to Wichita by microwave relay connection with WKY-TV Oklahoma City. Station will set up 65 to 70 sets in Wichita Forum Bldg. Telecast will be presented free as public service.

for more AT DEADLINE see page 86

YOU Get The BIG Audience On KRNT

DES MOINES RADIO

Latest Hoopers show it again . . . KRNT, CBS Radio in Des Moines, delivers the BIG audience—Morning, Afternoon, and Evening. You're right when you buy that very highly Hooperated, sales results premeditated, CBS affiliated station in Des Moines. Katz represents KRNT, The Register and Tribune station.

To the radio advertiser who inquired about an under-the-counter deal

One of our boys recently put aside his rustic clothes and haystrewn speech for a look at the World. "Madison Avenue is a shambles," he reported. "All advertisers are equal only some are more equal than others. Rate cards gyrate. Counters for dealing under are everywhere. One fellow even made me a Proposition!"

We calmed him down with a month's vacation and decided to make a Statement, to wit:

1. Our rate card No. 18 became effective June 1, 1951.
2. If rate increases become necessary a new rate card will be issued (with a year of grace between announcement and effective date).
3. If rate decreases go into effect a new rate card will be issued; everyone will know about it and benefit from the reduction.

We're old fashioned about rate cards. Ours mean what they say. Everyone is treated the same as anyone. This saves time-buyers embarrassment; they know where they stand; they don't have to be worried about bargaining.

We submit that WMT's published rates offer a fertile source of advertising value: 338,480 families who listen each week to WMT's exclusive regional and CBS programming. The Katz Agency, our national representative, says amen.

is it true what they say about television?

Yes, it is true that television has had a lusty, chaotic infancy.

It's equally true that television today has matured into a major medium sold and bought on a comparative and competitive basis.

It's also true that buyers of television time need and want facts about television markets to do an intelligent buying job.

It's true, too, that the TELECASTING section of the 1952 BROADCASTING-TELECASTING Marketbook will contain the basic data on *all* 63 television markets.

This data will be broken down into easy-to-read, easy-to-refer-to information.

Timebuyers need facts in a hurry. They will find the answers quickly and easily in the Marketbook.

The 1952 Marketbook has the answer on how much spot or network television will cost on any combination of stations throughout the country.

The 1952 Marketbook has the answer on what rating services are available in each of the television markets.

The 1952 Marketbook has the answer on the population of each of the TV markets.

The 1952 Marketbook will contain a television map of the United States. This will enable timebuyers to chart coverage areas.

Because the 1952 Marketbook has these and many other answers, it is true that the Marketbook is the strategic buy for television stations.

It is true, too, that regular rates apply.

The publication date of the Marketbook is August 18th. The deadline is July 20th. Send in your reservation today.

agency

HERBERT A. CARLSON resigns as vice president of Henri, Hurst & McDonald, Chicago, July 1 to enter public relations business on West Coast.

DR. LAWRENCE DECKINGER, research director, Biow Co., N. Y., appointed vice president in charge of research.

Dr. Deckinger

HELEN M. WHIGHAM, assistant account executive, H. M. Conner & Assoc., Hollywood (now discontinued), to Vick Knight Inc., that city, as media director.

JOAN M. KOOB, J. B. Lippincott Co., Phila., and **WILLIAM STEINER** form new agency, **STEINER & KOOB**, N. Y.

RALPH WEINSTOCK, account executive, Ted H. Ball Co., Hollywood, to Consolidated Adv. Directors, L. A., as head of sales-merchandising department.

MARY ANDREW AYRES, account executive with Sullivan, Stauffer, Colwell & Bayles, N. Y., elected a vice president. Her husband is **CHARLES T. AYRES**, vice president in charge of radio at ABC.

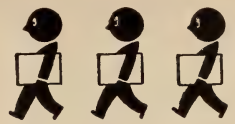
on all accounts

GERALD L. (JERRY) SEAMAN, radio-television director of Bert S. Gittins agency, Milwaukee, has the kind of a job about which perhaps people dream. In the line of duty this spring, he spent four weeks visiting 11 South and Central American countries. Last year he toured 15 nations in Europe and the Near East, and next year he will fly to New Zealand and Australia.

Mr. Seaman has averaged 100,000 flying miles yearly in the past 10 years, which probably makes him the country's fastest and farthest-moving advertising-radio-farm expert.

Mr. SEAMAN

Traveling in what amounts to at least a six-day and often a seven-day week (which people *don't* envy), Mr. Seaman shepherds radio's oldest farm program and the only commercial show participated in by the U. S. Dept. of Agriculture, *The National Farm and Home Hour* on NBC from Chicago. A Saturday show and Chicago's first network feature, it is presented in cooperation with the USDA and has been sponsored for 52 weeks yearly since 1945 by the Allis-Chalmers Mfg. Co., Milwaukee. Bert S. Gittins is the agency.



Mr. Seaman's experience in journalism, agriculture and radio are combined ideally for the account. Born on a livestock farm in Iowa, he completed work on bachelor's and master's degrees at Iowa State College in agricultural journalism. As an undergraduate, he wrote freelance news for local and regional farm papers and national magazines, waited on tables in his Delta Chi fraternity house, and was a member of Alpha Zeta (agriculture), Sigma Delta Chi (journalism), and Cardinal Key (senior society).

After 12 months as a graduate assistant when he divided his time between teaching duties and work on his master's thesis, he left the campus for the outside world. In 1942, he returned briefly to receive his M.S. after researching and writing a thesis on "The History of Early Iowa Farm Magazines," covering the years from "zero to 1900."

Mr. Seaman worked as field editor of *New Jersey Farm and Garden*, handling editorial as well as advertising, and as a salesman for the daily *Drovers Journal* in Chicago. Joining the North Dakota Agriculture College at Fargo in 1938, he handled duties as publicity

NORMAN C. KAL, president and treasurer, Kal, Ehrlich & Merrick Adv., Washington, D. C., elected business representative on board of Assn. of Better Business Bureaus Inc.

THOMAS P. REILLY to media staff, Ted Bates & Co., N. Y., as space buyer.

RAY VIR DEN, former president of Lennen & Mitchell, N. Y., who was said earlier in B•T to be opening agency, reported last week that it was office which he would use as base of operations, but not an agency.

ARTHUR PARDOLL, business manager, radio-TV department of Sullivan, Stauffer, Colwell & Bayles Inc., N. Y., father of girl, Martha Jean, June 12.

EDWIN B. TYLER to Hermon W. Stevens Agency, Boston, as assistant to president.

Buffalo Retail Market Ranks 14th Among Cream Sales Areas

BUFFALO EVENING NEWS New York Bureau.

NEW YORK, May 27.—The Buffalo retail market today ranks 14th among "cream" metropolitan retail sales markets in the United States.

"The Buffalo metropolitan retail market is actually larger than that of the entire State of Maine," said Dr. Vergil D. Reed, former acting director of the census, in announcing the seventh edition of "Population and Its Distribution."

"Buffalo itself has a population of 580,132, ranking 15th among U.S. cities," said Dr. Reed, who is vice president and associate director of research of the J. Walter Thompson Company.

"But the Buffalo metropolitan retail market really includes the Counties of Erie and Niagara, giving it a total population of 1,089,230. This represents a market larger than Maine, Rhode Island or Arizona."

general stores, accounting for 12.37% of the national total.

The state buys: Drug and proprietary goods, 9:30% of the national total; furniture, furnishings and appliances, 12.30%; automotive, 7.65%; gasoline service stations, 6.82%; lumber, building and hardware, 5.97%.

169,000,000 by 1960

Here are some significant facts with respect to population, shown by the study:

1—The population of the country today is three times that of 1880 and twice that of 1900. Each month it continues to increase more than a Hartford, Conn., or Des Moines, Ia.

2—From 1940 to 1950 the population of the country gained 000,000, or 14.3%, the largest any decade in history.

3—It is estimated that the population will reach 169,000,000 1960, adding three Michigans nearly two Californias to the U

Big Buffalo's 'Cream' Market Larger Than Maine, Arizona or Rhode Island

These figures are stoppers: A total of $1,027,228,000 represents the annual buying of 306,142 Buffalo market households in 14,252 retail outlets. This rich market is completely covered by Buffalo's No. 1 station — WBEN. Petry will tell you all about this "cream" station and market.

AP NEWS means GOOD NEWS

GOOD NEWS for WJLK, Asbury Park, N. J.:

"We feature AP news every hour," says Station Manager Tighe. "It is the backbone of our local programming and time sales. Our listener ratings show that a local independent which does a good news job can outpull networks in the local market!"

Thomas B. Tighe, Station Manager
WJLK, Asbury Park, N. J.

GOOD NEWS for KARK, Little Rock, Ark.

Commercial Manager Haas reports:
"Our 39 weekly 15-minute AP newscasts are divided among 12 sponsors. All have been with us at least four years. That's proof that AP news with alert local and regional coverage is good business for sponsors and for KARK."

Julian F. Haas, Commercial Manager
KARK, Little Rock, Ark.

More and more of the country's finest stations are announcing with pride: *"THIS STATION IS A MEMBER*

GOOD NEWS GOOD NEWS GOOD NEWS GOOD NEWS GOOD NEWS GOOD NEWS GOOD NEWS

for station and sponsor!

GOOD NEWS for the FISCHER BAKING COMPANY,
with seven 15-minute AP newscasts a week on WJLK:

"Our long sponsorship of AP newscasts on WJLK shows (1) their effectiveness, and (2) our satisfaction," declares George J. Fischer. "These newscasts accomplish two important jobs . . . a public service in keeping our audience informed . . . and an advertising job by promoting Fischer Baked Products to a larger-than-usual audience!"

GOOD NEWS for MEYER'S BAKERY, sponsor of
seven AP newscasts a week on KARK:

"We're in a highly competitve field," says Charles T. Meyer, President, "and we must maintain our leadership as marketers of quality baked goods. Our AP newscasts on KARK help us do this by providing a powerful selling medium plus the public service credit and prestige which go with sponsorship of AP news."

OF THE ASSOCIATED PRESS."

Associated Press . . . constantly on the job with

- a news report of 1,000,000 words every 24 hours.
- leased news wires of 350,000 miles in the U.S. alone.

feature of the week

MR. RUSSELL DARY, real estate and insurance firm owner, is putting his ability at the organ to good use on KMAN Manhattan, Kan.

Last March, Mr. Dary began a quarter-hour Sunday afternoon program on KMAN, featuring his own organ music. The program, *Melodies at Home*, is aired from Mr. Dary's residence.

In two months, Mr. Dary's firm had moved more than $150,000 worth of real estate alone. Considering that Manhattan is a community of only 19,000 inhabitants, this was quite a feat, Bill Friday, KMAN commercial manager points out.

The insurance portion of Mr. Dary's business has increased to the point where it now pays for the entire overhead expense.

Mr. Dary gives KMAN credit for helping to increase his business as much as 30% over a two-month period. Ten minutes after his first quarter hour, a hitherto unknown prospect phoned to compliment Mr. Dary on his music talent. This phone call eventually resulted in sale of a $30,000 piece of property, which had been mentioned in one of the commercials.

In addition to his advertising over the radio, Mr. Dary participates twice weekly in a public service type program promoting *Safety First*.

Mr. Dary, through KMAN, airs Melodies *from his living room.*

* * *

Mr. Dary is a member of the Washington Committee of the National Real Estate Board, a past-president of the Kansas Assn. of Real Estate Brokers and holds the Kansas Assn. of Real Estate Brokers "Outstanding Achievement Award" for 1951.

As a musician, and as a businessman, Mr. Dary knows that radio brings the most harmonious results from the broad keyboard of advertising.

strictly business

ARTHUR Clarendon Smith, president of Smith's Transfer & Storage Co., has added a new expression to Washington's vocabulary through radio advertising.

The expression, "Don't Make a Move Without Calling Smith," is used by Mr. Smith as a slogan. Children at play use it. Washington officialdom uses it. It has become a household term.

More than incidentally, Mr. Smith traces the phenomenal growth of his moving and storage business to radio use of that slogan, which is whispered by the announcer.

So much, in fact, does he think of that slogan that it has been registered as a trademark. He sold its use to a New York City firm, which also is doing quite well with it.

The whispered slogan actually is the brainchild of Mr. Smith's advertising representative, Courtland D. Ferguson, president of the agency, Courtland D. Ferguson Inc. Mr. Smith first used radio advertising in February 1943. Until that time he used newspaper space spasmodically, radio even less frequently.

Mr. SMITH

. . . his whispered slogan became a household expression

In 1943, he decided to do more

Mr. Harry R. Lipson
General Sales Manager
Radio Station WJBK
Masonic Temple
Detroit 1, Michigan

Dear Mr. Lipson:

With regard to our recent campaign on behalf of the Perfume Sales Company in the Detroit area, we would like to take this opportunity to advise you of the splendid job that WJBK did for us.

In the two days WJBK was directly responsible for 1,902 telephone calls which resulted in 2,177 actual orders, the difference, of course, are the multiple orders. While the campaign was directly slanted to telephone orders only, we were happy to receive 200 pieces of mail.

Per dollar spent, WJBK brought our client one of the lowest cost per sale figures in the campaign's history. We truly congratulate WJBK!

Would you also convey our sincere thanks to the staff who helped make our stay in Detroit as truly pleasant and successful as it was.

Very truly yours,
RAND ADVERTISING AGENCY

* * *

Technical Tizzy

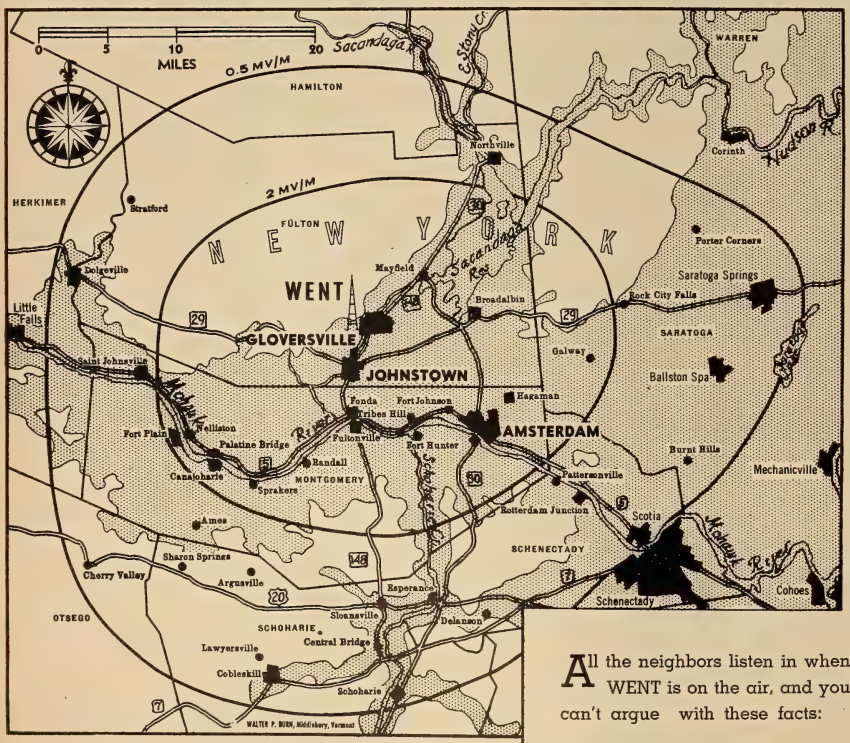
EDITOR:

Notice in the June 9 issue of BROADCASTIG • TELECASTING that the NARTB and Mr. [Richard P.] Doherty [NARTB director of employer-employe relations] have succeeded in getting an FCC hearing on their proposal to drastically reduce operator requirements.

Even allowing for Mr. Doherty's inimitable use of doublethink and scrambled semantics, the proposals make very little sense from any rational standpoint.

As for a shortage of licensed operators, FCC figures show that the number of first phone tickets more than doubled between 1946 and 1950. . . . Concerning the same operator requirements for a quarter kilowatt AM station and a television station, the truth of that matter is that the former are not too high, but the latter far too low. UHF and color TV will further increase technical requirements. . . .

Lewis C. Sherlock
Denver



* * *

Score an Assist

EDITOR:

It was with great interest that we read the article in the June 23 issue surveying a typical cross section of the leading advertising agencies and their ideas on the handling of spot schedules which are disrupted by the broadcasting of the political conventions this July. Having an advance look into the situation will be of real assistance to us in planning our own procedure.

H. William Koster
General Manager
WPJB Providence, R.I.

2500 SONG WRITERS

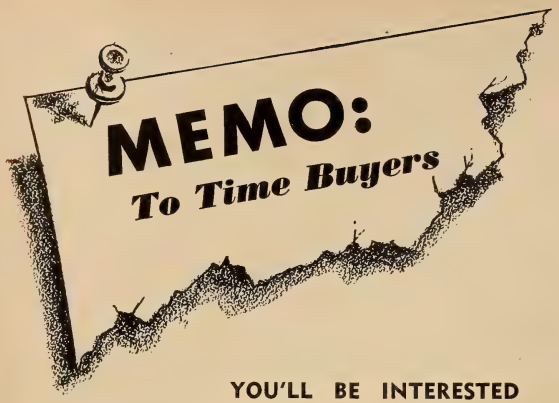
WORKING FOR YOU

MR. SHOWMAN:

Suppose you put the country's 2500 leading song-writers on your payroll to create the music your customers demand. Picture the size of your payroll! But there is a simple way to get the same result at a nominal cost.

The way, of course, is through an ASCAP license, which gives you ready access to the best-loved American music . . . an unparalleled catalog containing tens of thousands of compositions of the more than 2500 leading American song-writers . . . the favorites of the past half-century.

In brief, you get the MUSIC that has made the field of entertainment one of America's great Industries. MUSIC is the lifeblood of radio and television, night clubs and taverns, restaurants and hotels . . . wherever Americans while away their hours of relaxation.



The creative talent that makes MUSIC good business for you is available at low cost. Look at it this way . . . *the total royalties paid to writers and copyright owners last year through ASCAP by all commercial users of music are only a fraction of a cent of each dollar spent on entertainment by the American public.*

An ASCAP license is the biggest bargain in entertainment!

This is the second of a series of advertisements telling the story of ASCAP

ROBERT P. CLARKE Jr. promoted to assistant director of advertising, Mutual Life Insurance Co., New York.

Is it time for another Declaration of Independence?

The men who wrote the first one struggled to put new ideas into simple words. Humbly, they tried to set down clearly certain rights of man that could be called God-given, and hard-to-say things of a spiritual nature — truth, equality, freedom.

And the words came alive, and the ideas shone clear. The idea that each man is more important than his government; his independence more precious than his security; his spiritual strength more lasting than his armies.

Upon these, a nation grew great.

There are always people who fear such ideas — even today, even in America. These people feel that man cannot be trusted with his destiny. They are working to make government the master — instead of the servant — of the people.

Their distrust of the individual has spread frighteningly in the past few years.

It can be stopped by ideas — the same ideas spelled out in the Declaration of Independence.

It's time for all of us, privately and in public, to declare once again our independence — to speak up for freedom, and against anything that threatens it.

• • • • •

The trend toward more and more government controls is a threat to every business, every family, every individual. That's why this message is published by America's business-managed, tax-paying ELECTRIC LIGHT AND POWER COMPANIES*.

TV APPLICANT LIST GROWS

170 to Spend $62 Million

By LARRY CHRISTOPHER

AS NEW TELEVISION applications began to arrive at FCC in ever increasing numbers last week—on the eve of the July 1 commencement of processing — a study of the 170 bids on file late Thursday showed that these applicants plan to spend more than $62 million in construction of their facilities, a per-station average in excess of $367,000.

Of these applicants, 169 estimate first year operating costs totaling over $49 million, an average of $292,000-plus per station. First year revenue estimates, of 162 applicants reporting their income expectations, total nearly $51 million, or almost $314,000 per outlet.

Of the 30 operating stations, required by FCC's Sixth Report to change their channel assignments to conform with the new allocation plan [B•T, April 14], 17 to date have filed applications for such changes with the facility switch and new construction to cost them a total of nearly $4.5 million, or a per-station average of almost $260,000.

Meanwhile, as nearly a score of last-minute petitions for reconsideration of the Sixth Report hit the Commission on Monday, the FCC last week took the following actions relating to TV and allocations:

● Indicated it could determine only "in the light of the circumstances presented by a specific application" whether two or more AM operators in the same market may legally prosecute a joint TV application and still retain their competitive and separate AM stations. The pronouncement, made in a memorandum opinion and order denying the petition of KFBI Wichita for a declaratory ruling, was interpreted to mean FCC will consider such joint applications on a case-to-case basis.

● Granted the application of WXEL (TV) Cleveland for change in frequency from Channel 9 (186-192 mc) to Channel 8 (180-186 mc) in accord with a Sixth Report show cause order. WXEL is one of the 30 existing outlets required to change facilities. Increase in effective radiated visual power from 7.5 kw to the maximum 316 kw was granted, along with move of main studio location from WXEL's transmitter site at Parma, Ohio, to Cleveland. Change will extend WXEL's Grade A service to about 45 miles, Grade B to about 63 miles. Comr. Frieda B. Hennock dissented.

● Denied the petition of Westinghouse Radio Stations Inc., supported by KROW Oakland, Calif., for modification of the temporary processing procedure to establish city priorities on the basis of a "television service factor" of population divided by existing services [B•T, June 9]. FCC held the Westinghouse plan would substantially eliminate the precedence FCC has given UHF in the Group B-2 cities (those with one or more stations and having only UHF channels available).

● Issued notice of proposed rule making to add UHF Channel 14 at Palm Springs, Calif., as requested by Dr. Forbes Farms Inc. in first such petition to be filed [B•T, June 9]. Aug. 11 was specified as deadline for comments.

● Amended its new station application form 301 to add another page to Section II on legal qualifications to obtain additional information from applicants for noncommercial, educational stations.

● Advised WDRC Hartford, Conn., that the term "principal community" as used in Sec. 3.613 of its rules relating to main studio location means city, town, village or other political subdivision, not "metropolitan district." FCC explained the main studio must be within the corporate boundary but noted the rule's provision for case-to-case consideration of "severe and undue hardship" situations where studios must be located outside such boundaries.

● Amended its multiple application rule, Sec. 1.364, to include TV outlets with AM, FM and other type stations. The rule provides that while one application is pending, FCC will not accept another from the same applicant which seeks new or additional facilities for a station of like class to serve the same community.

● In spite of the concern of certain Washington broadcast attorneys, FCC informally explained the new "application acceptance" policy of the Broadcast Bureau's

STREIBERT NAMED

General Telecasting Head

NEW major TV program and sales organization was launched last week by General Teleradio Inc. with formation of an associate video operation, General Telecasting System.

The project is based on a new concept of nationwide television program distribution under the General Tire & Rubber Co. banner, with General Telecasting selling and delivering programs to its own stations and to affiliates and advertisers, combined with variations of spot and co-op broadcasting.

Mr. Martin

Theodore C. Streibert, formerly president of General Teleradio's WOR New York, is president of General Telecasting. Dwight Martin, who left Crosley Broadcasting Corp. a week ago to join General Teleradio [B•T, June 23], becomes executive vice president. He also is vice president and general officer of General Teleradio. John Poor, Boston attorney for Yankee, is secretary. He is understood to have handled incorporation of General Telecasting under a Delaware charter. General Telecasting expects to distribute programs by the best available means, whether film, coaxial cable or radio relay. In the early stages it was speculated that its main effort would be concentrated on film programs but both film and live product will be distributed.

John Sutherland, head of John Sutherland Productions, Hollywood, producer of commercial TV films, is understood to have been retained by General Telecasting as a production expert to advise on procurement of programs for distribution. It is believed he will headquarter in both Hollywood and New York.

General Telecasting's plan is said to contemplate arrangements with many production companies for procurement of film and live programs. It could not be learned whether Mr. Sutherland's firm would produce films for the new company.

It appeared clear that General Telecasting does not plan to engage in TV network business in the accepted means. Instead it is expected to distribute programs anywhere by the most economical and efficient sense. It was not clear what arangements would be made for time clearance on TV stations.

In getting under way General Telecasting will have a nucleus of the General Teleradio stations, including WOR-TV New York, WNAC-TV Boston and KHJ-TV Los Angeles.

Mr. STREIBERT

RADIO'S FUTURE

May Be Affected by CBS Radio Affiliates Meet

RADIO broadcasters were waiting tensely last week for a meeting this Tuesday and Wednesday which, they felt, may go a long way toward shaping radio's future.

This is the meeting of CBS Radio affiliates, first among themselves and then with topmost CBS officials. The center of the discussion is expected to be rates: Network radio rates, and collaterally, the effect of any change in those rates upon all radio time charges.

Leaders of the affiliates—who are expected to number about 125 at the meetings at New York's Ambassador Hotel—are marshalling arguments against the nighttime rate cuts they fear are coming, while CBS Radio officials are preparing to "lay it on the line" with a report on network problems, including circulation and financial data.

Some specific proposals toward solution of current problems reportedly are being prepared by the affiliates' steering committee, but committee representatives declined to reveal them prior to the sessions. Network authorities said they, too, have been working—over a long period—on a series of possible solutions, but doubted that such proposals could be firmed in time for presentation during the affiliates conference.

The one point which found network and affiliates in harmony on the rate question was the conclusion that if CBS Radio cuts its rates, the other networks will be compelled to follow suit.

To speculation that CBS authorities may decree as much as a 50% reduction in nighttime rates—or a 40% cut, accompanied by a 10% increase in day rates, which also would make day and night rates equivalent—one leading station executive cited this example of the effect upon an affiliate:

Assume that a station now has a nighttime sales potential of $1,000 a night and is selling $550 of this. Then assume the nighttime rate is cut 50%. Even if the station then sells a full 100% of his potential at the reduced rate, it nevertheless will be receiving $50 less than it did in selling only 55% of its potential at the old rate.

Many affiliates protest that rates not only should not be cut but that daytime rates should be increased —at least to the point where they stood before the general 10% reduction was put into effect by all networks a year ago.

Affiliates contend network executives have been too prone to rationalize a need for rate reductions, ignoring also the high level of radio business which stations are experiencing at the local and national spot sales levels. A number of them also are openly critical of CBS Radio for its recent renegotiation of affiliation contracts, through which the network gained the right to change affiliates' network rates also at will. They contend they had thought CBS Radio was seeking this right in order that it would be able to change rates quickly to "meet competition," in event another network reduced rates first. Now they fear CBS Radio is going to use the right to initiate a reduction itself.

Half-Dozen Lacking

Network officials say all but a half-dozen of their major affiliates have agreed to the new contract. The half-dozen includes: WJR Detroit, WGAR Cleveland, WHAS Louisville, WREC Memphis, KOIN Portland, Ore., and KIRO Seattle.

Representatives of four of these six are members of the affiliates' steering committee which set up the July 1-2 sessions: John F. Patt of WJR and WGAR; Victor A. Sholis of WHAS, and Saul Haas of KIRO.

The steering committee will meet today (Monday) with the Columbia Affiliates Advisory Board, headed by I. R. Lounsberry of WGR Buffalo, to discuss plans for the Tuesday and Wednesday session. Tuesday's session will be limited to affiliates; on Wednesday they will be joined by CBS top officials, including Board Chairman William S. Paley, President Frank Stanton, CBS Radio President Adrian Murphy, and Station Relations Vice President Herbert V. Akerberg.

George B. Storer of Storer Broadcasting Co., one of the originators of the meeting, has been designated chairman for the affiliates conference. Mr. Sholis will make the keynote speech.

Members of the steering committee, in addition to Messrs Storer, Sholis, Patt, and Haas are William B. Quarton, WMT Cedar Rapids; John E. Fetzer, WKZO Kalamazoo; Hulbert Taft, WKRC Cincinnati; Kenyon Brown, KWFT Wichita Falls, Tex., and Ray Herndon, KTRH Houston.

The Network Picture . . . . . AN EDITORIAL

ALL EYES ARE on New York. CBS meets Wednesday with its radio affiliates to attempt to settle, amicably and across the table, the troubled state of their business relationships.

Should radio rates be adjusted, day or night, or both? up or down? That's the wrap-up question. The only thing certain is that there won't be any midnight action, without affiliates' consent, as was done in April 1951.

What has happened in the past solves nothing. The 10-15% cuts didn't stem the tide. What happens this week will set the pattern for other networks. The profound affect it will have cannot be overstated.

The pressure from the networks is for further cuts, sharp enough to permit them to dig in and build anew. Affiliates contend they can't stand further cuts and that the networks haven't sold radio as the biggest and best buy for the advertisers' dollar.

We side with the stations, as we have from the beginning. But we believe if current rates are to be retained, a way must be found to make sure they are observed. It is the under-the-table deal that has brought about the present crisis in network radio.

No one relishes the off-card deal. The advertiser accepting one is suspicious that his competitor may be getting another that is better. The agency, in between, must bicker and bargain, else it stands to lose accounts to another agency which lets the client know it can get radio for him wholesale.

The whole buyer-seller fraternity of network radio would be relieved if the sellers went back to selling at announced prices.

It is to this problem that the CBS meeting must address itself: How to get network radio back on the rate card.

A reawakening of old antagonisms won't do. It may be a fact that the networks got themselves into this mess by making concessions to clients, but the affiliates cannot get them out of the mess by doing nothing more than citing this fact.

No matter who is responsible for creating the problem, all hands must cooperate in solving it.

It may be the CBS meeting will result in the fateful conclusion that full-scale revision of network-affiliate relations is essential. Radio is being sold on the local and national spot levels in greater volume than ever before. Network radio isn't. There must be something organically wrong.

There are favorable indications that a solution, or at least important steps toward one, may come out of the CBS meeting. The nine broadcasters responsible for the conference with the network are among the most intelligent and successful operators in the nation. Other operators of equal ability will attend.

The fact that CBS is bringing in its first team—headed by Chairman William S. Paley—is significant and encouraging. An impressive congregation of network and station brains will be present. If, together, these leaders cannot create a sound and prudent plan to restore stability to network radio, no one can.

Indeed, if hopes are realized, the CBS meetings could be a forerunner of a general revitalization of network radio, a problem that simultaneously is being worked on seriously at rival networks too.

At NBC, Frank White has taken over as vice president and general manager, fresh from a three-year, hard-selling job at Mutual, and Pat Weaver has been directed to apply his proven talents in program management to the radio network as well as television.

Mutual is beginning to function as an old-line network under the policies and know-how of its General Tire parent and the new ideas of young, smart Tom O'Neil.

If ABC's merger with United Paramount survives the interminable scrutiny of the FCC, that network will be infused with new operating capital and showmanship experience.

And, though hampered by anti-trust strictures within which it must operate, the all-radio Affiliates Committee continues to do its job. As a meduim for the exchange of information among the outlets of various networks, if nothing else, that committee would be well worth the trouble to which its members have gone.

What happens this week in New York will set the pattern for what is to happen generally in network radio in the future. Adjustments, admittedly, are needed. But we think they should be principally adjustments in the attitudes of the networks.

A network is an aggregation of affiliated stations, hooked up by wires or cables. The CBS affiliates are determined to keep it that way, or maybe look for another way of doing business.

We hope the meetings will produce a relationship in which both affiliates and networks can prosper, as we believe there is every possibility of doing.

Nothing but good can come from a full, frank and open discussion of network-affiliate problems. The affiliates group is to be commended for making the effort, in broad daylight, and CBS for accepting it. Reasonable men, fully informed, usually find the answers.

THE CHICAGO POLITICAL SHOW Is About Under Way

"THE GREATEST show on earth" —no longer the circus but the passing political parade—will unfold with unprecedented drama and pageantry before the greatest viewing-listening audience in broadcasting history with the opening of the Republican National Convention in Chicago next Monday.

With the emergence and growth of television it is perhaps significant that the words "smoke-filled rooms" are passing from the politician's lexicon to the limbo of another age.

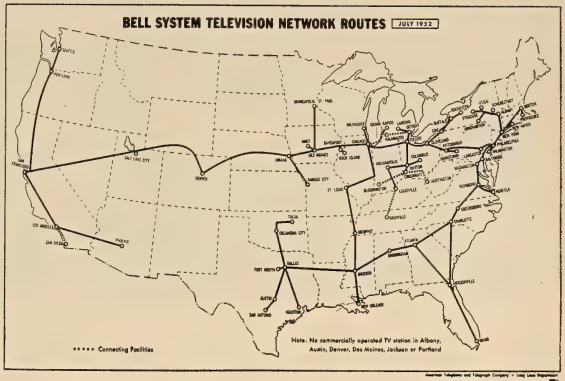
An estimated 60 million Americans will have a front-row seat at the 1952 conventions, with the assistance of American Telephone & Telegraph Co. and its associated Bell system companies. And, of course, "everywhere you go, there's radio."

It is apparent that television, itself, has traversed a long path—in progress and geographically—since the 1940 and 1948 nominating conventions in Philadelphia. But there is every indication, too, that radio will not be outdone in point of painstaking preparations and arduous planning.

Network and independent station coverage gives promise of rivaling Hollywood's own boisterous claims in the "never-never" land of fabulous deeds. Indeed, advance blueprints of the broadcast media suggest that it would be folly to chronicle "the era of wonderful nonsense" until radio-TV coverage of "the greatest show" is a poignant political reality.

The claim of the GOP and Democratic factions that each will be a wide-open convention, in full view or sound of America's viewers-listeners, is perhaps not the least attributable to these comprehensive plans. Coverage will be wide open, too, and both parleys will be tailored to accommodate the audio-visual media, especially television.

Anticipating the conventions, AT&T managed a herculean task by laying some 5,000 miles of new radio-relay and coaxial cable to accommodate at least 10 new cities and a good 99% of the nation's 17.5 million TV receivers. Even non-TV cities will be availed of coverage by means of closed circuit hookups.



Circuits also have been geared to assure interconnection by long lines of more than 1,200 radio stations, with many independent outlets accredited for direct pickups on an economical pro-rated fee for the first time.

Four years ago, the nominating conventions filtered out to some cities on a makeshift 16-station network comprising Boston, New York, Newark, Philadelphia, Baltimore, Washington and Richmond. AT&T estimates that live telecasts will be offered, starting next week to 107 out of the 108 outlets in 65 cities. Only Albuquerque, N. M. (KOB-TV), is off the AT&T route.

Joining the AT&T-Bell network for the first time will be Miami, New Orleans, Dallas, Fort Worth, Houston, San Antonio, Oklahoma City, Tulsa, Phoenix and Seattle. Residents in Denver, Fresno (Calif.) and Portland (Ore.) will view activities by special arrangements in theatres and hotels.

Lest it be reckoned that the 1952 convention story is one of physical facilities, it should be added that the best laid plans of men—network and station, plus sponsors—figure auspiciously, too.

Here are capsuled developments in advance planning by networks, station, national political committees, sponsors, and Congressional factions:

TEN new cities will be added to the Bell System's interconnected TV network by next Monday, the opening of the Republican Nattional Convention, availing "live" coverage of the GOP-Democratic meets to 99% of the nation's televiewers. AT&T and associated Bell companies are increasing network span from 24,500 to 29,500 miles of radio relay and coaxial cable channels. Map shows TV network routes as of July 7, hooking in every TV city save Albuquerque, N. M.—or 65 cities with 107 stations. "Connecting facilities," indicated by dots, refer to hookups provided by other than AT&T.

● Unofficial estimated cost of network pool operations runs between $35,000 and $40,000 per network for TV and about $10,000 for each in radio.

● Small stations will be able to cover both conventions by heavy spending as in the past, thanks to the National Assn. of Radio News Directors, the Chicago News Broadcasters Assn. and United Press.

● Radio-TV representatives will number about 2,000—more than 15% above the number who covered the 1948 parleys in Philadelphia. They will cover more than 300 network and individual outlets, according to the Executive Committee of the Radio-TV Galleries on Capitol Hill.

● ABC announced a tentative pickup schedule for both radio and video coverage of the Republican and Democratic meets.

● Upwards of an estimated $7 million will be spent by the networks to telecast the two conventions, with virtually none expecting to show a profit despite sponsored coverage.

● The Democratic National Committee has named J. Leonard Reinsch, on leave from the James Cox Radio-TV properties as consultant to Chairman Frank McKinney [B•T, May 19], and James Sauter, widely known in broadcast circles, as co-chairmen of an Entertainment Industry Committee for its convention.

● A host of special features and tape-recorded programs will be aired by the networks and local stations, respectively, during the political meetings. Regular pickups will be aired at 12:30 p.m. and 9:30 p.m.

Both conventions will be held at the International Amphitheatre on Chicago's south side, with additional activities to be broadcast from the Conrad Hilton Hotel, convention headquarters, and at other points. NBC and CBS have provided sketches of their facilities layout [see page 36, and also B•T, June 23]. The Democratic convention opens July 21.

National radio-TV coverage and sponsorship of both conventions were negotiated under an arrangement which called for the networks to sustain installation costs and permitted them to sell sponsorship on the condition that advertisers be acceptable to both national committees.

Regional and local stations also were asked to submit their sponsor lists to the committees, which prescribed general requirements on advertising messages and other phases.

NBC spokesmen estimate that the network's convention program costs, radio and TV, will amount to at least $500,000, covering housing, personnel, transportation, etc. This also includes the $35,000 to $40,000 pool contribution. The sum does not include station compensation and pre-emptions. NBC was able to save some money on pre-emptions by cancelling certain programs 30 days in advance.

CBS gave no estimate on its radio-TV convention program expense, but generally it's expected to approximate NBC's estimated half-million. ABC's probably will run somewhat less.

The above figures refer to com-

"Mr. Taft insisted on exactly the same facilities Ike got at Abilene."

DEPT. STORES' BLUE MONDAY

Here's the lineup of eager customers awaiting the opening of Pomeroy's one morning after the word had spread by radio that good buys awaited the early birds.

* * *

• • • Pomeroy's Has a Radio Answer

WHAT happens to Monday department store sales in a town which has no Sunday newspaper?

In such communities, Monday is the ebb day of the department store week.

But in Pottsville, Pa., Monday has become a lively merchandising day for one department store. And, for some articles it has become better than any other day in the week.

The answer is radio.

In a continuance of its experiments on the use of radio to sell merchandise [B•T, May 5], Pomeroy's of Pottsville has found that a properly planned Sunday radio campaign can sell selected, sales-priced items on Monday in a volume exceeding expectations.

Pomeroy's is an Allied Stores Corp. department store with a sales volume of under $5 million per year. Its ratio of sales to advertising runs 2-2½%. It had been running about 16% of its space and time advertising budget on radio time purchases, but this lately was boosted to 20%.

The campaign consists of a single half-hour Sunday afternoon program plus eight spot announcements throughout the day on the local WPAM (250 w on 1450 kc).

The program, which has been operating for the past month with a light classical music format, opens and closes with a minute-long commercial. During the show, short, pithy sales plugs are given preceding the playing of each musical selection for the single item chosen as the sale merchandise for the next day.

Outlay for the Sunday campaign runs a mere $35. This is what has been accomplished:

Sold six TV console receivers plus two others (one higher priced, one lower priced). Total sales, $1,600. Selling cost, 2.2%.

Sold six private brand refrigerators. Total sales, $1,400. Selling cost, 2.5%.

Sold two brand name refrigerators (all that were in stock) plus others. Total sales, $1,900. Selling cost, 1.8%.

The results of a fourth test, a Father's Day special on men's slacks, had not been collated at this writing.

Essence of the Sunday radio advertising program in Pottsville is this:

Radio can be used by department stores in the same pattern as they use newspaper advertising—heavy Sunday displays to promote Monday sales.

Generally, radio has been used at a constant level through the week. Retailers, however, have always plunged heavily, newspaperwise, on weekend promotions to build sales and traffic for Monday openings.

Success of Pomeroy's Sunday broadcast tests can be measured by the results of its TV receiver sales.

Pottsville has no TV station and, because it is in a valley, TV signals from Philadelphia (90 miles away) don't reach the 55,000 homes in that Schuylkill County trading center. Pottsville TV viewers get their TV programs via privately-owned Trans Video community television system, which charges $135 installation fee and $3.75 a month for service.

Therefore, the sale of six TV sets in one day—any day of the week—could be considered extraordinary. That such a number of video receivers were sold on a Monday is considered even more extraordinary.

Among previous radio tests was one on the sale of a specially-priced 9x12 ft. Axminster rug. Newspaper promotions had offered them at $59—down from the original $89 list—and had moved none. Pomeroy's was willing to sell them for $49, but the radio people felt that was too low. So the rugs were priced at $69—$10 higher than offered in newspaper advertisements. However, salesmen were given a $5 bonus for selling the rugs to customers brought in by the radio promotion.

Results? Sold $4,445 in two radio spot campaigns. First was a two-day series, with 15 announcements. It sold 11 sales-priced rugs, plus eight $89 rugs for a total of $2,605. Second was a three-day campaign, with 67 spots. It sold 11 more sales-priced rugs plus five $89 rugs for a total of $2,140.

Total cost for the 82 spots—$155.80. Selling cost, 3.3%.

But, significantly, other merchandise was sold to rug customers—to the total of $2,060.

Another excellent result of radio advertising was scored by the Pottsville store when it engaged in a saturation campaign to sell coupon books. This is a credit gimmick, whereby good risks are permitted to take out credit in the form of coupon books—available for immediate use.

In a 10-day spot campaign preceding last Easter, the store pitched 255 spots at the market, increasing its coupon book accounts from 313 at the same period in 1951 to 494 in 1952—an increase of 57.8%. Average value of the book was raised from $31.64 in 1951 to $36.04 in 1952. Total value of the book was raised from $9,905 in 1951 to $17,805 in 1952—a jump of 79.8%.

Costs? For time, $515; for giveaway (a compact), $247—or a total of $762.

Selling cost, therefore, was only 4.7%—or, including the cost of giveaway, 9.5%.

Result of the coupon book campaign so impressed Pomeroy's management that in the two weeks preceding Father's Day, it went all out in a second radio spot saturation campaign on this item. This resulted again in an 80% increase in coupon book value.

Only one failure has so far been reported in these tests of radio's effectiveness. That was an attempt to sell a $7.95 defroster unit, which turns any refrigerator into an automatic defroster. Both the department store and radio executives probed the reasons for the failure, and then decided that the item needed to be more fully explained to the buying public.

This has been done by having WPAM's daily woman's commentator mention the defroster and how it works every day for the past two weeks. There is no selling.

In another week or so, the station

(Continued on page 77)

* * *

That Selling Pitch

ONE of the significant aspects of the radio test being conducted by Pomeroy's of Pottsville is that the station (WPAM) completely controls the writing of the advertising copy. It not only sends its own copywriters to the store to inspect the merchandise chosen for promotion, but their copy is inviolate—except for factual corrections.

Thus, the station is building up not only a roster of success stories, but a staff of experienced, merchandising-wise *radio* copywriters. This will stand it in good stead for selling and servicing other accounts in its service area of 109,000 people (Pottsville itself has 26,000 people).

WPAM has also determined, by trial and error, the proper uses to be made of announcers—whether a male or female voice is best for a particular type of merchandise, or a particular type of copy. It has also built a backlog experience on the use of hard-selling or low pressure copy on different types of merchandise.

Station checks the pull of its copy hourly, has so geared its operation that it can change the script on an hour's notice—and continue to tell how it is pulling.

ROBERT B. GABLE

. . . Pomeroy's president, who with his brothers put WFPG Altoona, Pa., on the air back in 1924

FALL SCHEDULES

Advertisers Finalizing Plans

By FLORENCE SMALL

ADVERTISERS responded to the first week of summer with a sudden gust of action directed generally at fall TV and radio schedules.

Executives of Grant Adv. and those of one of its clients, the Dodge Div. of Chrysler Corp., will meet in Detroit the week of July 7, B•T learned last week, to plan for the autumn season. A television network show is expected to materialize as one result of that planning.

Regent cigarettes through its agency, Hilton & Riggio, New York, it also was learned, has not renewed its sponsorship of a portion of *Today*, early morning show on NBC-TV, but expects to put its advertising budget instead into a network television show to start in the fall. The agency currently is looking over program formats with that in mind.

In another fall development, John F. Dulaney (frozen foods), already creditably represented with John Reed King's *Dulaney Daily Double* on ABC radio and a spot campaign in both radio and TV, is planning to increase its fall television budget. A definite decision will be released about Aug. 1. Agency is W. Earl Bothwell, New York.

Bab-O Plans

In a development of another sort, B. T. Babbitt Co. (Bab-O), which recently left the William Weintraub agency, has studied presentations of 21 agencies and reduced to four the list of candidates for its account. Company officials are expected to assay the remaining four this week, with definite assignment of the new agency affiliation anticipated July 7.

Meanwhile, Piel's beer, another account which recently changed agencies—from Kenyon & Eckhardt to Young & Rubicam, both New York—is understood to be determining its fall radio and TV schedule.

Ford Motor Co. (J. Walter Thompson) and General Foods (Postum, through Foote, Cone & Belding and Log Cabin syrup through Benton & Bowles) effective today (Monday) will sponsor *Robert Trout and the News* on Sundays and Tuesday through Friday at 10-10:05 p.m. and Mondays at 10:30-35 p.m.

Among the frozen food advertisers, one which celebrates the seventh birthday of its trademark, Teddy Snow Crop, is planning to start its radio and television spot schedule in late summer, about mid-August. Maxon Inc., New York, is the agency.

Birdseye frozen orange juice, through Young & Rubicam, New York, plans to start a three-month spot radio and TV campaign early in July in eight markets.

Another frozen food advertiser, Seabrook Farms, is continuing to line up half-hour radio programs in 110 markets [B•T, June 23] through Maxon Inc.

American Tobacco Budgets

For the fall, American Tobacco Co. [B•T, March 3], for its Tuesday 9-9:30 p.m. period on CBS-TV, has bought a film series owned and packaged by Music Corp. of America and entitled *Biff Coulter USA*. The firm continues to sponsor, for Lucky Strike, *This Is Show Business* (Sunday on CBS-TV) and *Robert Montgomery Presents* (Monday on NBC-TV). BBDO New York, is the agency. During the summer months *Man Hunt* will be the summer replacement for *Your Hit Parade* for the second successive year, Saturday on NBC-TV, which will return for Lucky Strike early in September.

In scotching a report its budget would be directed in part to promoting a change in the length of Lucky Strike. Paul Hahn, president of American Tobacco Co., announced last week that the company "is not planning to change its principal brand Lucky Strike to king-size."

"Sales records for the industry," he said, "show standard-size cigarettes continue to be favored by the great majority of the smoking public, and account for about 85% of the cigarettes smoked in the United States. Sales of Lucky Strike cigarettes have made good progress since the first of the year," he observed.

"Pall Mall and Herbert Tareyton cigarettes, both made by American Tobacco Co., are the two largest-selling king-size cigarettes on the market," he added.

P. Lorillard Co. (Old Gold cigarettes), through Lennen & Mitchell (soon to be Lennen & Newell), New York, has signed the *Fred Allen Quiz Show* for its Tuesday 10-10:30 p.m. period on NBC-TV, starting in September. Meanwhile,

NBC'S KOA SALE

Now Seeks L. A. Outlet

NBC was more definitely than ever in the market for a Los Angeles radio station last week, after selling its 27-year-old clear-channel KOA Denver for $2,250,000 to Bob Hope, a group of prominent Denver business and professional men and associates of Mr. Hope [CLOSED CIRCUIT, June 2, 23].

The G. A. (Dick) Richards estate's KMPC (710 kc, 50 kw), for which the network has negotiated intermittently for years; Earle C. Anthony's KFI (640 kc, 50 kw), and Harry Maizlish's KFWB (980 kc, 5 kw) were understood to be among stations being eyed by NBC in its search for an owned station to replace KOA (850 kc, 50 kw). The KOA sale is, of course, subject to the customary FCC approval.

Long-Speculated Sale

Long-speculated sale of the Denver station—which has no TV affiliate and could get none under NBC ownership unless the network chose to give up an existing outlet to meet FCC multiple ownership rules—tied nearly (1) NBC's reinvigorated policy of stronger promotion of radio and television as complementary media, and (2) its long-standing desire for an owned radio station in Los Angeles.

It also dovetailed neatly with the Hope-Denver group's TV ownership ambitions. TV-less Denver ranks No. 1 on FCC's priority list for television grants and it was reported that Metropolitan Television Co., an avowed aspirant for a Denver TV station, would be the company operating KOA under its new ownership. What other TV aspirations the new owners may have could not be ascertained immediately.

Although exact details of stock distribution among the new owners was not reported, it was said flatly that the Denver group—composed of 15 local business and professional men and one business concern—would have working control of the company. This group includes William Grant, president of Metropolitan Television Co., and Denver Mayor Quigg Newton.

Bob Hope and his associates will own 50% of the stock. His associates are James Saphier, and Mr. Hope's attorneys, Martin Gang, Robert Kapp and Norman Tyre.

NBC's desire for a radio station of its own in the key Los Angeles market—it is the only major network without one—has kept network officials in negotiations for years, especially for KMPC. A few years ago it appeared that a deal had been made with G. A. Richards, but it fell through.

Latest talks for KMPC were initiated several weeks ago with representatives of the late Mr. Richards' estate, but these also were subsequently reported to have struck dead-end. Their renewal at any time was seen as a strong possibility. The snag thus far: How much? Talks to date reportedly have centered around figures in the neighborhood of $1 million.

NBC President Joseph H. McConnell emphasized in the KOA announcement that NBC will seek to buy a radio station in the Los Angeles area to complement its local television station KNBH-TV there. This somewhat unusual public declaration of intent was attributed, at least to a considerable degree, to a desire to kill—before it could arise—any speculation that NBC is easing itself out of the radio business.

Beyond that, however, is the known fact that NBC has long tried to buy—for the last 15 years, one official noted—a station in the Los Angeles market. It intends now to realize that ambition as soon as it can, "provided the price is right," as a spokesman put it.

In further explanation of the KOA sale, Mr. McConnell noted again that NBC had declined several offers for the station in the past. But, he said, network officials finally concluded that radio and television can operate better together in a market such as Denver, and decided to sell KOA and seek an AM station to go with their Los Angeles television station.

Negotiations by Heffernan

Negotiations with the Denver-Hope group for the $2.25 million transfer of KOA were handled for NBC by Financial Vice President Joseph V. Heffernan. Principal negotiators for the purchasers were Mr. Grant and R. M. Davis and Ralph Radotsky, all of Denver.

Other members of the Denver group: William J. Ahearn, George B. Berger Jr., Hugh R. Catherwood, Thomas P. Campbell, Myron Emrich, Arnold Gurdler Jr., Robert Kohn, Mayor Newton, Morrison Shafroth, Walter M. Smith, Henry W. Toll, David S. Touff and the Hendrie & Boltoff Co.

KOA, founded Dec. 15, 1924, by General Electric Co., became an NBC affiliate in February 1928. NBC took over its operation and management in March 1930, prior to acquisition of the station in 1941.

You Can Bank on Radio

TEST CAMPAIGN of all media was conducted during May by the First National Bank, Bridgeport, Conn., for new loan accounts, with WICC Bridgeport bringing in 42 applicants and newspaper ads accounting for 76. Because the radio campaign secured more than half as many applicants as did the newspaper for one-third the cost of the newspaper advertising, the bank, according to WICC, is completely sold on its one-year schedule which began on WICC last February. Other media included direct mail, car cards and billboards.

OPERATOR PROPOSAL Comments Flood FCC

SUPPORTING letters—and protests—are beginning to flood FCC concerning the Commission's proposal to relax its transmitter operator rules and permit remote operation of certain AM and FM transmitters [B•T, June 9].

The FCC's proposed rule-making proceeding, instituted upon petition by NARTB, would amend Part 13 of the Commission's rules and regulations so that (1) persons holding less than first class radiotelephone operator permits would be allowed to stand regular transmitter watches at AM and FM stations employing non-directional antennas and operating with power of 10 kw or less and (2) remote control of the transmitters of such stations would be allowed.

FCC has specified Aug. 4 as deadline for comments and in its notice outlined many questions on such operation about which it desires information. Two of the questions touch on fulfillment of emergency operation under the Conelrad plan (control of electronic radiation to prevent enemy planes from "homing" on broadcast signals), while other questions concern the technical training and duties of transmitter operators and their ability to cope with technical problems that may arise.

If adopted, observers have noted, the practical effect of the changes would be to ease the staff and operating cost problems of virtually all local channel stations, a substantial number of daytime-only outlets and many other AM and FM stations.

Shortage of Operators

In general, station operators contend there is a shortage of qualified first class operators and the law of supply and demand has forced the wages of these men disproportionately high, particularly handicapping small market stations. They further contend that technical equipment today is stable and does not need constant attention and adjustment by a first class operator. Rather, they say, a restricted operator can watch the meters and make the log entries. He would work under the supervision of a first class man, usually the chief engineer, who thus would be freed from sitting routine watches and have time to do "preventive" maintenance and actual repair.

The station operators argue that by saving on engineering costs they would be able to hire better production personnel and hence gain better programming and service to their community.

On the other hand, engineers and union representatives charge there is no shortage of engineers. They point out, however, there is a shortage of men who are willing to work for "day laborer's wages."

The engineers are telling FCC the operation of transmitters is not as simple as management asserts, charging that station owners are seeking only another means to cut costs and increase profits. They find it hard to believe that much of the savings would go into better programming.

Three state associations of broadcasters already are reported on record favoring the NARTB-FCC proposal. They are the South Dakota, Kentucky and North Carolina Assns. of Broadcasters [B•T, June 23].

Several IBEW locals already have passed resolutions protesting the proposal while IBEW headquarters in Washington reports numerous complaints from members and non-members alike.

Resolution of Protest

IBEW Local 1224 at Cincinnati already has put a resolution of protest before the Cincinnati Central Labor Council, written all member and non-member engineering personnel of area stations and urged other IBEW radio and TV locals to take positive action.

"This matter is more serious than most of our people think," Local 1224 wrote other IBEW locals, "and if put into effect our operating standards will deteriorate at a rapid pace."

Local 1224 suggested other locals appear before their central labor councils to have them pass resolutions of protest, write the "various Senators, Representatives and lobbies which they may have contact with and urge the FCC to study it at length before leaving the radio communications system of America *unattended* and at the mercy of saboteurs during the grave times we are undergoing."

In its open letter to "all broadcast operating and engineering personnel," Local 1224 wrote, "If you value your job, act now!" Engineers were urged to "stand up for your rights" and write to FCC. The letter pointed out:

Your letter of opposition will be filed with the petition as a note of opposition to this movement. This is definitely a move by the small operators of 250 w stations to increase their revenue by throwing out engineering personnel. We further urge that you request a tightening of the operating standards. This will in turn increase the quality of the operating personnel and help to prevent such moves as this in the future.

The various labor unions representing the operating engineers will be actively opposing this move. These people were active in the last fight which came up a few years back on the same subject. The case then was decided in our favor.

On the other hand, this is how a typical local station operator tells the story. C. H. Simpson, part owner and general manager of 250-w WKBI St. Marys, Pa., supporting the NARTB proposal, wrote FCC:

. . . It is our opinion that radio transmitting equipment has been refined and developed to the point where today the necessity to have a licensed engineer with the equipment at all times is not only unnecessary, but an added expense which hangs like a millstone around the neck of many small station operators, especially those who, for one reason or another, find themselves with studios and transmitter separate from one another.

In earlier years, the primary goal was to try to stay on the air as much as possible. Stations proudly boasted of extremely small amounts of time off the air due to technical failure. Nowadays, constant operation without technical failure is taken for granted. The necessity to have an experienced technician hovering over the equipment waiting for the equipment to fail is now obviated.

Having operated WKBI without a full complement of first-class operators since last June, I think I can discuss intelligently the results, both favorable, and unfavorable, that have resulted therefrom. Our lost air time since then has consisted of three interruptions and the total of all of these interruptions has been less than an hour. Two of these were electric power failures. Our third-class operators have been thoroughly schooled on operation of the equipment, keeping of logs, safety regulations, and the like, together with the importance of keeping a high-level of modulation, which I'd like to discuss more fully later. The third-class men are studying for their regular tickets under the chief

(Continued on page 76)

PAUL M. HAHN, president of the American Tobacco Co., one of radio and television's largest advertisers, takes his place in line as company employes are processed prior to contributing blood to the Armed Forces. A Red Cross Bloodmobile unit visited the company's New York office, 111 Fifth Ave.

McFARLAND BILL *Industry States Objections*

OBJECTIONS by broadcasters to some provisions of the Senate and House-passed McFarland Bill (S 658) were enumerated by Ralph W. Hardy, NARTB government relations director, last week as Senate-House conferees met for the first time on Friday in an attempt to iron out differences between the two bills [B•T, June 23].

Broadcasters want repeal of:

● Equipment purchase section of House bill. This would require the successful applicant to buy the equipment of an unsuccessful licensee if the latter's license was not renewed.

Besides putting the FCC into the position of being "a condemnation appraisal agency" the new licensee might have to buy obsolete equipment, the NARTB comment stated, possibly from a station owner who did not wish to remain in business. Mr. Hardy also declared he understood the FCC was opposed to this provision.

● Suspension and fine provisions of House bill. NARTB declared it would be satisfied if the FCC was given authority to issue cease and desist orders, which "coupled with the power to revoke a license . . . is completely adequate." Senate version of bill authorized the FCC to issue cease and desist orders in addition to the existing power to revoke licenses.

NARTB statement also asked that—

● Senate section removing the double jeopardy clause now in the Communications Act be reinstated. House deleted this provision to eliminate this section from the Act. Section in present Act permits the FCC to revoke the license of a licensee found guilty of anti-trust violations in radio or communications field.

● Reinstatement of provision in Senate version of the bill providing that the Commission may only issue declaratory orders upon request. House dropped this in its version of the bill.

● Section of Horan amendment regarding political broadcasts which specifies that broadcasters may not charge political candidates more than the minimum rate for other purposes, be clarified by deleting the word "minimum" and adding the following:

"For the purpose of this subsection, charges shall include base rates and all other terms and conditions affecting charges."

This would take care of the practical problems raised by the amendment, Mr. Hardy pointed out. He referred to the "normal practice" of granting frequency discounts, and additional charges over and above the time charges—lines, special arrangements for studio equipment, personnel, rehearsal time.

Basically, however, the industry is opposed to any government rate-making, Mr. Hardy pointed out.

Hillbilly for WINS

SWING to hillbilly music in the prime 8-10 p.m. time Monday through Saturday was announced last week by WINS New York General Manager Harry C. Folts. Beginning tonight (Monday), this two-hour block "will feature nothing but square dances, folk songs, hillbilly and cowboy songs," the announcement said.

'WE CAN DO JOB' NARTB Tells 'Morals' Group

LET US police ourself. We're sure we can do the job.

That, in essence, was radio-TV broadcasters' position when spokesmen Harold E. Fellows, NARTB president, and John E. Fetzer, TV Code chairman, testified last week before the House Interstate & Foreign Commerce Committee subcommittee investigating offensive radio-TV programs.

Committee, headed by Rep. Oren Harris (D-Ark.), adjourned after 2½-hour session Thursday. It is not expected to resume hearings until September, at which time it may sit in New York.

Grind of Congressional deadline, upcoming political conventions—and broiling Washington heat wave —was conducive to the decision for a hiatus in the investigation.

Investigation began early in June, heard parade of witnesses decry what they claimed to be a plethora of crime and horror programs, indecent exposure in the matter of dress and off-color humor and "business." Majority of witnesses, however, objected to beer and wine commercials and drinking scenes in programs. Investigation was result of a resolution sponsored by Rep. E. C. Gathings (D-Ark.).

Main tenor of Mr. Fellows' testimony was the "dangerously generalized" charges of immorality and offensiveness. He also warned against "organized efforts at censorship."

Recalling his 24 years as a broadcaster, Mr. Fellows, who came to the NARTB presidency from the managership of CBS-owned WEEI Boston, told the committee of an organized campaign which in several instances produced complaints of immodest dress against the *Kukla, Fran & Ollie* children's program.

Previous witnesses "with very few exceptions" have failed "to make specific allegations of 'immoral' radio and television programs," he said.

Local criticisms are respected by broadcasters, he pointed out, but "a substantial number of so-called national criticisms . . . tend all too often to be dangerously generalized, and in many cases . . . are inspired by organized campaigns of minority groups having an axe to grind."

"What I do say is that it is virtually impossible to adopt rigid standards of program acceptability that will meet the diversified tastes of the American people. . . . The definition of 'offensive' may, and usually does, vary from community to community depending on a wide variety of factors."

Disagreement with this position was most vocal by Rep. J. Edgar Chenoweth (R-Col.), who declared:

"You have tried to please that segment of the American people who like vulgar, vile and crude, objectionable programs. . . . There are serious, well-founded objections to the types of programs coming into the American home."

Similar attitude was expressed by Rep. Joseph P. O'Hara (R-Minn.), who warned that unless programs improved "something will be done. [There have been] strong criticisms, and not just from one person, of what goes into the home."

But, Rep. Arthur G. Klein (D-N. Y.) termed many of the "thousands of letters" received by the Committee as from the "lunatic fringe." "They must torture themselves by listening to these programs," he said referring to a communication which he did not read into the record.

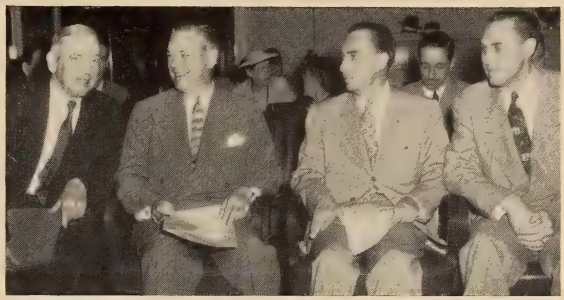
He also enlivened the hearing with the apocryphal story of the spinster who complained to her apartment house manager that there was a nude man in the apartment across the court. When the manager came up and failed to see any nude man, she replied: "Of course not. You have to stand on a chair and lean way out in order to see him."

Rep. Klein was the committee member in the hearing earlier this month who offered the pungent advice to shocked viewers: "Why don't you turn the damned thing off!"

Broadcasters undoubtedly will adhere to the TV code, Mr. Fetzer told the committee, because it is to their self-interest to do so. But, he admonished, the viewer must exercise some discretion in his selection of programs.

"To buy a television receiver and in effect just let the thing run hour after hour without regard to program selection is an indictment of the taste and discrimination of the viewer just as it is the station who puts on inferior programs," he said. "In other words, enjoyment from a television receiver is related directly to how intelligently the receiver is employed."

Mr. Fetzer, who is owner-operator of WKZO-AM-TV Kalamazoo and WJEF-AM-FM Grand Rapids, emphasized that the station licensee is the final arbiter of what goes over the air from his transmitter.



He agreed, in response to doubts expressed by committee members, that broadcasters must not only purvey to the wants of their audiences, but also attempt to elevate the taste of their viewers.

The TV Code Board will attempt to enforce the provisions of the standards of good programming by persuasion, and by withdrawal of the seal of approval, he observed.

Broadcasters are united in their recognition that they must regulate themselves, Mr. Fetzer asserted. "The public as well as the majority of our industry have a common goal. The industry cannot survive without widespread public approval," he said.

Referring to the widespread differences in public reaction even within the same community, the Michigan broadcaster - telecaster told how a lecture on astronomy by

CONTROLS

Exemption Machinery Hums On Capitol Hill

AN AMENDMENT designed to free radio and television from wage controls consonant with their price exemption status was approved by the House last week but its adoption may have had only passing significance in the swelling demand for an end to all economic curbs.

The amendment was offered by Rep. Paul C. Jones (D-Mo.) and okayed without objection last Wednesday during debate on extension of the Defense Production Act, which would expire today (Monday) unless extended.

Radio-TV employes and those of other media are under wage controls administered by the Wage Stabilization Board which exercises jurisdiction over AFM, TVA, AFRA and other union contracts.

The House late Thursday voted to end most price controls, under which these media had been exempt, and to retain wage curbs for another year. The former was rejected Friday, however, by a Senate-House conference group set up to iron out differences. Senate voted to extend controls to March 1.

Rep. Jones explained that there is no ceiling on prices charged by radio-TV stations and networks, newspapers, magazines, periodicals and motion picture houses. Thus, he felt, they should be freed from wage ceilings. Enactment of this proposal probably would have varying effects on different-size stations.

Salaried performers in radio and television come under the jurisdiction of the Salary Stabilization Board, which has drafted regulations to be administered by each industry rather than on a mandatory basis by government.

Two other amendments of significance to broadcasters and manufacturers were also rejected by the House the past fortnight. These involved bids to restore standby controls on consumer credit (Regulation W on installment purchases) and to repeal the controversial Capehart formula.

The House Banking & Currency Committee had voted to delete consumer credit curbs authority over purchase of radio-TV receivers and other appliances which the Federal Reserve Board suspended last month [B•T, May 12]. "The threat of dangerous credit expansion has been abated for some considerable time," the committee reported. The Senate wants controls extended to June 30, 1953.

The move to repeal the advertising cost formula, authored by Sen. Homer E. Capehart (R-Ind.), was instigated by Rep. Abraham J. Multer (D-N. Y.). He claimed that prices are 11% higher than before Korea because of the Capehart and Herlong amendments. Under the Capehart formula, manufacturers may compute costs incurred for advertising, selling, administration and research before July 26, 1951, and add them to final selling prices.

RADIO THRIVES WITH TV

VAB Is Told

RADIO can live long and profitably in the same market with television, serving advertisers with a low-cost and efficient mass medium, the Virginia Assn. of Broadcasters was told Friday.

Two successful broadcast operators, whose stations are operating at peak income in a multi-station video market, told the Virginians what to expect when TV enters a market and what to do about it. They were Ben Strouse, manager of WWDC Washington, and Joseph L. Brechner, manager of WGAY Silver Spring, Md.

The Virginia group opened a two-day meeting Thursday at the Chamberlin Hotel, Old Point Comfort, Va. Charles P. Blackley, WTON Staunton, Va., presided.

Speakers included William B. Ryan, Broadcast Advertising Bureau president; Harold E. Fellows, NARTB president; FCC Comr. Rosel H. Hyde, and George C. Davis, consulting engineering (see Hyde-Davis story page 51).

Messrs. Strouse and Brechner showed how they have met the competition of four television stations in the Washington area, maintaining their community roles and continuing to provide advertisers with an efficient means of spreading their message to the buying public.

TV is just another competitor, Mr. Strouse said. "Your town goes TV-happy in the first six months," he warned, with advertisers and listeners going a bit daffy. He advised stations to tell TV advertisers what they are missing if they fail to use radio, keeping them on the list of accounts against the day of "the awakening," even if they spend only small sums.

As to the awakening, he said daytime ratings rebound but nighttime ratings level off and stay at a point below the pre-TV level. "TV stations find costs high, raise rates," he said. "Local advertisers begin to examine costs, frequently return to radio" because it is better on the same dollar expenditure. Local advertisers have increased the purchase of radio time 2½ times since end of the war, he said.

Mr. Strouse said TV set dealers are finding that home demonstrations arranged via radio advertising really work, while newspaper advertising "currently is not pulling." He referred to extensive use of radio for home-freezer plans, with "immediate and sensational" response that has food retailers worried. Safeway Grocery Stores has just signed a contract, he said, suggesting the copy will deal with this subject. "Radio has been the medium that overnight established a revolutionary new method of food purchasing," he noted.

The network picture is "very dark," according to Mr. Strouse, with big advertisers sharply cutting network radio, newspapers and magazines even though the bulk of TV money is "new money." The result has been price-cutting among networks to make deals, he explained, adding, "The future of network radio is not bright."

He advised stations to "program locally, particularly at night," and to hire more and better air salesmen. He particularly emphasized the importance of doing a good local news job. Urging study of rate structures, he said night rates might have to be reduced in some TV areas but daytime rates probably could stand an increase. He urged joint AM-TV operations to split sales staffs.

Since arrival of TV in a city may bring a sharp decline in national spot and network business, he urged radio stations "to do a job with your local advertisers." Study your newspaper competition, he recommended, adjust rates if necessary, examine programming and start fighting even before TV arrives.

Mr. Brechner reminded that WGAY, as a Washington suburban station, competes against all types of electronic media, including a dozen other AM outlets, FM, TV, transit and storecasting. "Radio is surviving and durable," he explained.

He credited ingenious and inspired management, plus aggressive sales policies, with radio's success in the area. He declared WGAY's May business was one of the highest in the station's history, with 1952 likely to run 10%-15% over 1951. Most accounts are suburban and downtown business, he said, with no per inquiry or guaranteed mail order accounts.

TV's main impact centered in two beer accounts, he explained, but this was offset by a major food chain, major department stores and automotive business. Advertisers will use radio if there are enough listeners to justify time purchases, he insisted. He said the small businessman is "our pal because he feels we're his friend." As TV rates climb, Mr. Brechner said, local radio improves.

KOIL CHANGES

Swisher Succeeds Newens

ARDEN E. SWISHER, commercial manager of KOIL Omaha for two and one-half years, has been named general manager, it was announced last week.

Announcement was made by George Sebastian, executive vice president, Stuart Investment Co. of Lincoln, owner of KOIL and KFOR Lincoln. Other personnel shifts were:

Mr. Swisher

Bill Talbot, morning newscaster at KOIL for over seven years, is now program director; Henry Kelpe, a KOIL announcer since 1940, was appointed production manager, and Margaret Croghan, in the KOIL sales department since 1937, was promoted to the post of local sales manager.

Mr. Swisher succeeds William J. Newens, who has resigned. Mr. Newens has joined Allen & Reynolds, Omaha, according to the advertising agency.

FUNDS COMPROMISE

$300,000 More for FCC

SUM of $6,408,460 for the FCC for the 1953 fiscal year was voted by a Senate-House conference committee last week.

The sum is $300,000 more than the House voted for the FCC last March [B•T, March 24] and that much less than the Senate voted for the Commission early this month [B•T, June 9]. If both houses now accept the report, the appropriation bill will go to the White House.

According to informed sources, the entire $300,000 can be considered earmarked for TV because that was the sense of the Senate's $600,000 increase. The conference report (H Rept 2315) indicated that the House accepted the Senate's amendment increasing the FCC's appropriation, but halved the sum.

The Senate increase was recommended "to provide more adequately for the increased workload occasioned by the lifting of the television 'freeze'."

Conference committee also called on the FCC to look into the matter of levying fees for its services. There is some question whether the wording of the conference report does or does not require the Commission to charge fees. It is felt, however, that the provision is strong enough to force the FCC to reinvestigate the feasibility of fee-charges, determine carefully that it is or is not practicable.

The wording of the sentence in question reads:

The conferees are advised that the FCC under the provisions of Title V of the Independent Offices Appropriation Act, 1952, are (sic) authorized to levy fair and equitable fees in connection with the issuing of licenses. The conferees, therefore, request the Commission to give prompt attention to the matter with a view to levying such fees at the earliest practicable date.

The Senate requested the Commission to investigate the possibility of charging such fees "in order that such work of the Commission may be made self-sustaining to the fullest extent possible. . . ."

In response to the original suggestion that fees be charged, made in the 1952 appropriations, the FCC had reported that its investigation showed that revenues raised through such a course would be insufficient to justify the additional personnel and work necessary. Thus, the Commission concluded that the charging of fees was not feasible.

It is believed that the increase of $300,000 which the Commission received over that proposed by the House would enable it to hire between seven and eight additional examiner teams to take care of the expected avalanche of TV applications. An examiner team comprises an examiner, attorney, engineer, accountant and clerical help, at an annual cost of $40,000.

During the hearing before the Senate Appropriations Committee, Interstate & Foreign Commerce Chairman Edwin C. Johnson (D-Col.) and committee member Sen. Homer E. Capehart (R-Ind.) plumped for a boost of $800,000 on the assumption that that sum would permit the hiring of an additional 20 examiner teams. When the Senate voted only $600,000 additional, Sen. Johnson estimated that that sum would permit the hiring of 15 additional examiner teams. Ten other influential members of the Senate Commerce Comittee joined with Sens. Johnson and Capehart in signing a proposal favoring the $800,000 boost in FCC funds [B•T, May 26].

Although FCC officials were grateful for the extra $300,000, there were indications that a drastic realignment of personnel would be necessary to cope with the TV workload. Other activities of the Commission will be cut, it was made clear, to move TV applications along the processing line.

Repeated also were warnings that the hiring of new personnel was not the end of the problem. It takes about a year to properly train all elements of an examiner team, it was pointed out.

The sum recommended is $1,666,540 below that requested by the President. It is also about $180,000 below the present operating level of the Commission.

Included in the $6,408,460 budget for the July 1, 1952-June 30, 1953 year was $88,525 top for travel expenses. The President had asked for $118,000. This was cut to $78,700 by the House, raised to $98,350 by the Senate. The $88,525 figure is half of the difference between the House and Senate recommendations.

It is believed that the Commission will find it necessary to hold most TV hearings in Washington because of its limited travel funds.

SET SALES

Outlook Encouraging, RTMA Told

OUTLOOK for sales of radio and TV receiving equipment is encouraging, with the manufacturing industry in an excellent position to meet a rising demand for TV sets as new video markets are opened, the Radio-Television Mfrs. Assn. was told last week at its 28th annual convention held at the Palmer House, Chicago.

The convention closed Thursday night with presentation of the first RTMA Medal of Honor to Brig. Gen. David Sarnoff, RCA board chairman (see story this page).

While an upward trend was foreseen in radio-TV demand by RTMA President Glen McDaniel, he said a sudden surge in set sales should not be expected. Instead he anticipated "a gradual rise in 1952 and for several years thereafter."

The going rate of electronics and communications for civilian set output plus replacements and accessories, is about $1½ billion, Mr. McDaniel told the RTMA membership. Adding $2½ billion for the military, the industry's total production rate is $4 billion, exceeding the peak during World War II.

In the military field, he said, electronics and components output is eight times that of the three months after the outbreak of the Korean fighting and three times the figure one year ago. A rise of 50% or more can be expected by the end of 1952, when it will level off, he said.

Mr. McDaniel reviewed the greater statistical services performed by RTMA since the headquarters staff has been expanded. He paid a tribute to General Manager James D. Secrest and to Robert C. Sprague, RTMA board chairman, for their services.

The RTMA is planning a major statistical project—reports on sales and inventories of radio and TV sets at the retail level, he said. The service has been tried on an experimental basis and is to be financed by subscriptions. Data will be on a regional basis, with first reports to be made in September.

The joint FM promotion conducted with NARTB in selected areas has shown that FM receivers can be successfully marketed under favorable conditions, he explained, and has virtually eliminated friction between some FM broadcasters and set makers.

Work of the RTMA Sports Committee in sponsoring publication of the Jordan studies showing TV's effect on attendance at sports events has offset much of the misinformation on this subject, he said. The committee was credited with "greatly improving relations between the industry and sports organizations by inducing set manufacturers to promote public support of professional sports in their respective communities."

Mr. McDaniel outlined legislative and regulatory contacts of the association, including the successful fight against the proposed increase of the set tax from 10% to 25% and relaxation of Regulation W. Other activities reviewed were the 1952 components symposium and the Dept. of Justice anti-trust investigation of RTMA and manufacturers.

John W. Craig, vice president and general manager of Crosley Div. and chairman of the RTMA Set Division, reported to the convention that radio set sales, particularly portable and auto models, "have continued surprisingly active, and there is every indication that they will continued so in the years ahead."

As to TV receivers, Mr. Craig predicted sales will rise in 1953 and remain for several years at a higher level than at present.

During the past fiscal year, production of radio and television sets was maintained "at a reasonably stable level except for normal seasonal fluctuations although it did not reach either the peak or the depression of the previous year," he reported. Pressure of scare buying, which began with the outbreak of the Korean War, and later accumulation of excessive inventories and slow sales, were no longer factors during the last year, he said.

Mr. Craig said set sales were stimulated last summer when Congress, at RTMA and industry suggestion, relaxed Regulation W. Production and sales rose until the end of the calendar year, when the

SARNOFF AWARD

Highlight at RTMA Meet

FIRST "Medal of Honor" awarded by Radio-Television Mfrs. Assn. was presented Thursday night to Brig Gen. David Sarnoff, RCA board chairman, for outstanding contributions to the advancement of the radio-television and electronics industries.

The medal was presented to Gen. Sarnoff at the RTMA banquet climaxing the 28th annual convention at the Palmer House, Chicago. Authorized by the RTMA board in February, the award is to be made yearly to the person, company or organization which the RTMA directors believe has performed a distinctive service for the industry.

Gen. Sarnoff was nominated for the award by the annual Awards Committee, headed by Leslie F. Muter, chairman. The selection was unanimous. Mr. Muter said the award recognizes the many achievements of Gen. Sarnoff over a long period, with credit to his part in bringing the industry to its present stature.

Chairman Robert C. Sprague, of RTMA, said he was presenting Gen. Sarnoff the award "as a small token of the esteem in which you are held by your fellows and in recognition of your many notable achievements toward the development and progress of the radio-television industry."

RTMA ELECTION

Plamondon Is Board Chmn.

A. B. PLAMONDON Jr., president of Indiana Steel Products Co. of Chicago, was elected board chairman of the Radio-Television Mfrs. Assn. when it met in Chicago Friday. He succeeds Robert C. Sprague, president of Sprague Electric, North Adams, Mass.

Mr. Plamondon

Mr. Plamondon formerly served as chairman of RTMA's Small Business Committee, as a vice president and as chairman of the Parts Division.

The RTMA board also re-elected Leslie F. Muter, president of The Muter Co., Chicago, as treasurer for his 17th term. It also re-named Dr. W. R. G. Baker, vice president

(Continued on page 84)

L. A. CONVENTION

NARTB Works Out Plans

ANNUAL NARTB convention in 1953 will be held at the Biltmore Hotel, Los Angeles, starting either April 28 or 29, under plans worked out last week by the NARTB Board's Convention Committee.

The committee, at a meeting in Chicago, favored a Wednesday starting date for the annual three-day convention to take advantage of the special airline family rates available early in the week.

At the weekend Chairman Clair R. McCullough, WGAL Lancaster, Pa., was understood to be considering proposals for a Tuesday starting date. This plan would still give delegates access to special airline rates since Los Angeles can be reached within a day from most cities.

Annual equipment show will be staged in the Biltmore ballroom, though additional rooms may be added. Light equipment and service exhibits are usually placed on a special floor.

The Engineering Conference will be held at the same time as the main convention, under present plans, with meetings to be held in the Philharmonic Bldg., across the street from the Biltmore. Main convention meetings will be held in the Biltmore Theatre, adjoining the hotel, as was the case at the 1948 Los Angeles convention.

Chairman McCollough and C. E. Arney Jr., NARTB secretary-treasurer, will go to Los Angeles in the near future to check facilities. All convention plans are subject to negotiation of satisfactory contracts for facilities. NARTB already has an option on the Biltmore Theatre and has had preliminary discussions on other facilities.

The Biltmore and the new Statler, now near completion, will house delegates though other hotels may be utilized if necessary.

Little work has been done on the convention agenda other than to set the opening time for 10:30 a.m. on the 28th or 29th.

Attending the Tuesday committee meeting were Chairman McCollough; Jack Harris, KPRC-TV Houston; Albert Johnson, KOY Phoenix; Howard Lane, WJJD Chicago; H. W. Slavick, WMC Memphis; Calvin J. Smith, KFAC Los Angeles. Hugh B. Terry, KLZ Denver, was excused. Attending for NARTB were Mr. Arney; Harold E. Fellows, president, and Robert K. Richards, assistant to the president.

NARTB representatives also met with the Register and Vote Committee in outlining procedure on the upcoming get-out-the-vote campaign for broadcasters. The drive is sponsored by the Advertising Council and American Heritage Committee in cooperation with Leo Burnett Agency, Chicago, which volunteered its services.

NARTB will release its own materials for radio and television station promotion of the public service campaign.

Promotion matter will be distributed in two portions of the campaign, the first extending over 30 days at the local level in cooperation with state broadcasting associations. Late last week, 16 of the 38 state groups had agreed to extend the campaign to the local level. In areas where there is no state group, NARTB members will select a vote committee. This intensified 30-day campaign will be conducted in each state immediately before registration closes.

The second phase of the campaign will take place 10 days before the Nov. 4 election. NARTB hopes to place 10 spots daily on every station in the country, with 23,000 daily as the goal.

Participating with the other cooperating agencies, NARTB will release a promotion kit aimed at work on the local and state level.

NARTB hopes to work out a package which can be aired as a sponsored public service feature.

TV Applicant List Grows

(Continued from page 23)

License Division will aid processing after July 1 and not place an applicant in the possible position of learning later he must amend his bid, during which time a competitor might get a grant.

Effective last week, the mechanical survey of applications for "acceptance for filing" is being done on the basis of the city priority lists so that all bids on hand will be ready on time for processing by FCC's lawyers, engineers and accountants. The License Division expects this check will be two months ahead of actual city processing after the temporary procedure gets under way.

Petitions filed at deadline last Monday, seeking reconsideration or amendment of the Sixth Report lifting the TV freeze and setting the final allocation plan [B•T, April 14], included the following :

WMCT (TV) Memphis requests rehearing of the Sixth Report provision that the station be changed from Channel 4 to Channel 5. Earlier petition on same subject asked for modification of the Sixth Report to specify change to Channel 3 [B•T, May 5]. WMCT charges FCC erred in requiring it to move to Channel 5 since its transmitter site is 187.5 miles from Nashville (also allocated Channel 5), the distance being less than the required 190-mile minimum established for Zone II stations.

WREC Memphis asks dismissal of WMCT's petition on ground the Sixth Report requires WMCT to file for Channel 5 and another cannot be substituted. WREC is applicant for Channel 3.

WISN Milwaukee, requesting immediate grant of its long-pending application for Channel 10, petitioned for reconsideration of Sixth Report provisions deleting Channels 6 and 10 from commercial assignment there. Channel 10 is now reserved for noncommercial, educational use. Similar petition was filed earlier by WFOX Milwaukee, seeking "same procedural rights" to Channel 12 as it had to Channel 8, for which it was long applicant [B•T, June 23].

WSAL Logansport, Ind., seeks rehearing of Sixth Report provision denying assignment of Channel 10 there.

KROW Oakland, Calif., asks reconsideration and reversal of Sixth Report provisions which (1) removed its application from hearing and opened it to comparative consideration with new, non-hearing applications and (2) reduced from six to four the number of commercial VHF channels assigned to the San Francisco-Oakland area.

WLBR Lebanon, Pa., seeks reconsideration or rehearing of allocation of UHF Channels 15 and 30 to Lebanon and Baltimore, respectively, on grounds FCC's minimum separation requirement of 75 miles (to prevent image interference) would preclude establishment of its TV transmitter at the AM site. WLBR's argument relates to that earlier of Chesapeake Television Broadcasting Inc., Baltimore UHF applicant, asking reshuffle of UHF channels at Baltimore, Harrisburg and Reading, Pa., to overcome minimum spacing errors [B T, June 23].

WCAE Pittsburgh seeks rehearing and assignment of Channels 4 and 9 there on commercial basis.

WSIX Nashville asks modification or appeal of Sec. 3.613 to clarify "ambiguities" respecting main studio site requirements.

WBEC Pittsfield, Mass., requests substitution of UHF Channel 68 at Rutland, Vt., in lieu of Channel 49 to meet separation requirements at only suitable transmitter site.

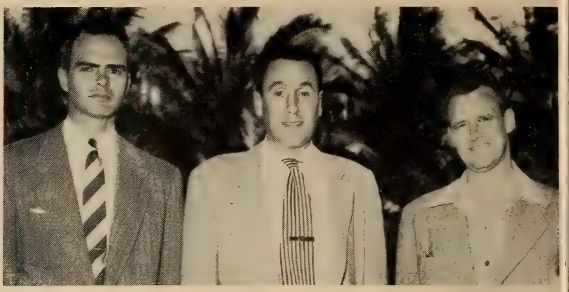
A. Earl Cullum Jr., Dallas consulting engineer, contends the Commission in the Sixth Report "proposes to make final decisions that are not consistent with the notice of hearing." This applies to the table of assignments as well as technical standards, he holds.

WHYU Newport News, Va., requests assignment of UHF Channel 33 there rather than to Norfolk-Portsmouth-Newport News as a whole.

Polan Industries, Youngstown, Ohio, maker of television tube blanks and prospective TV applicant, asks addition or substitution of another UHF channel there. UHF 75-mile separation problems are raised.

KDTH Dubuque, Iowa, requests reconsideration of FCC's denial of earlier petition for allocation of VHF Channels 5 and 11 there.

Mercer Broadcasting Co., operator of WTOA (FM) Trenton, N. J., asks rehearing with respect to the assignment of VHF channels there exclusive of consideration of UHF channel assignments. Firm charges FCC's conclusion that VHF and UHF channels shall be allocated homogeneously rather than separately is unlawful, violating Sec. 307(b) of the Communications Act.



Lehigh Valley Television Inc., applicant at Allentown, Pa., seeks rehearing on same grounds as Mercer Broadcasting, also citing incomparable VHF and UHF coverage capabilities.

WLAN Lancaster, Pa., asks reconsideration and rehearing of the Sixth Report to set aside FCC's show cause order switching WGAL-TV Lancaster from Channel 4 to Channel 8. WLAN earlier petitioned FCC for comparative hearing of its application with that of WGAL-TV for Channel 8 and appealed the case to the U. S. Court of Appeals for the District of Columbia [B•T, June 16].

WGAL-TV in turn requests FCC to dismiss WLAN's bid for comparative hearing and asks FCC to issue an order modifying its license to specify Channel 8, including special temporary authority to continue operation on Channel 4 until the changeover can be effected. WGAL-TV also filed with the Court of Appeals for intervention in the WLAN complaint.

Study of the pending applications reveals the comparative high cost of television construction and operation, based on typical balance sheets and income statements submitted with the bids.

The 17 stations which have filed to make facilities changes required by the Sixth Report have costs of conversion ranging from $91,000 for WSAZ-TV Huntington, W. Va., to $561,000 for WHIO-TV Dayton, Ohio. WSAZ-TV seeks to change from 16.8 kw effective radiated visual power on Channel 5 to 84 kw on Channel 3, using same site and antenna. WHIO-TV, to change transmitter site, is to change from 24 kw on Channel 13 with 517 ft. antenna to 200 kw on Channel 7 with 1,086 ft. antenna.

AFTER adoption of a constitution, the newly-formed Hawaiian Assn. of Radio & Television Broadcasters held elections. Among those voted into office were (l to r) William O. Paine, general manager of KGU Honolulu, secretary-treasurer; Jack A. Burnett, president-general manager, KULA Honolulu, president, and Fin Hollinger, general and commercial manager, KPOA Honolulu, vice president. This trio automatically serve on the five-man board of directors. Other directors, not pictured here, are Ezra J. Crane, general manager, KMVI Wailuku, Maui, and Ralph M. Fitkin, president, KHON Honolulu.

Two other existing stations' changes will cost more than $450,000 and two others exceed $350,000. The former are WDEL-TV Wilmington, Del., and WGAL-TV Lancaster; the latter WOOD-TV Grand Rapids and WTMJ-TV Milwaukee.

WXEL's switch from Channel 9 to 8, power boost to 316 kw and studio move, as approved by the Commission, will cost $237,000, according to present estimates.

Estimated construction costs submitted for requested new stations range from $100,580 for Fairmont Broadcasting Co. (WVVW), seeking UHF Channel 35 at Fairmont, W. Va., to $1,810,000 for Westinghouse Radio Stations Inc. (KDKA), seeking VHF Channel 11 at Pittsburgh.

Under $110,000 Cost

There are five applications already on file for stations costing less than $110,000. In addition to WVVW's UHF bid, these include Cedar Valley Broadcasting Co. (KAUS) for VHF Channel 6 at Austin, Minn., estimated to cost $101,880; Southeastern Broadcasting System (James S. Rivers), Albany, Ga., VHF Channel 10, $107,200; Washtenaw Broadcasting Co. (WPAG), Ann Arbor, Mich., UHF Channel 20, $108,000; and Georgia-Carolina Broadcasting Co. (WJBF), Augusta, Ga., VHF Channel 6, $88,000 (not including several major items of equipment on hand). WJBF's original application estimated total $103,000 cost of construction.

Another low cost station is proposed by Central Kentucky Broadcasting Co., licensee of WLEX Lexington, which expects its UHF Channel 33 outlet will cost $115,500.

Four pending applicants propose stations costing in excess of a million dollars. Topped by Westinghouse's KDKA Pittsburgh at nearly two million, the others include Fisher's Blend Station Inc. (KOMO), Seattle, seeking VHF Channel 4 with cost estimated at $1,115,460; Isle of Dreams Broadcasting Corp. (WIOD), Miami, VHF Channel 7, $1,259,957; and Miami Broadcasting Co. (WQAM), Miami, also seeking Channel 7, $1,246,682.

Westinghouse estimates it will cost $1,840,000 to operate its Pittsburgh station the first year, with income of $2,650,000 predicted.

The other three major installations estimate annual operating costs and expected revenues of around a million dollars.

Four other applicants propose installations of almost a million dollars. Westinghouse seeks such stations in two locations, Fort Wayne, Ind., and Portland, Ore. It is licensee of KEX Portland. The Fort Wayne bid is for UHF Channel 21 ($997,000); Portland, VHF Channel 8 ($855,000).

Vindicator Printing Co. (WFMJ), Youngstown, Ohio, will spend $971,943 to build on UHF Channel 33 there, while the Tribune Co. (WFLA), Tampa, Fla., expects it will take $961,887 to construct an outlet on VHF Channel 8 there.

Some 42 of the applications now on file request stations costing less than $200,000; 39 applications are in the $200,000-299,999 category; 37, $300,000-399,999; 15, $400,000-499,999; 15, $500,000-599,999; 9, $600,000-699,999; 3, $700,000-799,999; 1, $800,000-899,999; 3, $900,000-999,999; 4 in excess of $1 million.

Westinghouse Radio Station's four proposed outlets will cost together in excess of $4 million to construct. The least expensive will be the TV counterpart for KYW Philadelphia, on UHF Channel 17, estimated at $440,000.

Westinghouse expects to bear a substantial operating loss of the UHF station at Philadelphia during the first year's operation. Cost of operation is expected to total $1,117,000, while revenue of only $279,000 is predicted. Operation estimate is based on the firm's experience with its WBZ-TV Boston.

The Philadelphia application noted that the city is presently

(Continued on page 34)

A MONTHLY REPORT TO EDITORS

Highlighting Significant Facts about Bituminous Coal

NEW COAL DEPOSITS TO AID WESTERN STEEL INDUSTRY.

Pointing again to the fact that the U. S. has tremendous coal reserves, the Bureau of Mines has announced the discovery of new deposits of high-grade metallurgical coking coal in the Coal Creek District of Gunnison County, Colorado, so located that the fuel can be supplied to the growing steel industry of the Far West. The minable reserves of the newly-found deposit, the Bureau says, will run to more than 100 million tons of bituminous coal.

INCREASING SHARE OF COAL PRODUCTION BEING "LAUNDERED" FOR MARKET.

Today, more than 40% of the nation's coal production is being "laundered," sized, graded, and treated for market by modern coal preparation plants. In the past four years the number of preparation plants has grown from 461 to 638. These plants turn out coal that is tailor-made to each customer's specific needs. This better-prepared coal is one reason why today's modern coal-burning equipment can get anywhere from 10 to 40% more power from each ton of coal than was possible a few years ago.

MAJOR STEP TAKEN IN BUILDING NEW COAL CHEMICALS INDUSTRY.

Coal's big future as a basic raw material has been brought nearer by Union Carbide & Carbon Corporation's new coal hydrogenation plant in West Virginia. This pilot plant marks the longest forward step yet taken to launch a coal chemicals industry in the United States. Formerly coal chemicals have been produced only as by-products of the steel industry's coking ovens, but this source of supply has not kept pace with demand. Output of aromatic coal chemicals from coking ovens has increased only 3 to 5% a year while demand for these chemicals has been rising at the rate of 25 to 36%.

MODERN COAL HANDLING IS FACTOR IN PRODUCING LOW-COST POWER.

A new conveyor belt that carries coal 2½ miles from mine to river barges is helping to make possible the economical generation of additional electric power in the Kanawha River Valley near Charleston, West Virginia. The belt, with a capacity of 550 tons of coal an hour, eliminates an expensive 14-mile round-trip trucking operation. Result: Lower-cost electric power (thanks largely to modern coal handling) which is attracting new industries to the area. A new electric generating station is being built, and plants already in the region are expanding their outputs in step with this increasing power potential.

If you have any questions about coal or the coal industry, your inquiry to us will receive prompt reply.

TV Applicant List

(Continued from page 32)

served by three VHF stations and VHF set circulation is over a million receivers.

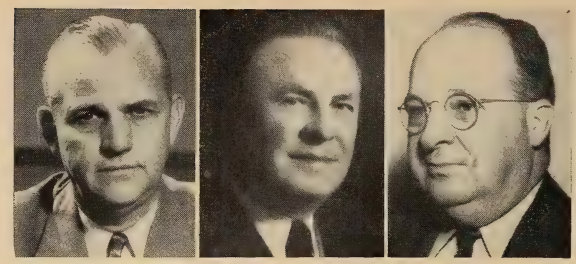
"It is not known how rapidly an audience can be built for a new UHF service since it will be necessary for present set owners to have their receivers modified or purchase new sets in order to receive the transmission from the proposed station on Channel 17," FCC was told. "Since the income of a radio or television station is related to the potential audience, it is expected that the first year of operation will be conducted at a substantial loss."

Pennsylvania Broadcasting Co., a subsidiary of Gimbel Bros., New York, and licensee of WIP Philadelphia, expects it will cost $600,000 to build the UHF station it proposes on Channel 29 at Philadelphia. First year operating cost is put at $500,000 and revenue is not estimated.

Typical full-power VHF station might be that of Scripps-Howard Radio Inc. at Knoxville, Tenn., where it operates WNOX. Channel 10 with 316 kw ERP is sought, using 620 ft. tower. Estimated construction cost is $546,693, while first year operating cost and revenue will be $441,480 and $418,600, respectively.

Scripps-Howard Radio operates two TV stations now: WCPO-TV Cincinnati (WCPO affiliate) and WEWS (TV) Cleveland. Scripps-Howard Radio is owned by E. W. Scripps Co., which controls the Memphis Pub. Co., licensee of WMC and WMCT (TV) Memphis.

Scully to Good Luck



WILLIAM H. SCULLY, advertising brand manager for Lever Division, Lever Bros. Co., New York, has been named advertising manager of company's Good Luck Division, effective immediately. Mr. Scully succeeds J. Harvey Howells, recently promoted to advertising manager of Lever Division.

Russell Reception

F. M. (SCOOP) RUSSELL, vice president of NBC Washington, and Mrs. Russell were hosts to 200 guests at the Carlton Room of the Carlton Hotel, Washington, D. C., last Wednesday. Among those attending the reception were members of FCC, of the Senate and House, and radio-press representatives. Secretary of Agriculture Charles F. Brannan; Secretary of the Senate and Mrs. Leslie Biffle, and other members of Washington officialdom were among the guests.

Rayburn, Finch Split

THE WNEW New York disc jockey team of Gene Rayburn and Dee Finch will be dissolved Jan. 1, 1953. On that date, Mr. Rayburn will move to WNBC and WNBT (TV) New York with whom he has signed a five-year contract.

Streibert Named General Telecasting Head

(Continued from page 23)

tions that an MBS television network was involved in the General Telecasting project. It was believed General prefers to keep radio and TV operations completely separate.

Official announcement was made last week that the name of Thomas S. Lee Enterprises, General Tire & Rubber Co. subsidiary, had been changed to General Teleradio Inc. The firm is incorporated in California and is parent company of WOR-AM-TV, Yankee and Don Lee networks as well as MBS majority stockholder.

At a meeting of MBS stockholders Thursday. Ward D. Ingrim, Don Lee executive vice president, was elected to the network board. Previously Thomas F. O'Neil, president and board chairman of MBS, had announced election of Jack R. Poppele, WOR vice president in charge of engineering for radio and TV, as engineering vice president of MBS. Julius F. Seebach Jr., WOR vice president in charge of radio and TV programming, had been named MBS vice president in charge of programs.

Board members of MBS now include Messrs. O'Neil, Ingrim and Poppele; E. M. Antrim, WGN Chicago; Willet H. Brown, of Don Lee; H. K. Carpenter, WHK Cleveland; Benedict Gimbel Jr., WIP Philadelphia; Linus Travers, Yankee Network; Frank Schreiber, WGN Chicago; William H. Fineshriber, MBS New York; James E. Wallen, MBS New York.

All other MBS officers were reelected Thursday, including Mr. O'Neil as president and Mr. Fineshriber as executive vice president; Adolf N. Hult, vice president in charge of sales; Earl M. Johnson, vice president in charge of station relations; Robert A. Schmid, vice president in charge of advertising, public relations and research; Mr. Wallen, secretary-treasurer; George Ruppel, controller; Elisha Goldfarb, asistant secretary and Emmanuel Dannett, assistant secretary.

Fall Schedules

(Continued from page 23)

the firm's *Old Gold Amateur Hour*, presently heard in this period has not yet been assigned a new time on the network. However, officials of both the agency and network are expected to conclude negotiations for a new time shortly.

Listerine toothpaste, through Lambert & Feasley, New York, is looking for a half-hour TV film to be placed on a regional basis. The firm is expecting to introduce a new product on the show, it was understood.

Esquire shoe polish, through Emil Mogul, New York, is expected to renew the Kate Smith daytime program on NBC-TV on an alternate-week basis starting in the fall.

Another agency switch was announced late last week by Chicopee Mills Inc.'s cotton and plastic divisions, when Lennen & Mitchell, New York, was named to handle the firm's advertising, effective immediately.

Both Coca Cola Co. (D'Arcy agency) and General Foods (Young & Rubicam) still are in negotiation with Bing Crosby for possible radio and TV package.

L-W Issues New Show

SECOND of its new across-the-board programs, *The Sunshine Boys*, 15-minute gospel songs show, has been released by Lang-Worth Feature Programs Inc. First broadcast is set for July 6, C. O. (Cy) Langlois, president, has announced.

MATERIALS REPORT

Paley Completes Project

CBS BOARD Chairman William S. Paley last week completed his special assignment as chairman of the President's temporary Materials Policy Commission with praise from Mr. Truman for a "landmark in public services" he and staff had achieved during the past 17 months [CLOSED CIRCUIT, June 2].

Formal presentation of the commission's "trail-blazing" report and recommendations on U. S. raw materials resources for the next 25 years was made to the Chief Executive at the White House last Monday. Mr. Paley and other commission members were present for the ceremonies.

The CBS board chairman has been commuting to Washington since January 1951.

KRLD CHANGES

Runyon Announces New Posts

JOHN W. RUNYON, newly-elected board chairman of *The Daily Times Herald*, Dallas, last week announced executive changes at the *Times Herald*, and at the newspaper affiliate, KRLD-AM-FM-TV Dallas.

Mr. Runyon, who succeeded to the board chairmanship following the death of Thomas C. Gooch [B•T, June 23], made the announcement following meetings of the stockholders and the board of directors.

Clyde Rembert, who has been managing director of KRLD-AM-FM-TV, was named president of the radio-TV properties.

D. A. Greenwell, who previously was *Times Herald* vice president and treasurer, was elevated to the post of first vice president and treasurer of the newspaper. Mr. Greenwell also retains the duties of KRLD vice president-treasurer.

C. V. Upton, heretofore *Times Herald* secretary, was raised to the post of second vice president and secretary of the paper and assistant secretary of KRLD.

Clyde Taber, general superintendent of the newspaper, retains his title of assistant secretary of KRLD.

Allen Merriam, until now editor, becomes editor-in-chief. B. C. Jefferson, who has been associate editor and chief editorial writer, assumes the title of editor along with his editorial writing duties.

Four new board members, who join those men already mentioned to compose the full board, are Sam R. Bloom, advertising director; Albert Jackson, assistant advertising director; James F. Chambers Jr., managing editor, and Mr. Rembert.

Mr. Chambers also was appointed a member of the executive committee to fill the vacancy created when Mr. Runyon became president of the newspaper. Other executive committee members are Chairman Greenwell and Messrs. Merriam, Upton and Jefferson.

CBS Radio Film

ESTIMATED 400 top-level agency personnel in Chicago saw the CBS Radio film presentation, "More Than Meets the Eye," at the Drake Hotel Tuesday. The cocktail party-buffet was preceded by showing of the film, which is making the CBS station circuit this month. H. Leslie Atlass, CBS Central Division Vice President, introduced Adrian Murphy, president of CBS Radio, and John J. Karol, vice president in charge of network sales. Mr. Karol in commenting on the strength of the network's fall radio lineup saleswise, said: "As of today CBS is 90% as solidly sold as it was in September of last year. We are convinced we can beat last year's record."

Chicago Political Show

(Continued from page 25)

bined costs for both the GOP and Democratic conventions.

There are conflicting reports—and claims—about the number of affiliates each TV network has lined up. One estimate, completely unofficial, was that NBC-TV will have 46 or 47; CBS-TV 36 or 37; ABC-TV 13 or 17.

Four DuMont stations will carry the convention programs sponsored by Westinghouse on CBS-TV, and in addition DuMont may originate some special programs of its own. DuMont stations carrying the Westinghouse programs—and being paid by Westinghouse — are WGN-TV Chicago and the three DuMont-owned stations: WABD (TV) New York, WTTG (TV) Washington, and WDTV (TV) Pittsburgh. DuMont will air its *Starring the Editors* at different times July 9 and 23.

In addition to actual convention coverage, national, regional and local advertisers are lining up for programs built around the two political conferences.

Sponsor breakdown for national radio-TV networks and estimated contract value:

ABC radio and television, Admiral Corp. ($2 million); CBS Radio and Television, Westinghouse Electric Corp ($3 million); DuMont, Westinghouse; MBS, co-op sponsorship; NBC radio and television, Philco Corp. ($2 million).

NBC-TV reportedly last week was in a quandry, along with its affiliates, over a possible conflict with network coverage of the All Star baseball game Tuesday (July 8). The Gillette Co. signed for baseball coverage, as part of a sports package, before Philco negotiated political commitments. NBC was reported to be conferring with the Republican National Committee in an attempt to have the GOP schedule routine business that afternoon.

Interrupt for Bulletins

Mutual was beset with the same problem. It is covering the All Star game on radio. At last reports MBS was planning to air the game and interrupt for any bulletins from the convention floor.

Individual stations using direct lines, microphones and other equipment are joining a pool arrangements at $250 each, with an additional $200 for installation of lines. William McAndrew and George McElrath, NBC New York, were coordinating details. Stations ordering the pooled pickup will channel it to their individual studios.

Small stations will benefit from the NARND arrangement, with the trade group and Chicago Broadcasters Assn. operating a headquarters newsroom at Convention Hall. Accredited radio-TV newsmen are invited to headquarters in the hall, where TV sets, telephones and other facilities will be available. Magnecord Inc. will operate tape recording equipment in adjoining space. Charge for tapes will be $5 for five minutes and $9 up to 15 minutes covering cost of air mailing to the newsman's home station. NARND explained:

At previous conventions, only the largest stations and networks could afford direct coverage because of excessive costs. Charges to be assessed at the 1952 convention for broadcast facilities indicate that such costs will reach an all-time high this year. A price of $700 was fixed for the use of broadcasting booths, for example, and even when the cost was reduced because of vigorous complaints from radio stations, the price was still beyond the limits of most news budgets. Premium charges are being assessed also for the installation of lines and loops and other technical equipment, making it additionally costly for stations to originate remotes at Convention Hall.

The cost factor had posed difficulties among certain individual stations who plan out-of-town feeds [CLOSED CIRCUIT, June 23]. Some stations will carry only one of the two conventions. Arrangements Committee is headed by Spencer Allen, WGN-TV Chicago, CNBA president.

Six times the number of independent radio-TV entities than were at the 1948 conventions asked for and received space assignments at the two conventions, the Senate-House Radio-TV Gallery superintendents reported.

Provisions for stations scheduled to report direct from Chicago include 11 booths on the second floor of Exhibition Hall, adjacent to the Amphitheatre, plus six tables for independent stations to tie-in for direct broadcasts to their home stations.

Assigned booths are the following: WINS New York, WSRS Cleveland, WLW Cincinnati, CBC and BBC, WHDH Boston, WKRC Cincinnati, WXLW Indianapolis and WAPI and WAFM-TV Birmingham, KTRH Houston, WMT Cedar Rapids, KRNT Des Moines and KFWB Los Angeles.

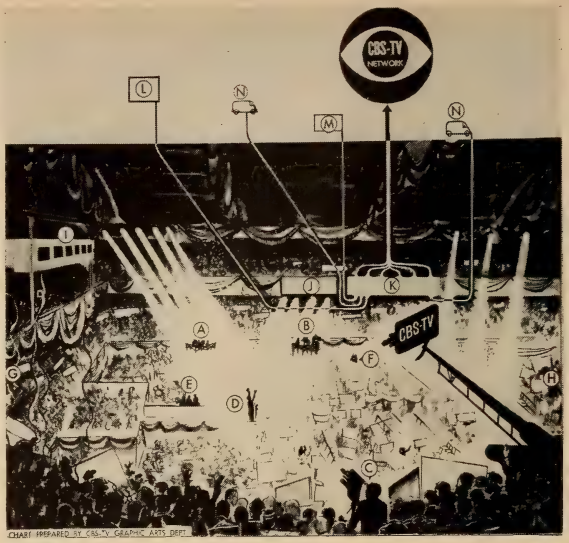
WSRS and KFWB also will have direct lines to their stations from seats in the radio-TV section of the convention floor.

At the GOP convention, 311 radio-TV organizations have been accredited. They will have 724 radio newsmen and commentators, 466 technicians and 681 staff men (producers, directors, etc.) to handle the pickups.

At the Democratic convention, 305 organizations have been accredited. They plan to have on deck 721 newscasters and commentators, 468 technicians and 683 staff men.

Networks will have more than 900 accredited newscasters, technicians and staff personnel running things at the two conventions. Following are the breakdown: ABC radio, 141; CBS Radio, 105; NBC radio, 201; MBS, 138; ABC-TV, 100; CBS-TV, 149; NBC-TV, 57, and NBC-Newsreel, 26.

Overlooking the convention floor at the back of the amphitheatre will be six booths. One each have been assigned to ABC, CBS, NBC, MBS, the radio pool, and the TV pool.



All radio-TV organizations have been berthed on the fifth floor of the Conrad Hilton Hotel. Room 539A is the headquarters of the Senate - House Radio - TV Gallery staff.

Applications of networks and stations were screened by the Radio-TV Correspondent Galleries in cooperation with Edward Ingle and Ken Fry, respective radio-TV directors of the GOP and Democratic National Committees. Staff members are led by D. Harold McGrath and Robert Menaugh, respective gallery supervisors in the Senate and House.

High power stations also will receive special service during the conventions through Clear Channel Broadcasting Service, which will maintain four large studios at the amphitheatre, plus two more at the Hilton hotel. CCBS will offer facilities for "live" feeds and tape recordings to some 15 stations, with engineers from WGN and WLS supervising details. Additionally WJR Detroit will provide mobile units. WLW Cincinnati, another clear, will have its own staff.

Cost of equipment slated for convention use will be astronomical. NBC alone is sending about $1.5 million worth to Chicago. Neither are other networks skimping.

Other media are going all out. AT&T Long Lines has provided some 670,000 miles of teletypewriter circuits, serving some 7,500 press locations. Illinois Bell will have over 1,000 telephones, 30 telephoto and 215 radio channels, and 70 visual and audio TV channels, plus walkies-talkies. More than 70 United Press Movietone cameramen, directors and other personnel will headquarter in Chicago. Plans are underway for on-the-spot processing, according to William C. Payette, UP TV manager. UP will move scripts over its TV wire to client stations.

ELABORATE preparation for CBS Television Network coverage of the Republican and Democratic National Conventions from the International Amphitheatre in Chicago is sketched in this chart by the CBS-TV Graphic Arts Dept. Symbols are these: (A), (B) and (C), cameras; (D) speaker's rostrum; (E) commentators' table; (F) walkie-talkies; (G) rear entrance camera; (H) front entrance camera; (I) commentators' booths; (J) TV pool control room; (K) CBS-TV studios, control room, master control; (L) Conrad Hilton Hotel studios; (M) WBKB (TV) CBS-TV studios; (N) two mobile units. NBC radio-TV coverage plans were blueprinted in two sketches in the June 23 issue of BROADCASTING • TELECASTING.

Coverage Picture

Here is the coverage picture by networks:

ABC commentator staff will include John Daly, Elmer Davis and others, supplemented by members of *Newsweek* magazine and the New York *Herald-Tribune*, and syndicated columnists. ABC AM and TV executive roster will be headed by Thomas Velotta, overall supervisor and vice president in charge of news and special events for ABC radio. ABC radio has slated 12, ABC-TV 9 special events shows July 4-6, and 430 radio and 304 TV broadcasts for both meets.

ABC will transport over $1 million worth of equipment, operated by a task force of 55 radio-TV engineers from New York, Los Angeles, San Francisco and Detroit.

CBS Radio last Tuesday announced a series of 230 broadcasts for both parleys, with 66 special programs starting today (Monday). Many of the network's regular weekly news and panel programs will originate in Chicago, including *Capitol Cloakroom* and *People's Platform*.

CBS Television Network has planned previews of parley preparations and coverage July 6-21, with six CBS-TV shows moving from New York to Chicago. Edward R. Murrow will be on hand. Additionally, the network has launched a new program, *Candidate Closeups*, as part of its

election year coverage.

A quintet of five newsmen will lead special MBS radio coverage, 5:45-6 p.m. daily under sponsorship of S. C. Johnson & Son Inc. They are Cecil Brown, H. R. Baukhage, Frank Singiser, Holland Engle and Francis Coughlan. Twenty-two Mutual commentators — Fulton Lewis Jr., Gabriel Heatter, Bill Henry. among them—will be on hand for regular coverage. Mutual will have 150 persons on hand, with most news programs emanating from Chicago. The network has scheduled four successive Sunday broadcasts (9:30-10 p.m.) to preview and review convention activities starting July 6.

NBC radio has assigned Joseph Mevers. radio news operation manager, as director of convention coverage. He will supervise more than 30 commentators and newsmen. Network's special pre-GOP convention programs kicked off June 28 with *Convention Preview*. They were to run through convention eve, with *Convention News Conference, Headquarters Report* and *First Ballot*. Convention programming is to include origination of *Today* in Chicago during July and *Republican Review* with George Hicks July 11.

All radio-TV networks were planning to ship engineering and news personnel from other cities—primarily those in which their O&O stations are located.

Example of local sponsorship is that by Richfield Oil Corp., Los Angeles, which will pick up the tab for convention coverage on KTLA (TV) Hollywood, starting July 7 and 21. Agency is Hixson & Jorgenson Inc. Other regional and local advertisers were seeking availabilities.

The Entertainment Industry Committee set up by the Democratic National Committee with Messrs. Reinsch and Sauter will work out convention and campaign diversion plans. Vice chairmen will be appointed from various entertainment industry segments.

DEMOCRATS

Radio-TV To Cover Hearings

PUBLIC hearings set by the Preliminary Drafting Committee studying the 1952 Democratic platform will be open to full media coverage, including radio and television, the Democratic National Committee announced last Wednesday. Sessions will be held in Chicago starting July 16.

Plans for full media coverage were given by Rep. John W. McCormack (D-Mass.), House Majority Leader and chairman of the platform-drafting group.

"Our platform hearings will be 'small-d' democracy in action and we want the voters to have every opportunity to be informed . . . through the media of newspapers, radio, newsreels and television," Rep. McCormack said. Group's recommendations will be presented to the full Platform and Resolutions Committee at the Democratic National Convention July 21.

AAW AWARDS

Go to KERO, Pabst

TOP AWARDS in competition by the Advertising Assn. of the West went to KERO Bakersfield, Calif., in radio, and to the Pabst Sales Co. (Pabst beer), in television, at the AAW's 49th annual convention which ended Wednesday at Seattle.

KERO received a trophy donated by the Vancouver Advertising & Sales Bureau for its successful spot campaign which sold tours of the Golden Crust bakery. The Pabst TV award was donated by the Hollywood Adv. Club.

New AAW officers named at the four-day meeting were: President, Arthur E. House, House & Leland agency, Portland, Ore.; senior vice president, Howard Willoughby, executive vice president, Lane Pub. Co., San Francisco; vice president-at-large, Mrs. Glad Hall Jones, account executive, KRKD Los Angeles; secretary-treasurer, Clair G. Henderson, Arthur G. Rippey Co., Denver.

Approximately 450 delegates saw three other awards made for radio and four for television, as follows:

RADIO—Commercial programs in cities under 100,000, KOPO Tucson, Ariz., for Duro's Flower Shop; commercial spot announcements in cities over 100,000, Abbott Kimball Co., San Francisco, for Regal Amber Brewing Co. over regional stations; same in cities under 100,000, KERO Bakersfield, Calif., for Golden Crust Bakery.

TELEVISION—One-minute or less film commercials: Local advertiser, Metropolitan Federal Savings & Loan Assn., Los Angeles; agency, Anderson-McConnell, that city, and producer, TV Ads Inc., Hollywood. Regional advertiser, Folger's coffee; agency, Grant Adv., Hollywood, and producer, Five-Star Productions, Hollywood. National, advertiser, Pabst Sales Co.; agency, Warwick & Legler, Hollywood, and producer, Five-Star Productions, Hollywood. General classification, live, kinescope or film commercials of any length, advertiser, Golden State Sales Co.; agency, Guild, Bascom & Bonfigli, San Francisco, and producer, Guild, Bascom & Bonfigli.

BAB NAMES BROWN

To Work on Promotion

WALTER E. BROWN, advertising and promotion manager, DuMont Television Network, has joined the New York staff of Broadcast Advertising Bureau, effective today (Monday), according to William B. Ryan, BAB president.

Mr. Brown, with DuMont for the past year and a half, will be assigned both national and local promotion for BAB. Prior to his DuMont Association, he was for six years a member of ABC's advertising and promotion department.

Mr. Ryan also announced the appointment of Marian Jackson, former presentation analyst with A. C. Nielsen Co., New York, as a research analyst in BAB's research department.

KLZ—31 YEARS OF SERVICE

Denver Honors KLZ's Public Service Excellence!

Here is proof of KLZ's home-town impact: The Denver Advertising Club, an organization usually dedicated to recognizing superiority of commercial efforts, has seen fit to pay special recognition to KLZ's non-commercial public service programming.

Of two "awards-of-the-year" for public service...both went to KLZ. The top award for KLZ's "Sounding Board," a weekly presentation of important local controversial issues. A special award for KLZ's one-time coverage of a question of great interest to all Coloradoans, "Lifting of the TV Freeze."

KLZ's local and national award-winning record is consistent proof of leadership during 31 years of broadcasting in the public interest.

PARAMOUNT

Financing Effort Cited By Porter at Hearing

PARAMOUNT Pictures Inc., did not buy stock in Scophony Corp. of America until SCA spent four years and "aggressive" promotion in trying to line up American backers for the British-born company.

That was what Paul Porter, Paramount Pictures Corp. counsel, sought to prove last week in his cross-examination of Arthur Levey, Scophony president, during the 24th week of the FCC's Paramount hearing.

One issue in the case is whether the Commission will approve the merger of ABC with United Paramount Theatres Inc. (see story this page).

Mr. Porter, who had copies of the diaries which were kept by Mr. Levey, interrogated the SCA executive about entries made from 1938 to 1942. Mr. Levey indicated in his diary, and testified under questioning by Mr. Porter, that he had negotiated with representatives from other motion picture companies (mostly Warner Brothers and RKO-Trans Lux) in addition to Paramount.

When asked why he was going into such minute detail—he went through Mr. Levey's diaries almost on day-to-day basis—Mr. Porter replied that it was Paramount's purpose to show that as early as 1938 and on through to the formation of SCA, "there were a whole series of negotiations with as many as 15 or 20 possible sources of finances, none of which came to anything.

"For a period of four years before these final negotiations were developed under the most aggressive kind of promotional tactics, there was no one who was sufficiently interested to put a nickel in the development of an American company [Mr. Levey was with British Scophony at the time]."

Mr. Porter said, "I think the witness [Mr. Levey] has testified and I think the Commission has alleged that the basic issue here is one of suppression, and we intend to prove that not only was there not any suppression, but that both Paramount and its partner, GPE, come into this matter after all alternatives had been exhausted by . . . Mr. Levey."

The other side of the picture, however, was brought out by Mr. Levey who asserted that Paul Raibourn, Paramount vice president, had dangled "bait" in the form of a large investment in front of Scophony. But Mr. Raibourn did not say anything definite, Mr. Levey said, which explained why he continued to talk with other possible investors.

Mr. Levey had earlier testified [B•T, May 19, 12] that Paramount had attempted to suppress development of his firm. He accused Paramount and GPE of enjoying "squatters rights" to valuable patents.

NEWSMAN EJECTED

By N. Y. Deputy Mayor

ABC reporter Julian Anthony was ejected last Thursday from New York City's Board of Estimate public hearing on a proposed increase in taxi-cab fare rates. Deputy Mayor Charles Horowitz ordered Mr. Anthony to "remove yourself and your tape-recording machine from the premises."

Thomas Velotta, ABC vice president in charge of news and special events, filed a formal protest late Thursday with Mayor Vincent Impellitteri against the action.

Newspaper reporters were allowed to remain at the hearings. No other radio newsmen were in attendance at the time.

An ABC spokesman said Mr. Horowitz's action forced the cancellation of a broadcast of the proceedings scheduled for delivery that night over WJZ New York, 10:30-11.

In an informal interview with other members of the Board of Estimate, the network spokesman said Mr. Anthony learned that none had any objection to a tape-recording of the meeting.

It was pointed out that Mr. Anthony had covered board hearings on the city budget April 8, 9 and 14. These proceedings reportedly were broadcast over WJZ.

NEW portable broadcast amplifier has been developed by General Electric Co., Syracuse, N. Y., with flexibility for use in studio and remote operations. Unit (Type BA 6-B) has four built-in preamplifiers, master mixer, AC power supply, plus battery provisions. GE claims amplifier practically eliminates "hiss, hum and microphonics" through low - noise miniature tubes. Output transformer is so equipped as to permit broadcast program to be fed to public address system or other amplifier. New cue amplifier gain control facilitates operation in noisy locations and high-low level plug-in headphone connections are provided.

GENE HOWE

Found Dead in Automobile

GENE HOWE, 66, president of Plains Radio Broadcasting Co., licensee of KGNC Amarillo, Tex., was found dead in his car near Amarillo last Wednesday. A bullet had pierced his right temple and an inquest verdict of suicide was returned. He was the son of Ed Howe, who for 50 years was publisher of *Atchison* (Kan.) *Globe*.

Mr. Howe was publisher, editor and daily columnist of the Amarillo *Globe-News*, until 1936 when he gave up most of his executive duties but continued to write his column, "The Tactless Texan." At the time of his death, he was board chairman of Globe-News Publishing Co.

According to the *Globe-News*, Mr. Howe had been despondent because of ill health.

He entered the newspaper business at 13, setting type for his father. He started the *Evening Globe* in Amarillo and two years later bought out the *News*.

In 1950 Mr. Howe announced his retirement as publisher and president of his newspaper chain to take the board chairmanship. To the end he remained a reporter as well as executive and recently wrote an exclusive interview with Sen. Estes Kefauver (D-Tenn.) One of Mr. Howe's achievements was origination of Mother-in-Law Day.

Some years ago he was one of the founders of the Taylor-Howe-Snowden station representative firm, now the O. L. Taylor Co.

Surviving are his wife; a daughter, Mrs. Shelby Kritser, wife of Tom Krister, manager of KGNC; a brother James, one time AP foreign correspondent, and a sister, Mrs. Mateel Howe Farnham.

SPLIT OPPOSED

In Paramount Case

PETITION of Paramount Pictures, United Paramount Theatres and ABC to split up the issues and get a quick decision in the long-pending FCC proceeding drew opposition Thursday from Curtis B. Plummer, chief of the FCC Broadcast Bureau.

ABC and United Paramount Theatres filed the petition June 6, with CBS supporting and Allen B. DuMont Labs. opposing such action.

First, the FCC bureau contends the groups of applications do not lend themselves to a split, with separate action, because they are "inextricably tied together . . ."

The same facts and evidence are vital to the decision on identical issues involved in the cases, it is argued. For example, it is stated, the application to assign WBKB (TV) Chicago to CBS "ignores the decision which must be made as to the legality of the purported transfers from Paramount Pictures to United Paramount Theatres and Paramount Pictures Corp." along with license and renewal grants.

Evidence has not been completed in relation to WBKB, the bureau contends, with at least three Commission witnesses yet to be heard.

The bureau charges the petitioners are trying to "steamroller" the case into the proposition "that it is unnecessary to determine the qualifications of a licensee, whose license has been placed in a 'temporary' status because of anti-trust violations, in the event he wishes to sell his station, but only that the qualifications of the transferee need be considered."

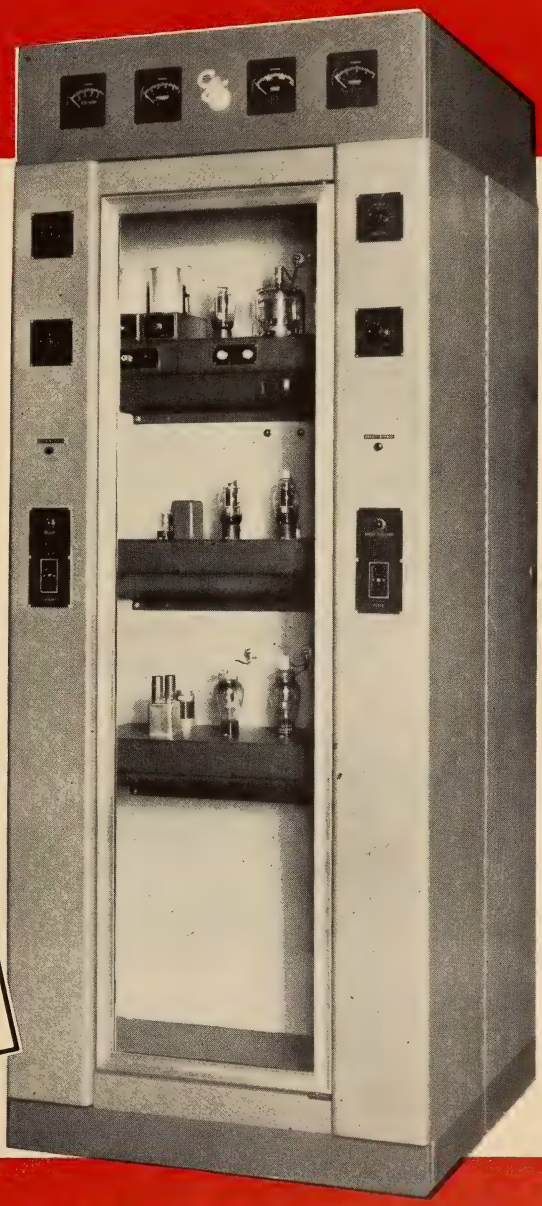
Two potential trouble spots cited by the bureau include a situation whereby ABC-Paramount Theatres would own KECA (TV) while Paramount Television Productions, 100% subsidiary of Paramount Pictures Corp., owns KTLA (TV) in the same city, involving overlap in ownership.

The second instance deals with WBKB (TV) Chicago, owned by Balaban & Katz, in turn substantially owned by United Paramount Theatres, and WENR-TV, owned by ABC. Should an ABC-Paramount merger be granted, ABC-Paramount Theatres would then own and operate two stations in Chicago pending decision on proposed assignment of WBKB to CBS, according to the Broadcast Bureau.

Three weeks of hearings remain, the bureau explains, with the hearing having passed its 82d day and consisting of 11,776 pages of testimony and 829 exhibits.

The bureau estimates an initial decision cannot be expected on the entire record before Jan. 15, 1953 at the earliest. Severance of applications would save "very little time," it is claimed, and it is impossible for an initial decision to be issued in August, as requested.

Presenting



THE NEW

Continental

TYPE 312

250

WATT TRANSMITTER

The CONTINENTAL Type 312 is a 250 watt AM Transmitter in which the design is entirely new and different. Extreme simplification of circuitry with unexcelled performance are its most important features. Extremely low values of both RMS and Inter-modulation distortion are obtainable.

Only two RF stages following the crystal oscillator are utilized. The first of these is fixed tuned for the entire broadcast range of 540 to 1600 KC and the output stage has only one control to cover the entire range. The transmitter has one other control — the output loading control. Since tetrode type tubes are used, the necessity for neutralizing circuits is eliminated.

The Type 312 Transmitter is contained in one of CONTINENTAL'S new, all aluminum cabinets. This cabinet is of special unified, frameless design and incorporates the well-known Transview styling together with functional features that afford maximum accessibility, shielding and circulation of cooling air.

N. Y. BMI CLINIC

Radio's Strength Cited

RADIO is far from dead and can thrive in the future by improved programming geared to community interests, speakers at the Broadcast Music Inc. radio clinic told 100 broadcasters at the Monday and Tuesday meeting in New York.

This viewpoint was sounded on Monday by John M. Outler Jr., general manager of WSB and WSB-TV Atlanta, and was echoed by other speakers. As a panacea to broadcasting ills, Mr. Outler offered two general suggestions: Give the people more and better programs tied to their communities and sell radio vigorously as a medium to the people of America.

He called on broadcasters to free themselves from dependence on the networks and develop worthwhile projects in their own cities. Mr. Outler cited several examples of the steps taken by his station to permit its audience "to become part of the operation and thus to feel it is participating in the activities of the community."

Warning that unless radio as a whole is sold to the people of the country as a whole the entire industry will suffer, Mr. Outler commented: "If we sell radio short, we've committed a crime against the community."

Dr. Clarence L. Menser of Stetson U. and WJBS Deland, Fla., formerly vice president in charge of programs for NBC, asserted that sound broadcasting can thrive in the future if stress is placed on quality programming that considers the needs of the community that is being served.

"I say to the radio industry, by which I mean sound broadcasting, 'let down your buckets where you are,'" Dr. Menser declared. "You are in the midst of a situation that will give life to you and service to your community for many years if you will only get the full facts about your real position. If you have served your listeners well, they will stick by you for those things in which you can excel."

After long and serious consideration of sound broadcasting problems, Dr. Menser said, he still refused to believe there is a crisis. He conceded there were changes to be made to meet ever-shifting problems but he added that these did not justify the fears that are plaguing the industry.

He listed these fears as (1) fear of the FCC; (2) fear of the advertising agencies; (3) fear of its own judgment and (4) fear of competition, i.e., television.

Ted Cott, vice president and general manager, WNBC and WNBT (TV) New York, hammered at the point that radio is the best advertising medium around because its frequency unit cost is the lowest of all. He deplored the fact that the industry was not "shouting this from the tree tops, to everybody and not just to people in the trade."

Mr. Cott, in fact, assailed the "inbred promotion" that radio has been carrying on for years. He said there was no advantage to be gained by telling other people in the industry "what a wonderful job" radio is doing. Station managers, he said, must bring this message home to listeners—to the people who ultimately foot the bills.

He viewed television as no more competitive than a new station coming into the field. For the bad station, he said, TV will, of course, mean more competition. But he remarked that "nothing can help a bad station, it would probably fall by the wayside anyway."

Radio Bigger in Future

Harry Bannister, NBC vice president for station relations, said that once "radio gets out of this transitional period and business becomes stabilized, it will become bigger than ever."

Ben Laird, president of WDUZ Green Bay, Wis., urged broadcasters to explore more carefully the possibility of obtaining sponsors for public service programs. He deplored the notion prevalent among some leaders in the industry that sponsorship "taints" such programs. He cited several examples of successful sponsorship at WDUZ and reminded listeners that financial help makes possible the broadcasting of programs of merit that otherwise might have to be sidetracked.

The importance of farm news was outlined by J. Scott True, farm director of WFTM Maysville, Ky. He laid down the following rules for farm directors: Be informative, be natural, be friendly and be gracious.

George Higgins, vice president and managing director of KMBC-KFRM (FM) Kansas City, called for closer cooperation between program, sales and management. He urged joint meetings among the groups to gain a better understanding of what each is doing. In this way, Mr. Higgins said, management has an opportunity to sell that organization to its workers, which he called a necessary job, before "it tries to sell an advertiser."

The development of the youth forum was explained by Dorothy Gordon, moderator of the *New York Time Youth Forum* on WQXR New York.

Norman Reed, program director, WWDC Washington, spoke on "Building Personality Record Shows." He warned that a "good personality" is often ruined by "poison-ality" of records chosen for the show. Suggestions advanced by Mr. Reed to pick up a sagging show were the addition of telephone quizzes, mystery tune contests and number games.

Other features of the meeting were a story-telling presentation by Mrs. Ellis Barrett of Good News Productions, Philadelphia, and a production of the radio program *Mind Your Manners* which was introduced by Leonard Patricelli of WTIC Hartford.

Allen Ludden served as moderator and six teen-agers discussed problems which were tape recorded for broadcast on June 28.

General chairman for the clinic was Herbert V. Akerberg, vice president in charge of station relations, CBS Radio and CBS-TV.

At Monday's session, Mr. Harlow and Mr. Higgins were given life membership certificates in the Wisconsin Broadcasters' Assn. by Mr. Laird.

T. M. PEPPERDAY, publisher of the *Albuquerque Journal* and former owner of KOB-AM-TV Albuquerque, opens a gift from employes, tendered as Mr. Pepperday turned over the keys to Time Inc., and Wayne Coy, former FCC chairman. Mr. Pepperday sold KOB-AM-TV to Time Inc. and Mr. Coy for a reported $600,000 [B•T, June 2].

Uridge Appointed

OWEN URIDGE, manager of WQAM, ABC affiliate in Miami, has been appointed a new committeeman for District 8 of ABC's Station Advisory Committee, replacing Jim Hicks, former general manager of WCOS Columbia, S. C., who is resigning effective July 1. An alternate member for District 8, Mr. Uridge in his new capacity will represent ABC radio affiliates in North Carolina, South Carolina, Georgia, southern Virginia and northern Florida.

Use the **Broadcasting Marketbook**—the only fact book designed expressly for the buyer of time.

Over a quarter billion dollars of spot and network radio and TV is placed by buyers of time who use the MARKETBOOK daily. DEADLINE JULY 21, 1952 EDITION
PUBLISHED MID-AUGUST

RADIO'S VITALITY

Stressed by NBC's McCray

WITH receiver sets selling at the rate of one every 2½ seconds all year long, and despite propaganda to the contrary, radio is very much alive and is here to stay.

So stated Thomas C. McCray, NBC Western Division director of radio network operations, at a Los Angeles Advertising Women's meeting at Hollywood Roosevelt Hotel.

Terming radio as "9.7% bigger than last year," he said that there has been a 9,300,000 new radio set population created thus far in 1952, bringing the total in this country to more than 105 million.

Admitting that with the new medium of television, there is bound to be a "certain momentary transference of affection," Mr. McCray declared however that "this most inflexible yardstick of all, set sales, reinforces surveys which point up the continuing importance of radio to listeners and advertisers."

He told the ad women that every new set sold means more profit for the radio advertiser. He presented survey figures which showed that radio sets outnumber total circulation of all magazines by 114,000 and more than double the total circulation for all newspapers.

"There are also six times as many radio sets as TV receivers," Mr. McCray reminded.

Media Adaptability

Although radio continues the "greatest means of mass communication to be derived by man and does a tremendous selling job," Mr. McCray stressed the fact that the medium never has nor does it now claim to be the *best* means of advertising for *every* product.

"Some are better for television, some for newspapers, magazines, billboards and other media," he conceded. "However those who can pay the bill are using all available media to bring their sales message to the consumer. Radio will continue to play an important role in this regard."

Backing up his statement with success story examples, he said that it isn't always the high-rated program that does the best selling job for an advertiser. High-rating will indicate the show's popularity, but it doesn't always mean consumers are buying the sponsor's product, was his explanation.

Conceding that wherever there is TV it does an excellent selling job, Mr. McCray said however that radio gives the same competent coverage and at a fraction of the cost.

"Radio is not only the mass medium, but the economy medium," he added. "As economy is a by-product of mass production, so it is a by-product of mass coverage.

"Currently 53% of all TV sets are located in just 7 markets. In the remaining 56 TV markets, radio-only homes far exceed TV homes. This means that approximately 25 million homes throughout the country are reached only by radio."

Next to mass coverage, Mr. McCray considers radio's flexibility it's greatest asset to an advertiser, because a sponsor can fit the "sell" message to the area.

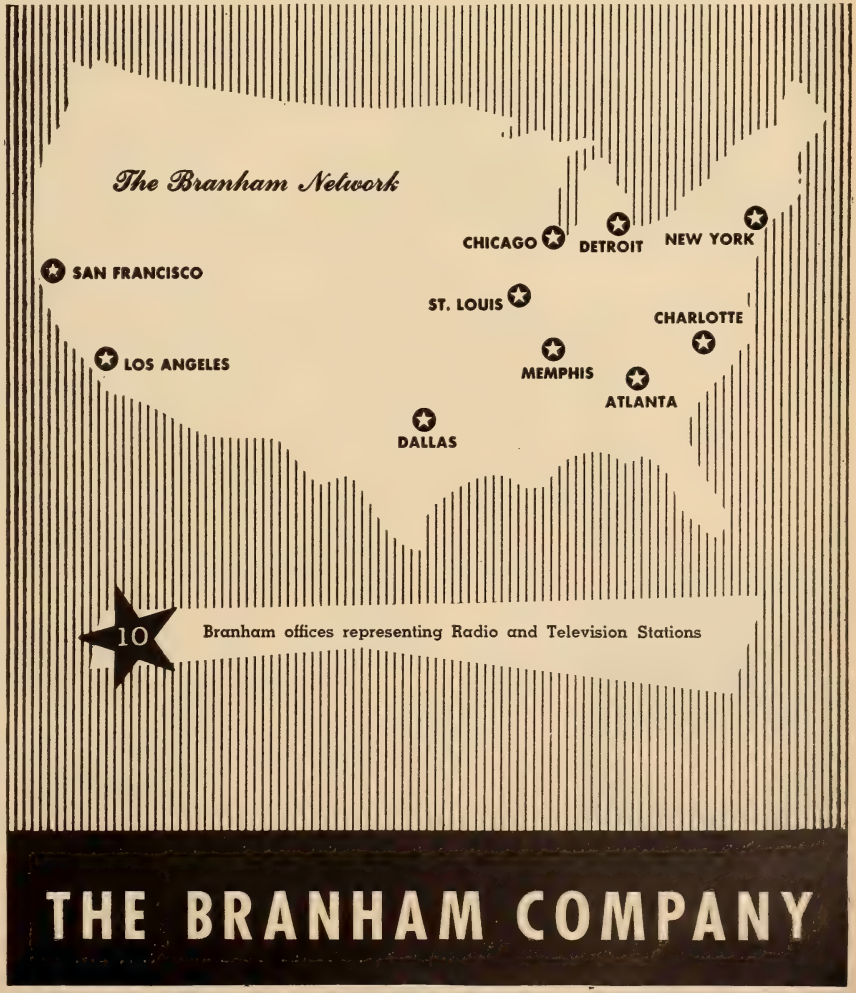
Five Minutes: $7,000

FIRST VENTURE into radio advertising paid off with a $7,000 cattle sale for J. C. Lewis, owner of Meadowbrook Farms, Ellicott City, Md., when he contracted for a series of 13 five-minute noontime stockyard report programs over WBAL Baltimore. First broadcast, containing two 100-word commercials, attracted a customer 40 miles from Baltimore, who paid $7,000 for a heifer and a bull.

SO. CALIF. NEWS AWARDS

Presented to 15

FIFTEEN trophy awards for radio and TV news coverage during 1951 were made by the Radio & Television News Club of Southern California June 24 at the Nickodell Restaurant, Hollywood.



Named consistently best in the respective radio categories were:

(1) Jim McCulla, KMPC, news presentation; (2) Chet Huntley, ABC, news commentary; Al Gordon, KFWB, special mention; (3) Cecil Hind, NBC, news writing (Mrs. Bettie Hind accepted the posthumous award for her husband who died June 11 [B•T, June 23]; (4) Cameron Cornell, CBS, special events coverage; KFWB, special mention; (5) Paul White, KFMB San Diego, news reporting for non-metropolitan station; (6) Sam Balter, KLAC, sports reporting.

Television division: (1) Glenn Hardy, KNBH, news presentation; (2) Wilfred Brown, KNBH, news writing; (3) Tom Harmon, KNXT, sports program; (4) KTLA, special events coverage; Clete Roberts, KLAC-TV, special mention, world coverage; Ed Murrow, CBS, special award, trans-continental news reporting; Richfield Oil Co., special award, Japanese Peace Treaty coverage.

N. BRUCE ASHBY (l), vice president for sales, Kingan Co., signs renewal contract for Kingan sponsorship of *King Arthur Godfrey & His Round Table*, over CBS Radio for 52 weeks [B•T, June 23]. John Karol, vice president for network sales, CBS Radio, witnesses signing.

ANTI-TRUST

WDAF-AM-TV and Star Records Subpenaed

POSSIBILITY of anti-trust action against the Kansas City Star Co. arose last week in the wake of subpena action involving records and contracts negotiated by the publisher for its newspaper and radio-TV holdings.

The firm was ordered to produce all corporate records and contracts of the *Star* and WDAF-AM-TV Kansas City, Mo. since Jan 1, 1926.

While officers in the Anti-Trust Div. of the Justice Dept. in both Kansas City and Washington declined comment, the *Star* management acknowledged the action is part of an investigation undertaken by the government.

The action probably would have little bearing on the operation of WDAF-AM-TV, according to H. Dean Fitzer, managing director of the *Star* stations. He said the stations are only one phase of the Kansas City Star Co. operation and that he had not heard officially of any possible anti-trust inquiry. He declined further comment.

The firm also publishes the *Kansas City Times*. In its statement the company noted that the subpena action followed a recent opinion of a U. S. district court in New Orleans against the morning *Times-Picayune* and *Evening States*. The court upheld certain charges and dismissed others in ruling on a complaint charging Times-Picayune Publishing Co. with an attempt to monopolize advertising through combination unit rates.

Roy A. Roberts, president of the Kansas City Star Co. and publisher of the *Star*, told BROADCASTING • TELECASTING that the management would stand on its initial statement until the company learns what, if any, charges are lodged.

'Nothing to Conceal'

The *Star* management said it had "nothing to conceal in its business practices" and that its "record of service to this community for nearly three-quarters of a century speaks for itself."

Mr. Roberts said no practice of combination rates between any of the two newspapers and the radio-TV properties is involved. Noting the New Orleans decision, he said there are 173 U. S. newspapers which use the practice whereby advertisers buy space in two newspapers under the same ownership in the same city.

He said attorneys for the company would confer with the Justice Dept. during July to ascertain the nature of the inquiry and produce the requested data for a federal grand jury.

The subpena called for all corporate records; all contracts signed by the publishing firm, including those of WDAF-AM-TV; pacts for news services and features, and all advertising contracts for the past 26 years.

WDAF has been on the air since 1922 and WDAF-TV since 1949. The TV outlet formally opened its new $1.5 million plant facilities the past fortnight, with leading local and national figures participating in the ceremonies [B•T, June 23].

Practice of offering unit rates to advertisers in jointly-owned newspapers has been a common practice in the publishing industry. The New Orleans district court ruled against the Times-Picayune Publishing Co. May 26 in a decision which it since promised to appeal. The publishing company is the licensee of WTPS-AM-FM New Orleans.

The court held a complaint filed by the *New Orleans Item* that the defendants "attempted to monopolize that segment of the afternoon newspaper general and classified advertising field which was represented by those advertisers who also required morning newspaper space and who could not because of budgetary limitations or financial inability purchase space in both afternoon [*States and Item*] newspapers."

'Lorain Journal' Case

The court cited the Lorain Journal Co. case on "attempt to monopolize." The U. S. Supreme Court had upheld a district court ruling that the *Lorain* (Ohio) *Journal* violated anti-trust laws by refusing to sell advertising to local advertisers who bought time on WEOL Elyria, Ohio. Similar practices were attributed to the *Mansfield Journal* against WMAN Mansfield [B•T, Dec. 17; Oct. 22, 1, 1951]. Defendants were charged by the district court with an "attempt to destroy" WEOL.

The New Orleans district court noted that in the *Lorain Journal* case it was held "not necessary to show that success rewarded appellant's attempt to monopolize" and that the Sherman Anti-Trust Act must be directed "against (the) dangerous probability as well as against the completed result."

KENNETT APPOINTED

Manager of MBS Station Div.

APPOINTMENT of Robert L. Kennett, identified with radio for more than 20 years, as manager of the Southern Division of Mutual's station relations department was announced last week by Earl M. Johnson, station relations vice president.

Mr. Kennett, who has been serving as general manager of WICC Bridgeport, formerly was associated with WLW Cincinnati, WHAS Louisville, WONS Hartford, and CBS in New York. At Mutual he will be directly responsible for supervision of network relations with all MBS affiliates in North and South Carolina, Georgia, Florida, Tennessee, Alabama, Mississippi, Louisiana and Arkansas.

Deceptive Ads

TOTAL of 1,345 radio and periodical advertisements were set aside during May for further study, the Federal Trade Commission said in its monthly report released June 20. The continuities were not broken down by media. Out of 922 ads referred to FTC's Bureau of Antideceptive Practices, 850 were channeled to the investigation division. Bureau of Industry Cooperation received five advertisements and the general counsel's office 418. FTC makes a "continuing" survey of current advertising.

Strictly Business

(Continued from page 14)

advertising. Mr. Ferguson convinced him that since he was selling a service, radio was his best medium.

At that time, movers for the most part advertised only in the summer and autumn, the period during which most persons are in need of the service.

Mr. Smith, however, agreed with Mr. Ferguson's suggestion that radio advertising be used all year around. Mr. Ferguson pays tribute to Mr. Smith as a "man of vision."

From a business volume of $260,000 in 1942, the Smith Transfer & Storage Co. business mushroomed to $1,160,000 in 1947.

"That was during the war years," Mr. Smith pointed out, "when everybody, it seemed, was moving."

He added that when the war was over, he resisted the temptation to reduce his advertising and he's happy he stuck by radio. "Today, I'm glad to say that we've kept business around that figure. Last year we did $1,360,000."

At the outset, in 1943, Mr. Smith bought about $10,000 worth of radio spots. Repetition of that whispered slogan was the well-advised aim.

Mr. Smith now spends about $5,000 a month in all media, of which about $2,000 is spent for radio, about $1,800 in television.

Shortly, Mr. Smith said, he is going to drop TV for the summer and put that money into additional radio. He feels that too many persons spend evenings out-of-doors to justify the summer use of TV but he said that he plans to return to video in the fall.

One of those rare individuals, a native Washingtonian, Mr. Smith was born just four days before Christmas, 1883.

In Washington, he "managed" to advance to high school, although his mind dwelt more on his favorite hobby—business—than it did on school texts. As a boy, he had sold flavored ice "snowballs" for a penny each, and later had a neighborhood concession for selling guinea pigs.

At 18, he convinced his father, the late Clarendon Smith, that he was cut out to be a salesman. This ended his formal education—Mr. Smith points out that this was one of the worst mistakes he ever made.

Forty-three years ago, Mr. Smith began his moving business with a horse and wagon. Growth was steady but not rapid until he began using radio. Today he has $1 million in property, including a fleet of moving vans. There are 150 employes in the Smith firm, some with 35 years company records.

Obviously proud of the company's reputation as a mover of diplomats and high officialdom, Mr. Smith still gets a kick out of the request which came from President Woodrow Wilson to move him out of the White House in 1921.

Mr. Smith has personally organized 45 different organizations and has been president of 56 organizations—charitable, social, political, religious and military.

He is most proud of his part in establishing the Truman-Barkley Club in the District of Columbia. From this area, the club quickly spread to 28 states.

Firm Truman Supporters

When President Truman returned from his long campaign trips just 10 days before the 1948 election, many Democrats had given up the ghost. Not Mr. Smith and his small band of followers.

Although the President was weary, he still had time to make one phone call that evening. In essence, he said, "Mr. Smith, I will never forget what you and your group did for me today. I want to say that I appreciate your faith in me. . . ."

Mr. Truman has not forgotten, and Mr. Smith is a frequent White House visitor. A side-line of Mr. Smith's is match-making. He claims to have matched 167 couples who now are married.

"I thought Margaret Truman was going to make it 168," said Mr. Smith, "but things didn't work out. However, she said to me, 'Don't give up on me, Mr. Smith.'" To which he replied, "I won't, Miss Margaret."

Perhaps his penchant for match-making may be traced to his own happy marriage. In 1907, Mr. Smith married the lovely Elizabeth Toulson, after what he terms a five-year *selling* job. The Smiths have two children, and five grandchildren.

At the age of 69, when most men are thinking of retiring, Mr. Smith has retained his youthful exuberance. He is constantly looking for ways to improve and expand his business.

Needless to say, radio advertising is taken for granted in his future plans. That slogan has won him friends and acquaintances in all walks of Washington life.

Only last week, Mr. Smith said, at a White House reception, a naval officer seated next to him leaned over and whispered, "Don't Make a Move. . . ."

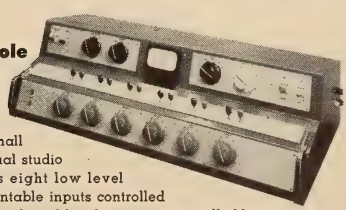
FOUNDED 1912

WITH EFFICIENT NEW ALTEC CONSOLES



The Altec 250A and 230B consoles represent a new quality standard for speech input equipment. Their frequency response, noise level and low distortion more than meet the most stringent broadcast requirements. They are compact and *completely* self-contained, without external power supplies, junction boxes or other equipment. Flexibility, compactness, accessibility and ease of operation are just a few of the outstanding features of these new consoles.

250A console For the ultimate in quality control the 250A Console is the finest unit ever made for AM, FM or TV studio use. Its compactness is made possible by the use of newly designed miniature plug-in preamplifiers, line amplifiers and power supplies. The preamps are only 1⅝"x4¼"x9". The line amplifiers and power supplies are 2⅜"x4¼"x9". You will find that the new Altec 250A Console leads to better control, more economical operation.

Frequency Response (± 1 db 20-20,000 cycles)
Very low distortion
Very low noise level
As many as 12 balanced line mike inputs (mix 7 simultaneously)
4 line inputs } (mix 4 simultaneously)
4 utility inputs }
Miniature plug-in amplifiers and power supplies
Color coded controls according to function
Two output channels with illuminated VU meters
Complete patching panel
Only two amplifier types, three tube types
Built-in tube checking facilities
Compact (36" x 31" x 55" including desk)

230B console

The 230B is the ideal console for small station or individual studio operation. It has eight low level microphone or turntable inputs controlled by four mixing controls and four line inputs controlled by two mixers. Its low height (9⅜") provides maximum studio visibility. The controls are color coded and all parts are readily accessible. No other console in its price range offers as much as the Altec 230B.

COLUMBIA PA

Scope!

On the Pacific Coast, sales areas are vast . . . statistics astronomical. And the population (15,302,000) scattered over the area like stars over the sky. You need a medium of unusual scope and power to cover it all. You need *radio!*

Radio—and only radio—sells all of the Coast at one time. Most of your West Coast customers live and shop in the broad coastal and valley area. Many, too, live in the country . . . far away from shopping. To sell them *all* at one time, you must tell your story to the whole Coast.

Columbia Pacific Network has the combination of high-powered stations in strategic locations needed to blanket metropolitan and rural areas at the same time. Columbia Pacific covers an area where 95% of the Coast's population is located . . . where 94.6% of the Coast's retail sales are made. Only Columbia Pacific has power where the people are!

And Columbia Pacific constantly delivers the Coast's biggest audience, with higher average ratings than any other regional network on the Coast.

Advertisers with vision see beyond the claims of partial-coverage media. They know from observation (and past experience) that the sky's the limit for sales when they penetrate the *entire* West Coast via . . .

Frieda's Follow-Through

WE CANNOT help but admire the indomitable charity of Emerson Radio & Phonograph Corp. in announcing last week a grant of $100,000 to educational television, at virtually the same moment it advised stockholders that dividends would be cut from the customary 35 cents to a dime.

Such corporate selflessness would deserve more than mere admiration, perhaps outright worship, if it were not for the fact that it had come at the persuasion of one of the most successful political fund raisers produced by (and still producing for) the New Deal.

FCC Comr. Frieda B. Hennock largely owes her present job to her unstinting work raising campaign funds for the Democratic Party before she became a Commissioner and owes her present political prestige to her one-woman crusade for the reservation of television channels for non-commercial educational use.

In furtherance of her educational television project, which, if realized, would become her own monument, she has fallen back on her earlier accomplishments. She has set out to find the money with which to finance the erection of stations. It was she who encouraged Benjamin Abrams, president of Emerson, to drop the first dime in the hat.

In so doing, Mr. Abrams received commendation from no less a personality than the President of the United States who thoughtfully, if at the obvious prompting of Miss Hennock, dispatched a telegram congratulating Mr. Abrams and hoping other industrial leaders would follow suit.

One must assume that Miss Hennock was not disassociated either from the President's decision to call in the full membership of the FCC last week and urge his Commissioners to advance educational television with all their resources.

Mr. Truman reportedly told the Commissioners he was hopeful that such philanthropies as the Ford and Carnegie Foundations would elect to provide the necessary funds.

The timing of these events is interesting. As reported some time ago in this publication, the board of trustees of the Ford Foundation meets July 15-16 to consider a host of requests for grants to non-commercial, educational television stations.

It would be a much less experienced fund raiser than Miss Hennock who failed to realize that Presidential wishes carry more weight than those of most men, especially when they are connected with a project bearing the appealing name of education.

However successful Miss Hennock's present fund raising efforts, it must be kept in mind that there is more to television than simply getting stations on the air. Not by wildest imagination can it be hoped that more than a few stations will be built—even with the substantial support of large philanthropies—and once built, operate effectively without vastly greater funds.

It is with the necessity of assuring a continuity of income that Miss Hennock and her associates must concern themselves.

In his news release announcing his company's donation, Emerson's President Abrams last week pointed out that educational stations would undoubtedly broadcast some network programs. This would seem to be a prelude to the next step in the planning which is to change such stations from a non-commercial to non-profit basis.

The inherent inequity of that kind of status has been pointed out in this journal before.

Money troubles for educational television do not stop with the financing of construction. They will be perpetual. The thing to watch for and to stop when it comes is the probably inevitable proposal for non-profit operation.

NOT TO disparage the generosity of Emerson Radio & Phonograph Corp., realism compels us to mention that the $10,000 which that company proposes to give to each of the first 10 educational stations going into operation would be about one twenty-fifth of the cost of putting a modest station on the air. A hundred thousand dollars is a lot of money, but it is only a drop in the bucket when television economics are involved. It shows how wholly unrealistic is the concept of non-commercial, educational television and how impossible of realization on anything like a national scale.

The ABC's of ABC

THIS WEEK the FCC must make a fateful decision. It involves the survival of ABC as a network.

The FCC has before it the joint petition of ABC and United Paramount pleading for action on the proposed merger of the two companies. ABC confesses its radio and television operations could go under if it does not procure new capital to allow it to compete with other networks. It has operated for more than a year trying to cut expenses to meet income. It hasn't been able to program for the fall season. It admits the stigma of being moribund.

The FCC also has before it the opposition of its Broadcast Bureau to the petition for severance and early disposition. As we read this opposition, it is a virtual restatement of the issues involved in the hearing ordered last August. It doesn't take into consideration the testimony that has been adduced in almost continuous hearings since last January.

Now the FCC is duty-bound to ferret out the facts. But it cannot turn its back on practical considerations. There are some 300 affiliated stations involved—stations also confronted with an overall price war affecting the networks. The over-riding provision of the Communications Act is that the FCC must encourage the wider use of the spectrum for the public good. Certainly the strangulation of an enterprise through legalistic inaction does not conduce toward fulfillment of that mandate.

Great emphasis is placed upon the anti-trust aspect of the merger, evolving from the motion picture consent decree which brought the forced separation of Paramount Pictures from the exhibition houses, which became United Paramount. The parties went into the merger with their eyes open. They were willing to take their chances on anti-trust. The question here seems to be whether the sins of the parents should be visited on their offsprings.

Obviously, there is no "monopoly" involved in the fusion of a network now losing money, and a chain of theatre exhibition houses which, while admittedly in the forefront of that field, nevertheless has rigorous competition. If, by virtue of the union, violation of the anti-trust laws later appears to develop, the Department of Justice—not the FCC—is the authority to make the first move.

It is against this backdrop that the FCC this week must render judgment.

our respects to:

ARTHUR WILLIAM SCHARFELD

ARTHUR W. SCHARFELD, president of the Federal Communications Bar Assn., is a busy man these days.

As are other radio-TV lawyers in Washington, he is busy with clients seeking TV channels.

He already has filed three appeals to the U. S. Court of Appeals in behalf of clients who don't like the FCC's allocation plan.

This is in addition to his normal business of protecting and advising his regular radio clients.

As president of the FCBA, he is the leader among those who take a professional interest in the FCC's rules and procedures—and with the April 14 issuance of the final TV report, that organization is giving the report considered review. Some Washington legal practitioners do not like the final report while others have their own ideas on the procedures set up for processing TV applications.

Withal, Mr. Scharfeld likes to think of himself as a procrastinator.

Writing in the 25th anniversary yearbook of his Harvard U. class (1924), he had this to say of himself:

"During the recent 25 year interval, I have been continuously procrastinating and meeting deadlines as an accepted mode of life. I have often thought that I could get along with less procrastination, but my more lethargic disposition has always conquered that meritorious inclination."

Apparently this aptitude to dally started at an early age. In his freshman year at Harvard, young Scharfeld dabbled in what was then the roaring bull stock market of the '20s. He dabbled so assiduously, he ran $1,000 into $15,000 (on paper), to the detriment of his class attendance record.

His father, a responsible and serious-minded Cleveland businessman, arrived in Cambridge post-haste after receiving word from the dean that his son didn't seem to be happy at Harvard—he wasn't attending his classes.

A little probing and the secret came out. Stern father laid down an ultimatum: Quit the stock market or quit school. Young Scharfeld chose the former, and father returned home convinced he had saved his son from the damnation of stock market gambling.

But, young Scharfeld dallied, and was a week in arrears in acting on his promise. He went down to Boston's State St. finally to carry out his oath, found that his stock broker had been closed up as a bucket shop. Farewell, $15,000.

Many years later, Mr. Scharfeld was sent to Mexico on a case. This was when he was as-

ALAN C. TINDAL, president, WSPR Springfield, Mass., elected to board of directors of city's Orchestra Assn. . . . **JOHN D. SCHEUER**, operations assistant to general manager, WFIL-AM-TV Philadelphia, named chairman of public relations committee of central Philadelphia branch, American Red Cross.

Leaders in TWO of the Midwest's Richest Markets!

KMTV-OMAHA
54% Saturation in a Billion Dollar Market

KMTV advertisers get top coverage in the rich Omaha area. More than ¾ million people living in the area have an effective buying income over a Billion Dollars. Pulse figures for the week of April 13, 1952 show that KMTV leads in 68 out of 100 nighttime (6-11 PM) quarter-hours — Monday through Friday. Pulse also reveals that 4 of the top 5 multi-weekly shows and 4 of the top 5 once-a-week shows in the Omaha area are telecast by KMTV.

In addition, KMTV's 52-week rate protection plan provides for the guarantee of rates in effect up to 52 consecutive weeks from starting date of schedule. Advertisers can now make a more realistic year-round TV budget approach.

For the best in TV coverage of the rich Omaha area, contact Katz Agency or KMTV today.

2,779,531 Soil-Rich Midwesterners Live Within KMA's ½ MV Line

At last count, 2,779,531 predominantly-rural midwesterners lived within the KMA ½ Millivolt day-time contour area in Iowa, Nebraska, Missouri and Kansas. That's a market greater than Iowa, Washington State, Oklahoma or Colorado and Nebraska combined!

They're America's top-spending farm market! In 1950 these KMA-Landers spent $2,819,660,000 for goods and services-a figure surpassed only by a handful of metropolitan markets!

Here is the BIG farm market . . . served by the 5,000 powerful watts of KMA — The Midwest's TOP Farm Station. IF YOU sell products or services in the rural and small town midwest, then YOU BELONG on KMA! Contact Avery-Knodel or KMA today.

RCA SCHOLARSHIPS

Revised Program Announced

AN EXPANDED and revised scholarship program offered by RCA for the 1952-1953 academic year will include 14 post-graduate fellowships and 19 scholarships, Dr. C. B. Jolliffe, RCA's vice president and technical director, announced last week.

Total amount of the awards will be $53,000, according to Dr. Jolliffe. This means seven new scholarships and one new fellowship will be made available to deserving young engineers and scientists, it was pointed out.

The revised program includes the award of the David Sarnoff Fellowship, established in honor of the RCA board chairman, for predoctoral students of electrical engineering at New York U. Other RCA fellowships, for which an annual grant of $2,700 is made to each university, are available for graduate students at California Institute of Technology, Columbia U., Cornell U., Princeton U. and the U. of Illinois.

The program also establishes the Frank M. Folsom Scholarship at the U. of Notre Dame in honor of the president of RCA and the Charles B. Jolliffe Scholarship at West Virginia U. Each scholarship carries an annual stipend of $800.

NEW book dealing with psychosomatic medicine titled *Love, Emotions and Your Health* by Norman Ober, staff member of CBS Radio program writing division, has been published by the Modern Living Council, N. Y.

WMPS ELECTIONS

Krelstein, Rudner Promoted

ELECTION of Harold R. Krelstein as president, and William B. Rudner as vice president of WMPS Memphis, was announced last week following a board of directors meeting.

The board also elected Abe Plough, president of Plough Inc., owner of the station, to the newly-created post of chairman of the executive committee. Re-elected officers are Charles Harrelson, secretary-treasurer, and Volney Edwards, assistant secretary-treasurer.

Mr. Rudner

Mr. Krelstein

Mr. Krelstein, a former vice president, will continue as general manager. Mr. Rudner retains the duties of station director.

Also a vice president of Plough Inc., Mr. Krelstein joined WMPS in 1939. In 1940, he was made commercial manager. In 1943, he was promoted to vice president and general manager.

Mr. Rudner came to WMPS in 1946 as a salesman and in 1948 was made sales promotion and merchandising director. He became station director in 1950. His wife is the former Jocelyn Plough.

SUPPORT TO EDUCATORS

Given by Truman, Abrams

PRESIDENT TRUMAN has thrown his support behind the efforts of educators to build noncommercial TV stations.

Last week the President called members of the FCC to the White House for a conference on the educational TV problem.

In a second step, Mr. Truman congratulated Emerson Radio & Phonograph Corp. for its outright gift of $10,000 to each of the first 10 educational licensees to begin regular TV broadcasting, calling for support of educational TV "as a source of great hope for the future of our country."

Obviously concerned over the problem of financing of educational television outlets, the President told FCC members that private foundations might help stimulate the movement. He mentioned the Ford Foundation and recalled how the Carnegie Foundation had been instrumental in establishing libraries in many cities.

When the six FCC members left the Executive Offices, Chairman Paul A. Walker, acting as spokesman, said the President had shown deep interest in educational television outlets.

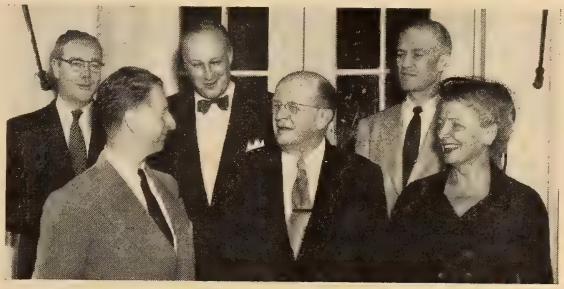
"He said he wants to see that the 242 channels allocated to educators are utilized and educational TV encouraged by the Commission and the President," Chairman Walker said. "We told him the Commission has allocated the channels. The frequencies are there but the educators have to build the stations."

Organizational Job

Comr. Frieda Hennock pointed out that an "organizational job must be done by the educators." She said the President had suggested that private foundations could help finance these projects and that he hoped the educational stations would last forever.

The President's wire to Benjamin Abrams, Emerson president, follows:

Congratulations on your contribution and support to educational television. The scientific marvel of television has already proved its worth in the fields of entertainment, news and sport events, and I hope will continue to grow in these fields. However, the basic element in American strength and progress has been its educational system. Therefore, I think it is important that an appropriation of our television facilities be devoted to education. This project is a source of great hope for the future of our country. I wish success to the efforts to carry forward this hope to reality.



Harry S. Truman

Comr. Hennock also lauded Emerson for its $100,000 grant. Her wire follows:

It has given me great pleasure to learn of your program to stimulate, encourage and assist the development of educational television. As the first member of the television industry to formally initiate such a policy you are acting in accordance with the highest concepts of the public interest. Moreover, such action is clearly in the best interests of that industry for it and educational television have much to give to one another. Emerson's initial program and its later implementation will play a significant role in bringing a substantial number of educational TV stations into early operation. I confidently believe that it will start a chain reaction that will inevitably lead to a widespread support for educational television among the receiver manufacturers and other industries in this country. For this, you deserve the gratitude not only of education but of those many millions of Americans who will in the future receive this highly beneficial TV service supplying them with the finest in education and culture in homes and classrooms. My congratulations at your forward looking and public spirited action.

Frieda B. Hennock
Commissioner, FCC

HYDE DEFENDS TV PLAN

Before VAB

FCC'S TV assignment plan, and accompanying rules, should bring "efficient handling of hearing cases and just determinations," Comr. Rosel H. Hyde told the membership of Virginia Assn. of Broadcasters Thursday, at their meeting at Old Point Comfort, Va. (see VAB story, page 30).

The issues will be simplified, Comr. Hyde said, "usually to comparative examination of applicants for the same channel in the same city. The number of participants will be limited and the costs in time and money vastly reduced from what would otherwise be expected."

The alternative would have been a vast hearing mess involving frightening complications, he contended, with danger of years of delay in bringing service to the public.

George C. Davis, engineering consultant, predicted reasonable interpretation of the TV allocation rules by the FCC would solve some of the problems. He discussed some of the difficulties facing the Commission along with technical problems inherent with TV.

Comr. Hyde defended FCC's allocation procedure, pointing to the types of VHF hearings and appeals that would have developed through the adoption of any other method. Taking the UHF band, he suggested detailed problems that would have arisen.

Supporting Factors

By any other method, he said, there would have been "a proceeding that was administratively unfeasible, economically wasteful and so demanding in time as to make the recent freeze appear as a brief interlude. . . . In my opinion, avoidance of this administrative morass alone would have been more than ample justification for the adoption of an allocation plan."

He listed other factors in support of the allocation as efficient use of the TV spectrum; protection of small communities in assignments; proper distribution and allocation of channels for noncommercial educational stations, and need of an orderly settlement of assignment problems along the borders.

Any one of these five elements made an assignment plan desirable and necessary, Comr. Hyde said. "All five of these basic factors made an assignment plan the only feasible method of proceeding," he said, adding, "No other more satisfactory method has been made known to us." He conceded that the assignment plan could have been improved had another year been devoted to its consideration, explaining, "We felt that it was more important to have a good plan immediately reflecting the record before us than a more perfect plan sometime in the indefinite future."

Because the TV "production line" had been stopped for a considerable period, he said, the Commission adopted "special rules" based on public need and demand with the objective of providing service "to

(Continued on page 83)

TOTAL number of television station applications filed with FCC since April 14 rose to 168 late last Thursday, with 59 new and amended applications filed during the week (see late story AT DEADLINE).

Actually, 62 applications were submitted to the Commission, but three had been filed once since mid-April and were merely resubmitted on the new forms.

There were 35 requests for VHF stations and 24 for UHF outlets. Thirty amended applications were tendered and 29 new ones were turned in. There was only one request by an existing station for a change in channel, required under the FCC Sixth Report and Order [B•T, April 14].

Westinghouse Radio Stations, which filed for two stations a fortnight ago, filed for two more—for Fort Wayne, Ind., and Philadelphia —last week. Both are for UHF stations.

Scripps-Howard's WNOX Knoxville filed for a TV station. The City of Jacksonville, which had a CP for a TV station at one time but lost the permit when the FCC concluded the city was taking too long to build, filed again. And the three Texas oil men who at one time owned three-fourths of KPHO-TV Phoenix, Ariz., and had control of KEYL (TV) San Antonio, Tex., applied for stations in New Orleans, Dallas, Houston and Corpus Christi. The trio is made up of R. L. Wheelock, W. L. Pickens and H. H. Coffield. Mr. Coffield's son, C. H. Coffield, also applied for a TV outlet last week. He seeks an Austin, Tex., station.

COLOR BAN

Partial Thaw Stirs Little Optimism

PARTIAL thaw of the government's freeze on manufacture of color-casting equipment last week raised little prospect in industry circles for any immediate progress in the color TV mass production market.

In a compromise gesture, the National Production Authority finally issued its amended regulation (M 90), permitting standard set-makers to apply for authority to produce home-type color receivers under certain conditions and exempting theatre, department store and other commercial equipment [B•T, May 12].

Thus, NPA hoped—and frankly conceded—that it would quiet charges that the government had banned the end product—color TV equipment.

The agency left the door ajar but so hedged its new order with an array of imposing obstacles as to continue preclusion of mass color TV set output and related equipment during the current emergency. Instances of approval would, indeed, be "exceptional," NPA acknowledged.

Highlights Listed

Highlights of the new directive:

● Manufacturers may apply for permission to turn out household colorcasting receivers, adapters and converters out of present materials providing they:

(1) Have made a "substantial" investment in color TV research and development.

(2) Don't divert key technicians and other engineering personnel from defense projects.

(3) Maintain military schedules and not refuse government contracts because of proposed colorcasting production.

(4) Use no additional amounts of steel, copper, aluminum, and other controlled materials.

● Manufacture of certain types of TV equipment—viz., the proposed Eidophor projection theatre system (which General Electric would make), is now exempt, as is equipment for closed circuit department store use.

● Manufacture of equipment for "experimental, defense, industrial and hospital or educational uses" still is exempt.

The amended regulation was viewed with mixed reaction in manufacturing and Congressional quarters as RCA once again took up the cudgels for its color TV system (see story page 54).

Sen. Edwin C. Johnson (D-Col.), most vociferous critic of the original order in Capital Hill, described the order as a "feeble step." He told BROADCASTING • TELECASTING:

"Unnecessary and uncalled for restrictions have been placed on the application of color television by this order." Obviously displeased with the order despite NPA's removal of the ban on the actual end product, he refused to discuss the order further beyond indicating he planned no direct action.

Paul Raibourn, president of Paramount Television Productions Inc. and vice president of Paramount Pictures Corp., stated:

"It's as well drawn as possible to prevent the manufacture of color television sets for the public and still withdraw from the position of control of the end product."

Dr. W. R. G. Baker, general manager of General Electric Co.'s Electronics Division, Syracuse, N. Y., declared:

If General Electric at this time were to gear up for mass production of color television receivers it would cause irreparable harm to important military production. In February I informed NPA that 75% of our engineers . . . are engaged on military projects and that commercial production of color television equipment would require the diversion of from 15% to 20% of these engineers from highly important military work. This situation remains unchanged today. We are entering the peak period of military electronics production. I feel it would not be, in these still uncertain times and for some months to come, in the best interests of our national security for General Electric to undertake production of color television receivers.

Prospect for any mass rush into home-type color TV production was viewed dimly by DuMont Labs., Motorola Inc., John Meck Industries, Hallicrafters, Admiral Corp. and other firms. They agreed mass-market color receivers are still from two to three years off.

Allen B. DuMont, president, Allen B. DuMont Labs., said: "This order won't change things at all at this time. No one is anxious to get into the field sequential system and it will be some time before the dot sequential system will be available for use."

RCA, Columbia's principal opponent in the color TV battle, had only a firm "no comment" on the NPA action.

Earl I. Sponable of 20th Century-Fox Film Corp., who headed the film company's work on Eidophor, said plans for manufacture of this large-screen color TV equipment have not reached a point where they can be publicly disclosed. He pointed out, however, that the company has an arrangement with General Electric for ultimate production of Eidophor equipment and that work is progressing on the refinements of techniques and on completion of designs for industrial uses.

CBS Statement

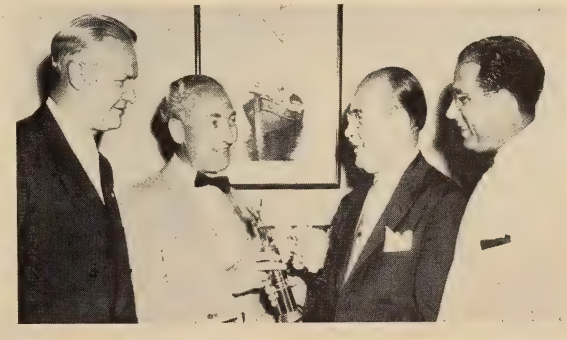
CBS Inc. said the order would have no affect on its "present operations or our plans for the future." CBS statement follows:

CBS-Columbia Inc., the CBS set manufacturing subsidiary, is now engaged in defense work and has plans for increased participation which will occupy fully all available technical and engineering personnel.

The NPA conditional authorization for color TV receivers manufacture applies only to those companies which have made a substantial investment in color television research and development. As NPA points out, few companies will be able to qualify. No single manufacturer or broadcaster, or even a small group, can make color television a living reality in the homes of the nation in the face of resistance or lack of cooperation from the majority of the industry.

CBS, almost singlehandedly, developed the system of color television which received official approval of the FCC, and this in spite of active or passive opposition from most of the large manufacturers of television equipment. We are not justified in extending at this time further manufacturing and broadcasting resources in this effort unless it appears that other substantial segments in the industry are prepared to go forward.

We will, however, continue active research efforts in the color field and give full support to the development of industrial, theatre, and other non-broadcast applications of color television.



NPA Administrator Henry H. Fowler said he does not anticipate that many applications will be filed, but NPA explained it will make a "careful investigation and determine there will be no interference with defense activities before approving production for a specific, limited period of time."

In announcing the amended order, Mr. Fowler said it "removes the only NPA restriction on the production of a specific type of end product — color television equipment—and substitutes a regulatory provision which is more consistent with NPA policy and the purposes of the Defense Production Act." Mr. Fowler also heads the Defense Production Administration, NPA's policy parent.

Mr. Fowler acknowledged that earlier criticism of the regulation was justified "on the grounds that it discriminated against companies devoted exclusively to the development of color television, and also interfered with the entry of new firms and new developments in the television industry."

Noting that the original order, in effect since last November, did

(Continued on page 54)

HENRY J. KAUFMAN (2d l), of Henry J. Kaufman & Assoc., Washington, receives the annual Creative Awards Trophy at the National Advertising Assn. Network convention at Skytop, Pa. [B•T, June 23]. At ceremony were (l to r) Harry Hoffman, Hoffman & York Inc., Milwaukee; Mr. Kaufman; Oakleigh R. French, of Oakleigh R. French & Assoc., St. Louis, and Bill Sigmund, of the Kaufman agency.

PROGRAM COSTS

Nielsen Reports Lower Level

WHILE critics decried spiralling program costs in television, several shows achieved a satisfactory level of low cost per thousand homes reached during the past winter season, according to the June issue of *Nielsen Newscast*. Bulletin is issued monthly by the Radio-TV Div. of A. C. Nielsen Co.

There were *Captain Video*, sponsored by General Foods Corp. across the board on Du Mont at 7-7:30 p.m., which Nielsen figures reached homes at $4.80 per thousand; *Strike It Rich*, Colgate-Palmolive-Peet sponsored program on CBS-TV, which got into a thousand homes for $3.75; *I Love Lucy*, Philip Morris' top-rating show on CBS-TV ($4.27); *Lone Ranger*, whose ABC-TV network was split between General Mills and American Bakeries ($6.72); *Howdy Doody*, performing for nine sponsors on NBC-TV ($2.69), and *Godfrey's Talent Scouts*, whose Lever Bros. Co. Lipton Tea plugs reached TV homes at $2.65 a thousand.

Morning televiewing across the country doubled from December to March, the Nielsen statisticians reported. Between 7 a m. and noon, the average TV set was used for 13 minutes a day in December, 27 minutes in March. Afternoon viewing also was up, from 1 hour and 6 minutes in December to 1 hour and 24 minutes in March.

Radio listening, meanwhile, held its own in the morning, averaging 55 minutes per home per day in both December and March. In the afternoons there was a slight increase in radio set use, from 1 hour, 13 minutes, in December to 1 hour, 17 minutes, in March.

Spraynet Campaign

HELENE CURTIS Industries, Chicago, will use TV spot to introduce its new Spraynet, placing of which will be contingent on product's distribution. Schedule is slated to start in Chicago, New York and Los Angeles. Agency is Russell M. Seeds, Chicago.

EIDOPHOR SEEN

N. Y. Demonstration Held

EIDOPHOR system of theatre color television won the commendation of observers last week at its first "public" demonstration in the U. S.

President Spyros P. Skouras of 20th Century-Fox Film Corp., which holds world rights to manufacture and distribution of Eidophor projectors, said it marks "a new era of prosperity for the motion picture industry."

The initial U. S. demonstration, held by 20th Century in New York on Wednesday and to be followed by 20 others by the middle of this week, consisted of a 30-minute live variety show witnessed by some 200 scientists, theatre owners, and newspapermen.

Compared to Technicolor

The results, in the opinion of observers, appeared to be approximately comparable with those of technicolor reproduction. Color reproduction was accepted as faithful, except for occasional "blooming" of strong colors upon nearby objects, and a tendency of facial tones to vary somewhat with changes in lighting. No color breakup was noticeable.

The Swiss-developed Eidophor system as demonstrated by 20th Century employs an adaptation of the CBS color TV process (field sequential system, but with standards different from those proposed by CBS for home color TV). But film company spokesmen said "it can be made to receive any type of TV signal either in black-and-white or in color. . . ."

The program originated from sound stages of Movietone News studios two blocks from the 20th Century home-office theatre where it was viewed. Mr. Skouras said that it was arranged with an eye toward showing the system's color capabilities and not as examples of theatre color TV shows.

But the features covered a wide range, including singers, dancers, chorus lines, a comedian, a dramatic sketch, a scene from "Faust," and a round of boxing. TV star Kyle McDonnell was mistress of ceremonies.

A 20th Century statement issued at the demonstration gave company thinking on Eidophor:

As now planned, Eidophor will be launched with a show built up for telecast in the same manner as stage shows are presented at the Music Hall and Roxy Theatres in New York today. Just as these shows are played in the theatre three or four times a day, they will be telecast for the exclusive theatre reception and used by each theatre according to its individual policy.

It is planned to telecast these shows from New York, for example, to cover the Eastern time zone. For the Central time zone, other or similar shows will be telecast from Chicago, or some other central location in that zone; from Denver to cover the Mountain time zone; and from Los Angeles or San Francisco to cover the Pacific time zone.

There can be a new show every week so that eventually there will be three, four or perhaps more shows telecasting every week to cover all theatres. In smaller towns, where theatres may have two changes or more a week, it will be possible for them to have different television shows for each change. . . .

Color Ban Thaw Stirs Little Optimism

(Continued from page 53)

not restrict color TV research and development, Mr. Fowler said that it prevented the utilization of the "practical results of research in products for general use."

The new order, he explained, "eliminates these objections, while affording protection against an all-out production of color television sets that could hinder defense production by drawing engineers away from even the most urgent military projects."

The regulation partly eliminates "objections" voiced by Paramount Pictures, of which Chromatic is a subsidiary, and 20th Century Fox Film Corp., which carried its case to NPA through the Motion Picture Assn. of America, Theatre Owners of America and National Exhibitors Theatre Television Committee.

Sen. Johnson, chairman of the powerful Senate Interstate & Foreign Commerce Committee, had sharply criticized the first order as an "unwarranted crippling blow" at color TV and an attempt to ban the end product.

Sen. Johnson has felt it "apparent . . . that Chromatic Television Labs or anyone else . . . could go ahead and manufacture color equipment so long as additional materials, other than those duly allocated, were not required. . . ."

It is the claim of Paramount-Chromatic that no greater quantities of materials would be needed to launch production of the Lawrence tri-color TV tube. Under the new order, Chromatic could file for authority to produce a receiver capable of receiving both color and monochrome TV [B•T, Jan. 27, 7]. Mr. Raibourn feels chromatic could meet all NPA requirements.

Paramount contends that any good-quality receiver can be modified to receive color and monochrome by inserting the Lawrence tube, adding an adapter and making minor circuitry changes. NPA officials said differential in materials for circuitry changes from monochrome would be a key factor in approval.

Materials Question Raised

With respect to Eidophor, 20th Century Fox Film Corp. has held that "little, if any, critical material, will be required for color projection over and above that now permitted for black and white theatre television." Progress in development and simplification of large screen projection equipment in the CBS-20th Century-GE system was extended further last week by private showings in New York (see story, this page).

Exemption of theatre TV was viewed as a victory by attorneys for MPAA, NETTC and TOA which had beseeched NPA not to impede this "growing industry" with prohibitions intended for home-type color sets.

Mr. Fowler also recalled that at the second industry-government conference last winter [B•T, Feb. 11, et seq.], manufacturing representatives stated they are heavily engaged in defense work and felt broadcasters are not disposed or prepared to offer color TV programs. Color TV was blacked out for the duration last fall following the first conference [B•T, Nov 26, Oct 29, 22, 1951].

NPA has been under fire in recent months to amend the original order by exempting theatre TV interests and clarifying other provisions. The Defense Dept. has strongly supported retention of the order in its present form or, if amended, maintenance of the ban on mass production in the interest of keeping vital technical help on military contracts.

Thus, NPA last Tuesday issued a revised M 90 with the hope of satisfying theatre TV, Paramount, Defense Dept. and Congressional critics.

Mr. Fowler of NPA frankly expects few standard black and white set makers to qualify for permission to make home-type color sets, under the rigid reservations imposed by the NPA, and approval in any case would be "exceptional," he conceded.

The engineering factor has transcended that of scarce materials since Nov. 20, 1951, when the order first went into effect. At that time materials were acutely short; now, however, while the shortage has somewhat abated, scarcity of electronic engineers and technicians has become more aggravated. This condition is expected to continue for another two years, NPA said.

Industry's requirements for engineers and other skilled personnel have mounted substantially, with a number of firms reporting assignment of up to 90% of their staffs to defense projects. Part of this is attributable to greater needs for complex military electronic products.

To meet this condition, manufacturers would be prohibited from diverting electronic technicians, design engineers, draftsmen, professional engineers, physicists or tool and die makers to civilian color TV pursuits. "Technicians" group includes all but those concerned with service-repair of broadcast-receiver equipment.

Firms applying for permission must file with NPA on NPAF-207. Approval would cover only certain specified periods and applies to activities involving "production and assembly of home-type television sets" and "attachments and parts" designed to facilitate color TV reception.

There was another indication that manufacturers intend to concentrate on black-and-white set production. For one thing, the government has taken steps which virtually exempt all but the larger companies from controls over copper and aluminum.

RCA COLOR TEST

Waits on FCC Approval

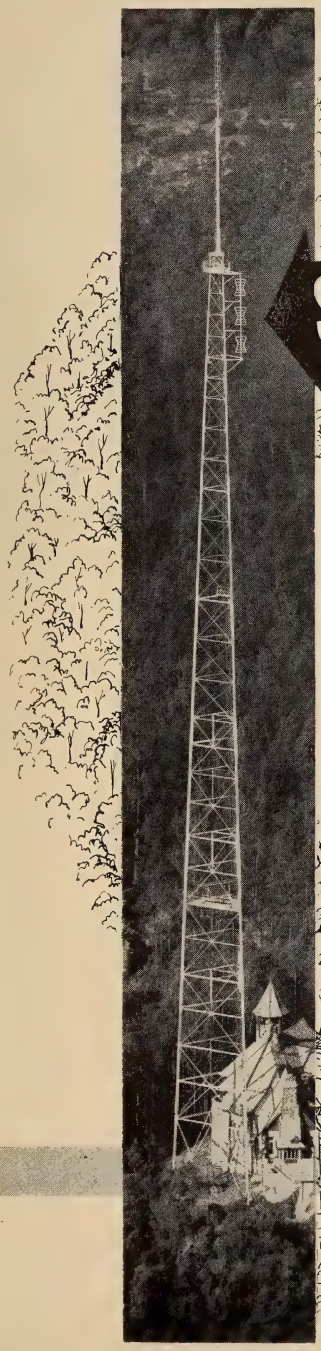
RCA is prepared to conduct extensive field experiments with its "compatible color television system and tri-color tube" but thus far has only a vague indication that FCC might permit it. The Commission previously had turned down similar requests of Philco, General Electric Co. and others.

In an exchange of RCA-FCC correspondence, made public Wednesday by the Commission, RCA disclosed it wanted to carry out on-the-air color tests during broadcast hour (see color equipment story, page 53).

FCC, in reply to a letter sent to Chairman Paul A. Walker by Dr. C. B. Jolliffe, RCA vice president and technical director, said the Commission "up until now maintained a strict policy against permitting experimentation with compatible color television systems during broadcasting hours."

The Commission said it believed "in general" the policy "ought to be maintained" but recognized "that deviations from this policy will be necessary on occasion in order to permit full scale experimentation and field testing."

FCC Reply



In its reply, FCC said it will consider "on a case to case basis applications for experimental authorization during regular broadcast hours upon a showing that such experimentation is necessary in light of the individual field tests contemplated. Any such application must describe in detail the nature of the field test and state exactly why such field tests cannot be accomplished at other than regular broadcast hours."

The RCA letter had set out reasons for the desire to conduct tests during broadcast hours. RCA explained regular WNBT (TV) broadcasts start at 7 a.m. five mornings a week, at 9 a.m. Saturday and 9:30 a.m. Sunday, never ending until after midnight. This "seriously hampers and delays the required testing" of its color experiments, RCA noted.

Work on the color system has now reached a point "where extensive field testing and work on-the-air under regular broadcast conditions is required" if an application to set standards for a compatible system is not to be delayed, according to RCA.

Early morning tests do not permit comparative broadcasts with monochrome standards, RCA pointed out, and a representative number of viewers in different locations under varying conditions cannot be obtained. Besides, RCA added, time restrictions place a severe physical burden on personnel.

The RCA letter cited FCC actions setting standards for the "incompatible field sequential system" and that it did not close the door to further tests. It added that the FCC had restricted color tests during regular broadcast hours.

ONE DIRECTION FORWARD IS STRAIGHT UP!

And up goes the antenna height for San Francisco's pioneer television station, KPIX ... up atop Mt. Sutro ... up from 630 to 1350 feet above sea level, adding 1680 square land miles to its Channel 5 viewing area, giving KPIX viewers Northern California's top TV reception quality.

To make this assurance doubly sure, KPIX telecasting will now be powered by a great, new G-E transmitter.

The utilization of this new equipment on July 1 marks another step in the program of progress undertaken by KPIX with the construction of the West's finest TV studio building, completed last February.

FLA. FILM BID

Would Lure Producers

GOV. FULLER WARREN of Florida served notice yesterday (Sunday) that Florida plans to buck Hollywood and New York for a major slice of the growing film industry.

In a directive to Walter Keyes, executive head of the Florida Improvement Commission, Gov. Warren said that a strong bid must be made in presenting Florida's advantages to the large and small producers who make motion pictures for theatre and television showing.

Gov. Warren recalled in the directive that Florida tried to attract the film industry as far back as 1933 when its citizens voted a constitutional amendment exempting such investors from all property taxes. Though such exemptions have since expired, Gov. Warren indicated that additional tax concessions could be legislated to lure segments of the industry to Florida.

He noted that Florida's constitution prohibits certain business taxes and its equitable property taxes with homestead exemptions would appeal to entertainers and film production personnel.

FILMED PITCH

Made for KRON-TV by F&P

WHAT was said to be the first 16mm sound-on-film presentation of a television station's programming and talent personalities is now being shown to New York agency account and media personnel by Free & Peters, according to John W. Brooke, eastern television sales manager.

The film was produced for the *San Francisco Chronicle's* KRON-TV by Don Flagg Productions. It stresses the theme, "You Will Sell More on Channel 4 Because Your Customers See More on Channel 4." Free & Peters is KRON-TV's national sales representative.

REED NAMED

Heads JCET Field Program

PAUL C. REED, consultant for visual and radio education, Rochester Public Schools, has been appointed assistant director of the Joint Committee on Educational Television. He will head the JCET field service program. The appointment was announced last week by Ralph Steetle, JCET executive director. Mr. Reed is on one year's leave of absence from his Rochester post and will headquarter with JCET in Washington.

With JCET, Mr. Reed will administer an extensive TV consultant service. He will assign specialists in programming, engineering, communications law and administration to conduct exploratory discussions with educational groups who plan to utilize the TV channels reserved for educators by FCC in its Sixth Report [B•T, April 14]. JCET presented education's case for channel reservations during the allocation proceeding.

WELCOME is given by Charles H. Crutchfield (r), WBT and WBTV (TV) Charlotte, N. C., general manager, to George Delios, former program manager for Greek Radio Institute of Salonika. Mr. Delios was a guest of WBT under auspices of the State Dept.'s exchange program. Mr. Crutchfield had been in Greece on a State Dept. mission.

MIAMI U. GRANT

For Study of TV in Elections

CROSLEY Broadcasting Corp., Cincinnati, has awarded a $10,000 grant to Miami U., Oxford, Ohio, for a study of television's role in the 1952 elections.

The grant was arranged by James D. Shouse, Crosley board chairman, and was made to the marketing department of Miami's School of Business Administration. That department will work out the study under the direction of Dr. Joseph C. Seibert, department head.

Dr. Seibert said that Crosley, aware of the obligation of the television industry to determine the extent of television influence, enlisted the aid of the university. A preliminary report is scheduled for January and a final report will be made next June.

This is the third annual grant made by Crosley in its educational program. The U. of Cincinnati and Xavier U. in Cincinnati have received research grants in the past two years.

Crosley owns WLW and associated TV and FM stations in Cincinnati, TV and FM station in both Dayton and Columbus, and WINS New York.

CD THEATRE SHOWING

Officials Highly Pleased

CLOSED CIRCUIT theatre TV demonstration beamed by the Federal Civil Defense Administration for over 15,000 policemen in 10 U. S. cities came off last Thursday without a hitch. Agency authorities said they were highly pleased with audience reaction thus far.

The one-hour program originated in the studios of WMAL-TV Washington and was sent out by microwave and cable to theatres in Boston, New York, Baltimore, Philadelphia, Pittsburgh, Cleveland, Toledo, Detroit, Chicago and Milwaukee [B•T, June 23].

Candidate for TV

PRESIDENTIAL candidate or not, Gov. Adlai Stevenson of Illinois, part owner of Sangamon Valley Television Corp. (WTAX - AM - FM Springfield), is the first political "hopeful" to become a TV applicant. The Governor is 2.5% owner of Sangamon, applicant for VHF Channel 2 in Springfield. Additionally, Max O'Rell Truitt, son-in-law of Vice President Alben Barkley, is shown as 8% owner in the Eastern Radio Corp. (WHUM Reading, Pa.), applicant for UHF Channel 55 in that city.

MOVIE TV HEARING

MPAA, ANE Asks Fall Date

THEATRE television interests last week asked FCC to quit putting off the long-delayed hearing on their application for sanction of service.

The case was first set for hearing nearly 2½ years ago, it is pointed out in a joint petition filed by Motion Picture Assn. of America and National Exhibitors Theatre Television Committee. Continuances have come at frequent intervals, with the latest date for hearing set at Jan. 12, 1953.

Theatre interests have suffered a "heavy burden," the petition states, having repeatedly prepared to meet each hearing date by readying witnesses and material. The Commission is asked to assign a minimum period of eight hearing days in the autumn, with Oct. 13 or 20 suggested as a starting date.

FILM GRID SERIES

Sportsvision Gets PCC Rights

SPORTSVISION Inc., Hollywood, announced last week it will produce five football games a week, on film, for television this fall. One of the films—*National Game of the Week*—will be a coast-to-coast presentation, the company said.

Others to be filmed are the *Big Ten Game of the Week, the Big Seven Game of the Week* and the *Pacific Coast Games of the Week.* The latter will be shown in six western television markets.

The firm, a spokesman said, has been selected by member schools of the Pacific Coast Conference to act as their exclusive representatives for the sale and production of all "live" television and film television rights and programs during the academic year 1952-1953.

WBAP-TV Prepares

WBAP-TV Fort Worth is completing last-minute details toward bringing area viewers their first "live" network programs tomorrow (Tuesday). A crew of technicians have installed a 6x8' reflector screen some 275' above the ground on the station's 502' antenna as part of temporary signal channeling arrangement.

NCAA RIGHTS

Awarded to NBC-TV For '52

TELECASTING rights to the 1952 college football program as set up by the National Collegiate Athletic Assn. [B•T, June 9], have been awarded to NBC-TV, the NCAA Television Committee announced Thursday.

Twelve major college gridiron contests will be broadcast during the season—on 11 successive Saturday afternoons starting Sept. 20 and ending on Thanksgiving Day. There also will be "a comprehensive offering of small college games, to be presented locally."

Selection of the games to be telecast each week will be the responsibility of NBC-TV, presumably with the aid of the sponsor or sponsors of the series and their advertising agencies. NBC-TV will also negotiate for the rights to those games directly with the colleges. Cities will not be blacked out as they were last year.

Three Days Negotiating

Award of the NCAA telecasts to NBC-TV came at the conclusion of three days of negotiations between TV networks, advertisers and advertising agencies and the NCAA TV committee. Basis was NBC-TV's proposed geographical coverage, its facilities and its projected program for informing the public about the colleges and their educational and athletic activities.

Bob Hall, director of athletics of Yale U., chairman of the committee, in a letter to Joseph H. McConnell, NBC president, stated:

The NBC proposal was the most complete and comprehensive of all the bids we received. . . . The public will not only see the finest of football fare, but through the great medium of television will be informed . . . of the values which are inherent in the college educational and athletic programs. We are completely convinced that NBC will do the job.

Details of NBC-TV's plan were not divulged by neither the committee nor the network, which under the NCAA plan could not begin negotiating with any college or university until after its acceptance by the committee. Tom Gallery, director of sports for NBC-TV, who, with Davidson Taylor, general executive, carried on the network's negotiations with NCAA, said that he has already started contacting colleges to arrange the TV schedule.

NBC-TV now must also start looking for a sponsor for the 12 major and many minor gridiron telecasts. Last year, when NBC-TV carried the NCAA season, the 19 games included were sponsored by Westinghouse Electric Co., at a reported $633,142 cost. Westinghouse this year is sponsoring a summer-fall political series on CBS-TV starting with the political conventions and culminating with election night and thus presumably not in the market for another fall football TV schedule.

Program Survey Made By Research Foundation

(Report 222)

SELECTION of "The Top Ten of TV" by the National Foundation for Psychological Research in an effort to combat proposed Congressional censorship of television was announced last week by Dr. Mason Rose, foundation's head.

Dr. Rose said his organization had conducted a survey among thousands of TV viewers with this conclusion: "These top ten programs clearly demonstrate that none of them can be classed among what certain congressmen have declared 'objectionable and in bad taste.'"

The ten shows selected were:

Best dramatic show (live)—*Studio One*, CBS-TV.

Best dramatic show (filmed)—*Rebound*, a Bing Crosby Enterprises series, ABC-TV.

Best musical show—*The Dinah Shore Show*, NBC-TV.

Best situation comedy show—*I Love Lucy*, a Desilu Production, CBS-TV.

Best children's program—*Kukla, Fran & Ollie*, NBC-TV.

Best news show—Edward R. Murrow's *See It Now*, CBS-TV.

Best variety program—*The Ken Murray Show*, CBS-TV.

Best daytime show — *The Garry Moore Show*, CBS-TV.

Best audience participation program—Groucho Marx's *You Bet Your Life*, a Filmcraft Production, NBC-TV.

"To censor an entertainment medium where the widest segment of the public has selected these stars and attractions as their regular listening fare would be adding a fifth wheel to the statute books," Dr. Rose stated.

* * *

Meck Sees Boxing As TV's Best Salesman

BOXING MATCHES on TV are the medium's best salesmen, according to John S. Meck, president of Scott Radio Labs., Chicago. He said orders for home demonstrations of sets are 75% higher on Wednesdays, when a favorite bout is telecast weekly, than on any other day of the week. Second best day is Friday, he said, when boxing matches again are shown. "Seeing events while they are happening is the biggest appeal of television, and the chance to be there when something important is happening is the greatest motivation to get the set," Mr. Meck said.

* * *

'Personality' Best For Effective Commercials

USE of a personality to deliver the sales message was concluded to be the most effective method of television program advertising in a study by a U. of Syracuse student.

J. Daniel Logan, for his master's thesis at the university's Radio & Television Center, chose as his topic, "A Study of the Effectiveness of Program Commercial Announcements on Television."

Using personal interview methods, Mr. Logan attempted to learn what types of programs and commercials were most effective regarding sponsor identification and association.

Mr. Logan concluded also from his study that popularity rating is no indication of commercial retention or program-sponsor association.

* * *

Survey on 'Pitchmen' Made by Hilton & Riggo

A STUDY made by Hilton & Riggio, New York agency, revealed last week that practically all television mail order merchandise sold by "pitchmen" is sold on a C.O.D. basis. In addition, 85% of the ordering is done by telephone and 15% by mail, the report revealed.

Normally about 10% of the C.O.D. orders are returned, the survey also showed. It reported that the "live pitch" is more successful than the filmed commercial.

The survey also pointed out that "A" time (6 to 10 p.m.) is too expensive for this type of advertising and late afternoon or 10 p.m. to sign off time is preferred. Advertisers know results in four hours, the agency stated.

Rockhold delivers a real rural market on "Farmers Guide"

Here's a friendly farm show that rounds out WHIO-TV's full schedule of diversified programming. "Farmers Guide" is aimed at the big* rural audience here every weekday—and it's aimed just right (12:15 to 12:30 p.m.). Joe Rockhold handles the show right, too—and he's got the right background for it. He's been doing farm broadcasts for the last 22 years.

A typical show gives the farmer up-to-the-minute livestock, poultry and egg prices from Dayton, Columbus and Cincinnati—helpful tips from the county home demonstration agent—interviews with one of the 8 county agents (who jump at the chance to appear) or other interesting guests. Rockhold's plans for future shows include special features for women and coverage for every fair held in 8 different counties.

"Farmers Guide" ties in with the Future Farmers of America, the 4-H Club and similar organizations, too. It's an all-round rural program with time enough for 3 participating sponsors. If you've got a message for rural delivery—give it to Rockhold. George P. Hollingbery, our national representative, can make all the arrangements.

*An Ohio State University survey shows that *75%* of the farmers in this rich, rural area own television sets.

Left to Right: Dick Ruppert, associate adviser of the 4-H Club; John Mowbray, Warren County agricultural agent (growing a beard for a sesqui-centennial celebration), Joe Rockhold, WHIO-TV farm director; Alfred Fedders, president of the 4-H Club, and A. T. Easton, 4-H Club adviser.

*Mr. Theodore F. Shaker of Chicago, or Mr. John A. Schneider or Frank Shakespeare, Jr., of New York . . . or—for that matter—our Messrs. A. through Z.

Our Mr. S has just been where you're going*

You can make an expedition out of finding the right TV spots. But the easiest way—and the best—is to talk with our Mr. S.

For he travels farther than anyone to keep up with seven of your top markets. And does it more frequently, too.

In the last six months, for instance, every one of our account men has made at least one complete tour of all seven markets.

Our Mr. S. has brought back the most first-hand facts on these markets you'll find in captivity. He has an on-the-spot perspective which no one else can give you.

And when he recommends a TV spot, you can be sure that your product will be in the right place at the right time.

You'll climb the highest sales curve with Mr. S. as your guide. When you plan your next campaign, he'd be pleased to help you.

Studio location: Corner of Government & Maximilian Sts., Baton Rouge Transmitter location: Same as stu-

NBC CLAIMS FIRST

With Telarc, Flexitron Use

NBC last week claimed two "firsts" —on the technical side—in its production of "Of Lena Geyer" on *Robert Montgomery Presents Your Lucky Strike Theatre* (NBC-TV, alternate Mondays, 9:30-10:30 p.m., EDT). These are the use for the first time of the Telarc projector and of the Flexitron.

The Telarc projector is a rear-screen projecting device which flashes a slide on a huge screen, thus creating a backdrop setting. It was designed by NBC's special effects department and reportedly gives off three-and-a-half times more light intensity than previous rear-screen projectors.

The Flexitron is a device causing the picture to wave and thereby creating a montage effect. It was invented by NBC engineer William Klages and further developed by the network's special effects department.

dio. Geographic coordinates: 30° 26′ 36″ N. Lat., 91° 10′ 27″ W. Long. Transmitter RCA, antenna RCA. Legal counsel McKenna & Wilkinson, Washington. Consulting engineer Gautney & Ray, Washington. Principals include President **Louis S. Prejean** (18.3%), Vice President **T. E. Gibbens** (4.59%), Director **C. C. Barnard** (14.93%), Secretary **Jack S. Burk** (14.93%), Treasurer **Francis H. SOURCE OF PROGRAMMING

Independents' Output Tops Networks, Agencies in Ross Study

FEARS of station operators that the networks would completely dominate the television broadcasting field through their control of video programming may be safely forgotten. So, too, may the station owners discard any idea that the advertising agencies might seize control of TV's programs.

Those conclusions stem from an analysis of TV program data in the May issue of *Ross Reports on Television Programming,* which lists all programs telecast on the networks or locally in New York City during the year from May 1951 to May 1952. Programs still on the air in April are listed with full data on station or network, time, sponsor, packager, producer, director, casting, commercials, production cost and March Pulse rating. The year's program casualties are listed separately, with dates of debut and departure.

Itemized by type of producer (Table I), the Ross data show that of 217 network programs, the networks produced only 92 or 42%. Agencies accounted for 26 (12%), while independent producers contributed 99 (46%). When sustaining TV shows are taken out of the total and only the 154 commercial programs considered, the Ross breakdown gives 52 programs (34%) to the networks, 26 (17%) to the agencies and 76 (49%) to the independent producers.

Noting that today's "complex talent-network-agency-packager deals" make the determination of actual program control "a touchy proposition," Ross concludes that the criteria must be: "Who controls the created idea; who hires and pays the performing and writing talent; who supervises production details, and, could the show be moved to another network?"

Filmed programs, which are described as "the most significant program force yet developed," are credited with swinging the "packaging pendulum back in the direction of the independent producers and away from the networks." Special credit is given to the films made expressly for video use, although the report includes newsreels and feature films made primarily for theater showing with those made especially for TV.

"Monopoly fears," says the Ross analyst, "are disproved by the chart (Table I), which shows ABC-TV and DuMont controlling a minor percentage of their schedules, while NBC-TV and CBS-TV controlled less than half their commercial shows and only slightly more of their entire schedule during the last cycle."

Increased use of feature films by the New York stations, which in May of this year were the most-used program fare, accounting for 609 quarter-hours a week, a more than 30% increase over the 459 quarter-hours a week of feature films used by these same stations in May 1951, is credited with a major role in pushing the total telecasting time in the city to 2,250 quarter-hours a week (Table II).

From Station Break to Feature...
the NEW "BALANCED" TV Tripod
is doing a whale of a job
every day!

WE THREW THE book away and engineered a brand new "BALANCED" Tripod for every photographic and video need. The result—a revelation in effortless operation, super-smooth tilt and 360° pan action.

PERFECT BALANCE prevents mishap if the lock lever is not applied. Quick release pan handle locks into desired position. Mechanism is enclosed, rustproof, needs no lubrication. Tension adjustment for Camera Man's preference. Built-in spirit level. Telescoping extension pan handle. We defy you to get anything but the smoothest, most efficient operation out of this tripod beauty.

Head illustrated contains adjustable camera tie-down screw for locating center of gravity. This feature is optional.

"BALANCED" TV TRIPOD mounted on 3-wheel portable collapsible dolly.

If you work with film... for Studio, Newsreel, Commercials, Business, Industrial or Home Movies—it will pay you to get to know us. The country's foremost professionals depend upon our portable, versatile, adaptable equipment.

FRANK C. ZUCKER
CAMERA EQUIPMENT CO.
1600 BROADWAY NEW YORK CITY

What is the Future of TV and Moving Pictures?

Spyros P. Skouras, president of Twentieth Century-Fox Film Corporation, gave the answer to stockholders.

In the lower right hand corner of page eleven, Printers' Ink of June 6th, is a news item that every TV official and TV salesman should read and ponder. To save you the time of looking it up in your file, here it is:

Said Mr. Skouras, at the annual meeting of his stockholders, "In my opinion, the future of both television and motion pictures will see the merging of these two mediums, to their mutual benefit. The success of home television will depend substantially on film entertainment—not the same as shown in the theatres, but, nevertheless, programs on film. The theatre, in turn, will be benefited by the introduction of the new large-screen television which, in my opinion, will be the greatest boon to theatre attendance in its history."

Thousands of our readers, buyers of advertising, most certainly read this tight, clear-cut statement made by one of the greatest authorities in the field of entertainment.

As new TV stations are opened, the fight for more local, regional and chain business will be intensified. Now, today, is the time for any TV sales staff to start laying the foundation for future business. Of our 23,-309 subscribers, more than two-thirds are buyers of advertising: sales managers, advertising managers, time buyers, top management, plus thousands of agency people who execute the orders of their clients.

Bob Kenyon

Only in Printers' Ink, "The Voice of Authority" in the world of advertising for 64 years, will you find so many prospects for your station. Week after week, our editors report the happenings in the world of distribution, and tell buyers of advertising of the important changes that lie ahead.

Now, today, is the time to start your regular schedule in Printers' Ink. Tell buyers of advertising what your station can do to aid in winning new customers.

We would like to explain how Printers' Ink may help you. When may we see you?

ROBERT E. KENYON, JR.
Advertising Director

OLYMPIC SHOW

Nets $1 Million in 14½ Hours

BING CROSBY, Bob Hope, Dorothy Lamour and 250 other entertainers teamed up to raise more than a million dollars in pledges for the U. S. Olympic Games fund in a 14½ hour telethon over the CBS-TV and NBC-TV networks early last week.

The show began on Saturday, June 21 at 11 p.m. EDT and finished Sunday, June 22 at 1:30 p.m. EDT. Total amount pledged was $1,000,020 with Los Angeles contributing $309,265 and New York $279,579. Detroit was said to have placed third with WJBK-TV reporting $89,156 in addition to pledges received by WWJ-TV, which carried parts. The program was carried over 68 CBS and NBC television stations in 48 cities.

A sidelight was the TV debut of three radio personalities: Bing Crosby reportedly has been meeting with the D'Arcy Adv. Co., which represents Coca-Cola; Phil Harris lately signed an exclusive radio-TV contract with NBC and Louella Parsons, whose TV pilot film is being considered by Lustre-Creme for a CBS-TV series.

The coast-to-coast fund-raising program was the first such telethon to originate from the West Coast and the first to be carried on two networks. It was produced by Ed Sobol and Albert Capstaff while Warren Jacober was producer-director of the New York operation. Norman Blackburn and Jack Hope were in charge of talent production.

TV PRODUCER GROUP

Snader Named President

LOUIS D. SNADER, president of Snader Telescriptions Corp., has been re-elected president of National Society of Television Producers, Hollywood, for a two-year term.

David Chudnow, president of Rosamund Productions, was named vice president for a one-year term and Maleese Black, independent producer, was elected treasurer for a two-year period. Gladys Rubens, head of Rubens Productions, has one more year to serve as secretary.

New board of directors are Max Gilford, president of Pegasus Productions Inc.; Bob Clampett, producer-packager of KTLA (TV) Hollywood *Time for Beany*, and Jack Voglin, president of Voglin Corp. The other board members are Tom Armistead, Murray Lerner, Syd Cassyd, all independent producers, and Mike Stokey, producer-packager of NBC-TV *Fantomime Quiz*.

film report

Sales . . .

Colgate - Palmolive - Peet Co., through **Sherman & Marquette Inc.**, New York, has contracted for a 39 half-hour TV film series of *Mr. and Mrs. North* to be made by **Federal Television Corp.**, Beverly Hills. Starting July 21, the first 20 films are to be completed by Oct. 25. **Barbara Britton** and **Richard Denning** will enact the title roles with **Ralph Murphy** set as the director. **John Loveton**, owner-producer of the CBS Radio version, will produce. Federal Television Corp., owned jointly by **William Collier Jr.**, **Harry Joe Brown** and **Randolph Scott**, will headquarter at Goldwyn Studios.

* * *

Jerry Fairbanks Productions, Hollywood, is preparing *The Magic Wheel*, a half-hour TV film commercial for the **National Cash Register Co.** The script by **Leo Rosencrans** shows the relationship between big business and the American way of life.

* * *

Pacific Telephone & Telegraph Co., San Francisco, through **BBDO**, that city, has contracted for 30 20-second and three 60-second TV film commercials to be produced by **Jack Denove Productions**, Hollywood.

* * *

Cascade Pictures of Calif. Inc., Culver City, is making three 60-second live action TV film commercials for **Toni Co.**, Chicago (hair preparations). Agency is **Foote, Cone & Belding Inc.**, that city.

Production . . .

J. G. Stevens Television Productions, Hollywood, has completed the first film in quarter-hour TV series, *I Cook for a Star*. Highlighting Hollywood names through the eyes of their cooks, each program also will feature star's home, family and favorite foods. Narrated by **Reba** and **Bonnie Churchill**, syndicated columnists, the pilot film is built around **Pat O'Brien's** home, family and cook.

* * *

Pivar Productions, Culver City, Calif., headed by **Ben Pivar**, production executive at Universal-International, plans a half-hour TV film series to be called *Bureau of Missing Persons*. Starting in mid-July, the programs will be based on factual cases with the camera crew shooting at the actual scenes of the happenings. **Arthur Hilton** will direct.

Film People . . .

Argyle Nelson, production executive at RKO Radio Pictures, joins **Desilu Productions**, Hollywood, as general manager in charge of production. He succeeds **Al Simon**, named production manager on CBS-TV *George Burns and Gracie Allen show*.

* * *

Lou Victor, who operates his own Hollywood advertising agency, has joined **Wilshire Television Productions Inc.** as second vice-president in charge of the commercial division, to be known as **Televictor Unit.**

* * *

Gene Fowler, Hollywood writer, is in New York for conferences pertaining to distribution of the George M. Cohan story and music properties, developed by him and **Gene Towne** as a TV package. Preproduction has started on the team's original TV film series, *The Unsinkable Mr. Ruddigore* and *The Looking Glass Kid*.

Miscellany . . .

Interstate Television Corp., Hollywood, subsidiary of Monogram Pictures, which holds an option on half-hour TV films made by **National Repertory Theatre Inc.**, that city, has selected "The Victim" for inclusion in *Ethel Barrymore Theatre* TV film series. **Arthur Kennedy** and **Edward Arnold** are co-starred. Through a deal recently concluded by National Repertory Theater and **William Morris Agency**, Beverly Hills, the agency acquires national sales rights to future films.

* * *

Lew Kerner, executive in charge of production for **Motion Pictures for Television**, Hollywood, has acquired the personal rights to over 22,000 short stories and articles published in *Liberty* magazine from 1924-50 through **Network Story Sales Inc.**, New York. Disposal or adaptation of the properties to TV or feature films has not been determined by Mr. Kerner.

* * *

Guild Films Co., Hollywood, headed by **Reub Kaufman**, will handle the national distribution of a half-hour TV film series, *The Guild Theatre*, produced by **Telepictures Corp.**, Beverly Hills. The programs, 13 of which have been completed, are dramas of suspense and action, featuring **Richards Travis, Ann Savage, Edward Brophy, Iris Adrian** and others.

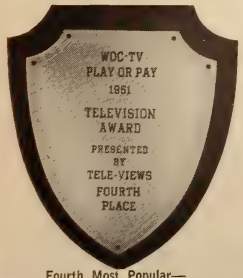
CBC-TV Trial Program



FIRST trial television programs from CBC-TV Montreal are to begin July 25, with telecasts of International Baseball League games from Montreal. Announcement was made last week by Aurele Seguin, TV director at CBC Montreal. Additionally, programs in drama, comedy, variety, music and documentary will be telecast during an experimental period.

Most Popular Program—
"Musical Moods"

Third Most Popular—
"Golden Opportunity"

Fourth Most Popular—
"Play or Pay"

THE VOTES ARE COUNTED

–it's a LANDSLIDE for WOC-TV Programs

Voting Place—"Tele-Views," TV fan magazine for the Quint-City area. . . .

Contest—"Tele-Views" readers vote on popularity of locally produced TV programs. . . .

Prizes—Bronze plaques to four programs winning most votes.

Results—THREE (left) OF THE FOUR PLAQUES NOW IN WOC-TV TROPHY ROOM. . . .

But more than that—of the 15 local programs voted "most popular," 12 were WOC-TV productions. . . .

LET THE NEAREST F & P MAN TELL YOU HOW TO GET YOUR PRODUCT OR SERVICES ON THE SALES-WINNING BALLOT IN THE QUINT-CITY AREA. . . .

Why is every major network timing the Presidential Conventions with SELF WINDING CLOCKS?

Style 37-15" SS.
Sweep Seconds; Self Winding

Yes, all the major *radio* and *television* networks (and most independents) covering the Republican and Democratic Conventions in Chicago for nation-wide audiences are relying on Self Winding Clocks for the timing and synchronization of their programs. This also holds true for other *regularly* scheduled local and national programs.

Here's WHY –

- **Can be automatically synchronized on the hour***
- **Unaffected by AC power failures (self-powered)**
- **Install anywhere (AC power line not required)**
- **One clock or a complete synchronized clock system**

You, too, can have *dependable, exact* time-keeping for your local and national broadcasts. Send the coupon today for full particulars and free estimate on recommended installation to meet your requirements.

**U. S. Naval Observatory Time*

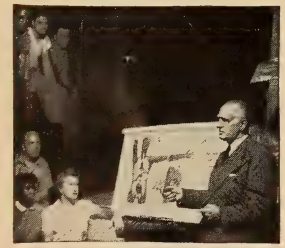
DETROIT CONTEST
Brings 126,423 Entries

UNITED Detroit Radio Committee last week announced the winners of its "I Like Radio Because" contest, which drew 126,423 entries.

Seven stations used a saturation schedule of chainbreaks and minute announcements for the contest period May 19-27. Participating stations were identified as WEXL WJBK WJR WKMH WWJ WXYZ Detroit and CKLW Windsor.



Twenty winners were announced on a special broadcast June 11, carried by all seven stations.

Grand Prize winner was Mrs. Marie Crowley of Detroit, who received a new Packard donated by the Packard Dealers Assn. of Metropolitan Detroit plus other gifts.

Contest judges were Louis Miriani, president of Detroit's City Council and acting mayor; Norman Glenn, editor of *Sponsor* magazine, and Winfield R. Levi, sales manager, BROADCASTING • TELECASTING.

An informal cocktail party and dinner were held in the Statler Hotel to celebrate the contest's successful completion. Among those present were:

J. E. Campeau, president, and E. Wilson Wardell, sales manager, CKLW; Gordon Sparks, president, and Ernie Holder, sales manager, WEXL; Gayle Grubb, manager, and Pat McInnis, promotion director, WJBK; Worth Kramer, vice president-manager, and Jim Quello, promotion manager, WJR; Edwin Wheeler, general manager, and James Eberle, sales manager, WWJ, and James Riddell, president, and Hal Neal, assistant sales manager, WXYZ. Fred Knorr, president, and George Millar, sales manager, WKMH, seventh participating station, were unable to attend.

On the job!

Our volunteer speakers are saving thousands of lives *today*... in factories and offices, at neighborhood centers and at organization meetings all over this land... showing people what they can do to protect themselves and their families against death from cancer.

For information just telephone the American Cancer Society or address a letter to "Cancer," care of your local Post Office.

RADIO FREE ASIA
Manila Operation Begun

RADIO FREE ASIA has begun to shift operations from San Francisco to the Far East, John W. Elwood, RFA director, announced last week.

Mr. Elwood disclosed that a team of four radio experts has left for Manila. Members were listed as William E. Minette, Walter Briggs, Margaret Liang Briggs and Clementine Wacula.

RFA, operated by the Committee for Free Asia, now beams programs from San Francisco six days weekly via two transmitters in the Philippines and one on Guam. Now programs will be written and broadcast directly from Manila, he added.

"Broadcasting from Asia, in cooperation with Asians, should win larger audiences for Radio Free Asia," Mr. Elwood said.

"Through our programs," he explained, "we are trying to keep alive the hopes of Asians now under Communist domination and to stiffen Asian resistance to Communist aggression."

Mr. Minette, of Palo Alto, Calif., will be RFA director for Manila. He was formerly public affairs director for KNBC San Francisco.

Mr. Briggs, native of Peoria, Ill., will be director of information. For many years, Mr. Briggs was correspondent in Asia for the United Press and for the *Christian Science Monitor.* Mrs. Briggs, born in Peiping, China, and now an American citizen, will participate in program production. During World War II, she served as a civilian teacher in Kunming, China. Miss Wacula, born in Switzerland and a former resident of Tacoma, Wash., will serve as administrative assistant. Miss Wacula formerly served at KMO Tacoma, KOOL Phoenix and KITO San Bernardino.

OPTOMETRY AD CLAIMS
D. C. Reins Proposed

TIGHTENING up of the advertising freedom of optometrists was a step nearer in the District of Columbia last week when a House District subcommittee approved for full committee action a bill (S 106) revising the D. C. Optometry Act.

Bitterly fought measure passed the Senate May 7. It is opposed by the Washington Publishers Assn., National Retail Optical Assn., and others. It is favored by the American Optometric Assn., District Optometric Assn. and the District Board of Optometry.

Opponents claimed at subcommittee hearings last month that it would create an "eye glass monopoly" and was an attempt to control newspaper, radio and television advertising.

Provisions of the legislation ban advertising of (1) fees for professional services, (2) prices, (3) terms of credit, (4) discounts and (5) guarantees. It also gives the Board of Optometry of the District of Columbia power to revoke or suspend licenses if an optometrist advertises contrary to the above-mentioned provisions, or claims professional superiority or superior performance, or offers free service or examinations.

AWRT CHAPTER

Elects Heloise Broeg

HELOISE PARKER BROEG, of WEEI Boston, was elected president of the New England chapter of American Women in Radio & Television at its organization meeting in Boston June 20 [B•T, June 23]. Some 50 women broadcasters and telecasters attended the meeting.

Other officers are: Connie Stackpole, Granite State Network, Manchester, N. H., vice president; Claire Crawford, WORL Boston, steering committee chairman; Eileen Kneeland, WHAV Haverhill, Mass., secretary; Louise Morgan, WNAC-AM-TV Boston, treasurer.

Speakers included Harold E. Fellows, NARTB president; Miss Morgan; Marjorie Mills, WBZ Boston; Mildred Carlson, WBZ and WBZ-TV; Mrs. Crawford; Jan Gilbert, Harold Cabot & Co., Doris Corwith, AWRT national president and NBC public affairs director, and Betty Stuart Smith, AWRT director-at-large and radio public relations director of J. Walter Thomspon Co. Dorothy Fuller, WBET Brockton, Mass., AWRT eastern vice president, presided.

BIELSKI SUCCEEDS KEIM

In AF Radio-TV Post

CAPT. CASS BIELSKI has been named chief of the Air Force Radio-TV Section in the Dept. of Defense, succeeding Lt. Col. Robert P. Keim, the Air Force Dept. has announced.

Col. Keim is to assume new duties as chief of the Air Force Section at the Armed Forces Public Information Center in New York Tuesday (tomorrow). He will be responsible for all AF public information activity in that area, with stress on radio-TV. At the Pentagon he was instrumental in development of the *Air Force Hour* and *Serenade in Blue*.

Capt. Bielski, who becomes chief of that section, has been serving as deputy to Col. Keim. He also has worked on radio-TV productions in recent years.

On All Accounts

(Continued from page 10)

director and agricultural journalism instructor. Because many of his students were older, he grew a mustache (he's the only one who liked it) to look a bit more mature.

When the war started, both these jobs were eliminated as the need for publicity declined when the Army moved in and teachers weren't busy. Fortunately, the head of the radio department left campus and Mr. Seaman was his successor.

He learned radio the hard way but fast. His primary assignment was to write, produce, appear in, record and mail a daily quarter-hour farm show which was carried as a public service feature by every station in the state. The war also hit the WDAY Fargo news staff, and Mr. Seaman was drafted to handle news editing and writing there three nights weekly and on Saturday and Sunday. His weekly work total: 100 hours.

His next job was serving as press and radio chief of the regional office of the U. S. Soil Conservation Service in Milwaukee, a bureau of the Dept. of Agriculture which sent out promotion and publicity. In fall of 1945, when Allis-Chalmers ventured into network radio with *The National Farm and Home Hour*, Mr. Seaman was offered the job of radio executive at the agency.

Allis-Chalmers, which collects many "firsts," is the only network TV sponsor among farm equipment manufacturers. This winter, for the fifth year, it will sponsor the judging of the grand champion steer at Chicago's International Livestock Exposition on NBC-TV.

Mr. Seaman, Allis-Chalmers and the Gittins agency work to benefit agriculture 5, 10 and 25 years from now, because a healthy and favorable agriculture industry is basic to the nation's economy. A sound industry alone will benefit Allis-Chalmers and other such companies, they believe. All company and agency activity is coordinated toward the betterment of agriculture generally, and the company is a pioneer in making the advertising industry aware of the vast farm market potential.

Mr. Seaman, in addition to his foreign business excursions, has traveled in almost every state to handle remote broadcasts for the network show. His long and busy weeks nevertheless include golf, fishing (for pike), bowling and taking care of the lawn at his home in Shorewood, a Milwaukee suburb. He is married to the former Laura Sebert, whom he met during high school days in Guthrie Center, Iowa. Their children are Charlotte, 15, and Richard, 13.

LBS CREDITORS

Hold First Meet July 8

CREDITORS of Liberty Broadcasting System Inc., which has been adjudged bankrupt, will hold their first meeting July 8 in Dallas, according to D. M. Oldham, referee in bankruptcy in the Dallas Div., Northern District of Texas, U. S. District Court.

Creditors may be asked to approve a plan to use proceeds from the sale of Liberty assets toward prosecution of the LBS $12 million suit against 13 major league baseball clubs [B•T, Feb. 25]. LBS suspended network service May 15 [B•T, May 19].

Meeting of the creditors will be held at Room 372, Federal Bank Bldg., Dallas at 10 a.m., July 8. The referee's notice said "the creditors may attend, prove their claims, appoint a trustee, appoint a committee of creditors, examine the bankrupt, and transact such other business as may properly come before said meeting."

The notice explained that Liberty "has been duly adjusted bankrupt upon an involuntary petition filed against it on June 5, 1952."

Notice of sale of Liberty assets on July 15 was given by the referee. Listed are items said to have an approximate value of $83,104, to be the highest bidder for cash, at public or private sale.

Among items are 11 Ampex console #400 tape recorders, five sets of General amplifying and rack equipment one master control room, four sub-controls, a master automatic switching control, consoles, nine Gates turntables units, two Presto master model disc recorders with amplifiers, and similar gear. Receiver is William J. Rochelle Jr., 911 Republic Bank Bldg., Dallas. The sale is subject to action by the referee at the July 8 creditors meeting.

Fry, Ingle Speak

KEN FRY, radio-television chairman for the Democratic National Committee, and Ed Ingle, his Republican counterpart, will speak tonight (Monday) before the Chicago chapter of American Women in Radio and Television. They will discuss use of media at the national political conventions.

WILLIAM C. BARNES

Was WMVA President

FUNERAL services were held June 23 for William C. Barnes, 58, president, Martinsville (Va.) Broadcasting Corp., operator of WMVA-AM-FM Martinsville. Mr. Barnes died June 21 following a heart attack.

Native of Decatur, Ill., Mr. Barnes went to Martinsville in 1937 and bought the *Daily Bulletin*, of which he served as publisher-owner until its sale in 1946.

Mr. Barnes established WMVA in 1940 and that station's FM affiliate in 1950.

His newspaper experience included publications at Decatur and Peoria, Ill., Beaumont, Tex., and Chicago. He represented the American Legion national magazine in Detroit, and had served as secretary to two congressmen in Washington. Survivors include his wife and four daughters.

Mrs. Ruth Gilbert

MRS. RUTH GILBERT, wife of Dick Gilbert, KTYL Phoenix disc jockey, and who as Ruth Wimp formed with her husband the radio and theatre singing team of Gilbert and Wimp in the early 1930s, died June 20 in an automobile accident near Wittman, Ariz. The husband and wife team also published several tunes and Mrs. Gilbert drew pen and ink portraits. Her mother and a sister also survive.

NEC CAMPAIGN

Radio Outlets Support

NEW ENGLAND'S radio stations have lined up solidly behind a New England Council campaign to advance the region's economy.

In mid-May, each of the 124 stations in New England's six states received a transcription of 13 spot announcements produced by the council. The spots present statistics showing that employment and payrolls are running close to all-time highs in the region, and that new industries are creating thousands of new job opportunities.

To date, NEC reported, 101 stations have pledged their cooperation in using the material. All of the region's 50 kw stations have expressed willingness to cooperate, the Council added.

Vermont and Rhode Island have a 100% record, with all their stations running the spots. Of Maine's 14 outlets, 12 have responded. In New Hampshire, 10 out of 12 have agreed to cooperate; in Massachusetts, 39 out of 52, and in Connecticut, 20 out of 26.

Radio material was produced by Deuel Richardson, general manager and program director, WCRB Waltham, Mass. Wallace Dickson, NEC public relations director, said the council expects to release additional material in mid-August.

NPA RESHUFFLE

Cotton Succeeds Milling

J. A. MILLING has returned to RCA Service Co., from which he was on leave, and Richards Cotton, assistant to the president of Philco Corp., has replaced him as director of the Electronics Div. of the National Production Authority and chairman of the government's Electronics Production Board.

Mr. Milling had been division and board chief since the resignation of E. T. Morris Jr., who returned to Westinghouse Electric Corp. earlier this year. Mr. Milling came to NPA last year from RCA Service Co., of which he is a vice president.

allied arts

PATRICK J. McGANN elected vice president of International Standard Electric Corp., N. Y., subsidiary of International Telephone & Telegraph Corp.

THOMAS B. MOSELEY and **JAMES F. BECKER** appointed sales representatives, TV Transmitter Div., Allen B. DuMont Labs., in southwest with headquarters in Dallas and middlewest stationed in Chicago, respectively.

JOHN OUSE, director of purchases for American Television Inc., Chicago, TV set manufacturer, to Thomas Electronics Inc., Passaic, N. J., manufacturer of Phototron cathode ray TV picture tubes, as manager of midwest sales, headquartered in Chicago.

Mr. Ouse

JACK A. BERMAN, vice president of Shure Bros., Chicago, elected to represent Assn. of Electronic Parts & Equipment Mfrs. on board of Radio Parts & Electronic Equipment Shows, sponsor of annual Electronic Parts Show in Chicago.

CALDWELL-CLEMENTS Inc., N. Y., publisher of *Radio & Television Retailing*, announces change in name of trade monthly to *Television Retailing*.

ARTHUR B. HOGAN, chairman of board and president of Universal Recorders, Hollywood, and head of Beverly Hills brokerage firm, elected to membership in Los Angeles Stock Exchange.

SEYFFER & Co., Zurich, Switzerland, appointed general product representative in that country for Allen B. DuMont Labs., Clifton, N. J.

WILLIAM B. OGDEN RADIO OPERATIONAL ENGINEERING SCHOOL, Burbank, Calif., has moved to 1150 W. Olive Ave.

HENRY B. NELSON, assistant to sales manager of General Electric replacement tubes, appointed district sales representative for GE Tube Dept., Cincinnati.

ARTHUR C. NIELSEN, president, A. C. Nielsen Co., N. Y., honored by U. of Wisconsin Alumni Assn. for contributions to university and to field of market research.

INSULINE Corp. of America, Long Island City, N. Y., announces publication of catalog No. T-725 describing complete line of antennas, kits and accessories.

ROBERT A. PENFIELD appointed advertising manager, radio-TV picture tube division, electronics, parts, and tungsten and chemical division, Sylvania Electric Products Inc., N.Y.

Mr. Penfield

CHARLES MICHELSON Inc., N. Y., radio-TV transcription firm, has established special department for scoring background music for TV and film programs. Company will release to clients its library of E.M.I. (British) background music transcriptions.

WILLIAM BARNES, Wynn Rocamora Agency, Hollywood, has opened own talent agency at 600 N. Sepulveda St., L. A.

PHIL DAVIS MUSICAL ENTERPRISES Inc., N. Y., commissioned by W. D. Lyon Co., Cedar Rapids, Iowa, to create original musical trademark for Potosi Brewing Co. of Wisconsin.

JUSTIN R. ANDERSON, Associated Press bureau chief for Arkansas, appointed executive representative for AP's membership division.

Mr. Anderson

JAMES W. FARROW, eastern zone sales manager of Television and Radio Div., Stromberg-Carlson Co., Rochester, N. Y., named merchandise manager of company's sound equipment branch.

MARK LANSBURGH, advertising-promotion director, KLAC-TV Hollywood, starts **LANSBURGH PRODUCTIONS** to produce and package programs and commercials for TV. Unit is headquartered at 100 S. Wetherly Dr., L. A. Telephone is Crestview 4-5770.

CROSBY LABORATORIES Inc. relocates at Robbins Lane, Hicksville, N. Y., Box 233. Telephone is Hicksville 3-3191.

TELEKING Corp., Newark, N. J. (TV receiver sets), moves showroom and service department to 120 Broad St., Morgan Theatre Bldg.

NARFD DISTRICT

Sets Winston-Salem Meet

SECOND annual Southeastern District convention of the National Assn. of Radio Farm Directors, comprising the southeast from Virginia through Mississippi, will be held Oct. 17-19 at Winston-Salem, N. C., with delegates studying latest farming practices in Forsyth and adjoining North Carolina counties.

Other studies and an entertainment program of sightseeing have been arranged, according to the district board of directors, which includes Eric Lund, WLVA Lynchburg, Va., Frank Raymond, WDVA Danville, Va. and Harvey Dinkins, WSJS Winston-Salem.

Forum Available

PROGRAM, *The Georgetown U. Forum*, formerly presented for radio by the Liberty Broadcasting System, is now available to independent stations "on an exclusive city basis," according to Rev. Francis J. Heyden, S. J., forum's director. The program also is seen on DuMont TV in New York and Washington. Information can be obtained from Father Heyden at Georgetown U., Washington 7, D. C.

PROPERTY SEIZURE

Senate Beats Down Vote

ATTEMPT to get the Senate to vote on the McCarran resolution (S J Res 158) prohibiting the President from seizing private property—including radio, TV and press facilities [B•T, June 2]—failed last week when the Senate voted down a surprise motion to consider the proposed constitutional amendment by vote of 42 to 32.

Motion to consider the resolution was made by Sen. Pat McCarran (D-Nev.), author of the resolution, last Saturday (June 21). It was defeated on a motion to table by Majority Leader Ernest W. McFarland (D-Ariz.). Sen. McFarland's objection to consideration of the resolution was primarily that Senate Democratic and Republican leaders had agreed to handle on Saturday nothing but calendar bills to which there were no objections.

Sen. McCarran's resolution would amend the Constitution to provide that "the executive power of the United States shall not be construed to extend at any time to any taking of private property other than in a manner prescribed by law."

Constitutional amendments must be passed by two-thirds of both the Senate and House and ratified by three-fourths of the States.

Although S J Res 158 stemmed from the steel industry seizure by the President, radio-TV and the press got into the picture last April. Responding to a question by Col. J. Hale Steinman, co-owner of the *Lancaster* (Pa.) *Intelligencer Journal* and *New Era* and of the Steinman radio-TV stations during a visit by members of the American Society of Newspaper Editors, President Truman said that under certain circumstances the President must act in the best interest of the country. A week later, he disclaimed interpretations that he said he could seize radio and TV stations and newspapers, but again at his May 22 news conference he said he felt he had inherent powers of seizure of all industries [B•T, May 26, April 28, 21].

Revision of the Communications Act last October amended Sec. 606(c) to include electromagnetic devices and to give the power of seizure to the President upon proclamation "that there exists war or threat of war, or a state of public peril or other national emergency, or in order to preserve the neutrality of the United States." In his Executive Order last December, the President delineated seizure authority to mean "use or control" of any station by a government agency.

AP RADIO NEWS

Improvement Comm. Set Up

ASSOCIATED Press announced last week the formation of a seven man committee to meet with AP executives to help improve the AP radio news report.

This action was taken at the suggestion of the AP board of directors. In its annual report April 21, the board commended radio members for their increasing activity in supplying news and recommended a meeting that "might contribute to the continuing improvement of the news report of the Associated Press."

Committeemen, all of whom have accepted invitations from AP General Manager Frank J. Starzel, are:

Matthew Bonebrake, KOCY Oklahoma City; Joe H. Bryant, KCBD Lubbock, Tex.; Tom Easton, WTIC Hartford; Daniel W. Kops, WAVZ New Haven; Jack Kreuger, WTMJ Milwaukee; Jack D. Shelley, WHO Des Moines, and Les Mawhinney, KHJ Los Angeles.

The committeemen were chosen on the basis of geographical location and station power. They will meet at AP headquarters in New York in the fall, at a date to be announced.

DOUBTFUL ADS

Better Bus. Urges Review

A RECOMMENDATION to trade and business groups to form advertising boards of review to bring pressure upon advertising that "is not false but does not come clean with the truth" was sounded at the 38th annual convention of the Assn. of Better Business Bureaus in Swampscott, Mass., last week.

John N. Garver, chairman of the association's board of governors, said that "outright lies in advertising are rare today" but he added there was still the current "twilight zone" type of copy used by some national and local advertisers. He called on business groups throughout the country to cooperate in a campaign with the bureaus to "bring the full weight of business disapproval to bear upon such advertising."

Riple Leaves WLAW

WILLIAM A. RIPLE is resigning as general manager of WLAW Boston - Lawrence effective tomorrow (Tuesday) he reported last week. Mr. Riple said he planned a three-month vacation.

COPPER EASED

NPA Boosts for Radio-TV

SUPPLY of copper for radio-TV receivers was further eased by the government fortnight ago with manufacturers slated for increased allotments during the third quarter to meet these and other civilian needs.

This was revealed by the National Production Authority in a series of orders involving the import of copper from foreign countries by U. S. producers. Manufacturers are expected to realize sizable boost in overall copper supplies for consumer durables, up to 50% instead of 35% of their base period use.

Late last month NPA announced that quotes of controlled metals (copper, steel, aluminum) will be pegged higher starting July 1 to enable set-makers to meet expected seasonal demands for radio and television receivers [B•T, June 2].

The government also has announced that many plant expansion goals are either filled or pending in current applications for speedy tax writeoffs from plant manufacturers.

It was understood that companies turning out top priority or defense supporting electronics equipment, need no longer apply for tax amortization to expand their facilities. Military needs, with respect to expansion, are nearing the point of being met, it was explained.

Industry was advised generally by the Defense Production Administration that no more expansion involving tax writeoffs should be without prior consultation with the government.

Oldfield Promoted

LT. COL. Barney Oldfield, chief of public information, Headquarters, Allied Air Forces Central Europe, has been promoted to the rank of colonel, according to the U. S. Air Force, which announced a list of promotions. Col. Oldfield, a commentator at KFAB and KOIL Omaha and KFOR Lincoln before recall to military service in 1940, was transferred to Europe in early 1951. He is serving on the staff of Gen. Lauris Norstad, and previously worked in U. S. Air Force public relations directorate office at the Pentagon.

Col. Oldfield

New Pulse Service

THE PULSE Inc. has announced a new service, reporting on audience composition of all network programs, both radio and TV, with two reports to be made each year, spring and winter. Spring report is now available for industry purchase, Pulse noted. It shows the number of men, women, teen-agers and children who listen to each network-radio program and watch each network video show.

FOLDER has been issued by KYW Philadelphia using newspaper reprints to testify to the effectiveness of radio. Event praised by the press was city's first baseball talkathon featuring a bull session with Eddie Sawyer, manager of the Phillies and Lee Allen of KYW's staff. Pair answered questions phoned in by listeners from 11:15 p.m. to 5 a.m. Four telephone operators were kept busy all night, station reports, jotting down queries. Response prompted KYW to state: "Don't count radio short, even in a TV market."

FROM LOCAL STANDPOINT

WRITER and political analyst Gerald W. Johnson has signed a contract with WAAM (TV) Baltimore which will bring viewers information on events "as they appear from Bolton St. in Baltimore." Series will be aired weekly commencing July 4 from 9-9:15 p.m.

COVERAGE DETAILS

RED, white and blue trimmed release has been sent out by WAVE-AM-TV Louisville, Ky., pointing out details of stations' coverage of both Democratic and Republican conventions slated for July in Chicago. Complete daily schedule is offered as well as behind-the-scenes information on how telecasts and broadcasts will come to viewers and listeners.

programs promotion premiums

TWO-WAY PROMOTION

MUTUAL promotion contract running 52 weeks will be put into effect July 1 by KBIG Avalon, Calif., and Western Amusement Co. Movie concern will utilize 45-second trailer on KBIG in its 18 theatres in addition to mentions of the station in printed programs. Simultaneously, daily program, *Movietime*, starts at KBIG featuring theatres' motion picture schedules.

KCMO WINS CONTEST

BROCHURES outlining programming for community service were submitted by stations competing for the annual Community Service Award sponsored by the Kansas City Adv. & Sales Executives' Club. Judging was done at the U. of Missouri School of Journalism. Contest was won by KCMO Kansas City for the second consecutive year.

'BARNDANCE CAPERS'

NEW show featuring rotating roster of station's entertainers was begun last week on WLWT (TV) Cincinnati, featuring Louis Innis, TV personality, as m.c. *Barndance Capers*, sponsored by BC Headache Powder, will be aired weekly on Thursday, 9:30-10 p.m. Other outlets picking up the variety program will be WLWC (TV) Columbus and WLWD (TV) Dayton.

CHRISTMAS IN JUNE

FORTY merchants in Nanaimo, B. C., displayed "day-glo" signs stating "This is a Nanaimo Day Store" prior to June 20 when "Christmas bargains in June" were brought to residents of the city. Special jingles were produced by CHUB there. Station also supplied the signs and placed all advertising for the businessmen.

CRUISE NEWS

SUMMER season in Great Lakes region has inspired a new show on WGAR Cleveland. *Morgan's Melody Cruise* features disc jockey Hal Morgan cruising around Lake Erie on yachts from various local clubs. Mr. Morgan between recordings discusses regatta coming up for the week and winner of previous race over the weekend.

RACES USE RADIO

STOCK car races starting at Municipal Stadium, Phila., will receive intensive publicity and promotion over WFIL that city as part of station's "Summer Selling Plan." Promotion package will be used by George Marshman, auto racing backer, to publicize weekly Friday evening races at new and specially constructed track at the stadium.

CLEAR AND SUNNY

MIDWESTERN farmers numbering 1,500 literally prayed for rain at Farm Day sponsored in early June by KMA Shenandoah, Iowa. Featured on the day's agenda was Tom Swearingen, a "rain maker" who was unable to produce because of a cloudless sky. Those who attended contented themselves with machinery exhibits, a rodeo performance and "discussion" of weather and its effect on agriculture.

RELIGIOUS PROGRAMMING

RECORD is claimed by WCBC Anderson, Ind., in length of religious broadcasting. Station fortnight ago broadcast a two-and-one-half hour program from annual International Camp Meeting in Anderson, sponsored by Church of God. Program consisted of interviews and musical solos performed by talent from every state as well as from Canada and Europe.

REGATTA BROADCAST

ROWING regatta featuring Olympic Rowing Trials at local Lake Quinsigamond will be broadcast to central New England by WTAG Worcester July 3-5. Interconnected mike stations will be set up at beginning, middle and finish line of the mile-and-a-third course. Station will also pipe its on-the-air description over a public address system for the lakeshore grandstand.

WWDC'S BLOOD APPEAL

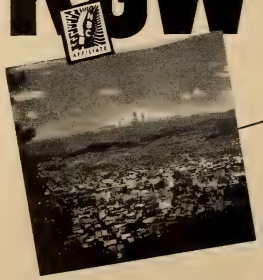
ALL-OUT radio campaign is being staged by WWDC Washington through July 4 to point up an appeal for blood for wounded and hospitalized military personnel. Every public service announcement, station identification break and the entire all-night show, *Yawn Patrol*, were devoted to the appeal on June 25 using slogan "Share Your Blood for Independence."

MEMORY CONTEST

NOSTALGIA paid off last month for WBOW Terre Haute, Ind., and two entertainers, in a "memory contest" conducted by the station as part of 25th anniversary observances. For a month prior to June 15, WBOW's birthday, listeners were asked to send in letters stating "What I Remember Best About WBOW." Writer of most apt letter received $100. Station reports that so many letters mentioned Gene Morgan and Guy Slover, who have been off the air seven years, that the comics have been signed by the station for a new weekly show.

RADIO PROMOTES SELLOUT

PROMOTION exclusively by radio brought sellout attendance at first Pacific Northwest Dance Championship held at Seattle's Olympic Hotel June 14. Only advance notice of event was a spot announcement campaign on KRSC Seattle with 30-second announcements every half hour during last four days of a three-week campaign. Promotion was sponsored by Veloz & Yolanda dance studios.



RADIO DRAMA EXPERIMENT

EXPERIMENTAL drama series has been launched at WSUI Iowa City, Iowa, for summer months. Residents of the community, in addition to students and U. of Iowa staff members, are participating in acting and writing capacities on *How To Get Away From It All.* Series is attempting to create new interest in radio drama by testing new and unusual production techniques. Programs are aired weekly for 45 minutes.

VACATION GIMMICK

SECOND phase of "Vacation Express," summer promotion tying in with 26 resorts in station's coverage area, has been launched by WCAU Philadelphia. Resorts have entered into a joint promotion which includes a special program, *Vacation Express*, highlighting a different recreation spot each week. Station in turn gets advertising in resort newspapers and pictures of WCAU's talent on boardwalks and in theatres.

1,246,540 active, young-minded Westerners comprise KGW's market in 12 big, prosperous metropolitan Oregon counties, plus a generous slice of Southwestern Washington.

REPRESENTED NATIONALLY BY EDWARD PETRY & CO., INC.

Our Respects To

(Continued from page 46)

sociated with the late Louis G. Caldwell, dean of radio lawyers. The job was scheduled to take three days. Mr. Scharfeld, however, spent three months in Mexico. He swears it was the "mañana" attitude there that kept him so long, but his friends say it was because he found the pace so greatly to his liking.

This adherent of the art of easy living was born, not on some south sea isle as his characteristic might indicate, but in the bustling manufacturing and commercial city of Cleveland. The day was June 22, 1903.

At East High School, Cleveland, he learned the arts of the advocate. Even then, he recalls, he opposed centralized government and bureaucracy. As captain of his school debating team, he wowed 'em upholding the negative of the proposition, "The Federal Government Should Establish a Department of Education."

After Harvard Law School, Mr. Scharfeld in 1928 joined his uncle, A. E. Bernsteen, U.S. District Attorney in Cleveland. Late that year, he was in Washington on business, when someone at the Department of Justice suggested he see Mr. Caldwell, general counsel of the then new Federal Radio Commission, just organizing. Mr. Caldwell talked him into joining the FRC as assistant counsel, among the first at that agency.

It was the days of the making of radio law, and for the next two years Mr. Scharfeld was a member of the legal group who formulated the foundation of broadcasting regulations. Among his contemporaries were the following, still practicing this legal speciality: Fanney Neyman (Litvin), Ralph Walker, Paul Segal, Duke Patrick, David Deibler, Ben Fisher, and Paul Spearman.

Early Legal Battles

During those early days, Mr. Scharfeld participated in many legal cases which established the right of the FRC to regulate broadcasting and to look into the qualifications of a prospective licensee. The one he recalls best, however, was *General Electric Co.* v. *the U. S.*

This involved the grant of another station on the frequency used by the GE station in Schenectady (WGY). GE protested, took the case to the Court of Appeals, which reversed the FRC. The government appealed to the Supreme Court and that tribunal denied a writ of *certiorari* on the ground that the Court of Appeals in this case acted as an administrative agency and not as a review court.

In those days administrative law was not spelled out the way it is today. Courts not only reviewed the legality of decisions, but also the facts of the case.

The GE case was one of the decisions which spurred the FRC to get the law spelled out in more detail and to ensure that courts had legal review power only. (Today, many students of radio-TV law wish that responsibility had never been changed.)

Private Practice in 1931

In 1931, Mr. Scharfeld joined his ex-boss in private practice. Mr. Caldwell had become resident Washington partner of the Chicago law firm of Kirkland, Fleming, Green & Martin (now Kirkland, Fleming, Green, Martin & Ellis).

In those days, no one was reporting FRC regulations and orders on a regular basis. So Mr. Caldwell, as editor, and Mr. Scharfeld, as associate editor, established and published the *Journal of Radio Law*. This quarterly covered radio regulation and legislation with interpretive articles by "names" in the field, decisions, general orders, examiners' reports, and other regulatory memorabilia.

It was during his long association with Mr. Caldwell that Mr. Scharfeld was imbued with the principle that radio (and television) must be as free as newspapers in its rights as a medium of communications. Mr. Caldwell was the great advocate of free speech for radio.

Mr. Scharfeld's philosophy of radio law can be summed up in the phrase, "The less regulation the better." He feels strongly that procedural matters are just as important as the substantive factors in broadcast regulation. He thinks the FCC's practices in this respect have improved over the years but that there is still room for improvement. He is a great believer in settling matters between clients and the FCC through negotiation and compromise, rather than through a strict, inflexible following of the letter of the regulation with its concomitant long, expensive hearings and litigation.

He believes that of late—perhaps due to lack of personnel or changes in the attitude of FCC Commissioners and staff executives—the Commission is tending in that direction.

In 1936 Mr. Scharfeld joined with Philip G. Loucks, then managing director of NAB, to form Loucks & Scharfeld. It was a busy and lucrative practice. In 1943, Mr. Scharfeld volunteered for service in the Army.

After donning khaki and two bars on his shoulders, he was soon in England, attached to Gen. Montgomery's British 21st Army Group as public safety officer. After the Normandy invasion, he transferred to the U. S. Army, became military government officer in a unit training for the occupation of Bavaria. He was transferred out of that unit to a job as deputy director of the School for Military Government at Romilly, France. Following that stint, he was made a member of the military intelligence target force for General Patch's 6th Army Group which had come up through southern France into Germany. After the capitulation of Germany, Capt. Scharfeld was transferred back to the Bavarian military government unit and served in the occupation of that area.

Returns in 1945

Major Scharfeld returned home for demobilization Sept. 30, 1945.

After six months of "reorientation," Mr. Scharfeld rejoined Mr. Loucks. In the middle of 1948, he opened his own office for the practice of administrative law, with emphasis on radio and TV.

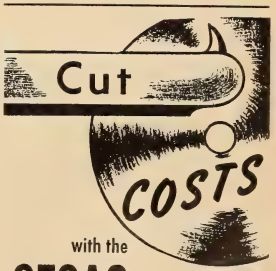
With his return to civilian pursuits, Mr. Scharfeld became active in the work of the FCBA. He held committee chairmanships, was a member of the executive committee, and early this year became president of the organization which represents attorneys practicing before the FCC. He is also a member of the American Bar Assn., the District of Columbia Bar Assn. and the American Judicature Society and the Radio Pioneers Club.

Although he still likes to play a fast game of tennis, his physician told him recently that he's getting too old for that young man's game. He also likes to watch a fast stretch at the races, and he's glad that no man ever gets too old for that.

His big hobby, however, has been breeding wire-haired fox terriers. He is a member of the American Fox Terrier Club, and started breeding the spirited canines in 1935 when he first became the owner of one. Before the war, he ran the Lucart Kennels, near Marlboro, Md., showed and won many trophies with his show dogs.

In 1933, Mr. Scharfeld was married to Lucile Hadley Speer. They were divorced in 1946. Daughter Diane was born in 1939.

WELDON & CARR



Hagaman Joins D. C. Div.

APPOINTMENT of Boynton G. Hagaman as engineer-in-charge of the Weldon & Carr laboratory facilities in the Washington Div., was announced last week. Mr. Hagaman formerly served as chief engineer for KDTH Dubuque, Iowa, and KLER Rochester, Minn., and directed their individual installations.

Mr. Hagaman

During World War II, Mr. Hagaman was project engineer on Army and Navy contracts. He distinguished himself in the invention of the cardiotachometer. Additionally, he contributed to the design of physiological instrumentation at Rochester's Mayo Clinic.

Operator Proposal Comments Flood FCC

(Continued from page 28)

engineer, who spends a goodly amount of time on preventive maintenance.

When WKBI was founded in 1950, we found no difficulty in obtaining three first-class operators at $40 per week, which was in line with salaries of other staff members and of factory workers and store clerks in the area. Today, if it were possible for us to secure three first-class operators, we would have to pay nearly twice that, according to what other stations in the state who have been able to secure operators are paying. The salaries of other WKBI staff members still are in line with those of area factory and store workers, that is, with an increase of about 15% over 1950, and it seems hard to justify a 100% increase in any engineer's worth over a period of a year and a half.

In more populous areas where station revenues are higher, every staff member's salary is higher and no great difficulty is experienced in securing a full complement of engineers. But, in a small market station, it is hard to justify a disproportionately large salary to a non-productive employe such as an engineer, a bookkeeper or a custodian. Productive employes, such as programming and announcing men, salesmen, or public relations and special events men should have proportionately higher salaries, indeed, if anyone does.

A high percentage of modulation is the only way a low-powered station can serve its entire trade territory, especially at night. When we had three first-class operators fresh out of school these fellows quickly learned that it was easier to keep the modulation down and never have to get off their seat to punch the reset button, or to turn down the gain when something extra loud came on. The third-class operators have been instructed that the modulation shall never get below 85% on peaks and their compliance has been without question.

There are two towns in our service area nine and 10 miles from our transmitter, respectively, which we never were able to cover at night until we began using third class operators at night. Now, with a high percentage of modulation, we cover these towns every night.

So far as remote control of the transmitter is concerned, the necessity to maintain operators at a transmitter separate from a studio throughout the entire broadcast day places a financial burden on the small operator which is completely beyond merit. If remote control were allowed, a higher caliber of chief engineer could be afforded by each station, and the chief engineer could spend all of his time on preventive maintenance, development of new equipment and repair of other equipment, rather than merely sitting around passing time, waiting for an unlikely occurrence of trouble.

James H. Duncan, manager of 250 w KSIL Silver City, N. M., supporting the NARTB proposal, wrote FCC that "just about every small station in the country and particularly those stations in remote or rural localities are at a very decided financial disadvantage when it comes to hiring engineers as the FCC now states that only first-class licensed men may be used."

"In my opinion," he wrote, "this is not equitable because the smaller station cannot compete financially with the larger-market station when it comes to hiring first-class engineers. . . . In order to secure the three engineers required to run the average small station, an unduly large portion of the budget must be allotted to the engineering department. As a result the general listenability of the station suffers."

Mr. Duncan believes that a lesser grade operator can handle the normal operation with a first class engineer on call to make major adjustments when necessary. He sees no problems concerning adjustments to meet Conelrad requirements.

Relax Requirement

Clarence Rulong, chief engineer of WAJR Morgantown, W. Va. (250 w, 1230 kc), urged FCC to relax the operator requirements: "We feel this move is necessary in view of the fact that holders of first class licenses are becoming increasingly more difficult for the broadcaster to secure."

William A. Reeves Jr., manager of WLAY Muscle Shoals, Ala. (250 w, 1450 kc), wrote the Commission:

It has been our experience over a period of years that one trained operator is sufficient to keep equipment in first class operating condition at all times. Other first class operator employes seldom have occasion to do more than make necessary meter readings and log entries which we believe any man of average intelligence could do. Usually, when trouble occurs it is necessary to call in the chief engineer who has had more training and experience in order to have proper adjustments made.

Robert M. Wallace, managing director of WOHS Shelby, N. C. (250 w day, 730 kc), wrote in support of the proposal:

I am being continually contacted by radio stations in this area for assistance in locating first class operators. At the present time the operators here are helping by parttime work to keep on the air a station in a city 20 miles away. I know of at least five radio stations in this area in need of one or more operators.

I am chairman of a committee of the North Carolina Assn. of Broadcasters now working with North Carolina State College to set up a school to train operators. We hope to have this school started at the beginning of the scholastic year in September. This committee, however, is of the opinion that even with this school in operation, we will be unable to fill the need for operators under the present rules and regulations. This will be due in a large measure to the increased demand for operators brought on by the influx of television stations.

Hudson C. Miller Jr., manager of WKUL Cullman, Ala. (250 w, 1340 kc), wrote FCC:

WKUL is one of your smaller stations and I would like to point out to you that in my opinion we can do a much better public service if we are not required to have more than one first-class engineer. We operate with combination engineer-announcer. This will permit us to hire a much more qualified announcer. As you know, a tremendous amount of time is spent in getting a first-class ticket by memorizing the necessary material to pass the test and then to hire themselves out to a station at a higher rate of income to them and higher cost to us. These announcer - engineers know nothing about the engineering end of radio except how to read the meter and fill in the log. During all these years I have never known one other than our chief engineer who could even change a tube properly. When anything goes wrong with the transmitter they have always had to call the chief engineer.

Douglas Featherstone, president and treasurer of WCRS Greenwood, S. C. (250 w, 1450 kc), wrote that the requirement that only first class technicians can stand transmitter watch "appears to us now to be economically wasteful and injurious to stations who are desirous of doing quality broadcasting." Economies allowed in transmitter operation "would be diverted into improved program services," he contended, if FCC adopted the relaxation proposal.

Earl Hodges, engineer at Batesville, Ark., suggested the engineer "shortage" could be reduced by requesting all first class operators to register with their local employment office when they are available. He also would require stations to give detailed accounting of their efforts to acquire first class men, "which must include a canvass of U. S. employment offices in their areas," and would have stations "submit the salary or wages asked by any prospective first class licensees and the offer made by the station."

Don E. Johnson, KOIL Omaha, who termed himself "a worried transmitter engineer," opposed the NARTB petition on grounds the stations "are not interested in rendering a better public service but in cutting costs."

J. A. Brimmer, chief engineer of WLBE Leesburg, Fla., urged FCC to adopt more strict rules. He agreed remote operation would save money in the long run but pointed out a transmitter must be observed to see if it is running correctly.

"You can't depend absolutely on any form of metering to do this. A transmitter would burn up before anybody would know it," he said. He felt increased work on installation and upkeep of remote operated equipment would tend to offset any saving on payroll.

Boyd Protest

Harry R. Boyd, Louisville, an operator for 15 years, in his protest to FCC took note of the CLOSED CIRCUIT [B•T, June 9] which reported an employment firm has noted engineers are going into the set servicing field for $1.80 an hour in lieu of broadcasting's $1.10.

"There is no shortage of licensed men," he wrote, "there is just a shortage of men who don't want to work for less than a day laborer's wages. . . . This is a time when kids come out of high school and start at $50 a week as store clerks."

He asked that requirements be raised instead of lowered, suggesting a special license for chief engineers. He would require a man to serve three years before being qualified to take the chief engineer's examination.

Lewis C. Sherlock, Denver, stated he believes the U. S. Employment Service "classifies the field as overcrowded. The constantly increasing number of outstanding regular licenses also rules out any possibility of a shortage."

Acton Tillery, chief engineer of KTRC Santa Fe, N. M., protested the proposal. He wrote:

In my opinion entering the meter readings in the log is not a mere clerical function. It's to keep the operator continually informed as to the condition of the equipment as to whether the equipment is operating properly or as to whether a breakdown is imminent. Only a proper understanding of the meanings of the

WSYR's Local Radio Sales

UP 39%

For the period ending April 30, WSYR's local radio sales were 39% ahead of 1951. The local advertisers responsible for this increase are the ones in the best position to test the effectiveness of all media. They know which advertising keeps the cash registers ringing.

various meter readings will insure a safe, economical and efficient operation.

William E. Bennis Jr., Washington consulting engineer, told FCC the proposed rule changes would reduce the standard of technical operation. He pointed out:

Operation of broadcast transmitters trains a pool of technicians that can be "borrowed" if national defense needs become more important than the best operation of broadcast stations.

First class operators are available where the salary and working conditions are commensurate with their responsibility. Good combination operator-announcers are scarce; however, such a position requires a person with two talents.

Perhaps the creation of a new class of operator, a practical technician, that can operate any broadcast station under the supervision of a first-class operator might be needed.

Typical of the protests are these highlights taken from engineers' letters by the IBEW headquarters in Washington:

. . . This ill-disguised proposal for "remote" operation is really a proposal for unattended operation, which is directly contrary to the FCC's rules and attitude in the past. The fact is that transmitter tubes and components are critical materials. How anyone can possibly assume that complete lack of attention to the finer points of the conservation of those materials in the transmitters could be either in the public or private interest is beyond me. . . .

. . . It may be that the operation of modern transmitters is possible by remote control, but from the standpoint of reliable operation in a time of crisis the proposed rules make no sense whatever. Anyone who is familiar with the problem of civil defense should certainly be violently opposed to unattended operation. . . .

. . . I have had personal experience with the operation of the now-defunct WSAI [Cincinnati] booster transmitter. We found that in spite of what appeared to be practical control circuits and good engineering practices, we had almost constant trouble. Even relatively simple circuits proved erratic; we could turn it on, but couldn't turn it off, or vice versa. . . .

. . . Remote operation of even the lowest power transmitter will degenerate to a sloppy, haphazard service to the listeners. To meter and control the operation, more and more gadgets" can be added, but we will wind up with a more complicated operation than we now have. The Commission will have to revise its examinations to insure the public against "gadget" failure. . . .

. . . I am not opposed to technological progress but I can't agree with the proposal to license unattended operation. Our local FCC office admits that it can't police the present regulations. What will happen when unattended operation is allowed and even more monitoring and policing is necessary? . . .

. . . Automatic pilots are used on airplanes, but none will put their confidence in them completely. The broadcasters accepted the rules of the Commission when they got their licenses, why can't they stick to the rules now? . . .

TRANSISTORS

RCA Reports Advances

PROGRESS in transistor research which for the first time promises the use of transistors in VHF television, FM radio and point-to-point radio communications was reported last week by RCA.

The announcement that several developmental point-contact transistors were made to oscillate at frequencies well up in the 100-to-200 mc band and one at 225 mc was made by Dr. Charles B. Jolliffe, vice president and technical director of RCA. The highest frequency value previously achieved by transistors, according to published reports, has been 50 mc.

The transistor is still in the developmental stage. It consists of a speck of germanium crystal and fine contact wires and is no greater in size than a kernel of corn. It can perform many of the functions of electron tubes.

Dr. Jolliffe said that prior to the recent RCA experiments, transistors have been regarded as limited to relatively low-frequency applications in TV, FM radio, point-to-point radio communication and other electronic equipment for military and civilian use.

This latest development was accomplished by B. N. Slade, Transistor engineer of the RCA Tube Dept., RCA Victor Division, Harrison, N. J.

SHOW MUST, ETC.

WMSA, Quincy Howe Prove It

A SEVERE electrical storm played hob with but did not silence *America's Town Meeting* over ABC from Massena, N. Y., last week. Lights and power were cut off and heavy rains delayed the arrival of moderator Quincy Howe and two guest speakers—but the show went on.

The broadcast commemorated the sesquicentennial celebration of Massena and is likely to become a long-remembered event. Before the program got underway, the local committee safely ushered Mr. Howe and the guest speakers to the local movie house where *Town Meeting* program director Harriet Halsband had grappled successfully with another problem — re-establishing power. Since power at WMSA, Massena's ABC outlet, had failed, Miss Halsband had engineers hook up a battery and send the broadcast to WAGE Syracuse and thence over the network.

Rains did not prevent some 350 persons from attending the performance. They found their way to seats with the aid of flashlights and later participated in the question-and-answer period.

Commented moderator Howe after his in-the-dark appearance: "Maybe we should always work in the dark."

LONDON MISSION

Webster Heads U. S. Party

FCC COMR. E. M. Webster heads a group of government officials who will be in London for a July 9 conference with members of the British Commonwealth Communications Council on proposed modifications in the 1945 Bermuda Telecommunications Agreement. Comr. Webster flew to England ahead of the party, leaving June 20 in order to survey British marine radio systems, telecommunications and TV developments.

In addition to Comr. Webster, the U. S. group, which is slated to sail for England on the *United States* July 3, includes among others, T. H. E. Nesbitt, assistant chief of Telecommunications Policy Staff in charge of international communications, State Dept.; Jack Werner, FCC Common Carrier Bureau Chief; Marion Woodward, chief, FCC International Communications Div. The group is to return July 23.

KERG'S Coverage

GLEN M. STADLER, news analyst, KERG Eugene, Ore., is covering activities of the Oregon delegations to the Chicago political conventions. Mr. Stadler is recording interviews with delegates and sending them to KGAL Lebanon, KXL Portland and KGAE Salem.

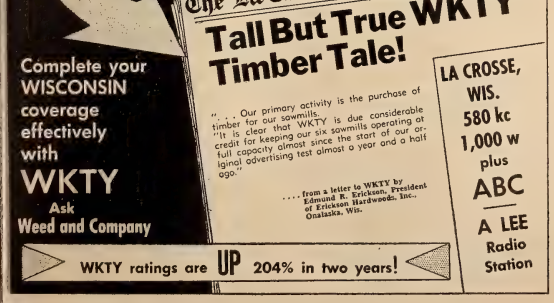
Dept. Stores' Blue Monday

(Continued from page 26)

will break with another selling campaign to test the effectiveness of its "educational" campaign.

One result of this method of advertising has already become apparent. Traffic in the housewares department of the department store has shown a steady increase since the beginning of the test.

Whether attributable to the radio campaigns — there have been a dozen since late in March—or not, there is one seriously indicative note that has become apparent:



Pomeroy's total store-wide sales for the 10-day, pre-Easter season was $99,700, compared to $82,300 in the same 1951 period. This is a gain of 20.5%. Similar Allied stores in nearby markets showed increases of only 11% and 4.2% for the same period.

Federal Reserve Board reports on department store sales for the week ending April 5 showed a national increase over the previous period of 7%, and for the week ending April 12, increase of 11%. For the Philadelphia district, in which Pottsville is located, department store sales increased 13% for the week ending April 5, 3% for week ending April 12.

Results of all the tests are collated and published by Department Store Studies, c/o WPAM Pottsville, Pa. The studies include a description of the merchandise advertised, copies of announcements and scripts, a detailed analysis of costs and results. They cost $15 a month. Coordinating the entire program is Sam Cuff, radio-TV consultant to Allied Stores Corp.

Back in 1945, another Allied store was the guinea pig in a broad radio advertising study. Joske's of San Antonio, in conjunction with the Broadcast Advertising Department of NARTB (now separated and autonomous as Broadcast Advertising Bureau), conducted a lengthy study of "beamed" radio advertising—sponsoring programs directed at specific segments of the listening audience.

The study being conducted by Pomeroy's is a continuing one and is envisaged as the most complete and up-to-date test of radio advertising for department stores.

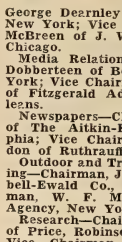
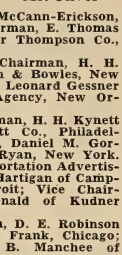
4-A COMMITTEES

Silvernail, Craig Appointed



FRANK G. SILVERNAIL of BBDO, New York, was named last week to head the American Assn. of Adv. Agencies' 1952-53 standing committee on radio and television broadcasting, while Walter Craig of Benton & Bowles, New York, was appointed chairman of the standing committee on radio and television production.



Mr. Craig

Mr. Silvernail

Mr. Roberts

Mr. Oliver

Harlow P. Roberts of Goodkind, Joice & Morgan, Chicago, was appointed vice chairman of the radio-TV broadcasting group and C. Burt Oliver of Foote, Cone & Belding, Hollywood, was named to a similar post on the radio-TV production group. The committees are two of 14 national standing committees of the 4-A's, all of which were said to have now been selected.

Chairmanships of three 4-A special committees also were announced:

James M. Cecil, of Cecil & Presbrey, New York, chairman of special committee on advertiser relations; John P. Cunningham of Cunningham & Walsh, New York, special committee on agency personnel, and Loren Stone of Compton Adv., New York. 4-A's art consultant. Mr. Cunningham also is chairman of the 4-A's board of directors.

Chairman and vice chairmen of the standing committees, in addition to radio-TV broadcasting and radio-TV production, were listed as follows:

4-A Examinations for Advertising—Chairman, S. H. Giellerup of Marschalk & Pratt Co., New York; Vice Chairman, C. L. Greenwood of Knox Reeves Adv. Inc., Minneapolis.

Agency Administration — Chairman, Walther Buchen of The Buchen Co., Chicago; Vice Chairman, D. C. Stewart of Kenyon & Eckhardt, New York.

Business Papers — Chairman, H. E. Cassidy of The McCarty Co., Los Angeles; Vice Chairman, James J. McMahon of James J. McMahon Inc., New York.

Export Advertising—Chairman, Lorimer B. Slocum of Young & Rubicam, New York; Vice Chairman, H. I. Orwig of The Buchen Co., Chicago.

Government, Public and Educator Relations — Chairman, William Reydel of Cunningham & Walsh, New York; Vice Chairman, Enno D. Winius of Winius-Brandon Co., St. Louis.

Improvement of Advertising Content —Chairman, George Reeves of J. Walter Thompson Co., Chicago; Vice Chairman, Ken R. Dyke of Young & Rubicam Inc., New York.

Magazines and Farm Papers—Chairman, Guy Richards of Compton Adv., New York; Vice Chairman, E. Ross Gamble of Leo Burnett Co., Chicago.

Mechanical Production — Chairman, George Dearnley of McCann-Erickson, New York; Vice Chairman, E. Thomas McBreen of J. Walter Thompson Co., Chicago.

Media Relations — Chairman, H. H. Dobberteen of Benton & Bowles, New York; Vice Chairman, Leonard Gessner of Fitzgerald Adv. Agency, New Orleans.

Newspapers—Chairman, H. H. Kynett of The Aitkin-Kynett Co., Philadelphia; Vice Chairman, Daniel M. Gordon of Ruthrauff & Ryan, New York.

Outdoor and Transportation Advertising—Chairman, J. J. Hartigan of Campbell-Ewald Co., Detroit; Vice Chairman, W. F. MacDonald of Kudner Agency, New York.

Research—Chairman, D. E. Robinson of Price, Robinson & Frank, Chicago; Vice Chairman, F. B. Manchee of BBDO, New York.

The 4-A board's operations committee, to oversee four main fields of organizational activity, will include:

E. E. Sylvestre of Knox Reeves Adv., Minneapolis, will be in charge of personnel activities; Earle Ludgin of Earle Ludgin & Co., Chicago, will oversee research; Henry M. Stevens of J. Walter Thompson Co., New York, who is 4-A's vice chairman, will be in charge of ethics, and Henry G. Little of Campbell-Ewald Co., Detroit, will oversee relations. In addition, William Reydel of Cunningham & Walsh, New York, will head the Committee on Qualifications for Membership, while William R. Baker Jr. of Benton & Bowles, New York, heads the Press Relations Committee.

CANADA MUSIC FEES

Protracted Hassle Looms

COPYRIGHT music fees for 1952 by Canadian broadcasters will not be paid for a long time, judging by the court actions planned by the Canadian Assn. of Broadcasters (CAB) and Composers, Authors, Publishers Assn. of Canada (CAPAC). First test case on the validity of the ruling of Canadian Copyright Appeal Board — that CAPAC may base its fees on gross revenue of stations and inspect station revenue books—will be held at Ottawa in September before the Exchequer Court. Whichever side loses, the case will appeal the decision to the Supreme Court of Canada, it has been decided by mutual agreement.

Canadian broadcasters meanwhile are paying at previous rates, based on a set sum per licensed receivers. CAB is now gathering data for test case.

RADIO INSTITUTE

WBT Offers Scholarships

CHARLES H. CRUTCHFIELD, executive vice president and general manager, Jefferson Standard Broadcasting Co., licensee of WBT-AM-FM and WBTV (TV) Charlotte, announced last week that the company again this year will make scholarship awards to the North Carolina High School Radio Institute at Chapel Hill.

Three scholarships are offered to high school pupils or recent high school graduates in North Carolina or South Carolina. Scholarships provide for all required fees.

The institute is in session from July 20 through Aug. 4. It is conducted under sponsorship of the North Carolina Assn. of Broadcasters and the U. of North Carolina's Communications Center. Deadline for scholarship applications is June 30 (today).

YESTERDAY'S (June 29) broadcast of *The People Act* concluded the program's 26-week run on CBS Radio (Sunday, 10:05-10:30 p.m. EDT) but recordings of the documentary series will be made available to stations for local use on request to the People Act Center at State College, Pa.

Midwest Network Station
$100,000.00

A well established and very profitable network property. Located in a desirable midwest market with retail sales in excess of $45,000,000,000. This is a combined operation and the equipment and installation is excellent. Financing arranged.

PROPOSED RULE MAKING

Palm Springs, Calif. — Dr. Forbes Farms Inc. FCC adopted Notice of Proposed Rule Making looking towards amending table of TV channel assignments to add UHF Ch. 14 to Palm Springs, Calif., pursuant to petition filed by Dr. Forbes Farms Inc.

TV GRANT

WXEL (TV) Cleveland—Empire Coil Co. Granted change in frequency to Ch. 8 (180-186 mc) *from* Ch. 9 (186-192 mc), increase ERP to 316 kw visual *from* 7.5 kw visual and to 160 kw aural *from* 3.8 kw aural, and move main studio to Cleveland *from* Parma, Ohio (transmitter site). No change in antenna height or transmitter location involved. After change WXEL (TV) Grade A service will be extended to about 45 mi. and Grade B service to about 63 mi. This is first grant for frequency change required of 30 existing TV stations under provisions of FCC Sixth Report and Order [B-T, April 14]. (Comr. Frieda Hennock dissented.)

AM GRANTS

Albany, Ga.—The Southeastern Bcstg. System. Granted 1050 kc, 250 w daytime; engineering condition. Estimated construction cost $24,467. Applicant owns WMJM Cordele, Ga., and 90% of WTJH East Point, Ga.

Oneonta, Ala.—Pat M. Courington. Granted 1570 kc, 250 w daytime; engineering condition. Estimated construction cost $17,600. Applicant owns WCRI Scottsboro, Ala., and 51% of WAVU-AM-FM Albertville, Ala.

TRANSFER GRANTS

KPHO-AM-TV Phoenix, Ariz. — Granted transfer of control of Phoenix Bcstg. Inc., licensee of KPHO, and Phoenix Television Inc., licensee of KPHO-TV, to Meredith Engineering Co. and Meredith Syracuse Television Corp. for $1,500,000. Meredith is licensee of WOW-AM-TV Omaha and WHEN (TV) Syracuse, N. Y.

KVEC San Luis Obispo, Calif.— Granted assignment of license from Christina M. Jacobson to herself and Leslie H. Hacker. Mr. Hacker will have ½ interest for which he pays $25,000 and Mrs. Jacobson will have ½ interest. Mr. Hacker has been general manager of KVEC since 1937 and is former licensee of KPRL Paso Robles, Calif.

WWXL Peoria, Ill.—Granted assignment of license to William H. Young, trustee in bankruptcy, under terms of court order. No monetary consideration.

KGW-AM-FM Portland, Ore.—Granted transfer of control from Donald E. Newhouse to Samuel I. Newhouse Jr. through transfer of 233⅓ shares of stock (out of 700 shares) for $116,666.67. Samuel I. Newhouse Jr. now already holds 233⅓ shares and after transfer will hold 466⅔ shares.

KAND Corsicana, Tex. — Granted transfer of control to J. C. West for $16,985 from Wesley W. West and Phil M. Stevenson. J. C. West is president of KAND.

KEPO El Paso, Tex.—Granted assignment to KEPO Inc. for $207,500. Principals in KEPO Inc. include equal stockholders Miller G. Robertson, president, who has no other business interests; Vice Presidents W. A. Porter Jr. and Ralph I. Richardson, and Secretary-Treasurer W. B. Pratt, who are associated with coal mining and construction interests in Minneapolis.

Non Docket Actions . . .

New Applications . . .

AM APPLICATIONS

Fresno, Calif. — The McMahan Co., 1340 kc, 250 w fulltime. Estimated construction cost $27,670, first year operating cost $50,000, revenue $65,000. Principals: President Robert O. McMahan, president McMahan Furniture Co.; Secretary-Treasurer George T. McMahan, secretary-treasurer of McMahan Furniture Co., and Director Robert C. Holding, general manager of McMahan Furniture Co.

Fairfield, Iowa—The Fairfield Bcstg. and Television Corp., 1580 kc, 250 w daytime. Estimated construction cost $9,901.67, first year operating cost $45,000, revenue $60,000. Principals: President Carl D. Boyer, owner-manager of Carl D. Boyer Insurance Agency, and Vice-President - Secretary - Treasurer James D . Mortwedt, commercial manager of WCOW St. Paul, Minn.

TRANSFER REQUESTS

KNBY Newport, Ark.—Acquisition of control by Harold L. Sudbury and Gladys Benson Sudbury, who now have 50% interest, from Charles William Craft and Mary M. Craft for $25,000 for the Crafts' 50% interest.

KRAI Craig, Col.—Transfer of control from Northwestern Colorado Bcstg. Co. to George O. Cory through sale of 1,000 shares of stock for $750. Mr. Cory is general manager of KRAI.

KGLN Glenwood Springs, Col.—Assignment of license from Western Slope Bcstg. Co. by R. G. Howell, executor of estate of Charles Howell, deceased, to R. G. Howell as individual. Mr. Howell formerly owned 50% interest with his father; he was appointed executor of father's estate and is now applying for assignment under terms of father's will. Mr. Howell is general manager of KGLN and KFXJ Grand Junction, Col.

KSMN Mason City, Iowa—Transfer of control from Mohawk Bcstg. Co. to Robert M. Carson through sale of 45 shares of stock for $11,250. Mr. Carson is president and general manager of KSMN.

WLEW Bad Axe, Mich., and WHLS Port Huron, Mich.—Assignment of licenses from Harmon LeRoy Stevens and Herman LeRoy Stevens, equal partners d/b as Port Huron Bcstg. Co., to the Messrs. Stevens and new partner John F. Wismer, who is joining as equal partner, reducing the Messrs. Stevens' interest to ⅓ each. Mr. Wismer pays $40,000 for his interest. Mr. Wismer is general manager of WHLS and WLEW.

WWNC Asheville, N. C.—Transfer of control from Don S. Elias to J. G. Adams and R. Stanford Webb through transfer of 62½% interest for $15,762.88 as result of settlement under consent decree from court.

WJAS Pittsburgh, Pa.—Transfer of control from Pittsburgh Radio Supply House Inc. to Sara A. Brennen, director of Radio Adv. Co. of Pittsburgh (45%); Treasurer Margaret M. Brennen, treasurer of Radio Adv. Co. (15%); Mary Thelma Bregenser (15%); President H. Kenneth Brennen, president Radio Advertising Co. of Pittsburgh (15%), and Mary J. Klein (10%), under terms of will of H. J. Brennen.

BY COMMISSION EN BANC

Change Operating Hours

WCAT Rapid City, S. D.—Granted mod. license to reduce hours from 11:00 a.m. to 1:00 p.m. daily to 12:30 p.m. to 1:00 p.m. daily.

AM—1600 kc

WNOW York, Pa.—Designated for hearing application change facilities from 1250 kc 1 kw-D to 1600 kc 1 kw unl. DA-N; made WWRL New York a party to the proceeding.

Change Studio Location

KWEM West Memphis, Ark.—Designated for hearing application to change main studio location from West Memphis, Ark., to Memphis, Tenn.

Install Vertical Radiator

WLAY Muscle Shoals, Ala.—Granted application to install new vertical radiator at different location.

To Remain Silent

KPRS Olathe, Kan.—Granted authority to remain silent for additional 60 days from June 9, pending consummation of assignment of license.

SSA Application Dismissed

KCBQ San Diego, Calif.—By order, dismissed application for SSA to operate station non-directional D.

Extension of SSA

KWBU Corpus Christi, Tex.—On own motion, Commission extended SSA to continue present operation on 1030 kc 50 kw-D from June 15 to Sept. 1, 1952.

Renewal of License

WILL Urbana, Ill.—Granted renewal of license on regular basis.

WVLK Versailles, Ky.—Granted renewal of license on regular basis.

WRLD-FM Lanett, Ala.—Granted renewal of license on regular basis.

Change Antenna Height

WFOB-FM Fostoria, Ohio—Granted CP to change ant. height from 95 to 215 ft.

Change ERP

WROV-FM Roanoke, Va.—Granted CP to change ERP from 285 w to 2.3 kw, and ant. from minus 5 ft. to minus 20 ft.

June 26 Applications . . .

ACCEPTED FOR FILING

Renewal of License

Following stations request renewal of license:

WOWO Fort Wayne, Ind.; WBOW Terre Haute, Ind.; WKYB Paducah, Ky.; WHIZ Zanesville, Ohio; KNOB (FM) Long Beach, Calif.

License Renewal Returned

WSIP Paintsville, Ky.—RETURNED application for renewal of license.

Change ERP

KSL-TV Salt Lake City — CP to change trans. location, type of ant. trans. and other equipment and ERP from 18.4 kw vis. 9.2 kw aur. to 2.5 kw vis. 1.25 kw aur. AMENDED to change requested ERP from 18 kw vis. 9 kw aur.

Hyde Defends TV plan

(Continued from page 51)

the largest possible number of people at the earliest practicable date."

Comr. Hyde contended the rules requiring applicants to state their cases upon a given channel "as contemplated by the act will contribute to efficiency in the examination of application." He said it is impossible to predict whether there will be a substantial number of non-hearing cases. On the other hand he felt there would be "few if any non-hearing cases in the absence of an allocation plan."

He predicted the assignment plan and rules "should likewise conduce to efficient handling of hearing cases and to just determinations." It is still "an enormous job," he explained, pointing to the small staff available and the problem of obtaining funds from Congress.

Mr. Davis cited past FCC AM decisions leading to this conclusion: "While the Commission may and does adopt standards which are to be strictly applied, the practical effect of reasonable Commissioners giving detailed consideration to a reasonable case by an applicant will result where appropriate need is shown, in a grant."

Applying this thought to the rigid TV allocation formula, he suggested "the Commission will in all probability not insist upon provision for 100,000 w (Ch. 2-6), 316,000 w (Ch. 7-13) and 1,000,000 w (UHF) effective radiated power nor will they insist upon strict adherence to the specified mileage separations."

Mr. Davis suggested there are signs that station separation might be reduced as additional engineering information becomes available. He added, however, that substantial changes in the VHF allocation should not be expected due to the expense of engineering antenna changes, ranging from $25,000 to $50,000 each.

In a number of cases AM installations can serve as the operating point for both TV transmitter and TV studio, he said, hoping the FCC will not return applications not showing location of the main studio. Combined sites are not confronted with insoluble technical difficulties, he said, even in case of directive AM antennas. He advocated use of small ground systems for TV towers for lightning protection and doubted if serious attention need be paid to fears that high-gain TV antennas would produce nulls.

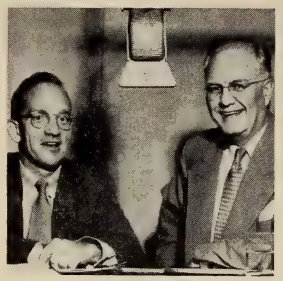
Pratt Leaves Y & R

CURTIS G. PRATT, vice president and contact supervisor, Young & Rubicam, since 1932, effective June 30 will resign from the agency on doctor's orders, it was announced last week. He will take the summer off but has opened offices at 52 Vanderbilt Ave. and starting this fall will act as a business consultant.

RTMA Election

(Continued from page 31)

of General Electric, as director of engineering. James D. Secrest continues as secretary and general manager. John W. Van Allen is retained as general counsel.



Nine new directors and eight former directors, as well as division chairmen, were chosen at the annual division meetings. New ones include B. W. Cooper, Delco Radio Div., General Motors Corp., Kokomo, Ind.; D. S. W. Kelly, Allan-Bradley Co., Milwaukee; Harry A. Ehle, International Resistance Co., Philadelphia; W. S. Parsons, Central Div., Globe-Union Inc., Milwaukee; Matt Little, Quam-Nichols Co., Chicago; Sam Morris, Amperex Electronic Corp., Brooklyn; F. W. Godsey Jr., Westinghouse Electric Corp., Baltimore; E. K. Foster, Bendix Radio Div., Bendix Aviation Corp., Baltimore, and Sidney Harman, David Bogen Co., New York.

Two new chairmen were elected among the five RTMA divisions. They are Matt Little, parts, and C. W. Miller, Westinghouse Electric, Baltimore, technical products.

John W. Craig, Crosley Div., Avco Mfg., Cincinnati, was re-elected chairman of the set division. Others re-elected were R. E. Carlson, Tung-Sol Electric Inc., Newark, tube, and A. K. Ward, RCA Victor Div., Camden, amplifier and sound equipment.

Elected as vice president representing the Parts Div. was R. G. Zender, Lenz Mfg. Co., Chicago, former parts chairman. Others re-elected vice presidents and their divisions are John W. Craig, set, R. E. Carlson, tube; H. J. Hoffman, Machlett Labs., Springdale, Conn., technical products, and Arrie Liberman, Talk-A-Phone Co., Chicago, amplifier and sound equipment.

Four former directors of the parts section were elected Honorary Directors: A. Blumenkrantz, General Instrument Corp., Elizabeth, N. J.; George R. Haase, Du-Kane Corp., St. Charles, Ill.; J. Hall, Stackpole Carbon Co., St. Marys, Pa., R. L. Triplett, triplett Electrical Instrument Co., Bluffton, Ohio.

DWIGHT COOKE (l), of CBS Radio, interviews Harry A. Bullis, General Mills board chairman, on changing world business conditions in the series, *You and the World*.

Set Sales Outlook

(Continued from page 31)

normal seasonal slump cut production.

Total radio and TV inventories were about 2,170,000 units at the end of fiscal 1950, but slightly under 1,500,000 at the end of May 1952, according to Frank W. Mansfield, Sylvania Electric Products Inc., chairman of the RTMA Industry Statistics Committee.

"Factory inventories have shown the greatest adjustment both in number of units and in per cent," Mr. Mansfield reported. "At the end of May, 410,000 sets in the hands of manufacturers represented a 391,000 unit decline from the 801,000 units at the end of last July. This represents a 48% decline. Distributor inventories declined during the same period by 119,000 units or 22% less and retailers had 186,000 fewer units or about 22% less.

"This adjustment has been accomplished in part by lower production. In fiscal 1950, more than 23 million radio and telvision sets were produced. The total for fiscal 1951 will be only slightly over 12.5 million. It should be noted, however, that this lower production has been characterized by less fluctuation than industry has enjoyed in the recent past."

Production of radio-TV and electronic components was maintained "at a remarkably high level" during the past year despite material shortages and a lower output of receivers, according to R. G. Zender, Lenz Electric Mfg. Co., chairman of the RTMA Parts Division.

"Conservation techniques developed by the industry since outbreak of the Korean War were largely responsible for the ability of parts manufacturers to continue to meet both military and industrial requirements in practically all categories," Mr. Zender reported.

The Parts Division increased membership from 228 to 240 in the year, Mr. Zender reported, with 47 also members of other RTMA divisions.

Shipments of radio and TV sets and parts to foreign countries in 1951 exceeded $70 million, according to V. S. Mameyeff, Raytheon Mfg. Co., reporting as chairman of the Export Committee. Receivers accounted for $29 million of the total, or slightly more than half the value of last year's export of receivers.

The committee report reviewed work toward adoption of U. S. TV transmission standards by foreign countries.

We Can Do the Job

(Continued from page 29)

a U. of Michigan scientist drew a heated complaint from a viewer that the lecturer had not mentioned the diety in his discourse on the birth of the earth, nor had he given any credence to the biblical story of the creation—that God created the Earth in six days.

Last week's hearing saw Methodist Bishop Wilbur E. Hammaker complete his temperance statement begun earlier this month.

Prepared to testify, but unable to because of the committee's inability to prolong the sessions, were Ralph Hardy, NARTB government relations director; Thad H. Brown, NARTB TV director; Charles R. Denny Jr., NBC executive vice president; Gordon Brown, WSAY Rochester; Melvin Gold, National Television Film Council, and Herbert Monte Levy, American Civil Liberties Union.

The ACLU witness planned to oppose any censorship of radio-TV programs on the ground that it was unconstitutional and that existing laws are adequate to deal with any problems that may arise. He also was planning to oppose the NARTB TV Code as an "improper delegation of a licensee's responsibility," and also as a combination in restraint of trade." Both these allegations were made by ACLU to the FCC early this month [B•T, June 9].

Grange Names Battles

ROY BATTLES, farm director of WLW Cincinnati, is being appointed by the National Grange as Assistant to the Master, according to an announcement Thursday from Grange headquarters.

KPHO AM-TV SALE

Approved by FCC

THE FCC Wednesday approved the $1.5 million cash sale of KPHO-AM-TV Phoenix, Ariz., to Meredith Pub. Co., publisher of *Bettter Homes & Gardens* and *Successful Farming* [B•T, May 5]. The sale was made by Phoenix Broadcasting Inc., licensee of KPHO-AM, and Phoenix Television Inc., licensee of KPHO-TV.

In other actions, the Commission authorized sale of KEPO El Paso, Tex., from Rowley-Brown Broadcasting Co. to KEPO Inc. for $207,500, and approved the purchase of one-third interest in Pioneer Broadcasters Inc., licensee of KGW-AM-FM Portland, Ore., by Samuel I. Newhouse Jr. for $116,666.67 from Donald E. Newhouse, giving the latter 66⅔% interest [FCC ROUNDUP, June 23].

Principals in KEPO Inc. include President Miller G. Robertson, who has no other business interests; Vice President W. A. Porter Jr. and Ralph I. Richardson, and Secretary-Treasurer W. B. Pratt, who are associated with Dakota Collieries Co. (coal mining) and Consolidated Construction Co., both firms in Minneapolis. The four have equal interest in KEPO Inc.

The KPHO transaction gives the Des Moines publishing firm two AM and three TV outlets, the others including WOW-AM-TV Omaha, acquired in 1951 [B•T, Oct. 1, Aug. 13, 1951], and WHEN (TV) Syracuse. Meredith also is applicant for TV outlets in Albany and Rochester, N. Y.

The Meredith purchase called for John B. Mullins, a former stockholder, to remain as managing director of KPHO-AM-TV and for the following former stockholders to remain as consultants: John B. Mills, board chairman of the two former licensee firms; Dr. J. N. Harber, secretary-treasurer of both; author Erskine Caldwell, vice president, and Riney B. Salmon, vice president.

BLAIR, HOOPER

Tiff Now in ARF's Lap

ADVERTISING Research Foundation will hand down a decision on the argument between John Blair & Co. and C. E. Hooper Inc. on the validity of the question used by Hooper interviewers — "Was anyone in your home listening to the radio or watching television just now?"

The Blair charge and Hooper denial that this double-barreled question short-changes radio [B•T, May 19] has been submitted to ARF by the Hooper organization, according to the June issue of *Hooperatings Stationews*.

Newsletter also quotes ARF as replying that "the study we have in mind will be considerably broader than just the points outlined in your letter" but these are important points to be studied.

Estimated construction cost $298,927, first year operating cost $240,000, revenue $230,000. Post Office address: P. O. Box 29, Wausau, Wis. Studio and transmitter location: 1.8 mi. N. E. of center of Wausau. Geographic coordinates: 44° 58′ 58″ N. Lat., 89° 36′ 06″ W. Long. Transmitter RCA, antenna RCA. Legal counsel Fisher, Wayland, Duvall & Southmayd, Washington. Consulting engineer Commercial Radio Equipment Co., Washington. Principals include President **John R. Tomek** (51.14%) and Vice President **Charles Lemke** (48.86%).

Existing Stations

Change in Channel

(The following station requests change in frequency as required under provisions of FCC Sixth Report & Order [B•T, April 14].)

WBKB (TV) CHICAGO — Balaban & Katz Corp., VHF Ch. 2 (54-60 mc), ERP 100 kw visual, 50 kw aural; antenna height above average terrain 657 ft., above ground 700 ft. Estimated cost of change $129,736. Transmitter RCA, antenna RCA. Change *from* Ch. 4 (66-72 mc), ERP 25.2 kw visual, 12.6 kw aural.

Support to Educators

(Continued from page 51)

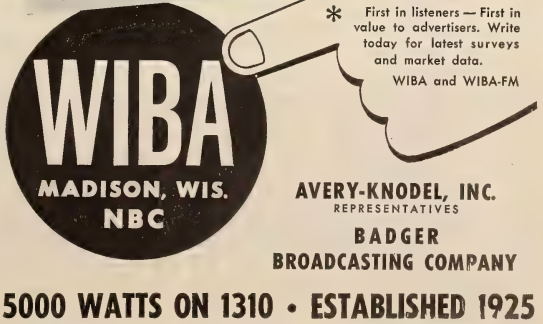
a large-scale drive to help educational television become an immediate reality on a wide scale throughout the nation. He said the offer is the first step in a three-phase program. It is designed first to encourage educators contemplating TV to make a final decision. The grants will be given to stations for purchase of capital equipment which will faciliate high-quality operation or may be used in any other way that will help provide good program service.

Second phase of the plan, Mr. Abrams reported, is the establishment of a Television Educational Council whose members will be educators, scientists and public-spirited citizens. The council will give guidance to the educational telecasters in establishing "universities of the air" and "a classroom in the home."

Final part of the plan, which Mr. Abrams said had yet to be worked out in detailed form, envisages the establishment of a fund for the purpose of promoting educational television and fostering its development. He said:

It is my hope that industrialists in this and other industries will join in a cooperative organization designed to back the educators responsible for establishing this new cultural medium. Emerson Corp. will welcome the opportunity of contributing its share to an industry fund, which should set its goal at $5 million.

When the FCC last April 14 set aside air space for 242 educational TV stations, TV manufacturers were "given a once-in-a-lifetime opportunity to influence the whole tenor of the TV industry, not only for today's public but for future generations," Mr. Abrams stated.



"The possibilities of these educational stations stagger the imagination," he said. "For the first time, our whole intellectual heritage can be brought directly and vividly into every classroom and almost every living room in the nation."

Commenting that "receiver manufacturers perhaps more than any other group have a responsibility to see that television serves the people well," Mr. Abrams pointed out that "it is also a matter of self-interest."

Educational television, he noted, will open up a vast new market for the sale of sets to schools, will encourage the purchase of sets by individuals who have not been attracted by today's TV programing, and, especially, will open up sales in communities where educational stations can get on the air while commercial applicants are still tied up in hearings. Educational stations also are possibilities today, he said, in communities too small to support local commercial stations.

WSAZ Appoints Katz

WSAZ Huntington, W. Va., has appointed The Katz Agency, N. Y., as its national sales representative, effective July 1.

at deadline

65 TV APPLICATIONS FILED WITH FCC

TOTAL of 65 TV bids filed at FCC Friday, two for changes in existing stations as required by Sixth Report (see early story page 52). New applications:

† **WSGN Birmingham, Ala.,** Ch. 42, ERP 1,000 kw visual, antenna height above average terrain 926 ft., construction cost $496,500.

† **WCOV Montgomery, Ala.,** Ch. 20, ERP 87.7 kw, antenna 525 ft., estimated construction cost $275,000, first year operating cost $300,000, revenue $360,000.

† **KTAR Phoenix, Ariz.,** Ch. 3, ERP 100 kw, antenna 1,586 ft., construction cost $512,595, operating cost $350,000, revenue $350,000.

KCNA Tucson, Ariz., Ch. 9, ERP 25.4 kw, antenna 68.5 ft., construction cost $255,000, operating cost $160,000, revenue $140,000.

† **KVOA Tucson, Ariz.,** Ch. 4, ERP 10.9 kw, antenna 224 ft., construction cost $249,033, operating cost $180,000, revenue $180,000.

† **Bakersfield, Calif., Lemert Bcstg. Co.,** Ch. 10, ERP 61.7 kw, antenna 548 ft., construction cost $296,629, operating cost $200,000, revenue $180,000. **Jack Benny** is 8.9% owner.

† **KFRE Fresno, Calif.,** Ch. 12, ERP 252 kw, antenna 1,943, construction cost $428,957, operating cost $355,236, revenue $415,000.

† **KCRA Sacramento, Calif.,** Ch. 3, ERP 100 kw, antenna 596 ft., construction cost $517,896, operating cost $576,000, revenue $600,000.

† **KVEC San Luis Obispo, Calif.,** Ch. 6, ERP 19.8 kw, antenna 788 ft., construction cost $131,926, operating cost $50,000, revenue $80,000.

† **KVOD Denver, Col.,** Ch. 9, ERP 238 kw, antenna 946 ft., construction cost $394,011, operating cost $444,632, revenue $400,000.

† **WDRC Hartford, Conn.,** Ch. 3, ERP 100 kw, antenna 1,000 ft., construction cost $454,800, operating cost $695,216, revenue $766,350.

† **WTHT Hartford, Conn.,** Ch. 18, ERP 210 kw, antenna 805 ft., construction cost $332,000, operating cost $480,000, revenue $325,000.

WKNB New Britain, Conn., Ch. 30, ERP 178.5 kw, antenna 919 ft., construction cost $323,879, operating cost $150,000, revenue not estimated.

† **WGBS Miami,** Ch. 10, ERP 316 kw, antenna 836 ft., construction cost $1,253,672, operating cost $720,000, revenue $720,000.

WWPG Palm Beach, Fla., Ch. 12, ERP 57.7 kw, antenna 233 ft., construction cost $171,569, operating cost $35,000-$50,000, revenue $35,000-$50,000.

St. Petersburg, Fla., Tampa Bay Area Telecasting Corp., Ch. 8, ERP 316 kw, antenna 520 ft., construction cost $501,305, operating cost $437,500, revenue $600,000. Principals: President **Robert James** (12.7%), real estate and building; Treasurer **R. W. Evans** (12.7%), truck dealer; **John Trevor Adams Jr.** (8.2%), general manager WJZ-TV New York; **Harry W. Bennett Jr.** (8.2%), vice president Sherman & Marquette, N. Y.

† **WROK Rockford, Ill.,** Ch. 13, ERP 316 kw, antenna 314 ft., construction cost $447,000, operating cost $250,000, revenue $300,000.

Urbana, Ill., Illinois Bcstg. Co., Ch. 3, ERP 100 kw, antenna 525 ft., construction cost $338,250, operating cost $261,760, revenue $270,890. Applicant licensee WSOY Decatur.

WGBF Evansville Ind., Ch. 7, ERP 105.3 kw, antenna 543 ft., construction cost $350,000, operating cost $190,000, revenue $190,000.

WANE Ft. Wayne, Ind., Ch. 21, ERP 98.2 kw, antenna 473 ft., construction cost $197,900, operating cost $195,940, revenue $229,950.

WHOT South Bend, Ind., Ch. 46, ERP 91.6 kw, antenna 418 ft., construction cost $206,285, operating cost $192,600, revenue $221,400.

† **KCRG Cedar Rapids, Iowa,** Ch. 9, ERP 35.5 kw, antenna 343 ft., construction cost $200,049, operating cost $190,000, revenue $210,000.

† **KSCJ Sioux City, Iowa,** Ch. 4, ERP 100 kw, antenna 577 ft., construction cost $290,235, operating cost $200,000, revenue $225,000.

KWBW Hutchinson, Kan., Ch. 12, ERP 59 kw, antenna 295 ft., construction cost $176,256, operating cost $120,000, revenue $120,000.

KOAM Pittsburg, Kan., Ch. 7, ERP 105 kw, antenna 540, ft., construction cost $300,323, operating cost $229,020, revenue $237,890.

KAKE Wichita, Kan., Ch. 10, ERP 316 kw, antenna 443 ft., construction cost $571,802, operating cost $402,000, revenue $405,756.

WOMI Owensboro, Ky., Ch. 14, ERP 184 kw, antenna 390 ft., construction cost $279,941, operating cost $245,000, revenue $255,500.

THEATRE TV REPORT

INCOMPLETE tabulation of figures by Theatre Network Television (TNT) indicated Friday theatre telecast of Maxim-Robinson bout filled 90% of total capacity of 38 theatres in 24 cities. TNT said telecast was carried by movie circuits, including those of Paramount Pictures, Loew's, Warner's and RKO.

LUX RATING TOP

Lux Radio Theatre (CBS, Mon., 9-10 p.m. EDT) with 11.1 rating in 4,751,000 homes, was highest once-a-week evening program according to national Nielsen ratings of top network radio programs for week of May 18-24. Top rated programs in other categories included evening, multi-weekly—*One Man's Family* (NBC, 7:45-8 p.m.), 5.2 in 2,226,000 homes; week day, daily—*Romance of Helen Trent* (CBS, 12:30-45 p.m.), 8.4 in 3,595,000 homes; Sunday—*Hollywood Star Playhouse* (NBC, 5-5:30 p.m.), 4.0 in 1,712,000 homes, and Saturday—*Theatre of Today* (CBS, 12-12:30 p.m.), 6.4 in 2,739,000 homes.

PEOPLE...

HARTLEY SAMUELS, formerly responsible for retail sales at WOR New York, will join sales staff of WJZ New York tomorrow (Tuesday) as supervisor of retail sales, William (Bud) Materne announced last Thursday. He replaced Joseph Weisenberg, who will shift to ABC national spot sales department.

EDWARD W. SCUDDER JR., president of WNJR Newark, has been named Essex county chairman for 1952 Sister Elizabeth Kenny Foundation fund-raising campaign.

ROBERT H. DOLBEAR has been appointed sales engineer for instrument division, Allen B. DuMont Labs, Clifton, N. J., according to announcement from E. G. Nichols, technical sales manager. Mr. Dolbear was formerly field service engineer for electronics division of Curtiss-Wright Corp.

JANET (JAN) GILBERT, Henry Cabot Agency, Boston, expected to join Sherman & Marquette, N. Y., as media buyer (radio-TV included), effective July 7.

TRANSISTORS BY BULOVA

BULOVA WATCH Co., New York, called television its principal advertising medium in its annual report last week. John H. Ballard, president, announced that Bulova has concluded licensing arrangement with Western Electric Co. for development and production of transistors. Report listed Bulova earnings for year ended March 31, 1952, of $2,646,063 compared with $3,911,195 in fiscal year.

IN THE HEART OF AMERICA...

It's The

KMBC KFRM

Team and It's

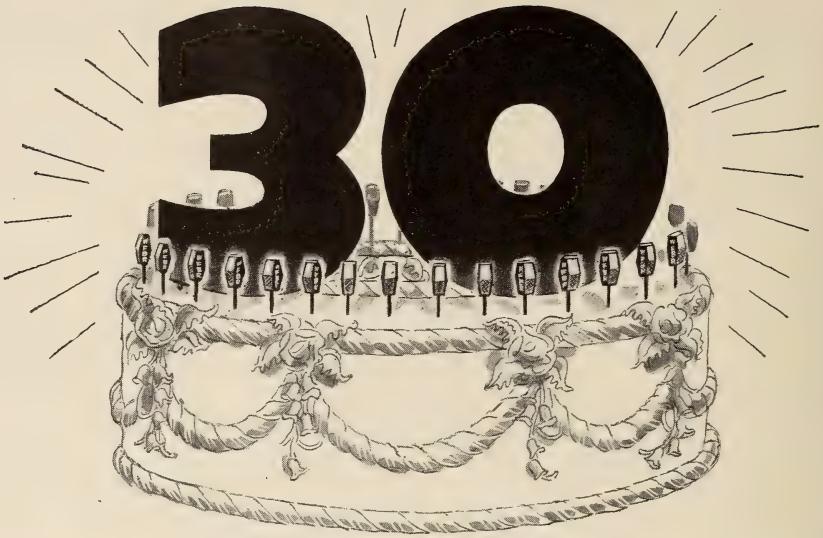
Wholehearted and "Wise"

*"Program-Wise"...**

Does the farmer stop milking his cows during the summer? Ridiculous! No more than the KMBC-KFRM Service Farms stop farming during the summer—or no more than Phil Evans, Bob Riley or Jim Leathers stop passing out that vital farm information to the Heart of America farmer who turns on the radio in his barn to catch KMBC-KFRM farm programs while he gets his milking done. Or no more than the Team's News Department stops disseminating the latest news in eleven daily newscasts. Yes indeed, KMBC-KFRM is "program-wise." Summer time—wintertime, the Team is on-the-air with the kind of programming that it knows from thirty years of broadcasting experience the largest share of the audience will return to, and listen for, day after day.

It is this program wisdom which has long since placed The KMBC-KFRM Team in top spot in The Heart of America—and continues to keep The Team in that spot by a comfortable margin.

* This is the first of a series on The KMBC-KFRM know-how which spells dominance in the Heart of America.



Call KMBC-KFRM or your nearest Free & Peters Colonel for the KMBC-KFRM program story. BE WISE--REALIZE . . . to sell the Whole Heart of America Wholeheartedly it's . . .

CBS RADIO FOR THE HEART OF AMERICA

OWNED AND OPERATED BY MIDLAND BROADCASTING COMPANY

Happy Birthday to Us!

Maryland's pioneer radio station is proud and happy to be among the early birds who celebrate 30 years in radio in 1952.

They've been good years, too. We've done a lot of trailblazing in our community. We originated the first live speech by a President of the United States, we introduced the mobile unit to Maryland, we originated the first regularly sponsored newscast in the whole country, and many, many more.

We intend to continue intelligent pioneering wherever possible. We believe that radio stations have learned much in the past and have much to learn in the future.

Here's a gentle reminder. If you're out to do a real selling job in the Baltimore market, just cut yourself a slice of
